## Williamson County Road Bond Program

Ronald Reagan Blvd North, Phase 3 Williamson County Project No. 11WC902

Change Order No. 5

Reason for Change

This Change Order adds locations of rock rip rap and rock berms to the project and adds a Contract Item to compensate the Contractor by force account for maintenance of the rock berms where grass has not been established due to the drought conditions.

Rock berms were installed according to the original plans from RM 2243 to SH 29. TBG, design consultant on seeding and grass establishment on this project, has recommended placing additional rock riprap and rock berms in this same area. The additional controls will be added at the original bid prices.

During the recent rain events, the rock berms that were previously installed have filled up with topsoil and debris that needs to be removed for proper function of the erosion controls. Due to the drought conditions, grass has not been established, which would have stabilized the drainage areas and prevented the need for the maintenance of the rock berms. A Force Account item will be added to compensate the Contractor for actual labor and equipment costs to remove the accumulated topsoil and debris from the rock berms and regrade the ditchlines.

Following is the new item required as a result of this Change Order:

| Item     | Description  | Unit | Qty     |
|----------|--|------|---------|
| 9003-000 | CLEAN ROCK BERMS AND REGRADE DITCHES (FORCE ACCOUNT) | DOL  | 8000.00 |

This Change Order results in a net increase of \$40,000.00 to the Contract amount, for an adjusted Contract amount of \$9,641,403.39. The original Contract amount was \$9,449,782.66. As a result of all change orders to date, including this change order, \$191,620.73 has been added to the Contract resulting in a 1.7% net increase in the Contract cost. No additional days will be added to or deducted from the Contract as a result of this Change Order.
