Liberty Hill, TX 78642

I graduated from Lakeview High School in San Angelo, Texas and went on to study Diesel Technology at Grayson County College in Denison, Texas. In 1997 I opened James Baker Automotive, where we perform full service vehicle repair and service, some of which include: brake repair; oil and lube; mufflers and exhaust system, clutches, transmissions, and engine rebuilding. In addition, our business also provides automobile inspection services. In 1999, I expanded my business operations and started Liberty Hill Towing.

My wife, Susan Baker and I have lived in the ESD #4 area since 1999. My wife and I are very active and involved in our community and enjoy opportunities to serve. Susan is the Executive Director of Operation Liberty Hill. This is our community's food pantry and clothes closet that is a faith-based charity, that helps meet essential needs of local residents during times of crisis. Food, clothing and financial assistance is offered by friendly volunteers, who treat those in need with dignity and respect. I was a member of the Liberty Hill Fire Department Board of Directors, before I was appointed to the ESD #4 Board of Directors in 2013. I have enjoyed helping ensure that our rapidly growing community has safe fire protection and seeing the goal of building a new fire station to meet those growing needs become a reality.

I appreciate the opportunity to serve and whole heartedly believe in the ESD No. 4 Mission, which is a part of the WCESD No. 4 strategic plan and follows below:

- The Preservation of Life and Property is the Central Mission of WCESD No. 4. To perform this mission in a consistent and professional manner, we will at all times take into account the effect that service is having on those to whom it is being delivered. We will, to the best of our ability and to the fullest extent of our resources, strive to deliver our service in a manner in which we would want service delivered to us or our families.
