eCIVIS

Your tools for grants success.

eCivis® Grants Network™

eCivis Grants Network is the ideal platform for improving your organization's grants performance. Our patent-pending system is an enterprise-wide solution allowing grant-active organizations to drive success throughout the grants lifecycle. eCivis Grants Network is based on Software as a Service (SaaS) technology that eliminates high start-up costs and extra IT infrastructure and other IT support. The web interface reduces training needs and increases user adoption. eCivis Grants Network is a modular system that scales to fit your organization and contains fully integrated components that minimize data entry and maximize results.

eCivis Grants Network : Research℠

eCivis Grants Network: Research provides exactly the information you need to find and win grants that help your organization meet its goals. eCivis invests more than 40,000 hours of research each year on federal, state, and foundation grants to ensure that users will find the best grants for their projects. With our proprietary research and analyses, users enjoy longer lead times to produce better applications. Our customized search tools allow users to enjoy rapid results across any and all parameters. Rollover summaries reveal the details of a grant without opening it. With our automated search agents, updates, and daily/weekly emails, eCivis Grants Research does all the heavy lifting for you and enables your organization to become truly proactive. eCivis Grants Research provides the best grants information anywhere.

eCivis Grants Network : Tracking & Reporting℠

eCivis Grants Network: Tracking & Reporting is a web-based system designed to move your grants management process into the 21st Century by providing intelligence at every stage of the grants management lifecycle. eCivis Grants Tracking & Reporting is fully integrated with eCivis Grants Research, so once a grant is won, information is easily transferred between systems. No matter what your function, eCivis Grants Tracking & Reporting saves time and headaches, while saving your organization money, undesirable press, and nasty-grams from grantors. Grants professionals save time and frustration by automatically performing and centralizing many of the administrative functions currently done by hand, on paper, and through multiple systems. Department heads and managers can reduce the amount of time spent complying with the reporting requirements of the grants you've won. Elected/appointed officials and senior managers are finally able to account for every grant dollar and determine whether grant applications are in line with organizational priorities.

eCivis Grants Network : KnowledgeBase℠

eCivis Grants Network: KnowledgeBase provides educational and reference resources to hone individual grant-related skills and develop a world-class grants organization. eCivis Grants Network: KnowledgeBase can dramatically change the landscape and tenor of your grants activity by raising efficiency and skill levels, resulting in greater overall satisfaction from all stakeholders and enabling you to achieve the goals set by your leadership. eCivis Grants Network: KnowledgeBase is made up of automated training courses specifically developed to meet the needs of the grants community. eCivis Grants Network: KnowledgeBase also contains easy-to-understand two- to three-paged publications written by professionals involved in all aspects of the grants process, and five key functional areas: The Collections, 2009 Stimulus Page, Project Trends, Resource Library, and The Glossary.
