JOB NO. B777

FINAL PLANS ISSUED FOR BID

W:\B777\Engineering\B777 - 3MGD Exp\3MGD FINAL DSN\sheets\B777-C2.1 HORIZONTAL CONTROL PLAN.dwg - Tab: C2.1 - by wwright on 01/26/26 at 3:15:45 PM

CONSTRUCTION NOTES:

1. INSTALL 3" ASPHALT OVER 8" AGGREGATE BASE COARSE PER GEOTECHNICAL REPORT WITH TYPE A THICKENED EDGE PER PER DETAIL: C/C6.0
2. INSTALL CONCRETE RETAINING WALL PER STRUCTURAL PLANS.
3. INSTALL ACCESS GATE PER DETAIL: D/C6.3
4. RELOCATE AND INSTALL NEW CHAIN LINK FENCE WHERE REQUIRED PER DETAIL F/C6.0 MATCH EXISTING.
5. INSTALL 3' CONCRETE SWALE PER DETAIL: F/C6.2
6. INSTALL PROTECTIVE BOLLARD PER DETAIL: D/C6.2
7. INSTALL GATE CARD READER PER CITY SPECIFICATION.
8. INSTALL 3" DG OVER COMPACTED NATIVE PER SPECIFICATIONS.
9. REMOVE EXISTING RETAINING WALL.

EARTHWORK ESTIMATE

CUT	773	Cu. Yd.
FILL	7,180	Cu. Yd.
NET	6,407	Cu. Yd. <FILL> ADJUSTED FOR 20% SHRINKAGE

CONTRACTOR SHALL VERIFY EARTHWORK QUANTITIES
ESTIMATED FILL INCLUDES FILL FOR PROPOSED OPERATIONS BUILDING

YARD PIPING PLAN

SCALE: 1" = 30'

DETAIL

SCALE: 1" = 20'

CONSTRUCTION NOTES:

1. INSTALL 24" DIP EFFLUENT LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES.
2. INSTALL 24" 45° MJ ELBOW WITH RESTRAINTS
3. INSTALL 24"x18" 90° MJ REDUCING ELBOW WITH RESTRAINTS, TIE TO EXISTING 18" EFFLUENT LINE.
4. INSTALL 20" PVC C900 EQ LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES.
5. INSTALL 20" MJ PLUG VALVE WITH VALVE BOX PER DETAIL: E / C6.0 SEE MECHANICAL FOR CONTINUATION .
6. INSTALL 20" 45° MJ ELBOW WITH RESTRAINTS.
7. REPLACE 6" WITH NEW 12" DIP EQ DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
8. INSTALL 12"x6" 45° MJ REDUCING ELBOW WITH RESTRAINTS.
9. INSTALL 12"x12"x6" MJ WYE WITH RESTRAINTS.
10. INSTALL 6" PVC C900 EQ DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
11. INSTALL 6" PVC C900 CIP DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
12. INSTALL 6" PVC C900 NPW LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES.
13. INSTALL 6" PVC C900 WAS LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES.
14. INSTALL 6" MJ TEE WITH RESTRAINTS.
15. INSTALL 6" MJ WYE WITH RESTRAINTS.
16. INSTALL 6" 45° MJ ELBOW WITH RESTRAINTS.
17. INSTALL 6" 22.5° MJ ELBOW WITH RESTRAINTS.
18. INSTALL 6" MJ PLUG VALVE WITH VALVE BOX PER DETAIL: E / C6.0
19. INSTALL 6" PVC SCH 80 CIP LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES.
20. INSTALL 6" 90° PVC SCH 80 ELBOW.
21. INSTALL 2" PVC SCH 80 POTABLE WATER LINE WITH ASSOCIATED FITTINGS AND APPURTENANCES, TIE INTO EXISTING SITE POTABLE WATER SYSTEM.
22. INSTALL 8" SDR 35 PVC GRAVITY DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
23. INSTALL 8" 22.5° SDR 35 PVC ELBOW.
24. INSTALL 8" 45° SDR 35 PVC ELBOW.
25. INSTALL 8" SDR 35 PVC WYE.
26. INSTALL 8"x4" 45° SDR 35 PVC REDUCING ELBOW.
27. INSTALL 6" SDR 35 PVC GRAVITY DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
28. INSTALL 6"x6"x4" SDR 35 PVC WYE.
29. INSTALL 6"x4" SDR 35 PVC REDUCER.
30. INSTALL 4" SDR 35 PVC GRAVITY DRAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
31. INSTALL 4" 45° SDR 35 PVC ELBOW.
32. INSTALL 48" PRECAST CONCRETE MANHOLE PER DETAIL: E / C6.1
33. TRENCH AND BACKFILL PER DETAIL: B / C6.1
34. TIE INTO EXISTING GRAVITY DRAINS, CAP EXISTING PIPES DOWNSTREAM OF TIE IN, MAINTAIN MINIMUM 1% SLOPE TO INVERT AT NEW SEWER MANHOLE.
35. TIE INTO EXISTING 6" WAS LINE.
36. INSTALL 6" PVC C900 PLANT DRAIN FORCE MAIN WITH ASSOCIATED FITTINGS AND APPURTENANCES.
37. INSTALL 20" 45° DI FLANGED ELBOW, REFERENCE SHEET M1.1 FOR CONTINUATION EACH WAY.
38. INSTALL 12" DI CAP.
39. INSTALL 18" DI CAP.
40. INSTALL 4" PVC CAP.

POST DETAIL

NOTES

1. All concrete shall be Class C per MAG Section 725.
2. Fence fabric shall be nine gauge / 2" mesh chain link.
3. Strain posts shall be spaced at 500' intervals (maximum).
4. Both corner and strain posts shall have at least one strain panel.
5. All posts shall be capped and plumb.
6. Fence shall not extend into visibility triangles at alleys, driveways and street intersections.
7. Fences built in front yard setbacks shall have a maximum height of three feet (3').
8. Construction and materials shall conform to MAG Sections 420 and 772 respectively. See MAG Table 772-1 for weight of member

NOTES

1. In order to protect the public water systems from possible contamination, a water main and/or water service line shall not be placed:
   A. Within seven (7) feet, horizontal distance of either side of a sewer manhole, sewer main or sewer service, and below two (2) feet vertical distance, above the top of the sewer line unless extra protection is provided. Extra protection shall consist of constructing the sewer main with mechanical joints or with approved no-hub joints encased in a minimum of 6" thick by 18" long concrete collar centered on the joint.
   B. Within 2 feet horizontally and 2 feet below the sewer main.
2. For extra protection use molecularly oriented polyvinyl chloride (PVCO) which meets ANSI/AWWA C909 installed at crossing location per drawing.
3. Water over sewer:
   2' or less separation: C909 required
   Over 2' separation: C909 not required.
   Sewer over water:
   C909 is required no matter the distance of separation.
4. All ferrous fittings, pipe, connectors and appurtenances shall receive a 10mil (minimum) polyethylene wrap to prevent direct contact with soil.
5. All sewer lines shall have tracer wire in accordance with State Law and City utility department policy.

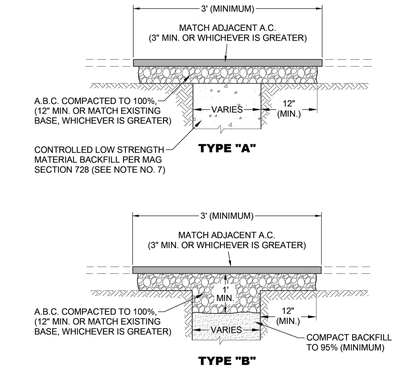
NOTES



1. Native soil may be used for backfill when approved by the City Engineer.
2. Controlled low strength material shall consist of one sack of cement per cubic yard of clean sand.
3. Bedding shown is a minimum standard for shallow trenches and acceptable native base. Exact type of bedding shall be determined by the City Engineer.
4. Ditch sides shall be sloped or shored as required per OSHA standards.
5. All trenches shall be cold-patched if left open to traffic. All trenches shall be hot-mix paved within two (2) weeks of its excavation.

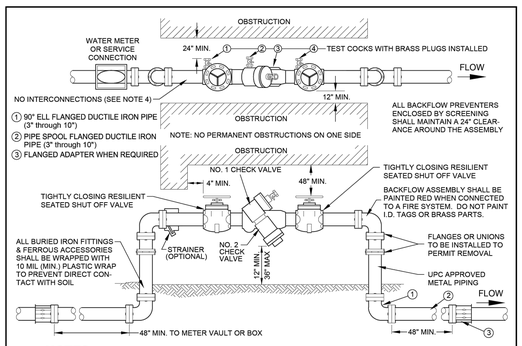
TYPICAL WATER & SEWER MAIN TRENCH BACKFILL N.T.S. B

NOTES



1. This detail is to be used for trench backfill and pavement replacement.
2. All cut edges shall be sawcut to a true regular line and free of all foreign matter.
3. Edges of asphalt pavement shall be painted with emulsified asphalt or hot asphalt before permanent repair material is placed.
4. Type "B" repairs will not be permitted without prior approval of the City Engineer.
5. Asphaltic concrete for pavement repairs shall meet or be equivalent to requirements of the latest MAG Standard Specifications Section 710.
6. Pavement replacement in State highways or County highways shall be in accordance with ADOT and/or Yuma County requirements.
7. Controlled low strength material shall consist of one sack of cement per cubic yard of clean sand.
8. All trenches shall be cold-patched if left open to traffic prior to hot-mix paving. All trenches shall be hot-mix paved within two (2) weeks from its excavation.

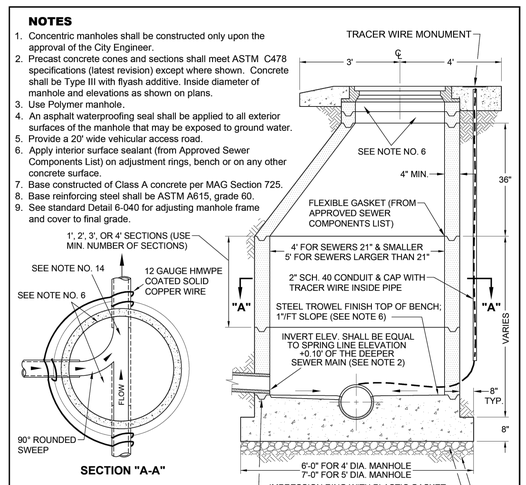
PAVEMENT REPLACEMENT N.T.S. C

NOTES

1. A permit is required before installing or replacing a backflow assembly. Permits are obtained at the Department of Community Development, 1 City Plaza (SW corner of Madison Ave. and 3rd St.).
2. For a list of approved backflow assemblies, refer to the University of Southern California Foundation for Cross-Connection Control and Hydraulic Research.
3. The D.C.V.A. shall be installed outside, above ground, as close to the water meter as possible. The D.C.V.A. shall be located on private property unless otherwise authorized.
4. There shall be no other piping connected to the piping between the water meter and the backflow assembly except for parallel assembly installations.
5. Installations shall meet all current uniform plumbing codes in addition to the City of Yuma building codes.
6. Installations shall be left exposed until inspected and approved by the City of Yuma.
7. If this unit is installed to serve a retention basin, this unit shall be placed a minimum of 12" (36" maximum) above the flood rim of the retention basin.
8. Protective cages are optional and will meet clearance, access and drainage requirements. Tamperproof switches may be required on fire backflow assemblies.
9. It is recommended that backflow assemblies be protected from the elements. Care shall be taken to ensure that the protection does not hinder the assembly's operation.
10. Approval from the City of Yuma Fire Marshal is required before any backflow assembly is connected to any fire system.
11. All backflow units are to be tested by a certified professional prior to final approval. Backflow units shall be tested on an annual basis.
12. The installation of a backflow assembly may create a closed system. Consult with the City of Yuma Building Official for pressure relief valves, thermal expansion or other needed requirements.



For additional information contact the City of Yuma Pretreatment Section at (928) 373-4544.

SUGGESTED SEQUENCING FOR TRANSITIONING TO INTENSIFICATION PROCESS BY WORLD WATER WORKS (INTENSIFICATION UP TO 1.4 MGD)

1. INSTALL PROCESS EQUIPMENT AND PIPING FOR INSTENSIFICATION. SEE PLAN AND SECTION HERIN, SPECIFICATIONS AND WORLD WATER WORKS DETAIL A, SHEET M12.6.
2. OPERATE SBR 1-4 LIKE NORMAL BUT START TO INTENSIFY BASIN 4.
3. GRADUALLY INCREASE FLOW TO BASIN 4 AS INTENSIFICATION PROCESS MATURES AND SLOWLY REMOVE BASINS 1/2 AND THEN BASIN 3. INSTALL ISOLATION WALL IN DECANT CHANNEL FOR ISOLATION PER STRUCTURAL PLANS.
4. ONCE BASINS 1& 2 ARE REMOVED, INSTALL NEW CANOPY AND RELOCATE SBR BLOWERS TO NEW LOCATION AT BASIN 4 , RE-PIPE AND MODIFY ELECTRICAL PER PLAN. THESE WILL BECOME THE FEB BLOWERS.
5. DIRECT ALL FLOW TO SCREENS 5 THRU 8. REMOVE EXISTING HEADWORKS SCREENS 1 THRU 4.

SHEET **D1.3**

24 OF 209 SHEETS

JOB NO. B777

FINAL PLANS ISSUED FOR BID

W:\B777\Engineering\B777 - 3MGD Exp\3MGD FINAL DS\sheets\B777 - DEMOLITION.dwg - Tab: D1.3 - by wwright on 02/02/26 at 4:35:19 PM

SUGGESTED SEQUENCE OF CONSTRUCTION FOR MAIN WWTP CONVERSION

STAGE 1 :
- a. COMPLETE INTENSIFICATION PROCESS IN SBR 4 (SEE D1.0)
- b. OPERATE EFFLUENT DISCHARGE AND EFFLUENT PUMP STATION AS IS
- c. ALL WASTE ACTIVATED SLUDGE WILL BE WASTED TO SLUDGE DRYING BEDS

STAGE 2 :
- a. REDUCE FLOW TO 1 MGD BY DIVERTING EXCESS FLOW TO EAST WWTP
- b. PROVIDE TEMPORARY PIPING FROM PLANT DRAIN PUMP STATION TO SCREENS 5-8
- c. INSTALL TEMPORARY CATCH BASIN AND SUMP PUMP AT SCREENS 5-8 WITH DRAIN LINE FROM EXISTING SCREEN

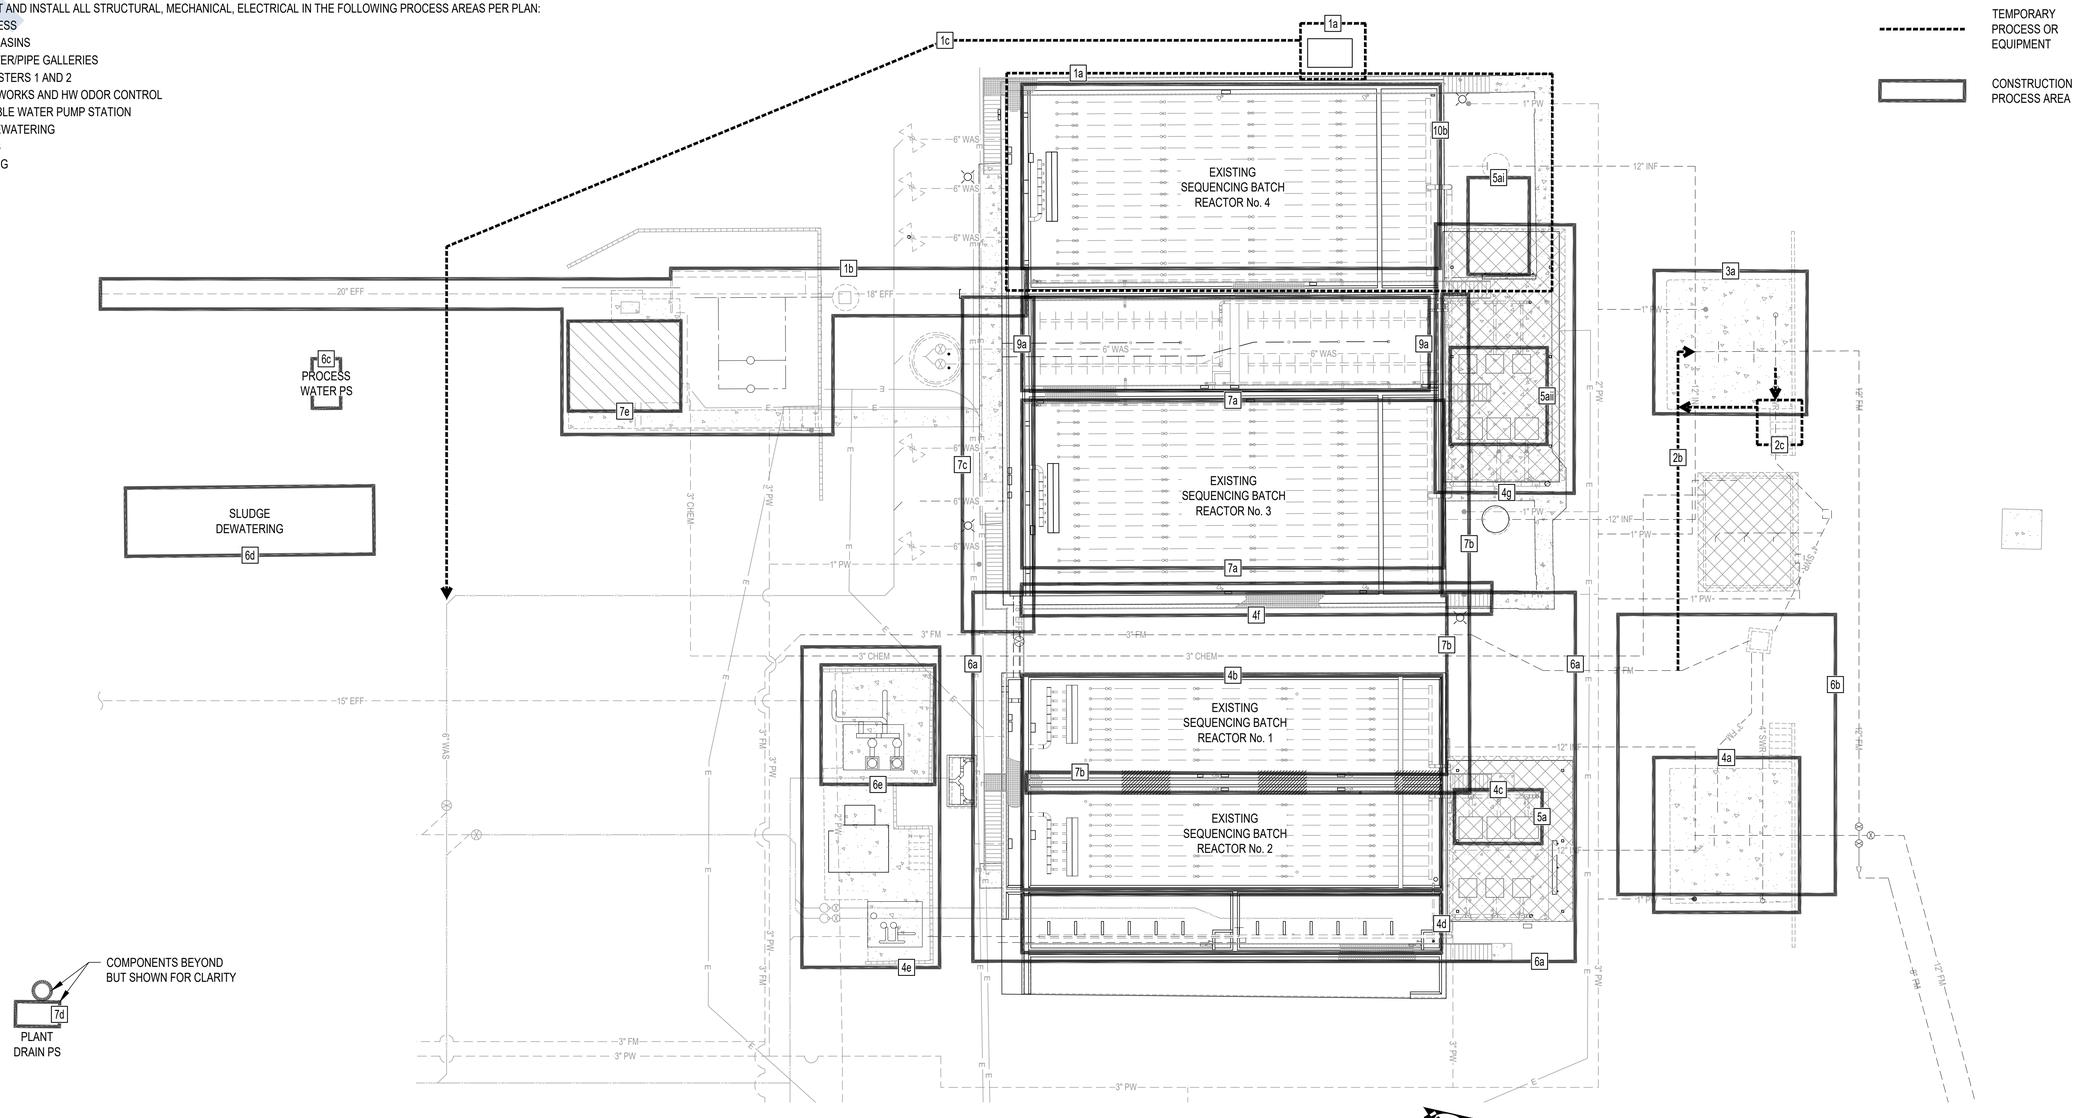
STAGE 3 :
- a. DIVERT ALL FLOW TO SCREENS 5-8 AND ONLY OPERATE SBR 4 (WITH INTENSIFICATION)

STAGE 4 : DEMO AND/OR REMOVE THE FOLLOWING:
- a. SCREENS 1-4
- b. SBRs 1 AND 2
- c. SBRs 1 AND 2 AERATION BLOWERS
- d. DIGESTERS 1 AND 2
- e. SLUDGE PUMPS, ODOR CONTROL, AND OLD EFFLUENT PUMPS
- f. EASTERN WALKWAY AND HANDRAIL ON SBR 3
- g. DEMO SBRs 3 AND 4 AERATION BLOWER CANOPY
- h. CLEAN OUT SBR3 AND DIGESTERS 3 &4 BUT KEEP AS EMERGENCY STORAGE WITH TEMPORARY TRANSFER PUMPS UNTIL STAGE 7

STAGE 5 :
- a. MOVE SBRs 1 AND 2 AERATION BLOWER AND INSTALLED AT FEB BASIN LOCATION PER PLAN
  - i. CONNECT NEW FEB BLOWER TO SBR 4 AIR MANIFOLD
  - ii. DEMO SBR AND DIGESTER PROCESS BLOWERS

STAGE 6 : CONSTRUCT AND INSTALL ALL STRUCTURAL, MECHANICAL, ELECTRICAL IN THE FOLLOWING PROCESS AREAS PER PLAN:
- a. MBR PROCESS
  - i. MBR BASINS
  - ii. BLOWER/PIPE GALLERIES
  - iii. DIGESTERS 1 AND 2
- b. NEW HEADWORKS AND HW ODOR CONTROL
- c. NON-POTABLE WATER PUMP STATION
- d. SLUDGE DEWATERING
- e. FEB PUMPS
- f. YARD PIPING

STAGE 7 :
- a. IMPROVEMENTS TO SBR 3 FOR CONVERSTION TO PROCESS TRAINS 1 AND 2
- b. CONSTRUCT MLSS CHANNEL
- c. CONSTRUCT AND INSTALL FEED FORWARD CHANNEL AND EQUIPMENT
- d. PLANT DRAIN PUMP STATION (DIVERT TEMPORARY WAS FROM INTENSIFICATION TO SLUDGE DEWATERING UNIT)
- e. IMPROVE CHEMICAL BUILDING AND CIP PIPING
- f. KEEP DIGESTERS 3 & 4 AS EMERGENCY STORAGE UNTIL STAGE 9



STAGE 8 : START UP MBR PROCESS
- a. SEEDING PROCESS TRAINS 1 AND 2
  - i. DIVERT PARTIAL INFLUENT FLOW TO NEW HEADWORKS AND PROCESS TRAINS 1 AND 2
  - ii. USE INTENSIFICATION WAS TO SEED PROCESS
    1. SEED MUST BE TEMPORARY PIPE TO NEW HEADWORKS SCREEN TO ENSURE SEED IS CLEAN FROM TRASH
  - iii. START MBR PROCESS - AS PROCESS MATURES, DIVERT MORE FLOW TO MBR PROCESS

STAGE 9 :
- a. IMPROVEMENTS TO DIGESTERS 3 AND 4
- b. REUSE DISTRIBUTION PIPE

STAGE 10 :
- a. REMOVE INTENSIFICATION PROCESS EQUIPMENT ONCE MBR PROCESS IS FULLY OPERATIONAL
- b. CONVERT SBR 4 TO FEB BASIN
- c. COMPLETE ALL REMAIN SCOPE INCLUDING ALL SITE WORK, DEMO, AND ALL UPGRADES REQUIRED BY THE CONTRACT DOCUMENTS

SUGGESTED ELECTRICAL SEQUENCE OF CONSTRUCTION

1. INSTALL TEMPORARY INTENSIFICATION PACKAGED PLANT SKID. ROUTE TEMPORARY SOOW MULTICONDUCTOR CABLE PROTECTED IN HEAVY DUTY CABLE PROTECTOR (POWER RAMP) FROM MCC-N1 TO POWER SKID-MTD. MOTOR CONTROL PANEL. ALTERNATIVELY, USE A SPARE CONDUIT TO TEMPORARILY ROUTE THE FEEDER CABLE AND REMOVE THE CABLE ONCE THE INTENSIFICATION IS COMPLETED.
2. INSTALL FIELD PULLBOXES, DUCT BANKS, CONDUITS, CONDUCTORS, AND ALL FIELD PANELS/EQUIPMENT.
3. INSTALL NEW MCC-1, ACTIVE HARMONIC FILTER, XFMR-EA, PANEL-EA, MBR PLC PANEL, AND MAIN PLC PANEL INSIDE THE EXISTING ELECTRICAL ROOM.
4. REPLACE PANEL H1
5. INSTALL AND COMMISSION NEW SERVICE ENTRANCE SECTION.
6. DECOMMISSION AND REMOVE EXISTING STANDBY GENERATOR 1
7. RELOCATE EXISTING STANDBY GENERATOR. INSTALL TEMPORARY POWER CABLES FROM THE STANDBY GENERATOR 2 TO THE EXISTING ATSs/MTSs.
8. INSTALL THE AUTOMATIC TRANSFER SWITCH AND MAIN SWITCHGEAR.
9. INSTALL AND COMMISSION (2) NEW 500 KW STANDBY GENERATORS SOUTHWEST OF ELECTRICAL ROOM.
10. DECOMMISSION AND REMOVE EXISTING STANDBY GENERATOR 2.
11. RE-ROUTE FEEDER POWER FOR PANEL H1 FROM MCC-E2 TO MCC-1.
12. REPLACE EXISTING AC UNITS AT ELECTRICAL ROOM. POWER NEW AC UNITS FROM PANEL-EA.
13. DECOMMISSION AND REMOVE EXISTING MCC-E2 ONCE EXISTING LOADS HAVE BEEN DECOMMISSIONED AND RETURN TO CITY. INSTALL NEW MCC-2.
14. COMMISSION ALL NEW LOADS ON MCC-1 AND MCC-2.
15. DECOMMISSION AND REMOVE MCC-E1 AND MCC-N1.
16. REMOVE EXISTING SERVICE ENTRANCE SECTION, ATS #1/2, MTS #1/2, AND CONTROL PANELS INSIDE ELECTRICAL ROOM AND RETURN TO CITY.

JOB NO. B777

FINAL PLANS ISSUED FOR BID

W:\B777\Engineering\B777 - 3MGD Exp\3MGD FINAL DS\Sheets\B777 - M1.0 HW STRUC PLAN.dwg - Tab: M1.0 - by vwright on 02/02/26 at 3:28:35 PM

CONSTRUCTION NOTES:

1. CONSTRUCT ODOR CONTROL DUCTING PER SHEET M1.4
2. CONSTRUCT 2" SERRATED, UNPUNCHED FRP PLANK GRATING, SEE SPECS
3. CONSTRUCT PRE-ENGINEERED STRUCTURE ACCESS STAIRS AND PLATFORM (PROVIDED AS DEFERRED SUBMITTAL)
4. CONSTRUCT PRE-ENGINEERED GUARD RAIL PER DETAIL: B / M11.3
5. CONSTRUCT GRIT VORTEX BRIDGE, SEE STRUCTURAL PLANS
6. CONSTRUCT 8" THICK KNEE WALL, SEE STRUCTURAL PLANS
7. INSTALL 1'-6" WIDE SELF-CONTAINED 316 SS SLIDE GATE PER SPECIFICATIONS
8. INSTALL PRE-ENGINEERED CANOPY SHADE STRUCTURE PER SPECS
9. INSTALL SHADE CANOPY STRUCTURAL FOUNDATION PER CANOPY VENDOR REQUIREMENTS
10. ROLL-OFF DUMPSTERS PROVIDED BY CITY
11. INSTALL 6" Ø DIP
12. INSTALL 6" D.I. 90° BEND (MJ x MJ)
13. INSTALL 6" D.I. 90° BEND (FLG x FLG)
14. INSTALL PIPE SUPPORT, SIZE PER PLAN, PER DETAIL: S1 / M11.4
15. INSTALL 20" Ø DIP
16. INSTALL 20" D.I. ELBOW EMBEDDED IN CONCRETE (MJ x MJ)
17. INSTALL STAIRS PER STRUCTURAL PLANS
18. INSTALL LINK SEAL, SIZE PER PLAN, PER DETAIL: A / M11.1
19. INSTALL 4" FLOOR DRAIN w/ PROSET TRAP GUARD SYSTEM. ROUTE 4" SCH. 80 PVC DRAIN IN FLOOR TO PROCESS CHANNEL E / M11.0
21. INSTALL 4" GLASS LINED D.I.P. (FLG x FLG)
22. INSTALL 4" GLASS LINED D.I. 90° BEND (FLG x FLG)
23. INSTALL 4" GLASS LINED D.I. 45° BEND (FLG x FLG)
24. SHADE CANOPY ROOF OVERHANG, SEE STRUCTURAL
25. INSTALL 20" BURIED SERVICE PLUG VALVE W/ VALVE CAN (MJ)
26. INSTALL 20" D.I. 45° BEND (FLG x FLG)
27. INSTALL 20" x 16" D.I. REDUCER (FLG x FLG)
28. INSTALL 16" ELECTROMAGNETIC FLOW METER (FLG x FLG)
29. INSTALL 16" DIP (FLG x FLG)
30. INSTALL 20" ELECTRICALLY ACTUATED PLUG VALVE (FLG x FLG)
31. INSTALL 2MM FINE SCREEN WEIR (PROVIDED BY HEADWORKS VENDOR)
32. INSTALL 6MM COARSE SCREEN WEIR (PROVIDED BY HEADWORKS VENDOR)
33. INSTALL GRIT RAMP/BAFFLE (PROVIDED BY HEADWORKS VENDOR)
34. INSTALL LEVEL SENSOR (PROVIDED BY HEADWORKS VENDOR)
35. CONSTRUCT PIPE PENETRATION THROUGH SOLID GRATING, SEAL PENETRATION WITH RUBBER BOOT OR EQUIVALENT, FIELD LOCATE AND SIZE PER PLAN (TYP. OF ALL FRP DECK PENETRATIONS)
36. INSTALL 4" SCH 40 PVC DRAIN LINE, CONNECT TO WASHER/COMPACTOR DRAIN WITH FLEXIBLE 90° ELBOW, ROUTE AND SLOPE TO CHANNEL (TYP. OF EACH COMPACTOR)
37. INSTALL 6" PLUG VALVE (FLG'D)
38. CONSTRUCT 4'-0" WIDE CONCRETE STAIRS ON GRADE PER STRUCTURAL PLANS

JOB NO. B777

FINAL PLANS ISSUED FOR BID

CONSTRUCTION NOTES:

1. INSTALL 3FT STEEL MAN-DOOR
2. INSTALL CAST IN PLACE CONCRETE WALL PER STRUCTURAL PLANS
3. INSTALL 10FT-WIDE ROLL UP DOOR
4. INSTALL 6" Ø SCH 80 PVC CIP PIPE AND FITTINGS
5. INSTALL 10" BUTTERFLY VALVE
6. INSTALL 24" DIP BLIND FLANGE
7. INSTALL 18" Ø SCH. 10 STEEL MBR SCOUR AIR PIPE AND FITTINGS
8. INSTALL 2-1/2" THICK ALUMINUM OPEN GRATING (3FT WIDE PANELS) SEE SPECS
9. INSTALL 3" Ø SCH 80 PVC PIPE & FITTINGS FOR MBR SCOUR AIR
10. INSTALL 3" Ø SCH 80 PVC PERMEATE PIPE AND FITTINGS
11. 2" PERMEATE LATERALS - CLEAR ACRYLIC SCH 80 PVC (TYP. OF 16 PER BASIN)
12. 1/2" SAMPLING PORT WITH ISOLATION BALL VALVE
13. INSTALL 16" Ø SCH 10 STEEL PERMEATE PIPE AND FITTINGS
14. INSTALL 12" BUTTERFLY VALVE
15. INSTALL 4" Ø SCH 80 PVC CIP PIPE AND FITTINGS
16. INSTALL 3'-0" x 3'-0" (CLEAR OPENING) SAFETY ACCESS HATCH WITH LADDER TO VAULT BELOW, SEE SPECIFICATIONS
17. INSTALL 3'-0" x 4'-0" (CLEAR OPENING) SAFETY ACCESS HATCH WITH LADDER TO VAULT BELOW
18. INSTALL METAL LADDER TO ACCESS LEVEL BELOW
19. INSTALL ELECTRICALLY ACTUATED 24" BUTTERFLY VALVE (LUGGED)
20. INSTALL 2" Ø POTABLE WATER LINE FOR EVAP COOLER INLET
21. CONTRACTOR TO PROVIDE KNOCKOUT IN CONCRETE ROOF SLAB FOR FUTURE PIPE PENETRATION - SEE ALSO STRUCTURAL PLANS
22. INSTALL DIGESTER FINE BUBBLE TUBE DIFFUSERS INCLUDING HEADER AND SUPPORT ASSEMBLY (PROVIDED BY AERATION VENDOR)
23. INSTALL TURBIDITY METER TYPICAL PER DETAIL: A / M11.5
24. INSTALL 1" PERMEATE VENT WITH SS ACTUATOR BALL VALVE (PROVIDED BY MBR VENDOR)
25. INSTALL 4" PVC PLUG CAP FOR FUTURE CIP FILL LINE TIE-IN CONNECTION
26. INSTALL 6" PVC PLUG CAP FOR FUTURE CIP FILL LINE TIE-IN CONNECTION
27. INSTALL 6" x 4" REDUCING PVC ELBOW

MBR UPGRADES PLAN - LEVEL 2

CONSTRUCTION NOTES:

1. INSTALL 20" Ø DIP MBR FEED PIPE AND FITTINGS W/ MECH. RESTRAINT
2. INSTALL 24" Ø DIP PERMEATE LATERAL PIPE AND FITTINGS W/ MECH. RESTRAINT
3. INSTALL 12" Ø DIP PERMEATE LATERAL PIPE AND FITTINGS W/ MECH. RESTRAINT
4. INSTALL 12" Ø BF VALVE WITH WORM GEAR AND HANDWHEEL ACTUATOR
5. INSTALL 20" SIDE ACCESS PLUG VALVE WITH WORM GEAR AND HANDWHEEL ACTUATOR
6. INSTALL CONCRETE SLAB PER STRUCTURAL PLANS
7. INSTALL 6" Ø C900 CIP DRAIN PIPE AND FITTINGS
8. INSTALL 6" DIP TEE WITH BLIND FLANGE
9. INSTALL 36" Ø DIP FEED FORWARD RAS PIPE AND FITTINGS W/ MECH. RESTRAINTS
10. INSTALL 12" BFV VALVE WITH ELECTRIC ACTUATOR (PROVIDED BY MBR VENDOR)
11. INSTALL 6" SS BFV VALVE W/ ELECTRIC ACTUATOR
12. INSTALL 12" Ø 304 SS PERMEATE LATERAL PIPE AND FITTINGS
13. INSTALL 20" Ø DIP BLIND FLANGE
14. SAW CUT DRAIN LINE TIE-IN FOR PIPE GALLERY 4
15. INSTALL 36" x 20" TEE WITH MEGALUG FITTINGS
16. INSTALL 36" Ø DIP BLIND FLANGE
17. INSTALL 24" x 12" WYE WITH MEGALUG FITTINGS, ROTATE WYE TO MATCH INVERT OF 12" PIPE AT 45° ELBOW
18. INSTALL 12" 45° MJ ELBOW (TYP. OF 6)
19. NOT USED
20. INSTALL 12" TRANSITION COUPLING (DIP TO 304SS)
21. INSTALL 6" PVC PLUG CAP FOR FUTURE CIP DRAIN LINE TIE-IN CONNECTION
22. INSTALL 1/2" PIPE TAP PER DETAIL: C M11.1 / CONNECT 1/2" PVC SCH 40 PVC DRAIN PIPE TO TURBIDITY METER PER DETAIL: A M11.5
23. INSTALL 14" Ø STEEL EXHAUST DUCTING (18 GAUGE MIN.)
24. INSTALL RECTANGULAR DUCT MOUNTED GRILL

MBR SECTION - 1

SCALE: 1/4" = 1'-0"

MBR SECTION - 2

SCALE: 1/4" = 1'-0"

CONSTRUCTION NOTES:

1. CONSTRUCT OVERHEAD CRANE BEAM AND SUPPORT COLUMN PER STRUCTURAL PLANS
2. INSTALL 24" Ø SCH. 10 STEEL AIR PIPE AND FITTINGS
3. INSTALL 18" Ø SCH. 10 STEEL AIR PIPE AND FITTINGS
4. INSTALL 10" Ø SCH 10 STEEL PRE-AIR BLOWER DISCHARGE PIPE
5. INSTALL 10" BUTTERFLY VALVE LUGGED CONNECTION
6. INSTALL 10" Ø SCH. 10 STEEL AIR PIPE AND FITTINGS
7. INSTALL 36" x 20" DIP TEE
8. INSTALL 20" Ø D.I. PIPE AND FITTINGS FOR MBR FEED
9. INSTALL PRESSURE TRANSMITTER PER DETAIL: B/M11.1 (PROVIDED BY MBR VENDOR)
10. INSTALL 24" Ø DIP MBR PERMEATE/EFFLUENT PIPE AND FITTINGS W/ MECH. RESTRAINTS (TYP.)
11. INSTALL 12" BUTTERFLY VALVE WITH ELECTRIC ACTUATOR (PROVIDED BY MBR VENDOR)
12. INSTALL 12" MAG FLOW METER (PROVIDED BY MBR VENDOR)
13. INSTALL 12" Ø DIP MBR PERMEATE PIPE AND FITTINGS
14. INSTALL 6" Ø DIP CIP DRAIN PIPE AND FITTINGS (TYP)
15. INSTALL 16" Ø 304 SS PERMEATE PIPE MANIFOLD AND ALL REQUIRED FITTINGS AND APPURTENANCES (TYP.) SEE DETAIL: B/M11.3
16. INSTALL 12" LUG STYLE BUTTERFLY VALVE
17. INSTALL 3" TRANSITION COUPLING PVC TO ACRYLIC PIPE
18. INSTALL 3" Ø MBR PERMEATE LINE MINIMUM OF 2.5 FT. BELOW THE OUTLET TO BE CLEAR ACRYLIC PVC PIPING
19. INSTALL 1" Ø SCH. 80 PVC TEE
20. INSTALL 6" Ø C900 PVC FOR CIP PIPE AND FITTINGS
21. INSTALL 20" WITH SPOOL AND BLIND FLANGE
22. FRP OPEN GRATING ABOVE MLSS CHANNEL, SEE SPECIFICATIONS
23. INSTALL 6" BUTTERFLY VALVE (FLG'D)
24. INSTALL 8" SCH. 10 STEEL WELDED TEE W/ 6" BRANCH FLANGE ON EX. BLOWER PIPING
25. INSTALL 8" Ø 304 SS DROP PIPE AND FITTINGS (PROCURED THROUGH DIFFUSER VENDOR)
26. CONCRETE BEAM FOR MBR GUIDE RAIL SUPPORT
27. INSTALL PROCESS AIR FLOW METER (PROVIDED BY MBR VENDOR)
28. INSTALL 10" MODULATING BUTTERFLY VALVE (PROVIDED BY MBR VENDOR)
29. INSTALL 10" Ø SCH. 10 STEEL MBR AIR SCOUR HEADER AND PIPING, SEE DETAIL: C/M11.3
30. INSTALL 3" Ø 304 SS STEEL AIR DROP PIPE WITH ISOLATION BF VALVE
31. INSTALL PIPE SUPPORT (MIN. SPACING AS REQUIRED) PER DETAIL: S13/M10.4
32. INSTALL KNEE BRACE PIPE SUPPORT (MIN. SPACING AS REQUIRED) PER DETAIL: S5/M10.4
33. INSTALL OXYGEN SENSOR ATI TOXIC GAS SENSOR, MODEL D-12-F-G OR APPROVED EQUAL
34. INSTALL 3" DIP PIPE AND FITTINGS (TYP.) FOR DIGESTER SUPERNATANT LINE
35. INSTALL 3" SWING CHECK VALVE (FLG'D)
36. INSTALL 3" PLUG VALVE (FLG'D)
37. INSTALL TRANSITION FLANGE FROM STAINLESS STEEL TO SCH 80 PVC
38. INSTALL 6" DIP WAS PIPING FROM MLSS CHANNEL TO EXISTING DIGESTERS
39. INSTALL WEIR PLATES PER DETAIL: A/M11.3
40. NEW CONCRETE FOOTING TIED INTO EXISTING STRUCTURES
41. INSTALL TURBIDITY METER AND CONTROLLER TYPICAL PER DETAIL: A/M11.5 36"H ABOVE GRATING (PROVIDED BY MBR VENDOR)
42. INSTALL METAL LADDER TO ACCESS LEVEL BELOW
43. INSTALL 2" GROUT LAYER UNDER MBR EQUIPMENT
44. INSTALL 2-1/2" THICK ALUMINUM OPEN GRATING (3FT WIDTH MAX PANELS)
45. INSTALL 6" 304 SS 90° ELBOW (FLANGED AT VALVE CONNECTION)
46. INSTALL 6" 304 SS 45° ELBOW (FLANGED AT DROP PIPE CONNECTION)
47. INSTALL 20" DIP SPOOL (FLG x PE)
48. INSTALL EVAP COOLER PER SPECS, SEE ALSO ELECTRICAL PLANS
49. INSTALL 1" PERMEATE VENT WITH 1" SS BALL VALVE W/ ELECTRIC ACTUATOR (PROVIDED BY MBR VENDOR)
50. INSTALL 8" Ø SCH. 10 STEEL MBR BLOWER DISCHARGE PIPE
51. INSTALL 8" BUTTERFLY VALVE LUGGED CONNECTION
52. INSTALL OUTSIDE AIR INTAKE FILTER (PROVIDED BY BLOWER VENDOR) (TYP OF 5)
53. INSTALL PIPE PENETRATION SEAL (WET), SIZE PER PLAN, PER DETAIL: A/M11.1
54. INSTALL TRANSITION BUSHING FROM 3" TO 1"
55. INSTALL 10" BUTTERFLY VALVE. (LUGGED)
56. INSTALL 1/2" PIPE TAP PER DETAIL: C/M11.1 CONNECT 1/2" PVC SCH 40 PVC DRAIN PIPE FROM TURBIDITY METER PER DETAIL: A/M11.5
57. INSTALL 12" BUTTERFLY VALVE. (FLG'D)
58. INSTALL 20" PLUG VALVE WITH WORM GEAR AND HANDWHEEL ACTUATOR

MBR SECTION - 3
SCALE: 1/4" = 1'-0"

CONSTRUCTION NOTES:

1. INSTALL 10" Ø SCH 10 STEEL AIR PIPE AND FITTING
2. INSTALL 12" Ø DIP MBR PERMEATE PIPE AND FITTINGS
3. INSTALL 6" Ø DIP CIP DRAIN PIPE AND FITTINGS
4. INSTALL 3" LUG STYLE BUTTERFLY VALVE
5. INSTALL 3" Ø MBR PERMEATE LINE MINIMUM OF 2.5 FT. BELOW THE OUTLET TO BE CLEAR ACRYLIC PVC PIPING
6. INSTALL 1" PERMEATE VENT WITH 1" SS BALL VALVE W/ ELECTRIC ACTUATOR (PROVIDED BY MBR VENDOR)
7. INSTALL 3" Ø SCH. 80 PVC CIP PIPE AND FITTINGS
8. INSTALL 20" BLIND FLANGE FOR FUTURE MBR EXPANSION
9. INSTALL 3" Ø 304 SS AIR DROP PIPE (PROVIDED BY AERATION VENDOR)
10. CONCRETE BEAM FOR MBR GUIDE RAIL SUPPORT, SEE STRUCTURAL PLANS
11. INSTALL PIPE SUPPORT (MIN. SPACING AS REQUIRED) PER DETAIL: S4 / M11.4
12. INSTALL KNEE BRACE PIPE SUPPORT (MIN. SPACING AS REQUIRED) PER DETAIL: S5 / M11.4
13. INSTALL 6" x 4" REDUCING TEE TIE-IN TO EXISTING CONCRETE ENCASED FLOOR DRAIN LINE
14. SAW CUT AND EXTEND EXISTING 6" FLOOR DRAIN LINE TO CENTER OF PIPE GALLERY 4
15. INSTALL 6" x 4" REDUCING ELBOW MJ CONNECTION
16. INSTALL 4" FLOOR DRAIN CONCRETE ENCASED
17. CAP AND ABANDON EXISTING FLOOR DRAIN
18. INSTALL 3" SS BUTTERFLY VALVE
19. INSTALL MLSS AERATION MANIFOLD (PROVIDED BY AERATION VENDOR)
20. INSTALL 3" Ø SCH 10 STEEL AIR PIPE FROM REGENERATIVE BLOWERS
21. INSTALL STEPPED FOOTING RETAINING WALL PER STRUCTURAL DETAILS
22. INSTALL HAND RAIL PER DETAIL: B / M11.3
23. INSTALL SHADE STRUCTURE AND ROOF OVERHANG PER STRUCTURAL DETAIL
24. CONTRACTOR TO INSTALL MBR MODULES WITH SUPPORT, GUIDES, AND APPURTENANCES PER MBR VENDOR'S REQUIREMENTS. SEE DETAIL ON M12.0 FOR EQUIPMENT DIMENSIONS
25. INSTALL 2-1/2" THICK ALUMINUM OPEN GRATING (3 FT WIDE MAX.) SEE SPECIFICATIONS
26. POINT OF CONNECTION OF MBR AIR SCOUR LINE
27. 1/2" SAMPLING PORT WITH BALL VALVE AND FITTINGS ON 3" Ø PERMEATE LATERAL PIPE
28. INSTALL 10" Ø MBR AIR SCOUR MANIFOLD PER DETAIL: F / M11.3
29. INSTALL 3" LUG STYLE BUTTERFLY VALVE
30. INSTALL 10" Ø DIP SPOOL
31. INSTALL 10" D.I. TEE
32. INSTALL 10" D.I. 90° ELBOW
33. INSTALL 24" LUGGED BUTTERFLY VALVE W/ ELECTRIC ACTUATOR
34. INSTALL 1" PVC DRAIN LINE TO MBR BASIN
35. INSTALL 14" Ø STEEL EXHAUST DUCTING (18 GAUGE MIN.)
36. INSTALL RECTANGULAR DUCT MOUNTED GRILL
37. INSTALL PIPE SUPPORT (MIN. SPACING AS REQUIRED) PER DETAIL: S6 / M11.4
38. INSTALL EXHAUST FAN WITH TRANSITION BASE FOR PIPE CONNECTION

BLOWER ROOM SECTION - 4
SCALE: 1/4" = 1'-0"

FINAL PLANS ISSUED FOR BID

SHEET **M2.4**
38 OF 209 SHEETS

JOB NO. B777

CONSTRUCTION NOTES:

1. INSTALL 30" Ø SCH. 10 COATED STEEL AIR PIPE AND FITTINGS
2. INSTALL 24" Ø SCH. 10 COATED STEEL AIR PIPE AND FITTINGS
3. INSTALL PROCESS AIR FLOW METER PER MFGR REQUIREMENTS (PROVIDED BY MBR VENDOR) SEE ALSO DETAIL: (H / M11.1)
4. INSTALL 12" BUTTERFLY VALVE WITH MODULATING ELECTRIC ACTUATOR (PROVIDED BY MBR VENDOR)
5. INSTALL 24" Ø D.I. BLIND FLANGE
6. INSTALL ELECTRICALLY ACTUATED 24" BUTTERFLY VALVE (LUGGED)
7. INSTALL NEW HANDRAIL W/ KICK PLATE PER DETAIL: (D / M11.0)
8. INSTALL OUTSIDE AIR INTAKE FILTER FOR BLOWERS BELOW
9. INSTALL PIPE SUPPORTS PER DETAIL - MIN. SPACING PER SPECS (S1 / M11.4)
10. INSTALL 12" Ø SCH. 10 COATED STEEL AIR PIPE AND FITTINGS
11. INSTALL 3" BUTTERFLY VALVE (LUG)
12. INSTALL LEVEL TRANSDUCER AND FLOAT TREE (PROVIDED BY MBR VENDOR) PER DETAIL: (B / M11.2)
13. INSTALL 3" Ø SCH. 10 304 SS AIR PIPE AND FITTINGS
14. INSTALL DISSOLVED OXYGEN/pH PROBE WITH ANALYZER PER MFGR REQUIREMENTS (PROVIDED BY MBR VENDOR) SEE ALSO DETAIL: (D / M11.2)
15. INSTALL 3" BUTTERFLY VALVE (LUG) PROVIDE STEM EXTENSION
16. RELOCATE EXISTING STAIRCASE LOCATION TO ALLOW FOR THE FEED FORWARD PUMP AREA.
17. INSTALL 2-1/2" THICK ALUMINUM OPEN GRATING (3FT. MAX. PANEL WIDTH) SEE SPECIFICATIONS
18. CONTRACTOR TO PROVIDE KNOCKOUT IN CONCRETE ROOF SLAB FOR FUTURE PIPE PENETRATION - SEE ALSO STRUCTURAL PLANS
19. INSTALL PROCESS AIR PRESSURE TRANSMITTER (PROVIDED BY MBR VENDOR)
20. INSTALL FEED FORWARD COLUMN PUMP (PROVIDED BY MBR VENDOR)
21. INSTALL 36" SLUICE GATE WITH STEM EXTENSION AND CRANK
22. INSTALL FEED FORWARD CHANNEL FINE BUBBLE DIFFUSERS (PROCURED THROUGH DIFFUSER VENDOR)
23. INSTALL FEED FORWARD COLUMN PUMP (PROVIDED BY MBR VENDOR)
24. INSTALL PRE-AIR FINE BUBBLE DIFFUSERS (PROVIDED BY MBR VENDOR)
25. INSTALL NEW METAL STAIRCASE WITH HANDRAIL PER STRUCTURAL PLANS AND DETAIL: (F / M11.0)
26. INSTALL CHAINLINK HANDRAIL PER DETAIL: (D / M11.0)
27. INSTALL INTERNAL RECYCLE PUMP (PROVIDED BY MBR VENDOR)

CONSTRUCTION NOTES:

1. INSTALL 30" Ø SCH. 10 COATED STEEL AIR PIPE AND FITTINGS
2. INSTALL PROCESS AIR FLOW METER (PROVIDED BY MBR VENDOR)
3. INSTALL 12" MODULATING BUTTERFLY VALVE (PROVIDED BY MBR VENDOR)
4. INSTALL 12" Ø SCH 10 COATED STEEL AIR PIPE AND FITTINGS
5. INSTALL 8" Ø STAINLESS STEEL DROP PIPE (PROVIDED BY MBR VENDOR)
6. INSTALL 16" DIP PIPE FOR INTERNAL RECYCLE (TYP. OF 3)
7. 18" CORED HOLE OPENING FOR 16" PIPE, SEE DETAIL A ON SHEET M10.1
8. NEW 24" CONCRETE STRUCTURAL WEIR WALL, SEE STRUCTURAL PLANS
9. INSTALL 20" 304 SS TEE ANCHORED AND SEALED TO CONCRETE PAD (PROCURED THROUGH FF PUMP MFG'R)
10. INSTALL 20" 304 SS FEED FORWARD CAN COLUMN (PROCURED THROUGH FF PUMP MFG'R)
11. INSTALL 20" BLIND FLANGE WITH LIFTING EYE BOLT (PROCURED THROUGH FF PUMP MFG'R)
12. INSTALL 36" SLUICE GATE WITH STEM EXTENSION AND CRANK
13. INSTALL STRUCTURAL KNEE BRACE PIPE SUPPORT FOR 30" AIR PIPE
14. DAVIT CRANE, CITY-PROVIDED
15. INSTALL INTERMEDIATE PIPE SUPPORT MIDWAY HEIGHT OF GUIDERAIL (PROVIDED BY MBR VENDOR)
16. INSTALL 3" BUTTERFLY VALVE FLANGED CONNECTION
17. INSTALL 36" Ø DIP FEED FORWARD RAS PIPE AND FITTINGS
18. INSTALL 36" Ø DIP ELBOW WITH MEGALUG FITTINGS
19. INSTALL 36" DIP TEE
20. INSTALL 36" BLIND FLANGE WITH 8" AIR RELIEF PIPE SPOOL
21. INSTALL 8" BUTTERFLY VALVE FLANGED CONNECTION
22. INSTALL 18" D.I. BLIND FLANGE, FIELD VERIFY LOCATION OF EXISTING SPOOL TO PLUG
23. INSTALL NEW METAL STAIRCASE WITH HANDRAIL PER STRUCTURAL PLANS AND DETAIL: (F / M11.0)
24. WALL PENETRATION (WET) PER DETAIL: (A / M11.1)
25. INSTALL 2-1/2" ALUMINUM GRATING (SEE SPECS)
26. INSTALL 3" Ø 304 SS AIR DROP PIPE AND FITTINGS (PROCURED THROUGH DIFFUSER VENDOR)
27. INSTALL MLSS AERATION MANIFOLD (PROCURED THROUGH DIFFUSER VENDOR)
28. CONTRACTOR TO PROVIDE 20" 304 SS FLANGED SPOOL FOR PUMP CAN CONNECTION
29. INSTALL MECHANICAL LEVEL FLOAT W/ SS MOUNTING BRACKET

11. INSTALL 36" MEGALUG FITTING
12. INSTALL 36" 90° DIP ELBOW WITH MEGALUG FITTINGS
13. RELOCATE EXISTING STAIRCASE
14. INSTALL 20" 304 SS TEE ANCHORED AND SEALED TO CONCRETE PAD (PROCURED THROUGH FF PUMP MRG'R)
15. INSTALL 20" 304 SS FEED FORWARD CAN COLUMN (PROCURED THROUGH FF PUMP MFG'R)
16. INSTALL 3'-0" HOLLOW METAL DOOR WITH LOUVERS
17. INSTALL ADJUSTABLE WALL LOUVERS ABOVE DOOR, DESIGN AIR FLOW IS 851 CFM
18. INSTALL 10'-0" x 9'-0" ROLL-UP DOOR PER SPECIFICATIONS
19. NEW 12" TAPERED CONCRETE WALL (24" AT BASE) PER STRUCTURAL PLANS
20. NEW CONCRETE FOOTING TIED INTO EXISTING STRUCTURES
21. INSTALL 8" Ø SCH. 10 304 SS AIR PIPE AND FITTINGS, TIE TO DIFFUSER DROP PIPE

NO	BY	DATE	REVISIONS	DATE	APP.

