BNSF Railway

BNSF Railway is one of North America's leading freight transportation companies, operating a rail network of 32,500 route miles in 28 states and three Canadian provinces. BNSF is one of the top transporters of the products and materials that help feed, clothe, supply and power communities throughout America and the world. BNSF moves those goods more safely and efficiently, on significantly less fuel, with fewer emissions than the all-highway alternative.

In 2024, **5.26M** intermodal shipments (truck trailers or containers) were transported on BNSF's rail lines instead of on the nation's congested highways

BNSF moved **3.1M** new cars and trucks in 2024, or ~5 per minute

BNSF moves enough grain each year to supply **740M** people with a year's supply of bread

BNSF moves enough lumber each year to frame **300K** houses

In 2024, BNSF hauled enough coal to power nearly **24M** homes for an entire year.

BNSF Facts

Length of network:	32,500
States in network:	28
Canadian provinces:	3
Employees:	~36,500
Headquarters:	Fort Worth, TX
Ports served:	40+
Intermodal facilities:	27
Average trains per day:	1,300
Locomotives:	~6,800
Capital investment (2024):	\$3.7 billion
Bridges:	13,000+
Tunnels:	99
Grade crossings:	29,000+
Packages shipped during holiday season:	76 million
Carloads shipped in 2024:	9.6 million
Distance BNSF hauls 1 ton of freight on 1 gallon of diesel fuel:	~500 miles

A Powerful Economic Development Tool

BNSF has more than 1,500 employees in Arizona earning a combined payroll of over \$198m/year. The average railroad salary and compensation package tops \$132,000/year allowing BNSF's workforce to earn 39% more than the average full-time U.S. employee.

An Industry Leader in Rail Safety

At BNSF, we believe every accident or injury is preventable. We work each day to make that vision a reality through our extensive safety programs, training and technology. In 2023, we completed a record year for workplace safety, with the lowest injury frequency rate in our company's 175-year history. We operated our 32,500-mile network without loss of life, and with the fewest number of employee injuries ever.

The freight rail industry is safe and getting safer. The last decade has been the safest ever for rail. Data from the Federal Railroad Administration (FRA) confirms the industry's approach delivers safety improvements. The train accident rate is down 27% since 2000 and 6% since 2022. The hazardous materials accident rate is at its lowest ever and down 75% since 2000.

BNSF is committed to transporting hazardous materials safely – 99.99% of BNSF hazmat shipments reach their destination without a release caused by a train accident. Our rigorous approach to hazmat safety is informed by a framework of measures focused on prevention, mitigation and response.

We ensure that we and the communities we serve are prepared to respond in the rare instance of an incident. BNSF has over 120 trained hazmat responders at more than 50 locations across our network with prepositioned response equipment which is supported by a network of contract emergency and environmental responders. We also provide free hazmat response training to local first responders across our network, training more than 144,000 responders since 1996.
