YOLO COUNTY BOARD OF SUPERVISORS

AGENDA & SUPPORTING MATERIALS

June 6, 2023

COUNTY BOARD OF SUPERVISORS
CHAIR, OSCAR VILLEGAS, DISTRICT 1
VICE-CHAIR, LUCAS FRERICHS, DISTRICT 2
GARY SANDY, DISTRICT 3
JIM PROVENZA, DISTRICT 4
ANGEL BARAJAS, DISTRICT 5

BOARD OF SUPERVISORS CHAMBERS
625 COURT STREET, ROOM 206
WOODLAND, CA 95695

NOTE: Effective January 10, 2023, all meetings of the Yolo County Board of Supervisors will be held in person at the Board Chambers, located at 625 Court Street, Woodland, Room 206. Please note: Zoom participation will no longer be supported. While the Board chambers are open for public attendance, you are strongly encouraged to observe the livestream of the Board meeting at www.yolocounty.org (once on this page, click Live). In addition to live in person public comment, members of the public are welcome to submit written comments by 4:00 p.m. the Monday prior to the meeting to provide Board Members and interested members of the public a reasonable opportunity to review comments in advance of the meeting. Any written comments received will be available as an attachment corresponding with the agenda item. (www.yolocounty.org) Written comments should be emailed to clerkoftheboard@yolocounty.org or send to 625 Court Street, Room 204 Woodland, CA 95695. If you are submitting written comments on a particular item on the agenda, please identify the agenda item number. All written comments are distributed to Board Members, filed in the record, and will not be read aloud. Written comments received after 4:00 p.m. on Monday will be distributed to Board members and made available to the public for review after the Clerk's office opens the following morning.

GERARDO PINEDO
COUNTY ADMINISTRATOR

PHILIP J. POGLEDICH
COUNTY COUNSEL

Please note:

- During Board meetings, Supervisors will not review e-mails or other electronic communications on agenda items.

9:00 A.M. CALL TO ORDER

Open Meeting

1. Call to Order.

2. Pledge of Allegiance.

3. Roll Call.

4. Consider Approval of Agenda.

5. **Public Comment:** To be afforded a brief period of time to speak before the Board of Supervisors, please refer to further instructions at the end of the agenda on how to electronically participate and submit your public comments. Note: per the Ralph M. Brown Act, Board members may briefly respond to statements made or questions posed during the public comment period on items that are not on the agenda, but may not take action on such items. You may also share your thoughts with the Board of Supervisors by submitting a written statement via email to clerkoftheboard@yolocounty.org.

- On the Yolo County website: www.yolocounty.org.

By: _____
Julie Dachtler, Senior Deputy Clerk

NOTICE

If requested, this agenda can be made available in appropriate alternative formats to persons with a disability, as required by Section 202 of the Americans with Disabilities Act of 1990 and the Federal Rules and Regulations adopted in implementation thereof. Persons seeking an alternative format should contact the Clerk of the Board for further information. In addition, a person with a disability who requires a modification or accommodation, including auxiliary aids or services, in order to participate in a public meeting should contact the Clerk of the Board as soon as possible and at least 24 hours prior to the meeting. The Clerk of the Board may be reached at (530) 666-8195 or at the following address:

Clerk of the Board of Supervisors
County of Yolo
625 Court Street, Room 204
Woodland, CA 95695

Note: Board of Supervisors meetings stream live at www.yolocounty.org and also videotaped for later broadcast on local cable stations. Check your local carrier for broadcast dates and times.

NOTICE

Pursuant to Government Code section 84308, members of the Board of Supervisors are disqualified and not able to participate in any agenda item involving contracts (other than competitively bid, labor, or personal employment contracts), franchises, discretionary land use permits and other entitlements if the Board member received more than $250 in campaign contributions within the preceding 12 months (starting January 1, 2023) from the applicant or contractor, an agent of the applicant or contractor, or any financially interested participant who actively supports or opposes the County's decision on the agenda item. Members of the Board of Supervisors who have received, and applicants, contractors or their agents who have made, campaign contributions totaling more than $250 to a Board member within the preceding 12 months (starting January 1, 2023), are required to disclose that fact for the official record of the subject proceeding. Disclosures must include the amount of the campaign contribution and identify the recipient Board member(s) and may be made either in writing to the Clerk of the Board of Supervisors prior to the subject hearing or by verbal disclosure at the time of the hearing.

PUBLIC PARTICIPATION INSTRUCTIONS:

1. Effective January 10, 2023, all meetings of the Yolo County Board of Supervisors will be held in person at the Board Chambers, located at 625 Court Street, Woodland, Room 206. Please note: Zoom participation will no longer be supported. While the Board chambers are open for public attendance, you are strongly encouraged to observe the livestream of the Board meeting at www.yolocounty.org (once on this page, click Live).

2. In addition to live in person public comment, members of the public are welcome to submit written comments by 4:00 p.m. the Monday prior to the meeting to provide Board Members and interested members of the public a reasonable opportunity to review comments in advance of the meeting. Any written comments received will be available as an attachment corresponding with the agenda item. (www.yolocounty.org) Written comments should be emailed to clerkoftheboard@yolocounty.org or send to 625 Court Street, Room 204 Woodland, CA 95695. If you are submitting written comments on a particular item on the agenda, please identify the agenda item number. All written comments are distributed to Board Members, filed in the record, and will not be read aloud. Written comments received after 4:00 p.m. on Monday will be distributed to Board members and made available to the public for review after the Clerk's office opens the following morning.

County of Yolo

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 6.
Board of Supervisors **Community Development**

Meeting Date:	06/06/2023
Brief Title:	At-Large Planning Commissioner Selection Process
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Stephanie Cormier, Principal Planner, Department of Community Services, x8041
Supervisorial District Impact:	Countywide

Subject

Affirm existing selection process for At-Large Planning Commissioner and authorize the Board Chair and Vice-Chair to interview applicants and make a recommendation on filling an At-Large Commissioner vacancy at a future Board of Supervisors meeting. (No general fund impact) (Lindbo/Cormier)

Recommended Action

A. Affirm existing selection process for filling At-Large Planning Commissioner vacancies and appoint the Chair and Vice-Chair to an Ad Hoc Subcommittee to interview applicants; and

B. Make a recommendation on an appointment to fill a current vacancy at a future Board of Supervisors meeting.

Strategic Plan Goal(s)

County Mandated Service

Reason for Recommended Action/Background

The Yolo County Planning Commission consists of seven community members appointed by the Board of Supervisors. Each Supervisor appoints one Commissioner, subject to Board concurrence, and two 'At-Large' Commissioners may be nominated by any Supervisor and are appointed by majority vote. On January 29, 2019, the Board of Supervisors confirmed the selection process for appointing At-Large Planning Commissioner vacancies consistent with the approach taken in January 2017, in which the Board Chair and Vice-Chair review applications and interview selected candidates, followed by a recommendation to the full Board (Attachment A).

One of the two At-Large positions on the Commission has recently been vacated when Marcia Gibbs' term expired in January of this year and the County has taken steps to recruit and fill the vacancy by advertising for the position in February, with a deadline for receiving applications no later than February 25th. One application was received February 20th, and, in an attempt to solicit additional candidates, the application submittal date was extended to April 30th, when a second application was received April 11th. Both applications were submitted in a timely manner. Staff has been asked to return to the Board to evaluate the procedure and offer any new strategies or provide guidance on the selection process.

Although the process for selecting At-Large Planning Commissioner vacancies has varied over time, staff believe the approach most recently taken in 2019 is consistent with Planning Commission membership requirements set forth in the County Code (Section 2-2.1602), which is included for reference as Attachment B.

It has been staff's longstanding recommendation that the At-Large Planning Commissioner positions be carefully considered with respect to residency and/or business conducted within the unincorporated and rural areas of the County to ensure the unincorporated community is well represented. Additionally, the At-Large positions serve to diversify representation from various sectors of the unincorporated area, which augment the public trust and enhance the Commission's decision-making platform.

Consistent with steps taken in 2019 to fill the last At-Large vacancy, staff recommends the Board appoint the Chair and Vice-Chair to an Ad Hoc Subcommittee to review the two application submittals and conduct candidate interviews, then return to the full Board with a recommendation. The recommendation may be for appointment of a single candidate from the two application submittals or, instead, to propose further review, including interviews, of additional candidates. At the time of recommendation, any Supervisor may also nominate a new candidate for consideration, which may result in additional rounds of interviews to ensure the Board has sufficient information to make a decision.

Brief Title: Board Reports
From: Board of Supervisors
Staff Contact: Board of Supervisors

Subject

Action items and reports from members of the Board of Supervisors, including announcements, questions to be referred to staff and reports on various 2x2s and meetings with other agencies. (Board of Supervisors)

A. Gibson House Ad Hoc. (Supervisors Sandy & Provenza)

B. Committee on Capital Investments. (Supervisors Saylor & Sandy)

C. Consider recommendation by the Board Chair and Vice Chair to appoint Marcia Gibbs as an At-Large member of the Yolo County Planning Commission for a term expiring January 31, 2023. (Supervisors Saylor & Sandy)

Recommended Action

Recommended Actions A-B:
Action items and reports from members of the Board of Supervisors, including announcements, questions to be referred to staff and reports on various 2x2s and meetings with other agencies.

Recommended Action C:
This action is to consider a recommendation by the Board Chair and Vice Chair to appoint Marcia Gibbs as an At-Large member of the Yolo County Planning Commission to a term expiring January 31, 2023.

One of the two at-large Planning Commission positions is vacant, beginning on February 1, 2019, due to the expiration of the term of former Planning Commissioner Jack Kasbergen. At the January 29, 2019 meeting of the Board of Supervisors, on a 5-0 vote the Board authorized the Board Chair and Vice-Chair to screen applications, interview candidates and make a recommendation to the Board of Supervisors regarding the appointment of an At-Large Planning Commissioner. This motion was adopted with the

understanding that any member of the Board may make a different nomination at the time the Board considers this recommendation. (See Attachment A.) This process was consistent with that followed by the Board of Supervisors in the most recent previous appointment of an At-Large Planning Commission appointment. (See Attachment B.)

In order to assure that a qualified pool of applicants for this appointment is considered, the application period was extended two additional weeks and additional announcements were broadcast. Four Yolo County residents have applied for this appointment. (Eileen Allen, Ashok Khera, Marcia Gibbs and Nancy Lea). The applications have been provided to all Board members as they were received and copies are attached). On March 4, 2019, Board Chair Saylor and Vice Chair Sandy along with Community Development Director Leslie Lindbo interviewed all four applicants for this appointment. Each candidate was asked the same eight questions. (See attachment C.)

Based on review of the candidate's backgrounds and their responses to the questions, the panel recommends Marcia Gibbs of Winters for appointment to the vacant At-Large Planning Commissioner position.

Yolo County Planning Commission Interview Questions
March 4, 2019

1. Tell us a little bit about you and why you are interested in serving on the Yolo County Planning Commission?

2. What is your sense of the role of a Planning Commissioner?

3. What do you see as the planning priorities for Yolo County?

4. What do you see as the biggest challenges facing the Planning Commission in Yolo County?

5. Describe your decision making style and values you would bring into your role as a Planning Commissioner.

6. We all wear many hats. Community member. Advocate for causes we care about. How do you think you can best balance the other hats you wear, with the role of a Planning Commissioner?

7. The Planning Commission often considers complex issues with fellow commissioners that may have a different philosophy or point of view. Please describe a time when you worked with a group of individuals to address a complex challenge?

8. The Planning Commission has decision-making authority. However, their decisions can be appealed to the Board of Supervisors. How would you handle a situation where the Board of Supervisors' decision differs from yours?

Meeting Date: 01/29/2019

Brief Title: Selection Process For At-Large Planning Commissioner

From: Taro Echiburu, Director, Community Services

Staff Contact: Taro Echiburu, Director, Community Services, x8045

Subject

Authorize the Board Chair and Vice Chair to screen applications, interview candidates and make a recommendation to the Board of Supervisors regarding the appointment of an at-large Planning Commissioner. (No general fund impact) (Echiburu)

Recommended Action

A. Authorize the Chair and Vice-Chair to review applications and interview candidates for the at-large Planning Commissioner position; and

B. Upon completion of the application review and candidate interviews, direct the Chair and Vice-Chair to return to the full Board with all applications and a recommendation for Board action which may include additional interviews of one or more applicants before the full Board.

Strategic Plan Goal(s)

Operational Excellence
Sustainable Environment
Flourishing Agriculture

Reason for Recommended Action/Background

The purpose of this item is to confirm the Board's support for the application review and interview process initially discussed on January 15, 2019 for the at-large Planning Commission seat.

The Yolo County Planning Commission is comprised of seven members appointed by the Board of Supervisors. Each Board member appoints one Commissioner, subject to Board concurrence, from their respective district and two at-large commissioners are voted in by all Board members. One of the two at-large positions on the Planning Commission is vacant due to the expiration of the term of Jack Kasbergen. Yolo County

Code provisions relating to candidate qualifications and appointments to the Planning Commission are included as Attachment A to this Board letter (See Section 2-2.1602). The current members of the Planning Commission and other information relevant to the current composition of the Commission is provided in Attachment B.

As discussed on January 15, the Chair proposes a selection process that entails initial application review and candidate interviews by the Chair and Vice-Chair, who would then return to the Board with a recommendation. The recommendation may be for appointment of a single candidate from the applicant pool. But the recommendation could instead include, among other things, a proposal for further review (including interviews) of one or more candidates. At the time of the recommendation, all other applications will be available to the Board for review and all candidates may be discussed at the time of the Chair and Vice-Chair recommendation. The discussion could lead to the nomination of a different candidate for appointment from the applicant pool or additional steps in the appointment process, such as a second round of interviews or other steps to ensure all candidates are fully vetted and that each Board member has sufficient information to make a decision.

Recommended Actions A-B:

Action items and reports from members of the Board of Supervisors, including announcements, questions to be referred to staff and reports on various 2x2s and meetings with other agencies. (Board of Supervisors)

Recommended Action C:

With a vacancy in one of the two at-large Planning Commission positions beginning on February 1, 2017, the position has been publicly noticed and applications formally sought since December 4, 2016. Since that time, four have applied (Spencer Defty, Trini Campbell, Mel Smith and Erica Jones) and their applications have been provided to all Board members (copies of these

applications are publicly available upon request to the clerkoftheboard@yolocounty.org). At the January 10, 2017 Board of Supervisors meeting, the Board appointed the Chair and Vice-Chair to an Ad Hoc Subcommittee to interview each applicant and make a recommendation on an appointment during the January 24, 2017 Board meeting. Following interviews, the Ad Hoc Subcommittee's recommendation is to appoint Trini Campbell.

ATTACHMENT B

Article 16.

Planning Commission

Sec. 2-2.1601. Authority.

The provisions of this article have been enacted pursuant to the provisions of Chapter 3 of Title 7 of the Government Code of the State (Planning and Zoning Law). (§ 3, Ord. 122)

Sec. 2-2.1602. Membership.

The Planning Commission shall consist of seven (7) rotating County resident members appointed by the Board. Five (5) members shall be selected, one nominated by each district supervisor and thereafter appointed by majority vote of the Board of Supervisors. The remaining two (2) members shall be selected at large and may be nominated by any Board member, with appointment thereafter by majority vote. At all times during the recruiting process, all reasonable measures to recruit suitable candidates shall be used, including but not limited to those measures customarily used to seek candidates for vacant positions on other County boards, commissions, and committees.

(§ 1, Ord. 122, as amended by § 1, Ord. 430, § 1, Ord. 957, eff. September 8, 1983, § 1, Ord. 1070, eff. February 4, 1988,§ 2, Ord. 1337, eff. September 1, 2005, and § 2, Ord. 1479, eff. January 12, 2017)

Sec. 2-2.1603. Jurisdiction.

The Planning Commission shall be lawfully constituted and have jurisdiction to proceed to act as provided by law upon the appointment of the members thereof by an order of the Board duly entered in the minutes and upon each of such members taking and filing an oath of office as provided by law. (§ 2, Ord. 122)

Sec. 2-2.1604. Rules for the conduct of business.

The Planning Commission, by resolution, shall adopt such rules and regulations governing the conduct of its business as the Commission deems appropriate, which rules shall be consistent with this Code and all provisions of State laws. (§ 1, Ord. 843, eff. April 26, 1979)

Sec. 2-2.1605. Quorum: Commission action: Tie votes.

A majority of the duly appointed members of the Planning Commission shall constitute a quorum for the conduct of Commission business. Action by the Planning Commission shall be taken only on the affirmative vote of a majority of the members then present, excluding those who abstain due to a conflict of interest, but including those who abstain for any other reason.

In the event there is a tie vote on any motion pending before the Planning Commission or Board of Zoning Appeals, the chairman shall call for any further motions of any member on the subject. In the event no further motions are made, or that such further motions also result in a tie vote, the chairman shall call for a motion to declare the Commission or Board deadlocked. If the declaration of a deadlock is passed by a majority of a quorum, or if the vote on the motion of a deadlock is also a tie vote, the chairman shall declare a deadlock.

The declaration of deadlock shall be considered a denial of the matter and shall be appealable to the Board of Supervisors to the same extent and in the same manner as if the Commission or Board had denied the request. The Clerk of the Board of Supervisors is hereby authorized and instructed to waive the applicable filing fee for any appeal resulting from a declaration of a deadlock. (§ 2, Ord. 843, eff. April 26, 1979, as amended by § 7, Ord. 1178, eff. April 27, 1995)

Sec. 2-2.1606. Board of Permit Appeals.

The Planning Commission hereby is designated as the Yolo County Board of Permit Appeals pursuant to Section 65903 of the Government Code of the State for the purpose of hearing and determining appeals from the decisions of the Zoning Administrator or for reviewing such decisions on its motion or the motion of the Zoning Administrator pursuant to Section 8-2.225 of Article 2 of Chapter 2 of Title 8 of this Code.

The procedure for such appeals shall be as set forth in Section8-2.225 of Article 2 ofChapter 2 of Title 8 of this Code relating to appeals to the Planning Commission.

The Planning Commission, sitting as the Board of Permit Appeals, may reverse or affirm, wholly or partly, or may modify any order, requirement, decision, or determination upon which the appeal was taken and may make such order, requirement, decision, or determination as should be made.

The action of the Planning Commission, sitting as a Board of Permit Appeals, shall be appealable to the Board of Supervisors as provided in Section 8-2.225 of Article 2 ofChapter 2 of Title 8 of this Code.

The action of the Board of Permit Appeals to approve or disapprove any project which has been appealed to it shall constitute approval or disapproval by the County pursuant to Section 65950 of the Government Code of the State. If the action of the Board of Permit Appeals is appealed to the Board of Supervisors, such appeal shall stay the effective date of the County's approval and shall toll the time limits set forth in said section. (§ 2, Ord. 888, eff. September 11, 1980)

Sec. 2-2.1607. Community Redevelopment Law.

(a) *Jurisdiction.* The Planning Commission hereby is authorized to perform all functions delegated to a planning commission by the California Community Redevelopment Law (Part 1 of Division 24 of the Health and Safety Code of the State, commencing with Section 33000).

(b) *Appealability of actions: Standing.* Any decision of the Planning Commission pursuant to this section may be appealed to the Board by filing an appeal with the Clerk of the Board within fifteen (15) days following the Planning Commission's action. The Board shall sustain, modify, reject, or overrule the Planning Commission's decision and may either declare its decision to be final or, in its discretion, remand the matter to the Planning Commission.

Any aggrieved person shall have standing to file such appeal, including the executive director of any redevelopment agency affected by the decision.

There shall be no filing fee for any such appeal. (§ 1, Ord. 1019, eff. September 26, 1985)

Sec. 2-2.1608. Historic Preservation Commission.

The Planning Commission hereby is designated as the Historic Preservation Commission. The main duties and responsibilities of the Historic Preservation Commission shall be as follows:

(a) To establish various criteria, guidelines and Standards to carry out the intent of the Historic Preservation ordinance codified in Chapter 11 of Title 8 of the Yolo County Code;

(b) To maintain a comprehensive inventory of historic landmarks and historic districts within the County; publicize and update it periodically;

(c) With the help and cooperation of the Historical Advisory Committee, to recommend to the Board of Supervisors the designation of historic landmarks and historic districts;

(d) To participate in administering regulations pertaining to historic landmarks and historic districts.

The secretary of the Commission shall keep minutes of all meetings of the Commission and shall file a copy of the minutes with the Clerk of the Board of Supervisors. Meetings of the Commission shall be held, and notice given in conformance with California Government Code Sections 54951.1 - 54961 (The Ralph M. Brown Act). (§ 1, Ord. 1080, eff. August 18, 1988)

Sec. 2-2.1609. Business License Appeals Board.

The Planning Commission hereby is designated as the Business License Appeals Board pursuant to Section 12-1.203 of the County Code for the purpose of hearing and determining appeals from the decisions of the Business Licensing Officer. The procedures for such appeals shall be as set forth in Article 5 of Title 12 of the Yolo County Code.

The Planning Commission, sitting as the Business License Appeals Board, may reverse or affirm, wholly or partly, or may modify any order, requirement, decision, or determination upon which the appeal was taken.

The action of the Planning Commission, sitting as the Business License Appeals Board, shall be appealable to the Board of Supervisors as provided in Section 8-2.225 of Article 2 of Chapter 2 of Title 8 of this Code.

The action of the Business License Appeals Board to approve or disapprove any project which has been appealed to it shall constitute approval or disapproval by the County. If the action of the Business License Appeals Board is appealed to the Board of Supervisors, such appeal shall stay the effective date of the County's approval or disapproval. (§ 3, Ord. 1275, eff. December 6, 2001)

Sec. 2-2.1610 Board of Building Appeals.

The Planning Commission hereby is designated as the Board of Building Appeals pursuant to Section 7-1.04 of the County Code for the purpose of hearing and determining appeals from the decisions of the Chief Building Official; and pursuant to Section 7-1.11 of the County Code for the purpose of hearing and determining appeals from the decisions made by the Chief Building Official in his/her capacity as the Fire Chief. The Board of Building Appeals shall serve as the Housing Appeals Board described in Section 108.8 of the California Building Code (2007 edition). Such appeals shall be filed within fifteen (15) days of the decision appealed from and shall otherwise be governed by the procedures set forth in Article 2 of Title 8 of the Yolo County Code. The Planning Commission, sitting as the Board of Building Appeals, may reverse or affirm, wholly or partly, or may modify any order, requirement, decision, or determination upon which the appeal was taken. The action of the Planning Commission, sitting as the Board of Building Appeals, shall be appealable to the Board of Supervisors as provided in Section 8-2.225 of Article 2 of Chapter 2 of Title 8 of this Code. The action of the Board of Building Appeals to approve or disapprove any project which has been appealed to it shall constitute approval or disapproval by the County. If the action of the Board of Building Appeals is appealed to the Board of Supervisors, such appeal shall stay the effective date of the County's approval or disapproval. (§ 2, Ord. 1420, eff. May 10, 2012)

Planning Commission

Purpose: This commission helps develop and maintain a county general plan; to prepare specific plans based on the general plan and drafts of such regulations, programs and legislation as may be required for the systematic execution of the general plan and to recommend such plans and measures to the board of Supervisors for adoption; to hold a public hearing on any proposed zoning ordinance or amendment to a zoning ordinance and, after the hearing, to render a decision in the form of a written recommendation to the Board of Supervisors; to ear and decide applications for conditional uses or criteria for determining such matters, and applications for variances from the terms of the zoning ordinance; to periodically review the capitol improvement program of the county; and to perform such other functions as the Board of Supervisors may provide.

Authority: County Code: 2-2.1601 based on CA Gov. Code section 65100; Local Authority – Ordinance No. 122 (5/20/30); amended by Ordinance Nos. 430, 957, 1070, 1073, 1337 and 1479 (12/13/16).

Board of Supervisors **County Service Areas**

Meeting Date:	06/06/2023
Brief Title:	LSCE Arsenic Contract Amendment
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Kimberly Villa, Community Services Analyst, Department of Community Services, x8431
Supervisorial District Impact:	District 3

Subject
Approve third amendment to Agreement No. 19-253 with Luhdorff & Scalmanini Consulting Engineers, Inc. for the engineering and design of the arsenic treatment facility at Wild Wings County Service Area to extend the term for one additional year through June 30, 2024. (No general fund impact) (Lindbo/Villa)

Recommended Action
Approve third amendment to Agreement No. 19-253 with Luhdorff & Scalmanini Consulting Engineers, Inc. for the engineering and design of the arsenic treatment facility at Wild Wings County Service Area to extend the term for one additional year through June 30, 2024.

Strategic Plan Goal(s)
Safe Communities

Reason for Recommended Action/Background
The Canvasback well in the Wild Wings County Service Area (CSA) is currently on "Emergency Standby" status due to exceeding the State arsenic standards. In October 2019, the CSA issued a request for proposals (RFP) for an arsenic treatment project to reduce arsenic levels in both Wild Wings wells (Canvasback and Pintail wells). On December 17, 2019, the County entered into an agreement with Luhdorff & Scalmanini, Consulting Engineers (LSCE) to oversee the arsenic treatment system project for the Wild Wings CSA wells (Attachment A). This project was anticipated to be completed in December 2021. LSCE completed analysis on water demands and conceptual treatment options. An amendment was entered to conduct pilot testing of the conceptual treatment options for additional information on the options available. In June 2021, the Canvasback well had to be taken completely offline due to diminished water levels. The project was put on hold as a result of the diminished water levels. In May 2022, the Board of Supervisors approved an amendment to extend the term of the LSCE agreement an additional year through June 30, 2023. Since this last extension, the plans and specification of construction have been drafted, and staff plans to take the design out to bid in 2023. Additional engineering is required to ensure the construction bidder builds the arsenic facility according to plan.

The current contract term is set to expire on June 30, 2023. The proposed third amendment to Agreement No. 19-253 (Attachment B) will extend the term of the Agreement with LSCE for one additional year, through June 30, 2024 to allow sufficient time to oversee project construction.

Collaborations (including Board advisory groups and external partner agencies)
County Counsel, Wild Wings County Service Area Advisory Committee

Competitive Bid Process/Vendor Performance
A competitive bid process was completed in 2019. Luhdorff & Scalmanini, Consulting Engineers was the selected bidder.

Vendor Performance

The Department confirms Luhdorff & Scalmanini has performed satisfactorily on the current agreement.

To: The Chair and Members of the Board of Supervisors

Consent-General Government # 15.

Board of Supervisors **County Administrator**

Meeting Date: 12/17/2019

Brief Title: Wild Wings CSA Arsenic Treatment Project Contract

From: Mindi Nunes, Assistant County Administrator

Staff Contact: David Block, Planner, County Administrator's Office, x6610

Subject

Approve contract with Luhdorff & Scalmanini, Consulting Engineers in the amount of $304,385 to oversee the completion of the arsenic treatment system project for the Wild Wings County Service Area. (No general fund impact) (Nunes/Block)

Recommended Action

Approve contract with Luhdorff & Scalmanini, Consulting Engineers in the amount of $304,385 to oversee the completion of the arsenic treatment system project for the Wild Wings County Service Area.

Strategic Plan Goal(s)

Thriving Residents
Safe Communities

Reason for Recommended Action/Background

In 2008, the State's arsenic maximum contaminant level (MCL) decreased from 50 micrograms/liter to 10 micrograms/liter for drinking water. Since then one of the two community drinking water wells at the Wild Wings County Service Area (CSA), the Canvas Back Well, has been on "Emergency Standby" status due to exceeding the new State arsenic MCL standard. This status eliminates the use of the Canvas Back Well for drinking water purposes in the Wild Wings CSA. The CSA is seeking an arsenic treatment project to reduce arsenic levels in both Wild Wings water wells to 50 percent of the maximum contaminant level, in order to meet state arsenic requirements, provide for a 5% buffer in meeting the State requirement and return the Canvas Back well back to active status.

Luhdorff & Scalmanini, Consulting Engineers was awarded the contract to oversee the completion of the project, which is expected to take 22 months and have an anticipated completion date of October 2021, assuming the project kicks off in January of 2020. The

total budgeted amount in the contract is $304,385. It is anticipated that the Wild Wings CSA will be able to fund this cost, as well as all additional costs associated with the project, and that no outside funding assistance will be needed. However, additional funding options, including Proposition 68 funding and state loans, are still being explored.

Collaborations (including Board advisory groups and external partner agencies)

Wild Wings County Service Area Advisory Committee

Competitive Bid Process

Request for Qualifications (RFQ) Service Requested: Engineer to Design Arsenic Treatment System for the Wild Wings County Service Area

Evaluation Criteria Included in RFQ

- General Information (5 points)
- Relevant Firm Experience (15 points)
- Team Experience and Qualifications (15 points)
- Project Understanding and Approach (15 points)
- Approach to Project Management (10 points)
- Other Factors (10 points)

Max Points: 70

Bids Received (based on qualifications)

Bidder	Points
Luhdorff & Scalmanini, Consulting Engineers	96
Coleman Engineering	87.5

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$304,385
Amount budgeted for expenditure	$304,385
Additional expenditure authority needed	$0
One-time commitment	Yes

Source of Funds for this Expenditure	
General Fund	$0
CSA Budget	$304,385

FILED

DEC 24 2019

BY Julie Dachs
DEPUTY CLERK OF THE BOARD

AGREEMENT NO. 19-253
(Agreement for Arsenic Treatment Design at Wild Wings County Service Area)

THIS AGREEMENT ("Agreement") is made and entered into this 17th day of December, 2019, by and between the **County of Yolo**, a political subdivision of the State of California ("County") and **Luhdorff & Scalmanini Consulting Engineers, Inc.**, a California corporation ("Consultant").

WITNESSETH

WHEREAS, the County is authorized by Government Code Section 23004 to make contracts as necessary for the exercise of its powers; and

WHEREAS, the County is authorized by Government Code Section 31000 to contract with persons specially trained, experienced, expert and competent to perform special services such as architectural and engineering; and)

WHEREAS, the County desires to obtain architectural and engineering services; and

WHEREAS, the County circulated and distributed a Request for Qualifications ("RFQu"), an excerpt of which is attached as Exhibit A; and

WHEREAS, the Consultant submitted a statement of qualifications, an excerpt of which is attached as Exhibit B; and

WHEREAS, Consultant has represented and warrants to the County that it has the necessary training, experience, expertise and competency to provide the services, goods and materials that are described in this Agreement, at a cost to the County as herein specified; that it will be able to perform the herein described services at minimum cost to the County by virtue of its current and specialized knowledge of relevant data, issues, and conditions; and that it will do so in a manner consistent with and furthering of the Values of Yolo County; and

WHEREAS, Consultant represents and warrants that neither Consultant, nor any of its officers, agents, employees, contractors, subcontractors, volunteers, or five percent owners, is excluded or debarred from participating in or being paid for participation in any Federal or State program; and

WHEREAS, Consultant further represents and warrants that no conditions or events now exist which give rise to Consultant or any of its officers, agents, employees, contractors, subcontractors, volunteers or five percent owners being excluded or debarred from any Federal or State program; and

WHEREAS, Consultant understands that the County is relying upon these representations in entering into this Agreement.

NOW, THEREFORE, the County and the Consultant agree as follows:

I. BASIC SERVICES

A. Consultant shall furnish and perform the following services in accordance with Exhibits A-B, and in a manner satisfactory to the County Administrative Officer or his/her written designee ("Administrator"): Comprehensive preliminary engineering through final design and permitting, bidding, construction, and commissioning. These services include the following tasks and subtasks:

Consultant's Scope of Work includes all project elements to assist the County with the design and construction of an arsenic treatment system for the Wild Wings CSA Public Water System. The work plan is detailed below and includes all tasks from data analysis and treatment system selection through installation, startup, and commissioning.

The tasks are arranged in two phases, Phase 1 and Phase 2, and generally in the order they will be completed. Phase 1 is completion of the preliminary engineering analysis through the final design, permitting and environmental compliance with CEQA. Phase 2 is the completion of bidding, construction, commissioning, training and final permitting. After the completion of Phase 1, the County will have the information required to either directly fund the project or seek outside funding sources (e.g. loan or grant applications).

