

AQUAVIDA
We Bring Pools to Life

ARIZONA'S COMMERCIAL POOL REMODELING EXPERTS

Over 30 Years of Experience

Aquavida Pools has been serving the greater Phoenix metropolitan area for eighteen years providing professional pool construction, renovation, and restoration services.

Founder Thomas Lopez has worked in every capacity in the swimming pool industry and holds several unique patents for pool cleaning systems as well as pool repair products that have been developed based on his real-world experience and expertise.

Aquavida has the team, tools, and experience to take on large-scale commercial pool projects which require extensive renovation across numerous mechanical and aquatic systems

Dedicated to Serving the Local Community

Founded by an Arizona native that has invested in local communities in Phoenix and Jerome. Lopez believes in the value of uplifting local areas. Aquavida takes pride in employing local residents and helping them develop professional skills during every phase of their careers.

Aquavida has helped transform commercial aquatic features that bring people together and provide spaces for recreation and fun.

Because of the unique demands of swimming pool renovation, it's essential to have professional local providers who can navigate any unexpected challenges as they arise. Aquavida also understands the challenges associated with the region's climate and native soils.

Owner Operator

One of the primary drivers of Aquavida's success is the passion, knowledge, and experience of being an Owner Operated firm.

Lopez's dedication to professional commercial pool renovation and renewal is based on firsthand experiences of the breakdown in professional relationships between contractors and clients.

These experiences have informed his commitment to transparency, integrity, and communication. As the owner operator, Lopez has brought his children into the company to continue Aquavida's legacy of quality commercial pool service.

On-Site Supervision

Lopez's son Nick works with Aquavida as a Lead Superintendent and has gained considerable knowledge under his father's guidance with in-field guidance and education. Both Thomas and Nick are available to supervise local crews through every phase of the project's restoration.

Because we are the only exclusive commercial pool remodeling contractor in the state, the father-son team are locally available to keep the renovation project on track. Having local supervision is essential to a successful renovation.

Aquavida is committed to providing comprehensive supervision during this renovation project which would be challenging for firms not dedicated to commercial.

Arizona's Only Exclusive Commercial Pool Remodeling Contractor

We are the only exclusive commercial pool remodeling company in Arizona dedicated to only remodeling and resurfacing semi-commercial and commercial swimming pools.

Having this dedication allows us to focus directly on your project and deliver the supervision and quality a project of this scale demands.

We understand all County and Federal regulations and requirements and guarantee your pool will meet all codes. We are an Arizona original and remain committed to bringing you reliable, quality commercial pool renovation services.