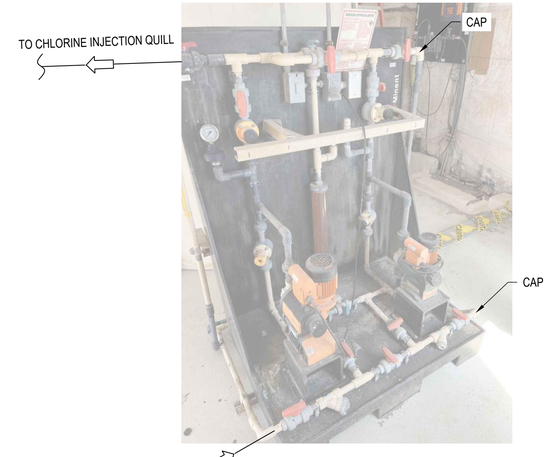
EXISTING EFFLUENT PUMP STATION & CHLORINE BLDG.

SCALE: 1/4" = 1'-0"

PROPOSED EFFLUENT PUMP STATION & CHLORINE BLDG.



SCALE: 1/4" = 1'-0"

CONSTRUCTION NOTES:

1. EXIST. CHEMICAL INJECTION SYSTEM TO BE RELOCATED
2. EXIST. UNDERGROUND 2" PVC CHLORINE LINES
3. EXIST. TRENCH DRAIN
4. EXIST. EYEWASH STATION
5. EXIST. HOSE BIBB
6. EXIST. 10' WIDE ROLL-UP DOOR
7. EXIST. DOOR
8. EXIST. WINDOW
9. EXIST. ELEC.
10. EXIST. HVAC EQUIP.
11. REMOVE CHEMICAL INJECTION SYSTEM
12. EXISTING EFFLUENT PUMPS - PROTECT IN PLACE
13. CHEMICAL INJECTION METERING STATION (DUAL PERISTALTIC PUMPS) - RELOCATED. SEE DETAIL HEREON.
14. NEW CHLORINE ANALYZER
15. NEW CITRIC ACID CHEMICAL CONTAINER (275 GAL TOTE)
16. NEW 40% SOLUTION OF SODIUM BISULFITE (100 GAL TOTE)
17. NEW SPILL CONTAINMENT PALLET (385 GAL SUMP)
18. NEW INJECTION QUILL FOR DECHLOR PER DETAIL: D / M11.1
19. NEW SAMPLING POINT FOR FREE CHLORINE RESIDUAL. INSTALL ½" DIRECT TAP WITH ISOLATION VALVE AND ½" PVC PIPE CONNECTION.
20. NEW CIP STATION. SEE SHEETS M12.2 & M12.3.
21. NEW 6" C900 SCH 80 PVC LINE TO MBR BASIN / PERMEATE LINE
22. INSTALL NEW 2" SCH 80 PVC PW LINE.
23. REPLACE EXISTING 18" 304 S.S. SPOOL AND INSTALL NEW DIP SPOOL WITH NEW CHLORINE INJECTION QUILL PER DETAIL: D / M11.1
24. RELOCATE EXISTING SODIUM HYPOCHLORITE TANK (2,000 GAL)
26. NEW 4" SDR 35 PVC DRAIN LINE TO PLANT DRAIN PUMP STATION, MAINTAIN MINIMUM 1% SLOPE, SEE C4.0 FOR CONTINUATION.
27. NEW 6" SCH 80 PVC RW LINE.
28. REPLACE EXIST. FLOW METER.
29. REPLACE EXIST. EFFLUENT PUMP STATION IN KIND.
30. INSTALL ¾" CPVC CONDUIT PIPING.
31. INSTALL 150 MESH BASKET STRAINER
32. INSTALL PRESSURE TRANSDUCER WITH SADDLE OR DIRECT TAP. PER DETAIL. B / M11.5
33. INSTALL 6" - 90° SCH. 80 PVC ELBOW.
34. INSTALL 6" - 90° D.I. BEND (FLGxFLG)
35. INSTALL 6" PLUG VALVE. (FLGxFLG)
36. INSTALL 6" - 90° D.I. RESTRAINED BEND (MJxMJ)
37. PENETRATE EX. BUILDING - PROVIDE PIPE BOOT OR BUILDING WALL SEAL.
38. INSTALL HAZARD PLACARD AT DOOR PER DETAIL: A / M11.2
39. INSTALL PIPE SUPPORTS FOR CIP SYSTEM (TYP) PER DETAIL: S7 / M11.4
40. CONTRACTOR TO INSTALL BULKHEAD FITTING ON EXISTING CHEMICAL STORAGE TANK AND RADAR LEVEL TRANSMITTER, INSTALL PER MANUFACTURER REQUIREMENTS, SEE SPECS.

2. EXIST. 6" DRAIN FROM SLUDGE DRYING BEDS (CONTRACTOR TO VERIFY DEPTH, SIZE, AND PIPE MATERIAL)
3. EXIST. FORCE MAIN FROM SLUDGE DRAIN PUMP STATION (CONTRACTOR TO VERIFY DEPTH, SIZE, AND PIPE MATERIAL)
4. EXIST. 8" DRAIN FROM DAF UNIT (CONTRACTOR TO VERIFY DEPTH, SIZE, AND PIPE MATERIAL)
5. REMOVE / DEMO EXIST. 4" VENT
6. EXIST. 3" FORCE MAIN TO HEADWORKS
7. EXIST. VALVE BOX AND PLUG VALVE
8. EXIST. SUPERNATANT PUMPS AND DISCHARGE PIPING TO BE REMOVED. CAP FORCE MAIN INSIDE PUMP STATION.
9. REMOVE / DEMO EXIST. METAL COVER AND HATCH
10. REMOVE / DEMO EXIST. CONTROL PANEL. CONDUIT TO BE REUSED PER ELECTRICAL PLANS
11. REMOVE / DEMO EXIST. SHADE STRUCTURE
12. CONSTRUCT CONCRETE SLAB PER STRUCTURAL PLANS
13. INSTALL 6" PVC C900 FORCE MAIN
14. INSTALL 6" DIP FORCE MAIN (FLG x FLG)
15. INSTALL 6" MAG FLOW METER
16. INSTALL 4" DIP SUCTION LINE (FLG x FLG)
17. INSTALL 4" PLUG VALVE (TYP.)
18. INSTALL 4" CHECK VALVE (TYP.)
19. INSTALL ALUMINUM GRATING
20. INSTALL NEW SHADE CANOPY PER STRUCTURAL PLANS
21. INSTALL PIPE SUPPORT PER DETAIL: S1 / M11.4
22. INSTALL LEVEL TRANSDUCER AND FLOAT TREE PER DETAIL: B / 11.2

ADDITIONAL NOTE:
EQUIPMENT MUST BE SUPPORTED OR HUNG FROM A UNISTRUT SYSTEM OR TRUSS SYSTEM. DO NOT ATTACH TO UNDERSIDE OF THE ROOF.

S19

S20

S21

GENERAL NOTES:

1. WHERE NO REFERENCE TO PIPE HANGERS OR SUPPORTS IS GIVEN ON THE DRAWINGS, THE CONTRACTOR SHALL USE THE APPROPRIATE HANGER OR SUPPORT SHOWN ON THIS DRAWING. MAXIMUM HANGER AND SUPPORT SPACING SHALL BE AS SHOWN IN SCHEDULE "A" ON THIS DRAWING. FIGURE NUMBERS ARE B-LINE, UNISTRUT OR GRINNELL.
2. ALL CONCRETE INSERTS, BRACKETS, CHANNELS, BOLTS, RODS, AND MISCELLANEOUS HARDWARE USED FOR PIPE HANGERS OR SUPPORTS SHALL BE GALVANIZED AFTER FABRICATION, EXCEPT STAINLESS STEEL SHALL BE USED IN DAMP LOCATIONS OR CORROSIVE ATMOSPHERES. 316 STAINLESS STEEL FASTENERS SHALL BE USED IN ALL LOCATIONS.
3. CONCRETE CONTINUOUS INSERTS, B-LINE SERIES B52i, OR EQUAL, SHALL BE PROVIDED IN THE WALLS AND CEILINGS AS REQ'D OR AS NOTED ON THE DRAWINGS. INSERTS IN THE WALLS SHALL BE VERTICAL, UNLESS OTHERWISE NOTED AND SHALL BEGIN 6 INCHES ABOVE THE FLOOR AND END 6 INCHES BELOW THE CEILING. INSERTS IN THE CEILING SHALL BEGIN AND END 3 INCHES FROM WALLS AND BEAMS, WHERE PRACTICABLE. THE CENTERLINES OF WALL AND CEILING INSERTS SHALL ALIGN. MAXIMUM CENTER TO ENTER SPACING OF INSERTS SHALL BE 5'-0".
4. IN AREAS NOT COVERED UNDER NOTE 3, CONCRETE INSERTS SHALL BE B-LINE SERIES B3014N WITH APPROPRIATE NUT, B-LINE SERIES B521i CHANNEL EMBEDDED ANCHOR BOLTS, OR EQUAL. IN WITHOUT THE PRIOR WRITTEN APPROVAL OF THE ENGINEER (FOR EQUIPMENT LIFTING DEVICES, (SEE STRUCTURAL DRAWINGS).
5. SUPPORTS SHALL MEET MANUFACTURERS STANDARDIZATION SOCIETY OF THE VALVE AND FITTINGS INDUSTRY STANDARD PRACTICE SP58, LATEST EDITION.
6. HANGER BRACKET AND SUPPORT COMPONENTS MAY BE INTERCHANGED AS APPROVED BY THE ENGINEER.
7. TRAPEZE AND PIPE RACK COMPONENTS SHALL HAVE A MINIMUM STEEL THICKNESS OF 12 GAUGE. MAXIMUM DEFLECTION SHALL BE LIMITED TO 1/240 OF THE SPAN. CHANNEL COMPONENTS SHALL BE B-LINE SERIES B22 OR B22A, OR EQUAL.
8. CONCRETE INSERTS IN AREAS BELOW WATER SURFACE OR NORMALLY SUBJECT TO SUBMERGING SHALL BE EMBEDDED ANCHOR BOLTS, OR APPROVED EQUAL. IN NO CASE SHALL CONCRETE CONTINUOUS INSERTS BE USED IN THESE AREAS.
9. ALL PIPING, DUCTWORK, ACCESSORIES, APPURTENANCES, ETC. SHALL BE ANCHORED TO RESIST 200% OF THE APPLIED LOAD & A LATERAL SEISMIC FORCE OF 40 PERCENT OF ITS WEIGHT WITHOUT EXCESSIVE DEFLECTION.
10. CONTRACTOR SHALL VERIFY ALL SUPPORT DIMENSIONS AND LOCATIONS WITH APPROVED SHOP DRAWINGS FOR ITEMS BEING SUPPORTED BEFORE FABRICATION OR INSTALLATION OF SUPPORTS.
11. PIPE SUPPORT DETAILS ARE SCHEMATIC AND PROVIDED FOR PRICING ASSISTANCE. DEFERRED SUBMITTALS, STAMPED BY A STRUCTURAL PE, MUST BE PROVIDED FOR ALL PIPE SUPPORTS TO ENSURE COMPLIANCE WITH SEISMIC REQUIREMENTS.

SCHEDULE "A"

PIPE HANGER RODS AND SUPPORT SPACING

Notes

1. This drawing shows an example that Membrane Block (L) is placed as upper Membrane Block of SP675–512–A.
   Each model may be different in outline and dimensions.
2. The upper and lower Membrane Blocks are replaceable mutually.
3. This drawing conforms to JIS standards.
4. The Guide Set has to be prepared by Customer.
5. Membrane Block (Lower) and Diffuser Block are fixed with bolts. Never use bolts to fix the Membrane Block (Upper) and Membrane Block (Lower).
6. For lifting up Membrane Unit, use the specified Unit Lifting Tool.
7. Use Module Lifting Tool in taking out Membrane Modules.

How to use Module Lifting Tool

GENERAL NOTES:

1. DESIGN OF THIS CLEAN IN PLACE (CIP) STATION IS BASED ON THE ASSUMPTION THAT A REQUIRED BACKFLOW PREVENTER EXISTS IN THE PLANT WATER SUPPLY SYSTEM UPSTREAM OF CIP STATION. BACKFLOW PREVENTER NOT SUPPLIED BY KUBOTA MEMBRANE USA (KMU).
2. DRAIN PIPING & ALL PIPE SUPPORTS ARE NOT SUPPLIED BY KMU. LOCATION, TYPE, & QUANTITY OF PIPE SUPPORTS TO BE DETERMINED BY CONTRACTOR.
3. KMU SUPPLIED PRESSURE REDUCING VALVE, FLANGES, FASTENER ASSEMBLIES & GASKETS TO BE LOCATED BY CONTRACTOR IN HORIZONTAL OR VERTICAL RUN OF PIPE (FLOW UP) BETWEEN PLANT WATER SUPPLY CONNECTION & CIP STATION. ANY REQUIRED SUPPORTS ARE NOT SUPPLIED BY KMU.
4. ALL PARTS ARE SHIPPED LOOSE AND CIP STATION MUST BE FABRICATED AND INSTALLED BY CONTRACTOR PER THIS DOCUMENT. PIPE IS SHIPPED IN STANDARD LENGTHS AND MUST BE CUT BY CONTRACTOR.
5. ORIENTATION OF ALL PARTS & STATION CAN BE ALTERED TO SUIT SITE CONDITIONS BUT ALL PARTS MUST REMAIN IN THE SAME RESPECTIVE LOCATIONS AND CONFORM TO REQUIRED DIMENSIONS. MAJOR CHANGES TO BE APPROVED BY KMU.
6. PVC SOLVENT, PVC GLUE AND THREAD ANTI SEIZE COMPOUND NOT SUPPLIED BY KMU.
7. CONTRACTOR TO SUPPLY AND LOCATE AIR RELEASE VALVES AT ALL HIGH POINTS IN CIP PIPING SYSTEM. AIR RELEASE VALVES TO BE LOCATED AT POINT WHERE HIGH POINT PIPING TURNS DOWN.
8. **CIP SYSTEM SHOULD BE DRAINED ONLY FOR MAINTENANCE OR REPLACEMENT OF CIP EQUIPMENT. CLEAN WATER TO REMAIN IN SYSTEM BETWEEN CIP EVENTS.**
9. **WATER REPLACEMENT MUST BE PERFORMED AFTER EVERY CIP EVENT TO AVOID MIXING NaClO AND CITRIC ACID IN CIP STATION PIPING, CIP EQUIPMENT AND CIP TRANSFER PIPING.**

CIP PROCEDURE:

1. SET VALVE POSITIONS MANUALLY FOR EITHER NaClO INJECTION PROCEDURE OR CITRIC ACID INJECTION PROCEDURE.
2. PRESS "CIP INJECTION" BUTTON ON THE MBR OIT.
3. CIP INJECTION STOPS AUTOMATICALLY WHEN THE TOTAL GALLONS INJECTED REACHES THE TARGET AMOUNT.
4. SET VALVE POSITIONS FOR WATER REPLACEMENT PROCEDURE.
5. PRESS "WATER REPLACEMENT" BUTTON ON THE MBR OIT.
6. WATER REPLACEMENT STOPS AUTOMATICALLY WHEN THE INJECTION TIMER EXPIRES.
7. SET THE MANUAL VALVES TO THEIR ORIGINAL POSITIONS.
8. ALLOW 2 HOURS MEMBRANE SOAKING TIME FOR NaClO AND 1 HOUR FOR CITRIC ACID.

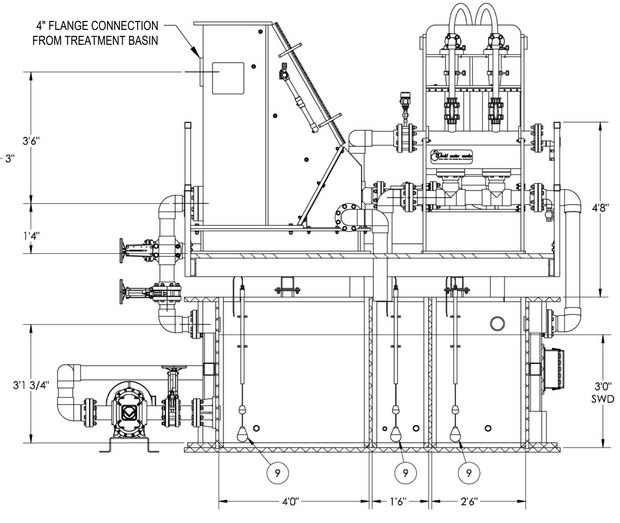
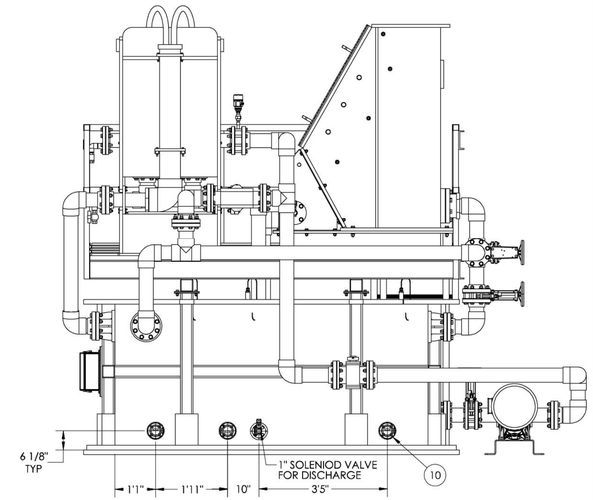
INDENSE PACKAGED PLANT
8 FT L X 4 FT W X 4 FT H



GENERAL NOTES

1. ALL IS TO BE CONSTRUCTED GREY FROM HIGH IMPACT NATURAL STRESS RELIEVED, VIRGIN COPOLYMER POLYPROPYLENE, U.O.W.S
2. SERVICE: WASTE WATER @ 40°F ~ 130°F
3. ALL FLANGES TWO-HOLED TO THE CENTER LINE
4. STEEL REINFORCEMENTS TO BE: CARBON STEEL HOT-DIPPED GALVANIZED
5. ALL DIMENSIONS SHOWN APPLY TO AMBIENT TEMPERATURE (NON-EXPAND)
6. A SPREADER BEAM IS REQUIRED TO BE DESIGNED TO ENSURE VERTICAL OR MINIMUM OUTWARD LIFT
7. SOME HIDDEN LINES AND COMPONENTS OMITTED FOR CLARITY
8. ALL GASKET MATERIAL TO BE 3/16" THK. BUNA-N
9. ALL FASTENERS TO BE 304 SS
10. HYDRO. TEST TO BE COMPLETED BEFORE SHIPMENT
11. PIPING TO BE PVC.



NOTE: CONTROL PANEL NOT SHOWN BUT WILL BE INSTALLED ON SKID BY VENDOR. CONTRACTOR SHALL PROVIDE 460V, 3PH, 60 Hz (20A) POWER TO CONTROL PANEL PER PLAN. CONTROL PANEL SHALL BE PRE-WIRED BY VENDOR TO SKID.

RAFT

BUILDING CODE:

2018 EDITION OF THE INTERNATIONAL BUILDING CODE, WITH THE CITY OF SAN LUIS, ARIZONA AMENDMENTS.

LOADS:

SUPERIMPOSED DEAD LOAD ON ROOF SLAB = 20 PSF.
FLOOR LIVE LOAD = 100 PSF (REDUCIBLE).
SUPERIMPOSED DEAD LOAD ON FLOOR SLABS = 100 PSF.
STAIR LIVE LOAD = 100 PSF.

WIND:

THE STRUCTURE AND ITS COMPONENTS ARE DESIGNED FOR WIND LOADS AS DEFINED BY THE BUILDING CODE, WHERE:

BASIC WIND SPEED 105 MPH.
RISK CATEGORY: III.
WIND EXPOSURE: C.
INTERNAL PRESSURE COEFFICIENT (GCpi) = +_ 0.18.

SEISMIC:

RISK CATEGORY = III.
Seismic Importance Factor: Ie = 1.25.
DESIGN CATEGORY = D.
SITE CLASS D.
Ss = 0.737, S1 = 0.304.
Sds = 0.595, Sd1 = 0.405.

FOUNDATIONS:

SOIL REPORT BY GEOTECHNICAL TESTING SERVICES, INC.; JOB NO.24-034-G; DATED APRIL 2025; SPREAD FOOTINGS SHALL BEAR ON FIRM, UNDISTURBED SOIL (CONTROLLED COMPACTED FILL). IN ACCORDANCE WITH THE ABOVE REPORT. BOTTOM OF FOOTING TO BE 24" MINIMUM BELOW FINISHED GRADE. (THESE FOOTING DEPTHS ARE MINIMUMS AND THE CONTRACTOR SHALL COORDINATE WITH SOILS REPORT AND OTHER TRADES TO ENSURE THESE MINIMUMS ARE SUFFICIENT FOR THE WORK.) (COMPACTED FILL SHALL EXTEND 5'-0" BEYOND EACH EDGE OF FOOTING.) FINISHED GRADE IS DEFINED AS TOP OF SLAB FOR INTERIOR FOOTINGS AND LOWEST ADJACENT GRADE WITHIN 5 FEET FOR PERIMETER FOOTINGS. DESIGN SOIL BEARING VALUE = 2800 PSF. FOUNDATION EXCAVATIONS SHALL BE INSPECTED BY SOILS ENGINEER PRIOR TO PLACEMENT OF CONCRETE.

CONCRETE:

MINIMUM 28 DAY STRENGTH 5,000 PSI W/C = 0.45, (TYPE II, U.N.O.)

BEAMS AND WALLS ----------5,000 PSI
MILD SLABS ----------5,000 PSI
SLABS ON GRADE ----------5,000 PSI
FOUNDATIONS ----------5,000 PSI

MECHANICALLY VIBRATE ALL CONCRETE WHEN PLACED.MAXIMUM SLUMP 4 1/2" FOR CONCRETE WITHOUT PLASTICIZER. IF PLASTICIZER IS USED, A HIGHER FINAL SLUMP MAY BE ALLOWED UPON STRUCTURAL ENGINEER'S APPROVAL.CONCRETE AGGREGATE SHALL BE NON-REACTIVE.

FLY ASH-IF PERMITTED BY THE SPECIFICATIONS, SHALL BE LIMITED 20% OF CEMENTIOUS MATERIALS.

REINFORCING:

ASTM A615 (Fy = 60 KSI) DEFORMED BARS FOR ALL BARS. ALL GRADE 60 REINFORCING TO BE WELDED SHALL BE ASTM A706. WELDED WIRE FABRIC PER ASTM A185, WIRE PER ASTM A82.NO TACK WELDING OF REINFORCING BARS ALLOWED WITHOUT PRIOR REVIEW OF PROCEDURE WITH THE STRUCTURAL ENGINEER. LATEST ACI CODE AND DETAILING MANUAL APPLY. CLEAR CONCRETE COVERAGES AS FOLLOWS UNLESS NOTED OTHERWISE IN THE CONCRETE FIRE RATING TABLE:

CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH ---------- 3"
EXPOSED TO EARTH OR WEATHER
#6 OR LARGER ---------- 2"
#5 AND SMALLER ---------- 1 1/2"
COLUMNS (TO TIES) ---------- 1 1/2"
BEAMS (TO STIRRUPS) ---------- 1 1/2"
FLAT SLAB ---------- 3/4"
ALL OTHER PER LATEST EDITION OF ACI 318.

LAP SPLICES IN CONCRETE:

LAP SPLICES, UNLESS NOTED OTHERWISE, SHALL BE CLASS "B" TENSION LAP SPLICES PER LATEST EDITION OF ACI 318. LAP SPLICES IN CONCRETE COLUMNS SHALL BE TENSION LAP SPLICES. STAGGER SPLICES A MINIMUM OF ONE LAP LENGTH. LAPS IN WELDED WIRE FABRIC SHALL BE MADE SO THAT THE OVERLAP, MEASURED BETWEEN OUTERMOST CROSS WIRES OF EACH FABRIC SHEET, IS NOT LESS THAN THE SPACING OF CROSS WIRES PLUS 2 INCHES. ALL WELDED WIRE FABRIC SHALL BE CHAIRED TO ENSURE PROPER CLEARANCES.

ALL SPLICE LOCATIONS SUBJECT TO APPROVAL BY THE STRUCTURAL ENGINEER. PROVIDE BENT CORNER BARS TO MATCH AND LAP WITH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS PER TYPICAL DETAILS. REINFORCING BAR SPACING GIVEN ARE MAXIMUM ON CENTERS.ALL BARS PER CRSI SPECIFICATIONS AND HANDBOOK. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH STANDARD 90-DEGREE HOOKS UNLESS NOTED OTHERWISE. SECURELY TIE ALL BARS IN LOCATION BEFORE PLACING CONCRETE. CONCRETE COLUMN DOWEL EMBEDMENT SHALL BE A TENSION LAP DOWEL WITH EMBEDMENT ACCORDING TO THE LATEST EDITION OF THE ACI 318.

CONCRETE SLABS OVER RIGID FOAM FILL:

ALL RIGID FOAM SHALL BE ASTM D6817 TYPE EPS15 OR BETTER WITH THE FOLLOWING MINIMUM PROPERTIES:

DENSITY: 0.9PCF (MIN.) PER ASTM C303
FLEXURAL STRENGTH: 25 PSI PER ASTM C203
COMPRESSIVE RESISTANCE @ 1% DEFORMATION: 3.6 PSI PER ASTM C165 OR ASTM D1621
COMPRESSIVE RESISTANCE @ 10% DEFORMATION: 10 PSI PER ASTM C165 OR ASTM D1621

ANCHOR BOLTS:

ALL ANCHOR BOLTS SHALL BE ASTM F1554 GRADE 36 U.N.O. - WHEN SPECIFIED ON PLAN, ALL ASTM F1554 GRADE ANCHOR BOLTS SHALL BE GRADE 55 (SUPPLEMENTAL GRADE REQUIREMENT 'S1' AT WELDABLE) ANCHOR BOLTS.

MAY BE BENT IN FIELD PER AISC REQUIREMENTS TO FIX DAMAGED ANCHOR BOLTS; FIELD BENT IS LIMITED TO 45° OR LESS. ANCHOR BOLTS CAN HAVE HEADED OR HOOKED BOLTS SHAPES. USE HEADED ANCHOR BOLTS WHERE ANCHOR BOLT SHAPE IS NOT SPECIFIED. ANCHOR BOLTS SHALL BE INSPECTED PER SPECIAL INSPECTION TABLE REQUIREMENTS.

DRYPACK:

DRYPACK SHALL BE 5,000 PSI NON-SHRINK GROUT, FIVE STAR OR EQUIVALENT. INSTALL DRYPACK UNDER BEARING PLATES BEFORE FRAMING MEMBER IS INSTALLED. AT COLUMNS, INSTALL DRYPACK UNDER BASEPLATES AFTER COLUMN HAS BEEN PLUMBED BUT PRIOR TO FLOOR OR ROOF INSTALLATION.

STRUCTURAL STEEL:

STEEL SECTIONS - MINIMUM GRADE AND STRENGTH

STEEL WIDE FLANGES	= ASTM A992 (50KSI)
STEEL CHANNELS	= ASTM A36 (36KSI)
STEEL ANGLES	= ASTM A36 (36KSI)
STEEL COLUMN BASE PLATES	= ASTM A572 (50KSI)
STEEL PLATES AT MOMENT FRAME AND BRACED FRAME CONNECTIONS	= ASTM A572 (50KSI)
STEEL PLATES (MISCELLANEOUS)	= ASTM A36 (36KSI)
STEEL HSS (RECTANGLE)	= ASTM A500 (50KSI), GRADE C
STEEL HSS (ROUND)	= ASTM A500 (46KSI), GRADE C
STEEL PIPES	= ASTM A501 (36KSI) -- OR -- ASTM A53 (35KSI), TYPE E OR S

NOTE: ALL 36KSI STEEL MAY BE SUBSTITUTED WITH 50KSI STEEL UNLESS NOTED OTHERWISE.

ALL CONSTRUCTION PER LATEST AISC HANDBOOK. ALL REFERENCE TO HEADED STUDS SHALL BE HIGH STRENGTH HEADED STUDS. ATTACHMENT OF HEADED STUDS SHALL CONFORM TO ALL REQUIREMENTS OF THE LATEST EDITION OF THE "RECOMMENDED PRACTICES FOR STUD WELDING" AND THE "STRUCTURAL WELDING CODE" PUBLISHED BY AWS. ALL BOLTS, ANCHOR BOLTS, EXPANSION BOLTS, ETC. SHALL BE INSTALLED WITH SLOTTED HOLES IN STEEL SECTIONS. ALL HIGH STRENGTH BOLTING SHALL BE INSPECTED BY AN INDEPENDENT TESTING LABORATORY. ALL WELDING SHALL BE PERFORMED BY WELDERS HOLDING VALID CERTIFICATES AND HAVING CURRENT EXPERIENCE IN THE TYPE OF WELD SHOWN ON THE DRAWINGS OR NOTES. CERTIFICATES SHALL BE THOSE ISSUED BY AN ACCEPTED TESTING AGENCY. ALL WELDING DONE BY E70 SERIES LOW HYDROGEN RODS UNLESS NOTED OTHERWISE. FOR GRADE 60 REINFORCING BARS, USE E90 SERIES. AT MOMENT CONNECTIONS, REMOVE ALL WELD BACKING AND RUN-OFF TABS AND BACKGOUGE TO SOUND WELD METAL. BACKWELD WITH A MINIMUM 5/16" FILLET. ALL WELDING PER LATEST AMERICAN WELDING SOCIETY STANDARDS, (EXCEPT STEEL JOISTS AND JOIST GIRDERS SHALL COMPLY WITH SJI STANDARDS). THESE DRAWINGS DO NOT DISTINGUISH BETWEEN SHOP AND FIELD WELDS; THE CONTRACTOR MAY SHOP WELD OR FIELD WELD AT HIS DISCRETION. SHOP WELDS AND FIELD WELDS SHALL BE SHOWN ON THE SHOP DRAWINGS SUBMITTED FOR REVIEW. ALL FULL (COMPLETE) PENETRATION WELDS SHALL BE TESTED AND CERTIFIED BY AN INDEPENDENT TESTING LABORATORY. WHEN STRUCTURAL STEEL IS FURNISHED TO A SPECIFIED MINIMUM YIELD POINT GREATER THAN 36 KSI, THE ASTM OR OTHER SPECIFICATION DESIGNATION SHALL BE INCLUDED NEAR THE ERECTION MARK ON EACH SHIPPING ASSEMBLY OR IMPORTANT CONSTRUCTION COMPONENT, OVER ANY SHOP COAT OF PAINT, PRIOR TO SHIPMENT FROM THE FABRICATOR'S PLANT. STRUCTURAL STEEL COMPONENTS, AND FASTENERS AT ALL EXTERIOR CONDITIONS SHALL BE GALVANIZED OR PROTECTED AGAINST CORROSION USING APPROVED METHOD PUBLISHED BY AISC OR ANSI. WELDS ON GALVANIZED STEEL SHALL FOLLOW AWS D-19.0 SPECIFICATIONS.

STRUCTURAL BOLTS:

ALL STRUCTURAL BOLTS SHALL BE ASTM F3125 GRADE A325 TYPE 1 AND SHALL BE INSTALLED AS BEARING-TYPE CONNECTIONS WITH THREADS INCLUDED IN SHEAR PLANE (I.E. A TYPE "N" CONNECTION) UNLESS NOTED OTHERWISE. USE A325 TYPE 3 BOLTS AT ALL CONNECTIONS EXPOSED TO WEATHERING. USE SC (SLIP CRITICAL) AT ALL MOMENT FRAMES AND BRACED FRAMES. USE ASTM A354 BOLTS WHERE THE BOLT LENGTH REQUIRED FOR THE CONNECTION EXCEEDS THE MINIMUM LENGTH OF AN A325 BOLT. BOLTS MAY BE TIGHTENED USING ANY AISC APPROVED METHOD. ALL STRUCTURAL BOLTING SHALL BE INSPECTED BY AN INDEPENDENT TESTING LABORATORY TO ENSURE BOLT TENSION.

STEEL GRATING:

UNLESS NOTED OTHERWISE IN ARCHITECTURAL SPECIFICATIONS, USE PAINTED (GALVANIZED) STEEL GRATING WITH 2 1/2" X 3/16" BEARING BARS AT 1 3/16" O.C. AND CROSSBARS AT 4" O.C. GRATING SHALL BE ERECTED AND ATTACHED PER MANUFACTURER'S RECOMMENDATIONS.

STEEL STAIRS:

REFER TO PROJECT SPECIFICATIONS, ARCHITECTURAL DRAWINGS AND STRUCTURAL DRAWINGS TO DETERMINE EXTENT OF STAIRS AND WHAT SHALL BE PROVIDED BY THE STAIR MANUFACTURER. STAIRS ARE TO FRAME INTO FLOOR BEAMS AND BUILDING COLUMNS ONLY. DO NOT CONNECT STAIRS TO ELEVATOR GUIDE RAIL SUPPORTS OR DIAGONAL BRACING. VERIFY ALL OTHER CONDITIONS WITH ARCHITECT PRIOR TO PROCEEDING. IF STAIR FRAMING RESULTS IN ECCENTRIC LOADING OF THE STRUCTURAL MEMBERS, STAIR MANUFACTURER SHALL PROVIDE BRACING OF STRUCTURAL MEMBERS. CONTRACTOR SHALL SUBMIT DETAILED SHOP DRAWINGS TO THE ARCHITECT/ENGINEER FOR REVIEW PRIOR TO FABRICATION.

LANDING PANS SHALL BE 12 GAGE MINIMUM. TREAD PANS SHALL BE 14 GAGE MINIMUM. CONCRETE FILL FOR TREADS UNDER 4'-0" IN LENGTH SHALL BE REINFORCED WITH 6 X 6 - W1.4 X W1.4 W.W.F CONCRETE FILL FOR TREADS GREATER THAN 4'-0" IN LENGTHS SHALL BE REINFORCED WITH #3 AT 12" o.c. FOR ACTUAL LANDING AND STAIR PAN CONFIGURATIONS, SEE ARCHITECTURAL DRAWINGS.

CONSTRUCTION JOINTS:

ALL CONSTRUCTION JOINTS IN WALLS SHALL BE KEYED IN ACCORDANCE WITH THE TYPICAL CONSTRUCTION JOINT DETAILS SHOWN ON THE STRUCTURAL DRAWINGS OR, AT THE CONTRACTOR'S OPTION, SHALL BE INTENTIONALLY ROUGHENED IN ACCORDANCE WITH THE FOLLOWING: THE SURFACE OF ROUGHENED JOINTS SHALL BE SAND BLASTED OR ROUGHENED WITH A CHIPPING HAMMER TO EXPOSE THE AGGREGATE EMBEDDED IN THE PREVIOUS POUR. THE EXPOSED AGGREGATE SHALL PROTRUDE A MINIMUM OF 1/4 INCH. ALL SURFACES OF CONSTRUCTION JOINTS SHALL BE CLEANED AND LAITANCE REMOVED. IMMEDIATELY BEFORE NEW CONCRETE IS PLACED, ALL CONSTRUCTION JOINTS SHALL BE WETTED AND STANDING WATER REMOVED. VERTICAL CONSTRUCTION JOINTS IN WALLS SHALL BE HELD TO A MAXIMUM SPACING OF 60'-0". ALL CONSTRUCTION JOINTS IN SLABS, JOISTS, BEAMS, AND GIRDERS SHALL BE OFFSET A DISTANCE EQUAL TO TWICE THE WIDTH OF THE BEAM.

ACCORDANCE WITH THE TYPICAL SLAB ON DECK CONSTRUCTION JOINT DETAIL SHOWN ON THE STRUCTURAL DRAWINGS. BEAMS AND GIRDERS HAVE BEEN DESIGNED ASSUMING THE CONSTRUCTION JOINTS TO BE LOCATED IN THE MIDDLE THIRD OF THE BEAM, GIRDER, OR SLAB SPAN. ALL CONSTRUCTION, CONTROL, AND ISOLATION JOINTS FOR SLABS ON GRADE SHALL BE IN ACCORDANCE WITH THE TYPICAL SLAB ON GRADE DETAILS. THE CONTRACTOR SHALL SUBMIT THE PROPOSED LOCATIONS OF CONSTRUCTION JOINTS TO THE ENGINEER FOR ACCEPTANCE BEFORE STARTING CONSTRUCTION.

FORM CAMBER FOR CONCRETE SLABS:

CONCRETE FORMWORK SHALL HAVE BUILT-IN CAMBER TO COMPENSATE FOR FORM SAG UNDER WET CONCRETE LOAD, IN ADDITION TO STRUCTURAL CAMBER NOTED. ONE-WAY POST-TENSIONED SLABS SHALL BE CAMBERED 1/1000 OF THE SPAN DISTANCE, ONE-WAY MILD REINFORCED SLABS SHALL BE CAMBERED 1/500 OF THE SPAN DISTANCE, TWO-WAY POST-TENSIONED SLABS SHALL BE CAMBERED 1/1000 OF THE ACROSS DIAGONAL SPAN DISTANCE, TWO-WAY MILD REINFORCED SLABS SHALL BE CAMBERED 1/500 OF THE ACROSS DIAGONAL SPAN DISTANCE, UNLESS NOTED OTHERWISE ON THE DRAWINGS. BEAM AND JOIST STRUCTURAL CAMBERS ARE NOTED ON THE DRAWINGS. CAMBERS OF LESS THAN 1/8 INCH MAY BE NEGLECTED.

CONTRACTOR IS REQUIRED TO PROVIDE SLABS WITH FLATNESS PROPERTIES IN CONFORMANCE WITH SPECIFICATIONS AS PART OF THE BASE BID. WHERE SLAB FLATNESS DOES NOT MEET SPECIFICATIONS, CONTRACTOR SHALL LEVEL THE SLAB USING AN APPROVED LEVELING AGENT.

ELECTRICAL CONDUIT IN CONCRETE SLABS:

ELECTRICAL CONDUIT SHALL BE RIGID STEEL CONDUIT OR FLEXIBLE PLASTIC CONDUIT. ALUMINUM CONDUIT IS PROHIBITED. CONDUIT WITH A MAXIMUM OUTSIDE DIAMETER OF 1/6 TIMES THE SLAB THICKNESS MAY BE EMBEDDED IN ONE LAYER AT THE MID-DEPTH OF SLABS. MINIMUM CLEAR DISTANCE BETWEEN CONDUITS SHALL BE 3 TIMES CONDUIT DIAMETER. CONDUIT SHALL BE FIRMLY CHAIRED AND TIED TO PREVENT DISPLACEMENT DURING POURING. PLACE #3 AT 12 INCHES O.C. ADDITIONAL REINFORCING ABOVE AND BELOW, PERPENDICULAR TO THE CONDUIT. THE ADDED REINFORCING SHALL EXTEND 1'-0" PAST THE CONDUIT ON BOTH SIDES. FOR CONDUIT PLACED IN SLABS ON METAL DECKING, CONDUIT SHALL RUN IN THE METAL DECK FLUTES PER THE TYPICAL CONDUIT IN SLAB ON METAL DECK DETAIL.

CONCRETE INSERTS:

THIN SLAB TYPE INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 4:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	TENSION
1/2"	1,000 LBS.	650 LBS.
5/8"	1,250 LBS.	700 LBS.
3/4"	1,600 LBS.	850 LBS.

COIL LOOP INSERTS SHALL BE GALVANIZED AND HAVE THE FOLLOWING MINIMUM WORKING LOADS(A 3:1 RATIO OF ULTIMATE TO WORKING VALUES IS ASSUMED):

BOLT DIAMETER	WORKING LOAD SHEAR	TENSION
1/2"	2,200 LBS.	2,820 LBS.
5/8"	3,000 LBS.	3,620 LBS.
3/4"	3,100 LBS.	3,660 LBS.

THREADED COIL RODS, COIL NUTS, ETC., USED IN CONJUNCTION WITH CONCRETE INSERTS, SHALL HAVE A WORKING LOAD EQUAL TO OR GREATER THAN THE CORRESPONDING CONCRETE INSERT. CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA PRIOR TO CONSTRUCTION TO THE STRUCTURAL ENGINEER THRU THE ARCHITECT. VALUES LISTED ABOVE ARE FOR RICHMOND STRUCTURAL CONNECTION INSERTS.

EXPANSION AND SCREW ANCHORS:

USE STUD TYPE EXPANSION ANCHOR WITH A SINGLE PIECE WEDGE ONLY WHERE NOTED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL.

CONTRACTOR SHALL SUBMIT MANUFACTURER'S SIZE AND STRENGTH DATA TO ENGINEER THROUGH ARCHITECT PRIOR TO CONSTRUCTION. INSTALL ALL BOLTS AS OUTLINED IN MANUFACTURER'S SPECIFICATIONS, UTILIZING PROPER SIZE AND TYPE OF DRILL, CLEANING HOLE, DRIVING AND TIGHTENING BOLT.

IN CONCRETE:

ANCHORS USED MUST HAVE ICC APPROVAL AND INCLUDE HILTI KWIK BOLT TZ2 (ESR-4266), AND SIMPSON STRONG BOLT-2 (ESR-3037), AND DEWALT POWER-STUD+SD2 (ESR-2502), AND SIMPSON TITEN HD (ESR-2713), HILTI KWIK HUS-EZ (ESR-3027), AND DEWALT SCREW-BOLT+ (ESR-3889) OR APPROVED EQUAL.

EPOXY ANCHORS IN CONCRETE MASONRY:

INJECTABLE ADHESIVE SHALL BE USED FOR INSTALLATION OF REINFORCING STEEL DOWELS OR THREADED
ANCHOR RODS AND INSERTS INTO NEW OR EXISTING CONCRETE OR SOLID GROUTED CONCRETE MASONRY
UNITS ONLY WHERE SPECIFIED ON PLANS. IF USE IS REQUESTED FOR OTHER THAN WHERE NOTED CONTACT STRUCTURAL ENGINEER THROUGH ARCHITECT FOR APPROVAL. ADHESIVE SHALL BE FURNISHED IN SIDE BY SIDE PACKS WHICH KEEP COMPONENT A AND COMPONENT B SEPARATE. USE ONLY INJECTION TOOLS AND STATIC MIXING NOZZLES RECOMMENDED BY MANUFACTURER. MANUFACTURER'S INSTRUCTIONS SHALL BE FOLLOWED.

IN CONCRETE:

ANCHORS USED MUST HAVE I.C.C. APPROVAL IN CRACKED CONCRETE AND INCLUDE SIMPSON SET-3G (ESR-4057), HILTI HIT-RE500-V3 (ESR-3814), DEWALT PURE110+ (ESR-3298) OR APPROVED EQUIVALENT. THE USE OF ANY EPOXY ANCHOR MUST BE APPROVED BY THE ENGINEER OF RECORD PRIOR TO INSTALLATION.

STRUCTURAL FILL:

ALL FILL PLACED TO SUPPORT SLABS ON GRADE, BEHIND PERMANENT WALLS, AND AROUND ALL DRAINS SHALL CONSIST OF WELL GRADED, GRANULAR MATERIAL PER THE SPECIFICATIONS. SOILS FOR STRUCTURAL FILL SHALL BE APPROVED BY THE GEOTECHNICAL ENGINEER. STRUCTURAL FILL SHALL BE PLACED ON SOUND NATIVE MATERIAL. PROOF-ROLL CUT AREAS WHICH PROVIDE SUPPORT FOR PERMANENT STRUCTURES. AREAS WHICH ARE EXCESSIVELY YIELDING, AS DETERMINED BY THE CONTINUOUS OBSERVATION OF THE GEOTECHNICAL ENGINEER, SHALL BE OVEREXCAVATED AND REPLACED WITH STRUCTURAL FILL. STRUCTURAL FILL SHALL BE PLACED PER THE SPECIFICATION. USE LEAN CONCRETE FILL BELOW ALL PIPES EXISTING OUT OF BASEMENT WALL, FULL HEIGHT OF WALL. CONCRETE SHALL CONTAIN 2 SACKS OF CEMENT PER YARD.

LATERAL PRESSURE ON SUBGRADE WALLS:

THE DESIGN PRESSURES FOR SUBGRADE WALLS ARE BASED ON A "DRAINED" CONDITION. SEE CIVIL AND MECHANICAL DRAWINGS FOR SUBGRADE DRAINAGE SYSTEM. SEE GEOTECHNICAL REPORT FOR COMPACTION REQUIREMENTS AT SUBGRADE WALLS. SUBGRADE WALLS AND SUPPORTING SLABS SHALL HAVE ATTAINED THEIR FULL CONCRETE STRENGTH BEFORE PLACING ANY BACKFILL U.N.O. THE CONTRACTOR SHALL PROVIDE TEMPORARY BRACES FOR WALLS IF BACKFILL IS PLACED BEFORE WALLS AND SLABS ACHIEVE FULL CONCRETE STRENGTH.

NOTES ON CRACKING OF CONCRETE STRUCTURES:

CRACKING IS INHERENT TO THE MATERIAL PROPERTIES OF CONCRETE CONSTRUCTION (INCLUDING POST-TENSIONED CONCRETE STRUCTURES). WHILE EVERY EFFORT HAS BEEN MADE TO MINIMIZE THE EFFECTS OF UNSIGHTLY CRACKING, THE PRESENCE OF CRACKS ARE NORMAL AND UNAVOIDABLE. THE DESIGN OF THE CONCRETE STRUCTURAL ITEMS HAVE BEEN ANALYZED USING A "CRACKING SECTION." THE PRESENCE OF THE CRACKING SHOULD NOT BE CONSIDERED DETRIMENTAL TO THE STRUCTURE. CRACKS LARGER THAN 10 MILS SHALL BE FILLED AND SEALED WITH AN APPROVED CRACK FILLER TO PREVENT FUTURE DETERIORATION. ALLOWANCE SHALL BE MADE IN THE CONSTRUCTION BUDGET FOR SEALING OF SUCH CRACKS. IN SOME CASE, CRACKS DO NOT APPEAR UNTIL WELL AFTER CONSTRUCTION HAS BEEN COMPLETED. IT IS THE RESPONSIBILITY OF THE OWNER TO MAINTAIN THE STRUCTURE PROPERLY OVER THE LIFE OF THE STRUCTURE. CONCRETE CRACKS, SHOULD THEY OCCUR, SHALL BE FILLED AND SEALED TO PREVENT PREMATURE DETERIORATION OF THE STRUCTURE.

SHOP DRAWINGS:

SHOP DRAWINGS SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS IN ADDITION TO ITEMS REQUIRED BY ARCHITECTURAL SPECIFICATIONS.

THE CONTRACTOR SHALL REVIEW ALL SHOP DRAWINGS PRIOR TO SUBMITTAL. ITEMS NOT IN ACCORDANCE WITH CONTRACT DOCUMENTS SHALL BE FLAGGED UPON HIS REVIEW.

VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS AND ALL FINISHED GRADE WITH CIVIL DRAWINGS.

ANY CHANGES, SUBSTITUTIONS, OR DEVIATIONS FROM CONTRACT DOCUMENTS SHALL BE CLOUDED BY MANUFACTURER OR FABRICATOR. ANY OF THE AFOREMENTIONED WHICH ARE NOT CLOUDED OR FLAGGED BY SUBMITTING PARTIES, SHALL NOT BE CONSIDERED APPROVED AFTER ENGINEER'S REVIEW, UNLESS NOTED ACCORDINGLY.

THE ENGINEER HAS THE RIGHT TO APPROVE OR DISAPPROVE ANY CHANGES TO CONTRACT DOCUMENTS AT ANYTIME BEFORE OR AFTER SHOP DRAWING REVIEW.

THE SHOP DRAWINGS DO NOT REPLACE THE CONTRACT DOCUMENTS. ITEMS OMITTED OR SHOWN INCORRECTLY AND ARE NOT FLAGGED BY THE STRUCTURAL ENGINEER OR ARCHITECT ARE NOT TO BE CONSIDERED CHANGES TO CONTRACT DOCUMENTS. IT IS THE CONTRACTOR'S RESPONSIBILITY TO MAKE SURE ITEMS ARE CONSTRUCTED PER THE CONTRACT DOCUMENTS.

THE ADEQUACY OF ENGINEERING DESIGNS AND LAYOUT PERFORMED BY OTHERS RESTS WITH THE DESIGNING OR SUBMITTING AUTHORITY.

REVIEWING IS INTENDED ONLY AS AN AID TO THE CONTRACTOR IN OBTAINING CORRECT SHOP DRAWINGS. RESPONSIBILITY FOR CORRECTNESS SHALL REST WITH THE CONTRACTOR.

DEFERRED SUBMITTALS: (PER 2018 IBC 107.3.4.1)

FOR THE PURPOSES OF THIS SECTION, DEFERRED SUBMITTALS ARE DEFINED AS THOSE PORTIONS OF THE DESIGN WHICH ARE NOT SUBMITTED AT THE TIME OF THE APPLICATION AND THAT ARE TO BE SUBMITTED TO THE BUILDING OFFICIAL WITHIN A SPECIFIED PERIOD.

DOCUMENTS FOR DEFERRED SUBMITTAL ITEMS SHALL BE SUBMITTED TO THE PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW. THE CONTRACTOR SHALL FORWARD THE REVIEWED DOCUMENTS TO BUILDING OFFICAL WITH A NOTATION INDICATING THAT THE DEFERRED SUBMITTAL DOCUMENTS HAVE BEEN REVIEWED AND BEEN FOUND TO BE IN GENERAL CONFORMANCE TO THE DESIGN OF THE BUILDING. THE DEFERRED SUBMITTAL ITEMS SHALL NOT BE INSTALLED UNTIL THE DESIGN AND SUBMITTAL DOCUMENTS HAVE BEEN APPROVED BY THE BUILDING OFFICIAL.

DEFERRED SUBMITTAL ITEMS:

METAL STAIRS
EXCAVATION SHORING SYSTEMS
GUARDRAILS/HANDRAILS
EQUIPMENT/PIPING ANCHORS/SEISMIC BRACING
PREENGINEERED CANOPY
CRANE RAIL AND RAIL CLAMPS

GENERAL:

ENTIRE CONTRACT DOCUMENTS SHALL BE USED TO CONSTRUCT ALL BUILDINGS. SOME CRITICAL ITEMS REQUIRED BY OTHER DISCIPLINES MAY NOT BE SHOWN ON STRUCTURAL DRAWING (i.e. WALL, FLOOR AND ROOF OPENINGS, ARCHITECTURAL, MECHANICAL AND PLUMBING LOADS, SUPPORT PLATES ETC.)

ITEMS SHOWN BY OTHER DISCIPLINES WITH REFERENCE TO STRUCTURAL DRAWING BUT NOT SHOWN ON THESE STRUCTURAL DOCUMENTS SHALL BE CONSIDERED DESIGN BUILD ITEMS. CONTRACTOR SHALL SUBMIT DESIGN BY OTHERS FOR REVIEW.

THE STRUCTURAL CONSTRUCTION DOCUMENTS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE, BUT NOT BE LIMITED TO, BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC. THE STRUCTURAL ENGINEER SHALL NOT BE RESPONSIBLE FOR THE CONTRACTOR'S MEANS, METHODS, TECHNIQUES, SEQUENCES FOR PROCEDURE OF CONSTRUCTION, OR THE SAFETY PRECAUTIONS AND THE PROGRAMS INCIDENT THERETO (NOR SHALL OBSERVATION VISITS TO THE SITE INCLUDE INSPECTION OF THESE ITEMS).

CONSTRUCTION MATERIALS SHALL BE SPREAD OUT IF PLACED ON FRAMED CONSTRUCTION. LOAD SHALL NOT EXCEED THE DESIGN LIVE LOAD PER SQUARE FOOT.

WHERE REFERENCE IS MADE TO VARIOUS TEST STANDARDS FOR MATERIALS, SUCH STANDARDS SHALL BE THE LATEST EDITION AND/OR ADDENDA.

ESTABLISH AND VERIFY ALL OPENINGS AND INSERTS FOR ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL WITH APPROPRIATE TRADES, DRAWINGS AND SUBCONTRACTORS PRIOR TO CONSTRUCTION.

OPTIONS ARE FOR CONTRACTOR'S CONVENIENCE. IF THE CONTRACTOR CHOOSES AN OPTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL NECESSARY CHANGES AND SHALL COORDINATE ALL DETAILS.

NOTES AND DETAILS ON DRAWINGS SHALL TAKE PRECEDENCE OVER GENERAL STRUCTURAL NOTES AND TYPICAL DETAILS. WHERE NO DETAILS ARE SHOWN, CONSTRUCTION SHALL CONFORM TO SIMILAR WORK ON THE PROJECT.

ALL DIMENSIONS SHOWN (INCLUDING ELEVATIONS) ON STRUCTURAL DRAWINGS ARE TO ASSIST CONTRACTOR IN VERIFICATION. SCALING DIMENSIONS FROM DRAWINGS IS NOT PERMITTED. LOCATION OF ALL ITEMS SHALL BE DETERMINED BY DIMENSIONS OR NOTES ONLY; DO NOT USE GRAPHIC APPEARANCE TO ASSUME SPECIFIC LOCATIONS.

CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL DIMENSIONS WITH ARCHITECTURAL AND FINISHED GRADE WITH CIVIL DRAWINGS PRIOR TO START OF CONSTRUCTION. RESOLVE ANY DISCREPANCY WITH THE ARCHITECT.

GENERAL STRUCTURAL NOTES

APPLY UNLESS NOTED OTHERWISE

GENERAL (CONT.):

TYPICAL DETAILS MAY NOT NECESSARILY BE CUT ON PLANS, BUT APPLY UNLESS NOTED OTHERWISE.

WHERE DISCREPANCIES OCCUR BETWEEN PLANS, DETAILS, GENERAL STRUCTURAL NOTES AND SPECIFICATIONS, THE GREATER REQUIREMENTS SHALL GOVERN.

ANY ENGINEERING DESIGN, PROVIDED BY OTHERS AND SUBMITTED FOR REVIEW, SHALL BEAR THE SEAL OF AN ENGINEER REGISTERED IN THE STATE OF JURISDICTION.