Consultant shall provide project management throughout the entirety of project and work with the County staff, the Wild Wings CSA representatives, the water system operators (SUSP), regulatory agencies, contractors and vendors to complete the scope of work described herein, with the objective of commissioning a fully functioning and permitted arsenic treatment system for use.

Consultant shall provide subconsultants for electrical design, structural design, and environmental review to complete the project. Consultant shall provide oversight of all subcontractors to ensure that the work is carried out per industry standards, Consultant's specifications, and County requirements.
The Consultant-designated Project Manager will be the primary point of contact throughout the project. The Project Manager shall provide the County with regular updates via phone, email, and at regularly scheduled meetings regarding project progress, findings, recommendations, schedule, and budget.

Consultant's Scope of Work shall be completed in the following tasks:

<u>Phase 1: Preliminary Engineering through Final Design</u>

Task 1: Production & Demand Analysis

Consultant's work shall begin with an analysis of the available production and demand data for the Wild Wings CSA. Consultant understands that there is a gap in production data from 2011 through early 2018, so the first task is to obtain the available data from the County and system operators (presumably production data

from before 2011 and since 2018) and demand data from the County's meter records. Consultant shall review all available data, including records from DDW, and water system records or SCADA, to determine if there is enough information to properly size the arsenic treatment system. If it is determined that more information is necessary, Consultant shall review other similar water systems in the area (Woodland, Esparto, Davis, etc.) to define maximum or minimum demand factors. A memo will be prepared to qualify the information and define the water demand factors pertaining to this system that will be used for treatment system sizing in later tasks, which are the Maximum Day Demand (MDD) and the Peak Hour Demand (PHD).

Deliverables for Task 1:

- Memo #1 discussing production data and demand analysis defininig MDD and PHD.

Meetings for Task 1:

- Meeting #1: Kickoff with County, Wild Wings CSA and Operators to review objectives and data.
- Coordination meetings with the County and Operators, as needed, to obtain and discuss data.
- Meeting #2: Memo review meeting to discuss findings and next steps.

Task 2: Conceptual Treatment & Operational Strategies Design

Under Task 2, Consultant shall develop conceptual arsenic treatment and operational strategies from the water quality data, pump station schematics, well construction information, water supply requirements and water system information. The demand information in Task 1 will form a basis for the required water supply of the system and level of treatment to meet the water system demands from both wells. Design considerations will also include County and Operator preferences, existing water quality, cost, site layout, waste handling, chemical feed, pilot testing, operations and maintenance, and any other factors deemed necessary for the comparison of the different treatment options. Consultant shall present the conceptual treatment and operational strategies in a memo which discusses the considerations associated with each treatment type and provides a comparison of the treatment options.

Deliverables for Task 2:

- Memo #2 discussing the Conceptual Treatment & Operational Strategies Design, with comparison of the alternatives in terms of life cycle cost and operational complexity and supporting figures for each alternative.

Meetings for Task 2:

- Coordination meetings with the County and Operators, as needed, to obtain and discuss data.
- Meeting #3: Memo review meeting to discuss findings and next steps.

Task 3: RFP for Vendor Treatment Systems

- To carry through the conceptual alternatives developed in Task 2, Consultant shall seek information from treatment system vendors to provide more detailed descriptions and costs of the individual treatment options and pre- or post-treatment requirements for each technology. Under Task 3, Consultant shall develop a Request for Proposals (RFP) to solicit proposals from treatment vendors that will enable a side-by-side comparison of the treatment system options (an outline of the RFP is at the end of this section).
- Vendors will be invited to present proposals for adsorptive media or coagulation/filtration, whichever they feel is the best option given existing information. The RFP will require a cost estimate for the proposed treatment system and details of the system specifications, including but not limited to: system size and system components, operation description, pretreatment and chemical requirements, operation and maintenance cycles, replacement media cycles, solids generation, backwash/regeneration requirements, control requirements, and arsenic removal efficiency. The vendors will be required to indicate whether pilot testing is required to guarantee performance of the proposed treatment system and to provide a cost of pilot testing. Performance guarantees will be provided for each system in terms of arsenic reduction and anticipated media life expectancy.
- The RFP will include a basis of design with a description of the Wild Wings facilities as they exist now, including water quality data for both the Canvas Back and Pintail wells, anticipated operating cycles, and design parameters for treatment systems. Conceptual treatment strategies from Task 2 will be presented to the vendors.
- The RFP will be sent to selected vendors known to Consultant from prior projects and review of literature. Consultant shall hold discussions with vendors and provide written addendums during the proposal period. The proposal period is assumed to be 3 weeks from issuance of RFP to receipt of proposals.
- Consultant shall review vendor proposals and evaluate cost, track record of arsenic treatment, and adherence to the requirements of the RFP. Consultant shall prepare a memo for the County that recommends selection of a vendor or multiple vendors for pilot testing different treatment systems. A meeting will be held to discuss the proposals following Consultant's memo. The objective at the end of this meeting is to select a vendor to proceed with through the completion of design, either with or without pilot testing of their system, or to select a group of vendors to conduct pilot testing. It is important to note that DDW will require pilot testing if the Wild Wings CSA is to pursue funding from the State Revolving Funds (SRF).

Deliverables for Task 3:

- Vendor RFP Document
- Memo #3 reviewing vendor proposals with recommendations

Meetings for Task 3:

- Coordination meetings with the County and Operators, as needed, to obtain and discuss data.
- Meeting #3: Memo review meeting to discuss findings and next steps.

Conceptual Outline for Vendor RFP Document (Task 3)

1. Project Information
    a. Wild Wings water system information
    b. Canvas Back and Pintail well construction
    c. Pump station schematics
    d. Water quality information
    e. Pilot test parameters
    f. Pilot test report requirements
        - Optimization strategies
            - Coagulation/filtration
                - Chemical feed volumes, automation
                - Solids volume and anticipated annual waste volume
                - Backwash frequency, volume, fate
            - Adsorption
                - pH adjustment
                - Regeneration volume, frequency
                - Eluent volumes, fate
        - Treatment levels
        - Startup/mothball costs and protocols
        - Chemical storage considerations

2. Vendor proposal requirements
    a. Qualifications of vendor, years in operation
    b. Current examples of arsenic treatment in operation for drinking water
    c. Cost quote for pilot test
    d. Cost estimate for installed system
    e. Pilot test equipment
        - Description
        - Connection and waste disposal requirements
        - Test duration minimum and expected
    f. Installed system
        - Installation requirements
            - Connections, pipes, valves, pumps, tanks, enclosures, etc.
        - Power demands
        - Specifications
            - Sizes of treatment systems and associated equipment
            - Access requirements for operations, maintenance, and materials handling
        - Operations manuals

Task 4: Pilot Testing of Selected Vendor Systems (if required)

Under Task 4, Consultant shall assist with pilot testing of the selected system(s) as

determined in Task 3. Consultant shall manage the installation, connection, and pilot testing under Task 4. This will include any permitting, pipe and pump modifications, or discharge handling. Consultant shall coordinate pilot testing with vendors, SUSP, and the County for connection of the vendor systems to both wells. Consultant shall collect water samples for lab analysis, quality assurance, and verification of system performance. Each vendor will bring their own pilot testing trailer and connect the trailer to the system. Consultant assumes there will be one week of pilot testing by all vendors simultaneously, and that the trailers will be manned by the vendors during operation.

Consultant shall visit the field daily to assess operations and QA/QC of the pilot testing. Independent water quality testing is assumed to be needed to confirm treatment operation. Water samples are assumed to be collected three times throughout the week to verify performance of the pilot systems. Each water quality sampling event includes a raw and treated sample tested for arsenic, iron, manganese, and general chemistry. Only one raw sample will be collected, and one treated sample for each pilot unit.

County's Operator may conduct water quality sampling.

Following pilot testing, the vendors will supply a report summarizing the findings in accordance with the RFP requirements. Consultant shall evaluate the vendor reports and provide a memo to the County summarizing the feasibility and selected treatment system after evaluating the performance and life- cycle cost comparisons of each system, including site or well-head modifications and operations and management considerations. The results of this study will be used in selection of a system to best serve the needs of the County.

Deliverables for Task 4:

- Pilot test results, QA/QC sample results
- Memo #4 presenting pilot study reports and updating design information from previous tasks

Meetings for Task 4:

- Vendor meetings as needed
- Meeting #5: Review meeting to discuss results and recommended treatment system.

Pilot Testing Cost Assumptions:

- Vendor costs for pilot testing is not included in Consultant's fee proposal.
- Water quality samples from pilot testing is not included in Consultant's fee proposal (it is assumed the County's existing laboratory services will be utilized).

Task 5: Treatment System Design

Under Task 5, Consultant shall develop the design of the facilities required to obtain contractor bids for the installation of the treatment system and upgrades to the existing production facilities. This task will incorporate the selected treatment system from the previous tasks. The design process includes development of a Basis of Design Memorandum and the design plans and specifications for contractor bidding. To the extent required, Contractor shall perform permitting activities (discussed under Task 7) to obtain design reviews from outside agencies concurrently with the design development.

The design will identify modifications to the well and upgrades to existing facilities to implement the selected treatment system, and any other upgrades associated with system control, maintenance, waste discharge, materials handling, power requirements, or other needs. Upgrades will also consider other improvements to the existing system such as the PLC controls and SCADA system that can be completed concurrently with the treatment system installation. Consultant's electrical engineering sub-consultant will prepare a design that meets the County and operator preferences for the electrical upgrades.

A pre-design meeting shall be coordinated with the County, County's Water/Wastewater Operator (currently S.U.S.P.), the control integrator, Consultant, and key sub-consultants to establish preferences for controls and operation.

Design Elements:

Consultant's design includes the engineering disciplines in Civil, Mechanical, Electrical and Structural. The design will involve the following elements:

- Modifications of existing facilities: Pump selection, well-head modifications, treatment system connections, piping modifications.
- Chemical feed and handling: New and existing chemical feed systems including supply storage, waste storage, analyzers, disposal routes, controls, secondary containment, access, safety, and restocking.
- Structure and foundation design and site modifications: Shade structures, small prefabricated weather enclosures, grading, concrete pedestals, building modifications.
- Solids handling: Backwash storage and operation, solids separation and drying, disposal access, sampling requirements and sewer connections.
- Reclaim system: Pump stations, skimmer systems, piping and valve layouts, control logic.
- Electrical supply and control systems programming: Instrumentation, control logic for a complete operating facility, motor control centers (MCC), panel lineup, power supply, integration with existing SCADA

components or redesign. The Wild Wings integrator will conduct the PLC and SCADA programming.

Plans, Specifications, and Cost Estimates (75%, 100%, Final Bid Set):

Consultant shall prepare a complete design that consists of plans, technical specifications, and cost estimates. A basis of design memo will be provided with the initial (75%) design to define the required upgrades, sizing and operation decisions and preferences from the discussions with the County and SUSP.

The design will be provided in three completion phases: 75%, 100%, and a final bid set. It is assumed that the County will provide formal comments on the 75% submittal and the basis of design memo and on the revised design in the 100% deliverable. The final bid set will be presented with a signed and stamped set of drawings suitable for bidding to general contractors or to finalize grant/loan applications (if required). Consultant shall integrate any front-end provisions the County requests for the bidding package, as applicable. Consultant shall provide front-end contractual documents to include in public construction contracts. An Engineer's Estimate will also be provided for the construction at each design deliverable.

Consultant shall generate a detailed performance-based specification wherein the supplier or General Contractor will guarantee performance, including initial commissioning and a one-year recertification of performance.

Deliverables for Task 5:

- Draft Basis of Design Memo with 75% Plans, Specs and Estimate
- Final Basis of Design Memo with 100% Plans, Specs and Estimate
- Final Bid Set (signed and stamped)

Meetings for Task 5:

- Meeting #6: Pre-Design Basis Meeting
- Meeting #7: Design review of the 75% deliverable and Basis of Design Memo
- Meeting #8: Design review of the 100% deliverable

Task 6: CEQA Documentation

Preparation of CEQA documentation will be required prior to making modifications to the system for DDW permit amendment and any SRF loan applications that may be sought for construction. The CEQA analysis will be performed by Consultant's subconsultant, Inland Ecosystems. Any mitigation measures required by CEQA will be included in the design and construction of the treatment system as needed.

Deliverables for Task 6:

• Preliminary determination of CEQA requirements
• Initial Study and Mitigated Negative Declaration (if required)

Phase 2: Permitting, Bidding, Construction, and Commissioning

Item	Description
Pilot Testing Protocol	To be compliant with DDW Arsenic Treatment Pilot Study Guidelines.
Pilot Testing Results and Treatment Technology Selection	To be submitted prior to Permit Amendment Application.
Permit Amendment Application (Initial and Final)	Initial application will be sent with Plans and Specifications prior to construction. Final will be submitted after WTP is constructed and tested.
Plans and Specifications for Water Treatment Plant	Submittal will include well modifications, treatment system, and accompanying piping, instrumentation, solids handling systems, and site improvements. To be submitted with Initial Permit Amendment Application.
CEQA Documentation	Cat Ex, Neg. Dec. or Initial Study (TBD) to be submitted with Initial Permit Application
Well Construction Specifications	Submittal will include well profile and final construction specifications to be sent with the Initial Permit Application.
DWR Well Completion and Well Data Sheet	To be submitted with Initial Permit Application.
DWSAP Document	Already submitted to DDW
Filter Data Sheet and Chemical Data Sheets	To be submitted with Final Application after station is constructed and tested.
Water Quality Reports	To be submitted in Final Application. Submittal will include analytical results for well, before and after treatment, prior to going online, including disinfection testing of complete water treatment plant.

Task 7: Permitting

Consultant shall be responsible for ensuring that all permits, plans, notifications, and other documentation required from agencies with jurisdiction over the project are procured and submitted in a timely and professional manner. Consultant shall ensure that the building contractor, or any other project participant, adheres to all

project permit requirements. Consultant shall inform the contractor(s) when operations are out of compliance and require measures be taken to comply with permit requirements. Specific permits and documents anticipated include:

Water Supply Permit Amendment with DDW: Consultant shall be in contact with DDW from the beginning of the project through completion to amend the water supply permit and gain approval of the new arsenic treatment facility. Working with DDW will occur throughout all tasks, as detailed in this proposal. The work will be completed throughout the project during completion of other tasks. Below is a table of anticipated documentation for the Water Supply Permit Amendment.

DDW will be informed of the selection of a treatment system following the RFP process, and provide input on the need for a pilot testing program and review of the program if it is necessary (Task 4).

Following final selection of the treatment system and preparation of design drawings, DDW will be informed of the plans and designs, and a preliminary permit amendment will be filed with all necessary information prior to Consultant bidding and construction. After construction, and prior to commissioning, DDW will be consulted regarding approval of the plant and a sanitary inspection for concurrence to bring the new system online (Task 9). At the end of the project, Consultant shall provide the final permit amendment information including system as-built design drawings (Task 9).

Documentation for Water Supply Permit Amendment from DDW

Regional Water Quality Control Board (RWQCB) Permits: Consultant's subconsultant, Inland Ecosystems, shall coordinate with the RWQCB as necessary for permitting or approval associated with disposal of waste products for any onsite land disposal. There is no land disposal envisioned for this project; however, Inland Ecosystems will conduct this effort if it is necessary for onsite disposal of temporary discharge water, backwash water, or solids disposal. A Storm Water Pollution Prevention Plan (SWPPP) is not required since the disturbed surface will be under one acre.

Building Permits – No building permits are envisioned for this project as there will be no new occupied structures. Consultant assumes there will be time involved reviewing the project with County officials to confirm any required permits.

Encroachment Permit – Consultant assumes there will be no encroachment permit required for construction.

Deliverables for Task 7:

- Permit submittals and letters to DDW

Meetings for Task 7:

- DDW phone conferences and meetings, as needed

Task 8: Bidding and Construction Management

Under Task 8, Consultant shall assist with contractor bidding and construction management to oversee the construction of the selected treatment system and modifications to the existing system. These components are detailed below.

Contractor Bidding

Consultant shall assist with bid solicitation from qualified contractors. To save time and minimize cost, it is assumed that the County can be selective in bid solicitation and permit Consultant to identify a qualified short list of contractors unless an SRF loan is obtained and public bids are necessary. Consultant shall hold a pre- bidding meeting with selected contractors to describe the project and begin taking questions. During bidding, Consultant shall respond to questions from bidders and provide formal written addenda (three addendums are assumed).

Consultant shall evaluate the bids and recommend the contract award based on responsiveness and lowest cost. Consultant assumes that the construction contract will be between the County and the contractor that is awarded the work. Consultant assumes bidding will consist of assisting with solicitation to qualified selected contractors, attending a pre-bid meeting, responding to questions, preparing up to three addendums, evaluating bids, and recommendation for award.

Construction Management

Consultant's approach to providing construction support services involves regular interaction with the Contractor and treatment vendor and close review of construction schedule, progress, and administrative processes. A key assumption of the level of scope and budget is that the assistance during construction will span 10 months; this accounts for the contractor submittals, procurements, site construction, startup and testing, and commissioning, training and final permitting. Consultant shall act on behalf of the County and work in coordination with SUSP operators as necessary. SUSP and County roles during construction are to be determined by County. Consultant's construction management services consist of the following activities:

- **Pre-Construction Conference**: Consultant shall hold a pre-construction conference to discuss the baseline schedule and the procedure for construction progress, RFIs, status of submittals, and any miscellaneous items throughout construction.
- **Bi-Weekly Construction Meetings**: Bi-weekly construction meetings will be held throughout construction at the job site, County offices or Consultant's office. The meetings will be conducted to address items actively as they come up. Consultant shall prepare formal agenda and

meeting minutes documenting the status of all RFIs, submittals, change orders, etc. to track progress and resolve items.

- **Submittal Review**: Consultant shall complete the review and transmittal of technical submittals provided by the general contractor. A submittal spreadsheet log will be maintained for use in tracking and documenting submittal review.
- **Requests for Information**: Consultant shall review questions and provide written clarifications for any questions the general contractor has during the construction period such as details of the contract, substitutions, and alternative approaches.
- **Change Order Assistance**: Consultant shall assist in the preparation of any necessary field instructions and change orders. Anticipated assignments may include preparing requests to the general contractor for proposals for extra or changed work; review of contractor requests for change order to determine if work proposed is considered extra work; opinion of probable construction cost; and, review and negotiation of cost estimates. Consultant shall also prepare drawings, sketches, or specifications for extra or changed work items.
- **Monthly Pay Requests:** Consultant shall review monthly payment requests from the Consultant based on the quantities of bid items that have been procured, installed and accepted. Consultant shall approve of all payment requests of the Consultant before they are submitted to the County.
- **Milestone Inspection**: Consultant shall provide on-site milestone inspections including special inspections for electrical, structural and mechanical components. There are approximately 10 milestone inspections included. The milestone inspections include the well site modifications, subsurface piping, conduits and raceways, utility connections, earthwork preparation, concrete form/rebar and pour, Factory Acceptance Testing, and pre-system punchlists to identify incomplete or deficient items. Consultant shall prepare an inspection report for each site visit indicating the date and times, people on site, material delivered, work completed, and corrections noted. Consultant shall coordinate a DDW inspection required to bring the system online with an SUSP operator and DDW engineer. Consultant shall provide milestone inspections with five (5) additional miscellaneous inspections as needed. Site visits will also occur as part of the bi-weekly construction meetings.
- **Part-time Construction Observation**: At the time of this contract execution, Consultant does not propose resident full-time construction observation. This project can be adequately managed through the regular meetings and milestone inspections described above. A part-time construction observation is assumed in addition to the above services at a rate of 4 hours per week of onsite observation.
- **Staking**: The selected General Contractor shall provide their own construction staking. Consultant's scope does not include a surveyor for construction staking. This item will be included as part of the specifications,

with the selected General Contractor providing the necessary services by a licensed surveyor approved by the Engineer.

Deliverables for Task 8:

- Bid Solicitation Document
- Bid Review and Recommendations
- Submittal Reviews, RFIs, Change Order Reviews, Pay Request Reviews
- Meeting agenda and minutes
- Inspection Reviews

Meetings for Task 8:

- Meeting #9: Bid Review Meeting
- Meeting #10: Pre-construction Meeting
- Meeting #11-#30: Bi-weekly Construction Meetings

Task 9: Startup and Commissioning

Consultant oversee and be responsible for the approval of the General Contractor's startup and commissioning activities for a fully functioning and operable facility, including all equipment acceptance testing, communications and programming, and close-out permitting requirements. This process will involve coordinating the general contractor, treatment system installer/supplier, other sub-contractors, systems integrator, equipment manufacturers, County staff, SUSP operators, and regulatory agencies. During the commissioning period, Consultant shall generate a punchlist to be completed by the contractor for final closeout. Consultant estimates that 5 days of testing will be required for approval of the new systems including: cleared water quality testing, treatment operation, MCC panel checks, pump operation, alarms and setpoints. The contractor will be required to perform a 7-day operational commissioning test where the system will run in auto and go through all modes of operation and backwash/regeneration cycles of the treatment unit. During this time, operators will be trained to correctly operate the new system. Consultant assumes 2 days are necessary for operator training.

At the end of the construction phase of the project, Consultant shall modify the conformed project drawings into a set of project Record Drawings (as-builts) based on field changes and red-line markups from the general contractor and Consultant construction management staff. Record Drawings and Operations & Maintenance Manuals will be provided to the County after they have been reviewed and approved by Consultant. Consultant shall provide a letter of acceptance of the facility.

The Final DDW Water Supply Permit Amendment will be filed under Task 9, building on the preliminary application filed under Task 7. This includes final documentation of filter system, chemical system, as- builts, engineering technical report, water system information and permit amendment.

Deliverables for Task 9:

- Punchlist
- Record Drawings
- Final DDW Permit Amendment package

Meetings for Task 9:

- Punchlist Meeting

Contractor's compensation shall not exceed the amount budgeted in the table below:

Task	Consultant Fee	Outside Services Fee	Total Not to Exceed
Phase 1 – Preliminary Engineering through Final Design			
1 – Production and Demand Analysis	$6,435	$0	$6,435
2 – Conceptual Design	$12,850	$1,725	$14,575
3 – RFP for Treatment Vendors	$7,640	$0	$7,640
4 – Pilot Testing	$12,555	$0	$12,555
5 – Final Plans and Specifications	$54,860	$41,975	$96,835
6 – CEQA Documentation	$2,620	$23,000	$25,620
Phase 1 Total	**$96,960**	**$66,700**	**$163,660**
Phase 2 – Permitting, Bidding, Construction and Commissioning			
7 – Permitting	$16,060	$0	$19,800
8 – Bidding and Construction Management	$82,390	$17,870	$100,260
9 – Startup and Commissioning	$20,955	$3,450	$24,405
Phase 2 Total	**$119,405**	**$21,320**	**$140,725**
GRAND TOTAL	**$216,365**	**$88,020**	**$304,385**

Costs not included in Consultant's scope of work include permit fees, capital costs, geotechnical inspections, and surveying as described below:

• Permit Fees: fees for permits will be assessed by agencies at the time of application. Consultant assumes the County will pay any permit fees directly.
• Capital Costs: treatment system, vendor pilot testing, or general contractor costs for installation are not included.
• Geotechnical Inspections: the specifications for construction will direct the General Contractor to obtain a geotechnical engineer to confirm subgrade

preparation and compaction.
• Surveying: Consultant shall utilize the existing site basemaps. The specifications for construction will direct the General Contractor to obtain a surveyor to conduct construction staking.

If Consultant is directed to deviate from the proposed scope, or as dictated by unforeseen field conditions, Consultant shall provide notification of any potential changes in the estimated cost and time to complete the work. Consultant shall not proceed with any work that deviates from the approved scope and budget until approval to proceed is granted.

Project Schedule

Consultant shall coordinate all schedule of activities with the County. At the initial meeting Consultant shall prepare a detailed project schedule in Gantt Chart format showing the key milestone deliverables, tasks and outside agency reviews. The proposed project schedule below is based on the anticipated work products described under Tasks 1 through 9 above, performed by Consultant, with review time for coordinating agencies, such as DDW and the County. Consultant shall complete each task as it is approved by the County, so the anticipated completion dates are subject to change given County approval and funding sources.

	Task Description	Anticipated Duration	Anticipated Completion Date
	Production & Demand Analysis	1 month	February 1, 2020
	Conceptual Treatment & Operational Strategies Design	2 months	April 1, 2020
	RFP for Vendor Treatment Systems	2 months	June 1, 2020
	Pilot Testing of Selected Vendor Systems (if required)	2 months	August 1, 2020
	Treatment System Design	4 months	December 1, 2020
	Permitting (concurrent with treatment system design)	--	--
	Bidding and Construction Management	10 months	October 1, 2021
	Startup & Commissioning	1 month	November 1, 2021
Total Duration		***22 months***	

B. Consultant shall provide all facilities, equipment, personnel, labor and materials necessary to provide the foregoing services in accordance with this Agreement.

C. The complete contract shall include the following Exhibits attached hereto and incorporated herein:

Exhibit A	RFQu Excerpt
Exhibit B	Statement of Qualifications Excerpt

In the event of any conflict between any of the provisions of this Agreement (including Exhibits), the provision that requires the highest level of performance from Consultant for the County's benefit shall prevail.

D. The Administrator may approve modifications of the term, scheduling, billing rates, and allocation of funds between the tasks and subtasks (if any) set forth above, provided that there is no increase in the total compensation as set forth in Paragraph III of this Agreement.

II. ADDITIONAL SERVICES

Intentionally left blank.

III. COMPENSATION AND REIMBURSEMENT OF EXPENSES

A. For the services described in Paragraph I above, and subject to the condition that the services have been completed in a manner satisfactory to the Administrator or his/her designee, Consultant shall be compensated as follows:

Hourly Rates:

Senior Principal …… $215/hr
Principal Professional ……... $210/hr
Supervising Professional …….. $200/hr
Senior Professional …….. $187/hr
Project Professional …….. $145 to $170/hr
Staff Professional ……. $130 to $140/hr
Engineering Inspector …….. $130/hr
ACAD Drafting/GIS …… $130/hr
Engineering Assistant ……... $100 to $120/hr
Scientist ……$100 to $120/hr
Technician ……..…. $100 to $120/hr
Word Processing, Clerical …… $75/hr
Digital Communications Specialist …….. $90/hr
Project Admin/Accounting Assistant …… $90/hr

Other

Groundwater Sampling Equipment (Includes Operator) $170/hr
Professional or Technical Testimony ……. 200% of regular rates
Technical Overtime (if required) ……. 150% of regular rates

Notwithstanding the above, services do not include travel time, and staff time spent traveling does not constitute a reimbursable expense. Contractor shall not be entitled to reimbursement for any expenses except as specifically set forth in This Paragraph. The following expenses may be reimbursed if they are incurred after prior written approval of the Administrator:

1. Transportation (mileage, air, travel, car rental), lodging, meals, and incidentals at rates not to exceed those established by the State of California Department of Human Resources Maximum Lodging Reimbursement Rates for All Represented Employees and Meals and Incidentals (In-State/Out-of-State Travel). Mileage shall be reimbursed at the then-current IRS Business Mileage Rate. Air travel shall be coach or equivalent. A mid-sized or equivalent car shall be used for car rentals.
    a. Cost plus 15%
2. Copies.
    a. $0.20/each
3. Outside Services/Rentals.
    a. Cost plus 15%
4. Services by Associate Firms.
    a. Cost plus 15%
5. Substinence:
    a. Cost plus 15%

Provided, however, that the total amount of compensation to be paid to Consultant for the services required by this Agreement shall not exceed **Three Hundred Four Thousand, Three-Hundred Eighty-Five dollars** (**$304,385**). In the determination of hourly fees, time allotments shall be calculated to one-tenth of an hour.

B. The compensation set forth above includes reimbursement for all expenses incurred by Consultant in the performance of this Agreement.

IV. METHOD OF PAYMENT

A. Within thirty (30) days of the completion of each subtask identified in Paragraph I in a manner that is satisfactory to the Administrator, the Consultant shall submit an invoice detailing the services provided, the person(s) providing the service, the amount of time spent by each person providing the service calculated to the one-tenth of an hour, the rate per hour charged for each person providing service, and an itemization of the actual expenses for which reimbursement is requested. Any claim for additional services pursuant to Paragraph II shall also include a copy of the Administrator's written approval in advance of such services being provided. If requested by the County, Consultant shall provide any further documentation to verify the compensation and reimbursement sought by Consultant.

B. Within fifteen (15) calendar days of the receipt of Consultant's detailed invoice, the

Administrator shall either authorize payment or advise Consultant in writing of any concerns that the Administrator has with the invoice and any need for further documentation.

C. Within thirty (30) calendar days of the Administrator's authorization for payment of an invoice, the County Auditor-Controller shall either issue the payment or advise Consultant in writing of any concerns that the County Auditor-Controller has with the request and any need for further documentation.

V. REPORTS

A. Consultant shall provide such reports as are required elsewhere by this Agreement, and such additional information and reports relating to the services otherwise required by this Agreement as are reasonably requested by the Administrator, as the times and in the manner specified by this Agreement, or by the Administrator if not so specified. Any other provision of this Agreement notwithstanding, should Consultant fail to provide any report required by this Agreement in a timely manner and as otherwise set forth in this Agreement, County may withhold any payments otherwise due Consultant pursuant to this Agreement, and any other agreement between Consultant and County, until such report is properly submitted as determined by the Administrator.

B. County shall provide Consultant with all information pertinent to the services required of Consultant by this Agreement which is requested by Consultant and which is within County's possession. No charge will be made for these materials.

VI. OWNERSHIP OF DOCUMENTS AND WORK PRODUCTS

All professional and technical documents and information developed under this Agreement, and all work products, including writings, work sheets, reports, and related data, materials, copyrights and all other rights and interests therein, shall become the property of the County, and Consultant agrees to deliver and assign the foregoing to the County, upon completion of the services hereunder or upon any earlier termination of this Agreement. Consultant assigns the work products, as and when the same shall arise, for the full terms of protection available throughout the world. In addition, basic data prepared or obtained under this Agreement shall be made available to the County without restriction or limitation on their use.

No additional charge will be made for any of the foregoing.

VII. RECORDS; ACCESS, RETENTION

Consultant shall retain and make available for review by the County and its designees all records, documents, and general correspondence relating to this Agreement and the services required hereunder for a period of not less than five (5) years after receipt of final payment or until all pending audits and proceedings are completed, whichever is later. Consultant shall make such records available for inspection and copying by the County and its designees at any reasonable

time. At least thirty (30) calendar days prior to any destruction of these records following the four years, Consultant shall notify the Administrator. Upon such notification, the Administrator shall either agree to the destruction or authorize the records to be forwarded to the County for further retention.

VIII. DISPUTES

Any dispute arising under this Agreement shall be decided by the County Administrative Officer who shall put his or her decision in writing and mail a copy thereof to the address for the notice to Consultant. The decision of the County Administrative Officer shall be final unless, within thirty (30) days from the date such copy is mailed to Consultant, Consultant appeals the decision in writing to the County Board of Supervisors. Any such written appeal shall detail the reasons for the appeal and contain copies of all documentation supporting Consultant's position. In connection with any appeal proceeding under this paragraph, Consultant shall be afforded the opportunity to be heard and offer evidence in support of its appeal to the County Board of Supervisors at a regular Board meeting. Pending a final decision of the dispute, Consultant shall proceed diligently with the performance of this Agreement and in accordance with the County Administrative Officer's decision. The decision of the County Board of Supervisors on the appeal shall be final for purposes of exhaustion of administrative remedies.

IX. TERM AND TERMINATION

A. The term of this Agreement shall be from **December 17, 2019** through **December 31, 2021** unless sooner terminated as hereinafter provided.

