

**WORK AUTHORIZATION NO. 2**

**PROJECT: On Call Geotechnical Engineering and Material Testing**

This Work Authorization is made pursuant to the terms and conditions of the Williamson County Contract for Engineering Services, being dated **January 10, 2017** and entered into by and between Williamson County, Texas, a political subdivision of the State of Texas, (the "County") and **Rodriguez Engineering Laboratories, LLC** (the "Engineer").

Part 1. The Engineer will provide the following Engineering Services set forth in Attachment "B" of this Work Authorization.

Part 2. The maximum amount payable for services under this Work Authorization without modification is **\$50,000.**

Part 3. Payment to the Engineer for the services established under this Work Authorization shall be made in accordance with the Contract.

Part 4. This Work Authorization shall become effective on the date of final acceptance and full execution of the parties hereto and shall terminate on **September 30, 2017**. The Engineering Services set forth in Attachment "B" of this Work Authorization shall be fully completed on or before said date unless extended by a Supplemental Work Authorization.

Part 5. This Work Authorization does not waive the parties' responsibilities and obligations provided under the Contract.

Part 6. County believes it has sufficient funds currently available and authorized for expenditure to finance the costs of this Work Authorization. Engineer understands and agrees that County's payment of amounts under this Work Authorization is contingent on the County receiving appropriations or other expenditure authority sufficient to allow the County, in the exercise of reasonable administrative discretion, to continue to make payments under this Contract. It is further understood and agreed by Engineer that County shall have the right to terminate this Contract at the end of any County fiscal year if the governing body of County does not appropriate sufficient funds as determined by County's budget for the fiscal year in question. County may effect such termination by giving written notice of termination to Engineer.

Part 7. This Work Authorization is hereby accepted and acknowledged below.

EXECUTED this \_\_\_\_ day of \_\_\_\_\_, 20\_\_.

## LIST OF ATTACHMENTS

Attachment A - Services to be Provided by County

Attachment B - Services to be Provided by Engineer

Attachment C - Work Schedule

Attachment D - Fee Schedule

### **Attachment A - Services to be Provided by County**

Williamson County Road & Bridge Division personnel will provide project direction, review and oversight.

## **Attachment B - Services to be Provided by Engineer**

The following scope of services will be provided as requested by Williamson County (County) or the County's representative. The Engineer, Rodriguez Engineering Laboratories, LLC (REL) understands that the County has particular project requirements; therefore, scope of services and qualified staff is assigned to meet the needs defined in those specifications.

### **Construction Materials Sampling and Testing**

REL understands the importance of QC/QA testing of the construction process so that our clients obtain a quality-constructed project that both satisfies the project plans and the specifications. REL will provide construction materials sampling and testing services for the County on an as-needed basis for the Geotechnical Engineering and Materials Testing Projects; including both laboratory and field testing of soils, base, concrete, and hot-mix materials, using ASTM or TxDOT testing methods. The testing frequency will be based on the current TxDOT Guide Schedule of Sampling and Testing or as directed by the County. The testing services are including but not are limited to the following:

#### **Geotechnical Investigation:**

- Perform geotechnical investigation as requested by the County including borings, pavement cores, non-destructive testing, etc.
- Collect samples, perform laboratory testing, interpret field data, and prepare reports of substrate properties.
- Provide recommendations and prepare written geotechnical reports for pavement design, bridge foundation, select fill, etc.

#### **Soils Testing:**

- Perform soils testing as required by project specifications or as requested by the County for liquid limit, plasticity index, gradation, moisture/density relations, Texas triaxial, wet ball mill, bar linear shrinkage, soil -lime compression, CTB testing, resistivity of soils, organic content, soil pH, pH/lime series, PI/lime series, deleterious materials, sulfate content of soils, in-place density, thickness determination, pulverization gradation, etc.

#### **Hot Mix Asphaltic Concrete Testing:**

- Perform asphaltic mixture testing as required by project specifications or as requested by the County for voids in mineral aggregates, lab molded density, maximum theoretical specific gravity, gradation, asphalt content, boil test, indirect tensile strength, moisture content, draindown test, hamburg wheel-tracking test, overlay test, thickness, in-place air voids, etc.
- Test HMA pavement as required by project specifications or as requested by the County during installation for segregation profile, joint density, thermal profile, ride quality test, etc.
- Test HMA aggregate as required by project specifications or as requested by the County for L.A. abrasion, magnesium sulfate soundness, SAC, micro-deval, sand equivalent, etc. Hveem stability will be tested if needed.
- Review mix design of HMA as requested.

**Microsurfacing Mixture Testing:**

- Test microsurfacing aggregate as required by project specifications or as requested by the County for magnesium sulfate soundness, gradation, crushed face count, acid insoluble, SAC, and sand equivalent.
- Obtain a minimum of one binder and tack-coat sample per project/source if not pre-approved by CST/M&P before use.

**Seal Coat Testing:**

- Perform seal-coat aggregate testing as required by project specifications or as requested by the County for gradation, LA abrasion, magnesium sulfate soundness, SAC, pressure slake, freeze thaw, unit weight, absorption, angularity, deleterious material, decantation, flakiness index, etc.

**Portland Cement Concrete Testing:**

- Perform PCC testing as required by project specifications or as requested by the County for compressive strength, slump, air content, temperature test, etc.
- Perform concrete aggregate testing as required by project specifications or requested by the County for gradation, decantation, deleterious materials, L.A. abrasion, magnesium sulfate soundness, sand equivalent, organic impurities, fineness modulus, acid insoluble residue, etc.
- Review mix design of concrete as requested.

### **Attachment C - Work Schedule**

Rodriguez Engineering Laboratories, LLC will provide geotechnical engineering and construction materials testing services for Williamson County Road & Bridge Division (County). These services will be provided as requested by the County or County's representative on an as-needed basis for the Geotechnical Engineering and Materials Testing projects.

- Ø Minimum call-out charge for technician and equipment is 2 hours. Charges are accrued portal to portal.
- Ø The densities test unit rate is based on a minimum of 3 tests per trip.
- Ø Transportation charges are applicable for all field testing assignments including sample pick up.  
but, if the technician is already at the job site, there is no sample pick up charges.
- Ø Subconsultants' fees shall be approved previous to work beginning.