SUPPLIER OF ENGINEERED STRUCTURAL COMPONENTS (i.e. STEEL JOISTS, STAIRS, PRECAST ITEMS) SHALL BE RESPONSIBLE FOR COMPLETE DESIGN AND SHALL USE ENTIRE CONTRACT DOCUMENTS TO INCLUDE ALL LOADS AND DETAIL REQUIREMENTS FROM ALL DISCIPLINES. SUPPLIER SHALL PROVIDE ADDITIONAL MATERIAL REQUIRED TO MEET ALL THEIR REQUIREMENTS FOR INSTALLATION (i.e. WIDER BEARING PLATES, SHIMS, ERECTION BOLTS ETC.).

STRUCTURAL STEEL SUPPLIER SHALL FURNISH BOLTS FOR OSHA CONNECTIONS (SEE DRAWINGS FOR DETAILS).

WALL SHORING SHALL BE INSTALLED PRIOR TO BACKFILLING BEHIND ALL BUILDING RETAINING WALLS, UNLESS ALL RESTRAINING SLABS ARE INSTALLED. USE HANDTAPPING ONLY WHEN WITHIN 8'–0", OR WITHIN HALF THE WALL HEIGHT OF BACKFILLED WALL.

CONTINUOUS FOUNDATION DRAIN PIPES (FRENCH DRAINS) OR WEEP HOLES SHALL BE PROVIDED BEHIND ALL
BASEMENT WALLS AND ALL EXTERIOR RETAINING WALLS THAT RETAIN MORE THAN 3'–0" OF SOIL. WEEP
HOLES WHERE USED SHALL BE 2" IN DIAMETER AT 6'–0" O.C. MAXIMUM.

EXISTING STRUCTURE:

EXISTING STRUCTURAL DIMENSIONS AND MEMBER SIZES ARE FOR REFERENCE ONLY. CONTRACTOR SHALL VERIFY ALL DIMENSIONS IN THE FIELD PRIOR TO FABRICATION. THE CONTRACTOR SHALL VERIFY THE ACTUAL CONFIGURATION OF EXISTING CONSTRUCTION AND THE CONDITION OF THE STRUCTURE BEFORE BEGINNING WORK. ANY DISCREPANCIES OR UNSOUND CONDITIONS SHALL BE REPORTED TO THE ARCHITECT FOR RESOLUTION BEFORE BEGINNING WORK. REFER TO ARCHITECTURAL PLANS FOR DIMENSIONS, EMBEDMENTS, AND OPENINGS NOT SHOWN. REFER TO MECHANICAL AND ELECTRICAL PLANS FOR DUCTS, PIPING, EMBEDMENTS, AND OPENINGS NOT SHOWN.

TEMPORARY SHORING AND BRACING MAY BE NECESSARY IN ORDER TO PERFORM THE NECESSARY STRUCTURAL MODIFICATIONS TO THE EXISTING STRUCTURE SHOWN ON THE STRUCTURAL AND ARCHITECTURAL PLANS AND DETAILS. THE CONTRACTOR MUST RETAIN A LICENSED STRUCTURAL ENGINEER WHO SHALL INVESTIGATE WHERE THIS TEMPORARY SHORING/BRACING IS REQUIRED, AND SHALL DESIGN THIS TEMPORARY SHORING/BRACING.

SEQUENCING CONSTRUCTION AND LATERAL STABILITY:

THE STRUCTURAL COMPONENTS BY THEMSELVES ARE A NON–SELF–SUPPORTING STRUCTURE. LATERAL FORCES DUE TO WIND, EARTHQUAKE, OR SOIL ARE CARRIED BY THE ROOF AND FLOOR DIAPHRAGMS TO THE LATERAL SYSTEM. CERTAIN ELEMENTS SHOWN ON OR LOCAL STABILITY OF OTHER ELEMENTS (SUCH AS BEAMS, COLUMNS, AND WALLS). IF, DUE TO SEQUENCING OF CONSTRUCTION, THESE STABILITY ELEMENTS ARE NOT IN PLACE, THE CONTRACTOR SHALL RETAIN A LICENSED STRUCTURAL ENGINEER WHO SHALL INVESTIGATE WHERE TEMPORARY SHORING/BRACING IS REQUIRED, AND SHALL DESIGN THIS TEMPORARY SHORING/BRACING. THE CONTRACTOR SHALL PROVIDE THIS SHORING/BRACING UNTIL THE REQUIRED STRUCTURAL ELEMENTS AND THEIR CONNECTIONS HAVE BEEN INSTALLED AND REACH THEIR FINAL DESIGN STRENGTHS.

MISCELLANEOUS:

REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, CIVIL, ELEVATOR, OR OTHER SPECIALTY ENGINEERING DRAWINGS FOR DIMENSIONS NOT SHOWN, INCLUDING BUT NOT LIMITED TO: SIZE AND LOCATION OF CURBS, EQUIPMENT HOUSEKEEPING PADS, WALL AND FLOOR OPENINGS, BLOCKOUTS, FLOOR DEPRESSIONS, SUMPS, DRAINS, ANCHOR BOLTS, EMBEDDED ITEMS, ARCHITECTURAL TREATMENT, ETC. CONTRACTOR SHALL VERIFY DIMENSIONS AND RESOLVE DISCREPANCIES OR CONFLICTS PRIOR TO CONSTRUCTION. WHERE SECTIONS ARE INDICATED ON THE PLAN BY A NUMBER AND A DRAWING NUMBER THUS, 1/S5.01, THE INDICATED SECTION (1) IS SHOWN ON STRUCTURAL DRAWING S5.01.

FLOOR FLATNESS/LEVELNESS SHALL MEET ARCHITECTURAL SPECIFICATIONS (1/4" IN 10 FOOT MINIMUM LEVELNESS UNLESS TIGHTER REQUIREMENT IN SPECIFICATIONS) IN HEIGHT FOR ALL STRUCTURAL SYSTEMS. CONTRACTOR SHALL INCLUDE COST FOR LEVELING ALL FLOORS. FOR ESTIMATING PURPOSES ONLY, ASSUME 1/2" THICK LEVELING AGENT OVER 15% OF FLOOR AREA.

SPECIAL INSPECTION:

SEE "SPECIAL INSPECTIONS TABLE" THIS SHEET.

FABRICATOR APPROVAL:

SPECIAL INSPECTIONS NOTED ABOVE APPLY TO SHOP FABRICATED ASSEMBLIES IN ADDITION TO ON–SITE WORK UNLESS THE FABRICATOR IS AN "APPROVED FABRICATOR" AS DEFINED IN 2018 IBC.

STRUCTURAL OBSERVATION:

ENGINEER OF RECORD SHALL PROVIDE VISUAL OBSERVATION OF THE STRUCTURAL SYSTEM, FOR GENERAL CONFORMANCE TO THE APPROVED PLANS AND SPECIFICATIONS, AT SIGNIFICANT CONSTRUCTION STAGES AND AT THE COMPLETION OF THE STRUCTURAL SYSTEM. CONTRACTOR IS REQUIRED FOR COORDINATING THE TIMING OF SITE VISITS AND SHALL INCLUDE A MINIMUM OF 3 VISITS. THESE VISITS ARE TO BE PAID BY THE CONTRACTOR. STRUCTURAL OBSERVATION DOES NOT INCLUDE OR WAIVE THE RESPONSIBILITY FOR THE INSPECTIONS REQUIRED BY THE BUILDING CODE (NOTED ABOVE).

INSTRUCTIONS TO BIDDERS CONTINGENCIES:

1. UNDER NO CIRCUMSTANCES SHALL THESE DRAWINGS BE "FINAL BID" UNTIL THE PROJECT IS FULLY PERMITTED.
2. ALL PRELIMINARY PRICING EFFORTS SHALL BE CONSIDERED TO BE ESTIMATES ONLY AND SHALL INCLUDE THE NECESSARY CONTINGENCIES, ALLOWANCES, ALTERNATES, ETC. AS APPROPRIATE TO ACCOUNT FOR MODIFICATIONS AND ADDITIONS THAT WILL OCCUR TO THE DRAWINGS DURING THE FINALIZATION OF THE DESIGN AND PERMITTING.
3. THE OWNER OR CONTRACTOR SHALL UTILIZE THE FOLLOWING MINIMUM CONTINGENCIES FOR EACH OF THE STRUCTURAL ELEMENT COSTS TO BE USED AT THE SOLE DISCRETION OF THE STRUCTURAL ENGINEER:

CONSTRUCTION DOCUMENTS/FINAL BID 3% MINIMUM

ALL OF THE "FINAL BID" CONTINGENCIES NOT USED BY THE STRUCTURAL ENGINEER SHALL BE REFUNDED TO THE OWNER PRIOR TO THE CLOSEOUT OF THE PROJECT.
4. ANY MODIFICATIONS, DELETIONS OR ELIMINATIONS TO THE STRUCTURAL BIDDING AND CONTINGENCY REQUIREMENTS, WITHOUT THE CONSENT OF THE STRUCTURAL ENGINEER, SHALL AUTOMATICALLY INDEMNIFY THE STRUCTURAL ENGINEER OF ANY COSTS THAT MAY ARISE DURING THE DESIGN AND CONSTRUCTION OF THE PROJECT.
5. WHERE DISCREPANCIES OCCUR WITHIN THE DRAWINGS THE CONTRACTOR WILL EITHER RESOLVE THE DISCREPANCIES WITH THE ARCHITECT BEFORE BIDDING OR INCLUDE THE GREATER COST ITEM IN THE BID AND RESOLVE THE DISCREPANCY PRIOR TO CONSTRUCTION.

NOTE TO CONTRACTOR REGARDING PRICING/BIDDING OF CITY SUBMITTAL DRAWINGS:

THESE DRAWINGS HAVE BEEN PREPARED FOR CITY SUBMITTAL, AND ARE NOT TO BE CONSIDERED 100% CONSTRUCTION DOCUMENTS UNTIL CITY PLAN REVIEW HAS BEEN COMPLETED AND FINAL BUILDING PERMIT HAS BEEN ISSUED. IF THESE DOCUMENTS ARE TO BE USED FOR PRICING, BID, OR STEEL MILL ORDER, THE CONTRACTOR SHALL PROVIDE IN THE PROJECT BUDGET AN ALLOWANCE FOR POTENTIAL CHANGES BETWEEN THE CITY SUBMITTAL DRAWINGS AND THE FINAL APPROVED SUBMITTAL AND CONSTRUCTION DOCUMENTS. ADDITIONALLY, MISCELLANEOUS ITEMS MAY NOT BE SHOWN ON THESE DRAWINGS. THESE ITEMS INCLUDE, BUT ARE NOT LIMITED TO, ELEVATOR AND EQUIPMENT SUPPORTS, BLOCKOUTS, ETC. REFER TO ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND OTHER SPECIALTY DRAWINGS FOR ADDITIONAL INFORMATION. THE CONSTRUCTION BUDGET SHALL INCLUDE THESE ITEMS. THE STRUCTURAL ENGINEER WILL NOT BE RESPONSIBLE FOR CHANGE ORDER COSTS INCURRED (INCLUDING DISCARDED MATERIAL COSTS) DUE TO BIDDING OR STEEL MILL ORDER FROM THESE DRAWINGS. CONTACT STRUCTURAL ENGINEER FOR CLARIFICATION IF THE SCOPE AND QUANTITY OF ALLOWANCE TO BE CARRIED IS NOT CLEAR.

SPECIAL INSPECTION:

PER IBC CHAPTER 17, SPECIAL INSPECTION IS REQUIRED FOR THE FOLLOWING ITEMS:

CONCRETE: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERRENCED STANDARD (NOTE 1)	IBC REFERENCE
1. Inspection of reinforcing steel, including prestressing tendons, and placement.	–	X	ACI 318: Ch. 20, 25.2 25.3, 26.6.1–26.6.3	1908.4
2. Reinforcing bar welding: a. Verify weldability of reinforcing bars other than ASTM A706; b. Inspect single–pass fillet welds, maximum 5/16"; and c. Inspect all other welds.	– – X	X X –	AWS D1.4 ACI 318: 26.6.4	---
3. Inspect anchors to be installed in concrete prior to and during placement of concrete where allowable loads have been increased or where strength design is used.	–	X	ACI 318: 17.8.2	---
4. Inspection of anchors post–installed in hardened concrete members. a. Adhesive anchors installed in horizontally or upwardly inclined orientations to resist sustained tension loads. b. Mechanical anchors and adhesive anchors not defined in 4.a.	X –	– X	ACI 318: 17.8.2.4 ACI 318: 17.8.2	---
5. Verifying use of required design mix.	–	X	ACI318: Ch. 19, 26.4.3, 26.4.4	1904.1, 1904.2 1908.2, 1908.3
6. Prior to concrete placement, fabricate specimens for strength tests, per form slump and air content tests, and determine the temperature of the concrete.	X	–	ASTM C172 ASTM C31 ACI 318: 26.4, 26.12	1908.10
7. Inspection of concrete and shotcrete placement for proper application techniques.	X	–	ACI 318: 26.5	1908.6, 1908.7, 1908.8
8. Verify maintenance of specified curing temperature and techniques.	–	X	ACI 318: 26.5.3–26.5.5	1908.9
9. Verification of in–situ concrete strength, prior to stressing of tendons in post–tensioned concrete and prior to removal of shores and forms from beams and structural slab.	–	X	ACI 318: 26.11.2	---
10. Inspect formwork for shape, location and dimensions of the concrete member being formed.	–	X	ACI 318: 26.11.1.2(b)	---

NOTES:
1. WHERE APPLICABLE, SEE ALSO SECTION 1707.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of high–strength bolts, nuts and washers: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	X X	APPLICABLE ASTM MATERIAL SPECS AISC 360, SEC. A3.3	
2. Inspection of high–strength bolting: a. Bearing–type connections. AISC 360, Section M2.5 1704.3.3	–	X		
3. Material verification of structural steel: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturers' certified mill test reports.	–	–	AISC 360, SEC. M2.5 ASTM A 6 OR ASTM A 568	
4. Material verification of weld filler materials: a. Identification markings to conform to AWS specification in the approved construction documents. b. Manufacturer's certificate of compliance required.	– –	– –	AISC 360, SEC. A3.5	
5. Inspection of welding: a. Structural steel: 1) Complete and partial penetration groove welds. 2) Multipass fillet welds. 3) Single–pass fillet welds > 5/16" 4) Single–pass fillet welds = 5/16" 5) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weld ability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel–resisting flexural and Axial forces in intermediate and special Moment frames, and boundary elements of Special reinforced concrete shear walls and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– X X – – – – X X –	– – – X X – X – – X	AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.1 AWS D1.3 AWS D1.4 ACI 318: 3.5.2	
6. Inspection of steel frame joint details for compliance with approved construction documents: a. Details such as bracing and stiffening. b. Member locations. c. Application of joint details at each connection.	– – –	X – –		

NOTES:
1. WHERE APPLICABLE SEE ALSO SECTION 1701.1, SPECIAL INSPECTION FOR SEISMIC RESISTANCE.
2. TABLES TAKEN DIRECTLY FROM IBC FOR REFERENCE.

STEEL: CONSTRUCTION OTHER THAN STRUCTURAL STEEL: VERIFICATION AND INSPECTION	CONTINUOUS	PERIODIC	REFERENCED STANDARD (NOTE1)	IBC REFERENCE
1. Material verification of cold–formed steel deck: a. Identification markings to conform to ASTM standards specified in the approved construction documents. b. Manufacturer's certified test reports.	– –	X	APPLICABLE ASTM MATERIAL STANDARDS	
2. Inspection of welding: a. Cold formed steel deck: 1) Floor and roof deck welds. b. Reinforcing steel: 1) Verification of weldability of reinforcing steel other than ASTM A 706. 2) Reinforcing steel resisting flexural and axial forces in intermediate and special moment frames, and boundary elements of special structural walls of concrete and shear reinforcement. 3) Shear reinforcement. 4) Other reinforcing steel.	– – X – X	X X – X –	AWS D1.3 ACI 318: 3.5.2 AWS D1.4	
SOILS: Not the responsibility of the structural engineer. Special inspection certificate to be completed by geotechnical engineer. 1. Verify materials below shallow foundations are adequate to achieve the design bearing capacity. 2. Verify excavations are extended to proper depth and have reached proper material. 3. Perform classification and testing of compacted fill materials. 4. Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill. 5. Prior to placement of compacted fill, inspect subgrade and verify that site has been properly prepared.	– – – X –	X X X – X		
EXPANSION, SCREW, AND EPOXY BOLTS: 1. During placement of all expansion, screw, & epoxy bolts, for visual verification of hole diameter and depth and placement of bolt and/or epoxy.	–	X		

DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR:

A) THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK ASSIGNED TO BE CERTAIN IT CONFORMS WITH THE APPROVED DESIGN DRAWINGS AND SPECIFICATION.

B) THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL, AND TO THE ENGINEER.

C) UPON COMPLETION OF THE ASSIGNED WORK THE ENGINEER OR ARCHITECT SHALL COMPLETE AND SIGN THE APPROPRIATE FORMS CERTIFYING THAT TO THE BEST OF HIS KNOWLEDGE THE WORK IS IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE CODE.

NOTES

1. FOR MATERIAL STRENGTHS, SEE GENERAL STRUCTURAL NOTES
2. VERIFY ALL DIMENSION WITH ARCHITECTURAL DRAWINGS PRIOR TO START OF CONSTRUCTION – RESOLVE ANY DISCREPANCIES WITH ARCHITECT.
3. FOR CLARITY, ALL EXTERIOR SLABS AND SIDEWALKS MAY NOT BE SHOWN. FOR EXACT DIMENSIONS, LOCATIONS, JOINT AND SCORE LINES, SEE ARCHITECTURAL DRAWINGS
4. FOR CLARITY, ALL OPENINGS MAY NOT BE SHOWN ON FRAMING PLANS. FOR EXACT SIZE, NUMBER, AND LOCATION OF OPENINGS, SEE ARCHITECTURAL, MECHANICAL, ELECTRICAL AND PLUMBING DRAWINGS. FOR FRAMING AT OPENINGS, SEE TYPICAL STRUCTURAL DETAILS. VERIFY ALL SIZES, WEIGHTS AND LOCATIONS OF MECHANICAL EQUIPMENT WITH MECHANICAL ENGINEER AND MECHANICAL CONTRACTOR THROUGH ARCHITECT.
5. DETAILS MARKED "TYPICAL" MAY NOT BE CUT ON PLANS.
6. CONC C.J. – AS SHOWN ON PLAN INDICATES LOCATION OF EITHER KEYED OR SAW CUT CONTROL JOINT IN SLAB ON GRADE AT CONTRACTOR'S OPTION, SEE GENERAL STRUCTURAL NOTES AND PLANS.
7. MAS C.J. – AS SHOWN ON PLAN INDICATES MASONRY CONTROL JOINT IN MASONRY WALL, SEE G.S.N. AND TYPICAL DETAIL.
8. FOR CLARITY, DETAILS MAY SHOW ONLY ONE SIDE OF FRAMING CONDITION.
9. CONTRACTOR TO VERIFY, AND BE RESPONSIBLE FOR VARIATIONS IN CONCRETE QUANTITY DUE TO CAMBER, CONSTRUCTION DEAD LOAD DEFLECTIONS AND/OR TOLERANCES OF STRUCTURAL STEEL ELEMENTS (i.e. BEAMS, STEEL DECK, ETC.) AND PRECAST CONCRETE ELEMENTS.
10. ALL SCHEDULE MARK DESIGNATIONS MAY NOT NECESSARILY BE FOUND ON THE PLANS WHERE THE SCHEDULES OCCUR. SCHEDULES ARE TYPICAL TO THE PROJECT.

DRAFT

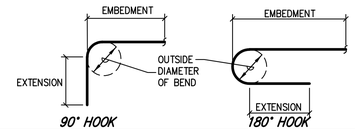
NOTES:

1. FLOOR OR ROOF LINE.
2. PROVIDE A MIN. OF 50% OF REINF. INTERRUPTED BY THE OPENING ON EACH SIDE OF THE OPENING – 2 BARS AT 4" O.C. MIN., EACH FACE.
3. WHERE 2'–0" CANNOT BE OBTAINED. EXTEND BAR AS FAR AS POSSIBLE AND HOOK OR BEND.
4. 2– #5 FOR OPENINGS 4'–0" WIDE OR LESS. 2 – #6 FOR OPENINGS WIDER THAN 4'–0".
5. 2– #5 TYPICAL CORNER DIAGONAL BARS.
6. WHERE WIDTH OF OPENING EXCEEDS 2 TIMES WALL THICKNESS. JAMB BARS SHALL EXTEND FULL HEIGHT OF WALL.
7. 2– #5 UNLESS LARGER BARS ARE SHOWN ON PLANS OR DETAILS.
8. DOWELS ARE SAME SIZE AS JAMB BARS.
9. EMBED AND LAP PER G.S.N.
10. ROUND HOLE WHERE OCCURS.
11. #5 AT 10" O.C. ADD'L. SHEAR REINF. FOR 4'–0" SECTION, 2'–0" ABOVE, AND 2'–0" BELOW OPENINGS. FOR MORE INFO. SEE DETAIL X.
12. CONCRETE WALL.
13. OPENING.
14. #5 AT 10" O.C. ADDIT'L. SHEAR REINF. FOR 4'–0" SECTION 2'–0" ABOVE AND 2'–0" BELOW (IF THAT IS POSSIBLE) OPENING.
15. TYPICAL HORIZ. REINF.

NOTES:

1. CONCRETE SLAB.
2. 6'–0" PAST OPENING (MIN.) UNLESS NOTED OTHERWISE.
3. OPENING IN CONCRETE SLAB SEE ARCH'L. AND MECH'L.
4. PROVIDE A MINIMUM OF 50% OF THE REINFORCEMENT INTERUPTED BY THE OPENING ON EACH SIDE OF THE OPENING (4 #6 AT 4" O.C. MINIMUM).

NOTE:
REINFORCEMENT IN THE SPANNING DIRECTION SHALL BE CONTINUOUS.



07 PLAN – TYPICAL OPENING IN CONCRETE SLAB

NO SCALE

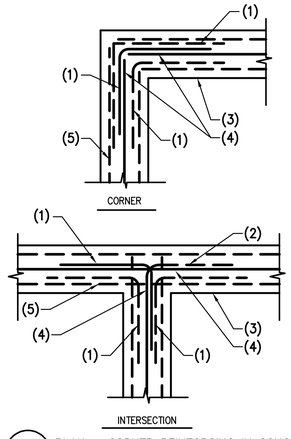
5. CONT. L4x4x3/8 316 STAINLESS STEEL ANGLE W/ 3/4"ø 316 STAINLESS STEEL HILTI KWIK BOLT TZ EXPANSION BOLTS (ESR-1917) AT 48" O.C.
6. GRATING SUPPORT AND ATTACHMENT PER DEFFERED DESIGN.

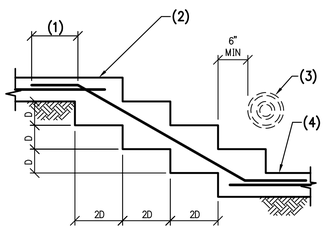
12 *GRATING SUPPORT* — NO SCALE

NOTES:
1. 1 #4 CONTINUOUS IN 8" DEEP GROUTED BOND BEAM.
2. 8" MASONRY WALL WITH #5 VERTS AT 48" O.C. GROUT SOLID BELOW GRADE.
3. FINISHED GRADE OR CONCRETE SLAB ON GRADE AS OCCURS.
4. DOWELS TO MATCH AND LAP VERTICAL WALL REINFORCING PER G.S.N. – ALTERNATE BENDS.
5. CONCRETE FOOTING.
6. FOR TOP OF WALL, SEE ARCHITECTURAL DRAWINGS – 8'–0" MAX.
8. 1 #4 CONTINUOUS.



21 *8'–0" MAXIMUM FREE–STANDING MASONRY WALL AND FOOTING* — NO SCALE

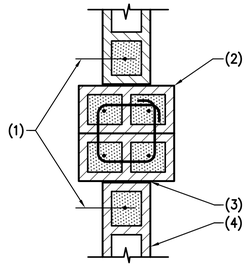
NOTES:
1. #5 NOSING BARS.
2. #5 @ 12" O.C. EACH WAY.
3. 8" CONCRETE SIDEWALL W/ #5 @ 12" O.C. EACH WAY WHERE OCCURS. DOWEL ALL VERTICAL REINFORCING TO STAIRS WITH #5 DOWELS 24" X 24".
4. CONCRETE FOOTING BEYOND.
5. DOWEL STAIRS TO ADJACENT WALL WITH #5x 24"x 24" DOWELS @ 12" O.C. –TYPICAL.



NOTE: FOR INFORMATION NOT NOTED, SEE ARCHITECTURAL DRAWINGS.

19 *TYPICAL CONCRETE STAIRS ON GRADE* — NO SCALE

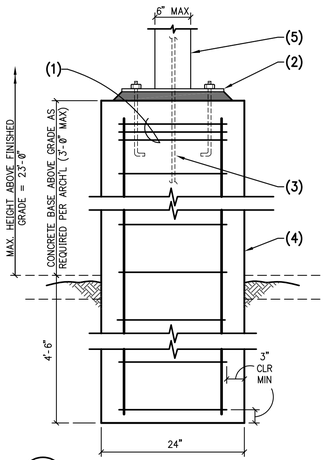
NOTES:
1. CORNER BARS SAME SIZE AND SPACING AS HORIZONTAL REINFORCING. LAP PER G.S.N. (24" MINIMUM).
2. ALTERNATE BEND.
3. CONCRETE STEM WALL OR FOOTING.
4. REINFORCING PER PLANS AND /OR G.S.N.
5. BARS EACH FACE WHERE OCCURS.



16 *PLAN – CORNER REINFORCING IN CONCRETE GRADE BEAM WALL AND/OR FOOTING* — NO SCALE

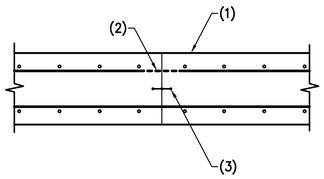
NOTES:
1. LAP PER G.S.N. (24" MIN.) – TYPICAL.
2. TOP OF WALL FOOTING.
3. PIPE THRU STEM WALL AS OCCURS – SEE TYPICAL DETAIL.
4. RETURN TO FOOTING THICKNESS AS SHOWN ON PLAN.

NOTE:
D = 2'–0" MAXIMUM.



13 *TYPICAL STEP IN CONCRETE FOOTING* — NO SCALE

NOTES:
1. VERTICAL REINFORCING IN SOLID GROUTED CELL EACH SIDE OF PILASTER.
2. MASONRY PILASTER.
3. MASONRY CONTROL JOINT.
4. MASONRY WALL.



NOTE:
CONTINUE HORIZONTAL JOINT REINFORCING THROUGH PILASTER.

20 *MASONRY PILASTER IN MASONRY WALL* — NO SCALE

NOTES:
1. 3 TIES IN TOP 5". (1 1/2" O.C.)
2. ANCHOR BOLT AND PLATE PER LIGHT SUPPLIER.
3. ELECTRICAL CONDUIT REQ'D.
4. CONCRETE PIER W/(6) #6 VERTICALS
5. LIGHT POLE HEIGHT ABOVE THE FINISHED GRADE PER SCHEDULE.

17 *TYPICAL LIGHT POLE BASE* — NO SCALE

NOTES:
1. CONCRETE WALL.
2. CUT EVERY OTHER BAR ON EACH FACE OF WALL. STAGGER CUT BARS.
3. CONT. WATERSTOP, GREENSTREAK PVC RIBBED WITH CENTER BULB, PER SPECIFICATIONS (OR APPROVED EQUAL.)

NOTE:
LOCATION OF VERTICAL WALL C.J. TO BE AT A MAXIMUM OF TWICE THE WALL HEIGHT.

FOUNDATION NOTES

1. FOR LOCATION OF DETAILS SEE GENERAL STRUCTURAL NOTES.
2. VERIFY ALL DIMENSIONS WITH ARCHITECTURAL DRAWINGS. DO NOT USE "CONC C.J." AS DIMENSION LINE OR TO LOCATE BUILDING ELEMENTS.
3. SCHEDULED MARK DESIGNATIONS ARE TYPICAL TO THE PROJECT AND MAY NOT NECESSARILY BE FOUND ON THIS PLAN.
4. DEPTH OF FOOTING DIMENSIONS INDICATED IN THE G.S.N. ARE MINIMUMS. FOUNDATION CONTRACTOR SHALL COORDINATE WITH SOILS REPORT AND OTHER TRADES TO INSURE THAT THESE MINIMUMS ARE SUFFICIENT FOR THE WORK. SEE TYPICAL DETAILS FOR ADDITIONAL REQUIREMENTS. G.C. SHALL FIELD VERIFY AS-BUILT T.O.F. ELEVATIONS AND COORDINATE W/ STEEL SUPPLIER. RESOLVE ANY DISCREPANCIES PRIOR TO STEEL FABRICATION & DELIVERY.
5. VERIFY EXACT SIZE AND LOCATION OF DEPRESSED AND/OR RAISED SLABS WITH ARCHITECTURAL DRAWINGS.
6. FOR SIDEWALK LOCATION, SEE ARCHITECTURAL DRAWINGS.
7. VERIFY EXACT SIZE AND LOCATION OF OPENINGS IN PRECAST CONCRETE WALL PANELS WITH ARCHITECTURAL DRAWINGS.

NOTES:
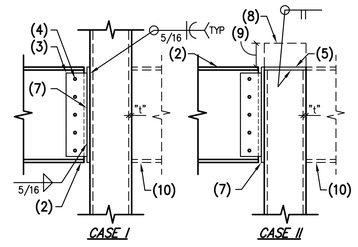
1. CONCRETE SLAB ON GRADE.
2. 8" THICK CONCRETE WALL/SLAB
3. 2/ #5 AT 10" O.C. E.W. HIGH DENSITY FOAM.
4. DOWEL INTO WALLS BEYOND W/ #5 x 24"x24" TO LAP W/ SLAB /WALL REINFORCEMENT.
5. WATER STOP PER TYPICAL DETAIL.

227 CONCRETE CHANNEL AT HEADWORKS
NO SCALE

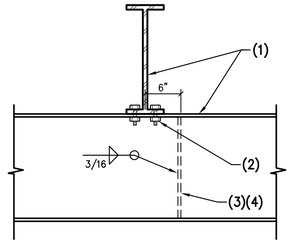
NOTES:
1. HSS SQUARE OR RECTANGULAR COLUMN.
2. STEEL BEAM.
3. STEEL SHEAR PLATE. SEE TYP. BOLT SCHEDULE.
4. FOR SIZE, TYPE, AND NUMBER OF BOLTS, REFER TO TYP. BOLT SCHEDULE.
5. 1/2" STEEL CAP PLATE.
6. AT t ≤ 1/4" USE FILLET WELD SIZE TO MATCH "t". AT t > 1/4" USE 5/16" FILLET.
7. 1/2" STEEL BACKER PLATE x BEAM DEPTH x WIDTH OF COLUMN LESS 1".
8. TOP OF COLUMN AS OCCURS.
9. DEPTH TO MATCH JOIST SHOE.
10. BEAM BOTH SIDES WHERE OCCURS.



B SHEAR PLATE TO COLUMN

NOTES:
–DETAIL A MAY BE USED TYP. U.N.O.
–DETAIL B MAY BE USED AT CONTRACTOR'S OPTION WHERE HSS MIN. FLANGE THICKNESSES ARE MET PER SCHEDULE.
–WHERE COLUMNS ARE RECTANGULAR IN LIEU OF SQUARE, THE GREATER FLANGE LENGTH (I.E. WORST CASE) APPLIES PER SCHEDULE.
–CONTRACTOR MAY INCREASE PLAN COLUMN THICKNESS AT THEIR OPTION.

MINIMUM COLUMN FLANGE THICKNESS FOR DETAIL B

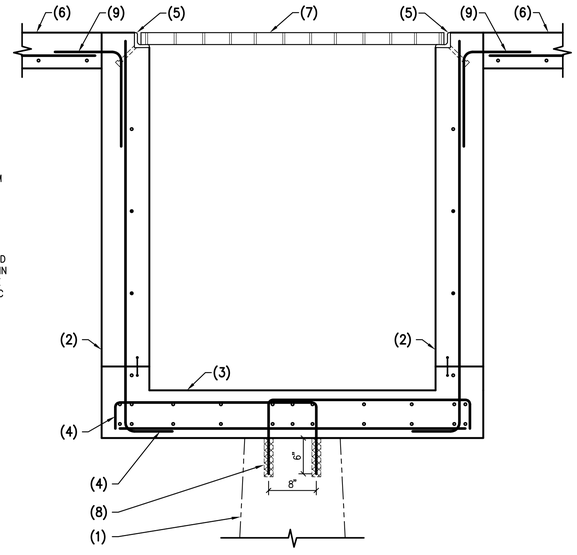


HSS MEMBER	THICKNESS ("t")
4x4	1/4"
5x5	1/4"
6x6	1/4"
7x7	1/4"
8x8	5/16"
9x9	5/16"
10x10	3/8"
12x12	3/8"
14x14	1/2"
16x16	1/2"

A SHEAR PLATE TO BACKER PLATE TO COLUMN

225 TYPICAL BEAM TO HSS STEEL COLUMN
NO SCALE

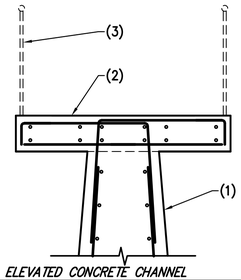
NOTES:
1. STEEL BEAM.
2. 4 – 3/4" DIA. BOLTS ON BEAM GAGE.
3. 3/8" STIFFENER PLATE BOTH SIDES AT END OF BEAM.
4. END OF BEAM AS OCCURS.



222 STEEL BEAM TO STEEL BEAM CONNECTION
NO SCALE

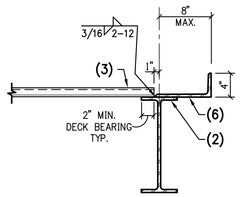
NOMINAL BEAM DEPTH "D"	NUMBER OF 1" DIA. ASTM, F3125 BOLTS
UP TO 7"	2
8" – 11"	2
12" – 14"	3
15" – 17"	4
18" – 20"	5
21" – 23"	6
24" – 29"	7
30" – 32"	8
33" – 35"	9
36"	10

223 BOLT SCHEDULE FOR TYPICAL STEEL CONNECTIONS
NO SCALE



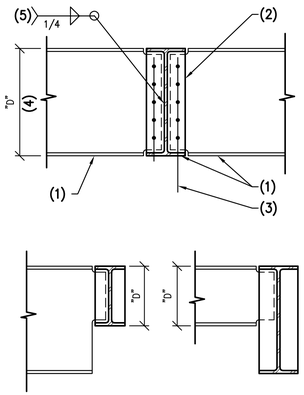
FRAMING NOTES:
1. THE TYPICAL STEEL BEAM TO STEEL COLUMN OR STEEL BEAM TO STEEL BEAM CONNECTION CONSISTS OF 3/8" SINGLE SHEAR PLATES WITH 1"ø, ASTM F3125 BOLTS. USE 5/8" SHEAR PLATES WHERE "D" = 27" OR GREATER.
2. ALL BOLTS SHALL BE INSTALLED USING SHORT SLOTTED HOLES IN EITHER THE BEAM WEB OR THE SHEAR PLATE PER LATEST AISC SPECIFICATIONS.

NOTES:
1. EXISTING CONCRETE WALL.
2. 8" CONCRETE WALL WITH #5 AT 7" O.C. E.W.
3. 8" CONCRETE SLAB WITH #5 AT 8" O.C. TOP AND BOTTOM E.W.
4. STD HOOK.
5. L3x3x1/4 W/ 1/2"ø H.S. AT 18" O.C.
6. CONCRETE SLAB.
7. GRATING AND ATTACHMENT BY OTHERS.
8. DRILL AND EPOXY W/ HILTI HIT–RE 500 V3 EPOXY (ESR–3814) OR APPROVED EQUAL.
9. #5x30"x.30" AT 12" O.C.



220 CONCRETE CHANNEL AT CONCRETE SLABS
NO SCALE

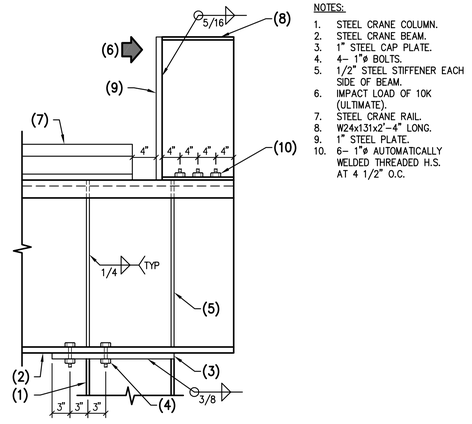
NOTES:
1. CONCRETE WALL.
2. CONCRETE SLAB W/ #4 AT 12" O.C. EACH WAY, TOP AND BOTTOM.
3. HANDRAIL POST PER PACE.



228 ELEVATED CONCRETE CHANNEL
NO SCALE

NOTES:
1. CONT. 1/4" STEEL BENT PLATE.
2. TOP FLANGE OF STEEL BEAM
3. STEEL DECK – FOR DIRECTION OF DECK, SEE PLANS.

226 TYPICAL DECK EDGE AT ROOF
NO SCALE



NOTES:
1. STEEL BEAM.
2. 3/8" STEEL SHEAR PLATE –USE 5/8" STEEL SHEAR PLATE WHERE "D" = 27" OR GREATER.
3. FOR SIZE, TYPE & NUMBER OF BOLTS, SEE TYPICAL BOLT SCHEDULE.
4. "D" = LESSER OF BEAM DEPTHS AS OCCURS.
5. WELD 3 SIDES TYPICAL – USE SAME CONNECTION AT STIFFENER PLATES WHEN REQUIRED.

NOTE:
AT ONE SIDED CONNECTIONS, INSTALL 3/8" STIFFENER PLATE OPPOSITE SHEAR PLATE.

224 TYPICAL CONNECTION WIDE FLANGE BEAM TO BEAM
NO SCALE

NOTES:
1. STEEL CRANE COLUMN.
2. STEEL CRANE BEAM.
3. 1" STEEL CAP PLATE.
4. 4– 1"ø BOLTS.
5. 1/2" STEEL STIFFENER EACH SIDE OF BEAM.
6. IMPACT LOAD OF 10K (ULTIMATE).
7. STEEL CRANE RAIL.
8. W24x131x2'–4" LONG.
9. 1" STEEL PLATE.
10. 6– 1"ø AUTOMATICALLY WELDED THREADED H.S. AT 4 1/2" O.C.

221 CRANE STOP AT END OF CRANE WALL
NO SCALE

SHEET **S12.4**
84 OF 209 SHEETS

JOB NO. B777

FINAL PLANS ISSUED FOR BID

M:\PROJECTS\2024\PACE\SAN LUIS WWTP 3MGD EXPANSION (24291)\200\S12.4.dwg -- Tab: S12.4 -- by rstonaker on 01/26/26 at 4:12:48 PM

ELECTRICAL NOTES:

1. ELECTRICAL WORK SHALL COMPLY WITH THE ADOPTED NATIONAL ELECTRICAL CODE VERSION, FEDERAL, STATE AND LOCAL JURISDICTION CODES.
2. ALL WORK SHALL BE DONE IN A NEAT, WORKMANLIKE, FINISHED AND SAFE MANNER, ACCORDING TO THE LATEST PUBLISHED NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION STANDARDS OF INSTALLATION, UNDER COMPETENT SUPERVISION.
3. CONTRACTOR SHALL VISIT THE SITE PRIOR TO CONSTRUCTION TO BECOME FAMILIAR WITH EXISTING CONDITIONS AND ALL OTHER FACTORS WHICH MAY AFFECT THE EXECUTION OF THIS WORK.
4. CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO EXISTING WALKS, WALLS, DRIVEWAYS, CURBS, LANDSCAPE, TREES, IRRIGATION, ETC. DAMAGES SHALL BE REPAIRED BY THE CONTRACTOR TO THE SATISFACTION OF THE OWNER AT NO ADDITIONAL COST TO THE OWNER.
5. CONTRACTOR SHALL PAY FOR LOCAL FEES AND INSPECTIONS AS MAY BE REQUIRED AND PROVIDE A CERTIFICATE OF INSPECTION TO THE OWNER.
6. CONTRACTOR SHALL LEAVE THE SITE CLEAN, REMOVE ALL DEBRIS, EMPTY CARTONS, TOOLS, CONDUIT, WIRE SCRAPS AND ALL MISCELLANEOUS SPARE EQUIPMENT AND MATERIALS USED IN THE WORK DURING CONSTRUCTION.
7. IT IS THE OBLIGATION OF THE CONTRACTOR TO ORGANIZE HIS WORK SO THAT A COMPLETE ELECTRICAL, INSTRUMENTATION, AND/OR CONTROL SYSTEM FOR THE FACILITY AS CALLED FOR IN THE DESIGN WILL BE PROVIDED AND SUPPORTED BY ACCURATE SHOP AND RECORD DRAWINGS, AND ALL O & M MANUALS.
8. ALL CABLES SHALL BE NEW, COPPER, RATED FOR 600V AND LISTED FOR ITS LOCATION WITH A MINIMUM TEMPERATURE RATING OF 90 DEG. C; POWER CABLES SHALL BE TYPE XHHW-2, UNLESS NOTED OTHERWISE.
9. MINIMUM SIZE CONDUIT ABOVE GROUND SHALL BE 3/4". MINIMUM SIZE CONDUIT BELOW GROUND SHALL BE 1" UNLESS NOTED OTHERWISE.
10. MINIMUM SIZE POWER CONDUCTORS SHALL BE #12 AWG UNLESS NOTED OTHERWISE.
11. ALL WIRE TERMINATIONS SHALL HAVE A MINIMUM TEMPERATURE RATING OF 75 DEG C, AS SUCH, WIRE AMPACITIES ARE CALCULATED ON 75 DEG C RATINGS.
12. CONDUIT SIZE SHALL BE AS SPECIFIED IN THE PLANS OR DETAILS. UNDERGROUND CONDUIT SHALL BE SCH 40 PVC ENCASED IN CONCRETE WITH PVC COATED GRS BENDS, ELBOWS AND STUB-UPS. ABOVE-GROUND CONDUIT SHALL BE PVC COATED GALVANIZED RIGID STEEL (RMC). OUTDOOR EQUIPMENT SHALL BE NEMA 3R, UNLESS NOTED OTHERWISE.
13. GROUND AND BOND ALL EQUIPMENT AND ENCLOSURES PER NEC ARTICLE 250 AND MANUFACTURER REQUIREMENTS.
14. CONTRACTOR SHALL PLAN AND INSTALL WORK IN SUCH A MANNER AS TO CONFORM TO THE STRUCTURE, AVOID OBSTRUCTIONS, PRESERVE HEADROOM AND KEEP OPENINGS AND PASSAGEWAYS CLEAR.
15. THE CONTRACTOR SHALL PROVIDE ALL LABOR, MATERIALS, EQUIPMENT, AND SERVICES NECESSARY TO DELIVER A COMPLETE AND FUNCTIONAL ELECTRICAL SYSTEM AS SHOWN AND DESCRIBED IN THE CONTRACT DOCUMENTS. WHILE NOT EVERY COMPONENT MAY BE EXPLICITLY DETAILED, THE CONTRACTOR IS RESPONSIBLE FOR FURNISHING AND INSTALLING ITEMS THAT ARE REASONABLY INFERABLE FROM THE INTENT OF THE DRAWINGS AND SPECIFICATIONS AND ARE CUSTOMARILY REQUIRED FOR A COMPLETE INSTALLATION. THIS DOES NOT RELIEVE THE ENGINEER OF DESIGN RESPONSIBILITY, NOR DOES IT REQUIRE THE CONTRACTOR TO MAKE DESIGN DECISIONS. AMBIGUITIES, CONFLICTS, OR MISSING INFORMATION IN THE DESIGN SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER FOR CLARIFICATION OR DIRECTION PRIOR TO PROCEEDING.
16. ALL TRENCHING, CONDUITS, ETC. SHALL BE ROUTED AND INSTALLED IN SUCH A MANNER THAT WILL NOT DAMAGE EXISTING FACILITIES OR UNDERGROUND UTILITIES. SHOULD DAMAGE OCCUR, IT WILL BE THE CONTRACTOR'S RESPONSIBILITY TO REPAIR DAMAGE TO THE SATISFACTION OF THE OWNER OR INSPECTOR.
17. ALL CONDUIT RUNS SHOWN ON THIS PLAN ARE SCHEMATIC IN NATURE. THE CONTRACTOR SHALL MAKE SURE THAT ALL CONDUIT INSTALLATIONS MEET LOCAL AND STATE CODES.
18. WHEN CROSSING PATHWAYS OR SIDEWALKS, CONTRACTOR SHALL BORE UNDER OR SAWCUT EXISTING CONCRETE SIDEWALKS AND ASPHALT WALKS. ANY DAMAGE TO CONCRETE SIDEWALKS AND ASPHALT WALKS TO BE REPLACED IN KIND.
19. CONTRACTOR SHALL GUARANTEE WORK INSTALLED UNDER THE CONTRACT TO BE FREE FROM DEFECTIVE WORKMANSHIP AND MATERIALS, USUAL WEAR EXPECTED, AND SHOULD ANY SUCH DEFECTS DEVELOP WITHIN A PERIOD OF ONE YEAR ACCEPTANCE OF THE PROJECT BY THE OWNER, THE CONTRACTOR SHALL REPAIR AND/OR REPLACE ANY DEFECTIVE ITEMS AND DAMAGE RESULTING FROM FAILURE OF THESE ITEMS, AT NO EXPENSE WHATSOEVER TO THE OWNER.
20. ALL CIRCUITS SHALL BE LEGIBLY IDENTIFIED AT THE PANEL, JUNCTION BOXES AND AT ALL EQUIPMENT IN A PERMANENT MANNER (I.E. ETCHED PLATES, CONDUCTOR TAG, PERMANENT MARKER, ETC.). THE LABELING SHALL INCLUDE PANEL CIRCUIT NUMBER, "TO" AND "FROM" IDENTIFICATION, AND MARKED "SPARE" WHERE APPLICABLE.
21. CONTRACTOR SHALL TEST ELECTRICAL SYSTEM FOR SHORT CIRCUITS AND MEGGER TEST FEEDERS AND BRANCH CIRCUIT WIRING. INSURE LOW IMPEDANCE GROUND PATH SYSTEM. PERFORM HIPOT TESTING WHEN REQUIRED BY LOCAL JURISDICTION.
22. CONTRACTOR SHALL COORDINATE ALL EQUIPMENT CONNECTIONS WITH EQUIPMENT SUPPLIER PRIOR TO ROUGH-IN. PROVIDE ADDITIONAL FUSED DISCONNECT SWITCHES AND CONTROLS IF OVERCURRENT PROTECTION OR CONTROLS ARE NOT INTEGRAL WITH UNITS.
23. FULL LOAD AMPS (FLA) SIZES, AS NOTED IN THESE DRAWINGS, ARE BASED ON SPECIFIED EQUIPMENT DATA. CONTRACTOR SHALL VERIFY NAMEPLATE FLA OF EQUIPMENT SUPPLIED AND COORDINATE ACCORDINGLY PER EQUIPMENT SUPPLIERS RECOMMENDATIONS AND CODE REQUIREMENTS.
24. CONDUITS OR RACEWAYS INSTALLED IN AREAS WHERE ELEVATION CHANGES MAY CAUSE WATER OR MOISTURE TO ENTER THE ELECTRICAL EQUIPMENT THROUGH THE CONDUIT SHALL BE SEALED IN ACCORDANCE WITH NEC 300.5 (G).
25. MATERIALS SHALL BE NEW AND OF THE BEST QUALITY. MATERIALS SHALL BE MANUFACTURED IN ACCORDANCE WITH NEMA, ANSI, UNDERWRITER'S LABORATORY OR OTHER APPLICABLE STANDARDS AND RATED FOR HEAVY DUTY SERVICE.
26. SELECTION OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH THE DRAWINGS AND/OR SPECIFICATIONS.
27. THE SUBMITTALS SHALL BE NEATLY GROUPED AND ORGANIZED. PERTINENT INFORMATION SHALL BE HIGHLIGHTED, AND THE SPECIFIC PRODUCT SHALL BE IDENTIFIED. ALL SUBMITTALS SHALL BE COMPLETE, AND PRESENTED IN ONE PACKAGE. THE SUBMITTAL SHALL INCLUDE A COMPLETE LIST OF THE EQUIPMENT AND MATERIALS, INCLUDING THE MANUFACTURER'S NAME, PRODUCT SPECIFICATION, DESCRIPTIVE DATA, TECHNICAL LITERATURE, PERFORMANCE CHARTS, CATALOG CUTS, INSTALLATION INSTRUCTION, AND SPARE PART RECOMMENDATIONS FOR EACH DIFFERENT ITEM OF THE EQUIPMENT SPECIFIED.
28. VERIFY ALL CONDUIT FILL RATIOS, BOX FILLS, AND CONDUIT BENDS (MAX 360 DEGREES) ARE MET PER NEC REQUIREMENTS. INSTALL PULL BOXES AND DE-RATE CABLE AMPACITY AS NECESSARY.
29. CONTRACTOR TO READ ALL THE DRAWINGS IN THIS SET TO BECOME FAMILIARIZED WITH THE FULL ELECTRICAL SCOPE, INCLUDING BUT NOT LIMITED TO THE MECHANICAL, INSTRUMENTATION AND CIVIL DRAWINGS.
30. THESE DRAWINGS AND THE PROJECT SPECIFICATIONS ARE COMPLEMENTARY. WHERE THERE IS OVERLAP, THE MORE STRINGENT REQUIREMENT WILL TAKE PRECEDENCE.
31. CONTRACTOR SHALL VERIFY ALL CIRCUITS CONTAIN LESS THAN 5% VOLTAGE DROP. CONTRACTOR SHALL PROVIDE SHORT CIRCUIT ANALYSIS AND ARC FLASH STUDY, AS REQUIRED.
32. CONTRACTOR SHALL COORDINATE AND PERFORM WORK TO THE STANDARDS OF ALL APPLICABLE UTILITY COMPANIES, INCLUDING BUT NOT LIMITED TO UNDERGROUND ELECTRICAL LINES, GAS LINES AND WATER LINES. WHEN AN ISSUE OR DISCREPANCY ARISES, NOTIFY THE ENGINEER AND OWNER IMMEDIATELY.
33. CONTRACTOR SHALL NOTIFY THE ENGINEER AND OWNER WITH ANY DISCREPANCIES FOUND DURING INSTALLATION OR REVIEW.
34. CONTRACTOR TO PROVIDE REQUIREMENTS FOR NFPA 70E, AS REQUIRED.
35. ALL POWER AND LIGHTING CONDUITS SHALL HAVE A GROUND WIRE, BE AT LEAST #12 THHN, AND SIZED FOR PROPER AMPACITY DERATING AND CONDUIT FILL.
36. ALL 120V RECEPTACLES SHALL BE GFCI PROTECTED, EITHER WITH A GFCI RECEPTACLE OR THROUGH A GFCI CIRCUIT BREAKER.
37. ELECTRICAL EQUIPMENT INCLUDING, BUT NOT LIMITED TO, ELECTRICAL SERVICE EQUIPMENT AND DISTRIBUTION PANELBOARDS SHALL BE SEISMIC-CERTIFIED AND ANCHORED ACCORDING TO EQUIPMENT MANUFACTURER'S INSTALLATION INSTRUCTIONS.
38. CONTROL PANELS, ATS, AND POWER DISTRIBUTION PANELS SHALL BE EQUIPPED WITH HEATER(S) PROPERLY SIZED TO PREVENT MOISTURE ENTERING THE PANELS.
39. CONTRACTOR TO POTHOLE THE LOCATIONS OF NEW DUCTBANKS AND CONDUITS BEFORE DIGGING TO VERIFY EXISTING UNDERGROUND UTILITY

ABBREVIATION LIST

A, AMP	AMPERES
AM	AMMETER
AC	ALTERNATING CURRENT
AIC	AMPS INTERRUPTING CAPACITY
BAT	BATTERY BC BATTERY CHARGER
C	COMMON
CB	CIRCUIT BREAKER
CNTL	CONTROL
CPT	CONTROL POWER TRANSFORMER
CP	CONTROL PANEL
CR	CONTROL RELAY, CORROSION RESISTANT
CT	CURRENT TRANSFORMER
DC	DIRECT CURRENT
DR	DUPLEX RECEPTACLE
(E)	EXISTING
EC	EDGE CONNECTOR
EF	EXHAUST FAN
ETH	ETHERNET
ETM	ELAPSED TIME METER
F	FUSE
FB	FUSE BLOCK
(F)	FUTURE
FLTR	FILTER
FS	FLOAT SWITCH
FVNR	FULL VOLTAGE NON REVERSING
FVR	FULL VOLTAGE REVERSING
G, GND	GROUND
GFCI	GROUND FAULT CIRCUIT INTERRUPTER
HPS	HIGH PRESSURE SODIUM
HS	HAND SWITCH
ICP	INSTRUMENTATION CONTROL PANEL
ISR	INTRINSICALLY SAFE RELAY
I, IND	INDICATOR
INST	INSTANTANEOUS
KV	KILOVOLT
KVA	KILOVOLT AMPERES
KW	KILOWATT
LED	LIGHT EMITTING DIODE
LCD	LIQUID CRYSTAL DISPLAY
LA	LIGHTNING ARRESTER
LCP	LOCAL CONTROL PANEL
LPU	LIGHTNING PROTECTION UNIT
LOS	LOCK OUT STOP
LR	LATCH RELAY
LS	LOAD SPLITTER
MA	MILLIAMPERES
MB	MAIN BREAKER
MCC	MOTOR CONTROL CENTER
MCP	MOTOR CIRCUIT PROTECTOR
MOT	MOTOR OVERTEMPERATURE
MMS	MOTOR MOISTURE SENSOR
MS	MOTOR STARTER
N	NEUTRAL
NA	NON AUTOMATIC
(N)	NEW
N.I.C.	NOT IN CONTRACT
NP	NAMEPLATE
OT	OVERTEMPERATURE
O/L	OVERLOAD DEVICE
PB	PUSHBUTTON
PCB	PRINTED CIRCUIT BOARD
PC	PROGRAMMABLE CONTROLLER
PLC	PROGRAMMABLE LOGIC CONTROLLER
PL-1	PILOT LIGHT 1
PFR	PHASE/POWER FAIL RELAY
PNL	PANEL
POT	POTENTIOMETER
PPM	POWER PHASE MONITOR
PR	PAIR CABLE
PS	PRESSURE SWITCH
PT	POTENTIAL TRANSFORMER
PTT	PUSH TO TEST
PVC	POLYVINYL CHLORIDE
PWR	POWER
RR	RUN RELAY
RV	REDUCED VOLTAGE
RVAT	REDUCED VOLTAGE AUTO-TRANSFORMER
SSS	SOLID-STATE STARTER
SR	SIMPLEX RECEPTACLE
SS	SELECTOR SWITCH, SOFT STARTER
SP	SURGE PROTECTOR
SPD	SURGE PROTECTOR DEVICE
SV	SOLENOID VALVE
SWBD	SWITCHBOARD
TB	TERMINAL BLOCK
TR	TIME DELAY RELAY
TC	TIMECLOCK
TM	THERMAL MAGNETIC
TS	TEMPERATURE SWITCH
TSP	TWISTED SHIELDED PAIR
TWP	TWISTED PAIR
TYP	TYPICAL
UG	UNDERGROUND
V	VOLTS, VOLTAGE
VM	VOLTMETER
VFD	VARIABLE FREQUENCY DRIVE
WP	WEATHERPROOF
TR,XFMR	TRANSFORMER
XP	EXPLOSION PROOF
XMTR	TRANSMITTER/TRANSPONDER

CONSTRUCTION NOTES:

1. MOTOR CONTROL CENTER (MCC-1), 1600A BUS, 1600A MAIN, 480V, 3PH-3W, 60 HZ, 65 KAIC, NEMA 12, PAD-MTD.
2. GROUND AND BOND EQUIPMENT TO GROUND SYSTEM PER GROUNDING PLAN AND MANUFACTURER REQUIREMENTS.
3. POWER METER, INTEGRAL CIRCUIT PROTECTION DEVICE TO BE SIZED BY MANUFACTURER.
4. SURGE PROTECTION DEVICE, INTEGRAL CIRCUIT PROTECTION DEVICE TO BE 200 KA/PH MINIMUM.
5. CIRCUIT BREAKER EQUIPPED WITH ENERGY REDUCING MAIN SWITCH WITH LOCAL STATUS INDICATORS PER NEC 240.87(B)(3).
6. COMMON ACTIVE HARMONIC FILTER, NEMA 12, PAD-MTD. TO BE SIZED BY VFD MF'R.
7. PROVISION FOR BREAKER.
8. 500 KCMIL BARE COPPER MAIN BONDING JUMPER.
9. 4/0 BARE COPPER GROUNDING ELECTRODE CONDUCTOR.
10. 4/0 BARE COPPER GROUND RING.
11. UTILITY TRANSFORMER & PAD PER ARIZONA PUBLIC SERVICE (APS) REQUIREMENTS.
12. INSTALL EUSERC APPROVED SERVICE ENTRANCE SECTION (SES) W/ MAIN METER PER UTILITY COMPANY SPECIFICATIONS, 3000A, 480/277V, 3Ø-4W, 60 HZ, NEMA 3R, 4000A BUS, 65 KAIC, PAD-MTD.
13. AUTOMATIC TRANSFER SWITCH (ATS), 480V, 3000A, 3P, 60 HZ, NEMA 3R, 65 KAIC.
14. STANDBY GENERATOR (DIESEL), 480V, 3Ø-4W, 500KW, 625 KVA, 0.8 PF, 100% RATED 800A ALSI BREAKER INTEGRATED AND EMERGENCY STOP PER NEC 445.19. GENERATOR TO BE PAD-MTD IN WEATHER-PROTECTED ENCLOSURE, MF'R: GENERAC OR APPROVED EQUAL.
15. GENERATOR MUST COMPLY WITH ALL LOCAL EMISSIONS AND OTHER REQUIREMENTS. CONTRACTOR TO OBTAIN GENERATOR PERMIT PRIOR TO INSTALLATION.
16. MAIN SWITCHGEAR, 480V, 3000A, 3Ø-3W, 60 HZ, NEMA 3R, 65 KAIC.
17. 45 KVA TRANSFORMER (XFMR-EA), 480-120/208V, 3Ø-4W, 60 HZ, NEMA 12 ENCLOSURE, WALL-MTD., MF'R: EATON, PN V48M22T4516 OR APPROVED EQUAL.
18. PANELBOARD (PANEL-EA), 120/208V, 3Ø-4W, 60 HZ, 150A MCB, 22 KAIC, BOLT-ON TYPE, 42 CIRCUITS, NEMA 12, WALL-MTD., MF'R: EATON, PN PRL1X (DIMS: 20"W x 5.75"D x 48"H) OR APPROVED EQUAL.
19. STUB-UP AT ADMIN BLDG.
20. SPARE BREAKER.
21. GENERATORS MUST BE CAPABLE OF AUTO-SYNCHRONIZING AND RUN SIMULTANEOUSLY. GENERAC OR EQUAL.
22. REPLACE EXISTING PANEL-H1 IN PLACE, TRANSFER EXISTING LOADS. REPLACEMENT PANEL TO BE 480V, 3PH, 225A BUS, 200A MCB, 42 CIRCUITS, 65 KAIC, NEMA 12.