B. Should either party fail to substantially perform its obligations in accordance with this Agreement, the other party may notify the defaulting party of such default in writing and provide not less than thirty (30) days to cure the default. Such notice shall describe the default, and shall not be deemed a forfeiture or termination of this Agreement. If such default is not cured within said thirty day period (or such longer period as is specified in the notice or agreed to by the parties), the party that gave notice of default may terminate this Agreement upon not less than fifteen (15) days advance written notice. In the event of such termination based upon Consultant default, the County reserves the right to purchase or obtain the supplies or services elsewhere, and Consultant shall be liable for the difference between the prices set forth herein and the actual cost thereof to the County. The foregoing notwithstanding, neither party waives the right to recover damages against the other for breach of this Agreement.

C. This Agreement is subject to the County, the State of California and the United States appropriating and approving sufficient funds for the activities required of the Consultant pursuant to this Agreement. If the County's adopted budget and/or its receipts from the State of California and the United States do not contain sufficient funds for this Agreement, the County may terminate this Agreement by giving ten (10) days advance written notice thereof to the Consultant, in which event the County shall have no obligation to pay the Consultant any further funds or provide other consideration and the Consultant

shall have no obligation to provide any further services pursuant this Agreement. If the County terminates the Agreement pursuant to this subparagraph, the County will pay Consultant in accordance with this Agreement for all services performed to the satisfaction of the Administrator before such termination and for which funds have appropriated as required by law.

D. This Agreement may be terminated for any reason by either party at any time during its term, by giving 45 days' written notice to the other party.

E. If Consultant, or any of its officers, agents, employees, Consultants, subConsultants, volunteers or five percent owners, becomes excluded, debarred or suspended from participation in Federally or State funded programs, the County may terminate this Agreement by giving ten (10) days advance written notice thereof to the Consultant.

F. Upon termination of this Agreement or suspension of work by either County or Consultant, Consultant shall furnish to County all documents and drawings prepared under this Agreement, whether complete or incomplete. In the event of termination for any reason, reproducible copies of all finished or unfinished documents, drawings, maps, models, photographs, and reports prepared by Consultant shall become the sole and exclusive property of Yolo County and Consultant shall be entitled to receive compensation for any work completed on such documents and other materials determined by the Administrator to be of satisfactory quality and within the terms and conditions of this Agreement. All creative work undertaken by Consultant such as sketches, copy, dummies and all preparatory work for which Consultant is not compensated by the County shall remain the sole and exclusive property of the Consultant.

G. During and following the term of this Agreement, Consultant shall not use, distribute or otherwise circulate any of the materials developed pursuant to this Agreement and for which Consultant was compensated by the County without the express written permission of the Administrator.

X. APPLICABLE LAWS

A. In the performance of the services required by this Agreement, Consultant shall comply with all applicable Federal, State, and County statutes, ordinances, regulations, directives and laws. This Agreement is also subject to any additional restrictions or conditions that may be imposed upon the County by the Federal or State government.

B. This Agreement shall be deemed to be executed within the State of California and construed in accordance with and governed by the laws of the State of California. Any action or proceeding arising out of this Agreement shall be filed and resolved in a California State court located in Woodland, California. Consultant waives any removal rights it might have under State or Federal law.

XI. NON-DISCRIMINATION IN SERVICES AND BENEFITS

Consultant certifies that any service provided pursuant to this Agreement shall be without discrimination based on color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability in accordance with all applicable Federal, State and County laws and regulations and any administrative directives established by the County Board of Supervisors or the County Administrative Officer. For the purpose of this Agreement, distinctions on the grounds of color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability include but are not limited to the following: denying a participant any service or benefit which is different, or is provided in a different manner or at a different time from that provided to other participants under this Agreement; subjecting a participant to segregation or separate treatment in any way in the enjoyment or any advantage or privilege enjoyed by others receiving any service or benefit; treating a participant differently from others in determining whether the participant has satisfied any admission, enrollment quota, eligibility, membership, or other requirement or condition which individuals must meet in order to be provided any service or benefit; and the assignment of times or places for the provision of services.

XII. CONSULTANT'S RESPONSIBILITIES

A. Consultant shall exercise all of the care and judgment consistent with good practices in the performance of the services required by this Agreement.

B. With the exception that this section shall in no event be construed to require indemnification by Consultant to a greater extent than permitted under the public policy of the State of California, Consultant shall indemnify, defend and hold harmless the County of Yolo, officers, agents, employees and volunteers from and against any and all claims, damages, demands, losses, defense costs, expenses (including attorney fees) and liability of any kind or nature arising out of or resulting from performance of the work, provided that any such claim, damage, demand, loss, cost, expense or liability is caused in whole or in part by any negligent or intentional act or omission of the Consultant, any subConsultant, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, regardless of whether or not it is caused in part by a party indemnified hereunder. Consultant and/or any subConsultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnification obligations of this agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

C. Any subConsultants must agree to be bound to the Consultant and the County of Yolo in the same manner and to the same extent as Consultant is bound to the County of Yolo under this Agreement. All subConsultants must further agree to include the same requirements and provisions of this agreement, including the indemnity and insurance requirements, with any sub-subConsultant to the extent they apply to the scope of the Sub-subConsultant's work.

In providing any defense under this Paragraph, Consultant shall use counsel reasonably acceptable to the County Counsel.

XIII. PUBLIC LIABILITY AND PROPERTY DAMAGE INSURANCE

A. During the term of this Agreement, Consultant shall at all times maintain, at its expense, the following coverages and requirements. The comprehensive general liability insurance shall include broad form property damage insurance.

1. Minimum Coverages (as applicable). Insurance coverage shall be with limits not less than the following:

[note: the following limits need to be reviewed based upon the scope of services, nature of the Consultant, etc.; please review with Risk Management]

a. **Comprehensive General Liability** – $1,000,000/occurrence and $2,000,000/aggregate

b. **Automobile Liability** – $1,000,000/occurrence (general) and $500,000/occurrence (property) (include coverage for Hired and Non-owned vehicles)

c. **Professional Liability/Malpractice/Errors and Omissions** – $1,000,000/occurrence and $2,000,000/aggregate (If any engineer, architect, attorney, accountant, medical professional, psychologist, or other licensed professional performs work under a contract, the Consultant must provide this insurance. If not, then this requirement automatically does not apply.)

d. **Workers' Compensation** – Statutory Limits/**Employers' Liability** - $1,000,000/accident for bodily injury or disease (If no employees, this requirement automatically does not apply.)

2. The County, its officers, agents, employees and volunteers shall be named as additional insured on all but the workers' compensation and professional liability coverages. **[NOTE: Evidence of additional insured may be needed as a separate endorsement due to wording on the certificate negating any additional writing in the description box.]** It shall be a requirement under this agreement that any available insurance proceeds broader than or in excess of the specified minimum Insurance coverage requirements and/or limits shall be available to the Additional Insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this Agreement; or (2) the broader coverage and maximum limits of coverage of any Insurance policy or proceeds available to the named Insured; whichever is greater.

a. The Additional Insured coverage under the Consultant's policy shall be "primary and non-contributory" and will not seek contribution from the County's insurance or self insurance and shall be at least as broad as CG 20 01 04 13.

b. The limits of Insurance required in this agreement may be satisfied by a combination of primary and umbrella or excess Insurance. Any umbrella or excess Insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non contributory basis for the benefit of the County of Yolo (if agreed to in a written contract or agreement) before the County's own Insurance or self insurance shall be called upon to protect it as a named insured.

3. Said policies shall remain in force through the life of this Agreement and, with the exception of professional liability coverage, shall be payable on a "per occurrence" basis unless the County Risk Manager specifically consents in writing to a "claims made" basis. For all "claims made" coverage, in the event that the Consultant changes insurance carriers Consultant shall purchase "tail" coverage covering the term of this Agreement and not less than three years thereafter. Proof of such "tail" coverage shall be required at any time that the Consultant changes to a new carrier prior to receipt of any payments due.

4. The Consultant shall declare all aggregate limits on the coverage before commencing performance of this Agreement, and the County's Risk Manager reserves the right to require higher aggregate limits to ensure that the coverage limits required for this Agreement as set forth above are available throughout the performance of this Agreement.

5. Any deductibles or self-insured retentions must be declared to and are subject to the approval of the County Risk Manager. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied either by the named Insured or Yolo County.

6. Each insurance policy shall be endorsed to state that coverage shall not be suspended, voided, canceled by either party, reduced in coverage or in limits except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the Administrator (ten (10) days for delinquent insurance premium payments).

7. Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise approved by the County Risk Manager.

8. The policies shall cover all activities of Consultant, its officers, employees, agents and volunteers arising out of or in connection with this Agreement.

9. For any claims relating to this Agreement, the Consultant's insurance coverage shall be primary, including as respects the County, its officers, agents,

employees and volunteers. Any insurance maintained by the County shall apply in excess of, and not contribute with, insurance provided by Consultant's liability insurance policy.

10. The Consultant shall waive all rights of subrogation against the County, its officers, employees, agents and volunteers.

B. Prior to commencing services pursuant to this Agreement, Consultant shall furnish the County with original endorsements reflecting coverage required by this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. All endorsements are to be received by, and are subject to the approval of, the County Risk Manager before work commences. Upon County's request, Consultant shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications.

C. During the term of this Agreement, Consultant shall furnish the County with original endorsements reflecting renewals, changes in insurance companies and any other documents reflecting the maintenance of the required coverage throughout the entire term of this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. Upon County's request, Consultant shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications. Yolo County reserves the right to obtain a full certified copy of any Insurance policy and endorsements. Failure to exercise this right shall not constitute a waiver of right to exercise later.

D. Consultant agrees to include with all subConsultants in their subcontract the same requirements and provisions of this Agreement including the indemnity and insurance requirements to the extent they apply to the scope of the subConsultant's work. SubConsultants hired by Consultant must agree to be bound to Consultant and the County of Yolo in the same manner and to the same extent as Consultant is bound to the County of Yolo under the Agreement. All subConsultants must further agree to include these same provisions with any sub-subConsultant. Consultant shall require all SubConsultants to provide a valid certificate of insurance and the required endorsements included in the agreement prior to commencement of any work and Consultant will provide proof of compliance to the County of Yolo.

E. Consultant shall maintain insurance as required by this Agreement to the fullest amount allowed by law and shall maintain insurance for a minimum of five years following the expiration of this Agreement. In the event Consultant fails to obtain or maintain completed operations coverage as required by this Agreement, the County at its sole discretion may purchase the coverage required and the cost will be paid by Consultant.

XIV. WORKERS' COMPENSATION

Consultant shall provide workers' compensation coverage as required by State law, and prior to commencing services pursuant to this Agreement shall file the following statement with the County in a form substantially as set forth below.

WORKERS' COMPENSATION CERTIFICATE

I am aware of the provisions of Section 3700 of the Labor Code that require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that Code, and I will comply with such provisions before commencing any services required by this Agreement.

The person executing this certificate on behalf of Consultant affirmatively represents that she/he has the requisite legal authority to do so on behalf of Consultant, both the person executing this Agreement on behalf of Consultant and Consultant understand that the County is relying on this representation in entering into this Agreement.

XV. NOTICE

A. All notices shall be deemed to have been given when made in writing and delivered or mailed to the respective representatives of County and Consultant at their respective addresses as follows:

Consultant:
Luhdorff & Scalmanini Consulting Engineers, Inc.
Attn: Chief Executive Officer
500 First Street
Woodland, CA 95776
Tel. (530) 661-0109

County:
County of Yolo
County Administrator's Office
Attn: CSA Manager
625 Court Street, Room 202
Woodland, CA 95695
Tel. (530) 666-8150

B. Any party may change the address to which such communications are to be given by providing the other parties with written notice of such change at least fifteen (15) calendar days prior to the effective date of the change.

C. All notices shall be effective upon receipt and shall be deemed received through delivery if personally served or served using facsimile machines, or on the fifth (5th) day following deposit in the mail if sent by first class mail.

XVI. CONFLICT OF INTEREST

A. Consultant shall comply with the laws and regulations of the State of California and County regarding conflicts of interest, including, but not limited to, Article 4 of Chapter 1, Division 4, Title 1 of the California Government Code, commencing with Section 1090, and Chapter 7 of Title 9 of said Code, commencing with Section 87100 including regulations promulgated by the California Fair Political Practices Commission.

B. Consultant covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of Consultant's obligations and responsibilities hereunder. Consultant further covenants that in the performance of this Agreement, no person having any such interest shall be employed. This covenant shall remain in force until Consultant completes performance of the services required of it under this Agreement.

C. Consultant agrees that if any fact comes to its attention that raises any question as to the applicability of any conflict of interest law or regulation, Consultant will immediately inform the County and provide all information needed for resolution of the question.

XVII. COVENANT AGAINST CONTINGENT FEES

Consultant warrants that it has not employed or retained any company or person, other than a bona fide employee working for Consultant, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration, contingent upon or resulting from the award or making this agreement. For breach or violation of this warranty, the County shall have the right to annul this agreement without liability, or in its discretion to deduct from the agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

XVIII. AUDITS

A. Consultant shall be subject to examination and audit by the State or the County, or both, throughout the term of this Agreement and thereafter for a period of three years from the date that final payment is made pursuant to this Agreement. This does not preclude access to records by County, State, the Comptroller General of the United States, or any of their authorized representatives, as otherwise provided by this Agreement, the State contract, or State or Federal laws and regulations. Consultant agrees that County and/or State has the right to review, obtain, and copy all records pertaining to the performance of this Agreement, and agrees to provide County and/or State with any and all relevant

information requested.

B. Any and all books, records, and facilities maintained by Consultant related to services provided under this Agreement may be audited, inspected and copied at any time during normal business hours. Unannounced visits may be made at the discretion of the County or State. Employees who might reasonably have information related to such records may be interviewed. All expenditures of State and federal funds furnished to Consultant pursuant to this Agreement are subject to audit by County, State and/or Federal representatives. Such audits shall consider and build upon external independent audits performed pursuant to audit requirements of the Office of Management and Budget (OMB) Circular A-133 as described in Paragraph C below.

C. Should Consultant expend $500,000 or more in Federal funds during any fiscal year, Consultant shall furnish County a certified copy of an Audit Report from an independent CPA firm covering the Consultant's preceding fiscal year of January 1 through December 31. This Audit shall be performed in accordance with OMB Circular A-133 and conducted in accordance with generally accepted government auditing standards as described in Government Auditing Standards (1994 Revision), and provided in a form satisfactory to the Administrator.

Consultant shall provide this Audit Report no later than July 31 of each year. In the event that this Agreement expires or is terminated on a date other than December 31, Consultant shall provide County such an Audit Report covering the preceding period of January 1 through the date of expiration or termination no later than July 31 after the date of expiration or termination. Consultant shall ensure that audit work papers supporting the report are retained for a period of three (3) years from the date of the audit report, and longer if notified by the State or County to extend the retention period, and are made available to the State and/or County upon request.

D. Should an Audit Report or any State or County audit determine that Consultant has misspent funds and been overpaid based on the requirements of this Agreement and applicable laws and regulations, County shall demand repayment from Consultant in the amount of such audit findings and withhold any payment otherwise due under this Agreement until Consultant repays such amount. Consultant shall repay County such amount within sixty (60) days of the date of the County's demand for repayment. Should Consultant fail to repay County within sixty (60) days of the date of County's demand for repayment, the County may offset the amount due from Consultant against any amounts that would otherwise be due from the County to Consultant pursuant to this Agreement or any other agreement or source.

E. Any failure or refusal by Consultant to permit access to any facilities, books, records or other information required to be provided to the State &/or the County by this Agreement &/or the State contract shall constitute an express and immediate breach of this Agreement.

XIX. ASSIGNMENT AND SUBCONTRACTS

The services and obligations required of Consultant under this Agreement are not assignable in whole or in part. In addition, Consultant shall not subcontract any portion of the services required of Consultant by this Agreement without the express written consent of the Administrator. If any portion of the services required of Consultant are subcontracted, the subConsultant(s) shall maintain the same insurance as required of Consultant by this Agreement and Consultant shall be fully responsible to the County for all work undertaken by subConsultants.

XX. STATUS OF CONSULTANT

A. It is understood and agreed by all the parties hereto that Consultant is an independent Consultant and that no relationship of employer-employee exists between the County and Consultant. Neither Consultant nor Consultant's assigned personnel shall be entitled to any benefits payable to employees of the County. Consultant hereby indemnifies and holds the County harmless from any and all claims that may be made against the County based upon any contention by any third party that an employer-employee relationship exists by reason of this Agreement or any services provided pursuant to this Agreement.

B. It is further understood and agreed by all the parties hereto that neither Consultant nor Consultant's assigned personnel shall have any right to act on behalf of the County in any capacity whatsoever as an agent or to bind the County to any obligation whatsoever.

C. It is further understood and agreed by all the parties hereto that Consultant must issue any and all forms required by Federal and State laws for income and employment tax purposes, including W-2 and 941 forms, for all of Consultant's assigned personnel.

XXI. AMENDMENT

This Agreement may be amended only by written instrument signed by the County and Consultant.

XXII. WAIVER

The waiver by the County or any of its officers, agents or employees or the failure of the County or its officers, agents or employees to take action with respect to any right conferred by, or any breach of any obligation or responsibility of this Agreement shall not be deemed to be a waiver of such obligation or responsibility, or subsequent breach of same, or of any terms, covenants or conditions of this Agreement.

XXIII. AUTHORIZED REPRESENTATIVE

The person executing this Agreement on behalf of Consultant affirmatively represents that she/he has the requisite legal authority to enter into this Agreement on behalf of Consultant and to bind Consultant to the terms and conditions of this Agreement. Both the person executing this

Agreement on behalf of Consultant and Consultant understand that the County is relying on this representation in entering into this Agreement.

XXIV. PUBLIC RECORDS ACT

Upon its execution, this Agreement (including all exhibits and attachments) shall be subject to disclosure pursuant to the California Public Records Act.

XXV. ADDITIONAL PROVISIONS

A. Where there is a doubt as to whether a provision of this document is a covenant or a condition, the provision shall carry the legal effect of both. Should the County choose to excuse any given failure of Consultant to meet any given condition, covenant or obligation (whether precedent or subsequent), that decision will not be, or have the legal effect of, a waiver of the legal effect in subsequent circumstances of either that condition, covenant or obligation or any other found in this document. All conditions, covenants and obligations continue to apply no matter how often County may choose to excuse a failure to perform them.

B. Except where specifically stated otherwise in this document, the promises in this document benefit the County and Consultant only. They are not intended to, nor shall they be interpreted or applied to, give any enforcement rights to any other persons (including corporate) which might be affected by the performance or non-performance of this Agreement, nor do the parties hereto intend to convey to anyone any "legitimate claim of entitlement" with the meaning and rights that phrase has been given by case law.

C.

1 By signing this agreement, the Consultant agrees to comply with applicable Federal suspension and debarment regulations including, but not limited to, 7 CFR Part 3017, 45 CFR 76, 40 CFR 32 or 34 CFR 85.

2. By signing this agreement, the Consultant certifies to the best of its knowledge and belief, that it and its principals:

    a. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency;

    b. Have not within a three-year period preceding this application/proposal/agreement been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

c. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in Paragraph 2(b) herein;

d. Have not within a three-year period preceding this application/proposal/ agreement had one or more public transactions (Federal, State or local) terminated for cause or default;

e. Shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under federal regulations (i.e., 48 CFR part 9, subpart 9.4), debarred, suspended, declared ineligible, or voluntarily excluded from participation in such transaction, unless authorized by the State; and

f. Will included a clause entitled, "Debarment and Suspension Certification" that essentially sets forth the provisions herein, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

3. If the Consultant is unable to certify to any of the statements in this certification, the Consultant shall submit an explanation to the County program funding this Agreement, and the County shall have the option of terminating this Agreement immediately or at any time thereafter, upon giving Consultant written notice of such termination, if the explanation is not found satisfactory by the County in its sole discretion.

4. The terms and definitions herein have the meanings set out in the Definitions and Coverage sections of the rules implementing Federal Executive Order 12549.

5. If the Consultant knowingly violates this certification, in addition to other remedies available to the Federal Government, the County may terminate this Agreement at any time upon giving Consultant written notice of such termination.

XXVI. ENTIRE AGREEMENT

This Agreement constitutes the entire agreement between the County and Consultant and supersedes all prior negotiations, representations, or agreements, whether written or oral. In the event of a dispute between the parties as to the language of this Agreement or the construction or meaning of any term hereof, this Agreement shall be deemed to have been drafted by the parties in equal parts so that no presumptions or inferences concerning its terms or interpretation may be construed against any party to this Agreement.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year first set forth above.

Presentation on
Arsenic Treatment System Project

David Block

Background

- 2008: State Arsenic Maximum Contaminant Level (MCL) decreased from *50 µg/L* to ***10 µg/.*** Since then Canvas Back Well has been on "Emergency Standby" status.
- Early 2019: Work completed to extend both well pumps in response to lower water levels. Canvas Back was used in its limited Standby capacity at that time.
- 2019: County seeks an Arsenic Treatment Design to reduce Arsenic to level to 50% of the MCL. SOQ's from consultants received in March 2019.

Well	Capacity	Use	Arsenic (Low)	Arsenic (High)	MCL
Canvas Back	1,200 gpm	Irrigation (70 MG/yr)	7 µg/L	15 µg/L	10 µg/L
Pintail	1,100 gpm	Domestic (90 MG/yr)	5.7 µg/L	8.8 µg/L	10 µg/L

Objectives

- Reduce arsenic to below 50% of MCL
- Change status of Canvas Back as a permitted “Active”
- Conduct an alternatives analysis to evaluate treatment strategies
- Selection of an arsenic treatment system/vendor
- Identify funding opportunities for construction (loans or grants)
- Compliance with California Environmental Quality Act (CEQA)
- Design of the treatment system and other facility upgrades at the well and booster stations
- Permitting, Bidding, Construction

Approach

Phase 1 – Preliminary Engineering through Final Design

- Develop a design basis and alternatives analysis with input from Treatment Vendors (and pilot testing) to select treatment technology, site layouts, cost estimates.
- Conduct necessary compliance with CEQA
- Prepare Plans/Specs and Engineer's Estimate for construction - also required to obtain state loans or grants (e.g. SRF)

Phase 2 – Permitting, Bidding, Construction, Commissioning

- DDW Water Supply Permit Amendment and any other permit requirements
- Bidding to General Contractors (GC)
- Construction/installation and testing by a GC and the approved Treatment Vendor
- Commissioning with close involvement and training for SUSP

Proposed Budget

Task	LSCE Fee	Outside Services Fee	Total
Phase 1 – Preliminary Engineering through Final Design			
1 – Production and Demand Analysis	$6,435	$0	$6,435
2 – Conceptual Design	$12,850	$1,725	$14,575
3 – RFP for Treatment Vendors	$7,640	$0	$7,640
4 – Pilot Testing	$12,555	$0	$12,555
5 – Final Plans and Specifications	$54,860	$41,975	$96,835
6 – CEQA Documentation	$2,620	$23,000	$25,620
Phase 1 Total	**$96,960**	**$66,700**	**$163,660**
Phase 2 – Permitting, Bidding, Construction and Commissioning			
7 – Permitting	$16,060	$0	$19,800
8 – Bidding and Construction Management	$82,390	$17,870	$100,260
9 – Startup and Commissioning	$20,955	$3,450	$24,405
Phase 2 Total	**$119,405**	**$21,320**	**$140,725**
TOTAL CONTRACT	**$216,365**	**$88,020**	**$304,385**

Costs not included are permit fees, capital costs, geotechnical inspections, and surveying. These additional costs would be around $1,550,000.

Questions

YOLO COUNTY AGREEMENT NO. _____

(Third Amendment to Agreement No. 19-253 with Luhdorff & Scalmanini Consulting Engineers, relating to Arsenic Treatment Design Services.)

THIS Amendment to Agreement No. 19-253 is made and entered into as of this 6th day of June, 2023, by and between the County of Yolo, a political subdivision of the State of California ("County"), and Luhdorff & Scalmanini Consulting Engineers, Inc., a California corporation ("Contractor"), who agree as follows.

WHEREAS, on or about December 17, 2019, the parties entered into an agreement for Contractor to provide services with the design and construction of an arsenic treatment system for the Wild Wings CSA Public Water System for the County (Yolo County Agreement No. 19-253); and

WHEREAS, on or about October 16, 2020, Arsenic levels measured at the highest level of arsenic to ever occur in the Pintail well. Although the Pintail well has not exceeded the state mandated Maximum Containment Level (MCL) of 10 µg/L, the water system is currently reliant on the Pintail well for meeting all potable water demand; and

WHEREAS, on or about June 16, 2021 the Canvasback pump was turned off due to unstable hydraulics and low water levels; and

WHEREAS, on or about April 17, 2022, Agreement No. 19-253 was amended to increase the amount for additional services in pilot testing and update the compensation terms; and

WHEREAS, on or about May 24, 2022, Agreement No. 19-253 was amended to extend its term; and

WHEREAS, the parties wish to amend Agreement No. 19-253 to further extend its term for one additional year.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. Section **IX.A** of Agreement No. 19-253, is hereby amended to read as follows:

   IX. TERM AND TERMINATION

   A. The term of this Agreement shall be from December 17, 2019 through June 30, 2024, unless sooner terminated as hereinafter provided.

2. Except as specifically amended hereinabove, Agreement No. 19-253 shall remain in full force and effect according to its terms.

IN WITNESS WHEREOF, the parties hereto have executed this Third Amendment to Agreement No. 19-253 as of the day and year first written above.

Board of Supervisors **Integrated Waste Management**

Meeting Date: 06/06/2023
Brief Title: Agreement with City of Davis for Landfill Leachate and Liquid Waste Disposal
From: Leslie Lindbo, Director, Department of Community Services
Staff Contact: Jeff Kieffer, Principal Civil Engineer, Department of Community Services, x8855
Supervisorial District Impact: District 3

Subject
Approve a new five-year agreement with the City of Davis for disposal of the Landfill's leachate and liquid waste. (No general fund impact) (Lindbo/Kieffer)

Recommended Action

A. Approve a new five-year agreement with the City of Davis for disposal of the Landfill's leachate and liquid waste; and

B. Authorize the Chair of the Board of Supervisors to sign the agreement.

Strategic Plan Goal(s)

Sustainable Environment

Reason for Recommended Action/Background
As part of normal operations, the Yolo County Central Landfill (Landfill) generates leachate and other liquid waste throughout the year. The landfill also accepts other liquid wastes such as septage, chemical toilet wastes and industrial wastewater from various customers throughout the region. These wastewaters are stored in one of several of the landfill's surface impoundments for evaporation. During years of high rainfall, the volume of liquid waste has exceeded the evaporation capacity of the surface impoundments. Since 1991, the Landfill has periodically discharged its excess wastewater to the adjacent Wastewater Treatment Plant (WWTP) operated by the City of Davis (City) for treatment and disposal. The existing disposal agreement with the City expires in May 2023 and thus a new agreement is needed.

The City's Sewers and Sewage Disposal Ordinance authorizes special contracts between the City and any industrial user, whereby the City may accept for treatment industrial waste at a charge fixed by special contract provided the waste does not violate any pretreatment standard. The amount charged by the City pursuant to the special contract should reflect, as close as is reasonably practicable, the cost the City incurs in providing, operating, and maintaining the facilities serving the contracting industrial user. This agreement establishes a special industrial sewer rate for the City's treatment and disposal of the Landfill's wastewater at the WWTP.

Under the proposed agreement, the Landfill agrees to pay the City a fixed monthly rate as well as an additional variable rate based on the volume and characteristics of the wastewater discharged. This new agreement will be for a term of 5 years. The Division estimates the potential maximum compensation to the City of $1,250,000, though actual compensation will likely be less than $250,000 per year.

Collaborations (including Board advisory groups and external partner agencies)
The County worked on this agreement with the City of Davis and received approval from County Counsel as to form.

Competitive Bid Process/Vendor Performance

A competitive bid process was not applicable for this project.

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$1,250,000
Amount budgeted for expenditure	$250,000
Additional expenditure authority needed	$0
On-going commitment (annual cost)	$250,000

Source of Funds for this Expenditure	
Sanitation Enterprise	$250,000

Further explanation as needed

Landfill staff estimates a maximum cost of $1,250,000 for the five-year term of the agreement, and has budgeted sufficient funds.

Yolo County Agreement No. 23-___

AGREEMENT BETWEEN THE CITY AND YOLO COUNTY TO ESTABLISH SPECIAL INDUSTRIAL SEWER RATES FOR YOLO COUNTY'S CENTRAL LANDFILL

This Agreement is entered into as of the 2nd day of May 2023, by and between the City of Davis ("City") and the County of Yolo ("County") in connection with the facts set forth in the recitals below.

RECITALS

A. The City owns and operates a Wastewater Treatment Plant ("WWTP") which provides wastewater treatment to sewer users, including industrial users such as landfills.

B. Chapter 33 of the City's Municipal Code, commonly known as the City's Sewers and Sewage Disposal Ordinance, sets forth the City's standard industrial sewer rates, as adopted by the City Council based on the 2017 Comprehensive Sewer Rate Study Report ("2017 Rate Study"), for industrial users that discharge wastewater into the WWTP. The standard industrial sewer rate is comprised of a fixed component "Customer Related" ($3.49) and a variable component. The variable component is currently based on three factors: (1) Biochemical Oxygen Demand ('BOD"), (2) Total Suspended Solids ("TSS"), and (3) flow. Also built into the variable component is the cost for capital and maintenance of the WWTP's Collection system. The draft 2022 Comprehensive Sewer Rate Study Report includes an additional variable component of Ammonia as N ("NH3-N"), which is anticipated to be built into the City's sewer rate for industrial customers.

C. The Sewers and Sewage Disposal Ordinance authorizes, at section 33.03.150 of the Davis Municipal Code, special contracts between the City and any industrial user whereby the City may accept for treatment industrial waste of unusual strength, composition or quantity at a charge fixed by the special contract provided the waste does not violate any pretreatment standard. The amount charged by the City pursuant to the special contract is an amount sufficient to compensate the City for its cost of providing, operating, and maintaining the facilities serving the contracting industrial user. The City and County entered into an agreement (County Agreement No. 19-118) on June 4, 2019, which is currently set to expire on May 20, 2023, to establish an industrial sewer rate for the County.

D. Each variable component unit rate can be determined by dividing the total cost allocation by the number of billable units. For the 2017 Rate Study those costs are calculated as such:
    1. FLOW: $9,401,276 / 2,117,489 CCF = $4.44 per CCF
    2. BOD: $2,169,525 / 3,029,500 lbs. BOD = $0.72 per lb. BOD
    3. TSS: $2,169,525 / 4,197,500 lbs. TSS = $0.52 per lb. TSS
    4. Customer related (fixed): As described in 2017 Rate Study = $3.49
E. Since 1991, the County's Central Landfill has periodically discharged leachate/stormwater to the WWTP for treatment and disposal by the City. While the County does not pretreat its wastewater prior to discharge, it does not use the City's collection system to transport the leachate/stormwater to the WWTP. In this unique circumstance, a reduction in the flow portion of the sewer rate, which comprises approximately 30% of the flow variable charge, would more accurately reflect the City's actual cost of treating and disposing the County's wastewater discharges from the County's Central Landfill. As such, a 30% discount shall be applied to the flow portion and calculated as $4.44 – 30% = $3.11 per CCF.
F. In anticipation of adoption of new City sewer rates in 2023 based upon the City's 2022 Wastewater Rate Study and the strength of the County discharge, County's rates will be amended to reflect all new rates, variable components, commercial classifications, calculations, and strengths associated with industrial discharges or other similarly assigned waste classification based on strengths developed in the 2022 Wastewater Rate Study with the 30% discount to the flow portion of the rate.
G. The County's discharges to the WWTP are subject to the conditions imposed by its Wastewater Discharge Permit No. 104-SIU ("Discharge Permit") and any subsequent issued permits, by the provisions of Chapter 33 of the City's Municipal Code, and by local, state, and federal laws and regulations.
H. The purpose of the Agreement is to terminate Agreement No. 19-118 and establish, pursuant to section 33.03.150 of the City's Municipal Code, revised rates to be paid by the County for the City's treatment and disposal of the County's unusual strength and composition wastewater at the WWTP. This Agreement is subject to the County's Discharge Permit, and does not modify the Discharge Permit in any way.

