Georgetown, TX 78626

Project: Fleet Services Lighting LED Upgrade

Fleet Services

3101 SE Inner Loop

Georgetown, TX 78626

Total Fixtures Upgraded: 58
kW Reduced: 0.76
Avg kWh Rate: \$0.105
kWh Reduced: 3,251
Annual Utility Savings: \$366.93
Annual Maintenance Savings: (1) \$1,139.09
Inflation Rate: (2) 2.0%
Est. Discount Rate: (Cost of Capital) 8.0%
Cap Rate Basis: 5.0%
EPA Required Lamp Disposal: \$15
YOUR COST TO WAIT PER DAY: \$4

FSG's INVOICE AMOUNT: \$11,390.88
Projected Utility Rebate: \$0.00

NET INSTALLED COST:* \$11,390.88

*After Utility Rebate (which is not guaranteed by FSG)

Net Simple Payback: 7.56 yrs w/Maintenance Savings
Return On Investment: 13.2%

Internal Rate of Return: (IRR) 10% (Hurdle Rate)

Net Present Value: (NPV) \$721 (Today's value of future savings)

Added Real Property Value(3) \$30,120
(Improved NOI / Cap Rate)

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6-10
Annual Cash Flow:	\$1,506	\$1,536	\$1,567	\$1,598	\$1,630	\$8,653
Net Cash Flow:	(\$11,391)	\$1,536	\$1,567	\$1,598	\$1,630	\$8,653
Cumulative Cash:	(\$9,885)	(\$8,349)	(\$6,782)	(\$5,184)	(\$3,553)	\$7,849

(1) Maintenance savings is included in the net simple payback and cash flow years 1 & 2

(2) Inflation impacts years 2-10

(3) Real Property Value increases by reducing operating expenses thereby improving Net Operating Income (NOI)

PRESENT SYSTEM

Total kW: 2.53
Total kWh: 10,976

PROPOSED SYSTEM

Total kW: 1.78
Total kWh: 7,726

Total KW Saved: 0.76
Total kWh Saved: 3,251

BuyBoard

Fleet Services Lighting LED Upgrade

This proposal is base on rates provided through BuyBoard Contract 527-17, Energy Saving Lighting Products. Pricing on BuyBoard is for material AND installation labor only. Contract pricing is NTE (not to exceed).

1. Place order with FSG directly
2. Fax or email (info@buyboard.com) PO to BuyBoard noting "RECORD ONLY"
3. Products / Services delivered and invoiced by FSG
4. Payment made to FSG.

Project: Lighting Retrofit (LR)
Location: Fleet Services

Thank you for considering FSG's lighting proposal. We will provide all materials (unless otherwise requested), labor, and equipment to complete your project professionally according to all relevant electrical codes and in a timely manner.

Any utility rebates herein listed, are subject to the local utility company's rules and procedures. FSG cannot guarantee said rebate, but will provide all information needed to the utility to maximize the rebate on your behalf, if so desired.

Lighting waste disposal will follow local and EPA's regulations. Mercury-containing lamps will be recycled unless you have a preferred vendor to handle the proper disposal. Hazardous ballasts (PCBs) quantities are typically unknown at the start of any job. FSG and/or its contractor will properly store any hazardous ballast on site (at your location determination) and can coordinate disposal for you at an additional cost. Certificate of Destruction or Recycle will be forwarded to you at the address hereinabove listed.

WARRANTIES

FSG will honor the providing manufacturer(s) material and labor warranty as written. Any special accommodations shall be attach to this document as 'Exhibit A'. FSG warrants its own workmanship for 90 days. FSG will process all related claims on the customer's behalf.

TERMS & CONDITIONS

This proposal is valid for 90 days from the date issued. We appreciate the opportunity to serve your needs. If you have any questions, please don't hesitate to call or email.

EXCLUSIONS

Any fixture not specified in the audit documentation can be retrofitted, with your approval, at an additional unit price (to be attached).

It is assumed that the existing circuitry is properly maintained and adequate for the new fixture or retrofit that are to be installed. Any work on the electrical services need for code compliance, is NOT included in this price and would require an add/change order.

