**O'Connor Traffic Signals
Williamson County Project No. 1907-333**

Change Order No. 1

Reason for Change

This Change Order adds a new item to compensate the Contractor for extra work to install conduits under existing roadway via "open-cut" method at Liberty Walk intersection and to repair the storm sewer pipes that were damaged while attempting directional drilling. Due to various utility conflicts encountered within the constrained right of way at Liberty Walk intersection, it is not feasible to install conduits under existing roadway by directional drilling as specified in the Contract. Conduit crossings have to be installed via "open-cut" method, which requires different types of equipment, additional traffic control and pavement repair, etc. This Change Order is for the work performed in July and August 2020 only. The conduit work at Liberty Walk intersection is not yet completed. The remainder will be included in the subsequent change orders.

This Change Order also subtracts bid quantities for conduit items that will not be used at Liberty Walk intersection after switching to open-cut method.

Following is a summary of the new item required for this Change Order:

ITEM	DESCRIPTION	QTY	UNIT
999-WC02	LIBERTY WALK - CONDUITS (OPEN CUT) AND STORM SEWER PIPE REPAIR	1	LS

This Change Order results in an increase of \$19,683.04 to the Contract amount, for an adjusted Contract total of \$873,186.54. The original Contract amount was \$853,503.50. Because of this Change Order, \$19,683.04 has been added to the Contract, resulting in a 2.31% net increase in the Contract cost. No additional days will be added to or deducted from the Contract as a result of this Change Order.

FORCE ACCOUNT DIARY: Acme Barricade set-out "Road Closure" for Liberty Walk Dr on the North side of O'Connor. Saw Cut and excavated to determine what was encountered during boring operations. Discovered a 60" RCP with approx 40" cover from the surface of Liberty Walk Dr. RCP had been penetrated by pilot bit during Bore operations. Procured materials to "patch" the penetration hole and performed repairs. Custom Crete provide quick cure "flowable fill" for the excavation. Once flowable fill had cured, trenching operations proceeded for Conduit Run #2. Installed 4-2" PVC for Conduit Run #2. Placed bedding material (sand) for Conduits, and utilized Sackrete for the trench back-fill. Surface cured to support vehicular traffic at approx 7:45pm, thus Road Closure equipment was removed and opened to traffic at by 8:00pm. Hauled off spoil materials.

Broke-Out and removed Sidewalk and significant amount of Rock to achieve 30" depth needed. Removed and hauled away spoils and debris. Picked up spoil pile from previous excavation (conduit) on the North side of O'Connor Dr. Purchased "cold mix" asphalt from Home Depot and installed in trench(s) crossing Liberty Walk Dr on the North side of O'Connor Dr. We were directed to perform this work as the "rapid-set" flowable fill had began to "dish-out" due to vehicular traffic. Completed initial measurement(s) and potential conduit routing for installation at the intersection of Great Oaks Dr @ O'Connor Dr. Repaired 3" Irrigation Water Main on the N/W Corner of Intersection. Cleaned-up work area.