NOW, THEREFORE, the City and the County agree as follows:

1. <u>Contracted Industrial Sewer Rate.</u>

a. Agreement No. 19-118 is hereby terminated by the City and County and replaced with this Agreement.
b. The County agrees to pay to the City a fixed monthly charge of $3.49 as determined by the adopted 2017 Rate Study.
c. The County also agrees to pay to the City an additional variable rate as determined by the actual strength characteristics averaged and flow of the wastewater discharged, evaluated and billed each calendar quarter in accordance with the following rate schedule:
    i. FLOW: $9,401,276 / 2,117,489 CCF = $3.11 per CCF
    ii. BOD: $2,169,525 / 3,029,500 lbs. BOD = $0.72 per lb. BOD
    iii. TSS: $2,169,525 / 4,197,500 lbs. TSS = $0.52 per lb. TSS
d. The fixed monthly charge and the variable rate described in Section 1, subsections a. and b. above are hereafter referred as the "Contracted Rates."
e. Each of the monthly and quarterly charges shall be due and payable within 30 days of receipt of a bill and any other terms and conditions of the City's sewer system invoicing policy. The foregoing Contracted Rates shall apply to County sewer services beginning November 1, 2022 and continuing thereafter through the term of this Agreement, except as the Contracted Rates may be amended as provided herein.

2. Adjustment to Contracted Rates. The Contracted Rates are subject to adjustment commensurate with any City Council adjustment to the standard industrial sewer rates codified in Chapter 33 of the City's Municipal Code. The Wastewater Division Manager shall notify the County in writing of any adjustment to the Contracted Rates, including updated calculations for contracted unit rate determination for wastewater of unusual strength and composition, and a written amendment to this Agreement shall not be necessary.
3. Changed Circumstances. This Agreement is subject to and contingent upon the facts set forth in the Recitals in this Agreement. In the event circumstances change, for example, if the County uses the City's collection system to transport its leachate/stormwater to the WWTP, then the City reserves the right, in its sole discretion, to amend or terminate this Agreement. The County shall comply with all testing and reporting procedures set forth in its Discharge Permit in Chapter 33 of the City's Municipal Code, and in state and federal laws and regulations; nothing in this Agreement changes or affects those notification and report in procedures or the County's obligations with respect to those procedures.

4. Compliance with Discharge Permit, Laws, and Regulations. This Agreement is subject to the County's compliance with the conditions of its Discharge Permit, and with local, state, and federal laws and regulations. The sole purpose of this Agreement is to establish the Contracted Rate, and nothing in this Agreement shall be construed or interpreted to excuse the County's compliance with the conditions of it Discharge Permit or with local, state or federal laws or regulations. **THIS AGREEMENT DOES NOT CHANGE OR IN ANYWAY AFFECT ANY OF THE COUNTY'S OBLIGATIONS OR RESPONSIBILITIES AS SET FORTH IN THE COUNTY'S DISCHARGE PERMIT, AND THE COUNTY MUST COMPLY WITH ALL PROVISIONS OF ITS DISCHARGE PERMIT.**
5. Term. The term of this Agreement shall be valid until April 5, 2028, a period of 5 years, unless it is modified or terminated at an earlier time in accordance with this Agreement. The City may terminate this Agreement at any time if it determines such termination is necessary to comply with any applicable law or regulation, including but not limited to the City's Municipal Code.
6. Conflicts. If any provision of this Agreement conflicts with any provision in the Discharge Permit, or with any provision of local, state, or federal law or regulation, except as to the Contracted Rate, the provision in the Discharge Permit, or in the local, state, or federal law or regulation, shall control.
7. Entire Agreement. This Agreement represents the entire agreement of the parties with respect to the Contracted Rate, and supersedes any and all other agreements regarding the Contracted Rate, whether oral or written, between the parties.
8. Amendments. Except as provided in Sections 2 and 3, this Agreement may be amended at any time by a subsequent written agreement signed by both parties.
9. Assignment. The County may not assign this Agreement or any right or duty hereunder without the City's express written approval.
10. Notices. Any notice or demand pertaining to this Agreement, with the exception of urgent notifications, shall be given by mail at the following addresses:

IF TO THE CITY:

City of Davis
Public Works Utilities & Operations Dept.
1717 Fifth Street
Davis, CA 95616

IF TO THE COUNTY:

Yolo County Central Landfill
44090 County Road 28H
Woodland, CA 95776

Any urgent notifications shall be given by following the procedures set forth in the County's Wastewater Discharge Permit or in Chapter 33 of the City's Municipal Code.

11. Attorneys' Fees. If any party brings any action or proceeding against the other party arising out of this Agreement, or is made a party to any action or proceeding brought by the other party, the prevailing party shall be entitled to recover as an element of its costs of suit, and not as damages, its reasonable attorneys' fees as fixed by the court in such action or proceeding or in any separate action or proceeding brought to recover such attorneys' fees.
12. Authorization. The persons executing this Agreement represent and agree that they have full authorization to execute this Agreement on behalf of the parties and to bind the parties to the rights and obligations contained in this Agreement.
13. California Law. This Agreement is entered into and shall be governed and interpreted pursuant to the laws of the State of California. Venue for any action arising out of this Agreement shall be in Yolo County.
14. Captions. The captions describing the sections of this Agreement are provided for convenience only, and shall not have a bearing on the interpretation of any section of this Agreement.
15. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which shall constitute one Agreement.

    Time of Essence. Time is of the essence in each and every provision of this Agreement.

Board of Supervisors **Integrated Waste Management**

Meeting Date:	06/06/2023
Brief Title:	Agreement with Loci Controls, Inc. for Landfill Gas Collection Control System
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Jeff Kieffer, Principal Civil Engineer, Department of Community Services, x8855
Supervisorial District Impact:	District 3

Subject
Approve agreement with Loci Controls Inc. (LoCI) for monitoring and measuring methane from the Yolo County Central Landfill gas collection system. (No general fund impact) (Lindbo/Kieffer)

Recommended Action

A. Approve agreement with LoCI for monitoring and measuring methane from the Yolo County Central Landfill gas collection system; and

B. Authorize the Chair of the Board to sign the agreement.

Strategic Plan Goal(s)

Sustainable Environment

Reason for Recommended Action/Background
On November 22, 2022, the County released a Request For Proposals (RFP) for monitoring and measuring methane and other gases at the Yolo County Central Landfill with the intention of finding a company that would be willing to partner with the County to increase methane capture to further reduce greenhouse gas (GHGs) emissions, and apply for the 45Q tax credit for carbon sequestration. Since 2008 the U.S. Internal Revenue Code has provided a tax credit to incentivize carbon capture, utilization, and storage. In 2022 this tax credit, commonly called the 45Q tax credit, was expanded and extended with the passage of the Inflation Reduction Act, which helped facilitate this mutually beneficial partnership.

The County received one proposal in response to the RFP. The proposal received was from LoCI, a company that uses patented technology to increase methane capture and reduce emissions from landfills. Founded in 2013, LoCI's equipment strives to optimize gas collection through automation, using algorithms to continuously adjust the gas well-heads instead of the more standard manual adjustments. LoCI is in the process of being able to apply for the 45Q tax credit, and has submitted a Life Cycle Assessment to the US Department of Energy for review and approval. This process is estimated to take at least 3-6 months.

This project will not cost any money to the County. Upon receipt of required insurance and bonds, the County will grant a license to LoCI to install their equipment free of charge and LoCI will have the opportunity to apply for the tax credit using methane captured at the Yolo County Central Landfill. In exchange, if LoCI obtains any credits, the County will receive 20% of the net realized value.

The goal of this project is to test-run new technology that could help increase carbon sequestration from the landfill, furthering the County's sustainable environment goal. There are no current plans for this agreement and project to replace the monthly calibrated compliance monitoring that landfill staff and other vendors perform each month.

Collaborations (including Board advisory groups and external partner agencies)
County Counsel approved this agreement as to form.

Competitive Bid Process/Vendor Performance

Request for Proposals (RFP) Service Requested: Monitoring and Measuring Methane and other Gases

Evaluation Criteria Included in RFP

- Revenue Share/Cost Proposal (25%)
- Qualifications and Experience (25%)
- Demonstrated Competence/Responsibility (10%)
- Understanding of Project and Location (10%)
- Approach to Project and Project Schedule (20%)
- Customer References (10%)

Bids Received

Bidder	Bid
Loci Controls, Inc.	20% of net realized value of tax credit

Fiscal Information

Potential fiscal impact (see notes in explanation section below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$0
Amount budgeted for expenditure	$0
Additional expenditure authority needed	$0
One-time commitment	Yes

Source of Funds for this Expenditure	
General Fund	$0

Further explanation as needed

County could potentially receive revenue from this agreement if Loci is able to capture more carbon than the Landfill's current baseline. If they do, and apply for 45Q tax credit, County would receive 20% of the net realized value of credit.

AGREEMENT NO. __-___

(License Agreement for Remote Monitoring and Control System for Landfill Gas)

THIS AGREEMENT ("Agreement") is made and entered into this ____ day of _____, 2023 ("Effective Date"), by and between the County of Yolo, a political subdivision of the State of California ("County") and Loci Controls, Inc. ("Contractor"), a Delaware Corporation.

W I T N E S S E T H

WHEREAS, the County is authorized by Government Code Section 23004 to make contracts as necessary for the exercise of its powers; and

WHEREAS, the County is authorized by Government Code Section 31000 to contract with persons specially trained, experienced, expert and competent to perform special services such as providing equipment and services for remote monitoring and control of the landfill gas extraction wells; and

WHEREAS, the Yolo County Division of Integrated Waste Management operates the Yolo County Central Landfill, an active landfill and biogas plant at its location at 44090 County Road 28H, Woodland, CA 95776 ("Landfill" or "Landfill Premises"); and

WHEREAS, biogas is extracted from the Landfill through a series of wells that extend into the waste mass and as part of current operations, the wells are manually monitored and tuned on a regular basis;

WHEREAS, the Landfill has over 150 landfill gas wells that qualify for an automatic well-head control, as well as eight anaerobic digester cell gas wells and six header line locations;

WHEREAS, the County desires to obtain services that monitor and measure methane and other greenhouse gases ("GHG's") in a manner such that GHG (including methane) emissions can be more efficiently managed, controlled and limited ; and

WHEREAS, the County circulated and distributed a Request for Proposals, an excerpt of which is attached as Exhibit A; and

WHEREAS, the Contractor submitted a proposal to provide real time data and an automated landfill gas collection control system, an excerpt of which is attached as Exhibit B; and

WHEREAS, Contractor has represented and warrants to the County that it has the necessary training, experience, expertise and competency to complete and operate the System (defined herein) and provide the services, goods and materials that are described in this Agreement, and that it will be able to perform the herein described services at no cost to the County in accordance with Contractor's "Scenario B" in cost proposal described in Exhibit B attached hereto; and

WHEREAS, Contractor represents and warrants that neither Contractor, nor any of its officers, agents, employees, contractors, subcontractors, volunteers, or five percent owners, is excluded or debarred from participating in or being paid for participation in any Federal or State program; and

WHEREAS, Contractor further represents and warrants that no conditions or events now exist which give rise to Contractor or any of its officers, agents, employees, contractors, subcontractors, volunteers or five percent owners being excluded or debarred from any Federal or State program; and

WHEREAS, Contractor understands that the County is relying upon these representations in entering into this Agreement.

NOW, THEREFORE, the County and the Contractor agree as follows:

I. INCORPORATION OF RECITALS: EXHIBITS.

The foregoing recitals are incorporated into this Agreement. The complete Agreement shall include the following Exhibits, which are attached hereto and incorporated herein:

Exhibit A	RFP Excerpt
Exhibit B	Proposal Excerpt
Exhibit C	Workers' Comp. Certificate
Exhibit D	Well Sites Map
Exhibit E	Anaerobic Digester Cell Gas Wells Map
Exhibit F	Requirements Applicable to System Installation and Operation
Exhibit G	Air Permits
Exhibit H	Payment Bond
Exhibit I	Performance Bond

In the event of any conflict between any of the provisions of this Agreement (including Exhibits), the provision that requires the highest level of performance from Contractor for the County's benefit shall prevail.

II. THE SYSTEM

A. At its sole cost and expense, Contractor shall design, construct, install, operate and maintain a real time data and an automated landfill gas collection control system with monitoring at each of the Landfill well sites (150 sites) identified and depicted in Exhibit D hereto and at the eight anaerobic digester cell gas wells identified and depicted in Exhibit E hereto ("the System"). The System shall be installed, constructed, operated, and maintained in accordance with

all applicable laws and Exhibits A, B, and F including provision of remote and on-site labor, as well as necessary software and equipment, to support the System. The Landfill well sites and anaerobic digester cell gas wells, identified and depicted in Exhibits D and E, are located on a portion of the Landfill Premises and are collectively referred to herein as the "Landfill Wellfield." The System shall have the ability to make continuous, incremental adjustments to maximize the collection of methane from the Landfill Wellfield, as further described in Exhibits A and B.

B. Contractor as System Owner and Operator. The System will be owned by Contractor and will be operated and maintained and, as necessary, repaired by Contractor at its sole cost and expense; provided that any repair or maintenance costs incurred by Contractor as a result of the County's negligence or breach of its obligations hereunder shall be reimbursed by the County. The County shall be notified at least five (5) days in advance of such maintenance, unless emergency maintenance is required.

III. LICENSE

A. Subject to the receipt by the County of the required insurance and bonds required herein, the execution of this Agreement shall be deemed to constitute the granting of a revocable non-exclusive license coterminous with the Term of this Agreement to the Contractor to utilize the Landfill Wellfield for all purposes of this Agreement, including ingress and egress rights for Contractor and its employees, contractors and subcontractors. Contractor may enter upon, occupy and use the Landfill Wellfield to design, construct, install, start-up, test, operate and maintain the System and to receive Landfill Gas in accordance with the provisions of this Agreement and for no other purpose (the "License"). With respect to Contractor's access to the Landfill Wellfield, however, the License shall be limited to access during Landfill business hours (or non-business hours if approved in writing by the County) and during non-business hours in the event of an emergency or circumstance posing an imminent risk to human health, the environment, or the System and in a manner that minimizes inconvenience to and interference with the County's use of the Landfill Premises or Landfill business operations to the extent commercially practical, as further provided in Section V herein.

B. Except as expressly otherwise provided, Contractor shall assume all risks associated with such activities and shall indemnify, defend and hold harmless the County and the County Indemnitees in accordance with Section XIV herein.

C. The right of access contained herein does not grant the Company access to any portion of the Landfill Premises or any other structures, improvements, equipment, or any other systems, fixtures, or real or personal property owned, leased, operated, maintained, or occupied by the County except as necessary for the Contractor to access the System.

The County shall not, and shall ensure that its employees, agents and invitees do not, utilize the Landfill Wellfield in a manner that will materially interfere with the Contractor's installation, operation, maintenance and removal of the System.

D. The Contractor shall keep the Landfill Wellfield and the System free of all liens and shall further keep the Landfill Wellfield and the System neat, clean and substantially litter-free at all times, ensure that the operation of the System does not create any odor, litter, noise, fugitive dust, vector or other adverse environmental effects constituting a nuisance condition or violation of the County's air permit requirements under applicable laws or applicable permits, including the County's state and federal air permit requirements., as those permits may be amended, attached hereto as Exhibit G for reference. If such a nuisance condition occurs, the Contractor shall expeditiously remedy the condition, make all commercially reasonable improvements and changes in operating and management practices necessary to prevent a recurrence of the nuisance condition.

E. As compensation for the granting of the License by the County, Contractor shall pay the County the License Payment described in Section IV herein. The License granted by this Agreement shall terminate upon the termination of this Agreement in accordance with its terms.

IV. LICENSE FEE; CREDITS

A. No Cost to County. Contractor shall design, construct, install, operate, and maintain the System at no cost to the County. The System will be owned by Contractor and will be operated and maintained and, as necessary, repaired by Contractor at its sole cost and expense, as provided in Section I.B herein.

B. Tax Credits; License Fee. Contractor represents and warrants that it will apply for and participate in the federal 45Q tax credit program at the earliest opportunity authorized by the 45Q tax credit program or any other federal, state, or other local tax credit, tax benefit, or grant that may be available for the System ("Credits").

The County hereby agrees that the Contractor has the sole and exclusive right to make all filings and otherwise do all things necessary to avail the Credits, if any, to the Contractor, and expressly assigns, sells, sets over and transfers to the Contractor all right, title, and interest in any Credits determined from the Effective Date and continuing throughout the term of the Agreement. Credits shall be owned solely by the Contractor and may be transferred, dealt in, traded, or shared by the Contractor in its sole discretion. The County shall execute all documents and perform all acts reasonably requested by the Contractor to effect ownership of the Credits by the Contractor and as needed to facilitate the qualification for, management, and transactions of the Credits. The County agrees that the

Contractor shall have clear, unique, and uncontested title to all Credits, unencumbered by any liens or conditions of the County.

The Contractor has complete discretion to "market" and arrange the assignment and sale of the Credits. The appointment and engagement of the Contractor to market Credits is exclusive and may not be assigned to any other person. Further, the County shall not undertake to directly market and sell any Credits.

In consideration of the License being granted by the County pursuant to this Agreement, if Contractor obtains Credits in connection with the System, 20% (twenty percent) of the "net realized value" of such Credits actually received by the Contractor shall be shared with the County ("License Fee"). "Net realized value" shall mean all cash revenue realized by the Contractor from the use as a taxpayer or the sale of Credits from the Project, net of all direct costs up to $25,000 per calendar year, including but not limited to legal, accounting, and other fees and costs to assess the qualification of the Contractor and the Project Site for Credits, costs to validate the Project, and verify the Credits claimed to be available, costs for filings and other compliance (including the costs to prepare and make all IRS and other filings), necessary fees paid to regulatory entities and other third parties, and minus any sharing of Credits to third parties if and only if as mutually agreed, and any costs otherwise incurred by the Contractor to monetize the Credits. No Contractor internal costs shall be included in the net realized value calculation.

The License Fee shall be paid to County within 30 days of the Contractor's receipt of the actual net realized value of the Credit. Contractor's obligation to pay the License Fee to the County shall survive the expiration or termination of the Agreement with respect to any applicable grant, tax credit, or other related net tax benefit realized for the System after the expiration or termination of this Agreement.

The Contractor makes no representation or warranties in regard to the qualification for, validation, marketability, or "pricing" of the Credits. The County acknowledges there are uncertain dynamics associated with availing the Credits from landfill operations and that no such Credits may be obtained or be obtainable by the Contractor or any other operator of the gas process system at the Project Site. Further, the market for the Credits is likely to be dynamic and unstructured and no assurance is provided as to the ability to market and sell, or otherwise benefit from the Credits and that the market can change at any time for reasons beyond the control of the Contractor. Any regulatory compliance associated with the activities at the Project Site (including by way of example, obligations to any federal, state, or local environmental regulator or agency) remain the sole obligation of the County, and by undertaking the services, the Contractor does not

assume any such obligation for regulatory oversight.

C. Environmental Credits. The Contractor understands and acknowledges that the County, as the successor to MM Yolo Power LLC, is a party to a Renewable Power Purchase Agreement ("Renewable PPA") with the Sacramento Municipal Utility District (SMUD) dated November 7, 2005, pursuant to which SMUD is entitled to receive and must purchase all "Environmental Attributes," as defined in that a Renewable PPA up to 3.8 megawatts (MW). Contractor acknowledges having received a copy of the Renewable PPA. The Renewable Energy Credits or "RECs" related to the Environmental Attributes belong only to SMUD in accordance with the Renewable PPA and Contractor may not claim entitlement to any gas collected by the System or RECs generated by the System.

V. COUNTY OPERATIONS; COOPERATION

A. Notwithstanding anything in this Agreement to the contrary, it is understood and agreed by the Contractor that the County's primary obligation and purpose is the efficient and safe undertaking of its solid waste management operations at the Landfill in accordance with applicable laws and permits, and that the rights granted to the Contractor hereunder are secondary to such Landfill business operations (including the minimization of odors) and the requirements of the County under applicable laws and permits. The construction and operation of the System shall not materially interfere with the operational requirements of the County with respect to the Landfill. Subject to the preceding sentences, the County agrees to use good faith efforts to cooperate with the Contractor with respect to Contractor requests (in writing and upon reasonable notice) regarding reasonable accommodations necessary for planned construction and maintenance activities; provided, however, that it is the responsibility of the Company to use reasonable efforts to schedule and perform construction and maintenance activities of the System in a manner which will not materially interfere with the ability of the County to operate the Landfill.

B. Contractor further acknowledges and understands that the County will need to monitor the System periodically to ensure compliance with the County's applicable air permits (see Exhibit G hereto). Contractor shall not impede or interfere with such inspections by the County and County shall not be required to provide prior notice of such inspections to Contractor.

VI. SITE SUITABILITY CONFIRMATION

The Contractor acknowledges that the Company's agents and representatives have visited, inspected and are familiar with the surface conditions of the Landfill Premises and the Landfill Wellfield. To the best of the Contractor's knowledge as of the date of this Agreement, (1) the surface physical condition of the Landfill Wellfield relevant to the obligations of the Contractor

pursuant to this Agreement, including surface conditions, normal and usual soil conditions, roads, utilities, topographical conditions and air and water quality conditions; (2) all local and other conditions that may be material to the Contractor's performance of its obligations under this Agreement (including, but not limited to, transportation; seasons and climate; access, availability, disposal, handling and storage of materials and equipment); and (3) availability and quality of labor and utilities are adequate for an acceptable and suitable site for the construction of the System. The Contractor further acknowledges that it has received and reviewed all information or documents regarding the Site provided to it by the County related to the Site or obtained in the course of performing its obligations hereunder including, but not limited to, any geotechnical data provided by the County; and that based on the foregoing, to the best of the Contractor's knowledge as of the date of this Agreement the Landfill Wellfield constitutes an acceptable and suitable site for the construction of the System.

VII. REPORTS

A. Contractor shall provide such reports as are required by this Agreement, and such additional information and reports relating to the services otherwise required by this Agreement as are reasonably requested by the Director, at the times and in the manner specified by this Agreement, or by the Director if not so specified. Any other provision of this Agreement notwithstanding, should Contractor fail to provide any report required by this Agreement in a timely manner and as otherwise set forth in this Agreement, County may terminate the agreement pursuant to the specifications herein.

B. County shall provide Contractor with all information pertinent to the System required of Contractor by this Agreement that is requested by Contractor and is within County's possession. No charge will be made for these materials.

VIII. OWNERSHIP OF DOCUMENTS AND WORK PRODUCTS; INTELLECTUAL PROPERTY

A. Professional and Technical Documents. Excluding intellectual property developed by Contractor with respect to the System, all professional and technical documents and information developed under this Agreement, and all work products, including plans, writings, work sheets, reports, and related data, materials, and all other rights and interests therein, shall become the property of the County, and Contractor agrees to deliver and assign the foregoing to the County, upon completion of the services hereunder or upon any earlier termination of this Agreement. In addition, basic data prepared or obtained under this Agreement, including the System's as-build plans, shall be made available and will be the property of the County without restriction or limitation on their use. No additional charge will be made for any of the foregoing.

B. Intellectual Property and Licenses. Contractor owns, or is authorized to use under patent rights, licenses, franchises, trademarks or copyrights, the technology necessary for the System without any known material conflict with the rights of

others. Contractor grants the County a limited right to use such intellectual property directly relating to the System for any County purpose directly relating to the System during the Term of this Agreement.

IX. RECORDS; ACCESS, RETENTION

Contractor shall retain and make available for review by the County and its designees all records, documents, and general correspondence relating to this Agreement and the services required hereunder for a period of not less than five (5) years after termination of this Agreement or until all pending audits and proceedings are completed, whichever is later. Contractor shall make such records available for inspection and copying by the County and its designees at any reasonable time. At least thirty (30) calendar days prior to any destruction of these records following the five years, Contractor shall notify the Director. Upon such notification, the Director shall either agree to the destruction or authorize the records to be forwarded to the County for further retention.

X. DISPUTES

Any dispute arising under this Agreement shall be decided by the County Administrative Officer who shall put his or her decision in writing and mail a copy thereof to the address for the notice to Contractor. The decision of the County Administrative Officer shall be final unless, within thirty (30) days from the date such copy is mailed to Contractor, Contractor appeals the decision in writing to the County Board of Supervisors. Any such written appeal shall detail the reasons for the appeal and contain copies of all documentation supporting Contractor's position. In connection with any appeal proceeding under this paragraph, Contractor shall be afforded the opportunity to be heard and offer evidence in support of its appeal to the County Board of Supervisors at a regular Board meeting. Pending a final decision of the dispute, Contractor shall proceed diligently with the performance of this Agreement and in accordance with the County Administrative Officer's decision. The decision of the County Board of Supervisors on the appeal shall be final for purposes of exhaustion of administrative remedies.

XI. TERM AND TERMINATION

A. The term of this Agreement shall be from the Effective Date through June 30, 2024 unless sooner terminated as hereinafter provided ("Term"). The Term of this Agreement may be extended by mutual consent for up to four optional one-year periods with a maximum term of five years.

B. Should either party fail to substantially perform its obligations in accordance with this Agreement, the other party may notify the defaulting party of such default in writing and provide not less than thirty (30) days to cure the default. Such notice shall describe the default, and shall not be deemed a forfeiture or termination of this Agreement. If such default is not cured within said thirty day period (or such longer period as is specified

in the notice or agreed to by the parties), the party that gave notice of default may terminate this Agreement upon not less than fifteen (15) days advance written notice. The foregoing notwithstanding, neither party waives the right to recover damages against the other for breach of this Agreement.

C. To the extent this Agreement may require payment by County to Contractor, if any, the Agreement is subject to the County, the State of California and the United States appropriating and approving sufficient funds for the activities required of the Contractor pursuant to this Agreement. If the County's adopted budget and/or its receipts from the State of California and the United States do not contain sufficient funds for the County to satisfy any payment obligations it may have under this Agreement, the County may terminate this Agreement by ten (10) days advance written notice thereof to the Contractor, in which event the County shall have no obligation to pay the Contractor any further funds or provide other consideration and the Contractor shall have no obligation to provide any further services pursuant this Agreement. If the County terminates the Agreement pursuant to this subparagraph, the County will pay Contractor in accordance with this Agreement for all services performed to the satisfaction of the Director before such termination and for which funds have appropriated as required by law.

D. This Agreement may be terminated for any reason by either party at any time during its term, by giving 60 days' written notice to the other party.

E. If Contractor, or any of its officers, agents, employees, contractors, subcontractors, volunteers or five percent owners, becomes excluded, debarred or suspended from participation in Federally or State funded programs, the County may terminate this Agreement by giving ten (10) days advance written notice thereof to the Contractor.

F. Upon termination of this Agreement or suspension of work by either County or Contractor, Contractor shall furnish to County all documents and drawings prepared under this Agreement, whether complete or incomplete. In the event of termination for any reason, reproducible copies of all finished or unfinished documents, drawings, maps, models, photographs, and reports prepared by Contractor shall become the sole and exclusive property of Yolo County and Contractor shall be entitled to receive compensation for any work completed on such documents and other materials determined by the Director to be of satisfactory quality and within the terms and conditions of this Agreement. All creative work undertaken by Contractor such as sketches, copy, dummies and all preparatory work for which Contractor is not compensated by the County shall remain the sole and exclusive property of the Contractor.

G. During and following the term of this Agreement, Contractor shall not use, distribute, or otherwise circulate any of the materials developed pursuant to this

Agreement and for which Contractor was compensated by the County without the express written permission of the Director.

XII. APPLICABLE LAWS; PREVAILING WAGE

A. In the performance of its obligations under this Agreement, Contractor shall comply with all applicable Federal, State, and local laws, ordinances, regulations, directives, orders, judgments, permits, approvals, laws, or other requirement of any governmental agency having jurisdiction, that apply to or govern the Landfill Premises or the System in force on the Effective Date and as they may be enacted, issued, or amended during the term of this Agreement.

B. This Agreement shall be deemed to be executed within the State of California and construed in accordance with and governed by the laws of the State of California. Any action or proceeding arising out of this Agreement shall be filed and resolved in a California State court located in Woodland, California. Contractor waives any removal rights it might have under State or Federal law.

C. Contractor is aware of the requirements of Labor Code sections 1720 et seq. and 1770 et seq., as well as California Code of Regulations, Title 8 Section 16000 et seq. ("Prevailing Wage Laws"), which require the payment of prevailing wage rates and the performance of other requirements on certain "public works" and "maintenance" projects. Contractor agrees to fully comply with such Prevailing Wage Laws. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification, or type of worker needed to perform work on the project available to interested parties upon request and shall post copies at the Contractor's principal place of business and at the project site, including a schedule showing all determined general prevailing wage rates and all authorized deductions, if any, from unpaid wages actually earned. Contractor shall defend, indemnify, and hold the County, its officials, officers, employees and authorized volunteers free and harmless from any claims, liabilities, costs, penalties or interest arising out of any failure or alleged failure to comply with the Prevailing Wage Laws.

1. If total compensation is $15,000 or more for maintenance or $25,000 or more for construction, alteration, demolition, installation, or repair, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Consultant and all subcontractors performing such services must be registered with the Department of Industrial Relations. Consultant shall maintain registration for the duration of the Agreement and require the same of any subcontractors, as applicable. This Agreement may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Consultant's sole responsibility to comply with all applicable registration and labor compliance requirements that may apply under the Prevailing Wage Laws, including Labor Code Sections 1725.5 and 1771.1. Any stop orders issued by

the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's performance of services, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor-caused delay and shall not be compensable by the County.

2. The County will not recognize any claim for additional compensation because of the payment by Contractor of any wage rate as a result of the applicability of the Prevailing Wage Laws. The possibility of wage increases is one of the elements to be considered by Contractor in determining a bid and will not under any circumstances be considered as the basis of a claim against the County on the Agreement.

XIII. NON-DISCRIMINATION

Contractor certifies that any service provided or work performed pursuant to this Agreement shall be without discrimination based on color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability in accordance with all applicable Federal, State and County laws and regulations and any administrative directives established by the County Board of Supervisors or the County Administrative Officer. For the purpose of this Agreement, distinctions on the grounds of color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability include but are not limited to the following: denying a participant any service or benefit which is different, or is provided in a different manner or at a different time from that provided to other participants under this Agreement; subjecting a participant to segregation or separate treatment in any way in the enjoyment or any advantage or privilege enjoyed by others receiving any service or benefit; treating a participant differently from others in determining whether the participant has satisfied any admission, enrollment quota, eligibility, membership, or other requirement or condition which individuals must meet in order to be provided any service or benefit; and the assignment of times or places for the provision of services.

XIV. CONTRACTOR'S RESPONSIBILITIES; INDEMNIFICATION

A. Contractor shall exercise all of the care and judgment consistent with good practices in the performance of the services required by this Agreement.

B. General Indemnification. With the exception that this section shall in no event be construed to require indemnification by Contractor to a greater extent than permitted under the public policy of the State of California, Contractor shall indemnify, defend and hold harmless the County of Yolo, officers, agents, employees and volunteers from and against any and all claims, damages, demands, losses, defense costs, expenses (including attorney fees) and liability of any kind or nature arising out of or resulting from performance of the work, provided that any such claim, damage, demand, loss, cost, expense or liability is caused in whole or in part by any negligent or intentional act or omission of the contractor, any subcontractor, anyone directly or indirectly employed by

any of them or anyone for whose acts any of them may be liable, regardless of whether or not it is caused in part by a party indemnified hereunder.