Texas Prompt Payment Act Compliance: Payment for goods and services shall be governed by Chapter 2251 of the Texas Government Code. An invoice shall be deemed overdue the 31st day after the later of (1) the date licensee receives the goods under the contract; (2) the date the performance of the service under the contract is completed; or (3) the date the Williamson County Auditor receives an invoice for the goods or services. Interest charges for any overdue payments shall be paid by licensee in accordance with Texas Government Code Section 2251.025. More specifically, the rate of interest that shall accrue on a late payment is the rate in effect on September 1 of licensee's fiscal year in which the payment becomes due. The said rate in effect on September 1 shall be equal to the sum of one percent (1%); and (2) the prime rate published in the Wall Street Journal on the first day of July of the preceding fiscal year that does not fall on a Saturday or Sunday.

Termination for Convenience: This agreement may be terminated at any time at the option of either party, without future or prospective liability for performance upon giving ninety (90) days written notice thereof. In the event of termination, County will only be liable for its pro rata share of services rendered and goods actually received.

Mediation: The parties agree to use mediation for dispute resolution prior to and formal legal action being taken on this Contract.

Venue and Governing Law: Venue of this contract shall be Williamson County, Texas, and the law of the State of Texas shall govern.

Environmental Impact Statement

Client: **Williamson County**
Project: **Fleet Services**
3101 SE Inner Loop

Annual Kilowatt Hours Saved: 3,251

According to the EPA, for each kWh saved, approximately 1.8 pounds of Carbon Dioxide (CO₂), .006 pounds of Sulfur Dioxide (SO₂), .003 pounds of Nitrogen Oxides (NO_x), and .043 milligrams of Mercury (Hg) are eliminated from future power plant emissions into our atmosphere annually.

CO₂ is a "Greenhouse Gas" while SO₂ contributes to acid rain formation and NO_x contributes to the tropospheric ozone form (Smog) and estuarial damage.

The Annual Pollution Reduction Impact of Your Project

Carbon Dioxide (lbs):	5,851	Nitrogen Oxides (lbs):	10
Sulfur Dioxide (lbs):	20	Mercury (grams):	0

For every 10,000 Kilowatt Hours saved the EPA has estimated the savings to be equivalent to planting **2.9 acres** of trees annually or equivalent to removing **1.4 cars** from our roads annually.

Your Lighting Project's Local Impact

Acres of Trees Planted:	1	Cars Removed:	0
--------------------------------	----------	----------------------	----------

The EPA does regulate the disposal of lighting products if they contain hazardous waste. Fluorescent lamps, HID lamps, and incandescent may contain some hazardous elements. **PCB** containing ballast are already federally regulated. If you are already classified as a hazardous waste generator you must follow the disposal and/or recycling regulations from the EPA. If you produce more than 100kg of hazardous waste per month, you are considered a hazardous generator. Lamps are classified as **Universal Waste** which does reduce some of the handling procedures.

All Generators of lighting waste products must have a **TCLP** test (Toxicity Characteristic Leaching Procedure) to identify potential hazards. The lamps cannot exceed 0.2 milligram per liter in order to pass. Failure to perform the test will automatically trigger the need for recycling. Your local landfill may not accept the lamps that pass. Ballast containing **PCB's** **MUST** also be disposed through incineration or EPA approved recycling. FSG prefers to incinerate PCB's. **Ballasts must have "NO PCB's" on them otherwise, they must be considered to have PCB's.**

FSG recommends recycling the lamps and incinerating the ballast to provide you with the safest disposal method and sound environmental practices. We can manage the entire project and minimize your potential exposure while achieving the high savings. All recycling/disposal certificates will be mailed to the address listed in the proposal.

DISCLAIMER

Please seek advice from the EPA at their website, local office, or national hotline for further details. FSG, its employees, managers, directors, officers or its agents are not ever considered to be the generator of the lighting waste related to this or any project. Our intent is to help our customers navigate through the federal and state regulations as best as we can. Please seek the advice of your own risk management staff, lawyers, or consultants to insure and protect yourself from liability. FSG, nor its employees are responsible for the EPA's projections on environmental benefits. The EPA conversion numbers can be found at www.epa.gov.

PRODUCT SPECIFICATIONS

2' x 4' EZPAN edgelit LED panel lights provide smooth and uniform light edge-to-edge for a clean, modern look. Install in drop ceilings or use optional surface, pendant or recessed (dry wall) mounting kits.

Constant Current, Class 2, 120-277V, 50/60Hz, 120V: 0.35A, 208V: 0.21A, 240V: 0.18A, 277V: 0.16A

Dimming Driver:

Driver includes dimming control wiring for 0-10V dimming systems. Requires separate 0-10V DC dimming circuit. Dims as low as 10%.

