1. What year was your business established in Ramsey?	2011	1999	1987	2007	2008
2. What is your estimated number of employees?	84	78	30	5	25
3. Besides job creation, how has your business positively affected or been involved with the Ramsey community?	<p><i>In addition to the building we own at 13915 Radium Blvd, Global Glove added a third building right up the street at 6231 McKinley St NW. Global Glove continues to invest in Ramsey as we grow - we enjoy seeing Ramsey grow! Global Glove are proud members of the Chamber of Commerce as well. We take part in the annual golf outing, and our employees support local business every day.</i></p>	<p><i>Our company positively supports the local community by investing in workforce development, community partnerships, and local businesses. We collaborate with Anoka Technical College to encourage employee training and career growth, participate in the Anoka Area Chamber of Commerce, and engage in local networking initiatives that strengthen the local manufacturing community. We also prioritize using local vendors for services such as catering and pre-employment screening, donate to local food shelves and veteran support organizations, and have had several long-term employees choose to relocate to the area, contributing to the local economy and community stability.</i></p>	<p><i>Martin Marietta has been an active member of the Ramsey area for many years. On a broad scale, Martin Marietta contributes to many large charitable organizations that serve the community. Organizations such as Boys & Girls Club, United Way, Salvation Army, Feed My Starving Children among others are a part of our charitable giving every year. On a local level, Martin Marietta contributed to the City of Ramsey Kids Safety Camp in 2024 as a Gold-Level Contributor. We routinely work with area technical colleges and universities to provide field experience for students pursuing engineering, environmental science and quality control disciplines. We have maintained active participation in CAER (Community Awareness and Emergency Response) groups serving the metro region for over a decade and we promote safety through programs that help our communities prepare for and respond to emergencies. Lastly, Martin Marietta has been active through the Economic Development Authority annual events including participating in the summer golf tournament and the</i></p>	<p><i>We have updated the property. Take pride in maintaining a presentable appearance. we supply golf cart rentals for community events. We bring mobility to customers to get around town/neighborhoods. . We have assisted in making dreams come true with the Make A Wish Foundation of Minnesota. We have also provided discounts to numerous veteran's groups and several non-profit foundations around Minnesota.</i></p>	<p><i>Plastics fabrication and machining has contributed to the city of Ramsey by providing economic growth through job creation in manufacturing. Additionally, it supports local businesses and industries that rely on plastic products for various applications, enhancing the community's overall economic stability.</i></p>

4. What is unique about your business? What makes your business stand out from others?	<i>Operating here locally in Ramsey, MN - Global Glove manufactures and supplies distributors all over the world with Personal Protective Equipment - from gloves to hard hats to safety vests. Unlike some of our competitors, Global Glove and Safety Manufacturing, Inc. is independently owned and operated. I believe GGS's international footprint is unique bringing visitors from around the world to Ramsey</i>	<i>Prototype to Production under one roof! An integrated partner like In'Tech Industries brings engineering, tooling, injection molding, precision machining, and rapid prototyping together under one roof. This allows us to communicate more efficiently, solve problems faster, and ultimately, deliver an exceptional outcome for you. When you partner with us on component design from day one, you can be confident that your parts will meet performance, compliance, and quality expectations, from prototype to full-scale production. Our DFM principles shape the success of life sciences products. With early engineering involvement and optimized tooling strategies, you can reduce risk, improve quality, and bring critical healthcare innovations to market faster and more reliably. IN'TECH is an industry leader in core technologies and deliver customized solutions by combining product development and quality manufacturing with superior customer, vendor, and employee relations.</i>	<i>Unlike many other businesses and industries, the process of asphalt production is completely local due to the limitations on hauling our products and materials long distances. The aggregate materials are mined at Martin Marietta's sand and gravel pits within the area: Maple Grove, Elk River and Monticello. The finished hot asphalt mix produced on site is used on local road and construction projects due to the inability to haul it long distances before it cools. Additionally, the site takes in concrete and asphalt recycle products for use in new asphalt. At the Ramsey Plant, up to 35% of recycled asphalt pavement is incorporated into new asphalt mix. These materials come from local homeowners, businesses and roads projects as these groups upgrade and enhance their properties, adding to the continued investment in the Ramsey community. So from start to finish and back again, everything we do comes from and supports the local community!</i>	<i>We offer a wide variety of options, as the golf cart industry isn't just for golfing anymore. It brings transportation for all walks of life in various applications.</i>	<i>By far our great employees and there relentless commitment to our helping our customers</i>
5. Additional comments, accomplishments or achievements you would like to share?	<i>2024 marks Global Glove and Safety Manufacturing, Inc.'s 21st year in business!</i>	<i>ISO 13485:2016 Certified</i> <i>Distinguished Innovator Operators Award (DINO)</i> <i>2023 - The DINO Award is one of AMUG's most prestigious honors. It is bestowed upon those with the highest levels of additive manufacturing expertise and a willingness to share that knowledge through contributions to AMUG, its members and the industry it represents.</i> <i>2013 - Frost and Sullivan Award (BUSINESS WIRE)--Leading rapid prototyping, additive manufacturing and 3D printing service provider, In'Tech Industries Inc.®, today announced its designation as a 2013 Manufacturing Leadership 100 Award (ML100 Award) winner. In'Tech was recognized in the Game-Changing Technologies category along with some of the world's most renowned manufacturers such as; Chrysler Group LLC, Ford Motor Co., GE Aviation Systems, Lockheed Martin, PACCAR Inc., The Boeing Company and Bouthan Missile Systems</i>	<i>Martin Marietta has had arguably one of the largest impacts on the residents and businesses of the City of Ramsey in the past few years. The Ramsey Asphalt Plant has been a key figure in the Anoka Highway 10 Project and the Ramsey Gateway Project. This project has eliminated stoplights and alleviated traffic congestion on the Highway 10 corridor, which has improved the quality of life for residents, commuters, businesses and summer vacation travelers alike. The Ramsey Plant provided much of the asphalt used in the construction and will continue to as additional ancillary projects are undertaken, including lane additions to portions of Highway 10. This will not stop our involvement in the community, however. Ramsey will continue to grow and attract new residents and businesses. The Ramsey Asphalt Plant will be ready with materials to build new roads and improve existing ones for many years!</i>	<i>We keep growing in business every year. We love our location in Ramsey.</i>	<i>Preferred vendor for the medical and semi conductor industries</i>