C. Hazardous Waste Indemnification. Contractor shall indemnify, defend with counsel acceptable to the County, and hold harmless the County, its officers, agents, employees and volunteers from and against all claims, damages, (including but not limited to special, consequential, natural resources and punitive damages) injuries, response mediation and removal costs, losses, demands, debts, liens liabilities, causes of action, suits, legal or administrative proceedings, interest, fines, charges, penalties, attorneys' fees for the adverse party and expenses (including costs and fees) of any kind whatsoever paid, incurred or suffered by, or asserted against, the County arising from or attributable to any acts or omissions of Contractor, its agents, employees, contractors or subcontractors including but not limited to any repair, cleanup or detoxification, or preparation and implementation of any removal, remedial, response, closure or other plan concerning any hazardous substance or Hazardous Wastes brought to the Facility, the Landfill site or the Licensed Premises during the term of this Agreement, or handled by Contractor or its agents, employees, contractors, or subcontractors at any place where the Contractor conducts operations pursuant to this Agreement. The foregoing indemnity is intended to operate as an agreement pursuant to Section 107(e) of CERCLA, 42 U.S.C. Section 9607(c) and California Health and Safety Code section 25364, to defend, insure, protect, hold harmless and indemnity the County from liability. In circumstances where the indemnified parties are determined or alleged to also have been negligent, California's law on comparative negligence shall apply. The Contractor's obligations under this section shall survive termination of this Agreement.

D. The defense and indemnification obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement. Contractor and/or subcontractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. In providing any defense under this Section, Contractor shall use counsel reasonably acceptable to the County Counsel.

E. Possessory Interest Tax. Contractor shall be responsible for all income, gross receipts, ad valorem, personal property or real property or other similar taxes, including any possessory interest taxes that may be created as provided in Revenue & Taxation Code section 107 and 107.6, and any and all franchise fees or similar fees assessed against it due to its ownership of the System, use of the Landfill Premises, or grant of the License provided herein.

XV. PUBLIC LIABILITY AND PROPERTY DAMAGE INSURANCE

A. During the term of this Agreement, Contractor shall at all times maintain, at its expense, the following coverages and requirements. The comprehensive general

liability insurance shall include broad form property damage insurance.

1. Minimum Coverages (as applicable). Insurance coverage shall be with limits not less than the following:

a. **Comprehensive General Liability** – $2,000,000/occurrence and $4,000,000/aggregate

b. **Automobile Liability** – $1,000,000/occurrence (general) and $500,000/occurrence (property) (include coverage for Hired and Non-owned vehicles)

c. **Professional Liability/Malpractice/Errors and Omissions** – $1,000,000/occurrence and $2,000,000/aggregate (If any engineer, architect, attorney, accountant, medical professional, psychologist, or other licensed professional performs work under a contract, the contractor must provide this insurance. If not, then this requirement automatically does not apply.)

d. **Workers' Compensation** – Statutory Limits/**Employers' Liability** - $1,000,000/accident for bodily injury or disease (If no employees, this requirement automatically does not apply.)

2. The County, its officers, agents, employees and volunteers shall be named as additional insured on all but the workers' compensation and professional liability coverages. **[NOTE: Evidence of additional insured may be needed as a separate endorsement due to wording on the certificate negating any additional writing in the description box.]** It shall be a requirement under this agreement that any available insurance proceeds broader than or in excess of the specified minimum Insurance coverage requirements and/or limits shall be available to the Additional Insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this Agreement; or (2) the broader coverage and maximum limits of coverage of any Insurance policy or proceeds available to the named Insured; whichever is greater.

a. The Additional Insured coverage under the Contractor's policy shall be "primary and non-contributory" and will not seek contribution from the County's insurance or self-insurance and shall be at least as broad as CG 20 01 04 13.

b. The limits of Insurance required in this agreement may be satisfied by a combination of primary and umbrella or excess Insurance. Any umbrella or excess Insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non contributory basis for the benefit of the County of Yolo (if agreed to in a

written contract or agreement) before the County's own Insurance or self insurance shall be called upon to protect it as a named insured.

3. Said policies shall remain in force through the life of this Agreement and, with the exception of professional liability coverage, shall be payable on a "per occurrence" basis unless the County Risk Manager specifically consents in writing to a "claims made" basis. For all "claims made" coverage, in the event that the Contractor changes insurance carriers Contractor shall purchase "tail" coverage covering the term of this Agreement and not less than three years thereafter. Proof of such "tail" coverage shall be required at any time that the Contractor changes to a new carrier prior to receipt of any payments due.

4. The Contractor shall declare all aggregate limits on the coverage before commencing performance of this Agreement, and the County's Risk Manager reserves the right to require higher aggregate limits to ensure that the coverage limits required for this Agreement as set forth above are available throughout the performance of this Agreement.

5. Any deductibles or self-insured retentions must be declared to and are subject to the approval of the County Risk Manager. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied either by the named Insured or Yolo County.

6. Each insurance policy shall be endorsed to state that coverage shall not be suspended, voided, canceled by either party, reduced in coverage or in limits except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the Director (ten (10) days for delinquent insurance premium payments).

7. Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise approved by the County Risk Manager.

8. The policies shall cover all activities of Contractor, its officers, employees, agents and volunteers arising out of or in connection with this Agreement.

9. For any claims relating to this Agreement, the Contractor's insurance coverage shall be primary, including as respects the County, its officers, agents, employees and volunteers. Any insurance maintained by the County shall apply in excess of, and not contribute with, insurance provided by Contractor's liability insurance policy.

10. The Contractor shall waive all rights of subrogation against the County, its officers, employees, agents and volunteers.

B. Prior to commencing services pursuant to this Agreement, Contractor shall furnish the County with original endorsements reflecting coverage required by this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. All endorsements are to be received by, and are subject to the approval of, the County Risk Manager before work commences. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications.

F. During the term of this Agreement, Contractor shall furnish the County with original endorsements reflecting renewals, changes in insurance companies and any other documents reflecting the maintenance of the required coverage throughout the entire term of this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications. Yolo County reserves the right to obtain a full certified copy of any Insurance policy and endorsements. Failure to exercise this right shall not constitute a waiver of right to exercise later.

G. Contractor agrees to include with all Subcontractors in their subcontract the same requirements and provisions of this agreement including the indemnity and Insurance requirements to the extent they apply to the scope of the Subcontractor's work. Subcontractors hired by Contractor agree to be bound to Contractor and the County of Yolo in the same manner and to the same extent as Contractor is bound to the County of Yolo under the Contract Documents. Subcontractor further agrees to include these same provisions with any Sub-subcontractor. A copy of the Owner Contract Document Indemnity and Insurance provisions will be furnished to the Subcontractor upon request. The Contractor shall require all Subcontractors to provide a valid certificate of insurance and the required endorsements included in the agreement prior to commencement of any work and Contractor will provide proof of compliance to the County of Yolo.

H. Contractor shall maintain insurance as required by this contract to the fullest amount allowed by law and shall maintain insurance for a minimum of five years following the completion of this project. In the event contractor fails to obtain or maintain completed operations coverage as required by this agreement, the County at its sole discretion may purchase the coverage required and the cost will be paid by Contractor.

XVI. WORKERS' COMPENSATION

Contractor shall provide workers' compensation coverage as required by State law, and prior to commencing services pursuant to this Agreement shall file the following statement with the County in a form substantially as set forth below.

WORKERS' COMPENSATION CERTIFICATE

I am aware of the provisions of Section 3700 of the Labor Code that require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that Code, and I will comply with such provisions before commencing any services required by this Agreement.

The person executing this certificate on behalf of Contractor affirmatively represents that she/he has the requisite legal authority to do so on behalf of Contractor, both the person executing this Agreement on behalf of Contractor and Contractor understand that the County is relying on this representation in entering into this Agreement.

XVII. NOTICE

A. All notices shall be deemed to have been given when made in writing and delivered or mailed to the respective representatives of County and Contractor at their respective addresses as follows:

Contractor:

Attn: Peter Quigley
Loci Controls, Inc.

Division of Integrated Waste Management
44090 County Road 28H
Woodland, CA 95776
marissa.juhler@yolocounty.org

B. Any party may change the address to which such communications are to be given by providing the other parties with written notice of such change at least fifteen (15) calendar days

prior to the effective date of the change.

C. All notices shall be effective upon receipt and shall be deemed received through delivery if personally served or served using email, or on the fifth (5th) day following deposit in the mail if sent by first class mail.

XVIII. CONFLICT OF INTEREST

A. Contractor shall comply with the laws and regulations of the State of California and County regarding conflicts of interest, including, but not limited to, Article 4 of Chapter 1, Division 4, Title 1 of the California Government Code, commencing with Section 1090, and Chapter 7 of Title 9 of said Code, commencing with Section 87100 including regulations promulgated by the California Fair Political Practices Commission.

B. Contractor covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of Contractor's obligations and responsibilities hereunder. Contractor further covenants that in the performance of this Agreement, no person having any such interest shall be employed. This covenant shall remain in force until Contractor completes performance of the services required of it under this Agreement.

C. Contractor agrees that if any fact comes to its attention that raises any question as to the applicability of any conflict of interest law or regulation, Contractor will immediately inform the County and provide all information needed for resolution of the question.

XIV. COVENANT AGAINST CONTINGENT FEES

Contractor warrants that it has not employed or retained any company or person, other than a bona fide employee working for Contractor, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration, contingent upon or resulting from the award or making this agreement. For breach or violation of this warranty, the County shall have the right to annul this agreement without liability, or in its discretion to deduct from the agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

XX. AUDITS

A. Contractor shall be subject to examination and audit by the State or the County, or both, throughout the term of this Agreement and thereafter for a period of three years from the date that final payment is made pursuant to this Agreement. This does not preclude access to records by County, State, the Comptroller General of the United States, or any of their authorized representatives, as otherwise provided by this Agreement, the

State contract, or State or Federal laws and regulations. Contractor agrees that County and/or State has the right to review, obtain, and copy all records pertaining to the performance of this Agreement, and agrees to provide County and/or State with any and all relevant information requested.

B. Any and all books, records, and facilities maintained by Contractor related to services provided under this Agreement may be audited, inspected and copied at any time during normal business hours. Unannounced visits may be made at the discretion of the County or State. Employees who might reasonably have information related to such records may be interviewed. All expenditures of State and federal funds furnished to Contractor pursuant to this Agreement are subject to audit by County, State and/or Federal representatives. Such audits shall consider and build upon external independent audits performed pursuant to audit requirements of the Office of Management and Budget (OMB) Circular A-133 as described in Paragraph C below.

C. Should Contractor expend $500,000 or more in Federal funds during any fiscal year, Contractor shall furnish County a certified copy of an Audit Report from an independent CPA firm covering the Contractor's preceding fiscal year of January 1 through December 31. This Audit shall be performed in accordance with OMB Circular A-133 and conducted in accordance with generally accepted government auditing standards as described in Government Auditing Standards (1994 Revision), and provided in a form satisfactory to the Director.

Contractor shall provide this Audit Report no later than July 31 of each year. In the event that this Agreement expires or is terminated on a date other than December 31, Contractor shall provide County such an Audit Report covering the preceding period of January 1 through the date of expiration or termination no later than July 31 after the date of expiration or termination. Contractor shall ensure that audit work papers supporting the report are retained for a period of three (3) years from the date of the audit report, and longer if notified by the State or County to extend the retention period, and are made available to the State and/or County upon request.

D. Should an Audit Report or any State or County audit determine that Contractor has misspent funds and been overpaid based on the requirements of this Agreement and applicable laws and regulations, County shall demand repayment from Contractor in the amount of such audit findings and withhold any payment otherwise due under this Agreement until Contractor repays such amount. Contractor shall repay County such amount within sixty (60) days of the date of the County's demand for repayment. Should Contractor fail to repay County within sixty (60) days of the date of County's demand for repayment, the County may offset the amount due from Contractor against any amounts that would otherwise be due from the County to Contractor pursuant to this Agreement or any other agreement or source.

E. Any failure or refusal by Contractor to permit access to any facilities, books, records or other information required to be provided to the State &/or the County by this Agreement &/or the State contract shall constitute an express and immediate breach of this Agreement.

XXI. ASSIGNMENT AND SUBCONTRACTS

The services and obligations required of Contractor under this Agreement are not assignable in whole or in part. In addition, Contractor shall not subcontract any portion of the services required of Contractor by this Agreement without the express written consent of the Director. If any portion of the services required of Contractor are subcontracted, the subcontractor(s) shall maintain the same insurance as required of Contractor by this Agreement and Contractor shall be fully responsible to the County for all work undertaken by subcontractors.

XXII. STATUS OF CONTRACTOR; RELATIONSHP OF PARTIES

A. It is understood and agreed by all the parties hereto that Contractor is an independent contractor and that no relationship of employer-employee exists between the County and Contractor. Neither Contractor nor Contractor's assigned personnel shall be entitled to any benefits payable to employees of the County. Contractor hereby indemnifies and holds the County harmless from any and all claims that may be made against the County based upon any contention by any third party that an employer-employee relationship exists by reason of this Agreement or any services provided pursuant to this Agreement.

B. Is further understood that the relationship between the County and Contractor shall not be that of partners, agents, or joint ventures for one another, and nothing contained in this Agreement shall be deemed to constitute a partnership or agency agreement between them for any purposes, including federal income tax purposes. The parties, in performing any of their respective obligations hereunder, shall be independent contractors or independent parties and shall discharge their contractual obligations at their own risk.

C. It is further understood and agreed by all the parties hereto that neither Contractor nor Contractor's assigned personnel shall have any right to act on behalf of the County in any capacity whatsoever as an agent or to bind the County to any obligation whatsoever.

D. It is further understood and agreed by all the parties hereto that Contractor must issue any and all forms required by Federal and State laws for income and employment tax purposes, including W-2 and 941 forms, for all of Contractor's assigned personnel.

XXIII. AMENDMENT

This Agreement may be amended only by written instrument signed by the County and Contractor.

XXIV. WAIVER

The waiver by the County or any of its officers, agents or employees or the failure of the County or its officers, agents or employees to take action with respect to any right conferred by, or any breach of any obligation or responsibility of this Agreement shall not be deemed to be a waiver of such obligation or responsibility, or subsequent breach of same, or of any terms, covenants or conditions of this Agreement.

XXV. AUTHORIZED REPRESENTATIVE

The person executing this Agreement on behalf of Contractor affirmatively represents that she/he has the requisite legal authority to enter into this Agreement on behalf of Contractor and to bind Contractor to the terms and conditions of this Agreement. Both the person executing this Agreement on behalf of Contractor and Contractor understand that the County is relying on this representation in entering into this Agreement.

XXVI. PUBLIC RECORDS ACT

Upon its execution, this Agreement (including all exhibits and attachments) shall be subject to disclosure pursuant to the California Public Records Act.

XXVII. ADDITIONAL PROVISIONS

A. Where there is a doubt as to whether a provision of this document is a covenant or a condition, the provision shall carry the legal effect of both. Should the County choose to excuse any given failure of Contractor to meet any given condition, covenant or obligation (whether precedent or subsequent), that decision will not be, or have the legal effect of, a waiver of the legal effect in subsequent circumstances of either that condition, covenant or obligation or any other found in this document. All conditions, covenants and obligations continue to apply no matter how often County may choose to excuse a failure to perform them.

B. Except where specifically stated otherwise in this document, the promises in this document benefit the County and Contractor only. They are not intended to, nor shall they be interpreted or applied to, give any enforcement rights to any other persons or third parties (including corporate) which might be affected by the performance or non-performance of this Agreement, nor do the parties hereto intend to convey to anyone any "legitimate claim of entitlement" with the meaning and rights that phrase has been

given by case law.

C. Debarment

1 By signing this Agreement, the Contractor agrees to comply with applicable Federal suspension and debarment regulations including, but not limited to, 7 CFR Part 3017, 45 CFR 76, 40 CFR 32 or 34 CFR 85.

2. By signing this agreement, the Contractor certifies to the best of its knowledge and belief, that it and its principals:

    a. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any federal department or agency;

    b. Have not within a three-year period preceding this application/proposal/agreement been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

    c. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in Paragraph 2(b) herein;

    d. Have not within a three-year period preceding this application/proposal/ agreement had one or more public transactions (Federal, State or local) terminated for cause or default;

    e. Shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under federal regulations (i.e., 48 CFR part 9, subpart 9.4), debarred, suspended, declared ineligible, or voluntarily excluded from participation in such transaction, unless authorized by the State; and

    f. Will included a clause entitled, "Debarment and Suspension Certification" that essentially sets forth the provisions herein, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

3. If the Contractor is unable to certify to any of the statements in this certification, the Contractor shall submit an explanation to the County program funding this

Agreement, and the County shall have the option of terminating this Agreement immediately or at any time thereafter, upon giving Contractor written notice of such termination, if the explanation is not found satisfactory by the County in its sole discretion.

4. The terms and definitions herein have the meanings set out in the Definitions and Coverage sections of the rules implementing Federal Executive Order 12549.

5. If the Contractor knowingly violates this certification, in addition to other remedies available to the Federal Government, the County may terminate this Agreement at any time upon giving Contractor written notice of such termination.

XXVIII. ENTIRE AGREEMENT

This Agreement constitutes the entire agreement between the County and Contractor and supersedes all prior negotiations, representations, or agreements, whether written or oral. In the event of a dispute between the parties as to the language of this Agreement or the construction or meaning of any term hereof, this Agreement shall be deemed to have been drafted by the parties in equal parts so that no presumptions or inferences concerning its terms or interpretation may be construed against any party to this Agreement.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year first set forth above.

Kimberly Hood, Assistant County Counsel

I. INTRODUCTION

A. STATEMENT OF PURPOSE

The County of Yolo, Department of Community Services, Division of Integrated Waste Management ("County"), is requesting proposals from qualified developers ("Respondents") to provide appropriate software and hardware installation which will enable the monitoring and measuring of methane and other gases in a manner such that methane emissions can be more efficiently managed, controlled and limited. Additionally, the Yolo County Central Landfill requires access to the data associated with the monitoring and measuring services that will be used to calculate, validate and determine eligibility for the 45Q tax credit associated with the capture of methane.

Proposers who submit a response to this RFP must have the ability to meet the requirements, including the terms and conditions contained in this RFP.

B. SYNONYMOUS TERMS

As used throughout this proposal and its attachments, the following terms are synonymous:

1. a. Supplier, Vendor, Contractor
   b. Purchase Order, Contract, Agreement
   c. Services, Work, Scope, and Project
   d. Bidder, Offeror, Proposer, Respondent

2. "The County" refers to the County of Yolo, California.

C. SCOPE OF WORK

1) GENERAL DESCRIPTION/BACKGROUND INFORMATION:

a. The Yolo County Division of Integrated Waste Management operates the Yolo County Central Landfill, an active landfill and biogas plant at its location at 44090 County Road 28H, Woodland, CA 95776. Biogas is extracted from the landfill through a series of wells that extend into the waste mass and as part of current operations, the wells are manually monitored and tuned on a regular basis.

b. The County has over 150 landfill gas wells (see Attachment 3) and estimates that approximately 150 landfill gas wells qualify for an automatic well-head control. In addition, the County has eight anaerobic digester cell gas wells (see Attachment 4) and 6 header line locations. It is up to the Respondent to determine which of the landfill gas wells would be best to monitor and control based on the historical data the County can provide.

c. This project will include the installation of remote monitoring equipment and automated control valves that will have the ability to make continuous, incremental adjustments to maximize the collection of methane from the wellfield.

d. The County is aware of the 45Q tax credit and is interested in partnering with a Respondent that would share revenues from such tax credit.

e. 45Q tax credit is for investment in new equipment to enhance the performance of an existing gas capture system from a large emission source.

f. Threshold for a qualifying facility is 12,500 metric tons/year of CO2 captured (1,000-1,500 scfm of LFG captured depending on CO2 concentration). See Attachment 6 for historical CO2 equivalent emissions (2016-2021).

g. 45Q requires that a Life Cycle Analysis be conducted on the utilization process considering the global warming potential of all greenhouse gases captured with the

carbon oxides and utilized in the manufacturing process – the destruction of the methane as part of the process of generating electricity from landfill gas results in a very significant emission reduction from this application as demonstrated by the Life Cycle Analysis.

h. Contractual relationships are permitted for credit ownership between multiple owners of the gas capture system, as well as "utilizer" of the captured landfill gas.

i. Respondent must provide rational for percentage of revenue sharing from tax credit based on recovery of capital cost and the annual operation and maintenance costs for either Pricing A or Pricing B. Higher revenue sharing proposal to the County will result in more evaluation criteria points.

j. Respondent must be familiar with all site conditions to respond to this RFP. Upon finding any omissions or discrepancy in the Proposal documents, the Respondent shall notify the Issuer immediately so that any necessary addenda may be issued. Failure of the Respondent to completely investigate the locations and/or to be thoroughly familiar with the contract documents and all addenda shall in no way relieve the Respondent from any obligation with respect to the Proposal.

k. The County is seeking proposals from qualified developers for three scenarios:

- **Pricing A:** County purchases license for software and purchases all equipment. Respondent installs all equipment and provides ongoing monitoring and maintenance services.
- **Pricing B:** County purchases license for software and Respondent supplies and owns all equipment and provides ongoing monitoring and maintenance services.
- **Pricing C:** County does not purchase software or hardware, nor pays for maintenance. County receives only a revenue sharing proposal.

Proposals may address any one of the scenarios or provide proposals for more than one scenario, or a combination thereof.

2) TECHNICAL SPECIFICATIONS:

a) CONTRACTOR MINIMUM GENERAL WORK REQUIREMENTS:

Contractor shall:

- Furnish all equipment, tools, and labor for the installation of monitoring equipment and controls and any required maintenance for the period of the agreement.
- Provide field service support for continued maintenance, repair, or replacement of the equipment for the period of the agreement. Response to on-site service calls shall be within 1 business day. All costs for labor and materials associated with this support shall be included in the proposed cost.
- Provide remote operating and wellfield tuning support from a landfill gas collection analyst for the period of the agreement. Response times to email or telephone communications shall be within 1 hour during normal business hours. All costs associated with this support shall be included in the proposed cost.
- Be able to demonstrate improvements in the quantity and quality of landfill gas collected from the wellfield as a result of the installation of the equipment.

- Provide the monitoring and verification of the total carbon reduction, as well as preparation and submission of this information for the 45Q tax credit. The County shall be provided access to audit this paperwork at any time. Contractor shall be responsible for reporting accurate information when filing for this tax credit and will be solely responsible for any reporting errors. Contractor shall not take back any County shared revenue based on any discrepancies or errors when filing.

- Contractor shall keep all records, reports and historical data for a period of seven (7) years.

3) VENDOR MINIMUM REQUIREMENTS:

a) Vendor shall have at least three years' experience with installation of monitoring equipment and controls related to the monitoring and measuring of methane and other gases.
b) Vendor shall have at least three years' experience with the monitoring & measuring of methane and other gases.
c) The Respondent must hold all current State required contractor licenses to perform this work.
d) Vendor shall comply with Prevailing Wage requirements (Labor Code 1720 et sq.) since this is considered a Public Works Project. Per Public Works Contractor Registration Law [SB 854], Contractors and Subcontractors who intend to bid or perform work on this Project must be registered with the Department of Industrial Relations.
e) Vendor shall have completed at least one project of the size and scope of this proposal in the last two years.

4) **SOFTWARE/EQUIPMENT SPECIFICATIONS:**

a) Vendor shall state the proposed software and hardware required to be used for the monitoring and measuring of gases.
    - This system shall remotely monitor wellfield data and automatically or manually make adjustments to gas targets and valve settings real-time via computer, tablet or cell phone.
    - Yolo County shall have immediate access and ownership of gas well-head data from the County Landfill.

b) Vendor shall describe in detail what changes will be made to the existing gas well-heads. Normal and mandatory adjustment of well-heads will continue and any equipment or changes to the well-heads shall not interfere with third-party reporting.

c) Regarding valves & controls, vendor shall remotely and automatically make adjustments to the applied pressure at each landfill gas well to optimize gas quality and flow and maximize methane collection

d) Vendor shall provide analyzing & monitoring equipment which meets the following requirements:

    - Shall be Solar Powered
    - Shall be compatible with 2", 4" or 6" HDPE or PVC piping
    - Shall include Wireless Communication
    - Shall include Automatic Calibration

- Shall allow Yolo County immediate access to the well-head data as being collected

e) Vendor shall provide the analyzing and monitoring of equipment remotely at each landfill gas well location (assume 158 locations in which 8 locations will be anaerobic digester gas wells) based on sensor accuracy specifications below:

- Methane (with an accuracy +/- 0.5% by volume)
- Carbon Dioxide (with an accuracy +/- 0.5% by volume)
- Oxygen (with an accuracy +/- 0.25% by volume)
- Balance Gas (with an accuracy +/- 1.25% by volume)
- Flow (scfm)
- System Vacuum (in. w.c.)
- Temperature

NOTE:
The County will be able to increase or decrease the number of monitoring locations without any additional cost or penalties to the County for the yearly software license fee. Equipment shall be added or delete without penalty to the County. The Vendor shall supply additional equipment at the rates agreed upon in the proposal and any increase rates allowed in the RFP for additional contract extensions.

f) Vendor shall provide the analyzing and monitoring of equipment remotely at each landfill location within the landfill gas header piping (assume 6 locations), based on sensor accuracy specifications below:

- Methane (with an accuracy +/- 0.5% by volume)
- Carbon Dioxide (with an accuracy +/- 0.5% by volume)
- Oxygen (with an accuracy +/- 0.25% by volume)
- Balance Gas (with an accuracy +/- 1.25% by volume)
- Flow (scfm)
- System Vacuum (in. w.c.)
- Temperature

NOTE:
The County will be able to increase or decrease the number of monitoring locations without any additional cost or penalties to the County for the yearly software license fee. Equipment shall be added or deleted without penalty to the County. The Vendor shall supply additional equipment at the rates agreed upon in the proposal with any negotiated rate increases allowed in the final agreement for additional contract extensions, consistent with Section VI.I of this RFP (Price Escalation).

g) Vendor shall provide cloud access to the system in real time, 24/7, 365 days a year.

5) SOFTWARE/HARDWARE ACCEPTANCE TESTING:

a) The County reserves the right to test the software/hardware and equipment for a period of ninety (90) days prior to acceptance to determine that the product functions as outlined in this document. During the final phase of acceptance testing if the system is not fully functional the time will reset for a period of thirty (30) days to complete the process.

b) If problems are still being encountered during this acceptance period, or for any reason, the County isn't satisfied with the performance of the Contractor, software or equipment,

all products will be removed from the site and any service fees or installation costs paid to the Contractor will be reimbursed to the County.

c) As noted above, failure by the Contractor to provide a system that performs as stated in their RFP response shall result in rejection by the County. If Bidder has any exceptions to this clause, they must be stated clearly in the response.

6) SOFTWARE/HARDWARE FIXES, UPGRADES & FUTURE SOTWARE OPTIONS:

a) For a period of not less than twelve (12) months, after the County's acceptance of any software or hardware used in this proposal, the Respondent shall correct any and all errors in the software regardless of whether the error is brought to the attention of the Respondent by another user of the software by the County, or by any other person. This shall be considered the minimum warranty period.

b) Upgrades/Enhancements
For a period of not less than twelve (12) months after the project completion and the County's acceptance of any software used in this proposal, the Respondent shall provide to the County, at no additional cost, any changed or enhanced versions of the software within thirty days after the changed or enhanced versions are made available to customers.

c) Future Software Options and Replacement Software
The Respondent shall make available after the acceptance date of any software licensing that the County has initially paid, the opportunity for the County to acquire any future software or replacement software within the following options:

- At the lesser of the Respondent published purchase price for the software license options or replacement software, or
- The difference between the Respondent's published purchase price for the replacement software or software options and the current or most recent purchaser license fee for the software or software options previously acquired by the County under this Agreement.

This provision shall remain in effect for the duration of the lifetime of the software.
The respondent also will register all software used in this implementation to Yolo County

d) All software system licensing & maintenance support shall be billed on a yearly basis.

7) AWARDED CONTRACTOR REQUIREMENT:
The successful Awarded contractor(s) must supply all insurance requirements as required in the sample County contract Attachment "1," which includes the Yolo County Insurance Requirements in Section XI of the sample contract, as well as a performance bond and a payment bond in the forms attached hereto as Attachment "2" for 100% of the project construction costs.

D. CONTRACT TERM: Contractor(s) agrees to provide services as specified in the RFP document for an initial one (1) year term with the option of renewing for up to four (4) additional one year terms based upon mutual agreement for a maximum contract term of five (5) years.

E. PROPOSAL DEADLINE
Proposals shall be submitted no later than the Proposal Deadline time and date detailed in the Section II, RFP Schedule of Events. Proposers shall respond to the written RFP and any exhibits, attachments, or amendments. A Proposer's failure to submit a proposal as required before the deadline shall cause the proposal to be disqualified. Late proposals shall not be accepted nor shall additional time be granted to any potential Proposer.

F. SUBMITTING PROPOSALS

The required method of submitting your proposal is electronically through BidSync.

It is the sole responsibility of the proposer to ensure their proposal reaches BidSync, LLC before the closing date and time. If you have any questions regarding the submittal of this proposal, please contact BidSync at 1(800) 990-9339, for vendor support.

Late proposals shall not be accepted nor shall additional time be granted to any potential Bidder/Offerer.

G. ADDENDA

Any additional information not included in this solicitation which the County finds necessary and material to responding to the RFP will be posted as an addendum on BidSync. Answers to questions submitted through BidSync shall be considered addenda to the solicitation documents.

Exhibit B- Proposal Excerpt

METHANE CAPTURE & EMISSION REDUCTION

Exhibit "A"
Proposal Transmittal Letter

Monitoring and Measuring Methane & other Gases

---

a) Name and address of Proposer/Contractor.

LoCI Controls, Inc
14 Kendrick Road, Suite 2
Wareham MA, 02571
(617) 575-2716

b) A statement that the proposal is in response to this Request for Proposal (RFP).

This proposal from LoCI Controls, Inc. is in response to Yolo County Solicitation GSDRFPKK2207, Monitoring and Measuring Methane and other Gases

c) Affirm that the Proposer meets the minimum qualifications stated in this RFP and understands the work to be done. Provide a statement demonstrating your firm or team's ability to accomplish the scope of services in a comprehensive and thorough manner to meet the needs of the County.

LoCI Controls meets the minimum qualifications stated in this RFP and understands the work to be done. Founded in 2013 by two graduates of Massachusetts Institute of Technology, Loci Controls has developed automated landfill gas collection control technology that increases landfill gas collection and reduces harmful CO_2 and methane emissions from landfills. Loci Controls' automated landfill gas collection control system uses solar-powered measurement sensors mounted directly on each collection well at a landfill and uses cloud-based algorithms and analytics to make frequent, small flow adjustments to each collection well to optimize the gas collection process. Based on an independent, peer-reviewed study, Loci Controls' automated landfill gas collection system resulted in a 13% – 24% increase in landfill gas captured (and, correspondingly, emissions reduced) compared to industry standard manual well-field tuning. Through their technology and process, and as verified by independent lifecycle analysis, Loci has demonstrated the capture and utilization of carbon oxides to generate electricity from landfill gas reduces carbon oxide emissions by on an average 50,000 metric tons per year at a single project.

d) State the names of the persons who will be authorized to make representations for the Proposer, their job titles, addresses, telephone numbers and e-mail addresses.

METHANE CAPTURE &
EMISSION REDUCTION

Exhibit B – Proposal Questionnaire

Monitoring and Measuring Methane & other Gases

INSTRUCTIONS:

- The Evaluation Criteria specified below will be used to score proposals as stated in the RFP **Section III., Paragraph Q.** Award of Proposal.
- Proposers shall provide the information requested in the Evaluation Criteria specified below, in the order given.

I. General Company Information

A. Company Overview—provide an introduction and general description of Proposer's background, nature of business activities and experience in providing the services requested by this RFP. If Proposer is the subsidiary of a larger corporation, describe the relationship and also the extent to which your parent corporation is financially obligated to uphold the commitments made by Proposer.