THD:

8.2% at 120V, 9.9% at 277V

Power Factor:

99.3% at 120V, 96.3% at 277V

Note:

All values are typical (tolerance +/- 10%)

LED Characteristics

Lifespan:

60,000-hour LED lifespan based on IES LM-80 results and TM-21 calculations

LEDs:

Long-life, High efficiency, micro-power, surface mount LEDs

Construction

IC Rating:

Suitable for insulated ceilings

Maximum Ambient Temperature:

Suitable for use in -30°C (-22°F) to 50°C (122°F)

Lens:

Frosted polystyrene

Mounting:

Recessed ceiling

Housing:

Lightweight aluminum housing, steel pan and junction box

Installation:

Standard integral T-bar clips secure the fixture to T-bars and prevent T-system separation

Finish:

Formulated for high durability and long-lasting color

Green Technology:

Mercury and UV free. RoHS-compliant components.

Other

Warranty:

RAB warrants that our LED products will be free from defects in materials and workmanship for a period of five (5) years from the date of delivery to the end user, including coverage of light output, color stability, driver performance and fixture finish. RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty.

5 Yr Limited Warranty:

The RAB 5-year, limited warranty covers light output, driver performance and paint finish. RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty.

Accessories:

STRP BPLATE - Bracket plate for mechanically joining fixtures, for runs need one less than fixture quantity. [Click here.](#)

STRP SHOOK - Suspension "S" hook and 9 1/2" chain. Sold in pairs, need 1 pair for each fixture. [Click here.](#)

JBSTRP - White flat cover for junction-box installations, sold individually. [Click here.](#)

Buy American Act Compliance:

RAB values USA manufacturing! Upon request, RAB may be able to manufacture this product to be compliant with the Buy American Act (BAA). Please contact customer service to request a quote for the product to be made BAA compliant.

Dimensions

Features

Traditional, fluorescent tube look; energy-saving LED technology

Surface-mount ready; accessories available for junction box or suspended mount

0-10V dimming

50,000-Hour LED lifespan

Ordering Matrix

¹ Available with the STRP440 only

FEATURES & SPECIFICATIONS

INTENDED USE — Suitable for applications requiring both exit sign and unit equipment. Attractive, 8" tall, streamlined design is great for above-the-door applications and other tight fits. Optional high-output version with remote lamps are ideal for emergency egress lighting. **Certain airborne contaminants can diminish integrity of acrylic and/or polycarbonate.** [Click here for Acrylic- Polycarbonate Compatibility table for suitable uses.](#)

CONSTRUCTION — Engineering-grade thermoplastic housing is impact-resistant, scratch-resistant and corrosion-proof. UL94V-0 flame rating. UV-stable resin resists discoloration from natural and man-made light sources.

Rugged unibody housing snaps together with no additional fasteners. Faceplate and back cover are interchangeable on housing. Positive snap-fit tabs hold faceplate securely, yet are easily removable for lamp compartment access. Universal, directional chevron inserts are easily removed and reinserted.

Uniform graphics illumination without shadows or hot spots. Letters are 6" high with 3/4" stroke, with 100 ft. viewing distance rating based upon UL924 standard.

LEDs mounted on primary circuit boards for sign illumination. Low-energy LED lamp in sign operates in normal (AC input) and emergency (DC input) modes.

Low-profile, integrated test switch/pilot light. Easily viewed bright red status indicator.

Unique track-and-swivel arrangement permits full range of direction of lamp head adjustment. Universal J-box mounting pattern. Tool-less access for maintenance. Conduit entry position on top of unit.

U.S. Patent No. 6,848,798; 6,499,866; 6,142,648; 5,797,673; D379,373; 5,526,251; D484,272; D473,672; 5,611,163; 5,646,502.

OPTICS — Twin LED lamp heads operate in emergency (DC input) mode with 12 series-parallel white LEDs in each head. Provides redundant light sources to ensure emergency lighting performance. The typical life of the exit LED lamp is 10 years.

ELECTRICAL — Dual-voltage input capability (120/277V). Edge connector on printed circuit board ensures long-term durability.

Current-limiting charger maximizes battery life and minimizes energy consumption. Provides low operating costs.

Short-circuit protection — current-limiting charger circuitry protects printed circuit board from shorts.

Thermal compensation adjusts charger output to provide optimum charge voltage relative to ambient temperature.

Regulated charge voltage maintains constant-charge voltage over a wide range of line voltages. Prevents over/undercharging that shortens battery life and reduces capacity.

