10' corner post to support gates will be set 5 plus ft in concrete. All other post will be drilled approx 18" deep and then cleaned of any loose dirt and then the post will be pounded in the middle of this hole an additional 16". If we hit very hard grd then measurements may be adjusted a little. Then one 80 lb bag of Sak crete will be placed around each post. Once concrete is dry the additional dirt to cover the hole will be tamped. Pounding the post will create a compacted solid bottom for the post along with the concrete shelf to help keep the post from sinking in years to come. I have been installing this Priefert fence for 10 years.
