Description of Levels of Restriction

Nonspendable Fund Balance - These are amounts that cannot be spent due to their nature (e.g. prepaid amounts) or are amounts that must be maintained intact legally or contractually (e.g. corpus of a permanent fund).

Restricted Fund Balance - These are amounts that are constrained for a specific purpose by external parties, constitutional provision or enabling legislation. The constraints are imposed by either laws, or federal or state grantors or creditors. The constraints can only be removed by the imposing party. For example, most grant funds would be restricted to the purposes of the grant; Measure P - 2008 bond proceeds are restricted to the maintenance and expansion of the Davis library; Proposition 42 gas sales tax funds are restricted to certain expenditures for public streets and roads.

Committed Fund Balance - These are amounts that are constrained for a specific purpose by the Board of Supervisors. A board resolution or a budget resolution is required to impose, remove or change the constraints placed on these resources. For example, the Habitat and Resource Management Program Fund was established by the Board of Supervisors to finance the implementation of the Cache Creek Area Plan; the Demeter Fund was established by the Board of Supervisors to create an endowment which would generate a perpetual income after completion of de-allocation.

Assigned Fund Balance - In funds other than the General Fund, these amounts are any remaining positive amounts not classified in the above-listed categories. For example, in a capital project fund, any positive balance that is not nonspendable, restricted or committed, is automatically reported as assigned fund balance. In the General Fund, assigned amounts reflect intended uses of resources and may be constrained for a specific purpose by the County Administrator or the County Chief Financial Officer. Such constraint can be changed or removed by the same county officers. Such assignment and subsequent changes should be reported at least annually to the Board as part of the Recommended Budget. Assigned amounts should not cause a deficit in unassigned fund balance in the General Fund. For example, a portion of the year-end balance of the General Fund may be set aside to eliminate a projected budget deficit in the next fiscal year; this amount, as well as year-end encumbrances in the General Fund would constitute assigned fund balance.

Unassigned Fund Balance - These are amounts that have no restriction of any kind. By definition, a positive unassigned fund balance can exist only in the General Fund. In other governmental funds, there can only be negative unassigned fund balance, that is, residual deficit.