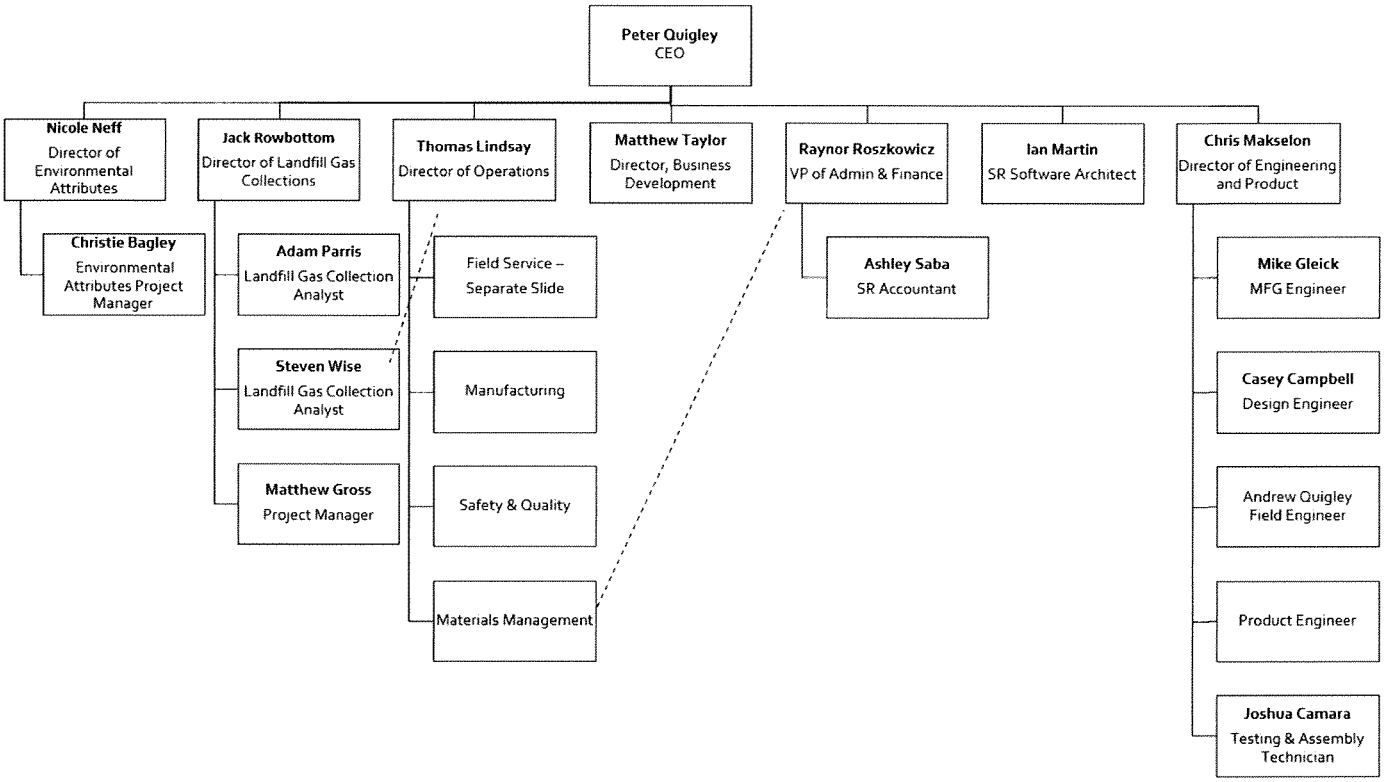
LoCI is a real time data and control platform company that uses a patented technology to increase methane capture and reduce emissions from landfills.

Founded in 2013 by MIT graduates, the Company's patented technology combines on-site measurement system with cloud-based software, data management and automation, and field as well as remote operating support. The result is improved methane capture and emission reduction from landfills for our gas collection system operators who convert methane to Renewable Natural Gas or Renewable Electricity. More methane captured means increased revenue and financial returns for both landfills and the downstream RNG or Electricity producers who use landfill gas as a feedstock.

LoCI is led by Peter Quigley, CEO & Chairman, a seasoned leader in disruptive energy technologies. The Company's proprietary platform leverages algorithms and automation to optimize the gas collection process based on real-time data and is also supported by a team of analysts who operate remotely, monitor measurements, and respond in real-time to atmospheric or changing gas collection system conditions.

LoCI is the lowest cost, no land-use, high-impact solution to slow the rate of global warming and generate environmental attributes across the methane reduction ecosystem.

B. Describe your agency's background and depth of ability to ensure services are provided, including:
   1. The total number of employees.
      41 Employees



LOCI CORPROATE OFFICE

Jack Rowbottom – Director of landfill gas collection

3. List all applicable licenses, certifications, and expiration dates including DIR Registration#

   No applicable licenses. NO DIR # - LoCI can apply if needed

II. Experience & Qualifications

A. Vendor Minimum Requirements

Provide documentation regarding how you meet the following minimum requirements:

1. **Vendor shall have three years' experience with installation of monitoring equipment and controls related to the monitoring and measuring of methane and other greenhouse gases.**

   LoCI Controls was founded in 2013 by MIT graduates, LoCI Controls is the first company to provide automated landfill gas collection. LoCI utilizes patented and patent pending technology and control algorithms to monitor and control the landfill gas -collection process. Through continuous monitoring and control of the landfill gas-collection system, LoCI increases gas-collection system efficiency. LoCI increases methane collection, gas quality, and profits for landfill gas-to-energy project operators. Through the use of wellhead monitoring and automated control, both plant and employee productivity are also improved, and there is a significant reduction in man-hours spent manually tuning wells in vast wellfields. LoCI's products and services are proven to improve gas-collection efficiency while reducing fugitive emissions and odors emanating from landfills.

2. **Vendor shall have three years' experience with the monitoring & measuring of methane and other greenhouse gases.**

   LoCI has more than five years of experience operating on a commercial basis real time data and automated landfill gas control systems at landfills in the United States. LoCi's automated landfill gas collection equipment is currently operating at over 30 landfills as of December, 2022, with just under 2,000 collection points at these landfills with LoCI Controller or Sentry hardware units installed and operating. LoCI has published three joint industry papers with Energy Power Partners McCommas Bluff RNG project, who has used LoCI's real time data and automated control system since 2017 (with over 225 collection points with LoCI Controllers), Enerdyne Power System, Lawrence, KS RNG project in July 2018 – with over 200 Controllers installed currently, along with Aria RNG project at OK City which operated between 2018 and Aria's sale to Archaea Energy, in 2021.

   LoCI is currently provided real time data and control systems at 17 landfill RNG projects, and three landfill gas to electricity projects. Two of the landfill gas to electricity projects have validated/verified carbon credit projects per the American Carbon Registry voluntary carbon credit standard, and one of these projects will be the first project where Federal 45Q tax credits for carbon capture and utilization will be filed – South Wake County landfill, North Carolina.

   Energy Power Partners – www.energypowerpartners.com
   McCommas Bluff Landfill – Dallas, TX
   Project Start – July 2017
   Current Configuration – 225 Controllers, 20 Sentries
   Video – DCEMB Case Study https://youtu.be/33_WcvJxidY

Enerdyne Power Systems Inc. – http://landfillgroup.com/enerdyne/

Aria, OK City Project – www.locicontrols.com

3. **Vendor shall have completed at least one project of the size and scope of this proposal in the last two years.**

   As noted above, LoCI's South Wake County Project which started in January, 2022 will be the first project to generate 45Q tax credits. Landfill gas collection at this project is over 2,600 scfm, with a on-site electricity generating facility owned/operated by Ingenco, with an installation of LoCi's real time data and control system on all collection wells, aggregate header monitoring, and also includes 29 real time liquid level measurement systems on collection wells with pumps.

   As outlined above, LoCI has extensive operating experience on a commercial basis on landfill renewable natural gas projects, of similar and larger scale to the Yolo County landfill gas collection system.

III. Capabilities and Skill

Vendor shall:

1. **Provide information showing they possess the knowledge, understanding and specialized experience required in methods, techniques, technology, and guidelines required for the performance of the required work in this RFP.**

   LoCI is the market leader in the development, and commercialization of real time data and automated control technology to improve landfill gas collection operations, and to minimize emissions. LoCI's data, hardware, automation platform is the subject of nineteen issued US Patents, and additional US and foreign patents are pending.

   LoCI has also been the market leader in leveraging public policy opportunities to add value to landfills that use real time data and control technology. LoCI worked with the American Carbon Registry to create a peer reviewed carbon credit standard that could generate emission reduction voluntary carbon credits at NSPS regulated landfills. In addition, LoCI has been a leading advocate with the US Government – Treasury, IRS, DOE and EPA, involving the application of the 2018 tax credit, 45Q – Carbon Capture, Sequester, Storage and Utilization – by submitting public comment during the rule making process in both 2019 and 2020, as well as giving public oral testimony to the US Treasury Department during rule making process in September 2020. With the recent passage, August 2022, of the Inflation Reduction Act, LoCI has continued this leading advocacy position with further submission of public comment in response to the IRS and US

Treasury department request for public comment on 45Q law based on modifications made in the Inflation Reduction Act.

The LoCI - South Wake County - Ingenco landfill gas to electricity project, which commenced in January, 2022, will be the first 45Q project in the landfill gas to energy industry to be filed under the 2018 law.

2. **Provide a summary of relevant background information to demonstrate the vendor, employees and subconsultants/subcontractors have the capacity and capability to perform the work required in this RFP. Include resumes of key personnel and subconsultants who will be working on this project.**

   As outlined above, LoCI's real time data and control system has been operating for up to five years, and today is on more than thirty landfills in the US, with approximately 20% of all of the operational landfill gas to renewable natural gas projects in the US utilizing LoCI's real time data and automated control system to optimize gas collection operations.

3. **Provide information demonstrating comprehensive knowledge and experience of relevant emission and environmental laws and regulations, and experience with implementation of projects related to such laws and regulations.**

   As noted above, LoCI worked with the oldest voluntary carbon registry in the United States, the American Carbon Registry, to develop a new standard that allows landfills which use LoCI's real time data and automated control system to generate carbon credits for incremental improvement in methane capture, and emission reduction, compared to historical manual well field tuning performance at landfills.

   https://americancarbonregistry.org/carbon-accounting/standards-methodologies/landfill-gas-destruction-and-beneficial-use-projects

   In addition, LoCI has been in discussions with the California Air Resource Board, and has submitted public comment on the ongoing LCFS rule making process, to advocate methane emission reduction recognition under the Low Carbon Fuel Standard program, to allow landfills which use a real time data and control system and which increase methane capture, and reduce emissions – to generate methane emission credit (-500 carbon intensity) – which we are optimistic could be incorporated in CARB LCFS regulations in the future.

   On most significant for this proposal, the public record supports that no company has advocated more consistently and forcefully for the application of the 2018 45Q tax credit to the landfill gas

to energy sector. As noted above, the LoCI, Wake County, Ingenco project will be the first project in the landfill gas to energy sector, to file a 45Q tax credit for 2022 results at this project.

IV. Proposer's Understanding of Project & Location:

Vendor shall:

1. Provide a summary of your understanding of your responsibilities should you be awarded this contract.

   This should include the following:

   a) Describe in detail what changes will be made to the existing gas well-heads. Normal and mandatory adjustment of well-heads will continue and any equipment or changes to the well-heads shall not interfere with third-party reporting.

   b) Regarding valves & controls, vendor shall remotely and automatically make adjustments to the applied pressure at each landfill gas well to optimize gas quality and flow and maximize methane collection. Vendor shall explain how their system performs this function and provide a sample of the reports that can be generated.

LoCI – Controller

The LoCI Controller is a core component of LoCI's well-mounted landfill gas collection system, increasing gas collection system efficiency, improving productivity, and reducing environmental, health, and safety risks. The LoCI Controller is recommended for all active collection wells in the landfill gas collection system.

Features

- Measures landfill gas composition (methane, oxygen, carbon-dioxide, calculated balance gas), landfill gas temperature and ambient temperature and barometric pressure
- Measures flow at each collection well using patented Venturi Flo-Wing to reliably measure flow
- Pressure applied to the collection well, as well as system or available vacuum (pressure above or below the LoCI actuated valve).
- Actuated ball valves available in 2", 3" or 4" sizes
- Data displayed in real-time on the WellWatcher® user interface
- Automated, precision-controlled ball valve that regulates flow at each well
- Automated control based on LoCI's control algorithms or landfill collection system operators' collection system set points, or via "remote manual" valve adjustments.

METHANE CAPTURE &
EMISSION REDUCTION

LoCI – Sentry

Used in conjunction with LoCI's Controller, the Sentry monitors gas composition at headers or at the inlet to the plant, to provide aggregate or sectional data for wellfield oversight. Where a flow meter is installed in a header, or at the aggregate gas collection point, the data from the flow meter can be integrated into the Sentry system. Installation of the LoCI Sentry is recommended to integrate plant-level aggregate gas quality into the LoCI Control system and also Sentry's should be used at gas collection system header lines to provide wellfield sectional analysis to help diagnose sub-surface or air intrusion from a section of the collection system.

Features

- Measures landfill gas composition in header ((methane, oxygen, carbon-dioxide, calculated balance gas))
- Input of external thermister for header or aggregate landfill gas temperature, or input of external flow meter data.
- Data displayed in real-time on the WellWatcher® user interface

LoCI – Liquid Level Measurement

Liquid levels inside individual collection wells in a landfill gas collection system can significantly impact overall gas collection system efficiency. Proper control and measurement of liquid levels ensures that a sufficient length of perforated wellbore is exposed, ensuring effective gas collection.

LoCI Controls can integrate liquid level measurement into the LoCI Automated Landfill Gas Collection System and WellWatcher® user interface to improve landfill gas operations, reduce field response times, and ensure more efficient downhole pump maintenance.

Features

- Air-tight measurement system that measures liquid levels inside wellbore within +/- 1 ft. accuracy
- Electronic alerts (texts or e-mails) to notify on-site personnel when liquid levels exceed thresholds
- Standard well caps can be used with LoCI's liquid level measurement system

WellWatcher®

At the heart of the LoCI system is the WellWatcher® analytics and control platform. It is cloud-connected data and control technology that provides landfill gas collection system operators 24/7/365 real-time visibility into the entire wellfield, increasing methane collection system efficiency, improving productivity, and reducing harmful emissions.

LOCI CORPROATE OFFICE
14 Kendrick Road, Suite 2
Wareham, MA 02571

sales@locicontrols.com | 617-575-2716 | www.locicontrols.com | patents: www.locicontrols.com/patents.php

Features

- Cloud-based user interface and data analytics platform providing landfill gas collection visibility, improved safety, boosted performance, and streamlined operations
- Graphical user interface allows real-time wellfield accessibility 24/7/365 via desktop, laptop, or tablet
- Map view or table view with exportable data for both individual wells and aggregate wellfield data
- Operator configured automation and alert thresholds, on a system basis as well as on an individual collection well basis.
- Monthly gas collection system reporting.
- All landfill gas collection system data is secured using TLS encryption and certificate-based host authentication; servers are hosted at Amazon Web Services (AWS), an ISO-27001-certified cloud provider

c) **Be able to demonstrate improvements in the quantity and quality of landfill gas collected from the wellfield as a result of the installation of the equipment. Provide information on how vendor is able to do this with their system.**

LoCI will prepare quarterly reports on the gas collection operations, using the methodology established pursuant to the peer reviewed American Carbon Registry, to calculate the incremental methane captured, and decrease in emissions, resulting from leveraging real time data and automated control technology to enhance gas collection system operations at Yolo County. It would also be expected that aggregate gas collection and MMBTU flow to the Yolo County electricity generating facility will reflect an increase in methane capture, and resulting emission reduction through leveraging of real time data and control technology to support Yolo County operations.

d) **Provide knowledge of and any experience filing for the 45Q tax credit.**

The IRS did not finalize rules for 45Q tax credits pursuant to the 2018 law until January 2021, and immediately upon the transition to the Biden Administration, it was made clear in public statements that a top environmental priority of the Biden Administration was to change 45Q to increase the incentives, and accelerate the impact of emission reduction which is the goal of the tax credit. Throughout 2021 there were very public announcements about these planned policy changes, and it wasn't until late 2021 that finally the opposition by US Senator Joe Manchin to the "Build Back Better" law prevented changes to 45Q. LoCI held off starting our first 45Q project while these very public deliberations were ongoing, and decided to launch our first 45Q project which started operation in January, 2022 at Wake County North Carolina, to ensure that we were in a position to file a 45Q tax credit for 2022 results. Since 45Q is a tax credit, the filing of tax

returns is only done once per year, so the Wake County project will be the first 45Q landfill gas to electricity tax credit filed under the 2018.
In August, 2022 the Inflation Reduction Act (IRA) included changes to 45Q that had been discussed previously, and any project, including Yolo County project if LoCI is successful with this response to request for proposal, will have the benefit of enhancements made to the 45Q tax credit program and passed into law per the IRA.

e) **Provide information on how their system monitors and verifies of the total carbon reduction in order to file for the 45Q tax credit**

The 45Q tax credit is a credit to stimulate investment to improve the gas capture system at an industrial facility which captures at least 12,500 metric tons per year of Carbon di-oxide. The credit in the case of 45Q applied to LoCi – Yolo County landfill gas to electricity project, would be equal in a tons per year, the total amount of CO2 which is collected by the landfill gas collection system with the new real time data and control system, which is used as integral component part of landfill gas – to generate electricity. It is necessary to measure the CO2 concentration, and flow of aggregate gas collected that is used in the electricity production process., as well as reporting on the amount of electricity produced from the landfill gas.

f) **Provide rational for percentage of revenue sharing from tax credit based on recovery of capital cost and the annual operation and maintenance costs for Pricing A, Pricing B and/or Pricing C scenarios.**

LoCI has pioneered the qualification of landfill gas to electricity, and real time data and automated controls – and has incurred exclusively at our expense both the development of LoCI's patented system, as well as the "pathway" to create 45Q tax credits through the use of LoCI system at landfills.

Two cost proposals are provided in response to this RFP:

Scenario A where Yolo County purchases the equipment and LoCI provides support both on location, and remote, and would result one time expense for Yolo County to purchase LoCI hardware platform of $1,552,600, and on an annual operating expense and software license to operate LoCI's real time data and automated control system for $367,600 per year. Based on a projected capture and use of CO2 with the LoCI system, of approximately 16,000 Metric Tons per year pursuant to 45Q tax credit, this would generate just under $1M per year of 45Q tax credit, of which 50% would be to the benefit of Yolo County. In addition, through the use of LoCI's real time data and automated control system, it is expected that methane and CO2 capture will increase by 10% - 20% as compared to gas collection with manual wellfield tuning operations –

which should result in incremental electricity produced from the Yolo County landfill gas to electricity plant.

Scenario B – LoCI would provide a software license, the real time data and control system hardware, as well as both on site as well as remote support for Yolo County's gas collection system operations, would cost Yolo County $0 annually, and would generated approximately $200,000 45Q tax credits annually during the term of this project.

V. Proposer's Approach to Project & Project Schedule:

Vendor shall:

1. **Provide a detailed plan for changes to the present system. This implementation plan must include all work scope required by the County.**

   LoCI Controller is mounted downstream of the manual valve on Yolo County wellheads, on the vacuum riser, and minimum if any modification to the Yolo County infrastructure is required – repairs of ageing kanaflex hoses, or wellhead caps/seals are often recommended at time of LoCI system installation to ensure overall gas collection system is in good working order, and to minimize leaks/air intrusion. Individual Controller installations normally require one man hour per unit, and can be removed and system restored to condition before LoCI system installation in less than one man hour per unit.

   Sentry devices are header monitoring devices, and depending on header locations – if bured or above ground – and if there are any sample ports, little or no modification to headers are required for Sentry monitoring equipment installation.

2. **Provide a detailed explanation of the vendor's approach to this implementation.**

   LoCI's field service organization will conduct an installation survey, and have a follow up planning discussion with Yolo County personnel to agree upon installation plan, timing, schedule, and responsibilities. Ordinarily, a pre install survey would be conducted within two weeks of having signed agreements to move forward, and installation could be scheduled by mutual agreement after installation planning review meeting.

   After LoCI system is installed, for one to two weeks LoCI's Controllers would have the valve 100% opened and the manual valve would continue to control vacuum applied to the collectors. This time period is to troubleshoot the installation, and LoCi equipment, and begin to characterize the individual gas collection wells performance and behavior. In consultation with Yolo County operations – a transition to LoCI control would be agreed, and would normally occur in phases over the course of one week, say with 20% of the collectors being transitioned to LoCI system control – by

slowing opening the manual valve, while close the LoCI valve, until the applied vacuum after transition to LoCi control, matches the applied vacuum immediately before transition.

Transition to LoCI system control would be expected within 2 – 3 weeks from installation.

3. **Provide an estimated implementation plan with various milestones for both the software and equipment hardware.**

   Upon transition, Yolo County personnel would be given access to LoCI WellWatcher User Interface and operating platform, and working in coordination with LoCI analyst supporting Yolo County gas collection operations, individual gas collection well automation and alerting set points will be discussed and agreed, and implemented.

4. **Provide the personnel available on a daily basis and on an emergency basis if the system fails.**

   To support this project, and Yolo County's gas collection operations, LoCI will employ a full time field service representative who will be available on daily basis to support this project. The manual valve will remain as is and can always be adjusted on an emergency basis by Yolo County on site personnel – and in addition to LoCI field service representative dedicated to this project, LoCI will designate a lead analyst who will be providing remote support for the operation of LoCI's system and to ensure that the use of our real time data and control system provides value for Yolo County. LoCI has an analyst on call and reachable by phone 24/7/365 for emergency support as needed.

5. **Discuss how involved County staff will need to be in the installation of the system. Include how many staff members will be needed and how many estimated hours the County personnel will be devoted to the implementation.**

   There would be very little if any county staff needed to support the installation of LoCI system, other than if issues with the collection system were identified by LoCI field service personnel while in the process of installing LoCi Controllers or Sentry hardware.

   LoCI's analyst and field service representative would work closely with Yolo County gas collection operating team to work collaboratively to ensure the gas collection system is operated in accord with Yolo County's objectives. LoCI system generates a daily site status report, to identify collectors on a daily basis that warrant priority follow up – and generally a brief meeting is held daily with LoCI on site and remote personnel who would be involved with this project to discuss priorities and follow up action. Any Yolo County personnel could participate if they chose in this daily site review – normally 15 min – 30 min per day. We would also recommend higher level review of performance, concerns, and opportunities to improve collection on a weekly basis to start – ½ - 1 hr meeting weekly.

VI. Cost Proposal

When preparing cost worksheet, Contractor shall submit pricing as follows:

The Cost Proposal must be recorded on the forms, included as Exhibit C-1, C-2 and C-3 to this RFP, or an exact duplicate thereof. The Cost Proposal shall specifically record the exact cost amounts proposed. Said proposed cost shall incorporate all cost for the proposed scope of services for the total contract period. The Cost Proposal shall record only the proposed cost as required, and shall not record any other rates, amounts, or information. It shall not record any text that could be construed as a qualification of the cost amounts proposed. If the Proposer fails to specify the Cost Proposal as required, the County may determine the proposal to be nonresponsive and reject it.

(The cost proposal must be uploaded as a separate document from the rest of the proposal.)

VII. Responsiveness/Responsibility

1. Have you ever defaulted on a contract? If yes, where and why? - No
2. Has your firm ever been suspended or debarred by any government agency? If yes, please explain. - No
3. In the past five (5) years has any claim against your company concerning your company's work on a project been filed in court or arbitration? - No
4. Describe the process by which your firm resolves problems with clients.

   LoCI's system must deliver value to our customers if we are going to continue to provide our service or support for our customer's operations. If our customer is not satisfied with our performance, it is encumbant upon LoCI to resolve issue to the satisfaction of our customer – or we do not believe we will continue to provide our products and services in the future. If problems can not be resolved with personnel on site, meetings and or discussions with management would be expected to clearly identify the root cause of the conflict, and to find solutions. LoCI's business model depends on ongoing service and support so we fully recognize that if our customer, Yolo County is not satisfied with our performance, that it is our responsibility to make sure we take effective correction action.

5. Provide a statement of conflict you, your firm, and/or other key staff may have regarding these services. The statement should not only include actual conflicts, but also any working relationships that may be perceived by disinterested parties as a conflict. If no potential conflicts of interest are identified, so state in your proposal. There are no conflict of interests which we have had or anticipate associated with LoCI's services pursuant to this proposal.

VIII. Past Performance/References

Using Exhibit D-Previous Customer Reference Form, length may exceed one (1) page, provide Previous Customer References with a list of contacts (including names, phone numbers, e-mails and date of original contracts) for whom you have performed comparable emission-collection projects, preferably during the past five (5) years. Preference for California state or local government agencies or within the greater Sacramento area. Using Yolo County or its employees as references is not recommended. If possible, references should be from the projects listed above.

RFP Coordinator will conduct reference checks using the information provided on the Customer Reference Form.

METHANE CAPTURE &
EMISSION REDUCTION

Monitoring and Measuring Methane & other Gases RFP
COST PROPOSAL FORM-EXHIBIT C-3

	Proposal Scenario C
Item#	**Description of Services**
	TOTAL COST - $0 – LoCI will provide LoCI real time data and automated control system, and necessary remote and on-site labor to support the gas collection operations – and be responsible for all cost for preparing 45Q tax credit filing. A license to use LoCI WellWatcher UI/software also is included in this $0 cost Scenario C proposal.
1	Revenue Share (Percentage to County for tax credit) All software, equipment & maintenance would be provided at no cost to the County) – 20% share of 45Q tax credits for Yolo County.
Amount	

The Cost Proposal must be recorded on the forms, included as Exhibit C-1, C-2 and C-3 to this RFP, or an exact duplicate thereof. The Cost Proposal shall specifically record the exact cost amounts proposed. Said proposed cost shall incorporate all cost for the proposed scope of services for the total contract period. The Cost Proposal shall record only the proposed cost as required, and shall not record any other rates, amounts, or information. It shall not record any text that could be construed as a qualification of the cost amounts proposed. If the Proposer fails to specify the Cost Proposal as required, the County may determine the proposal to be nonresponsive and reject it.

Exhibit C
WORKERS' COMPENSATION CERTIFICATE

I am aware of the provisions of Section 3700 of the Labor Code that require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing any services required by this Agreement.

The person executing this certificate on behalf of Contractor affirmatively represents that she has the requisite legal authority to do so on behalf of Contractor, both the person executing this Agreement on behalf of Contractor and Contractor understand that the County is relying on this representation in entering into this Agreement.

Exhibit F

Requirements Applicable to the System Installation and Operation

Section F.1 Prohibition Against Use of Tobacco. All properties and facilities owned, leased or operated by the County are tobacco-free workplaces. No person on, at or in any County-controlled property or facility, including, without limitation, the Landfill Premises, may smoke, chew or otherwise use tobacco products. Contractor shall be responsible for: (i) informing any and all persons present on or at the Landfill Premises on account of the Installation Work about the County's tobacco-free policy; and (ii) strictly enforcing such policy with respect to the Landfill Premises. The Contractor and each of its subcontractors shall require that any person present on or at the Landfill Premises on account of the Installation Work who violates such policy must permanently leave the Landfill Premises and shall prohibit such person from thereafter being present or performing any of the Installation Work on or at the Landfill Premises.

Section F.2 Prohibition Against Use of Drugs.

(a) County Drug-Free Policy. All properties and facilities owned, leased or operated by the County are drug-free workplaces. No person on, at or in any County-controlled property or facility, including, without limitation, the Landfill Premises, may: (i) engage in the unlawful manufacture, dispensation, possession, or use, including being under the influence, of any controlled substance, (ii) possess or use any alcoholic beverage, or (iii) use any substance which may cause significant impairment of normal abilities. Contractor shall be responsible for: (i) informing any and all persons present on or at the Landfill Premises on account of the Installation Work about the County's drug-free policy; and (ii) strictly enforcing such policy with respect to the Landfill Premises. The Contractor and each of its subcontractors shall require that any person present on or at the Landfill Premises on account of the Installation Work who violates such policy must permanently leave the Landfill Premises and shall prohibit such person from thereafter being present or performing any of the Installation Work on or at the Landfill Premises.

(b) Drug-Free Workplace Certification. Contractor is hereby made subject to the requirements of Government Code Sections 8350 et seq., the Drug-Free Workplace Act of 1990.

Section F.3 Compliance with Labor Requirements. The Installation Work is a "public works" project as defined in Section 1720 of the California Labor Code ("Labor Code") and made applicable pursuant to Section 1720.6 of the Labor Code. Therefore, the Installation Work is subject to applicable provisions of Part 7, Chapter 1, of the Labor Code and Title 8 of the California Code of Regulations, Section 16000 et seq. (collectively, "Labor Law"). Contractor acknowledges that, as provided by Senate Bill 854 (Stats. 2014, Ch. 28), the Project is subject to labor compliance monitoring and enforcement by the California Department of Industrial Relations ("DIR").

Section F.4 Compliance with Labor Code Requirements. Contractor must be, and shall be deemed and construed to be, aware of and understand the requirements of the Labor Law that require the payment of prevailing wage rates and the performance of other requirements on public works projects. Contractor, at no additional cost to the County, must: (i) comply with any and all applicable Labor Law requirements, including, without limitation, requirements for payment of prevailing wage rates, inspection and submittal (electronically, as required) of payroll records, interview(s) of workers, et cetera; (ii) ensure that its Subcontractors are aware of and comply with the Labor Law requirements; (iii) in connection with Labor Law compliance matters, cooperate with the DIR, the County and other entities with competent jurisdiction; and (iv) post all job-site notices required by law in connection with the Installation Work, including, without limitation, postings required by DIR regulations. A Subcontractor that has been debarred in accordance with the Labor Code, including, without limitation, pursuant to Sections 1777.1 or 1777.7, is not eligible to bid on, perform, or contract to perform any portion of the Installation Work. Wage rates for the Installation Work shall be in accordance with the general prevailing rates of per-diem wages determined by the Director of Industrial Relations pursuant to Labor Code Section 1770. The following Labor Code sections are by this reference incorporated into and are a fully operative part of the Contract, and Contractor shall be responsible for compliance therewith:

(a) Section 1735: Anti-Discrimination Requirements;

(b) Section 1775: Penalty for Prevailing Wage Rate Violations;

(c) Section 1776: Payroll Records;

(d) Sections 1777.5,1777.6 and 1777.7: Apprenticeship Requirements;

(e) Sections 1810 through 1812: Working Hour Restrictions;

(f) Sections 1813 and 1814: Penalty for Failure to Pay Overtime; and

(g) Section 1815: Overtime Pay.

Section F.5 Requirements for Payroll Records. Contractor must comply with all applicable provisions of Labor Code Sections 1776 and 1812, which relate to preparing and maintaining accurate payroll records, and making such payroll records available for review and copying by the County, the DIR Division of Labor Standards Enforcement, and the DIR Division of Apprenticeship Standards. The payroll records must be certified and made available as required by Labor Code Section 1776.

Section F.6 Contractor Registration. On and after March 1, 2015, no contractor may bid on a public works project unless the contractor is, and no subcontractor may be listed in any bid for a public works project unless the subcontractor is, currently registered with the DIR and qualified to perform public work pursuant to Labor Code Section 1725.5. On and after April 1, 2015, no contractor or subcontractor may be awarded a contract for work on a public works

project, or may perform any work on a public works project, unless the contractor or subcontractor is currently registered with the DIR and qualified to perform public work pursuant to Labor Code Section 1725.5. It is not a violation of Labor Code Section 1725.5 for an unregistered contractor to submit a bid authorized by Business and Professions Code Section 7029.1 or Public Contract Code Section 20103.5, if the contractor is registered at the time the contract is awarded.

Section F.7 Failure to Comply with Applicable Prevailing Wage Requirements. Any stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's completion of the Installation Work, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay and shall not be compensable by County. Contractor shall defend, indemnify and hold the County, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Contractor or any of its subcontractors.

Section F.8 Permits and Licenses. Contractor, its subcontractors, and all of their respective employees and agents: (i) shall secure and maintain in force at all times during installation, operation and maintenance of the System such licenses and permits as are required by law; and (ii) shall comply with all federal and State, and County laws and regulations, and other governmental requirements applicable to the System as provide in Section XII of the Agreement. Contractor or its subcontractors shall obtain and pay for all permits and licenses required for the performance of, or necessary in connection with, the installation, operation and maintenance of the System, shall give all necessary notices and deliver all necessary certificates to the County, and shall pay all license fees arising from the use of any material, machine, method or process used in installing, operating and maintaining the System. Contractor shall be solely responsible for all charges, assessments and fees payable in connection with any such licenses, permits, materials, machines, methods, and processes.