NOTES:

1. CONTRACTOR SHALL LABEL EQUIPMENT FOR ARC-FLASH HAZARD WARNINGS IN ACCORDANCE WITH NEC 110.16(A).
2. CONTRACTOR SHALL LABEL SERVICE ENTRANCE EQUIPMENT WITH AVAILABLE FAULT CURRENT IN ACCORDANCE WITH NEC 110.16 (B) AND 110.24 (A) (B).
3. GROUND AND BOND ALL ENCLOSURES PER GROUNDING PLANS AND MANUFACTURER/ CODE REQUIREMENTS.
4. NOT ALL EQUIPMENT AND WIRING IS SHOWN ON THIS DIAGRAM. REFERENCE DRAWINGS IN THE ELECTRICAL SET AND ENTIRE PROJECT TO COMPLETELY UNDERSTAND THE ELECTRICAL SCOPE OF WORK.
5. DRAWINGS ARE DIAGRAMMATIC AND DO NOT REFLECT ACTUAL ROUTING. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
6. CONTRACTOR SHALL PERFORM SAFE WORK IN ACCORDANCE WITH NFPA 70E STANDARDS.
7. WHEN REQUIRED CONTRACTOR SHALL PROVIDE STRUCTURAL DESIGN CALCULATIONS FOR MOUNTING AND ANCHORING OF FABRICATED ASSEMBLIES AND SUPPORT STRUCTURES, SIGNED AND SEALED BY A REGISTERED PROFESSIONAL ENGINEER (CIVIL/STRUCTURAL) CURRENTLY LICENSED IN THE SAME STATE AS THE FINAL INSTALLATION. CALCULATIONS SHALL INCLUDE SEISMIC CONSIDERATIONS FOR THE LOCATION OF INSTALLATION.
8. VFD'S SHALL MEET ALL REQUIREMENTS OF IEEE 519 WITH USE OF EQUIPMENT. SEE SPECIFICATIONS FOR FURTHER INFORMATION.

CONSTRUCTION NOTES:

1. MOTOR CONTROL CENTER (MCC-1), 1600A BUS, 1600A MAIN, 480V, 3PH-3W, 60 HZ, 65KAIC, NEMA 12, PAD-MTD.
2. EXISTING AERATION BLOWERS TO BE RELOCATED AND NAME CHANGED TO "FEQ" BLOWERS.
3. FUSED DISCONNECT SWITCH, 480V, 200A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON OR APPROVED EQUAL.
4. FVNR MOTOR STARTER, 480V, 3PH, 60 HZ.
5. FUSES TO BE SIZED PER VFD MF'R RECOMMENDATIONS.
6. VARIABLE FREQUENCY DRIVE, 480V, 3PH, NEMA 12, 6-PULSE.
7. FUSED DISCONNECT SWITCH, 480V, 30A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON, PN DH361FWK OR APPROVED EQUAL.
8. FUSED DISCONNECT SWITCH, 480V, 60A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON, PN DH362FWK OR APPROVED EQUAL.
9. LOW-SPEED PUMPS. CONTRACTOR TO ENSURE THE VFD CAN SUPPORT THE FLA OF THE PUMPS.
10. FUSED DISCONNECT SWITCH, 480V, 100A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON OR APPROVED EQUAL.
11. REDUCED VOLTAGE SOFT STARTER, 480V, 3PH, 60 HZ.
12. PUMP MOTOR REPLACEMENT PER MECHANICAL PLANS
13. CONDUITS/CONDUCTORS TO REMAIN INTACT FOR REUSE.
14. DEWATERING CONTROL PANEL (DW-CP) (VENDOR PANEL), 480V, 3PH-3W, 60 HZ.
15. PLANT PROCESS WATER BOOSTER PUMP STATION CONTROL PANEL (VENDOR PANEL) w/INTEGRATED CB, 65 KAIC OR FUSED DISC SW AND A/C UNIT SIZED. INSTALLED BY CONTRACTOR.
16. MINI POWER ZONE "DW" (MPZ-DW), 15 KVA, 480-120/208V, 3PH, 4W, 60 HZ, NEMA 4X, WITH INTEGRATED FUSED DISCONNECT SWITCH OR CIRCUIT BREAKER MF'R: EATON, PN 48G28T1518 (DIMS: 36.10"H x 28.80"W x 9.40"D) OR APPROVED EQUAL.
17. PLANT DRAIN PUMP STATION CONTROL PANEL, 480V, 3PH, 60 HZ, DUPLEX, NEMA 4X, MF'R: SJE RHOMBUS, PN IFN-6-1-W-511 (PANEL DIMS: 16"H X 14"W X 6"D) OR APPROVED EQUAL.

NOTES:

1. CONTRACTOR SHALL LABEL EQUIPMENT FOR ARC-FLASH HAZARD WARNINGS IN ACCORDANCE WITH NEC 110.16(A).
2. CONTRACTOR SHALL LABEL SERVICE ENTRANCE EQUIPMENT WITH AVAILABLE FAULT CURRENT IN ACCORDANCE WITH NEC 110.16 (B) AND 110.24 (A) (B).
3. GROUND AND BOND ALL ENCLOSURES PER GROUNDING PLANS AND MANUFACTURER/ CODE REQUIREMENTS.
4. NOT ALL EQUIPMENT AND WIRING IS SHOWN ON THIS DIAGRAM. REFERENCE DRAWINGS IN THE ELECTRICAL SET AND ENTIRE PROJECT TO COMPLETELY UNDERSTAND THE ELECTRICAL SCOPE OF WORK.
5. DRAWINGS ARE DIAGRAMMATIC AND DO NOT REFLECT ACTUAL ROUTING. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
6. CONTRACTOR SHALL PERFORM SAFE WORK IN ACCORDANCE WITH NFPA 70E STANDARDS.
7. WHEN REQUIRED CONTRACTOR SHALL PROVIDE STRUCTURAL DESIGN CALCULATIONS FOR MOUNTING AND ANCHORING OF FABRICATED ASSEMBLIES AND SUPPORT STRUCTURES, SIGNED AND SEALED BY A REGISTERED PROFESSIONAL ENGINEER (CIVIL/STRUCTURAL) CURRENTLY LICENSED IN THE SAME STATE AS THE FINAL INSTALLATION. CALCULATIONS SHALL INCLUDE SEISMIC CONSIDERATIONS FOR THE LOCATION OF INSTALLATION.
8. VFD'S SHALL MEET ALL REQUIREMENTS OF IEEE 519 WITH USE OF EQUIPMENT. SEE SPECIFICATIONS FOR FURTHER INFORMATION.

CONSTRUCTION NOTES:

1. MOTOR CONTROL CENTER (MCC-2), 600A BUS, 600A MAIN, 480V, 3PH-3W, 60 HZ, 65KAIC, NEMA 12, PAD-MTD.
2. REDUCED VOLTAGE SOFT STARTER, 480V, 3PH, 60 HZ.
3. FVNR MOTOR STARTER, 480V, 3PH, 60 HZ.
4. FUSED DISCONNECT SWITCH, 480V, 100A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON OR APPROVED EQUAL.
5. LOW-SPEED PUMPS. CONTRACTOR TO ENSURE THE VFD CAN SUPPORT THE FLA OF THE PUMPS.
6. FUSED DISCONNECT SWITCH, 480V, 30A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON, PN DH361FWK OR APPROVED EQUAL.
7. FUSED DISCONNECT SWITCH, 480V, 60A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON, PN DH362FWK OR APPROVED EQUAL.
8. PUMP REPLACEMENT MOTORS TO BE INVERTER DUTY.
9. CONDUITS/CONDUCTORS TO REMAIN INTACT FOR REUSE.
10. VARIABLE FREQUENCY DRIVE, 480V, 3PH, NEMA 12, 6-PULSE.
11. EXISTING AERATION BLOWER TO BE RELOCATED AND NAME CHANGED TO "FEQ" BLOWER.
12. FUSED DISCONNECT SWITCH, 480V, 200A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON OR APPROVED EQUAL.
13. FUSES TO BE SIZED PER VFD MF'R RECOMMENDATIONS.
14. POWER METER, INTEGRAL CIRCUIT PROTECTION DEVICE TO BE SIZED BY MANUFACTURER.
15. SURGE PROTECTION DEVICE, INTEGRAL CIRCUIT PROTECTION DEVICE TO BE 200 KA/PH MINIMUM.

NOTES:

1. CONTRACTOR SHALL LABEL EQUIPMENT FOR ARC-FLASH HAZARD WARNINGS IN ACCORDANCE WITH NEC 110.16(A).
2. CONTRACTOR SHALL LABEL SERVICE ENTRANCE EQUIPMENT WITH AVAILABLE FAULT CURRENT IN ACCORDANCE WITH NEC 110.16 (B) AND 110.24 (A) (B).
3. GROUND AND BOND ALL ENCLOSURES PER GROUNDING PLANS AND MANUFACTURER/ CODE REQUIREMENTS.
4. NOT ALL EQUIPMENT AND WIRING IS SHOWN ON THIS DIAGRAM. REFERENCE DRAWINGS IN THE ELECTRICAL SET AND ENTIRE PROJECT TO COMPLETELY UNDERSTAND THE ELECTRICAL SCOPE OF WORK.
5. DRAWINGS ARE DIAGRAMMATIC AND DO NOT REFLECT ACTUAL ROUTING. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
6. CONTRACTOR SHALL PERFORM SAFE WORK IN ACCORDANCE WITH NFPA 70E STANDARDS.

CONSTRUCTION NOTES:

[1] PANEL TO BE EQUIPPED WITH SURGE PROTECTIVE DEVICE FROM THE PANEL PROVIDER, 100 KA MIN PER PHASE.

NOTES:

1. PROVIDE UPDATED, COMPLETE, AND ACCURATE TYPED PANELBOARD CIRCUIT DIRECTORIES AT THE COMPLETION OF WORK.
2. CIRCUIT BREAKERS SHALL BE THERMAL MAGNETIC, TRIP INDICATING.
3. MULTI-POLE CIRCUIT BREAKERS SHALL BE EQUIPPED WITH AN INTERNAL COMMON TRIP MECHANISM.
4. CIRCUIT BREAKERS SHALL BE OF THE SAME MANUFACTURER AS THE PANELBOARD.
5. PANELBOARDS SHALL BE BOLT-ON TYPE.
6. BREAKER SHALL HAVE FIXED LOCKS WHEN REQUIRED BY NEC CODE.
7. PANELBOARDS SHALL BE PROVIDED WITH SPARE BREAKERS AS INDICATED.
8. "SPACE" INDICATES A LISTED CIRCUIT BREAKER COVER.
9. BOTH ENDS OF CONDUCTORS SHALL BE LABELED WITH THE PANEL NAME AND CIRCUIT.
10. EQUIPMENT FED FROM PANELBOARDS SHALL BE LABELED WITH THEIR CIRCUIT IN ACCORDANCE WITH NEC 110.22 (A).

CONSTRUCTION NOTES:

1. MOTOR CONTROL CENTER (MCC-1), 1600A BUS, 1600A MAIN, 480V, 3PH-3W, 60 HZ, 65 KAIC, NEMA 12, PAD-MTD.
2. COMMON ACTIVE HARMONIC FILTER, NEMA 12, PAD-MTD. TO BE SIZED BY VFD MF'R.
3. UTILITY TRANSFORMER & PAD PER ARIZONA PUBLIC SERVICE (APS) REQUIREMENTS.
4. INSTALL EUSERC APPROVED SERVICE ENTRANCE SECTION (SES) W/ MAIN METER PER UTILITY COMPANY SPECIFICATIONS, 3000A, 480/277V, 3Ø-4W, 60 HZ, NEMA 3R, 4000A BUS, 65 KAIC, PAD-MTD.
5. AUTOMATIC TRANSFER SWITCH (ATS), 480V, 3000A, 3P, 60 HZ, NEMA 3R, 65 KAIC.
6. STANDBY GENERATOR (DIESEL), 480V, 3Ø-4W, 500KW, 625 KVA, 0.8 PF, 100% RATED 800A LSIG BREAKER INTEGRATED AND EMERGENCY STOP PER NEC 445.19. GENERATOR TO BE PAD-MTD IN WEATHER-PROTECTED ENCLOSURE, MF'R: GENERAC OR APPROVED EQUAL.
7. GENERATOR MUST COMPLY WITH ALL LOCAL EMISSIONS AND OTHER REQUIREMENTS. CONTRACTOR TO OBTAIN GENERATOR PERMIT PRIOR TO INSTALLATION.
8. MAIN SWITCHGEAR, 480V, 3000A, 3Ø-3W, 60 HZ, NEMA 3R, 65 KAIC.
9. 45 KVA TRANSFORMER (XFMR-EA), 480-120/208V, 3Ø-4W, 60 HZ, NEMA 12 ENCLOSURE, WALL-MTD., MF'R: EATON, PN V48M22T4516 OR APPROVED EQUAL.
10. PANELBOARD (PANEL-EA), 120/208V, 3Ø-4W, 60 HZ, 150A MCB, 22 KAIC, BOLT-ON TYPE, 42 CIRCUITS, NEMA 12, WALL-MTD., MF'R: EATON, PN PRL1X (DIMS: 20"W x 5.75"D x 48"H) OR APPROVED EQUAL.
11. MAIN PLC PANEL, 120V, 1PH, EQUIPPED WITH UPS, NEMA 12, PAD-MTD.
12. MBR PLC PANEL (VENDOR PANEL), 120 V, 1PH, EQUIPPED WITH UPS, PAD-MTD.
13. INSTALL BOLLARDS AROUND UTILITY XFMR PER APS REQUIREMENTS.
14. MOTOR CONTROL CENTER (MCC-2), 600A BUS, 600A MAIN, 480V, 3PH-3W, 60 HZ, 65KAIC, NEMA 12, PAD-MTD.
15. A/C CONDENSOR UNIT, 208V, 1PH, PAD-MTD.
16. A/C FAN UNIT, 208V, 1PH, WALL-MTD.
17. A/C UNIT DISCONNECT SWITCH, 208V, 1PH, 30A, NEMA 4X, WALL-MTD.

NOTES:

1. GROUND AND BOND ALL EQUIPMENT AND ENCLOSURES PER MANUFACTURER REQUIREMENTS AND NEC 250.
2. CONDUITS ARE SHOWN SCHEMATICALLY. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
3. MAINTAIN WORKING CLEARANCES IN FRONT OF PANELS AS REQUIRED PER NEC 110.26.
4. LABEL ABOVEGROUND CONDUITS PER DETAIL "H" SHEET E11.0.
5. TYPICAL CONDUIT TRANSITIONS PER DETAILS "D, E, F, G" SHEET E11.0.
6. SUPPORT CONDUITS PER DETAIL 'E' SHEET E11.3.

LEGEND:

- (J) NEMA 4X JUNCTION BOX. INSTALL OUTSIDE CLASSIFIED AREA.
- POWER PULLBOX. SEE DETAIL "A" SHEET E11.7.
- CONTROL PULLBOX. SEE DETAIL "B" SHEET E11.7.

NOTES:

1. INSTALL INTRINSICALLY SAFE WIRING IN ACCORDANCE WITH NEC 504. PROVIDE BARRIERS IN CONDUITS, JUNCTION BOXES, ETC. AS REQUIRED.
2. GROUND AND BOND ALL EQUIPMENT AND ENCLOSURES PER MANUFACTURER REQUIREMENTS AND NEC 250.
3. CONDUITS ARE SHOWN SCHEMATICALLY. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
4. MAINTAIN WORKING CLEARANCES IN FRONT OF PANELS AS REQUIRED PER NEC 110.26.
5. LABEL ABOVEGROUND CONDUITS PER DETAIL "H" SHEET E11.0.
6. TYPICAL CONDUIT TRANSITIONS PER DETAILS "D, E, F, G" SHEET E11.0.
7. SUPPORT CONDUITS PER DETAIL 'E' SHEET E11.3.
8. COARSE & FINE SCREENS & GRIT REMOVAL TANKS ARE CLASS I/DIV II WITHIN 10 FT ENVELOPE AROUND EQUIPMENT AND OPEN CHANNEL PER NFPA 820 TABLE 5.2.2 (2)(C) & (5)(C).
9. ODOR CONTROL IS CLASS I/DIV II WITHIN 3 FT ENVELOPE AROUND UNIT AND VENT(S) PER NFPA 820 TABLE 4.2.2 (18)(E).
10. CONTRACTOR TO INSTALL EYS SEALS ON ALL CONDUITS ROUTED TO EQUIPMENT BETWEEN CLASSIFIED LOCATION AND NON-CLASSIFIED LOCATIONS PER NEC LOCATIONS PER NEC 500 - 504.

DRAFT

NOTES:

1. CONDUCTORS FOR HOME RUN CIRCUITS FOR LIGHTING AND RECEPTACLES SHALL BE #12 AWG MINIMUM SIZE, UNLESS NOTED OTHERWISE.
2. LIGHTING AND RECEPTACLE WIRING SHALL BE TYPE XHHW-2.
3. ALL WIRING SHOWN SHALL BE WITHIN CONDUITS (PVC COATED RGS FOR OUTDOOR EXPOSED CONDUIT).
4. ALL CONDUITS SHALL CONTAIN A PROPERLY SIZED GROUND CONDUCTOR. DE-RATE CONDUCTORS PER NEC 310.15(C)(1).
5. MOUNT AND WIRE ALL EQUIPMENT PER MANUFACTURER REQUIREMENTS.
6. DE-RATE CONDUCTOR AMPACITY BASED ON # OF CURRENT CARRYING CONDUCTORS AS APPLICABLE.
7. RECEPTACLE OUTLETS SHALL BE CLEARLY LABELED WITH THE CIRCUIT PROVIDING POWER. LABEL SHALL BE SUITED FOR ENVIRONMENT RECEPTACLE IS LOCATED IN.
8. INSTALL A PHOTOCELL SENSOR IN A NON-SHADED AREA, 120V, NO/NC CONTACT.
9. COARSE & FINE SCREENS & GRIT REMOVAL TANKS ARE CLASS I/DIV II WITHIN 10 FT ENVELOPE AROUND EQUIPMENT AND OPEN CHANNEL PER NFPA 820 TABLE 5.5.2 (2)(C) & (5)(C).
10. ODOR CONTROL IS CLASS I/DIV II WITHIN 3 FT ENVELOPE AROUND UNIT AND VENT(S) PER NFPA 820 TABLE 4.2.2 (18)(E).
11. CONTRACTOR TO INSTALL EYS SEALS ON ALL CONDUITS ROUTED TO EQUIPMENT BETWEEN CLASSIFIED LOCATION AND NON-CLASSIFIED LOCATIONS PER NEC LOCATIONS PER NEC 500 - 504.

LEGEND:

CONSTRUCTION NOTES:

1. PANELBOARD (PANEL-EB), 120/208V, 3Ø-4W, 60 HZ, 100A MCB, 22 KAIC, BOLT-ON TYPE, 54 CIRCUITS, NEMA 12, WALL-MTD., MF'R: EATON, PN PRL1X (DIMS: 20"W x 5.75"D) OR APPROVED EQUAL.
2. OUTDOOR LIGHTING CONTROL PANEL (LCP-A), 120-277 VAC, 1PH, 8 RELAYS, DIGITAL TIME CLOCK, ANALOG PHOTOSENSOR (WIRED TO PANEL MTD. OUTDOOR), PANEL DIMS: 14.41"H x 14.41"W x 4.05"D, MF'R: ACUITY BRANDS, PN ARP INTENC08 NLT-8FCR-MVOLT-SC-SM-DTC-ARPA APS OL (OR APPROVED EQUAL). SEE SHEET E10.0.

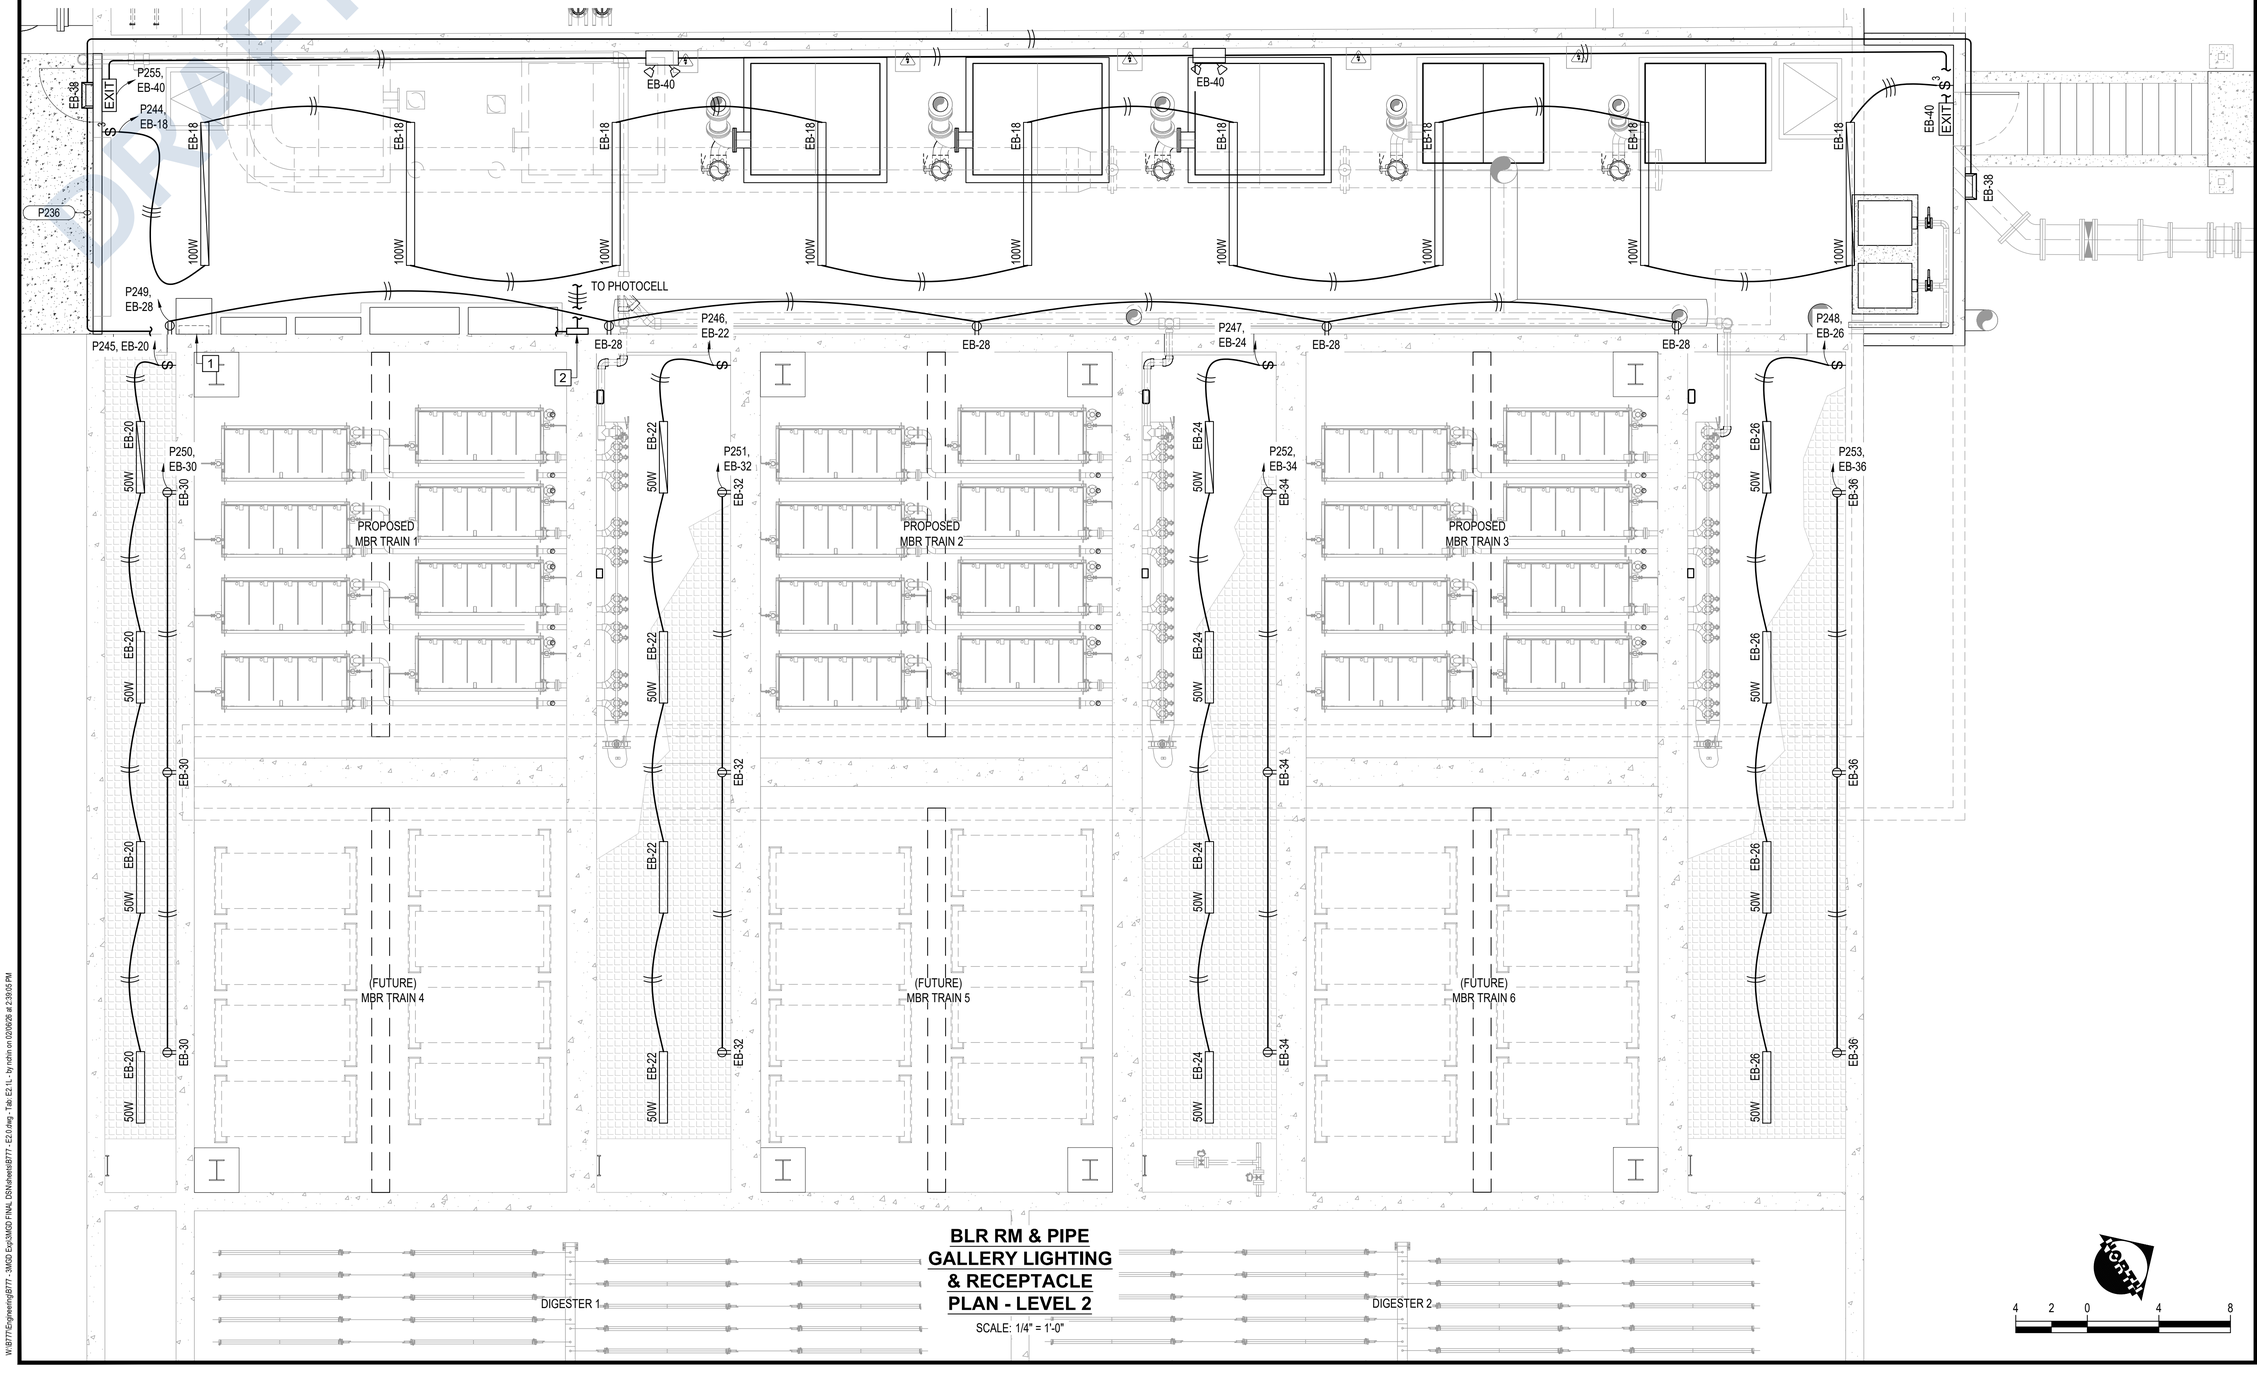
LEGEND:

100W EB-# — INDICATES CIRCUIT NUMBER
LINEAR WASHDOWN 8FT, 100W, 5000K LED, 120-277V, NEMA 4X, 0-10V DIMMER. DIAGONAL LINE IMPLIES BATTERY BACKUP. MF'R: RAB, PN SHARK8-100W/D10 (ADD "E2" FOR BATTERY BACKUP) (OR APPROVED EQUAL)

50W EB-# — INDICATES CIRCUIT NUMBER
LINEAR WASHDOWN 4FT, 50W, 5000K LED, 120-277V, NEMA 4X, 0-10V DIMMER. DIAGONAL LINE IMPLIES BATTERY BACKUP. MF'R: RAB, PN SHARK4-50W/D10 (ADD "E2" FOR BATTERY BACKUP) (OR APPROVED EQUAL)

^{3} — 120 VAC, 20A, WALL-MTD. LIGHT SWITCH LOCATED 42" AFF. NUMBER INDICATES 3-WAY SWITCH REQUIRED.

((— HASH MARKS INDICATE NUMBER OF CURRENT CARRYING CONDUCTORS. GROUND CONDUCTOR(S) NOT SHOWN FOR CLARITY. ALL CONDUITS SHALL HAVE A MINIMUM #12 GROUND AND SIZED PER CODE REQUIREMENTS.



OUTDOOR LED WALL PACK, 57W, 3000K LED, 120-277V, BRONZE, 0-10V DIMMABLE, MF'R: RAB, PN SLIM57Y/D10 (OR APPROVED EQUAL).

EGRESS LIGHT, 9W, MF'R: THE EXIT LIGHT CO., PN EL-HD6 (OR APPROVED EQUAL).

EXIT — 1.3W, SINGLE FACE, ALUMINUM, 120 VAC. LED EXIT LIGHT WITH BATTERY BACKUP. LITHONIA SIGNATURE (OR APPROVED EQUAL).

GENERAL NOTES:

1. CONDUCTORS FOR HOME RUN CIRCUITS FOR LIGHTING & RECEPTACLES SHALL BE #10 AWG MINIMUM SIZE.
2. ADDITIONAL RECEPTACLES ARE SHOWN ON THE POWER/CONTROL DRAWINGS IN THIS PLAN SET THAT ARE NOT SHOWN ON THE LIGHTING/RECEPTACLE PLANS DUE TO NATURE OF EQUIPMENT.
3. LIGHTING & RECEPTACLE WIRING SHALL BE TYPE XHHW-2.
4. RECEPTACLE OUTLETS SHALL BE CLEARLY LABELED WITH THE CIRCUIT PROVIDING POWER. LABEL SHALL BE SUITED FOR ENVIRONMENT RECEPTACLE IS LOCATED IN.
5. ALL WIRING SHOWN SHALL BE WITHIN CONDUITS (PVC COATED RGS FOR OUTDOOR EXPOSED CONDUIT AND RGS FOR INDOOR CONDUIT).
6. ALL CONDUITS SHALL CONTAIN A PROPERLY SIZED GROUND CONDUCTOR. DE-RATE CONDUCTORS PER NEC 310.15(C)(1).
7. MOUNT AND WIRE ALL EQUIPMENT PER MANUFACTURER REQUIREMENTS.
8. DE-RATE CONDUCTOR AMPACITY BASED ON # OF CURRENT CARRYING CONDUCTORS AS APPLICABLE.
6. SUPPORT CONDUITS PER DETAIL 'E' SHEET E11.3.

CONSTRUCTION NOTES:

1. FUSED DISCONNECT SWITCH, 480V, 60A, 3Ø-3W, HEAVY-DUTY, NEMA 4X, MF'R: EATON, PN DH362FWK OR APPROVED EQUAL. SEE DETAIL "C" SHEET E11.1.
2. SECURELY FASTEN LIGHT POSTS TO CMU WALL.
3. 4/0 BARE COPPER, GROUNDING ELECTRODE CONDUCTOR ROUTED WITHIN SCH80 PVC CONDUIT (ABOVEGRADE).
4. GROUND PUMP PAD REBAR.
5. GROUND PIPE.
6. GROUND ROD PER DETAIL "A" SHEET E11.0.
7. #4/0 BARE GROUND RING, MINIMUM 30" BELOW GRADE.
8. GROUND INSPECTION ROD PER DETAIL "A" SHEET E11.2.
9. CONNECT TO GROUND RING PER DETAIL "C" SHEET E11.0.

NOTES:

1. CONDUITS ARE SHOWN SCHEMATICALLY. CONTRACTOR SHALL INSTALL PULLPOINTS WHERE REQUIRED FOR PULLING TENSION AND MAINTAINING LESS THEN (4) 90 DEGREE BENDS.
2. MAINTAIN WORKING CLEARANCES IN FRONT OF PANELS AS REQUIRED PER NEC 110.26.
3. LABEL ABOVEGROUND CONDUITS PER DETAIL "H" SHEET E11.0.
4. TYPICAL CONDUIT TRANSITIONS PER DETAILS "D, E, F, G" SHEET E11.0.
5. SUPPORT CONDUITS PER DETAIL 'E' SHEET E11.3.
6. CONDUCTORS FOR HOME RUN CIRCUITS FOR LIGHTING AND RECEPTACLES SHALL BE #12 AWG MINIMUM SIZE, UNLESS NOTED OTHERWISE.
7. LIGHTING AND RECEPTACLE WIRING SHALL BE TYPE XHHW-2.
8. ALL WIRING SHOWN SHALL BE WITHIN CONDUITS (PVC COATED RGS FOR OUTDOOR EXPOSED CONDUIT).
9. ALL CONDUITS SHALL CONTAIN A PROPERLY SIZED GROUND CONDUCTOR. DE-RATE CONDUCTORS PER NEC 310.15(C)(1).
10. MOUNT AND WIRE ALL EQUIPMENT PER MANUFACTURER REQUIREMENTS.
11. DE-RATE CONDUCTOR AMPACITY BASED ON # OF CURRENT CARRYING CONDUCTORS AS APPLICABLE.
12. RECEPTACLE OUTLETS SHALL BE CLEARLY LABELED WITH THE CIRCUIT PROVIDING POWER. LABEL SHALL BE SUITED FOR ENVIRONMENT RECEPTACLE IS LOCATED IN.
13. INSTALL A PHOTOCELL SENSOR IN A NON-SHADED AREA, 120V, NO/NC CONTACT.
14. GROUND AND BOND ALL EQUIPMENT AND ENCLOSURES PER MANUFACTURER REQUIREMENTS AND NEC 250.
15. GROUND AND BOND ALL MOTOR FRAMES TO THE GROUND RING.
16. ALL METALLIC ENCLOSURES INCLUDING ROLL UP GATES, RAILINGS, FENCES, STAIR CASES OR OTHER METAL PERSONNEL MAY COME IN CONTACT WITH, SHALL BE EFFECTIVELY GROUNDED.
17. GROUNDING ROUTING IS DIAGRAMMATIC.
18. THE GEC MUST BE INSTALLED WITH SUFFICIENT LENGTH SO THAT REMOVAL OF ONE EQUIPMENT DOES NOT INTERRUPT THE EFFECTIVE GROUND PATH OF ANY OTHER EQUIPMENT.

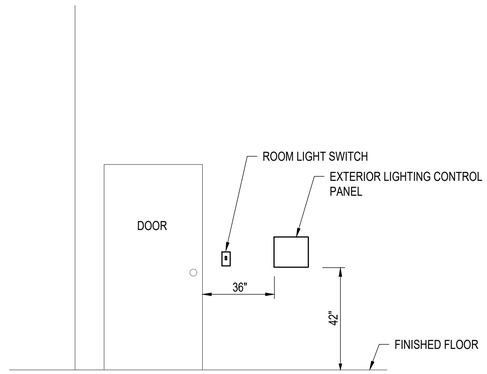
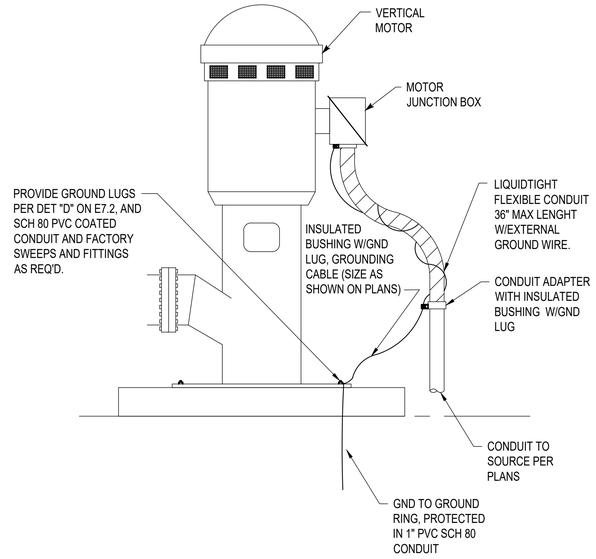
EXHAUST FAN (BLOWER GALLERY) — NTS — A



FAN MOTOR STARTER

NOTES:



1. MOTOR STARTER SCHEMATIC IS REFERENCED FROM MANUFACTURER MANUAL GREENHECK MODEL MS-1P.
2. MOUNT MOTOR STARTER TO WALL WALL PER MANUFACTURER REQUIREMENTS.
3. SMOKE ALARM FROM FIRE ALARM PANEL SHALL INHIBIT THE FAN FROM STARTING.
4. INSTALL POWER AND CONTROLS PER INSTRUMENTATION SPECIFICATIONS AND ELECTRICAL PLANS.

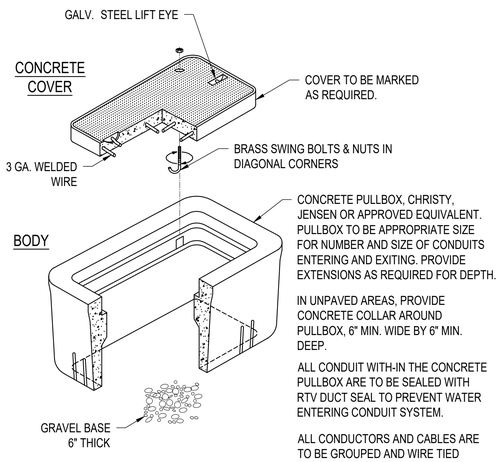
A — WALL MOUNTED TRANSFORMER — NTS



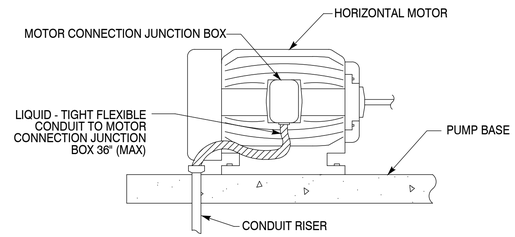
B — NOT USED

C — PULLBOX/VAULT PLAN & SECTION DETAIL — NTS

D — SMALL CONCRETE PULLBOX DETAIL — NTS

CONCRETE PULLBOX, CHRISTY, JENSEN OR APPROVED EQUIVALENT. PULLBOX TO BE APPROPRIATE SIZE FOR NUMBER AND SIZE OF CONDUITS ENTERING AND EXITING. PROVIDE EXTENSIONS AS REQUIRED FOR DEPTH.

IN UNPAVED AREAS, PROVIDE CONCRETE COLLAR AROUND PULLBOX, 6" MIN. WIDE BY 6" MIN. DEEP.



ALL CONDUIT WITH-IN THE CONCRETE PULLBOX ARE TO BE SEALED WITH RTV DUCT SEAL TO PREVENT WATER ENTERING CONDUIT SYSTEM.

ALL CONDUCTORS AND CABLES ARE TO BE GROUPED AND WIRE TIED EVERY 6" PER CONDUIT FILL.

ALL SPLICES WITH-IN THE CONCRETE PULLBOX ARE TO BE SEALED WITH AN INSULATING AND ENCAPSULATING RESIN PACK, SCOTCHCAST 4 OR EQUAL

E — NOT USED

SNT	SUPERNATANT		
SWR	SEWER		
TERT	TERTIARY		
TW	TREATED WATER		
WAS	WASTE ACTIVATED SLUDGE		
WTR	WATER		
WW	WASTE WATER		

LINE CODES

- MAJOR PROCESS LINE (00"-XXX) — LINE SIZE & NUMBER
- MINOR PROCESS LINE — PROCESS CONTINUATION WITHIN SCOPE
- AIR
- ELECTRICAL
- PLC TO HMI COMMUNICATION
- (1) AUTO–DIALER AND PRIORITY LEVEL

INSTRUMENT NUMBERING

FSS NPPNNN – xx – DEVICE FUNCTION
- FIRST LETTER (INSTRUMENT ID)
- SUCCEEDING LETTERS (INSTRUMENT ID)
- EQUIPMENT NUMBER

LINE NUMBER GROUPS

000	OVERFLOW/ BYPASS/ DRAIN/ SUPERNATANT/SCNG
100	INFLUENT/ MIX LIQUOR/ SECONDARY EFFLUENT / EFFLUENT
200	TERTIARY/ REUSE WATER/ BACKWASH/ RECYCLE WATER
300	PERMEATE/ FILTRATE/ CENTRATE
400	PROCESS AIR
500	CHEMICAL DOSING/ POLYMER
600	FOUL AIR
700	WATER/ TREATED WATER/ FILTERED WATER
800	RAS/ SOLIDS
900	WAS/ SCUM/ WASTE WATER/ RAW WATER

EQUIPMENT SUPPLIED BY IDENTIFIER

- [K] KUBOTA
- [H] HYDRODYNE
- [F] FKC

GENERAL INSTRUMENT OR FUNCTION SYMBOLS

	FIELD MOUNTED	PRIMARY LOCATION ACCESSIBLE TO OPERATOR	PRIMARY LOCATION INACCESSIBLE TO OPERATOR	AUXILIARY LOCATION ACCESSIBLE TO OPERATOR

AGENDA ITEM REVIEW FORM

Regular City Council Meeting **7. C.**

Meeting Date: 06/10/2026

Department Head: Manuel Hernandez, Assistant Director of Public Works, Public Works Department

Submitted By: Xochitl Lopez, Administrative Coordinator, Public Works Department

Action Requested: Motion

ITEM:

Discussion and possible action on any and all matters regarding the electrical distribution and streetlight services from Arizona Public Service (APS) for the Sidewinder Road Streetlight Project - Project No. 2026051. **(Manuel Hernandez, Assistant Director of Public Works)**

SUMMARY:

Public Works is requesting the Mayor and City Council's approval to pay a deposit invoice from Arizona Public Service (APS) in the amount of $62,230.85 for electrical distribution and streetlight-related work associated with the Sidewinder Road Street Light Project - Project No. 2026051.

A total of 13 new streetlights will be installed along the east side right-of-way of Sidewinder Road, from 8th Avenue to County 22nd Street. The charges include streetlight installation along with an advance for project-related electrical infrastructure costs. This deposit is required for APS to initiate scheduling and proceed with construction activities.

APS is the sole provider of electrical utility services in the region; therefore, this work qualifies as an exclusive service (reference City Code 3.05.020 – Exclusive Services).

RECOMMENDATION / SUGGESTED MOTION:

I MOVE TO APPROVE PAYMENT OF A DEPOSIT INVOICE TO APS IN THE AMOUNT OF $62,230.85 FOR THE SIDEWINDER ROAD STREET LIGHT PROJECT.

Fiscal Impact

IS THERE FISCAL IMPACT ASSOCIATED WITH THIS ITEM:	Yes
CITY/STATE/FEDERAL FUNDS:	City / Developer Contribution
TOTAL:	$62,230.85
BUDGETED AMOUNT:	$104,000.00
AVAILABLE AMOUNT TO TRANSFER:	$104,000.00
ACCT NAME & GL#/REMAINING BALANCE BEFORE PURCHASE:	Capital Outlay - Improvement Roads - 200-860-90010 / $104,000.00

FISCAL IMPACT STATEMENT (IF THIS IS A BUDGET TRANSFER, YOU MUST ATTACH THE BUDGET ADJUSTMENT FORM):

No budget transfer is needed for such project. Project #2026051 for Sidewinder Road Streetlights was approved for FY26.

Riedel Construction provided a developer contribution of $33,000.00 toward the installation of the proposed streetlights.

REQUEST FOR PROPOSALS

CITY OF SAN LUIS, ARIZONA

PUBLIC WORKS YARD ENTRANCE
PARKING LOT PAVING

2026-RFP-00000011

NOTICE IS HEREBY GIVEN THAT sealed proposals or bids for furnishing all labor, materials, equipment, tools and performing all services required for the construction of the Public Works Yard Entrance - Parking Lot Paving project and work incidental thereto.

The scope of works includes the installation of AC paving at the entrance of the Public Works Yard for a new parking lot. The work shall include, but is not limited to, furnishing all labor, materials, equipment, and incidentals necessary to complete the placement of asphalt paving in accordance with the applicable standards.

Project Description: Grading for pavement and placement of approximately 755 square yards of 3" AC pavement and 6" ABC (1/2" AC MAG Mix).

All work shall be completed and ready no later than June 30th, 2026.

Plans, specifications and contract documents may be obtained through the Procurement Portal at https://procurement.opengov.com/portal/sanluisaz.

No Pre-Bid meeting will be held for this project.

All bids must be submitted through the Procurement Portal and be accompanied by a certified or cashier's check or bid bond in the amount of five (5%) percent of the total amount of the bid.

Bids will be publicly opened at the City of San Luis City Hall, Pedro Julian Conference Room, 1090 E. Union St. San Luis, AZ 85349 on Monday, May 18th, 2026, at 1:00 P.M. (M.S.T) and read aloud. Bid opening can also be viewed virtually via the following link: Bid Opening - Public Works Yard Entrance - Parking Lot Paving.

The City of San Luis reserves the right to cancel this procurement, and/or to reject any or all bids, and/or to waive any informality in any bid. No bidder may withdraw their bid for a period of thirty (30) days after the date set for the bid opening thereof:

INSTRUCTIONS TO BIDDERS

1. DEFINITIONS

1.1 All definitions set forth in the General Conditions are applicable to these Instructions to Bidders.

1.2 Bidding Documents include the Advertisement for Bids, Instructions to Bidders, Bid Form, Bid Bond Form, and the proposed Contract Documents, including any addenda issued prior to the receipt of bids.

1.3 Addenda are written or graphic instructions issued prior to the execution of the contract which modify or interpret the Bidding Documents, including Drawings, conditions of the Contract and

Specifications, by additions, deletions, clarifications or corrections. Addenda will become part of the Contract Documents when the Construction Contract is executed.

1.4 The term "Owner" or "City" shall be interpreted to mean City of San Luis, Arizona.

2. BIDDER'S REPRESENTATION

2.1 Before submitting a bid, bidders shall carefully examine the Drawings, Bidding Requirements, Bid Document Contract Forms, General Conditions, Supplementary General conditions, Specifications, and Related Documents, visit the site of the work, and fully inform themselves as to all existing conditions and limitations and shall include in the bid a sum sufficient to cover the cost of all items included in the Contract. The Bidder, if awarded the Contract, shall not be allowed any extra compensation by reason of any matter or thing concerning the Project, which said Bidder might have fully informed himself prior to the building.

3. BIDDING DOCUMENTS

3.1 Bidders may obtain copies of the bidding Documents through the Procurement Portal at https://procurement.opengov.com/portal/sanluisaz.

4. INTERPRETATION OF BIDDING DOCUMENTS

4.1 Should a Bidder find discrepancies, inconsistencies or obscurities in, or omissions from the bidding documents, or should he be in doubt as to their meaning, Bidder shall submit their questions through the Procurement Portal. A written Addendum, clarifying the intent of the documents shall be issued, if needed. Addenda may not be issued less than 48 hours before the time specified for receipt of bids. Questions received less than four calendar days prior to the assigned bid date cannot be answered in writing. Should any discrepancies not be clarified by Addendum, the Contractor shall use the most expensive condition shown or specified in bid.

4.2 Prior to the receipt of bids, each person or firm recorded by the Office of the City Clerk as having received the bidding documents will be notified of any addendum. Addenda will also be available for Inspection wherever the bidding documents are kept available for that purpose.

4.3 All Addenda issued by the City during the time of bidding are to be included in the bid, and shall become a part of the bidding documents (bidder’s responsibility to check for addendums). Acknowledge receipt of Addenda through the Procurement Portal.

4.4 All questions must be submitted through the Procurement Portal no later than 6:00 pm on Tuesday, May 12, 2026.

5. SUBSTITUTIONS

5.1 When a specific manufacturer, trade name or material is specified, or indicated, it is to establish a standard of quality and shall not be construed as limiting competition. However, components of electrical systems shall be standard items and/or interchangeable with specified manufacturer to facilitate repairs and upkeep by the Owner.

5.2 It shall be the Contractor's responsibility to provide materials of equal standards to those specified. The City shall be the sole judge as to whether or not the products meet the established standards. The Contractor MUST request written approval of equal materials from the City prior to, or after the bid date.

6. BIDDING PROCEDURES

6.1 A bid is invalid if it has not been submitted through the Procurement Portal at https://procurement.opengov.com/portal/sanluisaz prior to the time and date for receipt of bids indicated in the Invitation to Submit Proposals, or prior to any extension thereof issued to the bidders.

