Sacramento, CA 95814

Project Title: 2023 Pavement Preservation Project

Applicant: Yolo County

Project Location: The project affects approximately 21 miles of rural roadways in the southernmost portions of the County including: 3 miles of County Road (CR) 104 from Tremont Rd to Montgomery Ave; 4.7 miles of South River Road from CR 142 to the Sacramento County limit; 1 mile of Courtland Rd from South River Rd to State Route (SR) 84 (Jefferson Blvd); 1.7 miles of Waukeena Rd from Morse Rd to Courtland Rd; 4.8 miles of Z Line Rd from N. Courtland Rd to Clarksburg Rd; 1.3 miles of Gaffney Rd from Z Line Rd to SR 84; 2.5 miles of N. Courtland Rd from Z Line Rd to SR 84; and 2.3 miles of a portion of CR 144 south of CR 142.

Project Description: The project involves pavement rehabilitation of approximately 21 miles of Yolo County roads. Rehabilitation of roads varies depending on conditions of the roads and constitute base repairs, surface preparations, crack sealing, overlaying with hot mix asphalt concrete paving, pulverizing (grinding in place) of existing pavement and placing hot mix asphalt concrete, cape seal (asphalt rubber chip + slurry seal), and shoulder backing. The rehabilitation process will also include re-blading roadside ditches where applicable and constructing new ditches 1000 feet long in one section of historically flood-prone areas to mitigate road surface flooding along CR 104.

All construction will occur within the existing road prisms and within the existing right-of-way. No widening, right of way acquisition or increase in road capacity will occur. All the road dig-outs will be within existing structural sections. No trees will be removed as part of this project. The project will include a Storm Water Pollution Prevention Plan (SWPPP) and sediment control measures to address possible debris from construction operations.

Exempt Status: The project is categorically exempt from further environmental review based on Section 15301(c) of the California Environmental Quality Act (CEQA) Guidelines.

Reasons why project is exempt: Section 15301(c) allows a "Class 1" Categorical Exemption for the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination. A Class 1 exemption includes "Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities (this includes road grading for the purpose of public safety)." The project is for pulverizing in place and application of hot mix asphalt on various Yolo County roads in the general Clarksburg and South Davis areas that are currently paved and involve no increase in capacity of any existing roadway.
