SCAN AND TAG UPDATE
FIXED ASSET MANAGEMENT PROGRAM

Dear Ms. Simonton,

RCI offers an Annual Update for our Fixed Asset Management Program (FAMP).

SCAN AND TAG UPDATE

RCI will send a team of specialists to your facilities and place bar codes on all items with a value of \$500.00 or more that do not have an existing bar code tag. We will record the new bar coded information (bar code number, description, manufacturer, model, serial number, location, etc.) and enter it into the Fixed Asset Management Program. Our specialists will scan all new and previously bar coded items. This scanned information will be uploaded into our software, which compares the existing database to the newly scanned data. This allows the system to identify items that were not found during the inventory and/or were not properly entered into the database.

As we proceed through the annual update, the project coordinator will conduct an on-going daily reconciliation to locate items initially showing up as "items not scanned." This effort will reduce the majority of "common-sense" omissions caused by locked doors, items missed in the scanning process, etc. We include the RCI reconciliation in your pricing proposal and it will reduce the number of assets that will require additional research upon completion of the project. Please note that remaining items in the "items not scanned" report will need to be researched by your staff.

Sincerely,

A handwritten signature in black ink that reads "Linda LaField". The signature is written in a cursive, flowing style.

Linda LaField
Account Manager