6.5 Bid Security:

1. Each bidder is required to submit, with his bid, a certified or cashier's check upon a solvent bank, or a surety bond for five percent (5%) of the amount of the Base Bid made payable to the Owner.
    a. If more than one proposal is submitted, only one Bid Security is required for the largest base Bid amount, however, this bond shall apply to any and/or all bids submitted.
2. The Bid Security shall be given as a guarantee that the bidder will enter into a contract to perform the work, if awarded to him, and provide a satisfactory Performance Bond and Payment Bond as required under the provisions of Title 34, Chapter 2, Article 2, Arizona Revised Statutes. Bid Security shall be declared forfeited as liquidated damages if he refuses to enter into said contract upon request to do so by the Owner.
3. Bid Security will be returned to the unsuccessful bidders, and to the successful bidder upon the execution of a satisfactory Performance Bond and Payment Bond and Construction Contract.
4. Bidders may withdraw their bid at any time prior to bid opening, but may not resubmit them. No bid may be modified or withdrawn after the bid opening for a period of 30 days except where the award of the contract has been delayed at least 31 days.

7. SUBCONTRACTOR LIST FORM

7.1 Complete the Subcontractor List Form, listing a single company, firm, or organization name only for each branch of the work. Submit through the vendor PROPOSAL KIT.

7.2 The competency and responsibility of bidders and their proposed subcontractors will be considered in making the award.

7.4 The Contractor shall pay the cost of all permits, changes, meters, connections, fees, etc., directly to governmental agencies having jurisdiction to comply with the law of the place of the Project in order to complete the work. The bidders' attention is directed to the fact that all applicable state laws, municipal ordinances, and the rules and regulations of all authorities having jurisdiction shall apply to the Contract.

8. REJECTION OF BIDS

8.1 The Bidder acknowledges the right of the Owner to reject any or all bids, to waive any informality or irregularity in any bid received, or to withhold the award for any reason he determines. In addition, the Bidder recognizes the right of the Owner to reject a bid if the Bidder failed to furnish any required Bid Security or to submit the data required by the Bidding Documents, or if the bid is in any way incomplete or irregular. Bidders shall understand that the Owner will not be responsible for any errors or omissions in the preparation of the bid.

9. AGREEMENT

9.1 The form of Agreement which the successful Bidder will be required to execute in two (2) original counterparts. Progressed payments will be made to the Contractor by the Owner in an amount equal to 90% of that due until the final payment.

10. WARRANTY

10.1 The Contractor certifies by submitting his bid that he has familiarized himself with all specified products, materials, and systems which are proposed for inclusion in the required work, and that said materials, products, and systems are appropriate for the use(s) intended. He additionally certifies by submitting this bid that he shall, in fact, install said materials, products, and systems in the work properly and in rigid compliance with the terms and conditions of the Contract Documents, and shall issue his written warranty applicable to the work as required by the applicable Supplementary General Conditions. If the Bidder determines that the proposed materials, products, and/or systems are not appropriate for the use(s) intended, he shall submit his written exceptions attached to the Bid Form.

11. PERFORMANCE AND PAYMENT BONDS

11.1 The Contractor is hereby required to provide and pay for Performance and Payment Bonds. Bonds shall secure the faithful performance (100%) of the Contract and the payment of all obligations (100%) arising there under, in such form as the Owner may prescribe and with such sureties that he may approve. Both Bonds shall be active and held by the Owner for duration of the guaranty (warranty).

12. CONTRACTOR LICENSE LAW, ELIGIBILITY & PREFERENCE

12.1 The Contractor shall comply with, and require all subcontractors to comply with State of Arizona and City Contractor's License Laws. Contractor shall comply with the provisions of "an Act to Regulate the Business of Contracting", Title 32, Chapter 10, Arizona Revised Statutes with latest adopted revisions and ‘Contractor's License Laws and Regulations" dated July, 1981, published by the Arizona State Registrar of Contractors, or the latest revision thereof adopted under the provision of AIRS title 32, chapter 10, Articles 2 and 3.

The prime Contractor shall have a State of Arizona Classification “A” Contractor’s license to perform the work. A bid submitted by any Contractor not properly licensed at the time of bid opening shall be considered non-responsive and will be rejected.

13. NONDISCRIMINATION

13.1 In connection with the performance of work under this Contract, the Contractor agrees (as prescribed in A.R.S. Section 23-373) not to discriminate against any employee or applicant for employment because of race, sex, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment upgrading, demotion, or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensations and selection for training, including apprenticeship. The Contractor agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices setting forth the provisions of the nondiscrimination clauses. The contractor further agrees to insert the foregoing provision in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials.

14. COPIES OF DOCUMENTS FURNISHED

14.1 The Contractor shall obtain Construction Documents free of charge through the Procurement Portal.

15. INSURANCE

15.1 The contractor is required to provide and pay for insurances. He shall file, with his Performance and Payment Bonds, all required Certificates of Insurance and endorsements demonstrating that the insurance policy was amended to add City of San Luis, Arizona as an additionally insured.

15.2 The Contractor shall not commence work under this Contract until he has obtained all the insurance required under this paragraph and such insurance has been approved by the Owner, nor shall the Contractor allow any Subcontractor to commence work on his subcontract until the insurance require of the subcontractor has been so obtained and approved.

15.3 The Contractor shall procure and maintain during the life of this contract, Workmen's Compensation Insurance as required by applicable State or Territorial Law for all of his employees to be engaged in work at the site of the project under this contract, and in any such work sublet, the Contractor shall require the Subcontractor similarly to provide Workmen's Compensation Insurance for all of the latter's employees to be engaged in such work unless such employees are covered by the protection afforded by the Contractors Workmen's Compensation Insurance. In case any class of the employees engaged in hazardous work on the project under this contract are not protected under the Workmen's Compensation Statute, the Contractor shall provide and shall cause each subcontractor to provide adequate employer's liability insurance for the protection of such of his employees as are not otherwise protected.

15.4 The Contractor shall provide public liability insurance and show evidence specified in the Contract Documents in the City Insurance Requirements.

16. ADDITIONAL SERVICES

16.1 Contractor agrees to pay for additional testing services, additional Engineering services, and any similar related additional costs as designated in the Contract Documents.

17. SUMMARY OF THE WORK

17.1 Refer to the Overview, Summary and Scope of Work, and Summary of the Work, for description of the work.

18. SUBSTANTIAL COMPLETION

18.1 Substantial Completion will be achieved no later than June 30, 2026.

19. LIQUIDATED DAMAGES

19.1 The liquidated damages for this project shall be determined by the Schedule of Liquidated Damages in City of San Luis Supplemental to the MAG Uniform Standard Specifications.

20. EVALUATION AND AWARD

- Bid opening will take place on Monday, May 18, 2026 immediately after the close of the bidding.
- City staff will convene in the San Luis City Hall, Pedro Julian Conference Room, 1090 E Union St. San Luis, AZ 85349, open the proposals virtually, and read the bids into the record.
- Award will be made to the lowest qualified responsive bidder.
- Formal award of contract will be on the next available Regular City Council meeting.

21. PROTESTS

All responders will receive notification via e-mail regarding their status vis-a-vis the proposed contract award. Responders not selected have two days from e-mail sent date to initiate protest proceedings. To do this, a dissatisfied party must lodge a protest with Angelica Cifuentes, Procurement Coordinator, via receipted e-mail (acifuentes@sanluisaz.gov) or by certified mail (Attn: Angelica Cifuentes/City of San Luis/P.O. Box 7740/San Luis, AZ 85349). The City of San Luis will then hold a hearing within two days of the receipt of the protest and make a determination within two days of the hearing. In the absence of a successful protest, the contract will be awarded to the most responsive qualified bidder.

PROJECT NAME, LOCATION, AND OVERVIEW

PROJECT NAME:

The name of this project is **Public Works Yard Entrance - Parking Lot Paving**. All correspondence and documents are to reference "Public Works Yard Entrance - Parking Lot Paving".

PROJECT LOCATION:

The Project is located in Yuma County, Arizona. The proposed work is located within the limits of the City of San Luis, Arizona, on 1311 North 4th Avenue San Luis, AZ 85349.

OVERVIEW:

The **Public Works Yard Entrance - Parking Lot Paving** project is being undertaken by the City of San Luis, Arizona. This bid pertains to those activities described herein under the Scope of Work.

It is especially important that bidders are aware of the following:

A. This solicitation is open to general contractors and subcontractors licensed to operate in the State of Arizona.

B. Davis-Bacon wage rates **NO VALUE** apply.

SCOPE OF WORK

Scope of Work, **Public Works Yard Entrance - Parking Lot Paving**.

The proposed work is located within the limits of the City of San Luis, Arizona. The work consists of, but is not limited to the installation of AC paving at the entrance of the Public Works Yard for a new parking lot, furnishing all labor, materials, equipment, and incidentals necessary to complete the placement of asphalt paving in accordance with the applicable standards.

Project Description: Grading for pavement and placement of approximately 755 square yards of 3" AC pavement and 6" ABC (1/2" AC MAG Mix).

All work shall be completed and ready no later than June 30th, 2026.

Special Conditions of Work:

A. Project to be completed 100% and invoice submitted.

B. Performance Bonding, Taxes and other fees are considered incidental to project overall quote.

C. The City of San Luis reserves the right to modify the project scope of work after the proposals are received and evaluated, and before the successful bidder is awarded the contract.

D. Encroachment permit from the City of San Luis will not be required.

E. Quantities noted above are estimated bases on available existing information. Contractor to verify required quantities and confirm with the City of San Luis prior to proceeding with the work, the City will pay for "as-built" quantities.

F. New pavement preservative seal is not required.

G. The project shall be constructed in accordance with all MAG Uniform Standard Specifications and details for Public Works Construction as adopted by the City of San Luis, except as otherwise required by this special conditions.

PROPOSAL KIT

Proposal*
Project Name: Public Works Yard Entrance - Parking Lot Paving

In compliance with the Advertisement for Bids:

Having examined the contract documents, site of work, and being familiar with the conditions to be met, hereby submits the following Proposal for furnishing the material, equipment, labor and everything necessary for the completion of the work listed and agrees to execute the contract documents and furnish the required CONTRACT AND LABOR AND MATERIAL surety bonds and certificates of insurance for the completion of said work, at the locations and for the prices set forth on the inside pages of this form;

Understands that construction of this project shall be in accordance with all applicable Maricopa Association of Governments (MAG) Uniform Standard Specifications and Details for Public Works Construction as adopted by the City of San Luis, the City of Yuma Construction Standard Detail Drawings – 2009 edition [details], the City of San Luis Supplemental to the MAG Uniform Standard Specifications and Details for Public Works Construction and the City of Yuma Construction Standard Detail Drawings, except as otherwise required by the Plans and Special Provisions;

Understands that this proposal for construction of this project shall be submitted with a proposal guarantee of cash, certified check, cashier's check or bid surety bond for an amount not less than 5 percent of the amount bid;

Agrees that upon receipt of Notice of Award, from the City of San Luis, Arizona, Bidder will execute the contract documents within 5 (Five) calendar days;

Understands that the work shall commence on day 1 of the Contract Time and must be completed on or before June 30, 2026.

CITY INSURANCE REQUIREMENTS

The following are the minimum required under the Contract. Greater amounts may be required by law or regulation. Any insurance proceeds in excess of the lmits and coverage required in this Contract and which is applicable to a given loss will be available to the City. These limits required by the Contract do not limit the Contractor's liability under the indemnification provisions of the Contract.

Contractor's Obligation

The Contractor shall secure and maintain, at the Contractor's expense, until the Final Completion of the Project, general liability and property insurance as shall protect the Contractor and the City from claims for bodily injury, personal injury, and property damage which may arise because of the nature of the work or from operations under this Contract. The Contractor's insurance coverage shall be primary insurance with respect to all other available sources. Any coverage maintained by the City shall not contribute to any claims arising from the Contractor's performance of this Contract. The Contractor shall file these certificates with City of San Luis within ten (10) days of execution of this Contract and prior to engaging in any operation or activities set forth in this AGREEMENT. The foregoing insurance policies shall provide that no cancellation, major change in coverage, or expiration by the insurance company or the insured.

General Liability Coverage

Contractor shall have general liability coverage on a per occurrence, and in comprehensive form. General liability coverage shall include Products, Completed Operations, Products Liability, Explosion, Underground and Collapse Hazard, Premises, Operations, Contractual, Independent Contractors, Broad Form Property Damage and Personal Injury. General Liability coverage shall include and eliminate the exclusion for property under the care, custody, and control of the Contractor.

Coverage Amounts

Contractor shall provide general liability and excess general liability coverage in the following amounts, at a minimum:

Employer's Liability

A. Each Accident $100,000

B. Disease for Each Employee $100,000

C. Disease Policy Limit $250,000

Contractors General Liability

A. General Aggregate $6,000,000

B. Products-Completed Operations Aggregate $2,000,000

C. Each Occurrence (Bodily Injury and Property Damage) $6,000,000

D. Personal Injury and Advertising Injury $2,000,000

    1. Property Damage liability insurance will provide Explosion, Collapse, and Underground coverages.

Automobile Liability

A. Bodily Injury:

   1. Each Person $1,000,000

   2. Each Accident $1,000,000

B. Property Damage

   1. Each Accident $1,000,000

C. Combined Single Limit $1,000,000

Contractual Liability

A. Bodily Injury:

   1. Each Accident $2,000,000

   2. Annual Aggregate $2,000,000

B. Property Damage:

   1. Each Accident $2,000,000

   2. Annual Aggregate $2,000,000

   3. Each Accident $2,000,000

   4. Annual Aggregate $2,000,000

Professional Liability Errors and Omissions $1,000,000

Additional Provisions

A. Additional Insured: Contractor shall name the **City of San Luis, Arizona (an Arizona municipal corporation) and its elected officials, officers, agents, as "Additional Insureds**" on all insurance policies, except Worker's Compensation and Errors and Omissions, and this shall be reflected on the Certificate(s) of Insurance, with corresponding endorsement relative to the additionally insured indemnification. Contractor shall name the City of San Luis as certificate holder.

B. Cancellation Notice of Material Change of Coverage: The Contractor shall keep all policies in force for the duration of the Contract and any possible extension thereof. Contractors' required insurance shall be endorsed to provide that the policies will not be canceled, reduced, discontinued, or otherwise materially altered during the period of performance without thirty (30) days prior written notice to the City of San Luis Public Workers Department.

C. Certificate(s) of Insurance: Certificates of Insurance shall be Project-specific. Prior to commencing work under the Contract, Certificates of Insurance shall be submitted and approved by the City. Contractor is responsible for obtaining Certificates of Insurance, establishing that the Contractor and all subcontractors have complied with insurance requirements previously stated. Copies of Certificates of Insurance shall be forwarded to the City Risk Manager for review and filing. Failure of the City to demand such Certificate or other evidence of full compliance with these insurance requirements or failure of the City to identify a deficiency from the evidence that is provided shall not be construed as a waiver of the Contractor's obligation to maintain such insurance. City shall have the right, but not the obligation, to prohibit Contractor or any of its subcontractors from entering the Project Site until such certificates or other evidence that insurance has been placed in complete compliance with these requirements is received and approved by City.

D. Rating of Insurance Companies: Any and all insurance companies supplying coverage to the Contractor shall be approved to write insurance in the State of Arizona and must possess no less than an "A" rating in accordance with the A.M. Best rating guide.

E. Deductible: Contractor shall be solely responsible to satisfy any deductible or self-insured retention with respect to any of the coverages required by the Contract Documents. Such deductibles or self-insured retention shall not be applicable with respect to the policy limits provided to the City of San Luis. The City of San Luis, at its option, may require the Contractor to secure payment of such deductible or self-insured retention by a surety bond or irrevocable and unconditional Letter of Credit.

F. Rental Equipment: In the event that rental of equipment is undertaken to complete and/or perform the Work, the Contractor agrees that it shall be solely responsible for such rental equipment. Such responsibility shall include, but not be limited to, theft, fire, vandalism, and use by unauthorized persons.

G. Personal Property: In the event that materials or any other type of personal property are acquired for the Project or delivered to the Project site, the Contractor agrees that it shall be solely responsible for such property until it becomes a fixture on the Project, or otherwise is installed and incorporated as a final part of the Project. Such responsibility shall include, but not be limited to, theft, fire, vandalism, and use by unauthorized persons. Contractor shall maintain "all risk" insurance on a replacement cost basis, covering loss or damage to personal property (for which it has title and/or risk of loss), which is to become a final part of the Project, during any time such personal property is in transit and while stored or worked upon away from the Project site. City and its officials, officers, employees, and agents shall be named as additional insured under such insurance.

H. Waiver of Subrogation: City and Contractor waive all rights against each other and Architect/Engineer, and separate contractors for damages caused by fire or other perils covered by Builder's Risk or any other property insurance, except such rights as they may have to the proceeds of such insurance.

I. Right to Require Higher Limits: City reserves the right, in its sole discretion, to require higher limits of liability coverage if, in the City's opinion, operations by or on behalf of the Contractor create higher-than-normal hazards and to require the Contractor to name additional parties in interest to be Additional Insureds.

J. Waiver of Requirements: The City Manager, in consultation with the City Risk Manager and/or City Attorney, reserves the right to waive or reduce insurance requirements should it be in the best interest of the City.

GENERAL CONDITIONS OF THE CONTRACT

SECTION 1 - Bidders Participation Subcontractors and Suppliers List

These General Conditions encompass provisions that apply and are incorporated into all construction contracts entered into by the City of San Luis unless otherwise specifically excluded in the executed Contract. Sections 2 through 14 of these General Conditions apply to all construction contracts, in whatever form, including without limitation, Fixed Price, Unit Price, Construction Manager at Risk (CM@Risk), Guaranteed Maximum Price (GMP) Cost-Based, and Job Order Contracts (JOC).

SECTION 2 - GENERAL DEFINITIONS

2.1 The Definitions in the Invitation for Bid (IFB), the Request for Proposals (RFP), the Request for Qualifications (RFQ), and/or the JOC Solicitation (JOC) giving rise to the Contract shall apply to these General Conditions and the Contract for the Project.

2.2 Change Order – A written instrument issued after execution of the Contract Documents signed by City and Contractor, stating their agreement upon all of the following: the addition, deletion, or revision in the scope of services or deliverables; the amount of the adjustment to the Contract Price, the extent of the adjustment to the Contract Time, or modifications of other contract terms. Only a Change Order allows the Contract Price or the Contract Time or both to be changed.

2.3 City – City of San Luis, Arizona, a municipal corporation, with whom the Contractor has entered into the Contract and for whom the Services and/or Work are to be provided pursuant to the Contract(s).

2.4 Contract - The written agreement executed between the City and Contractor, including all of the Contract Documents**.**

2.5 Contract Documents - The documents which together form the Contract between City and Contractor, as identified in Article 2 of the Contract, or are otherwise incorporated into the Contract, including the Contract, the exhibits and attachments to it, these General Conditions, any Notice to Proceed, and any Job Order (if applicable), the Plans and Specifications, Project Schedule, written and properly executed Change Orders, and any other documents so designated in the Contact.

2.6 Contract Price - The agreed-upon price to be paid to the Contractor for full, timely, and acceptable completion of the Services or Work under the terms of the Contract.

2.7 Contract Time(s) - The number of days or the dates related to the Final Completion as stated in Contract Documents. The Contract Time is set forth in the Contract and is based upon the Project Schedule agreed to by the City in writing.

2.8 Contractor - The person or corporation with whom the City has entered into a contract for construction-related work or services related to the Project at issue. As used in these General Conditions, the term Contractor includes CM@Risk and JOC under contract with the City to provide pre-construction and/or construction services.

2.9 Contractor Payment Request - The form that is accepted by the City and used by the Contractor in requesting progress payments or final payment and which shall include such supporting documentation as is required by the Contract Documents and/or City.

2.10 Construction Documents - The plans, specifications, and drawings prepared and issued by the Design Professional and approved by the City for construction, meaning the documents are sealed by the Contractor (as required), acceptable for permitting, and incorporated into the Contract by reference. All amendments and modifications to the Construction Documents must be approved in writing by the City prior to incorporation into the Contract.

2.11 Critical Path - The critical path is the sequence of Project network activities that add up to the longest overall duration. Once established in the Project Schedule, the Critical Path for the Project shall not be changed without prior written approval of the City.

2.12 Day - Calendar day(s) unless otherwise specifically stated in the Contract Documents.

2.13 Final Acceptance - The written notice from the City to the Contractor that Final Completion has occurred.

2.14 Final Completion - The point when all items of the Work, including punch list items, have been completed to the City's satisfaction as reflected in the written Final Acceptance.

2.15 Float - The number of Days by which an activity can be delayed without lengthening the Critical Path and extending the Contract Time. Unless otherwise expressly agreed in writing, all Float belongs to City.

2.16 MAG Specifications – The latest edition adopted by the City of the Uniform Standard Specifications for Public Works Construction published by Maricopa Association of Governments ("MAG"), or the latest revision published by MAG.

2.17 MAG Standard Details – The latest edition adopted by the City of the Uniform Standard Details for Public Works Construction published by Maricopa Association of Governments ("MAG"), or the latest revision published by MAG.

2.18 Notice to Proceed (NTP) - A written notice given by the City to the Contractor fixing the date on which the Contractor will start to perform the Contractor's obligations under the Contract. The Notice to Proceed shall not be issued until the Contract Price is approved and accepted by the City.

2.19 Project – The Project specified in the Contract (including the Job Order).

2.20 Project Manager - The Project Manager designated in Article 1 of the Contract, or any successor Project Manager the City designates. The Project Manager has the authority to act on behalf of the City, as delineated and limited by the Contract Documents and applicable law. The City shall communicate with the Contractor through the Project Manager. However, the Project Manager has no authority to bind the City or City Council in contravention of any City code, State or Federal statute or regulation, or these General Conditions.

2.21 Project Schedule - The schedule for the completion of the Project agreed to and/or required by the City and incorporated into the Contract.

2.22 Project Specific Provisions - Additional conditions that apply to the specific Project and/or Scope of Work.

2.23 Proposal A Proposal submitted to the City by a Contractor in response to an Invitation for Bid (IFB), Request for Qualifications (RFQ), a Request for Proposals (RFP), or other solicitation or request by the City. Bids may be Fixed Price, Guaranteed Maximum Price (GMP), Unit Price, or other form as required or requested by the City in the Bid Schedule.

2.24 Requests for Information (RFIs) - Formal written request from the Contractor to the City and/or Contractor for the Project seeking clarification or additional information needed for the Contractor to properly complete the Work and/or Services under the Contract. The City may require RFI's to be submitted on a specific form or in a specified format.

2.25 Schedule of Values (SOV) - The specified document prepared by the Contractor and approved and accepted by the City, which divides the Contract Price into pay items, such that the sum of all pay items equals the Contract Price for the construction phase Work, or for any portion of the Work having a separate specified Contract Price.

2.26 Scope of Work The scope of work agreed to and/or required by the City and incorporated into the Contract as set forth in the IFB and/or an Exhibit to the Contract.

2.27 Subconsultant A person, firm, or corporation having a Contract with a Consultant/Contractor to furnish services required as its independent professional associate or consultant with respect to the Project.

2.28 Subcontractor - An individual or firm having a direct contract with the Contractor or any other individual or firm having a contract with the aforesaid contractors at any tier, who undertakes to perform a part of the pre-construction services or construction phase Work at the site for which Contractor is responsible. Subcontractors shall be selected through the Subcontractor selection process described in the Contract Documents, if any.

2.29 Supplier. Any person or entity providing materials or property for the Project.

2.30 Total Float. The number of Days by which the pre-construction services or construction phase Work or any part of the same may be delayed without necessarily extending a pertinent Contract Time or schedule milestone in the Project Schedule.

2.31 Work - The entire completion of construction or the various separately identifiable parts thereof, required to be furnished during the construction phase. Work includes and is the result of:

a. performing or furnishing labor;

b. furnishing and incorporating materials, resources, and equipment into the construction; and

c. performing or furnishing services and documents as required by the Contract Documents for the construction phase.

SECTION 3 - STANDARD SPECIFICATIONS AND DETAILS

3.1 The City operates under the 2016 City of San Luis Supplement to the 2015 MAG Uniform Standard Specifications for Public Works Construction.

3.2 The City also operates under the 2009 City of Yuma Construction Standard Detail Drawings.

3.3 The City also operates under the 2006 Yuma County Public Works Standards – Volume III – Storm Drainage Facilities.

3.4 The above standard specifications and details may be viewed and downloaded at the City of San Luis website: https//www.sanluisaz.gov/DocumentCenter/Index/268. **3.5** The City may require particular sections of the revisions of the MAG Specifications and Standard Details after the 2015 revision that the City adopted.

3.6 Current and Historical MAG Specifications and Standard Details may be viewed at the Maricopa Association of Governments website at https://azmag.gov/Programs/Public-Works/Specifications-and-Details.

3.7 The MAG Specifications and Standard Details and the City's amendments to them are incorporated into the Contract.

SECTION 4 - CONTRACTOR'S RESPONSIBILITIES FOR CONSTRUCTION SERVICES

4.1 General

4.1.1 The Contractor shall construct the Work in accordance with the Contract Documents and as outlined in the Contract Documents to the satisfaction of the City, exercising the degree of professional care, skill, diligence, quality, and judgment that a professional Contractor engaged, experienced, and specializing in the construction of facilities of similar scope, function, size, quality, complexity, and detail in urban areas throughout the United States comparable to the City would exercise at such time, under similar conditions. The Contractor shall, at all times, perform the Work in conformance with sound and generally accepted engineering principles and construction management and construction contracting practices.

4.1.2 The Contractor shall comply with, and require all Subcontractors to comply with, the Arizona Contractors' license laws, including all requirements with respect to being duly registered and licensed.

4.1.3 Pursuant to A.R.S. § 41-4401, the Contractor warrants to the City that the Contractor and all its Subcontractors are in compliance and will comply with all Federal Immigration laws and regulations that relate to their employees and with the E-Verify Program under A.R.S. § 23-214(A). The Contractor acknowledges that a breach of this warranty by the Contractor or any of its Subcontractors is a material breach of this Contract subject to penalties up to and including termination of the Contract or any

subcontract. The City retains the legal right to inspect the papers of any employee related to this statute and of the Contractor or any Subcontractor who works on this Contract to ensure compliance with this warranty. The City may conduct random verification of the Contractor's employment records and any of its Subcontractors' employment records to ensure compliance with this warranty. The City will not consider the Contractor or any of its Subcontractors in material breach of the foregoing warranty if the Contractor and its Subcontractors establish that they have complied with the employment verification provisions prescribed by 8 USCA §1324(a) and (b) of the Federal Immigration and Nationality Act and the e-verify requirements prescribed by Arizona Revised Statutes § 23-214(A). The provisions of this Section must be included in any agreement the Contractor enters into with its Subcontractors who provide services under this Contract or any subcontract. "Services" are defined as furnishing labor, time, or effort in the State of Arizona by a contractor or Subcontractor. Services include construction or maintenance of any structure, building, or transportation facility or improvement to real property. Breach of this warranty shall constitute a material breach of the contract and shall subject the Contractor to penalties, including termination of the Contract at the sole discretion of the City.

4.1.4 The Contractor further understands and acknowledges the applicability of the Americans with Disabilities Act, the Immigration Reform and Control Act of 1986, and the Drug-Free Workplace Act of 1989 to the Contract. The Contractor understands and acknowledges that it must also comply with A.R.S. § 34-301, "Employment of Aliens on Public Works Prohibited," and A.R.S. § 34-302, as amended, "Residence Requirements for Employees," and A.R.S. § § 12-2701 through 12-704 "Immigration and Nationality Law Practice Act" as amended.

4.2 Contractor's Pre-Contract and Pre-Work Deliverables

4.2.1 Before beginning any Work under the Contract, the Contractor shall execute the Contract and deliver to the City the items listed in Section 4-2.2 below within seven (7) days after the award of the Contract, and the City must execute the Contract. Failure to do so will be a material breach of the Contract, entitling the City to terminate the Contract for Cause.

4.2.2 When the Contractor delivers the executed Contract to the City, the Contractor shall also deliver to the City such bonds and certificates of insurance with endorsements in such amounts (and other evidence of insurance requested by the City) required under Section 11 - of these General Conditions, and as the Contract requires.

4.2.3 The Contractor shall obtain all necessary permits for the Work and pay all applicable fees unless otherwise noted on the plans and in the specifications. The Contractor is specifically notified of the need to obtain traffic control permits from the Arizona Department of Transportation (ADOT) and the necessary environmental permits or file the necessary environmental and regulatory permit notices. Copies of all permits and the associated notices must be provided to the City prior to starting the permitted activity.

4.3 Pre-Construction Conference

4.3.1 Prior to the commencement of any Work, the City may schedule a Pre-Construction Conference.

4.3.2 Prior to the Pre-construction Conference, the Contractor shall provide the Project Manager with a Schedule of Values reflecting the subcontracts and other categories that will be used to submit pay applications for the Work. The total amount of the Schedule of Values shall not be greater than the Contract Price. The Schedule of Values shall be reviewed at the Pre-Construction Conference and revised in response to comments and questions from the City. Once accepted by the City in writing, the Schedule of Values for the Project will not be changed without the City's prior written approval.

4.4 Performance of the Work (Including Field Measurements, Subcontractors, and Suppliers)

4.4.1 Unless otherwise provided in the Contract Documents to be the responsibility of the City or a separate Contractor, the Contractor shall provide through itself or its Subcontractors the necessary supervision, labor, inspection, testing, start-up, material, equipment, machinery, temporary utilities, and other temporary facilities to permit Contractor to complete the Work consistent with the Contract Documents.

4.4.2 The Contractor's Superintendent shall be present at the Project site at all times that material Work under this Contract is taking place. The Contractor's Superintendent or designee shall be present at the Project site at all times any other Work under this Contract is taking place. All elements of the Work shall be under the direct supervision of a foreman or his designated representative on the Project site, who shall have the authority to take actions required to carry out that particular element of the Work properly.

4.4.3 Before ordering materials or doing work, the Contractor and each Subcontractor shall verify measurements at the Project site and shall be responsible for the correctness of such measurements. No extra charge or compensation will be allowed because of differences between the actual dimensions and the dimensions indicated on the Contract Documents, including the drawings.

4.4.4 If the Contractor observes errors, discrepancies, or omissions in the Contract Documents, it shall promptly notify the Contractor and City and request clarification. The Contractor shall be liable to the City for damages resulting from errors, inconsistencies, or omissions in the Contract Documents or for differences between field measurements or conditions in the Contract Documents. If the Contractor, with the exercise of reasonable care, should have recognized such error, inconsistency, omission, or difference and fails to report it to the City, and if the Contractor proceeds with the Work affected by such observed errors, discrepancies, or omissions, without receiving such clarifications, it does so at its own risk.

4.4.5 In all cases of interconnection of its Work with existing or other work, the Contractor shall verify at the Project site all dimensions relating to such existing or other work. Any errors due to the Contractor's failure to so verify all such grades, elevations, locations, or dimensions shall be promptly rectified by the Contractor without any increase in the Contract Price. Any design errors or omissions noted by the Contractor during this review shall be reported promptly to the City.

4.4.6 The Contractor shall be responsible for the proper performance of the Work of Subcontractors and any acts and omissions in connection with such performance. Nothing in the Contract Documents is

intended or deemed to create any legal or contractual relationship between the City and any Subcontractor or Sub-Subcontractor, including but not limited to any third-party beneficiary rights.

4.4.7 The Contractor will not substitute or change any Subcontractor or Supplier without the City's prior written approval. Any substitute or replacement Subcontractor or Supplier shall be required to meet the same qualifications and selection criteria and process as the original Subcontractor or supplier. If a Subcontract or Supplier selection plan has been approved by the City, the Contractor will follow that plan unless otherwise approved by the City in writing.

4.4.8 The Contractor shall not change or replace the Contractor's Project Manager or Superintendent on this Project without an explanation for the change being given to the City and receiving prior written approval of the change from the City, which approval will not be unreasonably withheld.

4.4.9 Subcontractors whose scope of work has a value greater than fifteen percent (15%) of the total Contract Price may be required to furnish performance and payment bonds to the Contractor if directed in writing by the City.

4.5 Control of the Project Site

Throughout all phases of construction, including suspension of Work, the Contractor shall keep the Project site reasonably free from debris, trash, and construction wastes to permit the Contractor to perform its construction services efficiently, safely, and without interfering with the use of adjacent land areas. Prior to the Final Acceptance of the Work, or a portion of the Work, the Contractor shall remove all debris, trash, construction wastes, materials, equipment, machinery, and tools arising from the Work or applicable portions thereof to permit the City to occupy the Project or a portion of the Project for its intended use.

4.5.1 The Contractor shall take whatever steps, procedures, or means necessary to prevent dust nuisance due to construction operations. The dust control measures shall be maintained at all times to the satisfaction of the City and in accordance with the requirements of the Yuma County dust control regulations.

4.5.2 The Contractor shall be responsible to the City for the acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and any other person performing any of the Work under a contract with Contractor, or claiming by, through, or under Contractor, for all damages, losses, costs, and expenses resulting from such acts or omissions.

4.6 Project Safety

4.6.1 The Contractor is responsible for the safety of the job site for the Contractor's employees as well as for members of the general public and others who may drive or walk through or be at the Project site.

4.6.2 The Contractor assumes responsibility for implementing and monitoring all safety precautions and programs related to the performance of the Work.

4.6.3 The Contractor shall provide a "competent person" as required by O.S.H.A. regulations. The "competent person" shall be identified at the Pre-Construction Conference, and the City will be advised in writing of any changes.

4.6.4 The Contractor and Subcontractors shall comply with all legal and regulatory requirements relating to safety, as well as any City-specific safety requirements set forth in the Contract Documents, provided that such City-specific requirements do not violate any applicable legal and regulatory requirements.

4.6.5 As between the City and the Contractor, the Contractor is responsible to the City for any and all the safety issues relating to the Work on the Project. The Contractor shall administer and manage the safety program. The safety program will include, but not necessarily be limited to, reviews of the safety programs of each Subcontractor. The Contractor shall monitor the establishment and execution of compliance with all applicable regulatory and advisory agency construction safety standards.

4.6.6 The Contractor shall maintain and have sole responsibility for safety on the job site.

4.7 Materials Quality, Substitutions, and Shop Drawings

4.7.1 All construction materials to be used or incorporated in the Project are subject to inspection, quality control and quality assurance testing, and approval or rejection by the City. Any material rejected by the City shall be removed immediately and replaced in an acceptable manner to the City at no additional cost to the City. When quality control and quality assurance tests indicate noncompliance with the Contract Documents, retesting shall be performed by the same testing laboratory that performed the tests that indicated noncompliance.

4.7.2 A schedule of shop drawing submissions shall be submitted with the Project Schedule for City approval that avoids bulk submissions to the extent reasonably possible. Unless otherwise noted, shop drawings will not be required for items specified or detailed in the Uniform Standard Specifications and Details or the Technical Specifications. The schedule of shop drawing submissions shall include all of the items for which shop drawings are required by the Contract Documents, including the specifications.

4.7.3 Long Lead Time Items. The Contractor shall submit shop drawings, as required by the Project Engineer, on all long lead items to be furnished and installed as part of the Project within ten (10) days after execution of the Contract. In addition, the Contractor shall order all long lead items to be furnished and installed as part of this Project within (3) days after receiving approved shop drawings. For all long lead times for which shop drawings are not required, the Contractor shall order said long lead items within fifteen (15) days after execution of the Contract. Within two (2) days after ordering long lead items, the Contractor shall supply copies of all purchase orders, along with an accurate delivery schedule from the supplier.

4.8 Project Record Documents

The Contractor shall ensure that any and all changes or modifications done as a result of field changes are accurately reflected in red-lined markings. At the completion of construction, all red lines and markings shall be compiled to aid in the creation of "as-built" plans.

4.9 Warranty and Correction of Defect Work

4.9.1 The Contractor warrants to the City that the construction of the Work shall be of good and workmanlike quality and completed in strict conformance with all applicable laws, rules, and regulations and the plans and specifications and all other terms and conditions of the Contract Documents, including all materials and equipment furnished as part of the construction, shall be new unless otherwise specified in the Contract Documents, of good quality, in conformance with the Contract Documents and free of defects in materials and workmanship.

4.9.2 The date of Final Completion shall be the beginning of the Warranty period, regardless of early completion by some Subcontractors of their work.

4.9.3 Unless otherwise specified in the Contract Documents, the Contractor and Subcontractors shall provide to the City all of the following written warranties that apply to the Work in a form acceptable to the City.

(i) General Warranty — Two (2) years
(ii) Mechanical Contractor — Two (2) years
(iii) Plumbing Contractor — Two (2) years
(iv) Electrical Contractor — Two (2) years
(v) Caulking — One (1) year
(vi) Steel Joists, Certificate of Manufacturer
(vii) Exterior Metal Wall System — Five (5) years
(viii) Painting — One (1) year
(ix) Termite — Five (5) years
(x) Sheet Metal: Zinc coating thickness on hot-dipped galvanized Metals — One (1) year

4.9.4 Nothing in the warranties contained in the Contract Documents are intended to limit any manufacturer's warranty, which provides the City with greater warranty rights than set forth in this Section or the Contract Documents. The Contractor will provide the City with all manufacturers' warranties prior to Final Acceptance.

4.9.5 A progress payment, or partial or entire use or occupancy of the Project by the City, shall not constitute Acceptance of Work not in accordance with the Contract Documents.

4.9.6 Without limiting the foregoing or anything in these General Conditions or the Contract to the contrary, the Contractor shall obtain and provide to the City all warranties for any portion of the Project offered by the manufacturer, installer, or provider thereof. The City and the user of the facility shall have the right to the full value and benefit of all such warranties. The Contractor will ensure all such warranties are fully transferrable to facilitate the full value of this Section.

SECTION 5 - CITY'S RESPONSIBILITIES

5.1 City Project Manager The Project Manager is responsible for providing City-supplied information and approvals in a timely manner to assist the Contractor to fulfill its obligations under the Contract Documents.

5.2 Contract Services The City may contract separately with one or more contractors to provide construction administration of the Project. The Contractor's Contract, as well as other firms hired by the City, shall be furnished to the Contractor. The contractor shall not have the right to limit, restrict, or reject any Contract modifications that are mutually acceptable to the City and the Contractor.

SECTION 6 - CONTRACT TIME

6.1 Contract Time

6.1.1 The Contract Time shall start with the Notice to Proceed ("NTP") and end with Final Acceptance, as set forth in Section 6.3 below.

6.1.2 The Contract Time shall be as set forth in the Project Schedule. The Contractor agrees that it will commence the performance of the Work and complete the Project within the Contract Time.

6.1.3 Time is of the essence of this Contract, for the Project, for the Work, and for each phase and/or designated milestone of the Project.

6.2 Project Schedule

6.2.1 The Project Schedule shall be updated and maintained throughout the Contract Time.

6.2.2 The Project Schedule shall be revised as required by conditions and progress of the Work. However, such revisions shall not relieve the Contractor of its obligations to complete the Work within the Contract Time, as adjusted in accordance with the Contract Documents. No modification to the Contract Documents or the Contract Time shall be effective unless approved in advance by the City.

6.2.3 An updated Project Schedule shall be submitted monthly to the City as part of the Payment Request.

6.2.4 The Contractor shall provide the City with a monthly status report with each Project Schedule detailing the progress of the Work, including:

6.2.5 Acceptance of a submitted schedule by the City should in no way be construed as an affirmation or admission that the schedule is reasonable or workable by the Contractor. The responsibility for completing the Work on the Project within the Contract Time remains the obligation of the Contractor. The City's review shall not relieve the Contractor from compliance with the requirements of the Contract Documents or be construed as relieving the Contractor of its complete and exclusive control over the means, methods, sequences, and techniques for executing the Work.

6.2.6 Critical Path Method (CPM)

6.2.6.1 Unless otherwise specified in the Contract, the Project Schedule shall include a Critical Path Method (CPM) diagram schedule showing the sequence of activities, the interdependence of each activity, and identifying the Critical Path.

6.2.6.2 The CPM diagram schedule shall be in calendar Days and indicate duration, earliest and latest start and finish dates for all activities, and total Float Times for all activities except critical

activities. The CPM diagram shall be presented in a time-scaled graphical format for the Project as a whole.

6.2.7 Float Time

6.2.7.1 The total Float time within the overall schedule is for the exclusive use of the City. However, the City may approve the Contractor's use of Float time as needed to meet contract milestones and the Project completion date.

6.2.7.2 The Contractor shall not be allowed to sequence, hide, or reallocate Float time through such strategies as extending activity duration estimates to consume available Float, using preferential logic, or using extensive crew or resource sequencing. No time extensions will be granted nor delay damages paid until a delay occurs which extends the Work beyond the Contract Time.

6.2.7.3 Rain-Related Delays. In preparing the Project Schedule, The Contractor is required to take into account all relevant weather conditions, including normal rainfall and distribution. No additional Compensation shall be given for any rain-related delays or impacts on the Work or the Project Schedule. The burden of documenting normal rainfall, excessive rainfall, and the impact on Critical Path activities is on the Contractor.

6.3 Final Completion and Final Acceptance

6.3.1 Unless otherwise expressly agreed to in writing by the City, Final Completion must be achieved no later than June 30, 2026. Failure to timely obtain Final Completion will be a material breach of the Contract.

6.3.2 Upon receipt of written notice that the Work is ready for final inspection and Acceptance, the City and the Contractor will jointly inspect to verify that the remaining items of Work have been completed. There shall be no partial acceptance. Final Acceptance shall not be issued, and Final Completion shall not occur until all items of Work, including punch list items, have been completed to the City's satisfaction as reflected in the written Final Acceptance.

6.3.3 Final Payment under Section 8.2 below shall not be due, owing, or paid by the City until the Final Completion is obtained.

6.4 Liquidated Damages

6.4.1 The Contractor acknowledges and agrees that if the Contractor fails to obtain Final Completion of the Work within the Contract Time, the City will sustain extensive damages and serious loss as a result of such failure. The exact amount of such damages will be extremely difficult to ascertain. Therefore, the City and the Contractor agree that if Contractor fails to achieve Final Completion of the Work within the Contract Time, the City shall be entitled to retain or recover from the Contractor, as liquidated damages and not as a penalty, the applicable dollar sum amount in Subsection 108.9 of the 2016 City of San Luis Supplement to the 2015 MAG Uniform Standard Specification for Public Works Construction per

calendar day, commencing from the Completion Date required under the Contract until the actual date of the Final Completion of the Work.

6.4.2 The City may deduct liquidated damages described in this Section 6.4 from any unpaid amounts then or thereafter due Contractor under this Contract. Any liquidated damages not so deducted from any unpaid amounts due to the Contractor shall be payable to the City at the demand of the City, together with interest from the date of the demand at the highest lawful rate of interest payable by the Contractor.

6.4.3 Nothing herein shall be deemed to constitute a waiver of any other remedy available to the City in the event of Contractor's default under this Contract prior to the full performance of the Work, including, as applicable, specific performance or completion of the Work on behalf of Contractor, the cost and expense of which shall be offset against any monies then or thereafter due to Contractor (if any) and otherwise immediately reimbursed to City by Contractor.

SECTION 7 - CONTRACT PRICE

7.1 Fixed Price Contracts The Contract Price shall be the amount set forth in the Contract.

7.2 City Sales Tax The Contractor is required to pay Sales Taxes on any contracting activity done for the City, and this cost shall be included in all Contract Prices.

SECTION 8 - PAYMENT

8.1 Payment for Construction Services

8.1.1 Monthly progress payments for certified work and material delivered to the Project site for the preceding month shall be paid on or before fourteen (14) business days after the estimate of the Work is certified and approved. The submittal estimate shall be deemed certified and approved for payment after seven (7) days from the date of submission unless the City's Project Manager issues a written finding setting forth items not approved for payment.

8.1.2 The City shall retain ten percent (10%) of all progress payments as insurance of proper performance of the Contract or, at the option of the Contractor, a substitute security may be provided by the Contractor in an authorized form approved by the City. The Contractor is entitled to all interest from any such substitute security.

8.1.3 When the Contract is fifty percent (50%) completed, one-half of the amount retained or securities substituted shall be paid to the Contractor upon the Contractor's request, provided the Contractor is making satisfactory progress on the Contract. There is no specific cause or claim requiring a greater amount to be retained. After the Contract is fifty percent (50%) completed, no more than five percent (5%) of the amount of any subsequent progress payments made under the Contract shall be retained, providing the Contractor is making satisfactory progress on the Project. If at any time the City determines satisfactory progress is not being made, ten percent (10%) retention shall be reinstated for all progress payments made under the Contract subsequent to the determination.

8.1.4 . Unless the City Project Manager delivers specific written findings of deficiencies and expected cost to cure, any retention shall be paid, or substitute security shall be returned to the Contractor within sixty (60) Days after Final Completion and Acceptance of Work under the Contract. The City may withhold an amount from the progress payment sufficient to pay the expenses the City's Project Manager reasonably expects to incur in correcting the deficiency set forth in the written finding.

8.1.5 The Contractor, and all Subcontractors, shall pay to Subcontractors or material Suppliers within seven (7) days of receipt of each progress payment unless otherwise agreed in writing by the parties, the respective amounts allowed the Contractor or Subcontractor on account of the Work performed or materials delivered to the extent of each such Subcontractor's or material Supplier's interest therein. No agreement for construction may materially alter the rights of any Contractor, Subcontractor, or material Supplier to receive prompt and timely payment as provided under this Section. These monthly progress payments to Subcontractors or material Suppliers shall be passed on payments received pursuant to this Section. Any diversion by the Contractor or Subcontractor of payments received for Work performed or failure to reasonably account for the application or use of such payments constitutes grounds for disciplinary action by the Registrar of Contractors. The Subcontractor or material Supplier shall notify the Registrar of Contractors and the City in writing of any payment less than the amount or percentage approved for the class or item of work as set forth in this Section. The Subcontractor may notify the City's Project Manager in writing, requesting that the City notify the Subcontractor in writing within five (5) days from payment of each progress payment made to the Contractor. The Subcontractor's request remains in effect for the duration of the Subcontractor's work on the Project.

8.1.6 Nothing in this Section 8.1 prevents the Contractor at the time of application/certification to the City from withholding application or certification to the City for payment to the Subcontractor or material Supplier for unsatisfactory job progress, defective work, or materials not remedied, disputed work or materials, third party claims filed or reasonable evidence that claim will be filed, failure of a Subcontractor to make timely payment for labor, equipment and materials.

8.2 Final Payment Subject to all of the City's rights to withhold or offset payment and other rights under the Contract, Final Payment, including remaining retainage, shall be paid only after:

(i) The Work has been fully completed (including completion of all incorrect or incomplete work items), and the City has issued the written Final Acceptance;
(ii) necessary operating manuals, any excess materials and supplies necessary for matching materials and supplies incorporated into the Work, and complete "as-built" drawings (including the Building Information Model, if required by the Contract Documents), plans, and specifications have been delivered to City;
(iii) full and unconditional lien waivers and releases by Contractor and any person performing labor or supplying material, machinery, fixtures, or tools for the Work have been delivered to the City;
(iv) all conditions and requirements imposed by the City or any financing entity for the corresponding disbursement have been met; and

(v) the Contractor delivers to the City a Contractor Payment Request Form requesting Final Payment.

8.3 The City's Right to Withhold Payment The City may withhold payment to such extent as may be necessary in the City's opinion to protect the City from loss for which the Contractor is responsible, including, without limitation:

(i) Defective Work not remedied;
(ii) Third-party claims filed or reasonable evidence indicating probable filing of such claims unless Contractor provides security acceptable to the City;
(iii) Failure of Contractor to make payments properly to Subcontractors or for labor, materials, or equipment;
(iv) Reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Price;
(v) Damage to the City or another Contractor or any third party for which the Contractor may have an obligation under Article 12 of the General Conditions;
(vi) Reasonable evidence that the Work will not be completed within the Contract Time and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
(vii) Persistent failure to carry out the Work in accordance with the Contract Documents.

8.4 Joint/Direct Checks Payments to the Contractor may be made by checks payable jointly to the Contractor and its employees, agents, Subcontractors, and Suppliers, or any of them. When in the sole opinion of the City, it is advisable, payments may be made directly to the Contractor's Subcontractors. Any amount so paid shall be deducted from the amounts owed to the Contractor under this Contract.

8.5 Payment Not A Waiver No payment (nor use or occupancy of the Project by the City) shall be deemed Acceptance or approval of the Work or as a waiver of any claims, rights, or remedies of the City.

8.6 Liens and Bond Claims The Contractor shall make all payments, in the time required, of all labor and materials furnished to the Contractor in the course of the Work and shall promptly furnish evidence of such payments as the City may require. The Contractor shall pay when due all claims arising out of the performance of the Work covered by this Contract for which a lien may be filed either against the real estate or leasehold interest of City, or against payments due from City to Contractor, or for which a claim may be made against any payment or performance bond or both. To the fullest extent permitted by law, Contractor agrees that no liens or other claims in the nature of a lien against the real estate, leasehold, or other interest of City, against payment due from City to Contractor, or against any payment or performance bond, shall be filed or made in connection with the Work by any party who has supplied professional services, labor, materials, machinery, fixtures, tools, or equipment used in or in connection with the performance of this Contract. The Contractor agrees to remove or to cause to be removed any such liens or claims in the nature of a lien or bond claim within ten (10) days upon receiving notice or obtaining actual knowledge of the existence of such liens or claims. In addition, the Contractor agrees to defend, indemnify, and hold harmless the City from and against any and all such liens and claims. This paragraph does not apply to claims and liens of Contractor due to non-

payment for work performed by Contractor. The obligations under this Section 8.4 survive termination of this Contract.

8.7 Financial Record Keeping and City's Audit Right

8.7.1 Records for all Contracts between the City and the Contractor shall, upon reasonable notice, be open to inspection and subject to audit, scanning, and/or reproduction during normal business working hours. The City or its designee may conduct such audits or inspections throughout the term of this Contract and for a period of three years after Final Payment or longer if required by law.

8.7.2 The City, its authorized representative, and/or the appropriate agency reserve the right to audit the Contractor's records in compliance with local, state, or federal policies, statutes, or at the City's discretion within three (3) years of Final Acceptance of the Work.

SECTION 9 - CHANGES TO THE CONTRACT

9.1 Extra Work/Changes in the Work

9.1.1 The City reserves the right to make such changes in the plans and specifications for the Work as it may deem appropriate. Any such change as set forth in a written Change Order or Extra Work Order shall be deemed a part of this Contract as if originally incorporated into this Contract.

9.1.2 The Contractor shall not be entitled to payment for additional work unless a written Change Order or Extra Work Order, in form and content prescribed by the City, has been executed by the City prior to starting the additional work.

9.1.3 Any agreement that modifies the terms of the Contract (including Change Orders) shall be approved in writing by the Project Manager and approved by the San Luis City Council if necessary. Once properly executed by both Parties, these modifications to the Contract shall have the same effect as if they had been included in the original Contract.

9.2 Accuracy of Change Order Pricing Information Signature by the contracting Parties shall constitute full accord and satisfaction between the City and the Contractor for all costs, damages, and expenses of whatever kind of nature, including delay, impact, or acceleration damages, which may be occasioned by a Change Order or other modification of the Contract, the Parties agreed to in writing.

SECTION 10 - TERMINATION

10.1 Termination by the City for Cause

10.1.1 If, for any reason, the Contractor fails to fulfill in a timely and proper manner its obligations under the Contract Documents, or if the Contractor violates any of the covenants, agreements, or stipulations of this Contract, the City shall thereupon have the right to terminate the Contract by giving written notice to the Contractor of such termination and specifying the effective date of the termination. In such event, all finished or unfinished site or structural improvements, as well as all materials or equipment acquired or stored by the Contractor under this Contract, shall, at the option of the City, become the

City's property. The Contractor shall be entitled to receive just and equitable compensation for any Work satisfactorily completed under this Contract.

10.1.2 Notwithstanding Section 10.1.1, the Contractor shall not be relieved of liability to the City for damages sustained by the City by virtue of any breach of this Contract by the Contractor, and the City may withhold any payments to the Contractor for the purpose of set-off until such time as the exact amount of damages due the City from the Contractor is determined.

10.2 Termination by the City for Convenience The City may also terminate the Contract at any time for its convenience upon seven (7) business days' written notice to the Contractor specifying the termination date. In the event of termination, which is not the fault, in whole or in part, of the Contractor, the City shall pay to the Contractor only such compensation, including reimbursable expenses, due for Work properly performed on the Project prior to the termination date. Upon any termination of the Contract, no further payments shall be due from the City to the Contractor.

10.3 A.R.S. § 38-511 and Other Statutory Requirements This Contract is subject to and may be terminated by the City in accordance with the conflict provisions of A.R.S. § 38-511. The Contractor certifies, to the extent permitted by law, that it is not currently engaged in and agrees that for the duration of this Contract, it will not engage in a boycott of Israel, as that term is defined in A.R.S. § 35- 393. The Contractor certifies, to the extent permitted by law, that it does not currently, and agrees for the duration of this Contract, it will not use the forced labor of the ethnic Uyghurs in the People's Republic of China, nor use any goods or services produced by them, nor use any Contractors, Subcontractors, or Suppliers that use them. If the Contractor becomes aware during the term of this Contract that the Contractor is not in compliance with this certification, it shall follow the notice procedures in A.R.S. § 35- 393.

10.4 Non-Appropriation The City is a government agency that relies upon the appropriation of funds by its governing body to satisfy its obligations. If the City determines that it does not have funds to meet its obligations under the Contract, the City shall have the right to terminate the Contract without penalty on the last day of the fiscal period for which funds were legally available for the Project.

10.5 Limited Liability Under no circumstances shall the City have any liability for any costs, expenses, overhead, or profits in relation to any work not actually performed or for any future or anticipated profits, recovery, damages, expenses, or losses.

SECTION 11 - BONDS

11.1 Bonds and Other Performance Security

11.5.1 Prior to the execution of the Contract, the Contractor shall provide a Performance Bond and a Payment Bond, each in an amount equal to the full amount of the Contract Price.

11.5.2 Each such bond shall be executed by a surety company or companies holding a Certificate of Authority to transact surety business in the State of Arizona, issued by the Director of the Arizona Department of Insurance. A copy of the Certificate of Authority shall accompany the bonds.

11.5.3 The bonds shall be made payable and be acceptable to the City. The bond forms for the performance and payment bonds shall be in the forms required under A.R.S. § 34-221, et seq.

11.5.4 All bonds submitted for this Project shall be provided by a company that has been rated AM Best rating of B++6 or better for the prior four (4) quarters by the latest edition of the *Results Best's Key Rating Guide (Property/Casualty)*" published by the A.M. Best Company.

11.5.5 Personal or individual bonds are not acceptable.

SECTION 12 - INDEMNIFICATION

12.1 To the fullest extent permitted by law, the Contractor, its successors, and assigns shall defend, indemnify, and hold harmless the City and its elected officials, officers, employees, and agents from all demands, proceedings, suits, actions, claims, damages, or losses relating to, arising out of, resulting from or alleged to have resulted from the performance of the Work or failure to comply with Contractor's obligations under the Contract Documents or any laws, regulations, or legal requirements. The Contractors' duty to defend, indemnify, and hold harmless the City and its agents, representatives, officers, elected officials, and employees shall arise in connection with all demands, proceedings, suits, actions, claims, workers' compensation claims, unemployment claims, damages, losses or expenses (including but not limited to attorney's fees, expert fees, court costs, and the cost of appellate proceedings) that are attributable to personal or bodily injury, sickness, disease, death or injury to, impairment or destruction of property including loss of use resulting therefrom, caused by any act or omission of Contractor, a Subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable.

