Good morning. Here are some pictures of a house that is on a corner and it's next to a park and has a 6 ft wall built on the property line.

And this other house has also a 6 ft wal on the east side front of the house. This one is built in more inside towards the house

We wanted to put these pictures in the report because we have the same situation. In our drawing we did make the wall inside and behind the stop sign to provide more visibility. Thank you for your help.

Hi Jose,

Below are the drawings of how we can do the wall behind the stop sign to give more visibility. Please let me know if you need more clarification.

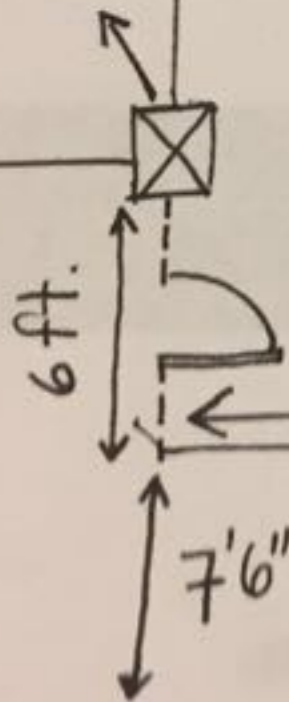

Thank you

Here is another picture with the actual house. These are the same measurements I had send you with the hand drawn picture.

Thank you
