## Project Summary

Williamson County (“Client”), headquartered in Georgetown TX, requested that Netsync Network Solutions (“Netsync”) submit a statement of work (SOW) outlining Client’s upcoming Webex App Deployment project.

The purpose of this project is to configure the Cisco Webex App to replace the Cisco Jabber client. Netsync will configure Cisco Webex Control Hub and Cisco Unified Communications Manager (CUCM) for softphone calling with the Cisco Webex App. Deployment of the Cisco Webex application to end-user devices will be Client’s responsibility. Client must provide a list of users that will need softphone capabilities within the Cisco Webex App for proper configuration. The Cisco Webex App will use the same device type (Client Services Framework) as the Cisco Jabber client in CUCM. All licensing is Client’s responsibility.

## Project Objectives

- Discover and plan for Webex App configuration and deployment.
- Configure Webex Control Hub for hybrid calling.
- Verify Cisco Expressway Configuration for off-network Webex App usage.
- Upgrade Cisco Expressway as required.
- Configure Single Sign On (SSO) on appropriate applications.
- Implement configuration changes for proper Webex App softphone calling.
- Perform testing and validation of successful implementation.
- Provide up to eight hours of Day 1 support.

## Project Scope and Phases

---

### Discovery

#### Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
  - a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
  - b. Identify project goals, success criteria, and timeline, including but not limited to:
    - i. Review SOW.
    - ii. Confirm contacts needed to gain entry and perform work in the buildings.
    - iii. Confirm any holidays or “non-working” hours for the installation.
    - iv. Confirm any Client-required change control processes and any potential impacts that these processes may have on the installation schedule.
    - v. Schedule technical discovery meeting(s).
    - vi. Review and discuss invoicing preferences and applicable billing milestones.

### Planning

1. Netsync will work with Client to verify access for appropriate systems.
2. Netsync will work with Client to develop a test plan and obtain Client approval and signature.

### Equipment Receipt, Staging, and Delivery

No equipment will be received as part of this project. This is a services-only project.

### Implementation

Implementation will begin only after Discovery and Planning are 100% complete. Client representative must be onsite to receive hardware and sign packing slip prior to installation.

1. Netsync will configure Webex Control Hub for hybrid calling.
  - a. Enable users in Webex Control Hub, up to 50, for Webex app calling by enabling the proper licensing.
  - b. Enable hybrid calling in Webex Control Hub.
2. Client may need to verify and claim their domain in Control Hub for proper functionality.
  - a. Netsync can work with Client to set up proper DNS records.
3. SSO will need to be configured for the proper domain when users log in to the Webex App.
4. Netsync will verify Cisco Expressway configuration.
  - a. For users that want to use the Webex App when not connected to the local Williamson County network, they will connect through the Cisco Expressway cluster using Mobile and Remote Access.
    - i. Netsync will verify the configuration of the Expressway cluster and remedy any issues that may be present.

- ii. If any SSL certificates are required, Client will be responsible for the purchase of these certificates.
  - iii. Netsync will upgrade the Expressway cluster, if required.
- 5. Netsync will verify that SSO is configured and functional for Webex Control Hub and Communications Manager.
  - a. If SSO is not functional or configured, then Client will need to assist with the proper configuration and will need to provide a supported Identity Provider (IdP).
- 6. Netsync will configure Cisco Unified Communications Manager as appropriate for the Cisco Webex App.
  - a. Client is already using the Client Services Framework (CSF) device type, TCT (iOS) device type and BOT (Android) device type for the current Cisco Jabber deployment. The Cisco Webex App uses the same device types.
  - b. Up to 50 Webex App devices will be configured at a maximum for this project. Client must provide a list of appropriate users.
  - c. Client has requested that Netsync set up two groups as part of this project:
    - i. 15 users of various device types will be set up as a test pilot.
    - ii. An additional 35 users will be set up after completion of the test pilot.

## Testing and Validation

Netsync will test functions as described in the pre-approved test plan.

## Knowledge Transfer

1. Netsync will provide four hours of knowledge transfer for up to five Client attendees. Before the project start, Netsync will work with Client to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
  - a. Features of products and technologies as deployed in the solution.
  - b. Review of the as-built documentation to familiarize Client with the overall solution and key configuration details.
  - c. Basic administration and common operational tasks.
  - d. Reinstallation and/or reconfiguration in case of failure.
  - e. Monitoring, testing, and maintaining the products deployed in the solution.
  - f. Warranty and support procedures for all products deployed in the solution.
  - g. Additional Client questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by Client will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

**Note:** Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide Client all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

## Project Prerequisites

---

1. Client will provide Netsync all necessary hardware and information on current environment.
2. Client will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
3. Client will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
4. Client will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
5. Client will obtain all necessary work permits.
6. Client will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
7. Client will provide parking passes and adequate parking for the Netsync project team.
8. Client must provide a supported IdP as listed at <https://help.webex.com/en-us/article/lfu88u/Single-Sign-On-Integration-in-Control-Hub>.
  - a. Other SSO providers may work, but may not be fully supported.
9. Any publicly-signed SSL certificates that are required to be purchased will be Client's responsibility.
10. Client is responsible for deployment of the Webex App on end-user devices.
11. Client will comply with all physical and environmental requirements per vendor specifications.

