

**Low Income Repair, Rehabilitation, and Replacement Assistance  
Program (LIRAP)  
aka AirCheck  
aka DriveACleanMachine**

**Program Stats**

- Since the inception of the new LIRAP program (when the focus shifted to replacements) December 12 2007 through the present
  - Wilco has done 343 repairs
  - provided funds for 711 replacements (with 7 more in process)
  - total repairs have been \$158K
  - replacements have totaled \$2,135,000.
- 1,054 families assisted in Williamson County.

**What Williamson County pays:**

- \$2.50 per vehicle for each inspection (\$2.00 to dedicated funds plus \$0.50 for TXDPS and TCEQ administration)
- approximately 230,000 inspections annually
- approximate cost to run program - \$50,000 per annual
  - one employee – salary plus benefits ≈ \$42,000
  - miscellaneous administration ≈ \$8000
  - \$75 per vehicle inspection recouped by fleet (approx \$3600/year)

**To end program:**

- *One year notice (per discussion with Travis County DACM who has researched this)*
- How to recoup dedicated funds – need to research

**Simple solution:**

Change language in Senate Bill 1 that provides for 10% administrative allowance to “a budget amount approved annually by TCEQ.”
