Work Experience

Project Manager

Sonterra Development, Jarrell, Texas

6/2004 - present

Lead and direct multiple residential and commercial development projects from the due diligence and acquisition of the property through the development of the infrastructure and entitlements all the way through to the end user. Manage and direct the communication between the company and state, county, and local officials. Work directly with the engineers and planners to make sure the company's vision is translated, produced, and kept on budget from conception through completion.

I led the development team that took this project from grass to finished development in 18 months. During this time my team applied for and received State TPDES approval, Water Permit approval, MUD Legislative approval, CCN for Sewer and Water approval, and local city and county approval of construction and plating for the development.

Manager

Agua Dulce Investments, Ltm., Austin, Texas

4/2003 - 4/2005

Assisted, guided, and consulted with development companies and land planners in the long process of taking specific developments through the administrative and legislative pathways to attain Municipal Utility District status. This process required multifaceted engineering, legal, and legislative knowledge.

Managing Partner

Agua Dulce, Wimberley, Texas

6/1996 - 4/2004

Managed the company's operations from soliciting new business, estimating, human resources, and project management. Successfully managed large accounts in excess of \$2,000,000. Worked closely with planners and engineers during the due diligence phase of planning for residential and commercial developments.

Vice President

Sweetwater Utilities, LLC, Austin, Texas

1/1998 - 5/2002

Co-founded this investor owned utility that manufactured, constructed, and operated small water and wastewater utilities. Sold the business to a national firm in 2002.

Education

9/1990 - 5/1997 Bachelor's of Science Degree in Biology, Texas State University, San Marcos, Texas

Attend yearly conferences dealing with subjects from Texas water law to urban planning and development.