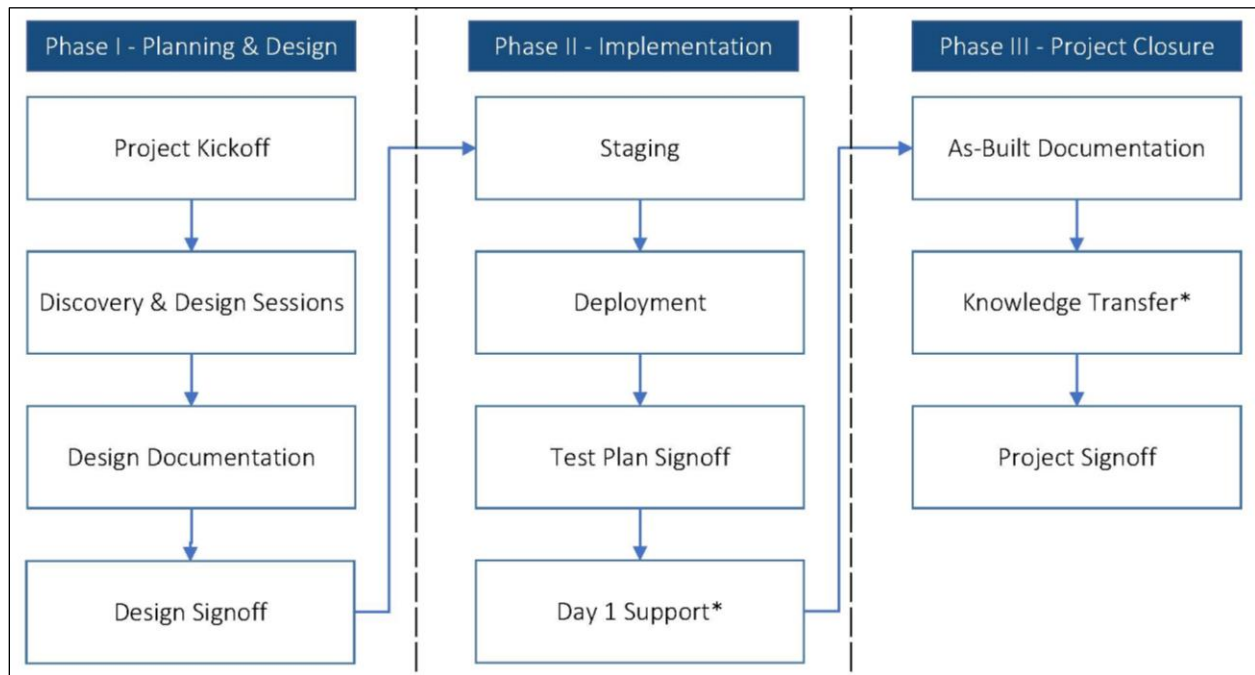

## Project Management

---

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with Client, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure Client expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to Client's applicable project portal. The PM will ensure status information clearly reaches Client to also include milestone updates.
- Lead project meetings with Client and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to Client.

## Project Management Office (PMO) Project Lifecycle

\* Denotes that the step in the process may or may not be applicable based on SOW.

## Project Updates

- Client will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If Client wishes not to use the Netsync project portal, then Client has the option to request direct email correspondence from the Netsync PM for all communication and updates.

## Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

- The PM and Client project team will identify required changes.
- The PM will submit a Project Change Request Form (CR).
- The PM will submit the CR to Client for subsequent approval and sign-off.
- Client will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

## Project Documentation

Netsync will provide Client the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
<b>Documentation</b>

### Deliverables Acceptance

Client will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

## Project Risks and Assumptions

---

1. Client will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. Client will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If Client's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. Unless otherwise noted, all estimates are based on a single implementation trip, per site. Client may be charged additional fees for additional onsite meetings.
4. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
5. Client delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
6. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
7. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If Client requires a 100% on-site engagement, then Client must notify Netsync before agreeing to this SOW.
8. If Client requires a copy of Netsync's standard Certificate of Insurance (COI) with Client-added endorsements, then it should allow up to 10 business days for delivery.
9. Netsync is not responsible for the functionality of Client-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
10. Anything not specifically stated in this document is outside the scope of this SOW.

## Service Level Agreement

---

### Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- Client will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide Client the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A Client project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

## Pricing and Fees

---

### Fee Type

**Fixed Price:** The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

### Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between Client and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing:** A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with Client, the AM, and Accounting for appropriate invoicing.

Netsync will send Client invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

### Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.
