- (b) FarrWest will perform repairs for damage or failure occurring during *normal usage of equipment*. All associated costs, parts and labor with these repairs will be the responsibility of FarrWest, except where otherwise noted. Usually, these repairs can be completed on-site,

- but occasionally Farrwest may need to take equipment back to its facility for repair. Any equipment taken from location will be returned promptly once repaired.
- (c) FarrWest will be responsible for any and all sensor replacement, should a sensor fail to calibrate, **including** exotic sensors (ie. HCN or any sensor that doesn't have a 2 year warranty) except where otherwise noted.
 - (d) Instruments marked *Verification-only* will be maintained to their manufacturers specifications, usually a yearly calibration or optimization. These instruments will also receive an operational test during the normal service cycle. **For any repairs on verification-only equipment in excess of \$300, an estimate will be submitted to FarrWest's POC and will be invoiced separately pending approval.**
 - (e) All radiation equipment that requires calibration will be sent to a 3rd party, approved radiation lab for annual calibration and adjustment, at the expense of FarrWest. All equipment will be verified for proper working order during quarterly maintenance schedule. **For any repairs on radiation equipment in excess of \$300, an estimate will be submitted to FarrWest's POC and will be invoiced separately pending approval.**
 - (f) All chemical and biological equipment (Smiths Detection) will be verified to proper working order during scheduled maintenance visits. **For any repairs on chemical and biological equipment in excess of \$300, an estimate will be submitted to Williamson County and will be invoiced separately pending approval.**
 - (g) Due to cost and technology involved, FarrWest will not be responsible for the repair or maintenance of weather related modules or attachments bundled with gas detection, radiation, chemical and biological, or any other equipment. This includes, but is not limited too RAEMet Sensors. **For any repairs on weather stations, sensors, modules or other weather sensing/reporting equipment an estimate will be submitted to Williamson County and will be invoiced separately pending approval.**
 - (h) Instruments labeled by the manufacturer as "discontinued" or having reached "end of life" cannot always be maintained due to scarcity of repair parts and sensors. These instruments will be considered as "calibration-only". Calibration-only instruments receive the same interval calibration, but any repairs will be billed separately. All calibration-only instruments will be designated as such in this contract.
 - (i) All supplied equipment (Farrwest owned) will be provided with the accessories necessary for proper operation at the time of supply. Maintained equipment (Williamson County owned) is expected to have arrived with all necessary accessories at time of purchase. Replacement accessories (i.e. chargers, charging cradles, protective boots, etc) will be provided, up to 3% of the yearly cost of contract per instrument, per year. The cost for replacement accessories beyond this dollar amount will be the responsibility of Williamson County and will be invoiced separately.

Program Updates or Alterations

- (a) Sensor-type changes (i.e., replacing a Hydrogen Sulfide (H₂S) sensor with a Ammonia (NH₃) sensor) can be done at the request of Williamson County on supported equipment, but may require a change in contract amount to reflect higher cost of sensors and calibration standards.
- (b) If *additional* equipment is added to this program during the course of the contract, the contract will be amended for the cost of maintaining the new equipment. The maintenance pricing of additional equipment will be charged in accordance with current contract pricing and will be prorated for the remainder of the contract.