12.2 The Contractor shall also defend, indemnify, and hold harmless the City, any jurisdiction or agency issuing permits for any work involved in the Project and their consultants and each of their officers, officials, employees, representatives, directors, and agents from and against all losses, expenses, damages (including damages to the Work itself), attorney's fees and other costs including costs of defense, which any of them may incur with respect to the failure, neglect, or refusal of Contractor to faithfully perform the Work and all of the Work and all of Contractor's obligations under the Contract. Such costs, expenses, and damages shall include all costs, including attorney's fees, incurred by the indemnified parties in any lawsuit to which they are a party.

12.3 The indemnified party shall have the right to approve the legal counsel selected by the Contractor or the insurer of the liability, which approval shall not be unreasonably withheld.

12.4 The defense, indemnification, hold harmless provisions, and City's Liability Insurance set forth herein shall survive any termination of the Contract.

SECTION 13 - DISPUTE RESOLUTION

13.1 **Informal Dispute Resolution** The Parties to the Contract agree that time is of the essence in relation to the performance of the Contract and completion of the Project. Therefore, any and all disputes in relation to the Contract will initially be referred to the City Project Manager and Contractor Project Manager, as applicable to the dispute, for immediate resolution. If, after good faith efforts to reach a resolution, none is reached, any party to the dispute may submit the dispute to the Dispute Resolution Representative ("DRR") process set forth below, which is intended to be an expedited process.

13.2 Dispute Resolution Representative (DRR) Process 1.2.1 The Parties under the Contract agree that all claims and disputes in relation to the Project that are not resolved in the ordinary course of the Project ("Claim or Claims") shall, as a prerequisite to any mediation or litigation of the Claim, first be submitted for resolution between the designated Dispute Resolution Representatives of the Parties as set forth herein (the "DRR Process").

13.2.2 The DRR Process shall be initiated through the service of a DRR Notice as set forth below:

(i) For claims by the Contractor, the DRR Process shall be initiated by the party asserting the claim serving written notice on the City setting forth in detail:

(a) the basis for the claim;
(b) the effect of the Claim upon the construction of, and/or Project Schedule for, the Project;
(c) the specific relief requested, the amount thereof, and how such was calculated;
(d) the parties involved in the Claim and how they are involved;
(e) the specific contract provisions in the Contract Documents (including, if applicable, drawings and specifications) which apply; and
(f) efforts made to date to resolve the Claim.

(ii) For claims by the City, the DRR process will be initiated by the City providing written notice to the other parties of the basis and amount of its claim, the parties involved in the Claim, and how they are involved, the provisions in the Contract Documents that apply, and the relief requested. (iii) The DRR Notice shall be hand-delivered and e-mailed to the other parties' designated Dispute Resolution Representatives.

13.2.3 The other parties shall respond in writing to the DRR Notice ("DRR Response") within ten (10) calendar days of receipt of the DRR Notice, setting forth those items set forth in the DRR Notice that they agree with, dispute, and/or have questions concerning. The DRR Response shall be hand-delivered and e-mailed to the other parties' Dispute Resolution Representatives.

13.2.4 The designated Dispute Resolution Representatives for the parties to the claim shall then meet as soon as possible and, in any event, within twenty (20) calendar Days of submission of the DRR Notice (regardless of whether a DRR Response has been submitted by all parties involved in the dispute), at a mutually agreed upon time and place, to attempt to resolve the Claim based upon the DRR Notice and DRR Response.

13.2.5 At any time after the first meeting required above, either party may terminate the DRR Process by written notice to the other party.

13.2.6 The parties may agree, in writing, to extend or modify the time limits or other provisions of the DRR process in relation to a specific pending Claim.

13.2.7 Unless otherwise designated in a written notice to the other parties, the Project Manager, the representatives of the Contractor, and of the Design Professional shall act as the parties' designated Dispute Resolution Representatives.

13.2.8 If a resolution of the Claim is reached, that resolution shall be set forth in writing. The resolution shall be signed by the Parties' designated Dispute Resolution Representatives. If the resolution involves a change in any Contract Documents, the Contract Price, the Project Schedule, or any other change requiring a written Change Order or Amendment, the parties shall execute an appropriate written Change Order or Amendment pursuant to the terms of the Contract Documents.

13.3 Mediation

13.3.1 Unless extended by written agreement of the parties involved in the dispute, any Claim not resolved through the DRR process set forth above within five (5) calendar days after the meeting required under 13.2.4 or after the DRR is terminated pursuant to 13.2.5 above, whichever is earlier, shall be submitted to mediation as a condition precedent to litigation by either party.

13.3.2 The mediation shall be commenced by written demand upon the other party for mediation. If the parties cannot agree upon a mediator within ten (10) calendar Days of the written demand, either party may make a request to the Civil Presiding Judge of the Yuma County Superior Court to appoint a mediator. The mediation shall occur within forty (40) calendar Days of the written demand for mediation unless the parties agree, in writing, to a longer period of time.

13.3.3 The qualifications for the mediator shall be that the mediator be:

(i) an experienced mediator, arbitrator, or litigator of construction disputes; and
(ii) having engaged a significant portion of their time involving and/or resolving construction disputes for at least the past five (5) years.

13.3.4 Each party shall provide to the other party and the mediator all of the information and documentation required under 13.2.2 and 13.2.3 above, together with any additional information and documentation that the party believes relevant. In addition, the parties shall exchange and provide to the mediator such additional memoranda, information, and/or documentation, as the mediator may request, and in the form and at such times as the mediator may direct.

13.3.5 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in San Luis, Arizona unless another location is mutually agreed upon. Agreements reached in mediation shall be specifically enforceable in any court having jurisdiction over the dispute.

13.4 Arbitration

13.4.1 If the mediation is unsuccessful, the parties shall submit the dispute and/or claim to be resolved through binding arbitration conducted according to the then-current Construction Industry Arbitration Rules of the American Arbitration Association ("AAA") but not administrated or conducted by the AAA. The arbitration shall be held in Yuma County, Arizona, utilizing a single arbitrator selected by the parties unless the parties agree, in writing, to an alternative arbitration procedure.

13.4.2 If: (a) the parties cannot agree on a single arbitrator within two (2) weeks of the demand for arbitration; or (b) the parties at any time prior to the arbitrator being appointed or before the arbitrator has accepted the appointment, cannot agree upon any significant aspect of the arbitration, not already

addressed herein, either party may submit the Claim directly to the AAA to select the arbitrator, and thereafter the arbitration shall be administered by the AAA.

13.4.3 The arbitrator shall be an attorney with at least fifteen (15) years of experience in construction-related practice and whose practice, for at least the last five (5) years, consists of at least 50% construction law.

13.4.4 At the request of either party, the arbitration may include as parties, through joinder, consolidation, or otherwise, additional persons or entities involved in the Project, involving claims and/or disputes with common issues and/or facts. The arbitrator shall promptly rule upon any request for joinder or consolidation.

13.4.5 In relation to claims in which the amount in controversy is less than $250,000, no discovery other than the exchange of documents, designation of witnesses, and detailed disclosure of claims and defenses (including specifically a detailed basis for calculating all claims) and no more than three (3) depositions and one (1) expert per issue per side, shall be allowed, subject to disclosure of such other information as approved by the arbitrator. Otherwise, discovery shall be allowed and/or limited as decided by the arbitrator.

13.4.6 The prevailing party in any arbitration or court proceeding under this Contract shall be entitled to an award of its attorneys' fees, costs, and expenses (including expert witness fees) incurred.

13.4.7 A demand for arbitration shall be made within the time limits specified in the Contract Documents as applicable, and in other cases within a reasonable time after the Claim has arisen, and in no event shall it be made after the date when the applicable statute of limitations would bar institution of legal or equitable proceedings based on such Claim.

13.4.8 The Parties agree to participate as a party, by joinder and/or consolidation, in any arbitration, litigation, or other dispute resolution involving as an issue, claim, or defense, any action, inaction, or service provided under this Contract or in relation to the Project or the Work, or any defect or deficiency in the Work.

13.4.9 The party filing a notice of demand for arbitration, or a counterclaim, must assert in the demand or counterclaim all Claims then known to that party on which arbitration is permitted to be demanded.

13.4.10 Any award by the arbitrator shall not include any consequential or punitive damages.

13.4.11 The award entered by the arbitrator shall be a reasoned award.

13.4.12 The award entered by the arbitrator shall be final, and judgment may be entered upon the award in the Arizona Superior Court.

SECTION 14 - MISCELLANEOUS PROVISIONS

14.1 <u>Assignment</u> Neither the Contractor nor the City shall, without the written consent of the other, assign, transfer, or sublet any portion of this Contract or part of the Work or the obligations required by the Contract

Documents. Any such assignment will be void, will transfer no rights to the purported assignee, and would be a material breach of the Contract.

14.2 Governing Law and Venue. In the performance of the Contract, Contractor shall abide by and conform to any and all laws of the United States, State of Arizona, Yuma County, and the City, including but not limited to federal and state executive orders providing for equal opportunities, the Federal Occupational Safety and Health Act and any other federal, state, county, or local laws applicable to the Contract. This Contract shall be governed by and construed in accordance with the substantive and procedural laws of the State of Arizona, including choice of law and conflict of laws and principles. Exclusive jurisdiction and venue for any action brought to enforce or construe any provision of this Contract shall be proper in the Superior Court of Yuma County, Arizona. Both Parties consent to jurisdiction and venue in such court for such purposes. The Party prevailing in any such action or other proceeding to resolve a dispute shall be paid all reasonable costs, reasonable expert services fees, and reasonable attorney's fees by the other Party. In the event any judgment is secured by said prevailing Party, all such costs, expert fees, and attorney's fees shall be included in the judgment, such fees to be set by the court and not by jury.

14.3 San Luis Business License The General Contractor and sub-contractors shall obtain a San Luis Business License before commencing Work.

14.4 Survival All warranties, representations, and indemnifications by Contractor shall survive the completion or termination of this Contract.

14.5 No Waiver The failure of either Party to enforce any of the provisions of the Contract Documents or to require the performance of the other Party of any of the provisions under this Contract shall not be construed to be a waiver of such provisions, nor shall it affect the validity of the Contract Documents or any part of them, or the right of either Party to thereafter enforce each and every provision. Unless otherwise specifically agreed to in writing by both Parties, any consent to delay in the Contractor's performance of its obligation is applicable only to the particular transaction to which it relates and is not applicable to any other obligation or transaction.

14.6 Project Communications

14.6.1 All communications concerning the performance of the Work or the Project shall be provided to the designated Project Manager and Contractor’s Representative set forth in Article 1 of the Contract.

14.6.2 Project communications may be exchanged by e-mail upon the written agreement of the Project Manager and Contractor Representative. However, e-mail communications are not binding upon the City. E-mail communications cannot change the terms of the Contract or the scope of work or effectuate any change that requires a written change order. The use of e-mails is for information only, and e-mails will have no legal or binding effect.

14.7 Independent Contractor The parties intend that this Contract will create an independent contractor relationship and not an employer-employee relationship. The City is interested only in the results to be achieved, and the conduct and control of the performance of the services contemplated under this Contract will be solely with the Contractor. Contractor’s employees, agents, and Subcontractors shall not be considered

to be employees or agents of the City for any purpose. They shall not be entitled to any of the benefits the City provides for its employees. The Contractor shall furnish at its own expense all materials and equipment necessary to carry out the terms of this Contract.

14.8 No Partnership Nothing in this Contract constitutes a partnership, joint venture or similar arrangement between the Parties. Neither Party is the principal or agent of the other.

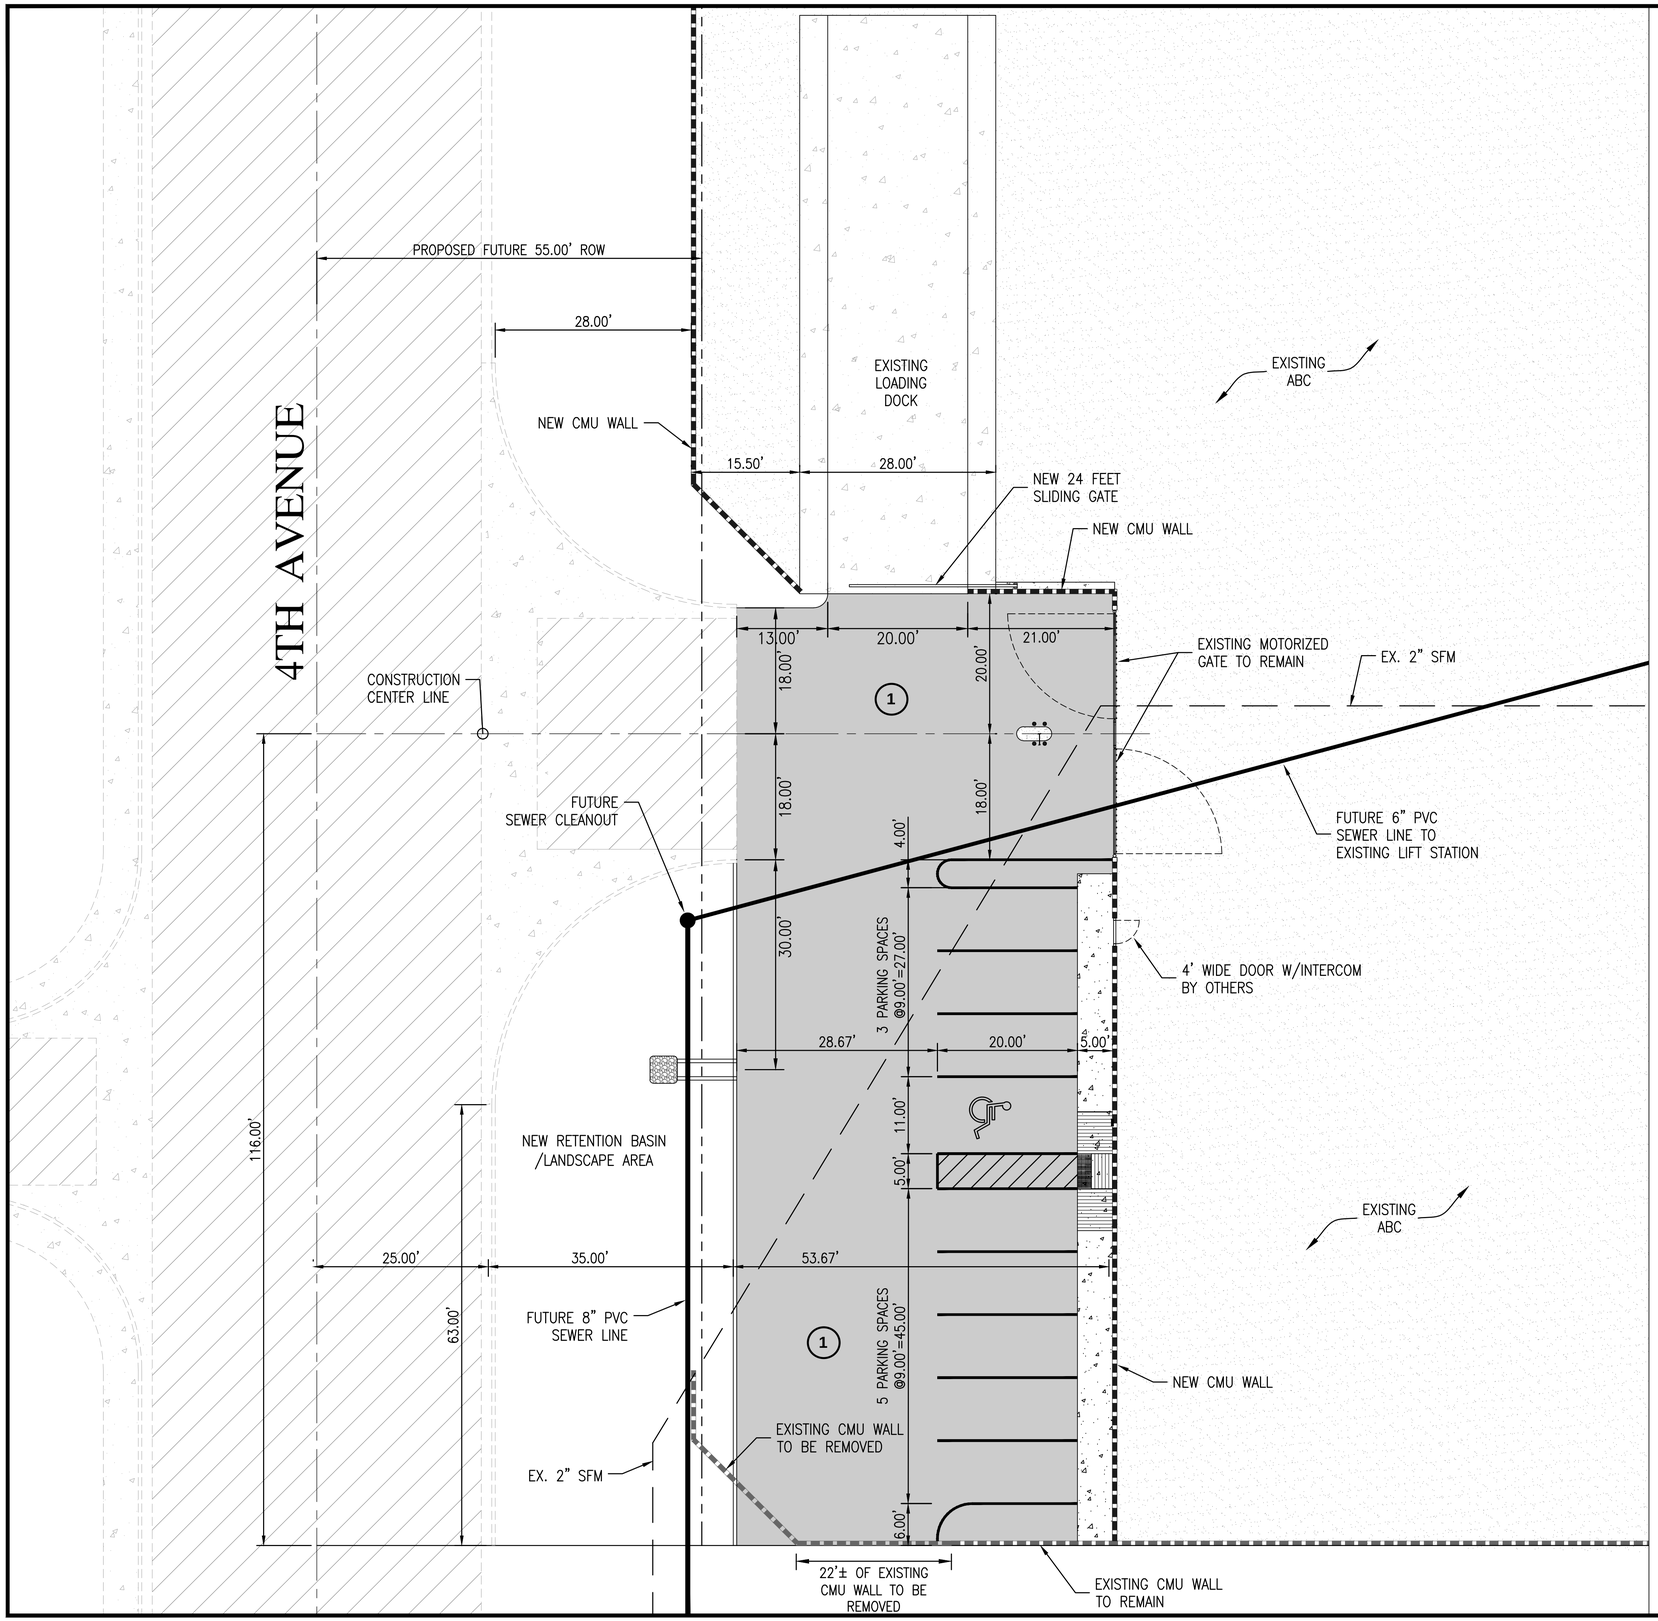
14.9 No Third-Party Beneficiaries There are no third-party beneficiaries to this Contract and no person or entity, not a Party, shall have any right or cause of action under this Contract.

14.10 *Force Majeure* If the Contractor or the City or both are prevented or materially restricted from performing any of their obligations under this Contract by an event of *force majeure*, then the obligations of each Party shall be suspended or reduced to the extent made necessary by the event. As used in this section, "*force majeure*" means any act or cause not reasonably within the control of the Party whose ability to perform is impaired and which that Party could not have prevented by the exercise of reasonable diligence. *Force majeure* events include but are not limited to natural disasters, fire, flood, explosions, strikes (or labor disputes) over which the affected Party has no control, sabotage, riots, civil commotion, acts of civil or military authority, wars, public health emergencies, or material changes in applicable business laws (including but not limited to through statutes, regulations, executive orders, or emergency declarations and proclamations).

14.11 Notices The notices under this Contract shall be validly given and fully received when in compliance with all of the following:

(i) In writing,
(ii) Delivered or refused delivery,
(iii) By personal delivery, or by major commercial delivery courier service which requires a signature of the recipient, or by registered or certified United States Postal Service mail, return receipt requested with the signature of the recipient, postage prepaid to the addresses in the first paragraph of this Contract.

14.11.2 Either Party may designate in writing and deliver notice of a different address in the same way as above. Any such change of address notice shall be delivered at least ten (10) Days before the date on which the change is to become effective.



14.11.3 Notices for delivery to the City shall be to the attention of the Public Works Director, copies to the City Manager, City Attorney, and City Clerk.

14.12 Severability If any terms, parts, or provisions of this Contract are for any reason invalid or unenforceable, the remaining terms, parts, or provisions are nevertheless valid and enforceable.

14.13 Entire Agreement This Contract (including the incorporated documents) contains the entire agreement between the Parties, and no oral or written statement, promise, or inducement made by either Party or its agents not contained or specifically referred to in this Contract is valid or binding. All modifications to this Contract must be in writing, signed, and endorsed by the Parties.

14.14 Headings The headings of this Contract are solely for the convenience of the Parties and shall not be used to explain, modify, simplify, or aid in the interpretation of the provisions of this Contract.

14.15 Further Acts Each of the Parties shall execute and deliver all such documents and perform all such acts as reasonably necessary, from time to time, to carry out the matters contemplated by this Contract.

CITY OF SAN LUIS

AGREEMENT
FOR THE CONSTRUCTION OF
CITY OF SAN LUIS
Public Works Yard Entrance - Parking Lot Paving

This agreement ("Contract") is made on Wednesday, June 10, 2026, by and between:

Gutierrez Canales Engineering 3136 East 33rd Place Yuma, AZ 85365 Sole Proprietor/Individual ("Contractor") and	City of San Luis 1090 East Union Street [physical address] P.O. Box 7740 [mailing address] San Luis, Arizona 85349 an Arizona municipal corporation ("City" or "City of San Luis")

The Contractor and City may be referred to individually as the "Party" and collectively as the "Parties." All defined words in the document titled "General Conditions of the Contract" ("General Conditions"), which was provided in the City's Request for Proposals ("RFP"), Public Works Yard Entrance - Parking Lot Paving, 2026-RFP-00000011, shall have the same meaning in this Contract unless otherwise specified in this Contract. Any term defined in the General Conditions and used in this Contract shall be interpreted as per the definition provided in the General Conditions.

WHEREAS, the Scope of Work requires the Contractor to furnish any and all labor, materials, equipment, transportation, utilities, services, and facilities required to perform all work for the City of San Luis – Public Works Yard Entrance - Parking Lot Paving ("Project"), per the Contractor's bid of May 18, 2026 ("Proposal") and to completely and totally remove and install the materials therein for the City, in a good workmanlike and substantial manner and to the satisfaction of the City through its engineers ("ENGINEERS"), or the ENGINEERS' properly authorized agents and strictly pursuant to and in conformity with the plans and specification prepared by the ENGINEERS, and with such modifications of the same and other documents that the City may make through the ENGINEERS or the ENGINEERS' properly authorized agents, as provided herein; and

WHEREAS, San Luis City Council, at a properly noticed open meeting, awarded the bid to the Contractor on June 10, 2026;

NOW, THEREFORE, the above recitals are incorporated into this Contract. In consideration of the City paying the sum of $61,424.58 to the Contractor and the Contractor constructing the Public Works Yard Entrance Parking Lot Paving and other work incidental in the manner and at the time provided in

this Contract, and in consideration of the other mutual benefits and obligations contained in this Contract, the Parties agree as follows:

ARTICLE 1 - PARTICIPANTS AND PROJECT

CITY:	Jenny Torres, City Manager City of San Luis, Arizona Telephone: (928) 341-8520 E-mail: jtorres@sanluisaz.gov
CITY PROJECT MANAGER:	Oscar Barnett, Project Manager City of San Luis Telephone: (928) 341-8577 Ext. 2011 E-mail: obarnett@sanluisaz.gov
CONTRACTOR:	Gutierrez Canales Engineering 3136 East 33rd Place Yuma, AZ 85365 Telephone: (928) 317-1401 E-mail: mkelland@gce-pc.com
CONTRACTOR MANAGER:	Reynaldo Angulo Gutierrez Canales Engineering Telephone: (928) 317-1401 E-mail: rangulo@gce-pc.com
PROJECT ENGINEER / DESIGNER:	Tomas Sanchez, PE, RLS City of San Luis Telephone: (928) 341-8577 Ext. 2053 E-mail: tsanchez@sanluisaz.gov
PROJECT DESCRIPTION:	City of San Luis, Public Works Yard Entrance - Parking Lot Paving
PROJECT LOCATION:	1311 North 4th Avenue San Luis, AZ 85349.

ARTICLE 2 - CONTRACT DOCUMENTS

The Contract between the City and the Contractor shall consist of the following items, collectively the "Contract Documents:"

1. Change Orders, written and properly executed (if any), as defined in the General Conditions;
2. Performance bond and payment bond (required by A.R.S. § 41-2574, also known as contract bond and labor & materials bond), warranty bond, bid bond, and other bonds;
3. Project specifications;

4. Construction Documents, as defined in the General Conditions;
5. General Conditions;
6. Special Conditions provided in the RFP Pages SP-1 through SP-8 (which amend Part 100 of the 2016 City of San Luis Supplemental to the 2015 MAG Uniform Standard Specifications);
7. 2016 City of San Luis Supplemental to the 2015 MAG Uniform Standard Specifications and Details for Public Works Construction and City of Yuma Construction Standard Detail Drawings, MAG Uniform Standard Specifications and Details for Public Works Construction, City of Yuma Construction Standard Detail Drawings – Edition 2019;
8. Bid documents {including but not limited to the advertisement for bids, bid schedule, addenda (if any), additive bid items (if any), and the Proposal;
9. Certificates of Insurance;
10. Notice to Proceed, as defined in the General Conditions; and
11. Project Schedule, as defined in the General Conditions

By this reference, the above Contract Documents are incorporated into and made a part of this Contract to the same extent as if set forth in full here.

In the event of a conflict of language between the items listed above, they shall govern in the order listed. The Contract Documents shall govern in all other matters not otherwise specified by the Contract between the Parties. All previous contracts between the Contractor and City are not applicable to this Contract or other resultant contracts.

ARTICLE 3 - CONSTRUCTION SERVICES

4-1 General.

4-1.01 The Contractor agrees, at its own cost and expense, to do all Work (as defined in the General Conditions) necessary and required to fully, timely, and properly complete the construction of the Project in strict accordance with the Contract Documents in a good and workmanlike manner, free and clear of all claims, liens, and charges whatsoever, in the manner and under the conditions specified, within the Project Schedule.

4-1.02 The Contractor shall provide all the labor and materials and perform the Work in accordance with Section 4 of the General Conditions, including but not limitd to the following major components of the construction services and the corresponding subsections of Section 4 of the General Conditions.

4-1.03 At all times relevant to this Contract and performance of the Work, the Contractor shall fully comply with all laws, regulations, or legal requirements applicable to the City, the Project, and the Contract, including, without limitation, those set forth in the General Conditions.

4-1.04 The Contractor shall perform the Work under this Contract using only those firms, team members, and individuals designated by Contractor consistent with the Contractor's accepted bid, or otherwise, approved by the City pursuant to the General Conditions. No other entities or individuals may be used without the prior written approval of the Project Manager.

4-1.05 The Contractor shall comply with all terms and conditions as set forth within the General Conditions.

4-1.06 The terms of this Contract shall govern in the event of a conflict between it and the General Conditions including any exhibit to the Contract or appendix to the General Conditions.

4-1.07 For purposes of this provision, "Work Product" shall include all designs, drawings, plans, specifications, ideas, renderings, and other information or matter in whatever form created (e.g., electronic or printed) and in all media now known or in the future created. All Work Product shall be considered Work Made for Hire as defined in the United States Copyright Act 17 U.S.C. § 101 (Copyright Act). If, for any reason, any such Work is found not to be a Work Made for Hire, the Contractor, by entering into this Contract, transfers and assigns ownership of the copyright in such Work to the City. Notwithstanding anything to the contrary in this Contract, all Work Product prepared or otherwise created in connection with the performance of this Contract, including the Work, are to be and remain the property of the City. The rights in this Section are exclusive to the City in perpetuity.

4-2 The Contractor's Pre-Contract and Pre-Work Deliverables. The Contractor shall provide the deliverables in accordance with Section 4.2 of the General Conditions.

4-3 Pre-Construction Conference. The Contractor shall attend the pre-construction conference in accordance with Section 4.3 of the General Conditions.

4-4 Performance of the Work (Including Field Measurements, Subcontractors, and Suppliers). The Contractor shall control and maintain the Project site in accordance with Section 4.4 of the General Conditions.

4-5 Control of the Project Site. The Contractor shall control and maintain the Project site in accordance with Section 4.5 of the General Conditions.

4-6 Project Safety. The Contractor shall implement and enforce Project safety in accordance with Section 4.6 of the General Conditions.

4-7 Materials Quality, Substitutions, and Shop Drawings. The Contractor shall provide materials testing and submit substitute materials and shop drawings in accordance with Section 4.7 of the General Conditions.

4-8 Project Record Documents. The Contractor shall maintain and make available the Project Record Document in accordance with Section 4.8 of the General Conditions.

4-9 Warranty and Correction of Defect Work. The Contractor shall provide warranties and correct defective Work in accordance with section 4.9 of the General Conditions.

ARTICLE 4 - CITY'S RESPONSIBILITIES

The City shall have the responsibilities and provide the information specified in, and subject to, the conditions set forth in Section 5 of the General Conditions.

ARTICLE 5 - CONTRACT TIME

6-1 Contract Time.

The Contract Time shall start with the Notice to Proceed and end with Final Acceptance, as set forth in Section 6-4 below. The Notice to Proceed cannot be issued prior to the City's approval and acceptance of the Contractor's bid.

6-1.01 The Contract Time shall be as set forth in the Project Schedule. The Contractor agrees that it will commence the performance of the Work and complete the Project within the Contract Time.

6-1.02 Time is of the essence of this Contract, for the Project, and for each phase and designated milestone of the Contract.

6-1.03 Failure on the part of the Contractor to adhere to the approved Project Schedule will be deemed a material breach and sufficient grounds for the City to terminate this Contract.

6-2 Project Schedule. The Project Schedule, as required by Section 6.2 of the General Conditions, shall be updated and maintained throughout the Contractor's performance under this Contract in accordance with Section 6.2 of the General Conditions.

6-3 Final Completion and Final Acceptance.

6-3.01 The Parties expressly agree by this writing that Final Completion (as defined in Section 2.14 of the General Conditions) must be achieved by **no later than June 30th, 2026.** Final Completion will be determined, and Final Acceptance will be issued pursuant to Sections 6.3 and 6.4 of the General Conditions.

6-4 Liquidated Damages.

6-4.01 The Contractor acknowledges and agrees that if the Contractor fails, neglects, or refuses to obtain the Final Completion of the Work within thirty (30) days, the City will sustain extensive damages and serious loss as a result of such failure. The Contractor agrees to pay the City liquidated damages for delay in the sum of **$350.00** for each consecutive calendar Day after the thirty (30) days have expired and the Final Completion of Work is not achieved. The Parties agree that the stated liquidated damages are reasonable to compensate the City and not as punitive damages. (The sum of $350.00 per day is consistent with Section 6.4 of the General Conditions and its reference to Subsection 108.9 of the 2016 City of San Luis Supplement to the 2015 MAG Uniform Standard Specification for Public Works Construction.)

6-4.02 The City may deduct liquidated damages described in Subsection 6-4.01 from any unpaid amounts then or thereafter due to the Contractor under this Contract. Any liquidated damages not so deducted from any unpaid amounts due the Contractor shall be payable to the City at the demand of the City, together with interest from the date of the demand at the highest lawful rate of interest payable by the Contractor.

6-4.03 Nothing in this Contract shall be deemed to constitute a waiver of any other remedy available to the City in the event of the Contractor's default under this Contract prior to full performance of the Work, including, as applicable, specific performance or completion of the Work on behalf of the Contractor, the cost and expense of which shall be offset against any monies then or thereafter due to Contractor (if any) and otherwise immediately reimbursed to City by the Contractor.

ARTICLE 6 - CONTRACT PRICE

7-1 Contract Price.

7-1.01 In exchange for the Contractor's full, timely, and acceptable performance and construction of the Work under this Contract, and subject to all of the terms of this Contract, the City will pay the Contractor the Contract Price (as defined by Section 2.6 of the General Terms), which is $61,424.58.

7-1.02 The Contract Price is all-inclusive and specifically includes all fees, costs, insurance and bond premiums, and taxes of any type necessary to fully, properly, and timely perform and construct the Work.

ARTICLE 7 - PAYMENT

Payments shall be made to the Contractor in accordance with Section 8 of the General Conditions.

ARTICLE 8 - CHANGES TO THE CONTRACT

Changes to the Contract may be made in strict accordance with Section 9 of the General Conditions.

ARTICLE 9 - TERMINATION

The Contract may be terminated in accordance with Section 10 of the General Conditions.

ARTICLE 10 - INSURANCE AND BONDS

11-1 The Contractor shall provide Insurance as provided in the Insurance Requirements and in accordance with Section 11.1 of the General Conditions. The Contractor shall provide proof of such Insurance and all required endorsements in forms acceptable to the City prior to commencing any Work under this Contract.

11-2 The Contractor shall provide performance, payment, and warranty bonds to the City in accordance with Section 11.2 of the General Conditions and A.R.S. § 34-222.

11-3 The Contractor's failure to provide proof of insurance and the required endorsements, or the required bonds, in forms acceptable to the City will be a material breach and grounds for termination for cause under this Contract.

ARTICLE 11 - INDEMNIFICATION

The Contractor shall have and assume the indemnity obligations set forth in Section 12 of the General Conditions.

ARTICLE 12 - DISPUTE RESOLUTION

Any claims or disputes relating to this Contract shall be resolved according to the dispute resolution process set forth in section 13 of the General Conditions.

ARTICLE 13 - MISCELLANEOUS PROVISIONS

14-1 The miscellaneous provisions set forth in section 14 of the General Conditions shall apply to this Contract.

14-2 The Contractor and any subcontractors or agents of the Contractor shall abide by the federal regulations prohibiting discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity, national origin, or for inquiring about, discussing, or disclosing compensation, and take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity or national origin.

ARTICLE 14 - COUNTERPARTS

This Contract may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The signature pages from one or more counterparts may be removed from such counterparts. Such signature pages may all be attached to a single instrument so that the signatures of all Parties may be physically attached to a single document.

ARTICLE 15 - AUTHORITY

Each Party represents and warrants to the other Party: (i) that such Party is duly organized and validly existing under the laws of the State of Arizona and has full corporate power and authority to enter into this Contract and to carry out the provisions of this Contract; (ii) such Party is duly authorized to execute and deliver this Contract and to perform its obligations under this Contract; (iii) the person executing this Contract on such Party's behalf has been duly authorized to do so by all requisite corporate action, and (iv) this Contract is a legal and valid obligation binding upon the Parties and enforceable in accordance with its terms.

The Parties have executed and made effective this Contract in Yuma County, Arizona, on the day and year set forth below, which is the day the last Party signed this Contract. The original Contract will be filed with the City of San Luis Clerk.

AGENDA ITEM REVIEW FORM

Regular City Council Meeting **7. F.**

Meeting Date: 06/10/2026

Department Head: Roula Encinas, Director of Finance, Finance Department

Submitted By: Roula Encinas, Director of Finance, Finance Department

Action Requested: Motion

ITEM:

Discussion and possible action on any and all matters regarding the acceptance and approval of the Tentative Budget for Fiscal Year 2026-2027. **(Roula Encinas, Director of Finance)**

SUMMARY:

Pursuant to state statute, the City Council is required to adopt a tentative budget to establish the maximum expenditure ceiling. Prior to the final adoption of the Fiscal Year 2026-2027 budget, the City Council may reallocate expenditures and revenues among departments differently than set forth in the tentative budget and may decrease expenditures as well.

Budget preparation workshops were held in February 2026, followed by a Budget Retreat in April 2026 and a Work Session in May 2026, during which the City Council provided additional direction and priorities. Administrative staff compiled the information and recommendations from these meetings to prepare the proposed revenues and expenditures/expenses for Fiscal Year 2026-2027. The tentative budget has now been submitted to the City Council for acceptance.

RECOMMENDATION / SUGGESTED MOTION:

I MOVE TO APPROVE THE TENTATIVE BUDGET FOR THE FISCAL YEAR 2026-2027 AS PRESENTED.

TENTATIVE BUDGET FY 2026-2027

June 10, 2026

Budget FY 2027

- The FY 2027 budget reflects the City's ongoing commitment to transparency, accountability, and service excellence.
- Budget decisions are aligned with the City Council's strategic priorities.
- With limited resources, we prepared a conservative budget that focuses on essential expenses.
- The gap between revenues and expenses is covered by positive fund balances.
- We continue to maintain healthy reserves to safeguard the City's financial stability in uncertain times.
- FY 2027 budget is $152.3 Million ($152,375,550.)

AGENDA ITEM REVIEW FORM

Regular City Council Meeting **7. G.**

Meeting Date: 06/10/2026

Department Head: Jose A. Guzman, Director of Development Services, Development Services

Submitted By: Jose A. Guzman, Director of Development Services, Development Services

Action Requested: Motion
Resolution

ITEM:

Discussion and possible action on any and all matters regarding Resolution No. 2401. A Resolution of the Mayor and City Council of the City of San Luis, Arizona, declaring the following technical code documents public records, including the various tables, appendices and amendments thereto: The 2024 International Building Code; the 2024 International Residential Code; the 2018 International Mechanical Code; the 2018 International Plumbing Code; the 2024 International Property Maintenance Code; the 2020 National Electrical Code; and the 2018 International Fuel Gas Code; which publications shall remain on file with the City Clerk. **(Joaquin Campa, Building Official)**

SUMMARY:

Under A.R.S. § 9-812 and § 39-204, ordinances passed by the City Council must be published in the newspaper. To avoid publishing all the Codes and Amendments to the Codes, A.R.S. § 9-802 allows adoption by reference to three (3) copies of public records in existence and filed with the City Clerk. This Resolution declares the Codes and the Amendments to be public records so that they may be referenced in an ordinance in order to adopt them without publishing the volumes of codebooks in the newspaper and the extraordinary cost that would incur.

RECOMMENDATION / SUGGESTED MOTION:

I MOVE TO APPROVE AND ADOPT RESOLUTION NO. 2401

CITY OF SAN LUIS

Resolution

No. 2401

A RESOLUTION OF THE MAYOR AND COUNCIL OF THE CITY OF SAN LUIS, ARIZONA, DECLARING THE FOLLOWING TECHNICAL CODE DOCUMENTS PUBLIC RECORDS, INCLUDING THE VARIOUS TABLES, APPENDICES AND AMENDMENTS THERETO: THE 2024 INTERNATIONAL BUILDING CODE; THE 2024 INTERNATIONAL RESIDENTIAL CODE; THE 2018 INTERNATIONAL MECHANICAL CODE; THE 2018 INTERNATIONAL PLUMBING CODE; THE 2024 INTERNATIONAL PROPERTY MAINTENANCE CODE; THE 2020 NATIONAL ELECTRICAL CODE; AND THE 2018 INTERNATIONAL FUEL GAS CODE; WHICH PUBLICATIONS SHALL REMAIN ON FILE WITH THE CITY CLERK.

BE IT RESOLVED by the Mayor and City Council of the City of San Luis, Arizona as follows:

Section 1: Technical Codes Adopted as Public Records.

The following entitled technical code publications, three copies of which are to remain on file in the office of the City Clerk, are hereby declared to be a public record and said copies are to remain on file with the City Clerk:

1) International Building Code, 2024 Edition.
2) International Residential Code, 2024 Edition.
3) International Mechanical Code, 2018 Edition.
4) International Plumbing Code, 2018 Edition.
5) International Property Maintenance Code, 2024 Edition.
6) International Electrical Code, 2020 Edition.
7) International Fuel Gas Code, 2018 Edition.

Section 2: Amendments Adopted as Public Records.

The following entitled amendments, three copies of which are to remain on file in the office of the City Clerk, are hereby declared to be a public record and said copies are to remain on file with the City Clerk:

1) City of San Luis Amendments to 2024 International Building Code.
2) City of San Luis Amendments to 2024 International Residential Code.
3) City of San Luis Amendments to 2018 International Mechanical Code.

4) City of San Luis Amendments to 2018 International Plumbing Code.
5) City of San Luis Amendments to 2024 International Property Maintenance Code.
6) City of San Luis Amendments to 2020 International Electrical Code.
7) City of San Luis Amendments to 2018 International Fuel Gas Code.

Section 3: If a conflict arises between the provisions of this resolution and any other ordinance, resolution, regulation, or policy of the City, the conflicting provisions are amended, superseded, and replaced, and this resolution shall govern.

Section 4: If any section, subsection, sentence, clause, phrase, or a portion of this resolution is held to be invalid or unconstitutional by the final decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portion of this resolution.

PASSED, ADOPTED, and APPROVED by the Mayor and City Council of the City of San Luis, Yuma County, Arizona, this 10th day of June, 2026.

_____
Nieves Riedel, Mayor

ATTEST:

_____
Sonia Cornelio, City Clerk

APPROVED AS TO FORM:

_____
Joe Estes, Interim City Attorney

CITY OF SAN LUIS
ADMENDMENTS TO 2024
INTERNATIONAL BUILDING CODE

Section [A] 101.1 Title. These regulations shall be known as the Building Code of the City of San Luis, hereinafter referred to as 'this code.'

(B) **Section [A] 103.1 Creation of enforcement agency.** The Development Services Department, Building Safety Division, is hereby created and the official in charge thereof shall be known as the building official. The function of the agency shall be the implementation, administration and enforcement of the provisions of this code.

Section [A] 104.10.1 Flood hazard areas. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section [A] 105.2 Work exempt from permit. Add the following additional item under the heading, "**Building:"**

14. Window replacements of like size where framing is not altered and any required emergency egress dimensions are not diminished from existing, in Group R3 one-and two-family dwellings and installed by either a licensed contractor or owner-occupant of the residence.

Section [A] 105.3.2 Time limitation of application. An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued; except that the building official is authorized to grant one or more extensions of time for additional periods not exceeding 180 days each. The extension shall be requested in writing and justifiable cause shall be demonstrated.

105.8 Construction Debris. Construction sites shall be kept reasonably clean of construction debris during the course of construction. Construction debris shall be removed or retained on the lot and not be at risk to be displaced from the lot by wind. Debris shall not be allowed to transfer to adjacent lots or City rights-of-way.

If the Building Official determines that the construction site is not in compliance with this section or the debris presents a safety hazard for inspection personnel, inspections shall not be performed until the construction site is cleaned.

Section [A] 107.2.2 Fire protection system shop drawings. Plan submittal documents shall include either a statement of the design criteria for the fire protection system(s) to also include a current fire flow test within the past 12 months, or the complete design, plans, calculations and data for the fire protection system(s). If only the statement of design criteria and fire flow test is initially submitted, the complete design, plans, calculations and data for the fire protection system(s) shall be submitted to indicate conformance to this code and the construction documents and shall be approved in writing by the Fire Department prior to the start of system installation. In addition, where applicable, shop drawings, calculations and data shall be submitted and shall contain all information as required by the referenced installation standards in Chapter 9.

Section [A] 107.2.6.1 Design flood elevations. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section [A] 109.2 Schedule of permit fees. As per City of San Luis Resolution No. 2306

TABLE 1-A: BUILDING PERMIT FEES

Section [A] 109.4 Work commencing before permit issuance. Add to end of section, "An investigation fee, in addition to the permit fee, shall be collected whether or not a permit is then or subsequently issued. The investigation fee shall be determined by the building official, based on the circumstances, nature, and severity of the infraction. The minimum investigation fee shall be $100.00 and the maximum shall be an amount up to the same as the fee set forth in City of San Luis Resolution No. 2306"

Section [A] 109.6 Refunds. The building official shall authorize the refunding of fees as follows:

1. The full amount of any fee paid hereunder that was erroneously paid or collected.
2. Not more than 80 percent of the permit fee paid when no work has been done under a permit issued in accordance with this code.
3. Not more than 80 percent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any plan review effort has been expended.

The building official shall not authorize the refunding of any fee paid except upon written application filed by the original permittee not later than 180 days after the date of fee payment.

Section [A] 110.3.6 Lath and gypsum panel product inspection. Delete exception to section.

Section [A] 113.3 Qualifications. Delete section in its entirety.

Section [A] 114.4 Violation penalties. Any person who violates a provision of this code or fails to comply with any of the requirements thereof or who erects, constructs, alters or repairs a building or structure in violation of *the approved construction documents* or directive of the building official, or of a permit or certificate issued under the provisions of this code, shall be subject to the penalty and fine described in resolution 2306 of the City of San Luis

(R) **Section [A] 115.4 Failure to comply.** Any person who shall continue any work after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine described in Resolution 2306 of the City of San Luis.

Section [F] 903.2 Where required. Add to end of section, “Requirements in Sections [F] 903.2.1 through [F] 903.2.10 are superseded by the current City of San Luis adopted fire code.”

Section 1102.1 Design. Amend to read, “Buildings and facilities shall be designed and constructed to be *accessible* in accordance with Arizona Revised Statutes, Title 41, Chapter 9, Article 8, Public Accommodations and Services, The Arizonans with Disabilities Act, R10-3-401 through R10-3-404, which includes − 28 CFR 35 and 28 CFR 36 and Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG), and this code and ICC A117.1.”

Section 1110.10 Elevators. Add to end of section, “Passenger elevators shall be utilized as part of an accessible route in new construction to connect three or more stories (or levels), other than structures with four or more dwelling units.”

> Create new subsection, “**1110.10.1. Lula Elevators.** Lula (Limited-Use/Limited Application) elevators are permitted to be a part of a required accessible route in new construction to connect up to two stories (or levels) in buildings other than offices of health care providers, government buildings and multiple tenant facilities containing five or more tenant spaces used for the sales or rental of goods and where at least one such tenant space is located on a floor level above or below the accessible levels.”

SECTION 1612 FLOOD LOADS. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section 1705.6 Soils. Exception: Where Section 1803 does not require reporting of materials and procedures for fill placement, the special inspector shall verify that the in-place dry density of the compacted fill is not less than 90 percent of the maximum dry density at optimum moisture content determined in accordance with ASTM D 1557, or not less than 95 percent of the maximum dry density at optimum moisture content determined in accordance with ASTM D 698 where approved by the building official.

Section 1804.6 Compacted fill material. Exception: Compacted fill material 12 inches (305 mm) in depth or less need not comply with an approved report, provided that the in-place dry density is not less than 90 percent of the maximum dry density at optimum moisture content determined in accordance with ASTM D 1557, or not less than 95 percent of the maximum dry density at optimum moisture content determined in accordance with ASTM D 698 where approved by the building official. The compaction shall be verified by special inspection in accordance with Section 1705.6.

Section 1807.2.5.1 Where required. Add to end of section. “Guards may be required at other fall hazard conditions were deemed necessary by the Building Official.”

Section 2304.10.6.1 Fasteners and connectors for preservative-treated wood. Add second exception to section and renumber accordingly:

2. Fasteners for preservative-treated wood sill plates to studs in areas not normally subjected to high moisture.

Section 2512.1.2 Weep screeds. Amend second sentence to read, “The weep screed shall be placed not less than 4 inches (102 mm) above the earth or $^{3}/_{4}$ (19 mm) above paved areas and be of a type that will allow trapped water to drain to the exterior of the building.”

Section 2902.6 Small Occupancies. Add to end of section, “In other than Assembly uses and Educational facilities, drinking fountains are not required for an occupant load of 25 or fewer.”

Section 3302.1 Site safety plan. Amend first sentence to read, “When required by the Fire Code Official or the Building Official, the owner or owner's authorized agent shall be responsible for the development, implementation and maintenance of an approved, written site safety plan establishing a fire prevention program at the project site applicable throughout all phases of the construction, repair, alteration or demolition work.”

3304.2 Dust Control. Prior to construction, a plan shall be submitted to the building official outlining the steps that will be taken throughout construction to minimize and control dust associated with the project

CITY OF SAN LUIS ADMENDMENTS TO 2024 INTERNATIONAL RESIDENTIAL CODE

Section R101.1 Title. These provisions shall be known as the *Residential Code for One- and Two-family Dwellings* of the City of San Luis, and shall be cited as such and will be referred to herein as 'this code.'

Section R101.2 Scope. Add to end of **Exception:** "Subject to preemption by Arizona Revised Statutes, Title 9, Chapter 7, Article 1, Section 807, Mandated Sprinklers in Certain Residences Prohibited."

Section R103.1 Creation of agency. Amend first sentence to read, "Development Services Department, Building Safety Division is hereby created and the official in charge thereof shall be known as the *building official*."

Section R104.2.3.1 Flood hazard areas. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section R105.1 Required. Add to end of section, "In addition, Park Models, as defined in Chapter 2 of this Code, shall require a building permit for placement. The required placement permit shall be obtained through the State of Arizona, Arizona Department of Housing. Installation of Park Models shall comply with the minimum installation standards as established and enforced by the Arizona Department of Housing. Proof of compliance with these requirements shall be provided to the City of San Luis, Building Safety Division prior to final approval."

Section R105.2 Work exempt from permit. Add new items #11 and #12, under "**Building**":

11. Window replacements of like size where framing is not altered and any required emergency egress dimensions are not diminished from existing.

12. Replacement of an existing electric water heater in the same location.

Items #11 and #12 apply only to work performed by a licensed contractor or the owner/occupant of the premises.

Section R105.10 Toilet facilities on construction sites. Toilet facilities shall be provided for construction workers and such facilities shall be maintained in a sanitary condition. Construction worker toilets of the non-sewer type shall conform to ANSI Z4.3.

Toilet facilities shall be required at a ratio of at least one toilet for a maximum of 15 lots under construction.

Section R105.11 Construction Debris. Add to end of section, construction sites shall be kept reasonably clean of construction debris during the course of construction. Construction debris shall be removed or retained on the lot and not be at risk to be displaced from the lot by wind. Debris shall not be allowed to transfer to adjacent lots or City Rights of Way.

If the *Building Official* determines that the construction site is not in compliance with this section or the debris presents a safety hazard for inspection personnel, inspections shall not be performed until the construction site is cleaned.

Section R106.1.4 Information for construction in flood hazard areas. Delete item 4 in its entirety.

Section R106.4 Amended Construction documents. Add to end of section, "Changes may be made without resubmittal that are not affecting code-related items, or when otherwise approved by the *building official*."

Section R108.2 Schedule of permit fees. Amend by adding City of San Luis Resolution 2306.

Section R108.2.1 Plan review fees. When submittal documents are required by Section R106.1, a plan review fee shall be paid at the time of submitting the submittal documents for plan review. Site plan review fee shall be 65 percent of the building permit fee as shown in City of San Luis Resolution 2306.

The plan review fees specified in this section are separate fees from the permit fees specified in Section R108.2 and are in addition to the permit fees.

When submittal documents are incomplete or changed so as to require additional plan review, an additional plan review fee shall be charged at the rate shown in City of San Luis Resolution 2306.

Section R108.6 Work commencing before permit issuance. Add to end of section, "An investigation fee, in addition to the permit fee, shall be collected whether or not a permit is then or subsequently issued. The investigation fee shall be determined by the *building official*, based on the circumstances, nature, and severity of the infraction. The minimum investigation fee shall be $100.00 and the maximum shall be an amount up to the same as the fee set forth in City of San Luis Resolution 2306".

Section R109.4 Approval required. Add to end of section, "Inspection comments shall include code section references, when requested."

Section R110.2 Certificate issued. Amend to read, "After the *building official* inspects the building or structure and does not find violations of the provisions of this code or other laws that are enforced by the *jurisdiction*, the *building official* may issue a certificate of occupancy upon request, containing the following:

1. The *permit* number.
2. The address of the structure.
3. The name of the *owner* or the *owner's* authorized agent.
4. A description of that portion of the structure for which the certificate is issued.
5. A statement that the described portion of the structure has been inspected for compliance with the requirements of this code.
6. The edition of the code under which the *permit* was issued.

7. Any special stipulations and conditions of the *building permit*."

Section R113.4 Violation penalties. Any person who violates a provision of this code or fails to comply with any of the requirements thereof or who erects, constructs, alters or repairs a building or structure in violation of the approved construction documents or directive of the building official, or of a permit or certificate issued under the provisions of this code, shall be subject to the penalty and fine described in this ordinance.

Section R114.2 Failure to comply. Any person who shall continue any work in or about the structure after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine described in this ordinance.

Section R202 Definitions. Park Model. Any factory assembled portable unit, to which is affixed on Arizona recreational vehicle seal, mounted on a chassis and wheels, not more than 12 feet in width and no greater than 400 square feet nor less than 320 square feet in total area, and permanently connected to utilities that are necessary for the operation of the installed park model with no holding tank.

TABLE R301.2 CLIMATIC AND GEOGRAPHIC DESIGN CRITERIA. Amend table to add values applicable to this jurisdiction

TABLE R301.2

TABLE R301.2 CLIMATIC AND GEOGRAPHIC DESIGN CRITERIA. Add to end of footnote f, “All locations in City of San Luis shall be classified as Seismic Design Category D0.”

Section R301.2.2.6 Irregular buildings. Add exception to Item 6.

Perpendicular shear wall and wall bracing.

> “**Exception:** Angled walls, per provisions of Section R602.10.1.4.”

Section R301.2.2.10.1 Seismic restraint resistance. Add exception to item 1.

> “**Exception:** Tank type water heaters shall be anchored or strapped in the upper one-third and in the lower one-third of the appliance to resist a force equal to one-third of the operating weight of the water heater, acting in a horizontal direction, or in accordance with the appliance manufacturer’s recommendations, using approved seismic straps (and excluding use of ‘plumbers tape’).”

