Subject: Sign Bids

In the primary and secondary items, some were chosen that may not be the lowest, but were grouped together with items used together (fitted together) so that we get the same quality. Example is Item 13 thru 15, item 15 is a bracket used to fit together the sign and the post, the second lowest vendor "no bid" the bracket, we prefer to order the brackets with the posts to assure the same quality and fit.

Let me know if you have any other questions.

Thanks
