

Policy Regarding Motorized Vehicle Access: County Service Area (CSA) 6

Pursuant to Section 21116 of the California Vehicle Code, the County of Yolo hereby prohibits the use of roadways located on County Service Area (CSA) 6 levees and canal banks by motor vehicles without the permission of the maintaining agency. "Motor vehicles" is defined to include all motorized vehicles defined in the California Vehicle Code Section 100 *et seq.*, including, but not limited to, motor vehicles, electric vehicles, golf carts, motorcycles, motorized bicycles, mini bikes, all-terrain vehicles, quad runners, and go-carts.

Pursuant to California Vehicle Code section 21116, this Public Access Policy shall be made available for inspection at the County's Administration Office, located at 625 Court Street in Woodland, California.

In those areas of the CSA 6 levee and canal systems dedicated as a right-of-way for roadway use by the general public on the levee crown (Front Street, County Road 116A and County Road 116B), as the system exists today and as it is modified in the future as a result of on-going construction to the levee and canal systems, the following policy shall apply:

1. (a) No motor vehicle may be driven upon or be parked on the CSA 6 Facilities except as follows:
 - District vehicles;
 - Federal, State or Local Government vehicles performing duties related to flood control operations and maintenance or public safety;
 - Organizations or entities who have written agreement approved by the County's Board of Supervisors authorizing their use of CSA 6's facilities; and
 - Persons owning land adjacent to CSA 6's Facilities may use the CSA 6 Facilities for access in conjunction with their farming operations with the prior written approval of the County Administrator's Office.
- (b) The County Administrator may grant permits for the temporary vehicular access to roadways on CSA 6 levees, provided such temporary vehicular access is in the interest of CSA 6 to allow such use or is deemed to be of a public benefit. Such temporary permission shall not apply and may not be granted for public gatherings, social events, or other similar requests by private individuals or groups for their personal benefit.
2. Except where required for maintenance or repair of CSA 6 Facilities, no motor vehicle (including those referred to in Paragraph 1(b) through 1(d) above), may be driven on any portion of CSA 6 Facilities other than upon the established access roads, approved ramps or public roads.

Persons found to be in violation of the above policy may be prosecuted and may be subject to civil liability. Motor vehicles parked on CSA 6 facilities in violation of the above policy are subject to citation and towing at the owner's expense.
