1. Staff Presentation

Jose A. Guzman, Director of Planning and Zoning, summarized the staff report recommending approval of Conditional Use Permit Case No. 2023-00387, with the condition that the owner complies with required parking spaces unless the City Council approves a Variance.

Commission Member Goerge Amaya asked if the existing building is the main Assembly Building. How many parking spaces currently exist? **Mr. Guzman** responded that they now have six parking spaces and are in compliance with the requirements. **Amaya** stated the following question regarding the occupancy load: is this an increase in occupancy or similar to the existing main assembly building? The new facility will be for the assembly, and the current one will be for the classroom. However, the requirements are based on the square footage.

Vice Chairman Javier Barraza asked if the proposed expansion is the one that is triggering more parking requirements. **Guzman** responded that they are adding 1,740 square feet to the use. **Chairman Pinzon** asked if nine parking spaces are required, and right now, they are providing six parking lots. In the future, they must develop the nine parking spaces or apply for a variance. **Guzman** responded yes. The site plan they have is currently proposing six parking spaces. So, they might be able to come up with nine or reduce the square footage of the proposed building, or they can apply for a variance. We will be presenting this item at the same meeting. However, they must provide the required parking if the request is denied.

Barraza asked how many accessible parking spaces are needed. **Guzman** responded with one parking space. **Commission Member Veronica Zavala** asked if the applicant had redone the site plan and if they could create more parking spaces. Was that option discussed? **Guzman** responded that it was mentioned to the applicant that they could redo the parking area or apply for a variance. **Amaya** asked the applicant to propose the six parking spaces; however, could there be a variance to reduce the dimensions of the parking space? **Guzman** stated that there's a standard for parking space sizes, which we follow. We can review the variance for the number of parking spaces but not the dimensions.

Noe Rivera, Rivera Studio, stated that the intention to reduce the number of parking spaces is that the two uses for the church and the multi-purpose room parking spaces add up. The church's service works differently; both buildings will not be used simultaneously. Therefore, I am asking if you can please consider how the function of a church operates.

Vice Chairman Barraza explained to the applicant that one of his options would be to obtain the variance, provide the nine parking spaces, or reduce the size of the proposed building. **Barraza** also asked staff if on-street parking is an option for the applicant. **Guzman** explained that the parking is required to have onsite parking, and we have a specification based on the use. They have a long retention basin next to the church for on-street parking. Still, that parking cannot be counted towards the requirement as Vice Chairman Barraza mentioned the recommendation from staff is for the owner to comply with required parking spaces unless the City Council approves a variance.
