15. Monitoring Service Options

Utilizing EMERGENCY24, CTLLC provides customers with fully redundant monitoring services resulting in a fail-safe monitoring network.

Subscriber Secure Internet Service Included with all monitoring agreements, Convergent Technologies subscribers receive the ability to manage and monitor their account on-line via Secure Internet Services. Secure Internet Services allows the subscriber to perform tasks including the ability to place accounts on test, make *temporary* changes to party information, view account history, view account data and request account information changes.

Generic Subscriber History Reports Another exclusive feature is the ability to obtain generic alarm activity reports listing the date, time and description of the alarm signal. Information through these services is secured by the same encryption process used for Internet financial transactions.

Subscribers also receive PASS CODE cards that include various methods and procedures for contacting the monitoring facility.

In addition to the basic services listed below, Convergent Technologies offers a variety of optional services. Your CTLLC representative can provide additional information upon request.

Test Signal Options Test signals are necessary to ensure your system is operational and transmitting signals to the Monitoring Station. A test signal will be transmitted from your system to the Monitoring Station based on the type of monitoring you select. Should the test signal fail for any reason, this is indicative of a system or telephone communications failure. Having such a failure places your facility at great risk should a fire alarm or security system alarm occur. The Monitoring Station would not receive notification of the alarm condition, and would not contact the local authority to alert them to the situation. Should a Test Signal fail to be received at the Monitoring Station, a call will be placed to the individual(s) identified on the Subscriber Monitoring Agreement if selected under Callback Options. A service call to resolve the system failure should be placed to CTLLC as soon as possible.

	\$420.00 annually	\$75.60 annually	\$344.40 annually	Cost Provided Upon Request

Back Up Communications Options

This option is highly recommended when monitoring Security Systems. Your CTLLC representative can provide additional information upon request.

Additional Charges or Maintenance Fees

Based upon account activity, and from time-to-time, it is necessary to charge additional maintenance fees for specific items beyond CTLLC's control. These items are identified below.

Item	Fee	Frequency
Call List alterations	\$7.75	Per addendum or revision.
Excessive or run-away signals (in excess of 3 per month)	\$1.55	Per signal.

Customer's payment for services hereunder shall be governed by Chapter 2251 of the Texas Government Code, as further set out in DIR Contract #DIR-SDD-2216.