Section F.9 Installation Work; County Option to Review. Contractor shall provide County with an opportunity to review all construction plans and designs, including engineering evaluations of the impact of the System prior to Contractor commencing installation. Contractor shall provide the County with at least 30 days' notice prior to commencement of System installation so County has a reasonable opportunity to review the construction plans and designs. Contractor shall perform the System installation work at the Landfill Wellfield between the hours of 7:00 a.m. and 7:00 p.m. in a manner that minimizes inconvenience to and interference with the use of the Premises to the extent commercially practical.

Section F.10 System Testing. Contractor shall conduct testing of the System in accordance with such methods, acts, guidelines, standards and criteria reasonably accepted or followed by providers of similar systems in the United States. Contractor shall provide the County with reasonable advanced notice of such testing and shall permit the County or the County's representative to observe such testing. The County's observation of such testing shall not be

construed as or deemed an approval of such testing or test results.

Section F.11 Contractor's Covenants. Contractor covenants and agrees to the following:

(a) Notice of Damage or Emergency. Contractor shall: (i) promptly notify the County if it becomes aware of any damage to or loss of the use of the System or that could reasonably be expected to adversely affect the System, (ii) immediately notify the County if it becomes aware of any event or circumstance relating to the System, the Landfill Wellfield or the Premises that poses a significant risk to human health, the environment, the System the Landfill Wellfield or the Premises. In the event of damage to the Landfill Wellfield or the Premises caused by, or as the result of, the System, Contractor shall, at its sole cost, repair said Landfill Wellfield or the Premises to the condition existing prior to such damage.

(b) Liens. Contractor shall not directly or indirectly cause, create, incur, assume or suffer to exist any mortgage, pledge, lien (including mechanics', labor or materialman's lien), charge, security interest, encumbrance or claim of any nature ("Liens") on or with respect to the Premises or any interest therein, in each case to the extent such Lien arises from or is related to Contractor's performance or non-performance of its obligations hereunder. If Contractor breaches its obligations under this Section, it shall (i) immediately notify the County in writing, (ii) promptly cause such Lien to be discharged and released of record without cost to the County, and (iii) defend and indemnify County against all costs and expenses (including reasonable attorneys' fees and court costs at trial and on appeal) incurred in discharging and releasing such Lien.

(c) System Condition. Contractor shall take all actions reasonably necessary, including but not limited to repair and maintenance, to ensure that the System is capable of operating at a commercially reasonable continuous rate throughout the Term.

(d) Capture Data. Contractor shall provide the County with access to System gas capture data in electronic format, such as tabular Excel or csv with each production unit in a separate cell, or in another format reasonably requested by the County. Capture data could be delivered monthly or by granting the County access to a web portal.

Section F.12 The County's Covenants. The County covenants and agrees as follows:

(a) Notice of Damage or Emergency. The County shall: (i) promptly notify Contractor if it becomes aware of any damage to or loss of the use of the System or that could reasonably be expected to adversely affect the System, (ii) immediately notify Contractor it becomes aware of any event or circumstance that poses an imminent risk to human health, the environment, the System or the Premises. In the event of damage to the County's premises caused by, or as the result of, the System, however, Contractor shall, at its sole cost, repair said Premises to the condition existing prior to such damage.

(b) Liens. The County shall not directly or indirectly cause, create, incur, assume or suffer to exist any Liens on or with respect to the System or any interest therein. If the County

breaches its obligations under this Section, it shall immediately notify Provider in writing, shall promptly cause such Lien to be discharged and released of record without cost to Provider, and shall indemnify Provider against all costs and expenses (including reasonable attorneys' fees and court costs at trial and on appeal) incurred in discharging and releasing such Lien.

(c) Consents and Approvals. To the extent that only the County is authorized to request, obtain or issue any necessary approvals, Governmental approvals, rebates or other financial incentives, the County shall cooperate with Contractor to obtain or issue such approvals, governmental approvals, rebates or other financial incentives in the name of Contractor.

Section F.13. Removal of the System. Upon the expiration or termination of the Agreement, Contractor shall remove the System remove all of its tangible property comprising the System from the Landfill Wellfield and the Premises on a mutually convenient date but in no case later than ninety (90) days after the expiration or termination of this Agreement. The Premises shall be returned to its original condition, except for ordinary wear and tear. Contractor's removal of the System shall not affect the integrity of the County's wellheads, which shall be restored to the condition as existed prior to installation of the System (other than ordinary wear and tear). Contractor shall leave the Premises in neat and clean order. If Contractor fails to remove or commence substantial efforts to remove the System by such agreed upon date, the County shall have the right, at its option, to remove and dispose of the System and restore the Premises to its original condition at Contractor's sole cost.

Section F.14. Bonds. Contractor shall provide the County with payment and performance bonds in the forms attached as Exhibits H and I to the Agreement in the amount commensurate with 100 percent of the mutually agreed upon System construction costs, which the parties have agreed is $100,000.

YOLO-SOLANO AIR QUALITY MANAGEMENT DISTRICT
1947 Galileo Court, Suite 103; Davis, CA 95618
Phone (530) 757-3650 Fax (530) 757-3670

FACILITY NUMBER: 01392
SIC CODE: 4953
DATE EXPIRES: April 14, 2024
Unless Renewed

PERMIT TO OPERATE
P-15-05(a)
IS HEREBY GRANTED TO

YOLO COUNTY CENTRAL LANDFILL
44090 County Road 28H
Woodland, CA 95776

EQUIPMENT LOCATION: 44090 County Road 28H; Woodland, CA

TO OPERATE

PROCESS DESCRIPTION: Municipal solid waste (MSW) landfill

EQUIPMENT INVENTORY: MSW landfill not to exceed a total maximum design capacity of 49.0352 million cubic yards of waste

- Total Billing: Schedule 8, Misc. -

CONTROL EQUIPMENT INVENTORY:

Negative pressure landfill gas collection system serving the conventional and non-conventional portions of the landfill (previously referred to as Abioreactors@) and LFG Specialties, F-2000 enclosed flare (shared with P-26-98)

PERMITTED EMISSION LIMITS:

Pollutant	Daily [lb]	Qtr #1 (Jan 1-Mar 31) [lb]	Qtr #2 (Apr 1-June 30) [lb]	Qtr #3 (July 1-Sept 30) [lb]	Qtr #4 (Oct 1-Dec 31) [lb]	Yearly [tons]
VOC	279.6	25,165	25,445	25,725	25,725	51.03

PERMITTED PROCESS LIMITS:

	Daily [tons]	Qtr #1 (Jan 1-Mar 31) [tons]	Qtr #2 (Apr 1-June 30) [tons]	Qtr #3 (July 1-Sept 30) [tons]	Qtr #4 (Oct 1-Dec 31) [tons]	Yearly [tons]
Municipal Solid Waste Received	1,800	160,200	162,000	162,000	162,000	646,200

The following information is included to inform and assist the Permit Holder in achieving compliance with applicable provisions of Federal, State, and District Rules and Regulations. The following set of referenced regulations are not intended to be either comprehensive or exclusive, nor are they intended to be emission limiting permit conditions, but they are still applicable rules of the District. Occasionally laws are amended. The amended versions of the referenced rules shall be deemed to be in effect. **It is the Permit Holder's responsibility to comply with all applicable Rules and Regulations.**

1. The Permit Holder shall firmly affix this permit to operate, an approved facsimile, or other approved identification bearing the permit number upon the facility, article, machine, equipment, or other contrivance in such a manner as to be clearly visible and accessible. In the event that the facility, article, machine, equipment, or other contrivance is so constructed or operated that the permit to operate cannot be so placed, the permit to operate shall be mounted so as to be clearly visible in an accessible place within 25 feet of the facility, article, machine, equipment, or other contrivance, or maintained readily available at all times on the operating premises. [District Rule 3.1, '408]

2. The Permit Holder shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public or which endanger the comfort, repose, health, or safety of any such persons or the public or which cause to have a natural tendency to cause injury or damage to business or property. [District Rule 2.5]

3. Commencing work or operation under this permit shall be deemed acceptance of all of the conditions so specified. [District Rule 3.1, '402]

4. The Permit Holder shall notify the District of any occurrence which constitutes an upset/breakdown condition as soon as reasonably possible. Verbal notification shall occur no later than one (1) hour after the detection of an upset/breakdown condition. The verbal notification shall be followed by a written notification to the Air Pollution Control Officer no later than four (4) hours after the detection of an upset/breakdown condition. If the upset/breakdown occurs when the District cannot be contacted, the report of breakdown shall be made at the commencement of the next regular working day. The notification shall identify the time, specific location, equipment involved, and to the extent known the cause(s) of the occurrence. [District Rule 5.2, '301.1 and '301.2]

5. The Permit Holder shall submit an annual throughput/production report at the end of each calendar year. This report is due no later than March 31 for the previous year. This report must include actual operating hours and actual amounts of materials processed (for materials that have process limits listed on the Permit to Operate). Each type of material and each type of process must be listed separately. [District Rule 3.1, '405.1]

6. This permit shall not be transferable, by operation of law or otherwise, from one location to another or from one piece of equipment to another. It shall be the transferee's responsibility to inform the District on assumption of ownership or operating control of any item under a permit from the District and for which a permit to operate will be required. For any such transfer as hereinabove described, said transferee shall submit an application for authorization in accordance with applicable District Rules. [District Rule 3.1, '304]

7. Modifications to this permit, as defined by District Rules and Regulations, require prior District approval. A modification is defined as any physical change, change in method of operation, addition to or any change in hours of operation, or change in production rate, which: would necessitate a change in permit conditions; or is not specifically limited by a permit condition; or results in an increase in emissions not subject to an emissions limitation. [District Rule 3.4, '223]

8. This permit to operate shall be renewable annually on the permit's anniversary date, commencing one (1) year after the date of issuance. The Permit Holder shall pay a fee for the annual permit renewal. If the annual renewal fee is not paid by the specified due date, the District shall assess a penalty of not more than 50% of the fee due. Non-payment of renewal fees is grounds for permit cancellation. [District Rule 3.1, '305 and District Rule 4.1, '303 and '401]

The following sets of conditions are established by the District to provide enforceable operating parameters as authorized by California Health and Safety Code Section 42301 and District Rule 3.1, Section 402. If any of the rules and regulations referenced below are amended subsequent to the issuance date of this permit, resulting in the amended rule differing from or superseding the corresponding condition, then the Permit Holder shall be required to comply with the amended rule or regulation and shall no longer be required to comply with the superseded condition.

9. The Permit Holder shall not discharge into the atmosphere from any single source of emissions whatsoever, any air contaminant for a period or periods aggregating more than three (3) minutes in any one (1) hour which is:
   a. As dark or darker in shade than No. 1 on the Ringelmann Chart; or
   b. Greater than 20% opacity. [District Rule 2.3]

10. No location on the landfill surface may exceed a methane concentration of 500 ppmv (other than non-repeatable, momentary readings) as determined by instantaneous surface emissions monitoring, or an average of 25 ppmv as determined by integrated surface emissions monitoring except:
    a. For individual wells involved in well raising provided that new waste is being added or compacted in the immediate vicinity around the well and installed gas collection well extensions are sealed or capped until the raised well is reconnected to a vacuum source;
    b. For individual Landfill Gas Collection and Control System (GCCS) system components that must be temporarily shut down in order to repair them due to catastrophic events, to connect new GCCS components, to extinguish landfill fires, or to perform construction activities provided that any new components are included in the most recent design plan and landfill gas emissions are minimized during the shutdown;
    c. For the working face of the landfill; or
    d. For areas of the landfill surface where the landfill cover material has been removed and refuse has been exposed for the purpose of installing, expanding, replacing, or repairing components of the landfill gas, leachate, or gas condensate collection and removal system, or for law enforcement activities requiring excavation. [District Rule 3.1, §402]

11. The Permit Holder shall operate the GCCS and route collected gas to the control system continuously except:
    a. For individual wells involved in well raising provided that new waste is being added or compacted in the immediate vicinity around the well and installed gas collection well extensions are sealed or capped until the raised well is reconnected to a vacuum source; or
    b. For individual GCCS system components that must be temporarily shut down in order to repair them due to catastrophic events, to connect new GCCS components, to extinguish landfill fires, or to perform construction activities provided that any new components are included in the most recent GCCS design plan and landfill gas emissions are minimized during the shutdown. [District Rule 3.1, §402]

12. The Permit Holder shall operate the GCCS so that there is no landfill gas leak that exceeds 500 ppmv (as methane) at any component under positive pressure. [District Rule 3.1, §402]

13. The GCCS shall be designed and operated to draw all landfill gas toward the VOC control devices. [District Rule 3.1, §402]

14. The Permit Holder shall monitor indicators to detect any bypass of emissions from the landfill GCCS and enclosed flare (or other landfill gas combustion units) to the atmosphere. [40 CFR 64.3(a)(2)]

15. The flare shall reduce methane emissions by 99% (by weight). Landfill gas may also be directed to other VOC control devices located at another stationary source or operated under a separate permit which achieve a methane destruction efficiency of at least 99% (by weight). Lean burn internal combustion engines must reduce outlet methane concentration to less than 3,000 ppmvd @ 15% O2. [District Rule 3.1, §402]

16. The minimum flare operating temperature shall be 1,400 degrees Fahrenheit (°F). The flare combustion flame temperature shall be measured in units of degrees F and shall be monitored at the thermocouple in the exhaust stack. Flame temperature shall be monitored with a continuous recording temperature sensor, which is installed, calibrated, maintained, and operated according to manufacturer's specifications. [District Rule 3.4]

17. The flare shall be equipped with automatic dampers, an automatic shutdown device, a flame arrester, and continuous recording temperature sensors. [District Rule 3.1, §402]

18. The flare shall be maintained and operated according to the manufacturer's specifications and shall be equipped with a temperature monitoring device with a continuous recorder which has an accuracy of plus or minus (±) 1% of the temperature being measured expressed in degrees Fahrenheit. At least one (1) gas flow rate measuring device must record the flow to the control device(s) at least every 15 minutes. For other control devices the Permit Holder shall provide the District with information describing operating parameters that would indicate proper performance and appropriate monitoring methods (or propose alternative monitoring procedures). [District Rule 3.1, §402]

19. During restart or startup there must be a sufficient flow of pilot gas to the flare burners to prevent unburned collected methane from being emitted to the atmosphere. [District Rule 3.1, §402]

20. The flare (or other landfill gas control device) shall be operated within the parameter ranges established during the most recent source test. [District Rule 3.1, §402]

21. Annual source tests shall be conducted for landfill gas control devices. [District Rule 3.1, §402]

22. Unless otherwise approved by the APCO, EPA Method 25, 25A, 25C, or 18 shall be used to determine the efficiency of the control device using the formula:
Destruction efficiency = [1 – (mass of methane at control device outlet / mass of methane at control device inlet)] x 100%. [District Rule 3.1, §402]

23. Each wellhead in the GCCS shall be operated under a vacuum except:
    a. For individual wells involved in well raising provided that new waste is being added or compacted in the immediate vicinity around the well and installed gas collection well extensions are sealed or capped until the raised well is reconnected to a vacuum source;
    b. For individual GCCS system components that must be temporarily shut down in order to repair them due to catastrophic events, to connect new GCCS components, to prevent/extinguish landfill fires, or to perform construction activities provided that any new components are included in the most recent design plan and landfill gas emissions are minimized during the shutdown;
    c. For use of a geomembrane or synthetic cover for which acceptable pressure limits for the included wellheads have been developed and included in the GCCS design plan; or
    d. For decommissioned wells. [District Rule 3.1, §402]

24. The Permit Holder shall, at all times, maintain the monitoring systems required for the landfill and enclosed flare including, but not limited to, maintaining necessary parts for routine repairs of the monitoring equipment. Except for monitoring malfunctions, associated repairs, and required quality assurance or quality control activities the Permit Holder shall conduct all monitoring according to required intervals while the associated process is in operation. [40 CFR 64.7(a)-(c)]

25. Upon detecting an excursion or exceedance as defined in 40 CFR 64, the Permit Holder shall restore operation of the landfill and/or enclosed flare to the normal manner of operation as expeditiously as practicable in accordance with good air pollution control practices for minimizing emissions. [40 CFR 64.7(d)]

26. If it is determined that acceptable procedures were not used in response to an excursion or exceedance, the Permit Holder may be required to develop and implement a Quality Improvement Plan (QIP) as specified in 40 CFR 64.8(a) through (c). Implementation of a QIP shall not excuse the Permit Holder from compliance with existing emission limitations and monitoring, testing, reporting, and record-keeping requirements. [40 CFR 64.8]

27. Any instrument used for the measurement of methane must be a gas detector or other equivalent instrument approved by the APCO that meets the calibration, specifications, and performance criteria of EPA Reference Method 21, Determination of Volatile Organic Compound Leaks. For the purposes of demonstrating compliance with this permit methane replaces all references to volatile organic compounds (VOC) in Method 21 and methane shall be used as the calibration gas for the detector. The instrument shall be calibrated before and after each test using zero air and an approximately 500 ppmv methane based standard calibration gas in accordance with the manufacturer's recommendations. The instrument serial number and instrument calibration data shall be recorded for each calibration and maintained as a permanent record. [District Rule 3.1, §402]

28. In conducting measurements of landfill surface methane concentration the entire landfill must be divided into individually identified 50,000 square foot grids. The grids must be used for both instantaneous and integrated surface emissions monitoring. Testing must be performed by holding the hydrocarbon detector's probe within three (3) inches of the landfill surface (or at the height of vegetation in areas covered by low-lying vegetation) while traversing the grid. The walking pattern must be no more than a 25-foot spacing interval and must traverse each monitoring grid. If there are no exceedances of the surface methane concentration standards of this permit after any four (4) consecutive quarterly monitoring periods, the walking pattern spacing may be increased to 100-foot intervals. The Permit Holder must return to a 25-foot spacing interval upon any exceedances that cannot be remediated within ten (10) calendar days or upon exceedances detected during a compliance inspection. Surface testing must be terminated when the average wind speed exceeds five (5) miles per hour or the instantaneous wind speed exceeds ten (10) miles per hour. The APCO may approve alternatives to this wind speed surface testing termination for landfills consistently having measured winds in excess of these specified limits. Average wind speed must be determined on a 15-minute average using an on-site anemometer with a continuous recorder for the entire duration of the monitoring event. Surface emissions testing must be conducted no earlier than the time periods in the following table after precipitation has fallen according to the listed ranges of precipitation (as measured by an onsite gauge).

Precipitation (Inches)	Minimum time before monitoring (Hours)
0.01–0.15	24
0.16–0.24	48
0.25 and greater	72

[District Rule 3.1, §402]

29. In conducting instantaneous surface emissions monitoring the Permit Holder shall record any instantaneous readings of methane 200 ppmv or greater (other than non-repeatable, momentary readings). Surface areas of the landfill that exceed a methane concentration of 500 ppmv must be marked and remediated as required by this permit. The wind speed must be recorded during the sampling period. Landfill surface areas with cover penetrations, distressed vegetation, cracks or seeps must be inspected visually and with a hydrocarbon detector. [District Rule 3.1, §402]

30. In conducting integrated surface emissions monitoring the Permit Holder shall record readings and then average them for each grid. Individual monitoring grids that exceed an average methane concentration of 25 ppmv must be identified and remediated as required by this permit. The wind speed must be recorded during the sampling period. [District Rule 3.1, §402]

31. The Permit Holder shall conduct instantaneous and integrated monitoring of surface methane concentrations every calendar quarter. If the landfill has no monitored exceedances of the surface methane concentration limits specified in this permit after four consecutive quarterly monitoring periods, then any closed or inactive areas may be monitored annually. Any exceedances detected during annual monitoring that cannot be remediated within ten (10) calendar days or any exceedances detected during any compliance inspections will result in a return to quarterly monitoring of the location. [District Rule 3.1, §402]

32. When any monitoring reading exceeds the instantaneous surface methane concentration limit the Permit Holder shall record the date, location, and value of each exceedance, along with re-test dates and results. The location of each exceedance must be clearly marked and identified on a topographic map of the landfill, drawn to scale with the location of both the grids and the gas collection system clearly identified. The Permit Holder shall take corrective action and re-monitor the location within ten (10) calendar days of the measured exceedance. If re-monitoring shows a second exceedance, additional corrective action must be taken and the location re-monitored again no later than ten (10) calendar days of the second exceedance. If the re-monitoring shows a third exceedance the Permit Holder shall install a new or replacement well as determined to achieve compliance no later than 120 days after detecting the third exceedance. [District Rule 3.1, §402]

33. When any monitoring reading exceeds the integrated surface methane concentration limit the Permit Holder shall record the average surface concentration for each grid along with re-test dates and results. The location of the grids and the gas collection system must be clearly marked and identified on a topographic map of the landfill drawn to scale. The Permit Holder shall take corrective action and re-monitor the location within ten (10) calendar days of the measured exceedance. If re-monitoring shows a second exceedance, additional corrective action must be taken and the location re-monitored again no later than ten (10) calendar days of the second exceedance. If the re-monitoring shows a third exceedance the Permit Holder shall install a new or replacement well as determined to achieve compliance no later than 120 days after detecting the third exceedance. [District Rule 3.1, §402]

34. Components containing landfill gas and under positive pressure must be monitored quarterly for leaks. Such monitoring may be conducted prior to scheduled maintenance or planned outage periods for landfill gas-to-energy facilities. Any component leak must be tagged and repaired within ten (10) calendar days. [District Rule 3.1, §402]

35. The Permit Holder shall monitor each individual wellhead monthly to determine the gauge pressure. If there is any positive pressure reading other than as provided for well raising or repairs or temporary shutdowns of GCCS components in Title 17 CCR Section 95464 (d) and (e), or as otherwise provided for in this permit, the Permit Holder shall initiate corrective action within five (5) calendar days of the positive pressure measurement. If the problem cannot be corrected within fifteen (15) days of the date the positive pressure was first measured, the owner or operator must initiate further corrective action. Corrective actions must be completed and any new wells must be operating with 120 days of the date the positive pressure was first measured. [District Rule 3.1, §402]

36. Gauge pressure shall be determined using a hand-held manometer, magnahelic gauge, or other pressure measuring device approved by the APCO that is calibrated and operated in accordance with manufacturer's specifications. [District Rule 3.1, §402]

37. The Permit Holder shall operate the anaerobic non-conventional WMUs with an average moisture content less than 40% by weight. [District Rule 3.1, §402]

38. The Permit Holder shall prepare a moisture report for the anaerobic non-conventional WMUs documenting the average moisture content by weight using the procedures specified in 40 CFR Part 63.1980(g) and (h) or other District approved methods. [District Rule 3.1, §402]

39. The Permit Holder shall submit the moisture report to the District for the anaerobic non-conventional WMUs in accordance with 40 CFR 63.1980, at least once every six (6) months until such time that liquid addition has permanently ceased. Unless otherwise approved in writing by the District, the following shall apply:
    a. The first six (6) month monitoring period will begin on April 1 and end on September 30, and the report will be due by November 30; and
    b. The second six (6) month period will begin on October 1 and end on March 31, and the report will be due on May 31. [District Rule 3.1, §402]

40. Prior to beginning any landfill mining operations, the Permit Holder shall submit for approval a mining and sorting plan to the District. The Permit Holder shall only mine (e.g. excavation, reclaiming, etc.) and sort waste from the aerobic non-conventional WMU 6D-Phase 1. [District Rule 3.1, §402]

41. Prior to beginning any removal of composted organic waste, the Permit Holder shall submit for approval a composting plan to the District. The Permit Holder shall only remove composted waste from the anaerobic digester cells located in WMU 6D-Phase 2. [District Rule 3.1, §402]

42. The Permit Holder shall install and operate a biofilter that serves the anaerobic digester cell located on WMU 6D-Phase 2 during aerobic composting phase of the waste. [District Rule 3.1, §402]

43. Whenever buried solid waste is brought to the surface during the installation or preparation of wells, trenches, piping, or other equipment or when landfill solid waste is excavated or moved, the Permit Holder shall cover the excavated solid waste using fresh soil, plastic sheeting, or vapor retarding foam as necessary in order to prevent odorous emissions and to minimize the release of landfill gas. [District Rule 3.1, §402]

44. The Permit Holder shall at start-up, and at least once every fourteen (14) days thereafter, monitor the landfill gas emissions from any open faces, active mining surfaces, and/or any liquids present during the mining of a waste cell in order to determine that the total organic compound surface emission concentration limit of 500 ppmv (measured as methane) is not exceeded. [District Rule 3.1, §402]

45. The Permit Holder shall submit a Non-Methane Organic Compound (NMOC) (Tier 2) report to the District using the procedures specified in 40 CFR Part 60.754(a) at least once every twelve (12) months, except as provided in 40 CFR Part 60.757(b)(1)(ii) or 40 CFR Part 60.757(b)(3). Unless otherwise approved in writing by the District, testing shall be complete by February 28 and the report will be due by April 30. [District Rule 3.1, §402, 40 CFR Part 60.752(b)(1), and 40 CFR Part 60.757(b)(3)]

46. The District must be notified prior to any NMOC related sampling event and a protocol must be submitted for approval fourteen (14) days prior to sampling. The results of a sampling event shall be submitted to the District within sixty (60) days of the sample date. The protocol and report shall be mailed to the attention of the Supervising Air Quality Engineer. [District Rule 3.1, §402 and 40 CFR Part 60.8(d)]

47. If the estimated NMOC emission rate as reported in the annual report to the District is less than 50 Mg per year in each of the next five (5) consecutive years, the Permit Holder may elect to submit an estimate of the NMOC emission rate for the next 5-year period in lieu of the annual report. This estimate shall include the current amount of solid waste-in-place and the estimated waste acceptance rate for each year of the five (5) years for which an NMOC emission rate is estimated. All data and calculations upon which this estimate is based shall be provided to the District. This estimate shall be revised at least once every five (5) years. If the actual waste acceptance rate exceeds the estimated waste acceptance rate in any year reported in the 5-year estimate, a revised 5-year estimate shall be submitted to the Administrator. The revised estimate shall cover the 5-year period beginning with the year in which the actual waste acceptance rate exceeded the estimated waste acceptance rate. [40 CFR Part 60.757(b)(1)(ii)]

48. Upon achieving a calculated NMOC emission rate of 50 megagrams or greater per year, the Permit Holder shall comply with the requirements of 40 CFR Part 60.752(b)(2). [District Rule 3.1, §402 and 40 CFR Part 60.752(b)(2)]

49. Prior to utilizing new or modified monitoring equipment, the Permit Holder shall submit for District approval verification procedures, which shall consider the monitoring equipment manufacturer's requirements or recommendations for installation, calibration, and start-up operation. [40 CFR 64.3(b)(2)]

50. The Permit Holder may request alternatives to the compliance measures, monitoring requirements, test methods, and procedures of Sections 95464, 95469, and 95471 of Title 17 of the California Code of Regulations by submitting a written application to the APCO. [District Rule 3.1, §402]

51. Either there must be no visible emissions to the outside air from any active waste disposal site where asbestos-containing waste material has been deposited, or:
    a. At the end of each operating day (or once every 24-hour period while the site is in continuous operation) the asbestos-containing waste material shall be covered with at least 15 centimeters (6 inches) of compacted non-asbestos-containing material or be covered with a resinous or petroleum-based dust suppression agent that effectively binds dust and controls wind erosion used in the manner and frequency recommended by the dust suppressant manufacturer to achieve and maintain dust control (or other equally effective dust suppression agents may be used upon prior approval by the Administrator); or
    b. Use an alternative emissions control method that has received prior written approval by the U.S. EPA Administrator. [40 CFR 61.154(a), (c), and (d)]

52. Unless a natural barrier adequately deters access by the general public:
    a. Warning signs and fencing must be installed and maintained as specified in 40 CFR 61.154(b); or
    b. The Permit Holder shall cover the asbestos-containing waste material with at least 15 centimeters (6 inches) of compacted non-asbestos-containing material at the end of each operating day (or once every 24-hour period while the site is in continuous operation). [40 CFR 61.154(b)]

53. The Permit Holder shall not knowingly vent or otherwise release into the environment any refrigerant or substitute with the exception of the following:
    a. Ammonia in commercial or industrial process refrigeration or in absorption units;
    b. Hydrocarbons in industrial process refrigeration (processing of hydrocarbons);
    c. Chlorine in industrial process refrigeration (processing of chlorine and chlorine compounds);
    d. Carbon dioxide in any application;
    e. Nitrogen in any application; and
    f. Water in any application. [40 CFR 82.154(a)(1)]

54. The Permit Holder shall not dispose of appliances except for small appliances, Motor Vehicle Air Conditioner (MVAC), or MVAC-like appliances:
    a. Without observing the required practices set forth in 40 CFR 82.156; and
    b. Without using equipment that is certified for that type of appliance pursuant to 40 CFR 82.158. [40 CFR 82.154(b)]

55. The Permit Holder shall not import recycling or recovery equipment for use during the disposal of appliances except small appliances, MVACs, and MVAC-like appliances, unless the equipment is certified pursuant to 40 CFR 82.158(b) or (d), as applicable. [40 CFR 82.154(c)]

56. The Permit Holder shall not alter the design of certified refrigerant recycling or recovery equipment in a way that would affect the equipment's ability to meet the certification standard set forth in 40 CFR 82.158 without resubmitting the altered design for certification testing. Until it is tested and shown to meet the certification standards set forth in 40 CFR 82.158 such altered equipment will be considered uncertified. [40 CFR 82.154(d)]

57. The Permit Holder shall not dispose of appliances except for small appliances, MVACs, or MVAC-like appliances, unless the Permit Holder has certified to the U.S. EPA Administrator pursuant to 40 CFR 82.162 that the Permit Holder has acquired certified recovery or recycling equipment and is complying with the applicable requirements of 40 CFR 82 Subpart F. [40 CFR 82.154(e)]

58. The Permit Holder shall not recover refrigerant from small appliances, MVACs, and MVAC-like appliances for purposes of disposal of these appliances unless such person has certified to the Administrator pursuant to 40 CFR 82.162 that the Permit Holder has acquired recovery equipment that meets the standards set forth in § 82.158 (l) and/or (m), as applicable, and that such person is complying with the applicable requirements of this subpart. [40 CFR 82.154(f)]

59. The Permit Holder may not sell, distribute, or offer for sale or distribution for use as a refrigerant any class I or class II substance consisting wholly or in part of used refrigerant unless:
    a. The class I or class II substance has been reclaimed as defined in 40 CFR 82.152 by a person who has been certified as a reclaimer pursuant to 40 CFR 82.164;
    b. The class I or class II substance was used only in an MVAC or MVAC-like appliance and is to be used only in an MVAC or MVAC-like appliance and recycled in accordance with 40 CFR 82.34(d);
    c. The class I or class II substance is contained in an appliance that is sold or offered for sale together with the class I or class II substance; or
    d. The class I or class II substance is being transferred between or among a parent company and one or more of its subsidiaries, or between or among subsidiaries having the same parent company. [40 CFR 82.154(g)]

60. The Permit Holder shall not release more that 1.5% of the refrigerant received if reclaiming refrigerant. [40 CFR 82.154(i)]

61. The Permit Holder shall not sell or distribute, or offer for sale or distribution, any appliances, except small appliances, unless such equipment is equipped with a servicing aperture to facilitate the removal of refrigerant at servicing and disposal. [40 CFR 82.154(j)]

62. The Permit Holder shall not sell or distribute, or offer for sale or distribution any small appliance unless such equipment is equipped with a process stub to facilitate the removal of refrigerant at servicing and disposal. [40 CFR 82.154(k)]