Section R302.3.1 Dwelling unit separation. Add to end of section, “If built on a property line, the separation wall shall be as required for Townhouses, per Section R302.2.”

Section R304.1 Location required. Delete the exception to Item 8 in this section.

Section R304.3.1 Fasteners for preservative-treated wood. Add fourth exception to section:

1. “Fasteners for preservative-treated wood in areas not normally subjected to high moisture.”

Section R305.1 Subterranean termite control methods. Add to end of section, “Method 3 or 4 shall be incorporated per Section R304.1, regardless of other methods or combination of methods utilized.”

Section R306 Flood-resistant construction. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section R309.2 One- and two-family dwellings automatic fire sprinkler systems. Delete section in its entirety. (Preemption by ARS § 9-807).

Section R309.2.1 Design and installation. Clarification: This section is to remain.

Section R312.1 Minimum area. Add to end of section, “Every *dwelling unit* shall have at least one habitable room that shall have not less than 120 square feet (11 m2) of gross floor area.”

Create new Section, **"R312.4 Access from bedrooms.** *Bedrooms* shall not constitute the only means of access to other *bedrooms* or *habitable spaces* and shall not serve as the only means of egress from other *habitable spaces*.

Exception: Units that contain fewer than *two bedrooms*."

Section R319.5. Add to end of section, "Where wall finishes are replaced/altered (other than existing masonry openings), replacement windows shall comply as for new construction."

Section R325.3 Mechanical Ventilation. Add to end of section, "For other than whole house fans and kitchen hoods, local exhaust systems including, but not limited to bathrooms, water closet compartments, laundry rooms, etc., shall be provided with timer switches or automatic shutoff controls."

Section R401.2 Requirements. Add to end of section, "Engineered fill building pads shall be placed in 12-inch lifts, compacted to not less than 95% Maximum Density, per ASTM D698 or D1557. The building pads shall extend a minimum of 3-feet beyond the footprint of the building at an elevation level not less than 10-inches below the finished floor.

Section R401.2 Requirements. Add exception to section:

"**Exception:** Fills depths 12-inches or less may not require testin subject to determination by the *building official*."

Section R403.1.2 Continuous footing in Seismic Design Categories D0, D1 and D2. Add to end of section, "Required interior *braced wall* panels at one-story and two-story buildings located in Seismic Design Categories D0, D1 and D2 shall be supported by continuous solid or fully grouted masonry or concrete footings in accordance with Section R403.1.3.4 at intervals not exceeding 60 feet (18288 mm) in both directions."

Section R403.1.3.4 Interior bearing and braced wall panel footings in Seismic Design Categories D0, D1 and D2. In Seismic Design Categories D0, D1 and D2, interior footings supporting bearing walls or *braced wall panels* with a foundation, and cast monolithically with a slab on *grade*, shall extend to a depth not less than 12 inches (305 mm) below the top of the slab.

Section R403.1.4 Minimum depth. Amend first sentence to read, "All exterior footings shall be placed at least 12 inches (305 mm) below the undisturbed ground surface, or 12 inches (305 mm) into engineered pad."

Section R403.1.6.1 Foundation anchorage in Seismic Design Categories C, D0, D1 and D2. Add item 7 to section:

"7. Interior *braced wall panels* when not supported by a continuous foundation

shall be attached to the concrete slab on ground using ½ inch (12.7 mm) diameter anchor or expansion bolts spaced at not more than 6 feet (1829 mm) on center, or an equivalent method such as approved pneumatic anchor pins as per manufacturer requirements. Cut nails or adhesives shall not be permitted."

Section R408.7 Flood Resistance. Delete section in its entirety in favor of adopted City floodplain ordinances.

Section R506.1 General. Add to end of section, "Control joints in unreinforced concrete slab-on-ground floors shall be provided at maximum 12 feet (3658 mm) on center in both directions."

Section R506.3.3 Vapor retarder. Amend section title to read, **"Section R506.3.3 Vapor retarder (Optional)."**

Section R602.10.1.3 Spacing of braced wall lines. Add exception to section:

"Exception: As an exception to *braced wall line* spacing of Table R602.10.1.3, in detached one- and two-story *dwellings*, for seismic bracing, spacing between *braced wall lines* may be up to 30 feet (9144 mm) x 45 feet (13716 mm) for one single room and one attached garage, each not exceeding 1,350 square feet (125.42 m2) per *dwelling unit*. When this exception is taken all the following shall apply:

1.1 Wall bracing at *braced wall lines* surrounding the single room and one attached garage shall be Method WSP of Section R602.10.4.
1.2 *Braced wall panel* locations shall be as per Sections R602.10.2.2 and R602.10.2.2.1, and length of bracing provided as per Sections R602.10.3 and R602.10.5.
1.3 The entire length of *braced wall lines* surrounding the single room and garage shall be continuously sheathed with wood structural panel sheathing (WSP).
1.4 *Braced wall panel* locations at the single room and garage shall have a maximum 3 1/2:1 height-width ratio, except for methods ABW and PFH of Section R602.10.4.
1.5 *Braced wall lines* surrounding the single room and garage shall be supported by continuous foundations around the entire *braced wall lines*.
1.6 Spacing of all other interior braced wall lines shall not exceed 25 feet."

Section R602.10.2.2.1 Location of braced wall panels in Seismic Design Categories D0, D1 and D2. Add exception 3 and 4 to section:

"3. Interior *braced wall* panels shall begin within 10 feet (3810 mm) from each end of a braced wall line as determined in Section R602.10.1.1.

4. For *braced wall* panel construction Method WSP of Section R602.10.4, the braced wall panel shall be permitted to begin no more than 12.5 feet (3810 mm) from each end of the *braced wall* line, where a designed collector is

provided. See sketches SK1, SK2, and SK3 for designed collectors and applicable conditions."

Section R602.10.4.4 Panel joints. Delete exception 4 to this section.

Section R602.10.7 Ends of braced wall lines with continuous sheathing. Add exception to section:

"**Exception:** The first *braced wall panel* shall be permitted to begin 12.5 feet (3810 mm) from each end of the *braced wall line* in Seismic Design Category D0, where a designed collector is provided. See sketches SK1, SK2, and SK3 for designed collectors and applicable conditions."

Section R602.10.8 Braced wall panel connections. Add to end of section, "This section also applies for connections of interior *braced wall panels* to roof trusses and rafters."

TABLE R702.3.5 MINIMUM THICKNESS AND APPLICATION OF GYPSUM BOARD AND GYPSUM PANEL PRODUCTS. Amend last sentence of footnote "d" of table to read, "Where applying a water-based texture material, the minimum gypsum board thickness shall be increased from 3/8 inch to ½ inch for 16-inch on center framing ceiling."

Section N1101.14 (R401.3) Certificate (Mandatory). Amend section title to read, **"Section N1101.14 (401.3) Certificate (Optional)."**

Section N1102.4 (R402.4) Fenestration. Add exception to section:

"**Exception:** Standard insulated garage doors shall be permitted at conditioned garages in new construction and are not subject to the fenestration air leakage requirements of Section N1102.4.3. For use of this exception the garage conditioning shall be a dedicated mechanical system. Register/diffuser openings at the garage ceiling shall include ceiling radiation dampers or ducts shall be constructed of minimum No. 26 gage (0.48 mm) sheet steel."

Section N1102.5 (R402.5) Air Leakage. Add to end of section, "Building envelope air tightness and insulation installation shall be demonstrated to comply with one of the following options given by Section N1102.5.1.2 or N1102.5.1.4."

Section N1102.5.1.2 (R402.5.1.2) Air leakage testing. Amend section title to read, "N1102.5.1.2 (R402.5.1.2) Air leakage testing optional."

Section N1102.5.1.4 Visual inspection option. The components listed in Table N1102.45.1.1 (R402.5.1.1), applicable to the method of construction, are field verified. Where required by the *building official*, an *approved* party independent from the installer of the insulation, shall inspect the *air barrier* and insulation.

Table N1102.5.1.1 (R402.5.1.1) AIR BARRIER AND INSULATION INSTALLATION. Amend as follows:

a. “COMPONENT, ‘Showers, tubs and fireplaces adjacent to the building thermal envelope.’ Optional.

b. COMPONENT, ‘Electrical, communications and other equipment boxes, housings and enclosures.’ Optional.”

Section N1103.2 (R403.2) Hot water boiler temperature reset. Amend section title to read, “Section N1103.2 (R403.2) Hot water boiler temperature reset (Optional).”

Section N1103.4.1 (R403.4.1) Protection of piping insulation. Amend second sentence to read, “The protection shall provide shielding from solar radiation that can cause degradation of the material.”

Section N1103.5 (R403.5) Service hot water systems. Amend section title to read, “**Service hot water systems (Optional).**”

Section N1103.6 (R403.6) Mechanical Ventilation. Amend to section title to read, “**Section N1103.6 (R403.6) Mechanical ventilation (Optional).**”

Section N1103.6.4 (R403.6.5) Intermittent exhaust control for bathrooms and toilet rooms. Amend section title and first sentence to read,

Section N1103.6.4 (R403.6.5) Intermittent exhaust control for bathrooms, toilet rooms and laundry rooms. “Where an exhaust system serving a bathroom or toilet room or laundry room is designed for intermittent operation, the exhaust system controls shall include one or more of the following:”

Section N1103.6.4 (R403.6.5) Intermittent exhaust control for bathrooms, toilet rooms and laundry rooms. Delete Items 3 and 4 from this section.

Section N1103. 10.3 (R403.10.3) Covers. Amend section title to read, “**Section N1103.10.3 (R403.10.3) Covers (Optional).**”

Section N1103.12 (R403.12) Residential pools and permanent residential spas. Delete section in its entirety.

Section N1104 (R404) Electrical power, lighting and renewable energy systems. Amend section title to read, “**Section N1104 (R404) electrical power, lighting and renewable energy systems (optional)**”

Section N1108 (R408) Additional efficiency requirements. Amend section title to read, “**Additional efficiency requirements (Optional).**”

Section N1109.6 (R501.6) Change in space conditioning. Add to end of section, “Permitted existing garages and accessory structures (excluding patio enclosures) shall

be permitted to be conditioned, by use of approved ductless cooling/heating systems (maximum 2 tons total capacity), where such spaces are not being converted to habitable or livable spaces. Existing enclosed walls that are uninsulated shall be accepted. If accessible, the existing attic space shall be insulated as required for new construction."

Section N1110.2.5 Additional efficiency credit requirements for additions. Amend section title to read, "**Section N1110.2.5 Additional efficiency credit requirements for additions (Optional).**"

Section N1111.1.2.3 (R503.1.2.3) Duct system leakage. Add to end of section, "This section applies to new duct sections only."

Section N1111.1.5 Additional efficiency credit requirements for substantial improvements. Amend section title to read, "**Section N1111.1.5 Additional efficiency credit requirements for substantial improvements (Optional)."**

Section M1602.2 Return Air Openings. Amend Exception 8 to read:

> "8. For other than dedicated HVAC systems, return air shall not be taken from indoor swimming pool enclosures and associated deck areas."

Section G2406.2 (303.3) Prohibited locations. Delete items 3 and 4 in their entirety.

Section G2407.5 (304.5) Indoor combustion air. Add to beginning of section, "Indoor *combustion air* shall not be used in new construction within the building envelope. Garages of minimum 400 square feet in area may use combination of *infiltration* and partial exterior *combustion air* for one standard water heater fuel gas *appliance* up to 50,000 *Btu/h* total input capacity."

Section G2407.7 (304.7) Combination indoor and outdoor combustion air. Add to beginning of section, "Combination indoor and outdoor combustion air shall not be used in new construction within the building envelope. Garages of minimum 400 square feet in area may use combination of *infiltration* and partial exterior *combustion* air for one standard water heater fuel gas *appliance* up to 50,000 *Btu/h* total input capacity."

Section G2413.2 (402.2) Maximum gas demand. Add to end of section, "Where an input rating is not indicated, the gas supplier, *appliance* manufacturer or a qualified agency shall be contacted, or the rating from Table G2413.2 may be used for estimating the volumetric flow of gas to be supplied."

TABLE G2413.2 (402.2)
APPROXIMATE GAS INPUT FOR TYPICAL APPLIANCES

APPLIANCE	INPUT BTU/H (Approx.)
Space Heating Units	
Hydronic boiler	
Single family	100,000
Multifamily, per unit	60,000
Warm-air furnace	
Single family	100,000
Multifamily, per unit	60,000
Space and Water Heating Units	
Hydronic boiler	
Single family	120,000
Multifamily, per unit	75,000
Water Heating Appliances	
Water heater, automatic instantaneous	
Capacity at 2 gal./minute	142,800
Capacity at 4 gal./minute	285,000
Capacity at 6 gal./minute	428,400
Water heater, automatic storage, 30- to 40-gal. tank	35,000 50,000
Water heater, automatic storage, 50-gal. tank	35,000
Water heater, domestic, circulating or side-arm	
Cooking Appliances	
Built-in oven or broiler unit, domestic	25,000
Built-in top unit, domestic	40,000
Range, free-standing, domestic	65,000
Other Appliances	
Barbecue	40,000
Clothes dryer, Type 1 (domestic)	35,000
Gas fireplace, direct-vent	40,000
Gas light	2,500
Gas log	80,000
Refrigerator	3,000

For SL: 1 British thermal unit per hour = 0.293 W, 1 gallon = 3.785 L., 1 gallon per minute = 3.785 L/m.

Section G2414.4.3 (403.4.3) Copper or copper-alloy tubing. Add to end of section, "Copper or copper-alloy tubing shall not be used in natural gas piping systems, due to hydrogen sulfide content which cannot be guaranteed to be delivered from the serving utility provider to meet the code acceptable levels."

Section G2415.12 (404.12) Minimum burial depth. Underground *piping systems* shall be installed at a minimum depth of 12 inches (305 mm) below grade.

Section G2415.12.1 (404.12.1) Individual outdoor appliances. Delete section in its entirety.

Section G2415.17.1 (404.17.1) Limitations. Amend exception 3 to read:

"3. Plastic pipe shall be permitted under uncovered outdoor patio, walkway and driveway slabs provided that the burial depth complies with Section G2415.12."

TABLE G2427.10.2.4 (503.10.2.4) MINIMUM THICKNESS FOR GALVANIZED STEEL VENT CONNECTORS FOR LOW-HEAT APPLIANCES.

"Thickness	**Gauge**
0.019 inch	28 Ga.
0.023 inch	26 Ga.
0.029 inch	24 Ga.
0.034 inch	22 Ga.
0.056 inch	18 Ga."

Section G2445.4 (621.4) Prohibited Locations. Add to end of section, "*Unvented room heaters* shall not be installed in bedrooms or bathrooms."

Section P2503.5.1 Rough plumbing. In Item 1, revise 10 feet (3048 mm) to 5 feet 524 mm).

Section P2603.5.1 Sewer depth. *Building* sewers that connect to private sewage disposal systems shall be at not less than 12 inches (305 mm) below finished *grade* at the point of septic tank connection. *Building sewers* shall be not less than 12 inches (305 mm) *below grade*.

Section P2801.5.3 Appliance, equipment and insulation in pans. Delete section in its entirety.

Section P2804.6.1 Requirements for discharge pipe. Amend Item #5 to read:

"5. Discharge to the floor of the garage (where the garage floor is sloped and below the floor level of the dwelling), to a waste receptor or to the outdoors."

Section P2902.5.3 Lawn irrigation systems. Rename section/title to read, "**Section P2902.5.3 Landscape irrigation systems.**" Add to beginning of section, "A landscape irrigation system shall be provided for all new dwellings, consisting of a stub-out, electric valve (or valves) and backflow protection."

Section P2904.1 General. Add item #5 to end of section:

"5. The system is integral with the domestic water piping system. See Section P2902.5.4 for protection of separate/independent sprinkler piping systems."

Section P2906.5 Water distribution pipe. Add to end of section, "Use of copper at inaccessible water piping under slabs shall be limited to Type K, with no joints."

Section E3406.3 Minimum size of conductors. Amend first sentence to read, "The minimum size of conductors for feeders and branch circuits shall be 12 AWG copper and 1 AWG aluminum or copper-clad aluminum for current carrying conductors (shall not apply for grounding conductor)."

Section E3601.1 Scope. Add to end of section, "Local utility company installation regulations may exceed/supersede installation requirements of this chapter."

Section E3601.7.3 Metering centers. Add to end of section: "Any Residential Service Panel rated up to 400-amps maximum, with a single meter and maximum 2 disconnects, shall be exempt from requirements of this section. This exemption does not apply to multi-meter service panels."

Section E3604.2.2 Vertical clearance from grade. In item 1, amend 10 feet (3048 mm) to 12 feet 6 inches (3810 mm). In item 2, amend 12 feet (3658 mm) to 12 feet 6 inches (3810 mm).

Section E3607.3.2 Grounded conductor, existing premises. Add exception to section:

"**Exception:** If the Load Center or Panel Board does not have provisions for a Main Disconnect and an approved fastening method, the over current protective device shall have a lock-out device installed."

Section E3702.15 Branch-circuit requirement – summary. Amend 1st sentence to delete **TABLE E3702.15(2)** in its entirety.

TABLE E3702.15(1) [TABLE 210.24(1)] BRANCH-CIRCUIT REQUIREMENTS-SUMMARY. Amend table to delete 14 AWG conductors.

TABLE E3803.1 (TABLE 300.5) – MINIMUM COVER REQUIREMENTS, BURIAL IN INCHES. Amend Column 3 of table to delete Electrical metallic tubing (EMT).

Section E3901.4.2 Island and peninsular countertops and work surfaces. Amend to read:

"Receptacle outlets shall be installed in accordance with the following and Section E3901.4.3:

1. At least one receptacle outlet shall be provided for the first 9 square feet (0.84m2), or fraction thereof, of the countertop or work surface. A receptacle outlet shall be provided for every additional 18 square feet (1.7 m2), or fraction hereof, of the countertop or work surface.

2. At least one receptacle outlet shall be located within 2 feet (600 mm) of the outer end of a peninsular countertop or work surface.

A peninsular countertop shall be measured from the connected perpendicular wall."

Section E3901.4.3 Receptacle outlet location. Add item 4 to section:

4. "Required receptacles shall be located not more than 12 inches (305mm) below the countertop or work surface."

Section E3901.12 HVAC outlet. Amend exception to read:

"**Exception:** A receptacle outlet shall not be required for the servicing of evaporative coolers or rooftop HVAC equipment."

Section E3902 – Ground-fault and arc-fault circuit-interrupter protection. Add exception to section:

"**Exception:** Delete requirement for GFCI protection at all 240-volt (nominal) outlets throughout this section. This exception shall not apply to swimming pool, spa or fountain pump motors."

Section E3902.2 Garage and accessory building receptacles. Add exception to section:

"**Exception:** GFCI protection shall not be required for single receptacle outlets dedicated for a specific use (such as a freezer) and single receptacle outlets for garage door openers."

Create new section, "**Section E3902.11.1 Floor receptacles.** Floor receptacle outlets shall have ground-fault circuit-interrupter protection for personnel."

Section E3902.14 Outdoor outlets. Delete last sentence in exception 3.

Section BB106.1 Air Leakage Testing. (Tiny Homes) Add exception to section:

“**Exception:** The building thermal envelope shall be permitted to comply with the applicable provisions of Chapter 11, as amended.”

CITY OF SAN LUIS
ADMENDMENTS TO 2018 INTERNATIONAL MECHANICAL CODE

Section [A] 101.1 Title. These regulations shall be known as the *Mechanical Code* of the City of San Luis, hereinafter referred to as 'this code.'

> Create a new sub-section, "**Section [A] 101.2.2 Other Codes**. Where a section references the *International Fire Code*, amend to read 'current adopted fire code.' Where a section references the *International Energy Conservation Code,* amend to read 'current adopted energy conservation code.' Where a section references accessibility provisions, it shall be taken to reference Arizona Revised Statutes, Title 41, Chapter 9, Article 8, Public Accommodations and Services, The Arizonans with Disabilities Act, R10-3-401 through R10-3-404, which includes - 28 CFR 35 and 28 CFR 36 and Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG)."

Section [A] 103.1 General. Amend to read, "Development Services Department, Building Safety Division is hereby created and the executive official in charge thereof shall be known as the 'building official.' Amend all sections of this code that reference the 'code official' by replacing to read the 'building official.'"

Section [A] 106.4.4 Extensions. Delete last two sentences of this section.

Section [A] 106.5.1 Work commencing before permit issuance. Any person who commences work on a mechanical system before obtaining the necessary permits shall be subject to the usual permit fee and an additional investigative fee. An investigative fee, in addition to the permit fee, shall be collected whether or not a permit is then or subsequently issued. The investigative fee shall be determined by the building official, based on the circumstances, nature and severity of the infraction. The minimum investigative fee shall be $100 and the maximum shall be an amount up to the same as the fee set forth in City of San Luis Resolution 2306.

Section [A] 106.5.2 Fee Schedule. Amend by adding "As per City of San Luis Resolution 2306"

Section [A] 106.5.3 Fee Refunds. Add to end of section. "The building official shall authorize the refunding of fees as follows:

1. The full amount of any fee paid hereunder which was erroneously paid or collected.

2. Not more than 80 percent of the permit fee paid when no work has been done under a permit issued in accordance with this code.

3. Not more than 80 percent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any plan review effort has been expended.

The building official shall not authorize the refunding of any fee except upon written application filed by the original permittee not later than 180 days after the date of fee payment."

Section [A] 106.6 Emergency repairs. Where equipment replacements and repairs must be performed in an emergency situation, the *permit* application shall be submitted within the next working business day to the building official.

Section [A] 108.4 Violation penalties. Any person who shall violate a provision of this code or shall fail to comply with any of the requirements thereof or who shall erect, install, alter, or repair mechanical work in violation of the *approved construction documents* or directive of the building official, or of a permit or certificate issued under the provision of this code, shall be subject to the penalty and fine described in this Ordinance.

Section [A] 108.5 Stop work orders. Any person who shall continue any work on the system after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine described in this Ordinance.

Section [A] 109.2 Membership of board. The membership of the Building Advisory Board as prescribed in CH 15.05 – Section 15.05.010 through 15.05.070 of the San Luis City Code will be the Board of Appeals.

Sections [A] 109.2.1 through [A] 109.7. Delete sections in their entirety.

Section [BS] 301.16 Flood hazard. For structures located in flood hazard areas, *mechanical systems*, *equipment and appliances* shall be located at or above the elevation required in the adopted city floodplain Ordinances for utilities and attendant *equipment*.

> **Exception:** *Mechanical systems, equipment and appliances* are permitted to be below the elevation required by the adopted city floodplain Ordinances for utilities and attendant equipment, provided that they are designed and installed to prevent water from entering or accumulating within the components and to resist hydrostatic and hydrodynamic loads and stresses, including the effects of buoyancy, during the occurrence of flooding up to such elevation.

Section 303.3 Prohibited locations. Amend Exception #2 to read, “Solid fuel-fired appliances, provided that the room is not a confined space and as long as outdoor *combustion air* is provided.”

Section 304.11 Guards. Add exception to section to read, “Where due to roof size or other constraints the building official may approve alternate means to achieve compliance.”

Section 306.5.1 Sloped roofs. Amend first sentence to read, "Where *appliances*, *equipment*, fans or other components that require service are installed on a roof having a slope of greater than 4 units vertical in 12 units horizontal (33-percent slope) or greater and having an edge more than 30 inches (762 mm) above grade at such edge, a level platform shall be provided on each side of the *appliance or equipment* to which *access* is required for service, repair, or maintenance.”

Section 307.2.1 Condensate disposal. Amend first sentence to read, “Condensate from all cooling and evaporators shall be conveyed from the drain pan outlet to an *approved* sanitary sewer connection, or other *approved* method of condensate disposal designed by a registered design professional.”

Add exceptions to section:

“Exceptions:

1. Condensate from cooling coils and evaporators up to and including (4) ton units may drain into an *approved* bottom disposal pit. The approved bottom disposal pit shall consist of a pit excavated in the earth not less than 24 inches (61 mm) in any dimension completely filled with coarse gravel. The drainpipe shall extend into the pit not less than 6 inches (15 mm) below grade and shall be securely anchored in place. The drain shall not be covered with sod or earth until it has been inspected.

2. *Equipment* provided with a factory, or other *approved*, condensate evaporation device”

Section 1101.6 General. Add to end of section, “Wind socks shall be installed on all industrial facilities utilizing ammonia refrigerant

CITY OF SAN LUIS ADMENDMENTS TO 2018 INTERNATIONAL PLUMBING CODE

Section [A] 101.1 Title. These regulations shall be known as the *International Plumbing Code* of the City of San Luis, hereinafter referred to as 'this code.'

Create a new sub-section, "**Section [A] 101.2.1 Other Codes.** Where a section references the *International Fire Code*, amend to read 'current adopted fire code.' Where a section references the *International Energy Conservation Code*, amend to read 'current adopted energy conservation code.' Where a section references accessibility provisions, it shall be taken to reference Arizona Revised Statutes, Title 41, Chapter 9, Article 8, Public Accommodations and Services, The Arizonans with Disabilities Act, R10-3-401 through R10-3-404, which includes - 28 CFR 35 and 28 CFR 36 and Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG)."

Section [A] 103.1 General. Amend to read, "Development Services Department, Building Safety Division is hereby created and the executive official in charge thereof shall be known as the building official. Amend all sections of this code that reference the 'code official' by replacing to read the *building official.*

Section [A] 106.6.1 Work commencing before permit issuance. Any person who commences work on a plumbing system before obtaining the necessary permits shall be subject to the usual permit fee and an additional investigative fee. An investigative fee, in addition to the permit fee, shall be collected whether or not a permit is then or subsequently issued. The investigative fee shall be determined by the building official, based on the circumstances, nature and severity of the infraction. The minimum investigative fee shall be $100 and the maximum shall be an amount up to the same as the fee set forth in City of San Luis Resolution No, 2306

Section [A] 106.6.2 Fee schedule. As per City of San Luis Resolution 2306.

Section [A] 106.6.3 Fee refunds. Add to end of section "The building official shall authorize the refunding of fees as follows:

1. The full amount of any fee paid hereunder which was erroneously paid or collected.

2. Not more than 80 percent of the permit fee paid when no work has been done under a permit issued in accordance with this code.

3. Not more than 80 percent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any plan review effort has been expended.

<u>The building official shall not authorize the refunding of any fee paid except upon written application filed by the original permittee not later than 180 days after the date of fee payment."</u>

Section [A] 106.7 Emergency repairs. Where equipment replacements and repairs must be performed in an emergency situation, the *permit* application shall be submitted within the next working business day to the building official.

Section [A] 108.4 Violation penalties. Any person who shall violate a provision of this code or shall fail to comply with any of the requirements thereof or who shall erect, install, alter or repair plumbing work in violation of the *approved construction documents* or directive of the building official, or of a permit or certificate issued under the provision of this code, shall be subject to the penalty and fine described in City of San Luis Resolution 2306.

Section [A] 108.5 Stop work orders. Upon notice from the building official, work on any plumbing system that is being done contrary to the provisions of this code or in a dangerous or unsafe manner shall immediately cease. Such notice shall be in writing and shall be given to the owner of the property, or to the owner's agent, or to the person doing the work. The notice shall state the conditions under which work is authorized to resume. Where an emergency exists, the building official shall not be required to give a written notice prior to stopping the work. Any person who shall continue any work in or about the structure after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine described in City of San Luis Resolution 2306.

Section [A] 109.2 Membership of the board. The membership of the Building Board of Appeals, as prescribed in CH 15.05 – Section 15.05.010 through 15.05.070 of City of San Luis Code.

Sections [A] 109.2.1 through [A] 109.7. Delete sections in their entirety.

Section 201.3 Terms defined in other codes. Where terms are not defined in this code and are defined in the *International Building Code*, current adopted Fire Code, *NEC Electrical Code, International Fuel Gas Code or the International Mechanical Code*, such terms shall have the meanings ascribed to them as in those codes.

Section 305.4.1 Sewer depth. Building sewers that connect to private sewage disposal systems shall be a minimum of 12 inches (305 mm) below finished grade at the point of septic tank connection. Building sewers shall be a minimum of 12 inches (305 mm) below grade.

Section 305.8 Tracer wire. Per ARS §40-360, all buried non-metallic piping shall be identified with a minimum #12 gauge solid copper insulated tracer wire securely attached to pipe or wrapped around the pipe. Attachments shall be provided at maximum 20 foot intervals and at each change in direction.

Section [BS] 309.2 Flood hazard. For structures located in flood hazard areas, systems and equipment shall be installed as required by the flood hazard as per City of San Luis floodplain Ordinances.

Section 314.2.1 Condensate disposal. Amend first sentence to read, “Condensate from all cooling and evaporators shall be conveyed from the drain pan outlet to an *approved* sanitary sewer connection, or other *approved* method of condensate disposal designed by a registered design professional.

Add exceptions to section:

Exceptions:

1. Condensate from cooling coils and evaporators up to and including (4) ton units may drain into an *approved* bottom disposal pit. The approved bottom disposal pit shall consist of a pit excavated in the earth not less than 24 inches (61 mm) in any dimension completely filled with coarse gravel. The drainpipe shall extend into the pit not less than 6 inches (15 mm) below grade and shall be securely anchored in place. The drain shall not be covered with sod or earth until it has been inspected.

2. *Equipment* provided with a factory, or other *approved*, condensate evaporation device.”

Section 410.2 Small Occupancies. Amend to read. “In other than Assembly and Educational Occupancies, drinking fountains shall not be required for an occupant load of 25 or fewer.”

Section 605.4 Water Distribution Pipe. Create a new footnote and exception to TABLE 605.4, “a. Copper and copper alloy piping and tubing are prohibited for installation in or on the ground under buildings. Exception: Copper and copper alloy piping and tubing installed in a continuous sleeve consisting of a minimum Schedule 40 ABS or PVC piping.”

Section 608.1 General. Add to end of section, “Where required by the Authority Having Jurisdiction (AHJ), backflow prevention shall comply with City of San Luis requirements.”

Section 712.3.1 Sump pump. “The sump pump capacity and head shall be appropriate to the anticipated use requirements, and for any ‘*public’* or *‘public utilization’* occupancies, as defined in this code, dual pumps or ejectors shall be provided.

Exception: Dual pumps are not required in small, single-tenant buildings where the use of fixtures can be readily restricted or controlled, as determined by the building official”

Section 903.1 Roof extension. Amend to read, “Open vent pipes that extend through a roof shall be terminated not less than 6 inches (153 mm) above the roof. Where a roof is to be used for assembly or as a promenade, observation deck, sunbathing deck or similar purposes, open vent pipes shall terminate not less than 7 feet (2134 mm) above the roof”

Section 1003.2 Approval. Amend first sentence and add sentence, “The size, type, and location of each interceptor and of each separator shall be designed and installed in accordance with the manufacturer's instructions and the requirements of this section based on the anticipated conditions of use, and when located in the City of San Luis jurisdiction, shall also comply with the policies of the Public Works - Waste Water Division. Wastes that do not require treatment or separation shall not be discharged into any interceptor or separator.”

Section 1003.3.1 Grease interceptors and automatic grease removal devices required. Amend to read, “A grease interceptor or automatic grease removal device shall be required to receive the drainage from fixtures and equipment with grease-laden waste located in Food Service Establishments, such as in restaurants, hotel kitchens, hospitals, school kitchens, bars, factory cafeterias and clubs, and multiple mobile food vendor locations. Fixtures and equipment shall include, but not be limited to three-compartment sinks (all three compartments), pot sinks, prerinse sinks; soup kettles or similar devices; wok stations; floor drains or sinks into which kettles are drained; automatic hood wash units and dishwashers without prerinse sinks. Grease interceptors and automatic grease removal devices shall receive waste only from fixtures and equipment that allow fats, oils or grease to be discharged. If a food preparation sink is required by the establishment, a separate sink for this purpose shall be provided, and shall be connected indirectly and shall be connected to the sanitary sewer. Where lack of space or other constraints prevent the installation or replacement of a grease interceptor, one or more grease interceptors shall be permitted to be installed on or above the floor and upstream of an existing grease interceptor.”

Section 1003.3.3 Additives to Grease Interceptors. Dispensing Systems that dispense interceptor performance additives to grease interceptors shall not be installed. Systems that discharge emulsifiers, chemicals or enzymes to grease interceptors shall be prohibited.

Section 1003.3.5 Hydromechanical grease interceptors, fats, oils and greases disposal systems and automatic grease removal devices. Amend first sentence to read, “Hydromechanical grease interceptors: fats, oils and greases disposal systems and automatic grease removal devices shall conform to ASME A112.14.3, ASME A112.14.4, ASME A112.14.6 CSA B481.3 or PDI G101, and when located in the City of San Luis jurisdiction shall also meet the City of San Luis Standards. All new Food Service Establishments shall be required to install at least a 500-gallon outdoor grease interceptor, unless granted a variance by the City of San Luis Utilities Pretreatment Section.”

Section 1003.3.5.1 Grease interceptor capacity. Grease interceptors shall have the volume indicated in TABLE 1003.3.5.1 for the Drainage Fixture Units (DFU) indicated.

Insert TABLE 1003.3.5.1:

TABLE 1003.3.5.1
GREASE INTERCEPTOR SIZING

Drainage Fixture Unit (DFU) (1)	Interceptor Volume (2)
0-8	500 gallons
9-21 (3)	750 gallons
22-35	1,000 gallons
36-90 (3)	1,250 gallons
91-172	1,500 gallons
173-216	2,000 gallons
217-307 (3)	2,500 gallons
308-342	3,000 gallons (4)

Notes:

1. **The maximum allowable DFU's plumbed to the kitchen drain lines that will be connected to the grease interceptor.**
2. **This size is based on: the DFU's, the pipe size; Useful Tables for flow in half-full pipes (ref: Mohinder Nayyar Piping Handbook, 3rd Edition, 1992).**
3. **Based on 30 minutes retention time (ref.) Metcalf & Eddy, Inc. 3rd Ed. Small and Decentralized Wastewater Management Systems, 1998). Rounded up to nominal interceptor volume.**
4. **No Food Service Establishment will be permitted to install a grease interceptor in excess of 3000 gallons. Applications where sizing calculation dictate the installation of a grease interceptor larger than 3000 gallons multiple interceptors shall be installed, in series, of sufficient size, to meet the requirement of the calculated retention volume.**

Section 1003.3.9 Grease Interceptor Variances. Any establishment wishing to seek a variance from the 500-gallon minimum grease interceptor requirement may submit a Variance for Cause Request to the Utilities Pretreatment Section.

Section 1106.1 General. Amend to read, "The size of vertical conductors and leaders. building *storm drains*, building storm *sewers* and any horizontal branches of such drains or *sewers* shall be based on a minimum hourly rainfall rate of two and one-half (2.5) inches per hour."

Section 1106.2 Size of storm drain piping. Add to end of section, "The minimum size storm drain pipe shall be 3 inch pipe size."

Section 1106.3 Vertical leader sizing. Add to end of section, “The minimum size vertical leader shall be 3 inch pipe size.”

Section 1108.3 Sizing of secondary drains. Add to end of section, “The secondary drain or overflow drain inlet shall be 2” (51 mm) above the primary drain inlet.”

Section 1109 Combined Sanitary and Storm System. Delete section in its entirety.

CITY OF SAN LUIS
ADMENDMENTS TO 2024
INTERNATIONAL PROPERTY
MAINTENANCE CODE

Section [A] 101.1 Title. These regulations shall be known as the International Property Maintenance Code of the City of San Luis, hereinafter referred to as 'this code.'

Section [A] 102.3 Application of other codes. Amend "International Zoning Code" in last sentence to "San Luis City Code Title 18 Zoning."

Section [A] 103.1 General. The Development Services Department, Building Safety Division is hereby created and the executive official in charge thereof shall be known as the building official.

Section [A] 103.1.1. Amend All sections of this code to substitute 'building official' for the term 'code official.'

Section [A] 107.3 Prosecution of violation. Amend First sentence to read, "Any person failing to comply with a notice of violation or order served in accordance with Section 107 shall be deemed guilty of a civil infraction [SLCC 15.10.990 (A)]."

Section [A] 107.4 Violation penalties. Any person who shall violate a provision of this code, or fail to comply therewith, or with any of the requirements thereof, shall be prosecuted within the limits provided by state or local laws and shall be subject to the penalty and fine described in this ordinance. Each day that a violation continues after due notice has been served shall be deemed a separate offense.

Section [A] 106.1 Membership of the board. The membership of the Residential and Commercial Advisory Board, as prescribed in Section 15.05.010 of the San Luis City Code, will be the Board of Appeals for both Residential (one-and two-family dwellings) and Commercial appeals.

Delete the following sections in their entirety:

Section [A] 106.2 Limitations of Authority
Section [A] 106.3 Qualifications
Section [A] 106.4 Administration

Section [A] 108.2 Issuance. Insert the following between the first and second sentences, "In absence of anyone present on site, the order shall be conspicuously posted on the *premises.*"

Section [A] 108.4 Failure to comply. Any person who shall continue any work after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine as described in this ordinance.

Section 302.4 Weeds. Amend first sentence to read, "All premises and exterior property shall be maintained free from weeds or plant growth not properly controlled."

Section 303.2 Enclosures. Amend first sentence to read, "All swimming pools, hot tubs and spas, containing water more than 24 inches (610 mm) in depth shall be completely

surrounded by a fence or barrier at least 60 inches (1524 mm) in height above the finished ground level measured on the side of the barrier away from the pool."

Section 304.14 Insect Screens. Delete section in its entirety

TABLE 404.5 −MINIMUM AREA REQUIREMENTS. Add exception as footnote "c" to table:

> "c. **Exception.** The minimum area requirements do not apply to immediate family members. Immediate family is defined to include parent or grandparent (including in-law and step); child or grandchild (including adopted, foster, step or legal ward) regardless of age; sibling (including in-law, step, half) and spouse."

Section 602.3 Heat Supply. Amend first sentence to read, "Every owner and operator of any building who rents, leases or lets one or more dwelling units or sleeping units on terms, either expressed or implied, to furnish heat to the occupants thereof shall supply heat to maintain a minimum temperature of 68°F (20°C) in all habitable rooms, bathrooms and toilet rooms."

Section 602.4 Occupiable work spaces. Amend first sentence to read, "Indoor occupiable workspaces shall be supplied with heat to maintain a minimum temperature of 65°F (18°C) during the period the spaces are occupied."

Section 603.1 Mechanical Equipment and appliances. Add sentence at end of section to read, "Existing mechanical cooling unit shall be maintained in proper working order."

Chapter 8 referenced standards. Delete reference to San Luis City Code Title 18 Zoning.

Replace **APPENDIX A** as follows:

APPENDIX A

CITY OF SAN LUIS BOARDING REQUIRMENTS

A101
GENERAL

A102
MATERIALS

A102.2 Boarding framing material. Boarding framing material shall be the clear boarding bracing system (polyethylene) minimum 1-inch (25.4 mm) thick.

A102.3 Boarding fasteners.

Option 1 - Boarding fasteners shall be minimum 3/8-inch (9.5 mm) diameter carriage bolts of such a length as required to penetrate the assembly and as required to adequately attach the washers and nuts. Washers and nuts shall comply with the International Building Code.

Option 2 - Boarding fasteners shall be minimum #8 Torx screw, minimum 2-inch (51 mm) long, alternating every 6 inches (152 mm) on center into existing 2-inch nominal king stud or trimmer (if king studs do not exist, nominal 2x material shall be added around opening.).

A103
INSTALLATION

A103.1 Boarding installation. The boarding installation shall be in accordance with Figures A103.1(1) and A103.1(2) and Sections A103.2 through A103.5.

A103.2 Boarding sheet material. The boarding sheet material shall be cut to fit the door or window opening neatly or shall be cut to provide an equal overlap at the perimeter of the door or window.

A103.3 Windows.

Option 1. The window shall be opened to allow the carriage bolt to pass through or the window sash shall be removed and stored. The 2-inch by 4-inch (51 mm by 102 mm) strong back framing material shall be cut minimum 2 inches (51 mm) wider than the window opening and shall be placed on the inside of the window opening 6 inches (152 mm) minimum above the bottom and below the top of the window opening. The framing and boarding shall be predrilled. The assembly shall be aligned, and the bolts, washers and nuts shall be installed and secured.

Option 2. Boarding material can overlap door opening to be secured with screws to the existing king stud and trimmer. Boarding sheet material shall be secured with screws (min. #8 Torx screw) alternating every 6 inches (152 mm) on center.

A103.4 Door walls.

Option 1 - The door opening shall be framed with minimum 2-inch by 4-inch (51 mm by 102 mm) framing material secured at the entire perimeter and vertical members at a maximum of 24 inches (610 mm) on center. Blocking shall also be secured at a maximum of 48 inches (1219 mm) on center vertically.

Option 2 - Boarding material can overlap door opening to be secured with screws to the existing king stud and trimmer Boarding sheet material shall be secured with screws (min #8 Torx screw) alternating every 6 inches (152 mm) on center.

A103.5 Doors. Doors shall be secured by the same method as for windows or door openings. One door to the structure shall be available for authorized entry and shall be secured and locked in an approved manner.

CITY OF SAN LUIS ADMENDMENTS TO 2020 INTERNATIONAL ELECTRICAL CODE

(A) The requirements of the most current Arizona Public Service (APS) Electrical Service Manual shall supersede the requirements of the NEC when the APS requirements are more restrictive.

(B) Where reference is made to the Fire Code it shall mean the current adopted Fire Code.

(C) Article 210.8 Ground-Fault Circuit-Interrupter for Personnel. (F) Outdoor Outlets. Add 2 additional exceptions to section, as follows:

2. Air conditioning equipment where an approved grounding lug and an additional properly grounding conductor is attached to the equipment chassis

3. Air conditioning equipment located on roofs or within locked and maintained equipment enclosures that are not accessible to the public.

(D) Article 311.12(A) Minimum Size of Conductors. Amend to read, “The minimum size of conductors shall be as shown in TABLE 311.12(A). Whether solid or stranded, conductors, other than signal or control wiring, shall not be smaller than #12 Copper or #1 Aluminum or Copper-Clad Aluminum for current carrying conductors.”

(E) Amend TABLE 311.12(A) as follows:

TABLE 311.12(A) MINIMUM SIZE OF CONDUCTORS

Minimum Conductor Size (AWG)

Conductor Voltage Rating	Aluminum or Copper-Clad	
0-2000	12	1
2001-8000	8	1
8001-15,000	2	1
15,001-28,000	1	1
28,001-35,000	1/0	1/0
(Volts)	Copper	Aluminum

(F) Article 334.10 Uses Permitted. Amend to read, “Type NM and Type NMC, cables shall be permitted to be used in residential Group R-3 and their related U structures. Type NM and Type NMC, cables shall be permitted to be used in Residential Group R--1, Residential Group R-2, Institutional Group I-1, Residential Group R-4 and their related U structures, for branch circuits only. The branch circuits shall serve only one residential unit and shall originate in a panel or junction box located on or within the unit served.”

(G) Article 394.10 Uses Permitted. Use of Concealed knob-and tube wiring shall be limited to the maintenance and repair of existing installation. No knob-and-tube wiring shall be extended or otherwise altered to provide additional points of utilization or used to establish new circuits.

(H) Article 338.10 Uses Permitted (A) Service Entrance conductors. “Type SE and USE cable shall not be used as service-entrance conductors.”

CITY OF SAN LUIS
ADMENDMENTS TO 2018 INTERNATIONAL FUEL AND GAS CODE

Section [A] 101.1 Title. These regulations shall be known as the *Fuel Gas Code* of the City of San Luis, hereinafter referred to as 'this code.'

> Create a new sub-section, "**Section [A] 101.2.6 Other Codes.** Where a section references the *International Fire Code*, amend to read 'current adopted fire code.' Where a section references the *International Energy Conservation Code*, amend to read 'current adopted energy conservation code.' Where a section references accessibility provisions, it shall be taken to reference Arizona Revised Statutes, Title 41, Chapter 9, Article 8, Public Accommodations and Services, The Arizonans with Disabilities Act, R10-3-401 through R10-3-404, which includes - 28 CFR 35 and 28 CFR 36 and Americans with Disabilities Act Accessibility Guidelines for Buildings and Facilities (ADAAG)."

Section [A] 103.1 General. Amend to read, "Development Services Department, Building Safety Division is hereby created and the executive official in charge thereof shall be known as the building official. Amend all sections of this code that reference the 'code official' by replacing to read the 'building official.'"

Section [A] 106.6.1 Work commencing before permit issuance. Any person who commences work on an installation before obtaining the necessary permits shall be subject to the usual permit fee and an additional investigative fee. An investigative fee, in addition to the permit fee, shall be collected whether or not a permit is then or subsequently issued. The investigative fee shall be determined by the building official, based on the circumstances, nature and severity of the infraction. The minimum investigative fee shall be $100 and the maximum shall be an amount up to the same as the fee set forth in City of San Luis Resolution 2306.

Section [A] 106.6.2 Fee schedule. Amend by adding "As per City of San Luis Resolution 2306"

Section [A] 106.6.3 Fee refunds. Add to end of section, "The building official shall authorize the refunding of fees as follows:

1. The full amount of any fee paid hereunder which was erroneously paid or collected.
2. Not more than 80 percent of the permit fee paid when no work has been done under a permit issued in accordance with this code.
3. Not more than 80 percent of the plan review fee paid when an application for a permit for which a plan review fee has been paid is withdrawn or canceled before any plan review effort has been expended.

The building official shall not authorize the refunding of any fee except upon written application filed by the original permittee not later than 180 days after the date of fee payment."

Section [A] 108.4 Violation penalties. Any person who shall violate a provision of this code, fail to comply with any of the requirements thereof or erect, install, alter or repair

work in violation of the *approved construction documents* or directive of the building official, or of a permit or certificate issued under the provision of this code, shall be subject to the penalty and fine described in this Ordinance.

Section [A] 108.5 Stop work orders. Upon notice from the building official that work is being done contrary to the provisions of this code or in a dangerous or unsafe manner, such work shall immediately cease. Such notice shall be in writing and shall be given to the owner of the property, the owner's agent, or to the person doing the work. The notice shall state the conditions under which work is authorized to resume. Where an emergency exists, the building official shall not be required to give a written notice prior to stopping the work. Any person who shall continue any work on the system after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to the penalty and fine described in this Ordinance.

Section [A] 109.2 Membership of the board. The membership of the Building Advisory Board, as prescribed in CH 15.05 Sections 15.05.010 through 15.05.070 of the San Luis City Code, will be the Board of Appeals.

Sections [A] 109.2.1 through [A] 109.7. Delete sections in their entirety.

Section [BS] 301.11 Flood hazard. For structures located in flood hazard areas, the appliance, equipment and system installations regulated by this code shall be located and installed as required by the adopted city floodplain Ordinances for utilities and attendant equipment.

> **Exception:** The appliance, equipment and system installations regulated by this code are permitted to be located below the elevation required by the city adopted floodplain Ordinances for utilities and attendant equipment provided that they are designed and installed to prevent water from entering or accumulating within the components and to resist hydrostatic and hydrodynamic loads and stresses, including the effects of buoyancy, during the occurrence of flooding to such elevation.

Section [M] 306.5.1 Sloped roofs. Amend first sentence to read, “Where appliances, equipment, fans or other components that require service are installed on a roof having a slope of greater than 4 units vertical in 12 units horizontal (33-percent slope) or greater and having an edge more than 30 inches (762 mm) above grade at such edge, a level platform shall be provided on each side of the *appliance or equipment* to which *access* is required for service, repair, or maintenance.”

Section 307.1 Evaporators and cooling coils. Condensate drainage systems shall be provided for *equipment* and appliances containing evaporators and cooling coils in accordance with the *International Mechanical Code* and its amendments.

Section 402.2 Maximum gas demand. Add to end of section. “Where an input rating is not indicated, the gas supplier, *appliance* manufacturer or a qualified agency shall be

contacted, or the rating from TABLE 402.2 may be used as a general guide for estimating the volumetric flow rate of gas to be supplied."

Insert TABLE 402.2:

TABLE 402.2
Approximate Gas Input For Typical Appliances

APPLIANCE	INPUT BTU/H
Space Heating Units	
Hydronic Boiler	
Single family	100,000
Multifamily, per unit	60,000
Warm-air furnace	
Single family	100,000
Multifamily, per unit	60,000
Space and Water Heating Units	
Hydronic boiler	
Single family	120,000
Multifamily, per unit	75,000
Water Heating Appliances	
Water heater, automatic instantaneous	
Capacity at 2 gal./minute	142,800
Capacity at 4 gal./minute	285,000
Capacity at 6 gal./minute	428,400
Water heater, automatic storage, 30 to 40- gal tank	35,000
Water heater, automatic storage, 50-gal. tank	50,000
Water heater, domestic circulating or sidearm	35,000
Cooking Appliances	
Built-in oven or broiler unit, domestic	25,000
Built-in top unit, domestic	40,000
Range, free-standing, domestic	65,000
Other Appliances	
Barbecue	40,000
Clothes dryer, Type 1 (domestic)	35,000
Gas fireplace, direct-vent	40,000
Gas light	2,500
Gas *log*	80,000
Refrigerator	3,000

Section 403.4.3 Copper and copper alloy. Amend second sentence to read, "Copper and copper alloy pipe shall not be used for natural gas piping, but is permitted for propane gas piping."

Section 403.5.2 Copper and copper alloy tubing. Amend second sentence to read, “Copper and copper alloy pipe shall not be used for natural gas piping. but is permitted for propane gas piping.”

Section 404.5 Fittings in concealed locations. Add to end of section, “Union fittings are not permitted in concealed locations.”

Section 404.17.3 Tracer. Amend last sentence to read, “The tracer wire size shall not be less than #12 gauge solid copper insulated tracer wire securely attached to pipe or wrapped around the pipe. Attachments shall be provided at maximum 20 foot intervals and at each change in direction.”

AGENDA ITEM REVIEW FORM

Regular City Council Meeting **7. H.**

Meeting Date: 06/10/2026

Department Head: Jose A. Guzman, Director of Development Services, Development Services

Submitted By: Jose A. Guzman, Director of Development Services, Development Services

Action Requested: Motion
Ordinance

ITEM:

Discussion and possible action on any and all matters regarding Ordinance No. 485. An Ordinance of the Mayor and City Council of the City of San Luis, Arizona, amending San Luis City Code, Chapter 15.10 Building Regulations to adopt the 2024 International Building Code, 2024 International Residential Code, 2018 International Mechanical Code, 2018 International Plumbing Code, 2024 International Property Maintenance Code, 2020 National Electrical Code, 2018 International Fuel Gas Code and the City of San Luis amendments to each of said Codes; Renumbering Section 15.10.110 "Construction Debris" to 15.10.120; Renumbering Section 15.10.120 "Adminsitrative Authority to 15.10.130; Renumbering Section 15.10.130 "Additional Regulations" to 15.10.140; Renumbering Section 15.10.140 "Conflict" to 15.10.150; providing for a September 14, 2026 effective date; repealing any conflicting provisions; and providing for severability. **(Joaquin Campa, Building Official)**

A. Action on reading of Ordinance No. 485 by title only
B. Action on Ordinance No. 485

SUMMARY:

Building codes are an important part of protecting public health, safety, and welfare. They provide minimum standards for construction, occupancy, property maintenance, electrical work, plumbing, mechanical systems, and related building activities.

This proposed Ordinance will amend Chapter 15.10 of the San Luis City Code to adopt updated construction and property maintenance codes, along with the City of San Luis local amendments to each code.

The proposed Ordinance adopts the following codes:

- 2024 International Building Code
- 2024 International Residential Code
- 2018 International Mechanical Code
- 2018 International Plumbing Code
- 2024 International Property Maintenance Code
- 2020 National Electrical Code
- 2018 International Fuel Gas Code

The adoption of these codes will help ensure that the city's building regulations remain current and consistent with accepted construction, safety, and property maintenance standards. The updates also help keep the city generally aligned with neighboring jurisdictions, which assists contractors, design professionals, and staff when working on projects within the region.

The International Fuel Gas Code was not previously adopted by the city and will be newly adopted as part of this ordinance. The remaining codes are being updated or carried forward as appropriate, with local amendments included to address city-specific needs and procedures. The ordinance provides that September 14, 2026, will be the effective date, giving builders and developers time to adjust.

RECOMMENDATION / SUGGESTED MOTION:

A. I MOVE TO APPROVE THE READING OF ORDINANCE NO. 485 BY TITLE ONLY.
(CITY CLERK TO READ ORDINANCE NO. 485 BY TITLE ONLY)
B. I MOVE TO APPROVE AND ADOPT ORDINANCE NO. 485, AS PRESENTED.

OFFICE OF THE
MAYOR
CITY OF SAN LUIS

Ordinance

No. 485

AN ORDINANCE OF THE MAYOR AND CITY COUNCIL OF THE CITY OF SAN LUIS, ARIZONA, AMENDING SAN LUIS CITY CODE, CHAPTER 15.10 BUILDING REGULATIONS TO ADOPT THE 2024 INTERNATIONAL BUILDING CODE, 2024 INTERNATIONAL RESIDENTIAL CODE, 2018 INTERNATIONAL MECHANICAL CODE, 2018 INTERNATIONAL PLUMBING CODE, 2024 INTERNATIONAL PROPERTY MAINTENANCE CODE, 2020 NATIONAL ELECTRICAL CODE, 2018 INTERNATIONAL FUEL GAS CODE AND THE CITY OF SAN LUIS AMENDMENTS TO EACH OF SAID CODES; RENUMBERING SECTION 15.10.110 "CONSTRUCTION DEBRIS" TO 15.10.120; RENUMBERING SECTION 15.10.120 "ADMINISTRATIVE AUTHORITY" TO 15.10.130; RENUMBERING SECTION 15.10.130 "ADDITIONAL REGULATIONS" TO 15.10.140; RENUMBERING SECTION 15.10.140 "CONFLICT" TO 15.10.150; PROVIDING FOR A SEPTEMBER 14, 2026 EFFECTIVE DATE; REPEALING ANY CONFLICTING PROVISIONS AND PROVIDING FOR SEVERABILITY.

BE IT ORDAINED by the Mayor and City Council of the City of San Luis, Arizona:

Section 1: Chapter 15.10 Building regulations of the San Luis City Code is hereby amended to read as follows:

Section 15.10.010 Adoption of International Building Code 2024.

That certain document entitled 2024 International Building Code, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that certain document entitled City of San Luis Amendments to the 2024 International Building Code, three copies of which are on file in the office of City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 15.10.020 Adoption of International Residential Code 2024.

That certain document entitled 2024 International Residential Code for One- and Two-Family Dwellings, three copies of which are on file in the office of the City Clerk of the

City of San Luis together with that certain document entitled City of San Luis Amendments to the 2024 International Residential Code for One- and Two-Family Dwellings, three copies of which are on file in the office of the City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code

Section 15.10.040 Adoption of International Mechanical Code 2018.

That certain document entitled 2018 International Mechanical Code, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that certain document entitled City of San Luis Amendments to 2018 International Mechanical Code, three copies of which are on file in the office of the City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 15.10.050 Adoption of International Plumbing Code 2018.

