RE: 14RFP00230

American Irrigation Repair LLC is based out of Georgetown, Texas and has been providing irrigation consulting, repair and installation services to government, commercial and residential customers in Williamson and Travis Counties. An evaluation committee consisting of IT, Facilities, and Parks was formed to select a quality company to install a central control irrigation system to Williamson County facilities. After careful evaluation of price, references and past performance, and quality of services, it was decided by the evaluation committee to recommend award of installation services to American Irrigation.
