

***Draft Policy***

**Cable Television Use and Funding in County Facilities**

6-23-10

Williamson County facilities can utilize cable or satellite television services and/or service connections have them paid by the county's general fund, if approved in the annual budget and if available, for the following purposes:

- for usage by emergency or law enforcement personnel to monitor weather and/or emergency situations and related issues
- for usage in residential settings, such as housing for EMS personnel and the juvenile academy or at residential treatment centers and other residential uses
- for usage in community rooms or common spaces which are available for public usage and may also be used as meeting places in times of emergency

All others uses must be specifically approved by the commissioner's court before implementation, if funded out of general fund monies.

A "Cable Television Service Connection ("Service Connection") for Williamson County Departments provides cable television to a single address or building. The Service Connection can be installed only by and/or at the order of Williamson County Facilities or the Commissioners Court and/or their contractors. Service Connections may not be extended to another building or room by another department. If such an extension is identified, the extension and/or service connection may be disconnected and time/materials applied."