That certain document entitled 2018 International Plumbing Code, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that document entitled City of San Luis Amendments to 2018 International Plumbing Code, three copies of which are on file in the office of the City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 15.10.060 Adoption of International Property Maintenance Code 2024.

That certain document entitled 2024 International Property Maintenance Code, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that certain document entitled City of San Luis Amendments to 2024 International Property Maintenance Code, three copies of which are on file in the office of the City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 15.10.070 Adoption of National Electrical Code 2020.

That certain document entitled National Electrical Code, 2020 Edition, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that certain document entitled City of San Luis Amendments to National Electrical Code, 2020 Edition, three copies of which are on file in the office of the City Clerk,

which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 15.10.110 Adoption of International Fuel Gas Code 2018

That certain document entitled 2024 International Fuel Gas Code, three copies of which are on file in the office of the City Clerk of the City of San Luis, Arizona, together with that certain document entitled City of San Luis Amendments to 2018 International Fuel Gas Code, three copies of which are on file in the office of the City Clerk, which documents were made a public record of the City of San Luis, Arizona, are hereby referred to, adopted and made a part hereof as if fully set out in this Code.

Section 2: Chapter 15.10 Building Regulations of the San Luis City Code is hereby amended to renumber Section 15.10.110 titled "Construction Debris" to 15.10.120, Section 15.10.120 titled "Administrative Authority" to 15.10.130, Section 15.10.130 titled "Additional Regulations" to 15.10.140, and Section 15.10.140 titled "Conflict" to 15.10.150.

Section 3 The effective date of the Codes adopted herein pursuant to Section 1 above shall become effective on and after September 14, 2026. All building codes and regulations that are currently in force shall remain in force, unless in conflict with the codes adopted hereinabove, and those that are in conflict shall remain in force until September 14, 2026, at which time in the event of a conflict arises between the provisions of this ordinance and any resolution, other ordinance, regulation, or policy of the City of San Luis, the conflicting provisions are repealed, amended, superseded, and replaced, and this Ordinance shall govern.

Section 4: If any section, subsection, sentence, clause, phrase, or portion of this Ordinance is held to be invalid or unconstitutional by the final decision of any court of competent jurisdiction or operation of law by legislation, such decision or law shall not affect the validity of the remaining portion of this Ordinance.

PASSED, ADOPTED, and APPROVED by the Mayor and City Council of the City of San Luis, Yuma County, Arizona, this 10th day of June 2026.

AGENDA ITEM REVIEW FORM

Regular City Council Meeting **7. I.**

Meeting Date: 06/10/2026

Department Head: Jose A. Guzman, Director of Development Services, Development Services

Submitted By: Jose A. Guzman, Director of Development Services, Development Services

Action Requested: Motion
Resolution

ITEM:

Discussion and possible action on any and all matters regarding Resolution No. 2402 - Aerial Imagery Update. A Resolution of the Mayor and City Council of the City of San Luis, Arizona, approving and adopting an Intergovernmental Agreement with Yuma County for the Yuma Region-Imagery Acquisition Consortium Project. **(Jose A. Guzman, Director of Development Services)**

SUMMARY:

Yuma County has coordinated a regional aerial imagery consortium for several years to provide updated aerial imagery for participating jurisdictions and agencies throughout the region. The City of San Luis has participated in this effort in the past, including the imagery updates completed in 2017 and 2022.

Participation in the consortium allows the city to receive updated, high-quality aerial imagery at a shared regional cost rather than contracting for the service independently. This provides a more cost-effective way for the city to maintain current imagery and mapping resources.

The city continues to experience growth and development. Having current imagery helps staff review existing conditions, identify changes in development patterns, verify infrastructure locations, evaluate properties, and support public safety, planning, and other city operations.

For the current imagery cycle, Yuma County has provided the final Intergovernmental Agreement for the city's participation in the County Region-Imagery Consortium. The aerial imagery flight for this cycle was completed in December 2025.

The city's share for this cycle is $20,204.00, which is a one-time cost for the current imagery update.

This Resolution authorizes approval of the Intergovernmental Agreement with Yuma County and allows the city to proceed with its participation in the current imagery consortium cycle.

RECOMMENDATION / SUGGESTED MOTION:

I MOVE TO APPROVE AND ADOPT RESOLUTION NO. 2402.

Resolution No. 2402

OFFICE OF THE
MAYOR
CITY OF SAN LUIS

Resolution

No. 2402

A RESOLUTION OF THE MAYOR AND CITY COUNCIL OF THE CITY OF SAN LUIS, ARIZONA, APPROVING AND ADOPTING AN INTERGOVERNMENTAL AGREEMENT WITH YUMA COUNTY FOR THE YUMA REGION-IMAGERY ACQUISITION CONSORTIUM PROJECT.

WHEREAS, Yuma County coordinates the County Region-Imagery Consortium to obtain updated aerial imagery for participating jurisdictions and agencies; and

WHEREAS, the City of San Luis has previously participated in regional imagery acquisition efforts and continues to benefit from updated aerial imagery; and

WHEREAS, participation in the Consortium allows the City to obtain updated aerial imagery at a shared regional cost; and

WHEREAS, the City is authorized to enter into this Agreement pursuant to A.R.S. Title 11, Chapter 7, Article 3 (A.R.S. § 11-952 et seq.); and

NOW, THEREFORE, BE IT RESOLVED by the Mayor and City Council of the City of San Luis as follows:

SECTION 1: The Intergovernmental Agreement with Yuma County for the County Region-Imagery Consortium, as attached hereto as Exhibit "A", is hereby approved.

SECTION 2: The City Manager, or designee, is hereby authorized and directed to enter into said agreement on behalf of the City of San Luis and take any and all actions as may be necessary to put the agreement into effect.

PASSED, APPROVED AND ADOPTED by the Mayor and City Council of the City of San Luis, Arizona, this **10th** day of **June** 2026.

INTERGOVERNMENTAL AGREEMENT
BETWEEN
YUMA COUNTY AND CITY OF YUMA, CITY OF SAN LUIS, CITY OF SOMERTON, AND TOWN OF WELLTON
YUMA REGION – IMAGERY ACQUISITION CONSORTIUM PROJECT

This Intergovernmental Agreement ("Agreement" or "IGA") is entered into this _____ day of _____, _____, ("Effective Date") between Yuma County ("County"), the City of Yuma ("Yuma"), the City of San Luis ("San Luis"), the City of Somerton ("Somerton"), and the Town of Wellton ("Wellton"). The County, Yuma, San Luis, Somerton, and Wellton are hereinafter referred to individually as a "Party" and collectively as the "Parties". Yuma, San Luis, Somerton, and Wellton are hereinafter referred to collectively as the "Participating Agencies" and each individually as a "Participating Agency".

RECITALS

1. In January 2017, the County entered into a Memorandum of Understanding with certain Participating Agencies to form the Yuma Region – Imagery Acquisition Consortium Project ("Project"), to pool resources for the acquisition of updated oblique and orthogonal aerial imagery from Pictometry.

2. On November 17, 2025, the County executed an agreement with Pictometry International Corp., dba EagleView, to acquire digital oblique and orthogonal aerial imagery of specific areas within Yuma County.

3. The Participating Agencies have expressed a continued interest in joining the Project and gaining access to the digital oblique and orthogonal aerial imagery produced by EagleView.

4. The County is authorized to enter into this Agreement pursuant to A.R.S. § 11-951, et. seq. Yuma is authorized to enter into this Agreement pursuant to Article III, Section 12 of the Charter of the City of Yuma. San Luis is authorized to enter into this Agreement pursuant to A.R.S. § § 11-951, et. seq. Somerton is authorized to enter into this Agreement pursuant to Somerton City Code Section 3-5-193. Wellton is authorized to enter into this Agreement pursuant to A.R.S. § 11-951, et. seq.

NOW THEREFORE, in consideration of the mutual promises set forth herein, the County and each Participating Agency agree to the following terms and conditions:

I. PURPOSE OF THE PROJECT. The purpose of the Project is to share the cost of the digital imagery produced by Pictometry amongst the Participating Entities.

II. TERM; TERMINATION. This Agreement shall be for a term of five (5) years starting on the Effective Date ("Initial Term"). This Agreement may be renewed for three (3) additional (5) year periods upon written request by a Participating Agency no less than ninety (90) days prior to the date of expiration of the Initial Term. The decision to renew shall be through mutual written agreement by the County and the Participating Agency.

This Agreement may be terminated by the County or a Participating Agency, with or without cause, upon sixty (60) days' written notice to the other party. Unless this Agreement is terminated as to all Parties by County or by all Participating Agencies, the Agreement shall remain in full force and effect for the remainder of the non-terminated Parties.

III. NON-DISCRIMINATION. The Parties shall comply with the Civil Rights Act of 1964, as amended, the Age Discrimination in Employment Act, and State executive order No. 2009-09 which mandate that all persons, regardless of race, color, religion, sex, age, national origin or political affiliation, shall have equal access to employment opportunities. The Parties shall comply with the Rehabilitation Act of 1973, as amended, which prohibits discrimination in the employment or advancement in employment of qualified persons because of physical or mental handicap, and the Americans with Disabilities Act.

IV. INDEMNIFICATION. Each party (as "Indemnitor") agrees to defend, indemnify, and hold harmless the other parties (as "Indemnitees") from and against any and all claims, losses, liability, costs, or expenses (including reasonable attorney's fees) (hereinafter collectively referred to as "Claims") arising out of bodily injury of any person (including death) or property damage, but only to the extent that such Claims which result in vicarious/derivative liability to an Indemnitee are caused by the act, omission, negligence, misconduct, or other fault of the Indemnitor, its officers, officials, agents, employee, volunteers.

V. ENTIRE AGREEMENT. This Agreement constitutes the entire understanding between the Parties with respect to the subject matter thereof. Any amendment or modification of this Agreement shall be made only by a written instrument executed by authorized representatives of the Parties.

VI. SEVERABILITY. The Parties agree that should any part of this Agreement be held to be invalid or void, the remainder of the Agreement shall remain in full force and effect and shall be binding upon the Parties.

VII. GOVERNING LAW AND VENUE. This Agreement shall be governed by the laws of the State of Arizona, as to validity, interpretation, and performance. Any and all suits for any and every breach of this Agreement, or other judicial proceeding for the enforcement or interpretation of this Agreement shall be instituted and maintained in Superior Court in Yuma County, Arizona. Any action to enforce any provision of this Agreement or to obtain any remedy with respect to this Agreement shall be brought exclusively in the Superior Court in Yuma County, Arizona (or, as may be appropriate, in the United States District Court for the District of Arizona, if, and only if, the Superior Court lacks jurisdiction over

such action). The Parties expressly and irrevocably consent to the exclusive jurisdiction and venue of such courts and expressly waive the right to transfer or remove any such action.

VIII. CONFLICT OF INTEREST. This Agreement is subject to cancellation pursuant to A.R.S. § 38-511, the pertinent provisions of which are incorporated herein.

IX. NOTICES. All notices, requests for payment, or other correspondence between the Parties regarding this Agreement shall be mailed or delivered to the respective Parties at the addresses set forth below or at such alternate address as may be specified in writing:

Yuma County
ITS Chief Information Officer
2717 S. Avenue B

P.O. Box 67
Wellton, Arizona 85356
(928) 785-3348

X. ASSIGNMENT. This contract is not assignable by the County or any Participating Agency unless all Parties mutually consent otherwise in writing. The requirements of this contract are binding upon the heirs, executors, administrators, successors, and assigns of all Parties.

XI. NO PARTNERSHIP. Nothing in this Agreement constitutes a partnership or joint venture between the Parties and no party is the principal or agent of the other.

XII. RIGHTS/OBLIGATIONS OF PARTIES ONLY. The terms of this Agreement are intended only to define the respective rights and obligations of the Parties. This Agreement shall not create any rights or duties in favor of any potential third-party beneficiary or other person, agency, or organization.

XIII. PROVISIONS REQUIRED BY LAW. Each and every provision of law and any clause required by law to be in the Agreement will be read and enforced as though it were included herein and, if through mistake or otherwise any such provision is not inserted, or is not

correctly inserted, then upon the application of either Party, the Agreement will promptly be physically amended to make such insertion or correction.

XIV. OBLIGATIONS OF THE COUNTY.

a. The County will deliver to each Participating Agency a 3-Terabyte external hard drive containing the 2025 digital imagery library previously purchased by the County from Pictometry immediately upon data availability from Pictometry and the receipt of the payment from the Participating Agencies.

b. The County will individually identify each Participating Agency as an "Authorized user" of EagleView Explorer Web Viewer.

XV. OBLIGATIONS OF THE PARTICIPATING AGENCIES.

a. To obtain possession of and access to the 2025 digital imagery library and supporting EagleView Explorer Web Viewer produced by EagleView and previously delivered to the County, each Participating Agency agrees to pay the County the following sums:

i. Yuma agrees to pay County the sum of $55,361

ii. San Luis agrees to pay County the sum of $20,204

iii. Somerton agrees to pay County the sum of $10,931

iv. Wellton agrees to pay County the sum of $10,842

b. Payment shall be due within thirty (30) days following full execution of this Agreement by the Participating Agency and the County. Prior to receiving access to the digital imagery library, EagleView Explorer Web Viewer, or any associated data or services, each Participating Agency shall deliver payment to Yuma County.

All payments shall be made by check payable to "Yuma County" and delivered to:

Yuma County Information Technology Services – GIS
Attn: Daniel Cruz
2717 South Avenue B
Yuma, Arizona 85364

c. Before any data from the digital imagery libraries is shared with any local or external agency other than the Parties, all Parties must agree in writing. Although it will have access to the data, each Participating Agency agrees that County will act as the data custodian to control and distribute the digital imagery library to any local or external agency upon agreement of all Parties.

d. Each Participating Agency agrees to be bound by the Standard Terms and Conditions as set forth in the November 17, 2025, Master Agreement between Pictometry International Corp. and Yuma County, AZ, as set forth in Appendix 1 hereto, and incorporated herein by this reference.

MASTER SERVICES AGREEMENT

This Master Services Agreement ("Agreement") is entered into as of the date of last signature below (the "Effective Date") by and between the Customer identified above ("Customer") and Pictometry International Corp. dba EagleView, a corporation formed under the laws of the State of Delaware, with a place of business at 25 Methodist Hill Drive, Rochester, NY 14623 ("EagleView"). Customer and EagleView may be referred to individually as "Party" and, collectively, as "Parties." EagleView will provide the Products and Services in accordance with and subject to the conditions of this Agreement during the applicable Term.

GENERAL TERMS AND CONDITIONS

1. DEFINITIONS

1.1. **"Account"** means an account created for Customer by EagleView for the purpose of providing access to the Products and Services.

1.2. "**Activation**" means the point in time when Customer has access to an Account and the Products and Services are available to Customer.

1.3. **"Authorized User"** means: (i) any employee or elected or appointed official of the Customer authorized by Customer to use the Products and Services; (ii) any additional users as may be defined in an Order Form (such as governmental subdivisions and their employees or elected or appointed officials) all of whom are considered to be agents of Customer for the purposes of Section 1.3; or (iii) a contractor of Customer, so long as Customer gives written notice of its intent to use such contractor to EagleView prior to being granted access to the Products and Services and, unless EagleView expressly waives such requirement for any individual, has entered into a written agreement with EagleView authorizing such access.

1.4. **"Confidential Information"** means any non-public information that is identified as or would be reasonably understood to be confidential and/or proprietary as disclosed by a Party ("Discloser") to another Party ("Recipient"). Confidential Information of EagleView includes, but is not limited to: (a) the Products and Services including any related software code and Documentation; (b) the terms of this Agreement including all Order Forms and statements of work, as applicable, and related pricing, and (c) EagleView's roadmaps, product plans, product designs, architecture, technology and technical information, security audit reviews, business and marketing plans, and business processes, however disclosed. Confidential Information will not include information that was (a) at the time of disclosure, through no fault of the Recipient, already known and generally available to the public; (b) at the time of disclosure to Recipient already rightfully known to the Recipient without any obligation of confidentiality; (c) disclosed to the Recipient by a third party who had the right to make the disclosure without any confidentiality restrictions; or (d) independently developed by the Recipient without access to or use of the Discloser's Confidential Information.

1.5. **"Documentation"** means the materials describing the features and functions of the Products and Services as may be updated from time to time by EagleView.

1.6. **"Fee"** means the fees charged by EagleView for the Products and Services as identified in an Order Form or an invoice issued by EagleView.

1.7. **"Intellectual Property Rights"** means all worldwide intellectual property rights whether registered or unregistered including copyrights, patents, patent applications, trademarks, service marks, trade secrets, and all other proprietary rights.

1.8. **"Malware"** means any software program or code intended to harm, destroy, interfere with, corrupt, or cause undesired effects on program files, data, or other information, executable code, or application software macros.

1.9. **"Order Form"** means a mutually agreeable order signed and dated by both Parties describing the Products and Services purchased by Customer. The Parties may enter into several Order Forms with each Order Form made part of this Agreement. In the event of a conflict between the terms of this Agreement and an Order Form, the Order Form will prevail; provided that notwithstanding anything to the contrary, no Order Form shall exist or be effective except to the extent it is governed by this Agreement.

1.10. **"Products and Services"** means EagleView's proprietary products, services and content, whether or not identified in an Order Form, developed and owned or licensed by EagleView, its Affiliates (defined as its directors, officers, employees, agents, representatives, advisors, and persons or entities which are controlled by or are under common control with EagleView), and/or their licensors.

2. ACCESS AND USE OF THE PRODUCTS AND SERVICES

2.1. **Access to the Products and Services.** Subject to Customer's compliance with the terms of this Agreement, EagleView hereby grants to Customer the right to access and use the Products and Services identified on an Order Form(s) for its internal business purpose on a limited, revocable, non-exclusive, non-transferable basis in accordance with the scope of use identified in the Order Form. Unless a different term of the license grant to Products and Services is set forth in an Order Form, the right to access and use the Products and Services for its internal business purpose during the term of any Order Form(s) is the only right granted to Customer under this Agreement and any Order Form(s). EagleView will have no liability for any loss or damage arising from Customer's failure to comply with the terms of this Agreement. EagleView will provide Customer a primary administrator Account for managing and granting access to its Authorized Users. Customer will be responsible for activating Authorized Users through use of the Account. Customer and its Authorized Users are responsible for maintaining the confidentiality of all passwords.

2.2. **Access Restrictions.** Access by Customer and its Authorized Users to the Products and Services is subject to the following conditions:

2.2.1. Customer will not access the Products and Services or Confidential Information of EagleView in a way that might adversely affect the security, stability, performance, or functions of the Products and Services.

2.2.2. Customer will not directly or indirectly: (a) resell or sublicense the Products and Services, (b) modify, disassemble, decompress, reverse compile, reverse assemble, reverse engineer, or translate any portion of the software related to the Products and Services; (c) create derivative works from the Products and Services; (d) use the Products and Services in violation of applicable law or the rights of others; (e) perform any vulnerability or penetration testing of the Products and Services; (f) cause harm in any way to the Products and Services or cause Malware to harm the Products and Services; (g) work around the Products and Services' technical limitations; (h) remove any proprietary notices from the Products and Services, software related to the Products and Services, documentation or any other EagleView materials furnished or made available hereunder; (i) access the software related to the Products and Services in order to build a competitive product or service; or (j) copy any features, functions or graphics of the software related to the Products and Services.

2.2.3. Customer will not use the Products and Services in connection with any data that: (a) may create a risk of harm or loss to any person or property; (b) constitutes or contributes to a crime or tort; (c) is illegal,

unlawful, harmful, pornographic, defamatory, infringing, or invasive of personal privacy or publicity rights; (d) contains any information that Customer does not have the right to use; or (e) use the Products and Services, or any software or documentation related to the Products and Services, in violation of export control laws and regulations.

2.2.4. Customer and its Authorized Users shall only use the Products and Services for the use and purpose set out in this Agreement, and for no other purpose.

2.2.5. EagleView may suspend the Products and Services if EagleView determines, in its reasonable discretion, that suspension is necessary to protect Customer or the Products and Services from operational, security, or other material risk, or if the suspension is ordered by a court or other tribunal. In such event(s), EagleView will provide notice of suspension to Customer as soon as reasonably practicable.

2.3. Account Use. Customer is responsible for maintaining and keeping confidential its Account information, including passwords, usernames, and email addresses. If Customer becomes aware of: (i) any violation of the terms of this Agreement by an Authorized User or unauthorized access to an Account, or (ii) any compromise to an Account including unauthorized access to or disclosure of any Account information, passwords, usernames or login credentials, then Customer must promptly suspend any relevant access and notify EagleView.

2.4. Reservation of Rights. Except for the limited rights expressly granted herein, EagleView and its Affiliates retain all right, title and interest in all Intellectual Property Rights and technology related to EagleView's proprietary Products and Services. Customer will preserve and keep intact all EagleView copyright, patent, and/or trademark notices presented in connection with the Products and Services. Customer will not assert any implied or other rights in or to any of EagleView's Intellectual Property Rights or Products and Services. From time to time, Customer may provide suggestions, ideas, enhancement requests, or other information on its use of the Products and Services ("Feedback"). Customer agrees that EagleView will have all right, title, and interest to use such Feedback without any restrictions and without any payment or other compensation to Customer.

3. PAYMENT

3.1. Fees. Customer will pay the Fees within thirty (30) days of receipt of invoice. EagleView will have the right to assess a late payment charge on any overdue amounts equal to the lesser of: (i) one and one-half percent (1.5%) per month, or (ii) the maximum rate allowed by applicable law. Additional or different payment terms may be set forth in the Order Form. All Fees paid pursuant to this Agreement and any applicable Order Form are non-refundable and all Products and Services ordered pursuant to an Order Form are non-cancelable, unless expressly stated to the contrary in the Order Form. In the event that EagleView seeks legal recourse for the collection of any unpaid Fees from Customer, Customer will be responsible for all of EagleView's costs of such collection action if EagleView is the prevailing party. If any Fees are overdue by more than thirty (30) days, EagleView may, without limiting its other rights and remedies, suspend the Products and Services until such amounts are paid in full, provided that, EagleView will give Customer at least ten (10) days' prior notice that its account is overdue.

3.2. Pricing Changes. If any Order Form is subject to renewal or extension, automatic or otherwise, EagleView may adjust the pricing for any Products and Services upon any renewal or extension of an Order Form by providing notice thereof at least ninety (90) days prior to the date for such renewal or extension.

3.3. Taxes. The Fees do not include any levies, duties excise, sales, use, value added or other taxes, tariffs, or duties that may apply to the Products and Services ("Taxes"). Customer is responsible for paying all Taxes associated with its purchases hereunder. If EagleView has the legal obligation to collect Taxes from Customer, Customer will pay that amount to EagleView unless Customer provides EagleView with a valid tax exemption certificate authorized by the applicable taxing authority prior to billing. For clarity, EagleView is solely responsible for taxes assessable against it based on its income, property, and employees.

4. TERM AND TERMINATION

4.1. Term. The term of this Agreement will commence on the Effective Date and will remain in effect for so long as there exists an open Order Form and for a period of twelve (12) months thereafter ("Term"). After expiration or early termination, Customer will not have any access to content or any Products and Services.

4.2. Termination; Suspension. Either Party may terminate this Agreement or any Order Form upon written notice to the other Party if: (i) the non-terminating Party materially breaches this Agreement or any Order Form and fails to cure such breach within thirty (30) days of delivery of written notice; or (ii) if the other Party becomes the subject of a petition in bankruptcy or any other proceeding relating to insolvency, receivership, liquidation, or assignment for the benefit of creditors. EagleView may suspend access to the Products and Services in the event Customer is in material breach of this Agreement and such breach has not been cured within thirty (30) days' written notice to Customer. In the event of suspension due to Customer's material breach of this Agreement, Customer will remain liable for all Fees applicable to the Term that would have been paid had access to the Products and Services not been suspended.

4.3. Effect of Termination on Fees: EagleView Breach. In the event this Agreement is terminated by Customer for a material breach by EagleView, (a) where EagleView has fully delivered imagery to Customer, no refund of fees will be made, or (b) where Customer, at the time of termination, is accessing on-line imagery and data access and/or software related to any Products and Services, EagleView will refund any unused prorated, prepaid fees for the Products and Services.

4.4. Effect of Termination on Fees: Customer Breach. In the event this Agreement is terminated by EagleView for a material breach by Customer or due to section 4.2 (ii) applying, Customer will be responsible for all Fees and Taxes under any current Order Form(s).

4.5. Survival. Upon any expiration or termination of any Order Form or this Agreement, the following sections will survive with respect thereto: 2.4 (Reservation of Rights), 3 (Payment), 5 (Confidentiality), 7 (Indemnification), 8 (Limitation of Liability), and 9 (General Provisions).

5. CONFIDENTIALITY

5.1. Obligations. Each Party will hold the other Party's Confidential Information in confidence with at least as much care as it holds its own Confidential Information, and neither Party will disclose any of the other Party's Confidential Information to any third party. Each Party may use the Confidential Information solely for purposes of its performance under this Agreement, and may disclose such information to its employees, subcontractors and professional advisors only on a need-to-know basis, provided that such employees, subcontractors and professional advisors are bound by obligations of confidentiality at least as restrictive as those set forth in this Agreement.

5.2. Required Disclosure. The Recipient may disclose Confidential Information as required by court order, Freedom of Information Act request, or otherwise by law, provided that it gives the Discloser prior written notice of such disclosure (to the extent legally permitted) as well as reasonable assistance if Discloser seeks a protective order to prevent the disclosure. Any disclosure pursuant to this Section 5.2 will be restricted to include the least amount of Confidential Information necessary to comply with the law or order. All costs incurred by the Recipient in connection with complying with such order will be paid solely by the Recipient.

6. WARRANTIES

6.1. Mutual Warranties. Each Party represents and warrants to the other Party that: (i) it is an organization duly organized, validly existing and in good standing under the laws of the jurisdiction of its formation, has all requisite power and authority to carry on its business and to own and operate its properties and assets; and (ii) the individual signing this Master Services Agreement and any Order Forms has the requisite authority to bind the party to this Agreement and the Order Form, respectively.

6.2. EagleView Warranty. EagleView warrants that (i) it will provide the Products and Services with commercially reasonable care and skill; and (ii) the Products and Services will conform to the then-current Documentation in all material respects. In the event of a breach of this warranty, Customer's sole and exclusive remedy will be as described in Section 4.3 Payments Upon Termination.

6.3. Disclaimer. EXCEPT FOR EXPRESS WARRANTIES SET FORTH IN THIS AGREEMENT, EAGLEVIEW MAKES NO ADDITIONAL REPRESENTATION OR WARRANTY OF ANY KIND, WHETHER EXPRESS, IMPLIED IN FACT OR BY OPERATION OF LAW, OR STATUTORY, AS TO ANY MATTER WHATSOEVER. EAGLEVIEW EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT. EAGLEVIEW DOES NOT WARRANT THAT THE PRODUCTS AND SERVICES (INCLUDING ANY SUPPORT SERVICES) WILL BE ERROR FREE, WILL MEET CUSTOMER'S REQUIREMENTS, OR WILL BE TIMELY OR SECURE. CUSTOMER WILL NOT HAVE THE RIGHT TO MAKE OR PASS ON ANY REPRESENTATIONS OR WARRANTY ON BEHALF OF CUSTOMER TO ANY THIRD PARTY. TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE PRODUCTS AND SERVICES AND SUPPORT SERVICES ARE PROVIDED "AS IS."

7. INDEMNIFICATION

7.1. EagleView Indemnification. EagleView will defend Customer against any claim, demand, suit or proceeding made by a third party alleging that the Products and Services infringes the intellectual property rights of such third party and will pay all costs or damages that are finally awarded by a court of competent jurisdiction (including reasonable attorneys' fees) or agreed to in a written settlement signed by EagleView; provided, however, that Customer will: (i) notify EagleView in writing within ten (10) calendar days of its receipt of notice of the claim, (ii) give EagleView sole control of the defense and settlement of the claim (except that EagleView will not settle any claim that results in liability or an admission of liability by Customer without Customer's prior written consent), and (iii) provide EagleView with all reasonable assistance, information, and authority necessary to perform EagleView's obligations under this paragraph. Notwithstanding the foregoing, EagleView will have no liability for any claim of infringement or misappropriation to the extent such claim arises from: (i) use of the Products and Services in combination with materials including software, hardware, or content not furnished by EagleView; or (ii) Customer's breach of this Agreement.

7.2. Remedies. In the event the Products and Services are held or is believed by EagleView to infringe or misappropriate any Intellectual Property Rights of a third party, EagleView will have the option, at its expense, to: (i) replace the Products and Service with a non-infringing equivalent, (ii) modify the Products and Services to be non-infringing, (iii) obtain for Customer a license to continue using the Products and Services; or (iv) terminate this Agreement or any relevant Order Form and refund any prepaid, prorated fees for the remainder of the Term. The foregoing remedies constitute Customer's sole and exclusive remedies and EagleView's sole liability with respect to any third-party infringement claim.

7.3. Customer Indemnification. Customer will, at its expense, defend EagleView from and against all third party claims and will pay any costs, losses or damages that are finally awarded (including reasonable attorneys' fees) or agreed to in settlement to the extent arising out of Customer's breach of this Agreement, provided that (i) EagleView notifies Customer in writing within ten (10) calendar days of its receipt of written notice of the claim, (ii) Customer has sole control of the defense and settlement of the claim (except that Customer will not settle any claim that results in liability or an admission of liability by EagleView without EagleView's prior written consent), and (iii) EagleView provides Customer with all reasonable assistance, information, and authority necessary to perform Customer's obligations under this paragraph.

7.4. Mutual Indemnification. Notwithstanding the foregoing, to the fullest extent permitted by law, each Party agrees to defend, indemnify, and hold harmless the other Party and other Party's officers, agents, and employees from all claims, losses, and causes of actions arising out of, resulting from, or in any manner connected with the

Agreement or an Order Form, but only to the extent such claim, loss, cause of action, damage or injury is caused or contributed to by the negligent acts, errors, or omissions of the indemnifying party. It is the intent of this section to require EagleView to indemnify Yuma County to the extent permitted under Arizona law.

8. LIMITATION OF LIABILITY

8.1. Consequential Damages. TO THE EXTENT PERMITTED BY LAW, IN NO EVENT WILL EITHER PARTY OR ITS AFFILIATES BE LIABLE TO THE OTHER FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, COVER, BUSINESS INTERRUPTION, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND OR NATURE, INCLUDING, BUT NOT LIMITED TO, LOSS OF USE, DATA, PROFITS, REVENUE, OR GOODWILL, WHETHER AN ACTION IS BASED IN CONTRACT, TORT, OR OTHERWISE, REGARDLESS OF WHETHER EITHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8.2. Limitation of Liability. EXCLUDING EITHER PARTY'S INDEMNIFICATION OBLIGATIONS PURSUANT TO SECTION 7, TO THE EXTENT PERMITTED BY LAW, THE AGGREGATE AND CUMULATIVE LIABILITY OF EITHER PARTY INCLUDING ALL THEIR AFFILIATES REGARDLESS OF THE FORM OF ACTION, WHETHER IN CONTRACT OR TORT (EXCEPT GROSS NEGLIGENCE) WILL IN NO EVENT EXCEED THE TOTAL AMOUNT OF FEES PAID AND PAYABLE BY CUSTOMER IN THE TWELVE MONTHS PRECEDING THE ACTIONS GIVING RISE TO THE CLAIM.

9. GENERAL PROVISIONS

9.1. Export Laws. The Products and Services and derivatives thereof may be subject to export laws and regulations of the United States and other jurisdictions. EagleView and Customer each represent that it is not named on any U.S. government denied-party list. Customer will not permit any user to access, use, export, reexport, or transfer, directly or indirectly, any Products and Services or content in a U.S.-embargoed country or region (including but not limited to Cuba, Iran, North Korea, Sudan, Syria, Crimea, or Russia) or in violation of any U.S. export law or regulation.

9.2. No Third-Party Beneficiaries. Except as specifically identified in this Agreement, nothing in this Agreement is intended to confer upon any person other than the Parties and their respective successors or permitted assigns, any rights, remedies, obligations, or liabilities whatsoever.

9.3. Independent Contractors. Nothing contained in this Agreement will be deemed or construed as creating a joint venture or partnership between any of the Parties hereto. Neither Party will have the power or authority to control the activities or operations of the other. At all times, the status of the Parties will be that of independent contractors.

9.4. Force Majeure. Except with respect to Customer's payment obligations, each Party will be excused from performance under this Agreement, will not be deemed to be in breach hereof, and will have no liability to the other Party whatsoever if either party is prevented from performing any of its obligations hereunder, in whole or in part, as a result of a Force Majeure Event. A "Force Majeure Event" means an event or occurrence beyond the control of the nonperforming Party, such as an act of God or of the public enemy, embargo or other act of government in either its sovereign or contractual capacity, government regulation, travel ban or request, court order, civil disturbance, terrorism, war, quarantine restriction, epidemic, virus, fire, weather, flood, accident, strike, slowdown, delay in transportation, electrical power outage, interruption or degradation in electronic communications systems, inability to obtain necessary labor, materials or manufacturing facilities, and other similar events. In the event of any delay resulting from a Force Majeure Event, any date of delivery hereunder will be extended for a period equal to the time lost because of the delay.

9.5. Security Assessment. Upon reasonable request, EagleView will assist Customer in its EagleView security risk assessments by completing forms and providing reports that provide Customer with generally available information relating to EagleView's information security practices. Such information will include high level

overviews of implemented security measures, such as access controls, encryption, or other means, where appropriate, and will provide details relating to how Customer's Confidential Information is disclosed, accessed, processed, and stored (as applicable).

9.6. Assignment. Neither Party may assign any of its rights or obligations hereunder, whether by operation of law or otherwise, without the other Party's prior written consent (not to be unreasonably withheld); provided, however, either Party may assign this Agreement in its entirety (including all Order Forms), without the other Party's consent to its Affiliate or in connection with a merger, acquisition, corporate reorganization, or sale of all or substantially all of its assets. Subject to the foregoing, this Agreement will bind and inure to the benefit of the Parties and their respective successors and permitted assigns.

9.7. Governing Law. This Agreement will be governed by the laws of the state the Customer is located in without regard to conflict of law principles. The Parties agree that any claims, legal proceedings, disputes and litigation arising out of or in connection with this Agreement will be brought solely in the state courts located in the jurisdiction in which the Customer is based, unless a claim is based on violation of federal law.

9.8. Severability & Waiver. The failure of either Party to exercise any right or the waiver by either Party of any breach, will not prevent a subsequent exercise of such right or be deemed a waiver of any subsequent breach of the same, or any other provision of this Agreement. All waivers must be in writing and signed by the Party waiving its rights. If any section of this Agreement is held to be invalid or unenforceable, the remaining sections of this Agreement will remain in force to the extent feasible.

9.9. Notices. Notwithstanding anything to the contrary in this Agreement, notices and other communications may be given or made pursuant to this Agreement via electronic mail. Notwithstanding the foregoing, any notice concerning a material breach, violation, or termination hereof must be in writing and will be delivered: (a) by certified or registered mail; or (b) by an internationally recognized express courier or overnight delivery service. All written notices or other written communications to EagleView will be provided to the address listed above and addressed to: ATTENTION: LEGAL DEPARTMENT. All written notices to Customer will be sent to the address identified on the Order Form and addressed to the individual signing said Order Form and will be deemed to have been duly given when delivered personally, when deposited in the U.S. mail, certified or registered mail, or when deposited with an overnight courier or delivery service. With respect to notices and other communications regarding EagleView's privacy policy, support plan, or other similar provisions, such notices will be deemed given when posted to EagleView's website (www.eagleview.com) or e-mailed to the Customer's Account administrator(s).

9.10. Execution in Counterparts. This Agreement may be executed in one or more counterparts, each of which will be deemed to be an original and all of which together will constitute only one agreement. The execution and delivery of counterparts of this Agreement by electronic mail, electronic form (including execution by way of an electronic or other signature stamp), website submission, facsimile, or by original manual signature, regardless of the means or any such variation in pagination or appearance will be binding upon the Parties executing this Agreement.

9.11. Order of Precedence. In the event of any conflict, or inconsistency among the terms and conditions contained in documents comprising the Agreement, such conflict or inconsistency shall be resolved according to the following order of precedence, with the first document listed having the highest precedence: any exhibits in the order of their attachment (for example, Exhibit A, then Exhibit B, etc.), the Order Form, and this Agreement.

9.12. Entire Agreement. This Agreement, along with the Order Form(s), and any attached exhibits, which are all incorporated into this Agreement by reference, contains the entire understanding of the Parties with respect to the subject matter hereof and supersedes all prior agreements, oral or written, and all other communications between the Parties relating to such subject matter. The Parties agree that any term or condition stated in a Customer purchase order is null and void. This Agreement may not be amended or modified except by mutual written agreement. In the event that any court holds any provision of this Agreement as null, void, or otherwise ineffective or invalid, such provision will be deemed to be restated to reflect as nearly as possible the original intentions of the Parties in

accordance with applicable law, and the remaining provisions will remain in full force and effect. The unenforceability of any provision of this Agreement will not affect the validity of the remaining provisions hereof. A waiver by either Party of a breach or failure to perform hereunder will not constitute a waiver of any subsequent breach or failure.

9.13. Nondiscrimination. To the extent applicable under A.R.S. 41-4401, EagleView and its subcontractors, if any, warrant compliance with all federal immigration laws and regulations that relate to their employees and compliance with the E-verify requirements under A.R.S. 23-214(A). EagleView shall further ensure that each subcontractor who performs any work for the County under this agreement likewise complies with State and Federal Immigration laws.

9.14 Cancellation Pursuant to A.R.S. 38-511. The parties acknowledge that this Agreement is subject to cancellation by Customer pursuant to the provisions of Section 38-511, Arizona Revised Statutes.

9.15. Forced Labor. Pursuant to A.R.S. 35-394, if EagleView engages in for-profit activity and has ten (10) or more full-time employees, EagleView hereby certifies that it does not currently, and agrees for the duration of this Agreement and any Order Form that it will not use (1) the forced labor of ethnic Uyghurs in the People's Republic of China, (2) any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China, or (3) any contractors, subcontractors, or suppliers that use the forced labor or any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China. If EagleView becomes aware during the term of this Agreement or any Order Form that EagleView is not in compliance with this certification, EagleView shall notify Customer within five (5) business days after becoming aware of the noncompliance. If EagleView does not provide Customer with a written certification that it has remedied the noncompliance within one hundred eighty (180) days after notifying Customer of the noncompliance, this Agreement and any Order Form shall terminate immediately. In the event that the Agreement and/or any Order Form termination date occurs before the end of the remedy period, this Agreement and any Order Form shall terminate on the termination date.

9.16. Israel Boycott Certification. If EagleView engages in for-profit activity and has ten (10) or more employees, EagleView hereby certifies that it is not currently engaged in, and agrees for the duration of this Agreement to not engage in, a boycott of goods or services from Israel as defined by A.R.S. 35-393.01. This certification does not apply to a boycott prohibited by 50 U.S.C. 4842 or a regulation issued pursuant thereto.

QTY	PRODUCT NAME	PRODUCT DESCRIPTION
300	EagleView Cloud - Imagery - 3in	Provides entitlement to the EagleView Platform, a secure hosted infrastructure and access to EagleView enabled workflow, analytics, and high-resolution imagery to dramatically improve efficiency for government agencies. Includes regular refreshes of ortho and oblique imagery at the GSD and frequency specified. Target capture season subject to weather and airspace permissions. Services term commences on date of activation.
979	EagleView Cloud - Imagery - 6in	Provides entitlement to the EagleView Platform, a secure hosted infrastructure and access to EagleView enabled workflow, analytics, and high-resolution imagery to dramatically improve efficiency for government agencies. Includes regular refreshes of ortho and oblique imagery at the GSD and frequency specified. Target capture season subject to weather and airspace permissions. Services term commences on date of activation.
1	EagleView Cloud - Physical Delivery - Ortho & Oblique Frames - 3in	Provides an offline copy of the individual ortho and oblique image frames in Pictometry Warehouse format at the GSD specified in imagery refresh. Delivery includes one copy of Pictometry Electronic Field Study (EFS) software, latest version, on the storage media specified herein, and access to download updated versions of the EFS Licensed Software for a period of one years from the initial date of shipment of the EFS software, along with a copy of the updated documentation.

1	EagleView Cloud - Physical Delivery - Ortho & Oblique Frames - 6in	Provides an offline copy of the individual ortho and oblique image frames in Pictometry Warehouse format at the GSD specified in imagery refresh. Delivery includes one copy of Pictometry Electronic Field Study (EFS) software, latest version, on the storage media specified herein, and access to download updated versions of the EFS Licensed Software for a period of one years from the initial date of shipment of the EFS software, along with a copy of the updated documentation.
1	EagleView Cloud - Physical Delivery - Orthomosaic - 3in	Provides an offline copy of the orthomosaic tiles and mosaics at the GSD specified in the EagleView Cloud once per refresh. Files to be provided in industry standard formats selectable by the customer with delivery made via online download or physically via a hard drive media.
1	EagleView Cloud - Physical Delivery - Orthomosaic - 6in	Provides an offline copy of the orthomosaic tiles and mosaics at the GSD specified in the EagleView Cloud once per refresh. Files to be provided in industry standard formats selectable by the customer with delivery made via online download or physically via a hard drive media.
1	Eagleview Cloud - Software - Plus	Provides an unlimited number of authorized users the ability to login and access the EagleView Cloud software and analytics via the web-based EagleView Cloud platform. This software provides a robust compliment of tools for engaging with imagery as well as additional project and collaboration tools, and access to mobile application. Requires the purchase of an EagleView - Imagery entitlement.
1	EagleView Cloud - Authorized Subdivisions	Extends the ability for a contracting county or non-state consortium of counties the ability to authorize access to their EagleView Cloud organization to any political unit or subdivision located totally or substantially within their boundary.
1	EagleView Cloud - Comprehensive Integration Bundle	Provides activation of integrations between the EagleView Cloud platform and compatible customer environments (including compatible CAMA providers, 911/PSAP, Cityworks, and ESRI/GIS) and via the Integrated Web Application.
1	EagleView Cloud - Disaster Response Program	Includes access to the EagleView Disaster Response Program which offers flights after an emergency or disaster. Refer to the attached detailed description of the Disaster Response Program.
1	EagleView Cloud - Early Access	Provides entitlement to imagery from counties neighboring the imagery AOI as part of EagleView Cloud. Also provides entitlement to Early Access to refreshed imagery captures which allows authorized users to use new imagery immediately following its preliminary processing and quality control checks and prior to its final processing. Early Access imagery will become available incrementally as it is processed, and it will remain available until final, fully processed imagery is made available through other means.
12	EagleView Cloud - Capture History	Includes access to historical ortho and oblique frame imagery from the EagleView archive. Quantity represents the number of calendar years of archive imagery available in EagleView Cloud.

96000	EagleView Cloud - Building Outlines	Building outlines are created from the most-nadir single-frame orthogonal image in a specified, EagleView imagery source. EagleView delivers digital building outlines and their attributes in shapefile and geodatabase formats. Coverage includes only locations specified in a single, customer-provided digital parcel shapefile. Parcels in the specified locations must be generally contiguous. All EagleView imagery to be used must be licensed or owned by the customer. Final invoiced amount will be adjusted for the actual quantity of records in the parcel file used for production. *Product Parameters*: Source One: Pictometry Imagery Source One Year 2025 Source Two: N/A Source Two Year: N/A Deck Identification Method: Marked with a Point To Be Used in Connect Assessment: No Modified Technical Specification:

FEES

Due at Initial Activation of Services – Refresh 1	$237,690.00
Due at Initial Activation of Services – Refresh 2	$237,690.00
Due at Initial Activation of Services – Refresh 3	$237,690.00

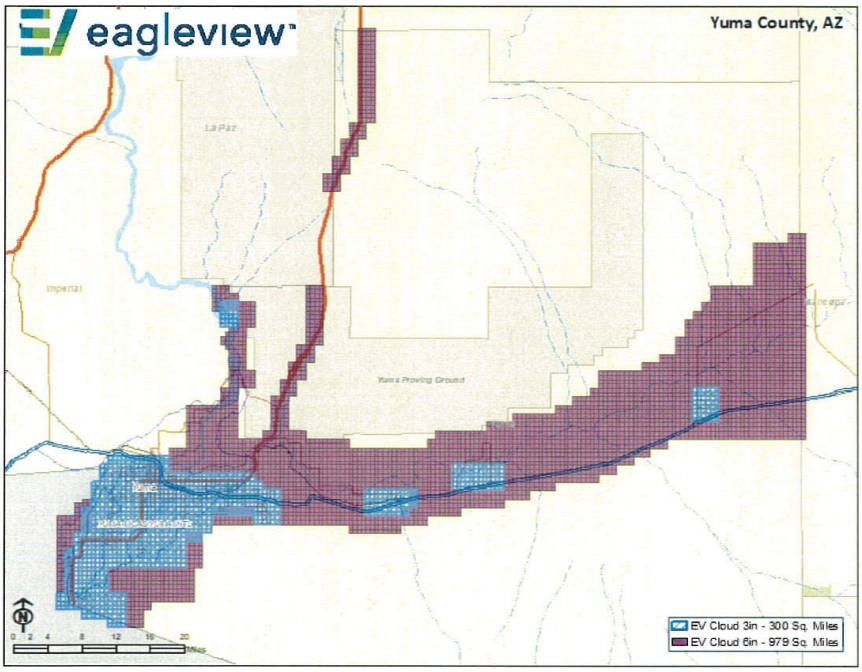
Unless either Party gives notice of its intent not to renew this Order Form at least one hundred and twenty (120) days prior to the end of the Term, it will automatically renew.

EagleView acknowledges that Customer is a government entity and the Order Form validity is based upon the availability of public funding under its authority. In the event that public funds are unavailable and not appropriated for the Customer's obligations under this Order Form, then Customer may, upon written notice to EagleView of the unavailability and non-appropriation of public funds, and without penalty to Customer, (1) elect to opt out of Initial Activation Services under Refresh 2 and/or Refresh 3, (2) elect to delay Initial Activation of Services under Refresh 2 and/or Refresh 3, or (3) terminate this Order Form. It is expressly agreed that Customer shall not activate this non-appropriation provision for convenience or to circumvent the requirements of this Order Form, but only as an emergency fiscal measure.

PRODUCT PARAMETERS

Disaster Response Program ("DRP")

If EagleView Cloud - Disaster Response Program is listed in the above product table, then this section applies to this Order Form. If EagleView Cloud - Disaster Response Program is not listed in the above product table, then this section does not apply to this Order Form.



This Order Form includes eligibility for the DRP described below so long as the customer remains under an active services agreement and in good standing with EagleView. Imagery captured through DRP will be captured "as-is".

A. Disaster Coverage Imagery at No Additional Charge – EagleView will, upon request of Customer and at no additional charge, provide standard quality imagery of up to 200 square miles of affected areas (as determined by EagleView) upon the occurrence of any of the following events during any period Customer is eligible for DRP:

- Hurricane: areas affected by hurricanes of Category 2 and higher.
- Tornado: areas affected by tornados rated EF4 and higher.
- Terrorist: areas affected by damage from terrorist attack.
- Earthquake: areas affected by damage to critical infrastructure resulting from earthquakes measured at 6.0 or higher on the Richter scale.
- Tsunami: areas affected by damage to critical infrastructure resulting from tsunamis.

B. Discounted Rate – Coverage for areas affected by the events set forth above exceeding 200 square miles will be, subject to EagleView resource availability, offered to Customer at the then-current DRP rates. Also, coverage for areas affected by hurricanes below Category II, tornadoes below EF4 or earthquakes rated below 6.0 on the Richter scale, flooding meeting or exceeding the major flood stage, wildfires impacting population centers, or other disasters as agreed to between the customer and EagleView, will be, subject to EagleView resource availability, offered to Customer at the then current DRP rates.

AOI(S) IF APPLICABLE

Regular City Council Meeting **7. J.**

Meeting Date: 06/10/2026

Department Head: Jose A. Guzman, Director of Development Services, Development Services

Submitted By: Jose A. Guzman, Director of Development Services, Development Services

Action Requested: Motion
Resolution

ITEM:

Discussion and possible action on any and all matters regarding Resolution No. 2403. A Resolution of the Mayor and City Council of the City of San Luis, Arizona, approving and adopting an Intergovernmental Agreement with the City of Yuma for the use of pre-approved residential standard plans. **(Jose A. Guzman, Director of Development Services)**

SUMMARY:

During the 2025 legislative session, Arizona Senate Bill 1529 was approved and signed into law as Chapter 259. The bill requires municipalities to establish either standard pre-approved housing design plans or a pre-approved housing design plan program. The intent of the law is to help streamline the residential permitting process and support the production of additional housing.

Under SB 1529, municipalities may include plans that were developed and pre-approved by other municipalities or agencies in Arizona as part of their local pre-approved housing design plan program. The law also requires municipalities to process these pre-approved housing design plans administratively.

The City of Yuma has prepared pre-approved residential standard plans that include accessory dwelling units, as well as single-family, two-family, and three-family residential units. These plans were prepared under the 2024 IRC and 2024 IBC.

Through this IGA, the City of San Luis would be able to use the City of Yuma's plans for local permitting purposes and to help meet the requirements of SB 1529. The plans would still need to comply with San Luis zoning requirements, development standards, and any site-specific conditions before permits are issued. The agreement also makes clear that the plans are provided "as-is," and the city remains responsible for verifying compliance with its own local requirements.

This agreement provides the city with a practical way to comply with the new State requirement while also giving staff and applicants another tool to make the residential permitting process more efficient.

The proposed agreement includes a one-time compensation amount based on population. According to Exhibit A of the agreement, the City of San Luis' share is $28,549.40, based on a population of 41,409, representing approximately 19% of the total project cost of $150,260.00.

RECOMMENDATION / SUGGESTED MOTION:

I MOVE TO APPROVE AND ADOPT RESOLUTION NO. 2403

Resolution No. 2403

SB1529 - Chapter as A.R.S. 9-461.20

OFFICE OF THE
MAYOR
CITY OF SAN LUIS

Resolution

No. 2403

A RESOLUTION OF THE MAYOR AND CITY COUNCIL OF THE CITY OF SAN LUIS, ARIZONA, APPROVING AND ADOPTING AN INTERGOVERNMENTAL AGREEMENT WITH THE CITY OF YUMA FOR THE USE OF PRE-APPROVED RESIDENTIAL STANDARD PLANS.

WHEREAS, Arizona Senate Bill 1529 requires municipalities to establish standard pre-approved housing design plans or a pre-approved housing design plan program; and

WHEREAS, the City of Yuma has prepared pre-approved residential standard plans for use by participating jurisdictions; and

WHEREAS, the City of San Luis desires to use the City of Yuma's pre-approved residential standard plans to assist with compliance with Senate Bill 1529; and

WHEREAS, the City is authorized to enter into this Agreement pursuant to A.R.S. Title 11, Chapter 7, Article 3 (A.R.S. § 11-952 et seq.); and

NOW, THEREFORE, BE IT RESOLVED by the Mayor and City Council of the City of San Luis as follows:

SECTION 1: The Intergovernmental Agreement with the City of Yuma for the use of pre-approved residential standard plans, attached hereto as Exhibit "A", is hereby approved.

SECTION 2: The City Manager, or designee, is hereby authorized and directed to enter into said agreement on behalf of the City of San Luis and take any and all actions as may be necessary to put the agreement into effect.

PASSED, APPROVED AND ADOPTED by the Mayor and City Council of the City of San Luis, Arizona, this **10th** day of **June** 2026.

Joseph Estes, City Attorney

9-461.20. Municipal housing; standard preapproved housing design plans; indemnification; definition

A. A municipality shall establish standard preapproved housing design plans or a preapproved housing design plan program. The standard preapproved housing design plans developed by the municipality shall include at least three different elevation options for each class of standard preapproved housing design plan. The standard preapproved housing design plan classes are:

1. Class 1. Beginning July 1, 2026, in areas zoned as single-family residential, the municipality shall create at least three standard preapproved housing design plans for single-family homes, which must range in size from eight hundred square feet to two thousand square feet per single-family home, or three single-family home sizes beginning with the minimum single-family home size allowed by the municipality.

2. Class 2. Beginning January 1, 2027, in areas zoned as single-family residential that allow for the development of duplexes, the municipality shall create at least three standard preapproved housing design plans for duplex homes, which must range from four hundred square feet to one thousand square feet per duplex unit.

3. Class 3. Beginning January 1, 2027, in areas zoned as single-family residential that allow for the development of triplexes, the municipality shall create at least three standard preapproved housing design plans for triplex homes, which must range in size from four hundred square feet to one thousand square feet per triplex unit.

4. Class 4. Beginning July 1, 2026, in areas zoned as single-family residential that allow for the development of accessory dwelling units, the municipality shall create at least three standard preapproved housing design plans for accessory dwelling units. The three standard preapproved housing design plans for accessory dwelling units shall be one of the following sizes:

(a) Two hundred square feet.

(b) Six hundred square feet.

(c) One thousand square feet.

B. A preapproved housing design plan program established pursuant to subsection A of this section shall comply with all of the following:

1. A municipality shall accept plan submissions for the preapproved housing design plan program for class 1, class 2, class 3 and class 4 plans prescribed by subsection A of this section.

2. A municipality may not restrict who may submit a preapproved housing design plan pursuant to the preapproved housing design plan program.

3. A municipality shall approve or deny a preapproved housing design pursuant to the preapproved housing design plan program pursuant to section 9-500.49.

4. A municipality may charge an applicant who submits a preapproved housing design plan pursuant to the preapproved housing design plan program the same fees that the municipality would charge an applicant who has submitted a request for approval for the same sized class 1, class 2, class 3 and class 4 plans approved pursuant to subsection A of this section.

5. A municipality shall post plans that are preapproved pursuant to the preapproved housing design plan program on the municipality's official website. Posting by the municipality of a preapproved housing design plan pursuant to the preapproved housing design plan program does not constitute an endorsement by the municipality of the applicant or the applicant's application for a preapproved housing design plan pursuant to the preapproved housing design plan program.

6. A municipality shall post the contact information of the applicant of preapproved housing design plans submitted pursuant to the preapproved housing design plan program. The municipality is not responsible for the accuracy of the applicant's posted contact information.

7. A municipality shall remove a preapproved housing design plan submitted pursuant to the preapproved housing design plan program from the municipality's official website within thirty days after receiving a request from the applicant to remove the preapproved housing design plan.

8. A municipality may include the following class 1, class 2, class 3 and class 4 preapproved housing design plans in the preapproved housing design plan program:

(a) Plans that are developed and approved pursuant to subsection A of this section.

(b) Plans that have been developed and preapproved by other municipalities or agencies in this state.

9. A municipality shall administratively approve or deny an application for a class 1, class 2, class 3 or class 4 preapproved housing design plan submitted pursuant to the preapproved housing design plan program without discretionary review.

C. Notwithstanding any other law, a municipality may require a person or entity to release and indemnify the municipality and the municipality's employees and contractors as a condition of using a standard preapproved housing design plan.

D. For the purposes of this section, "accessory dwelling unit" has the same meaning prescribed in section 9-461.18.
