Maintenance and Support Escalation Procedures

PHMC shall reasonably determine the Severity Level of errors and will make commercially reasonable efforts to provide a resolution designed to solve or temporarily by-pass a reported error, pursuant to the below protocols. If such error has been corrected in a maintenance release, Licensee must install and implement the applicable maintenance release; otherwise the update may be provided in the form of a temporary fix, procedure or routine, to be used until a maintenance release containing the permanent update is available. In all cases, resolution of issues by PHMC will require the Licensee to assist in the descriptive documentation and/or reproduction of the error, identify a Licensee contact person with whom PHMC can maintain contact to arrange for analysis, testing, systems, and other resources and other tasks in support of resolution of the Licensee's error and to whom status reports and requests for resources can be addressed.

Priority Level HIGH: PHMC promptly initiates the following procedures: (1) assigns Client Support representative to correct the error on an expedited basis; (2) provides ongoing communication on the status of an update; and (3) begins to provide a temporary workaround or fix. Priority Level HIGH error means the (i) system is severely impacted or completely shut down, or (ii) system operations or mission-critical applications are down.

Priority Level MEDIUM: PHMC assigns a Client Support representative to begin an update, and provides

additional, escalated procedures as reasonably determined necessary by PHMC Client Support staff. PHMC exercises commercially reasonable efforts to provide a workaround or include a fix for the Severity Level 2 errors in the next maintenance release. A Severity Level 2 error means (i) the system is functioning with limited capabilities, or (ii) is unstable with periodic interruptions, or (iii) mission critical applications, while not being affected, have experienced significant system interruptions.

Priority Level LOW: PHMC may include an update in the next maintenance release. A Severity Level 3 error means there (i) are errors in fully operational production systems, (ii) is a need to clarify procedures or information in documentation, or (iii) is a request for a product enhancement.
