

IGLESIA DE CRISTO DE SAN LUIS, AZ

- a) Our necessities for assembly activities are restricted by a few factors. Parking spots are limited based on the new sanctuary building we wish to build.
- b) Difficultly, it's impossible to make more parking spots, since there is no enough space available. We are located in a residential zone with an adjacent retention pond; therefore the property area is not capable to comply with the parking spots for the new Sanctuary. We know that the number of parking spaces is according to the area of the buildings, but we merely want to point out that the number of parking spaces should be based only on the new sanctuary, as the buildings will not be used simultaneously.
- c) The variation is absolutely crucial to us. Our current building is insufficient for the current activities, and to ensure there is adequate space and complying with better safety conditions for our attendees is immensely essential to build this Sanctuary.
- d) We've never had difficulties with the neighborhood in our 6 years being there. I'm confident we will keep going to be polite with our surroundings.
