

Taylor Murphy Substantial Amendment FY24 Action Plan

Proposed changes are outlined below:

Original Allocation and Project Description FY2024:

City of Taylor Murphy Street

The proposed water line improvements would replace existing undersized, 2-inch water mains, which do not meet current standards. These water mains also break often and require frequent repairs. The new line waterline will be approximately 1,100 linear feet (LF) of 8" waterline. The project would improve conditions to benefit households in the project vicinity, 5th and Murphy in Taylor TX.

FY24 Funding: \$659,000

Project came under budget.

Updated Allocations and Project Descriptions:

City of Taylor Murphy Street

The proposed water line improvements would replace existing undersized, 2-inch water mains, which do not meet current standards. These water mains also break often and require frequent repairs. The new line waterline will be approximately 1,100 linear feet (LF) of 8" waterline. The project would improve conditions to benefit households in the project vicinity, 5th and Murphy in Taylor TX.

FY24 Funding: \$312,021.24

City of Taylor Annie Street Waterline

Water improvements to replace existing undersized 2-inch water mains. New waterline will be approximately 910 linear feet (LF) of 8-inch water line on Annie Street between 7th Street and 4th Street.

FY24 Funding: \$346,978.76