Filtered charger input minimizes charge voltage ripple and extends battery life.

AC/LVD reset allows battery connection before AC power is applied and prevents battery damage from deep discharge.

Single multi-color LED indicator to display two-state charging, test activation and three-state diagnostic test. Test switch provides manual activation of 30-second diagnostic testing for on-demand visual inspection. Self-diagnostic testing for 30 seconds every 30 days, 30 minutes at 180-day interval, and 90 minutes annually. Diagnostic evaluation of LED light source, AC-to-DC transfer, charging and battery condition.

Battery: Sealed, maintenance-free nickel-cadmium battery delivers 90-minute capacity to emergency lamps. Two-state constant-current charge maximizes battery life and automatically recharges after battery discharge. Low-voltage disconnect prevents excessively deep discharge that can permanently damage the battery. Optional high-output battery to power both local and optional LED remote lamp heads simultaneously.

INSTALLATION — Top, end or back mounting. Housing snaps to canopy with positive-locking tabs. Cam locking pin secures housing to canopy.

Easily removed mounting knockouts. Conduit entry knockout for 1/2" flexible conduit. J-box pattern on back panel.

LISTINGS — UL damp location listed standard 50°-104°F (10°-40°C). Meets UL 924, NFPA 101 (current Life Safety Code), NEC and OSHA illumination standards.

WARRANTY — 5-year limited warranty. (Battery is prorated). Complete warranty terms located at www.AcuityBrands.com/CustomerResources/Terms_and_Conditions.aspx.

Note: Actual performance may differ as a result of end-user environment and application.

All values are design or typical values, measured under laboratory conditions at 25 °C.

Specifications subject to change without notice.

ORDERING INFORMATION

Lead times will vary depending on options selected. Consult with your sales representative.

LAMP PHOTOMETRICS

QUANTUM LED SERIES – SINGLE COVERAGE

3W Total White LEDs

Using a single unit at a typical 7.5' mounting height delivers an average illuminance of 1.0 FC over a distance of 24' on a 3' path of egress and 18' on a 6' path of egress.

Example of single LHQM LED exit illuminating a 3' path of egress

Example of single LHQM LED exit illuminating a 6' path of egress

QUANTUM LED SERIES – MULTIPLE COVERAGE

3W Total White LEDs

Using multiple units at a typical 7.5' mounting height delivers 25' center-to-center spacing on a 3' path of egress and 20' center-to-center spacing on a 6' path of egress.

Example of multiple LHQM LED exits illuminating a 3' path of egress

Example of multiple LHQM LED exits illuminating a 6' path of egress

EXTENDED RUN-TIME FOR HIGH-OUTPUT EXITS

IP710-LFZ

IllumaTech Slide Dimmer for LED 0-10V Power Supplies, 1200VA, 10A LED, 120/277 VAC

IllumaTech Slide Preset Electro-Mechanical 0-10V Slide Dimmer for use with LED or Fluorescent Ballasts and Power Supplies, suitable for use with Class 1 or Class 2 wiring, 1200VA @ 120VAC, 1500VA @ 277VAC, 10A LED/Electronic Ballast 120/277VAC, 60Hz, 28mAmps maximum sinking current, single pole or 3-way control when used with 3-way switch - White, Ivory & Light Almond

- INNOVATIVE – Designed for use with LED fixtures using 0-10V power supplies
- ADVANCED – No power pack required for switching
- EXCEPTIONAL – Superior quality and dimming performance
- FLEXIBLE – Can be used in a single-pole or 3-way installation (with a 3-way switch, sold separately)

Technical Information

Product Features

Action: Standard ON/OFF

Available Color Kits: Ivry-I Wht-W Gry-G Blk-E Brwn-B Light Almond-T, R-Red

Color: White, Ivory, Light Almond

Color Change Kit: IPKIT Series

Frequency: 60 Hz

Light: None

Load Rating: 1200VA

Load Type: Electronic 0-10VDC Fluorescent and 0-10VDC LED Power Supply

NAFTA Compliant: Yes

Ordering Notes: Incl White, Ivory and Light Almond Color Kit

Preset: Preset

Protection: Radio/TV Filter

Standards and Certifications: cCSAus

Style Name: IllumaTech

Switch Type: Single-Pole & 3-Way

Type: Slide

Voltage: 120/277 VAC

Wallplate: Order Separately

Warranty: 5-Year Limited
