Incidental take means take that results from, but is not the purpose of, carrying out an otherwise lawful activity. Participant is the owner of a tract or tracts of land (the "Property") located in Williamson County, Texas, and described on Exhibit "A" to this Participation Agreement.

Special Terms and Conditions in Connection
with 10(a) Permit #TE - 181840

1. On property covered by this Participation Agreement, vegetation clearing activities within 300 feet of habitat will be conducted outside the GCWA or BCVI breeding seasons, as applicable, unless breeding season surveys performed by an Endangered Species Act section 10(a)(1)(A)-permitted biologist indicate that no GCWA or BCVI are present within 300 feet of the desired activity, or as otherwise approved on a case-by-case basis by the Service. The breeding season for the GCWA is March 1 to August 1. The breeding season for the BCVI is March 15 to September 1.
2. Construction activities within, or within 300 feet of, GCWA or BCVI habitat may be conducted year round as long as such construction follows permitted clearing, as referenced above, in a reasonably prompt and expeditious manner indicating continuous activity.
3. Clearing and construction activities authorized under the Permit shall be consistent with the current practices recommended by the Texas Forest Service to prevent the spread of oak wilt.
4. Upon locating a dead, injured, or sick GCWA or BCVI or any other endangered or threatened species in connection with road construction and other activities conducted by Participant that are covered by the Permit, Participant is required to contact the U.S. Fish and Wildlife Service's Law Enforcement Office, in Georgetown, Texas, (512) 863-5972, for care and disposition instructions. Extreme care should be taken in handling sick or injured individuals to ensure effective and proper treatment. Care should also be taken in handling dead specimens to preserve biological materials in the best possible state for analysis of cause of death. In conjunction with the care of sick or injured endangered/threatened species, or preservation of biological materials from a dead specimen, Participant and their contractor/subcontractor have the responsibility to ensure that evidence intrinsic to the specimen is not unnecessarily disturbed.

- E. Permittee(s) are authorized to "Take" the following species: Bone Cave harvestman, Coffin Cave mold beetle, golden-cheeked warbler (GCWA), and black-capped vireo (BCVI) in Williamson County, Texas incidental to activities including, but not limited to, road construction, maintenance, and improvement projects; utility construction and maintenance; school development and construction; public or private construction and development; and land clearing.
- F. For GCWA, the loss of up to 6,000 acres of potential GCWA habitat is authorized over the life of the Permit. These impacts will be mitigated by a combination of purchasing mitigation credits from Hickory Pass Conservation Bank and/or other nearby conservation banks or by creating GCWA preserves.
- G. For BCVI, the loss of up to 4,267 acres of potential BCVI habitat is authorized over the life of the Permit. These impacts are mitigated primarily through habitat restoration, habitat management, enhancement of existing protected BCVI habitat, or an alternate, Service-approved mitigation program.
- H. On parcels covered by Participation Agreements, vegetation clearing activities within, or within 300 feet of, habitat will be conducted outside the GCWA or BCVI breeding seasons, as applicable, unless breeding season surveys performed by an Endangered Species Act section 10(a)(1)(A)-permitted biologist indicate that no GCWA or BCVI are present within, or within 300 feet of, the desired activity, or as otherwise approved on a case-by-case basis by the Service. The breeding season for the GCWA is March 1 to August 1. The breeding season for the BCVI is March 15 to September 1.
- I. Construction activities within, or within 300 feet of, GCWA or BCVI habitat may be conducted year round as long as such construction follows permitted clearing, as referenced above, in a reasonably prompt and expeditious manner indicating continuous activity.
- J. For Bone Cave harvestman and Coffin Cave mold beetle, up to 210 caves occupied by one or both species are authorized to be impacted. These impacts will be mitigated by acquiring and managing 9 to 15 karst fauna areas (KFAs), a minimum of three KFAs in each of the karst fauna regions occupied by the covered species.
- K. Clearing and construction activities authorized under this Permit shall be consistent with the current practices recommended by the Texas Forest Service to prevent the spread of oak wilt.
- L. The Service agrees that Williamson County or the Foundation may enter into "Participation Agreements" covering land within the Permit area. Participation

Agreements will stipulate that the Participant will be bound by and comply with those terms and conditions of this Permit applicable to the Participant's land and the Participant shall benefit from the authorization granted in this Permit. So long as this Permit remains in effect and a Participant is in compliance with the Participation Agreement, that Participant shall be deemed, with respect to that Participant's property covered by the Participation Agreement, to have the full benefits and authorities of this Permit with respect to that Participant's property. The Service agrees that a breach by a Participant of its obligations under a Participation Agreement will not be considered a violation by the Permittee, or any other Participant, of this Permit. In the event a Participant has materially breached its Participation Agreement then the Service, Williamson County, or the Foundation may terminate that Participation Agreement.

- M. Upon locating a dead, injured, or sick GCWA or BCVI or any other endangered or threatened species in connection with road construction and other activities conducted by Williamson County that are covered by this Permit, Permittees and/or Participant, as applicable, shall contact the U.S. Fish and Wildlife Service's Law Enforcement Office, in Georgetown, Texas, (512) 863-5972, for care and disposition instructions. Extreme care should be taken in handling sick or injured individuals to ensure effective and proper treatment. Care should also be taken in handling dead specimens to preserve biological materials in the best possible state for analysis of cause of death. In conjunction with the care of sick or injured endangered/threatened species, or preservation of biological materials from a dead specimen, Williamson County, the Foundation, and their contractor/subcontractor have the responsibility to ensure that evidence intrinsic to the specimen is not unnecessarily disturbed.
- N. Conditions of this Permit shall be binding on, and for the benefit of Williamson County and the Foundation.
- O. If during the tenure of this Permit authorized impacts are exceeded such that there may be an increase in the anticipated take of any covered species, Williamson County or the Foundation shall contact the Service and obtain authorization and/or amendment of the Permit before entering into participation agreements or commencing any other activities which might result in unauthorized impacts.
- P. Williamson County or the Foundation shall submit on January 1 of each year the Permit is in effect an Annual Report describing participation agreements entered into and conservation and management actions undertaken. The report will summarize the results of the biological monitoring and adaptive management process and findings. The Annual Report must include the locations of surveys, a description of any deviations from required survey protocols, personnel used, and documentation of all survey results as required in the protocols for the particular endangered species. In addition, the annual

report will review existing management and highlight areas where change in management approach may be needed and where prioritized research needs are reviewed. A copy of the annual report shall be submitted to the U.S. Fish and Wildlife Service Field Office 10711 Burnet, Suite 200, Austin, Texas 78758; and to the U.S. Fish and Wildlife Service, P.O. Box 1306, Room 4102, Albuquerque, New Mexico 87103.

- Q. The No Surprises Rule, found at 50 C.F.R. 17.22(b)(8) and 17.32(b)(8), is applicable to this Permit. Pursuant to the No Surprises Rule, the Service has determined that the RHCP adequately addresses the GCWA, BCVI, Bone Cave Harvestman, and Coffin Cave mold beetle.
- R. Acceptance of the Permit serves as evidence that Williamson County and the Foundation understand and agree to abide by the terms of the Permit and all applicable sections of Title 50 CFR Parts 13 and 17 pertinent to issued permits.
