	2024	2025	2025	2025	2025
1. What year was your business established in Ramsey?	2011	1999	1987	2007	1981
2. What is your estimated number of employees?	55	78	30	5	80
3. Besides job creation, how does your business positively affect the community (i.e. community involvement, sponsorships, memberships, etc.)?	<i>In addition to the building we own at 13915 Radium Blvd, Global Glove added a third building right up the street at 6231 McKinley St NW. Global Glove continues to invest in Ramsey as we grow - we enjoy seeing Ramsey grow! Global Glove are proud members of the Chamber of Commerce as well.</i>	<i>We do our best to maintain excellent curb appeal for the business and the community. We sponsor and/or donate to the Happy Day's Festival. We also sponsor and/or donate to the Business appreciation day/golf event. We are an Anoka Area Chamber Member. Support of local business though out the community - Growing the local economy thus creating more revenue for the city to support further community improvements - Contributions to local charities, initiative and event - Also encouraging employees to contribute to local charities in times of need.</i>	<i>Martin Marietta has been an active member of the Ramsey area for many years. On a broad scale, Martin Marietta contributes to many large charitable organizations that serve the community. Organizations such as Boys & Girls Club, United Way, Salvation Army, Feed My Starving Children among others are a part of our charitable giving every year. On a local level, Martin Marietta contributed to the City of Ramsey Kids Safety Camp in 2024 as a Gold-Level Contributor. We routinely work with area technical colleges and universities to provide field experience for students pursuing engineering, environmental science and quality control disciplines. We have maintained active participation in CAER (Community Awareness and Emergency Response) groups serving the metro region for over a decade and we promote safety through programs that help our communities prepare for and respond to emergencies. Lastly, Martin Marietta has been active through the Economic Development Authority annual events including participating in the summer golf tournament.</i>	<i>Allowed residents mobility and leisure. We have assisted in making dreams come true with the Make A Wish Foundation of Minnesota. We have also provided discounts to numerous veteran's groups and several non-profit foundations around Minnesota.</i>	<i>We have a good working relationship with the City (which we are very grateful for). Hopefully our new expansion is contributing to the overall economic climate in Ramsey -- and to the aesthetics of the Core area.</i>
4. What is unique about your business? What makes your business stand out from others?	<i>Operating here locally in Ramsey, MN - Global Glove manufactures and supplies distributors all over the world with Personal Protective Equipment - from gloves to hard hats to safety vests. Unlike some of our competitors, Global Glove and Safety Manufacturing, Inc. is independently owned and operated.</i>	<i>I would say our experience in our core competences - Tooling & Engineering (59 years) - Injection Molding (35 Years) 3D printing (24 years). Reputation for innovation - Vertically integrated - Custom solutions - Customer Centric - High quality - ISO 13485:2016. 55+ years in business, IN'TECH is an industry leader in core technologies and deliver customized solutions by combining product development and quality manufacturing with superior customer, vendor, and employee relations</i>	<i>Unlike many other businesses, the process of asphalt production is completely local due to the limitations on hauling our products and materials long distances. The aggregate materials are mined at Martin Marietta's sand and gravel pits within the area: Maple Grove, Elk River and Monticello. The finished hot asphalt mix produced on site is used on local road and construction projects due to the inability to haul it long distances before it cools. Additionally, the site takes in concrete and asphalt recycle products for use in new asphalt. At the Ramsey Plant, up to 35% of recycled asphalt pavement is incorporated into new asphalt mix. These materials come from local homeowners and businesses, again due to hauling limitations. So from start to finish and back again, everything we do comes from and supports the local community!</i>	<i>Fun small family-owned business. we pride ourselves on being the best in the business. It is our mission to give our clients the best experience possible. We offer parts, service, sales and rentals. Our clients know the value of a dollar and thus they expect the best. Providing them the best product and service is a top priority. We're here to help each customer, from service or sales to renters or the do-it-yourselfer.</i>	<i>We are a family business at heart (with family values), yet we are 100% employee owned. Everyone who works here has a stake in the success of the company.</i>

5. Additional comments, accomplishments or achievements you would like to share?

2024 marks Global Glove and Safety Manufacturing, Inc.'s 21st year in business!

InTech Industries is one of three finalists for the Anoka Area Chamber of Commerce Manufacturing Business of the Year award in 2023! In 2023 InTech was awarded the AMUG DINO Award, this is one of AMUG's most prestigious recognitions. Its goal is to recognize those that have contributed to AM (Additive Manufacturing), with the intent to advance the industry as a whole or to advance the skills/knowledge of individuals, in an altruistic, unselfish way. Received ISO 13485 2016 Certification in 2022.

Martin Marietta has had arguably one of the largest impacts on the residents and businesses of the City of Ramsey in the past few years. The Ramsey Asphalt Plant has been a key figure in the Anoka Highway 10 Project and the Ramsey Gateway Project. This project has eliminated stoplights and alleviated traffic congestion on the Highway 10 corridor, which has improved the quality of life for residents, commuters, businesses and summer vacation travelers alike. As the project winds down to its final completion, the Ramsey Plant will again provide much of the asphalt used in the construction. This will not stop our involvement in the community, however. Ramsey will continue to grow and attract new residents and businesses. The Ramsey Asphalt Plant will be ready with materials to build new roads and improve existina ones for manv years!

N/A

Completed a brand new facility, which quadrupled our size. Includes a new, state-of-the-art training center for bringing partners from around North America to learn about and experience our equipment.