63. The Permit Holder may not sell or distribute, or offer for sale or distribution, any substance that consists in whole or in part of a class I or class II substance for use as a refrigerant to any person unless:
    a. The buyer has been certified as a Type I, Type II, Type III, or Universal technician pursuant to 40 CFR 82.161;
    b. The buyer complies with 40 CFR 82.166(b) and employs at least one (1) technician who is certified as a Type I, Type II, Type III, or Universal technician in accordance with 40 CFR 82.161;
    c. The buyer has been certified in accordance with 40 CFR part 82, subpart B and the refrigerant is either R-12 or an approved substitute consisting wholly or in part of a class I or class II substance for use in motor vehicle air conditioners in accordance with 40 CFRE part 82, subpart G;
    d. The buyer complies with 40 CFR 82.166(b) and employs at least one (1) technician who is certified in accordance with 49 CFR part 82, subpart B, and the refrigerant is either R-12 or an approved substitute consisting wholly or in part of a class I or class II substance for use in motor vehicle air conditioners pursuant to 40 CFR part 82, subpart G (nothing in this provision shall be construed to relieve persons of the requirements of 40 CFR 82.34(b) or 40 CFR 82.42(b);
    e. The refrigerant is sold only for eventual resale to certified technicians or to appliance manufacturers;
    f. The refrigerant is sold to an appliance manufacturer; or
    g. The refrigerant is contained in an appliance with a fully assembled refrigerant circuit. [40 CFR 82.154(m)]

64. The Permit Holder shall not accept a signed statement pursuant to 40 CFR 82.156(f)(2) that refrigerant has been evacuated from the appliance or shipment of appliances if the Permit Holder knew or had reason to know that such a signed statement is false. [40 CFR 82.154(n)]

65. When disposing of appliances, except for small appliances, MVACs, and MVAC-like appliances the Permit Holder must evacuate the refrigerant, including all the liquid refrigerant, in the entire unit to a recovery or recycling machine certified pursuant to 40 CFR 82.158. A technician must verify that the applicable level of evacuation has been reached in the appliance before it is opened. The Permit Holder must evacuate to the levels in table 1 unless, due to leaks in the appliance, evacuation to the levels in table 1 is not attainable, or would substantially contaminate the refrigerant being recovered. If, due to leaks in the appliance, evacuation to the levels in table 1 is not attainable, or would substantially contaminate the refrigerant being recovered, persons disposing of the appliance must:
    a. Isolate leaking from non-leaking components wherever possible;
    b. Evacuate non-leaking components to the levels specified in table 1; and
    c. Evacuate leaking components to the lowest level that can be attained without substantially contaminating the refrigerant. In no case shall this level exceed 0 psig. [40 CFR 82.156(a)]

Table 1 – Required Levels of Evacuation for Appliances
(Except for small appliances, MVACs, and MVAC-like appliances)

Type of appliance	Inches of Hg vacuum (relative to standard atmospheric pressure of 29.9 inches Hg)	
	Using recovery or recycling equipment manufactured or imported before November 15, 1993	Using recovery or recycling equipment manufactured or imported on or after November 15, 1993
Very high-pressure appliance	0	0
High-pressure appliance, or isolated component of such appliance, normally containing less than 200 pounds of refrigerant	0	0
High-pressure appliance, or isolated component of such appliance, normally containing 200 pounds or more of refrigerant	4	10
Medium-pressure appliance, or isolated component of such appliance, normally containing less than 200 pounds of refrigerant	4	10
Medium-pressure appliance, or isolated component of such appliance, normally containing 200 pounds or more of refrigerant	4	15
Low-pressure appliance	25	25 mmHg absolute

66. The Permit Holder shall have at least one (1) piece of certified, self-contained recovery or recycling equipment available at the facility if disposing of appliances, except small appliances, MVACs, and MVAC-like appliances. [40 CFR 82.156(b)]

67. The Permit Holder shall not use system-dependent recovery equipment with appliances normally containing more than 15 pounds of refrigerant, unless the system-dependent equipment is permanently attached to the appliance as a pump-out unit. [40 CFR 82.156(c)]

68. The Permit Holder shall use all recovery or recycling equipment in accordance with the manufacturer's directions unless such directions conflict with the requirements of 40 CFR part 82 subpart F. [40 CFR 82.156(d)]

69. When disposing of a small appliance, room air conditioning, MVACs, or MVAC-like appliances the Permit Holder must either:
    a. Recover any remaining refrigerant from the appliance in accordance with 40 CFR 82.156(g) or (h); or

b. Verify that the refrigerant has been evacuated from the appliance or shipment of appliances previously. Such verification must include a signed statement from the person from whom the appliance or shipment of appliances is obtained that all refrigerant that had not leaked previously has been recovered from the appliance or shipment of appliances in accordance with 40 CFR 82.156(g) or (h), as applicable. This statement must include the name and address of the person who recovered the refrigerant and the date the refrigerant was recovered or a contract that refrigerant will be removed prior to delivery. If the Permit Holder will not recover any remaining refrigerant at the facility, notification must be provided (by warning signs, letters to suppliers, or other equivalent means) that refrigerant must be properly removed before delivery of the items to the facility. [40 CFR 82.156(f)]

70. When recovering refrigerant from MVACs and MVAC-like appliances prior to disposal, the Permit Holder shall reduce the system pressure to or below 102mm of mercury vacuum, using equipment that meets the standards set forth in 40 CFR 82.158(l). [40 CFR 82.156(g)]

71. When recovering refrigerant from small appliances prior to disposal, the Permit Holder shall:
    a. Recover 90% of the refrigerant in the appliance when the compressor in the appliance is operating, or 80% of the refrigerant in the appliance when the compressor in the appliance is not operating; or
    b. Evacuate the small appliance to four inches of mercury vacuum. [40 CFR 82.156(h)]

72. Equipment used to evacuate refrigerant from MVACs and MVAC-like appliances before they are disposed of must be certified in accordance with 40 CFR 82.36(a). [40 CFR 82.158(l)]

73. Equipment used to evacuate refrigerant from small appliances before they are disposed of must be capable of either:
    a. Removing 90% of the refrigerant in the small appliance when the compressor in the appliance is operating, or 80% of the refrigerant in the appliance when the compressor in the appliance is not operating, when used in accordance with the manufacturer's instructions under the conditions of appendix C of 40 CFR part 82, subpart F; or
    b. Evacuate the small appliance to four inches of mercury vacuum when tested using a properly calibrated pressure gauge. [40 CFR 82.158(m)]

74. Technicians must be certified by an approved technician certification program under the requirements of 40 CFR 82.161(a) to the following standards:
    a. Technicians who dispose of medium, high, or very high pressure appliances, except small appliances, MVACs, and MVAC-like appliances, must be properly certified as Type II technicians;
    b. Technicians who dispose of low-pressure appliances must be properly certified as Type III technicians; and

c. Apprentices are exempt from the certification requirements provided the apprentice is closely and continually supervised by a certified technician while performing any disposal that could reasonably be expected to release refrigerant from appliances into the environment. The supervising certified technician is responsible for ensuring that the apprentice complies with 40 CFR part 82, subpart F. [40 CFR 82.161(a)]

75. If a technician's certificate is revoked, the technician would need to recertify before disposing of any appliances. [40 CFR 82.161(f)]

76. The Permit Holder shall submit the following to the APCO:
    a. A diagram of the collection system showing collection system positioning including all wells, horizontal collectors, surface collectors, or other gas extraction devices, including the locations of any areas excluded from collection and the proposed sites for the future collection system expansion;
    b. The data upon which the sufficient density of wells, horizontal collectors, surface collectors, or other gas extraction devices and the gas mover equipment sizing are based;
    c. The documentation of the presence of asbestos or nondegradable material for each area from which collection wells have been excluded based on the presence of asbestos or nondegradable material;
    d. The sum of the gas generation flow rates for all areas from which collection wells have been excluded based on nonproductivity and the calculations of gas generation flow rate for each excluded area;
    e. The provisions for increasing gas mover equipment capacity with increased gas generation flow rate, if the present gas mover equipment is inadequate to move the maximum flow rate expected over the life of the landfill; and
    f. The provisions for the control of off-site migration. [District Rule 3.1, §402 and 40 CFR 60.758(d)]

77. The Permit Holder shall submit an annual report to the APCO for the period of January 1 through December 31 by March 15 of the following year. The report must contain the following information:
    a. Landfill name, owner and operator, address, and Solid Waste Information System (SWIS) identification number;
    b. Total volume of landfill gas collected (in standard cubic feet);
    c. Average composition of the landfill gas collected over the reporting period (reported in % methane and % carbon dioxide);
    d. Emission control device type, year of installation, rating, fuel type, and total amount of landfill gas combusted in each control device;
    e. The date that the GCCS was installed and in full operation;
    f. The % methane destruction efficiency of each control device;
    g. Type and amount of pilot fuels burned in each control device;
    h. Total volume of landfill gas shipped off-site, the composition of the landfill gas collected (reported in % methane and % carbon dioxide by volume), and the recipient of the gas;

i. The most recent topographic map of the site showing the areas with final cover and a geomembrane and the areas with final cover without a geomembrane with corresponding percentages over the landfill surface; and

j. Gas collection or control system downtime required to be recorded, expected gas generation flow rate, landfill surface methane concentrations required to be recorded, positive wellhead gauge pressure measurements required to be recorded, annual solid waste acceptance rate and the current amount of waste-in-place, source test results, and equipment monitoring parameters required to be recorded including periods of operation during which the parameter boundaries established during the most recent source test are exceeded. [District Rule 3.1, §402 and 40 CFR 60.758(c)]

78. The Permit Holder shall report in writing to the local, State, or EPA Regional office responsible for administering the asbestos National Emissions Standards for Hazardous Air Pollutants (NESHAP) program for the waste generator (identified in the waste shipment record) and the District by the following working day if a shipment contains a significant amount of improperly enclosed or uncovered waste. Submit a copy of the waste shipment records along with the report. [40 CFR 61.154(e)(1)(iv)]

79. The Permit Holder shall send a copy of the signed waste shipment record to the waste generator no later than 30 days after receipt of the waste. [40 CFR 61.154(e)(2)]

80. Upon discovering a discrepancy between the quantity of asbestos-containing waste designated on the waste shipment records and the quantity actually received, the Permit Holder shall attempt to reconcile the discrepancy with the waste generator. If the discrepancy is not resolved within 15 days after receiving the waste, immediately report in writing to the local, State, or EPA Regional office responsible for administering the asbestos National Emissions Standards for Hazardous Air Pollutants (NESHAP) program for the waste generator (identified in the waste shipment record) and the District. Describe the discrepancy and attempts to reconcile it, and submit a copy of the waste shipment record along with the report. [40 CFR 61.154(e)(3)]

81. The Permit Holder shall notify the District in writing at least 45 days prior to excavating or otherwise disturbing any asbestos-containing waste material that has been deposited at a waste disposal site and is covered. If the excavation will begin on a date other than the one contained in the original notice, notice of the new start date must be provided to the Administrator at least ten (10) working days before excavation begins and in no event shall excavation begin earlier than the date specified in the original notification. Include the following information in the notice:

a. Scheduled starting and completion dates;

b. Reason for disturbing the waste;

c. Procedures to be used to control emissions during the excavation, storage, transport, and ultimate disposal of the excavated asbestos-containing waste material. If deemed necessary, the District may require changes in the emission control procedures to be used; and

d. Location of any temporary storage site and the final disposal site. [40 CFR 61.154(j)]

82. The Permit Holder shall notify the District if a failure to achieve compliance with emissions limits of the landfill and/or enclosed flare for which the required monitoring did not provide an indication of an excursion or exceedance while providing valid data, or if the results of source testing document a need to modify the existing indicator ranges or designated conditions of the monitoring systems. [40 CFR 64.7(e)]

83. The Permit Holder shall submit revised monitoring system design and performance information required by 40 CFR 64.4 prior to any modification of the landfill and/or enclosed flare that qualifies a significant modification to the Title V permit. [40 CFR 64.5]

84. The Permit Holder shall perform such certifications as required in 40 CFR 82.154(e) and (f) by submitting a statement signed by the Permit Holder and setting forth:
    a. The name and address of the purchaser of the recovery or recycling equipment, including the county name;
    b. The name and address of the facility where the equipment is or will be located; and
    c. The manufacturer name, the date of manufacture, and if applicable, the model and serial number of the equipment.

    The certification must also include a statement that the equipment will be properly used in disposing of appliances and that the information given is true and correct. The certifications shall be sent to EPA Region IX; Mail Code AIR-5; 75 Hawthorne Street; San Francisco, CA 94105. [40 CFR 82.162]

85. Unless the Permit Holder has properly certified under this section prior to May 11, 2004, if reclaiming used refrigerant for sale to a new owner, the Permit Holder must certify to the Administrator that the Permit Holder will:
    a. Reprocess refrigerant to all of the specifications in Appendix A of 40 CFR part 82, subpart F that are applicable to that refrigerant;
    b. Verify that the refrigerant meets these specifications using the analytical methodology prescribed in Appendix A, which includes the primary methodologies included in the appendix to the ARI Standard 700-1995;
    c. Release no more than 1.5% of the refrigerant during the reclamation process; and
    d. Dispose of wastes from the reclamation process in accordance with all applicable laws and regulations.

    The certification must include the name and address of the reclaimer and a list of equipment used to reprocess and analyze the refrigerant. The responsible official must sign the certification stating that the facility will comply with the above operating standards, that the facility will maintain records and submit reports in accordance with 40 CFR 82.166(g) and (h), and that the information given is true and accurate. The certification should be sent to U.S. Environmental Protection Agency; Global Programs Division (6205J); 1200 Pennsylvania Avenue, NW., Washington, DC 20460; Attn: Section 608 Recycling Program Manager – Reclaimer Certification. [40 CFR 82.164(a)-(e)]

86. Certificates are not transferable. In the event of a change in ownership of an entity which reclaims refrigerant, the new Permit Holder shall certify within 30 days of the change of ownership pursuant to 40 CFR 82.164. [40 CFR 82.164(f)]

87. Failure to abide by the provisions of 40 CFR Part 82, Subpart F may result in the revocation or suspension of the refrigerant reclaimer certification of 40 CFR 82.164. The administrator (or designated representative) shall give notice of an impending suspension to the Permit Holder setting forth the facts or the conduct that provide the basis for the revocation or suspension. The Permit Holder may choose to request a hearing and must file the request in writing within 30 days of the date of the notice of revocation or suspension at Section 608 Recycling Program Manager; Global Programs Division; Mail Code 6205J, U.S. Environmental Protection Agency; 1200 Pennsylvania Avenue, NW.; Washington, DC 20460. The hearing request shall set forth the objections to the revocation or suspension and the data to support the objections. If no written request for a hearing is received within 30 days of the date of the notice, the revocation or suspension will become effective upon the date specified in the notice of an impending suspension. [40 CFR 82.169(a)-(c)]

88. Any report, or information submitted by the Permit Holder must contain certification by a responsible official of truth, accuracy, and completeness. This certification, and any other certification required under Title 17, California Code of Regulations, Sections 95460 through 95476, must state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete. [District Rule 3.1, §402]

89. The Permit Holder shall maintain daily records (in tons) of the total amount of MSW accepted at the landfill. [District Rule 3.1, §402]

90. The Permit Holder shall maintain daily records (in tons) of the amount of MSW placed in the anaerobic non-conventional WMUs until such time that placement has permanently ceased. [District Rule 3.1, §402]

91. The Permit Holder must maintain records of each startup, shutdown, or malfunction in the operation of the landfill gas collection system or the VOC control devices (and any periods during which a required monitoring device is inoperative) including the date and duration of the event, the actions taken, and whether or not such actions are consistent with the startup, shutdown, or malfunction plan. The Permit Holder must also maintain records of all maintenance performed on the air pollution control and monitoring equipment. [40 CFR 60.7(b), 40 CFR 63.6(b)(2)(i)-(v), 40 CFR 63.10(d)(5), and Rule 3.1, §402]

92. The Permit Holder shall maintain a file of all measurements, including continuous monitoring system, monitoring device, and performance testing measurements; all continuous monitoring system performance evaluations; all continuous monitoring system or monitoring device calibration checks; adjustments and maintenance performed on these systems or devices; and all other information required by this part recorded in a permanent form suitable for inspection. [40 CFR 60.7(f)]

93. The Permit Holder shall maintain the following records:
    a. All gas collection system downtime exceeding five (5) calendar days, including individual well shutdown and disconnection times, and the reason for the downtime;

b. All emission control system downtime in excess of one hour, the reason for the downtime, and the length of time the gas control system was shutdown;
c. Expected gas generation flow rate calculations;
d. All instantaneous landfill surface readings of 200 ppmv of methane or greater, all leaks from components under positive pressure greater than 500 ppmv (as methane), all instantaneous surface monitoring readings greater than 500 ppmv, all integrated surface monitoring readings greater than 25 ppmv, the location of the leak (or affected grid), leak concentration in ppmv, date and time of measurement, the action taken to repair the leak, date of repair, date of any required re-monitoring and the re-monitored concentration in ppmv, wind speed during surface sampling, and the installation date and location of each well installed in a GCCS expansion;
e. Records of any positive wellhead gauge pressure measurements, the date of the measurements, the well identification number, and the corrective action taken;
f. Annual solid waste acceptance rate and current amount of waste-in-place;
g. Records of the nature, location, amount, and date of deposition of non-degradable waste for any landfill areas excluded from the GCCS;
h. Results of any source tests;
i. Records describing the mitigation measures taken to prevent the release of methane or other emission into the atmosphere: when solid waste was brought to the surface during the installation or preparation of wells, piping, or other equipment; during repairs or temporary shutdown of gas collection system components; or when solid waste was excavated and moved;
j. Records of any construction activities including: a description of the actions being taken, the areas of the landfill affected by these actions, the reason the actions are required, and any landfill gas collection system components affected by these actions; construction start and finish dates, projected equipment installation dates, and projected shut down times for individual gas collection system components; a description of the mitigation measures taken to minimize methane emissions and other potential air quality impacts; and
k. Records of the emission control device operating parameters required to be monitored as well as periods of operation during which the parameter boundaries established during the most recent source test are exceeded including: all three (3) hour periods of operation during which the average flare temperature was more than 50 °F below the average combustion temperature during the most recent source test. [District Rule 3.1, §402]

94. The Permit Holder shall maintain the following records for the life of the emissions control device:
a. The control device vendor specifications;
b. The gas generation flow rate measured during the initial source tests; and
c. The percent reduction of methane achieved by the control devices during the initial source tests. [District Rule 3.1, §402]

95. The Permit Holder shall maintain records for shipments all asbestos-containing waste received including:
a. The name, address, and telephone number of the waste generator;
b. The name address, and telephone numbers of the transporter(s);

c. The quantity of asbestos-containing waste in cubic meters or cubic yards;
d. The presence of improperly enclosed or uncovered waste, or any asbestos-containing waste not sealed in leak tight containers; and
e. The date of receipt. [40 CFR 61.154(e)(1)]

96. The Permit Holder shall maintain (until closure) records of the location, depth and area, and quantity in cubic meters or cubic yards of asbestos-containing waste within the disposal site on a map or diagram of the landfill. [40 CFR 61.154(f)]

97. The Permit Holder shall furnish upon request, and make available during normal business hours for inspection by the District, all records of asbestos waste shipments and disposal locations and quantities. [40 CFR 61.154(i)]

98. If the Permit Holder sells or distributes or offers to sell or distribute any refrigerant, the Permit Holder shall retain invoices that indicate the name of the purchaser, the date of sale, and the quantity of refrigerant purchased. [40 CFR 82.166(a)]

99. If reclaiming refrigerant, the Permit Holder shall maintain records of the names and addresses of persons sending material for reclamation and the quantity of the material (the combined mass of refrigerant and contaminants) sent for reclamation. Such records shall be maintained on a transactional basis. [40 CFR 82.166(g)]

100. If reclaiming refrigerant, the Permit Holder shall maintain records of the quantity of material sent for reclamation, the mass of refrigerant reclaimed, and the mass of waste products. The Permit Holder shall report this information to the U.S. EPA Administrator annually within 30 days of the end of the calendar year. [40 CFR 82.166(h)]

101. If disposing of small appliances, MVACs, and MVAC-like appliances the Permit Holder shall maintain copies of signed statements pursuant to 40 CFR 82.156(f)(2) that refrigerant had been evacuated prior to arriving at the facility. [40 CFR 82.166(i)]

102. Technicians certified under 40 CFR 82.161 shall keep a copy of their certificates at the facility. [40 CFR 82.166(l)]

103. The Permit Holder shall retain records of all required monitoring data and support information for a period of at least five (5) years from the date of sample collection, measurement, report, or application and these records shall be made readily available to District personnel upon request. [District Rule 3.1, §402 and District Rule 3.8, '302.6(b)]

104. Upon closure of the landfill, the Permit Holder shall comply with all the provisions of 40 CFR 61.151 and submit to the District a copy of records of asbestos waste disposal locations and quantities. [40 CFR 61.154(g) and (h)]

105. Upon closure of the landfill the GCCS may be capped or removed provided:
a. The GCCS was in operation for at least 15 years, unless the Permit Holder can demonstrate to the satisfaction of the APCO that due to declining methane rates

the landfill will be unable to operate the gas collection and control system for a 15-year period;

b. Surface methane concentration measurements do not exceed the limits specified in this permit; and

c. The Permit Holder submits an Equipment Removal Report as required by this permit. [District Rule 3.1, §402]

106. The Permit Holder shall submit a Closure Notification to the APCO within thirty (30) days of waste acceptance cessation. The Closure Notification must include the last day solid waste was accepted, the anticipated closure date of the landfill, and the estimated waste-in-place. The APCO may request additional information to confirm that the landfill has been permanently closed. [District Rule 3.1, §402 and 40 CFR 60.757(d)]

107. The Permit Holder shall submit a GCCS Equipment Removal Report to the APCO thirty (30) days prior to well capping, removal or cessation of operation of the gas collection, treatment, or control system equipment. The report must contain all of the following information:

a. A copy of the Closure Notification required by Title 17 CCR, Section 95470(b)(1);

b. A copy of the documentation demonstrating that the gas collection and control system has been installed and operated for a minimum of 15 years, unless the Permit Holder can demonstrate to the satisfaction of the APCO that due to declining methane rates the landfill is unable to operate the gas collection and control system for a 15-year period; and

c. Surface emissions monitoring results needed to verify that landfill surface methane concentrations do not exceed either the instantaneous or integrated monitoring limits. [District Rule 3.1, §402 and 40 CFR 60.757(e)]

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26, Part 4, Chapter 3, of the Health & Safety Codes of the State of California or the Rules and Regulations of the Yolo-Solano Air Quality Management District.

Paul Hensleigh
INTERIM AIR POLLUTION CONTROL OFFICER

FACILITY NUMBER: 01419
SIC CODE: 4953
DATE EXPIRES: April 14, 2024
Unless Renewed

PERMIT TO OPERATE
P-26-98(t2)
IS HEREBY GRANTED TO

YOLO COUNTY CENTRAL LANDFILL
44090 County Road 28H
Woodland, CA 95776

EQUIPMENT LOCATION: 44090 County Road 28H; Woodland, CA

TO OPERATE

PROCESS DESCRIPTION: Negative pressure landfill gas collection system that collects landfill gas from the conventional and non-conventional portions of the landfill

EQUIPMENT INVENTORY: Landfill gas collection system, including: methane gas collection wells not to exceed 350 vertical and horizontal wells serving the conventional portions of the landfill; condensate traps; one (1) collection system blower (rated at 1,897 SCFM); and associated piping and valves.

- Total Billing: Schedule 8, Misc. -

CONTROL EQUIPMENT INVENTORY:

One (1) 54.6 MMBtu/hr landfill gas fired LFG Specialties enclosed flare, Model F-2000, with a one (1) second residence time (shared with PTO P-15-05)

PERMITTED EMISSION LIMITS:

Pollutant	Daily [lb]	Qtr #1 (Jan 1-Mar 31) [lb]	Qtr #2 (Apr 1-June 30) [lb]	Qtr #3 (July 1-Sept 30) [lb]	Qtr #4 (Oct 1-Dec 31) [lb]	Yearly [tons]
VOC	14.9	1,344	1,359	1,374	1,374	2.73
CO	484.8	43,636	44,121	44,606	44,606	88.48
NO_X	78.6	7,076	7,155	7,233	7,233	14.35
SO_X	78.4	7,058	7,136	7,215	7,215	14.31
PM_{10}	6.3	566	572	579	579	1.15

PERMITTED PROCESS LIMITS:

	Daily	Qtr #1 (Jan 1-Mar 31)	Qtr #2 (Apr 1-June 30)	Qtr #3 (July 1-Sept 30)	Qtr #4 (Oct 1-Dec 31)	Yearly
Total Amount of Landfill Gas Gathered by the Collection System [million standard cubic feet]	2.732	245.9	248.6	251.3	251.3	997.1
Landfill Gas Combusted in the Flare [million British Thermal Units]	1,310.4	117,936	119,246	120,557	120,557	478,296

The following information is included to inform and assist the Permit Holder in achieving compliance with applicable provisions of Federal, State, and District Rules and Regulations. The following set of referenced regulations are not intended to be either comprehensive or exclusive, nor are they intended to be emission limiting permit conditions, but they are still applicable rules of the District. Occasionally laws are amended. The amended versions of the referenced rules shall be deemed to be in effect. **It is the Permit Holder's responsibility to comply with all applicable Rules and Regulations.**

1. The Permit Holder shall firmly affix this permit to operate, an approved facsimile, or other approved identification bearing the permit number upon the facility, article, machine, equipment, or other contrivance in such a manner as to be clearly visible and accessible. In the event that the facility, article, machine, equipment, or other contrivance is so constructed or operated that the permit to operate cannot be so placed, the permit to operate shall be mounted so as to be clearly visible in an accessible place within 25 feet of the facility, article, machine, equipment, or other contrivance, or maintained readily available at all times on the operating premises. [District Rule 3.1, '408]

2. The Permit Holder shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public or which endanger the comfort, repose, health, or safety of any such persons or the public or which cause to have a natural tendency to cause injury or damage to business or property. [District Rule 2.5]

3. Commencing work or operation under this permit shall be deemed acceptance of all of the conditions so specified. [District Rule 3.1, '402]

4. The Permit Holder shall notify the District of any occurrence which constitutes an upset/breakdown condition as soon as reasonably possible. Verbal notification shall occur no later than one (1) hour after the detection of an upset/breakdown condition. The verbal notification shall be followed by a written notification to the Air Pollution Control Officer no later than four (4) hours after the detection of an upset/breakdown condition. If the upset/breakdown occurs when the District cannot be contacted, the report of breakdown shall be made at the commencement of the next regular working day. The notification shall identify the time, specific location, equipment involved, and to the extent known the cause(s) of the occurrence. [District Rule 5.2, '301.1 and '301.2]

5. The Permit Holder shall submit an annual throughput/production report at the end of each calendar year. This report is due no later than March 31 for the previous year. This report must include actual operating hours and actual amounts of materials processed (for materials that have process limits listed on the Permit to Operate). Each type of material and each type of process must be listed separately. [District Rule 3.1, '405.1]

6. This permit shall not be transferable, by operation of law or otherwise, from one location to another or from one piece of equipment to another. It shall be the transferee's responsibility to inform the District on assumption of ownership or operating control of any item under a permit from the District and for which a permit to operate will be required. For any such transfer as hereinabove described, said transferee shall submit an application for authorization in accordance with applicable District Rules. [District Rule 3.1, '304]

7. Modifications to this permit, as defined by District Rules and Regulations, require prior District approval. A modification is defined as any physical change, change in method of operation, addition to or any change in hours of operation, or change in production rate, which: would necessitate a change in permit conditions; or is not specifically limited by a permit condition; or results in an increase in emissions not subject to an emissions limitation. [District Rule 3.4, '223]

8. This permit to operate shall be renewable annually on the permit's anniversary date, commencing one (1) year after the date of issuance. The Permit Holder shall pay a fee for the annual permit renewal. If the annual renewal fee is not paid by the specified due date, the District shall assess a penalty of not more than 50% of the fee due. Non-payment of renewal fees is grounds for permit cancellation. [District Rule 3.1, '305 and District Rule 4.1, '303 and '401]

The following sets of conditions are established by the District to provide enforceable operating parameters as authorized by California Health and Safety Code Section 42301 and District Rule 3.1, Section 402. If any of the rules and regulations referenced below are amended subsequent to the issuance date of this permit, resulting in the amended rule differing from or superseding the corresponding condition, then the Permit Holder shall be required to comply with the amended rule or regulation and shall no longer be required to comply with the superseded condition.

9. The combined VOC emissions from all landfill gas combustion equipment being served by this collection system shall not exceed 114.6 lb per day, 10,325 lb/1st calendar quarter, 10,440 lb/2nd calendar quarter, 10,554 lb/3rd calendar quarter, 10,554 lb/4th calendar quarter, and 20.94 tons per year. [District Rule 3.4]

10. The combined CO emissions from all landfill gas combustion equipment being served by this collection system shall not exceed 844.2 lb per day, 75,980 lb/1st calendar quarter, 76,825 lb/2nd calendar quarter, 77,669 lb/3rd calendar quarter, 77,669 lb/4th calendar quarter, and 154.07 tons per year. [District Rule 3.4]

11. The combined NO_X emissions from all landfill gas combustion equipment being served by this collection system shall not exceed 234.5 lb per day, 21,106 lb/1st calendar quarter, 21,341 lb/2nd calendar quarter, 21,575 lb/3rd calendar quarter, 21,575 lb/4th calendar quarter, and 42.80 tons per year. [District Rule 3.4]

12. The combined SO_X emissions from all landfill gas combustion equipment being served by this collection system shall not exceed 126.0 lb per day, 11,346 lb/1st calendar quarter, 11,472 lb/2nd calendar quarter, 11,598 lb/3rd calendar quarter, 11,598 lb/4th calendar quarter, and 23.01 tons per year. [District Rule 3.4]

13. The combined PM_{10} emissions from all landfill gas combustion equipment being served by this collection system shall not exceed 100.0 lb per day, 9,011 lb/1st calendar quarter, 9,111 lb/2nd calendar quarter, 9,211 lb/3rd calendar quarter, 9,211 lb/4th calendar quarter, and 18.27 tons per year. [District Rule 3.4]

14. The combined landfill gas usage for all combustion equipment being served by this collection system shall not exceed 2.732 million standard cubic feet per day, 245.9 million cubic feet /1st calendar quarter, 248.6 million cubic feet /2nd calendar quarter, 251.3 million cubic feet /3rd calendar quarter, 251.3 million cubic feet /4th calendar quarter, and 997.1 million cubic feet per year. [District Rule 3.4]

15. The Permit Holder shall not discharge into the atmosphere from any single source of emissions whatsoever, any air contaminant for a period or periods aggregating more than three (3) minutes in any one (1) hour which is:
    a. As dark or darker in shade than No. 1 on the Ringelmann Chart; or
    b. Greater than 20% opacity. [District Rule 3.4]

16. The Permit Holder shall operate the enclosed flare with a minimum combustion zone residence time of one (1) second, and shall equip the flare with automatic temperature controls designed to control the average minimum temperature at or above a minimum temperature of 1400 °F. The enclosed flare shall also be equipped with an automatic shutoff gas valve and an automatic re-start system. [District Rule 3.4]

17. Only landfill gas shall be burned in the flare. No supplemental fuel may be burned in the flare, excluding pilot gas. [District Rule 3.4]

18. The number and types of components used by the operation shall match the equipment listed in the EQUIPMENT INVENTORY section of the permit. The Permit Holder shall maintain a complete list of all associated gas collection equipment serving the conventional portions of the landfill, which includes a description of each system component. Any wells, piping, or valves installed in the non-conventional portions of the landfill are not covered under this permit. This list shall be kept onsite and shall be made available to the District upon request. [District Rule 3.4]

19. All landfill gas gathered by this gas collection system shall be collected using only an approved blower with a maximum rating of 1,897 SCFM. [District Rule 3.4]

20. A non-resettable, totalizing gaseous fuel flow meter shall be installed and utilized to measure the quantity (in standard cubic feet) of landfill gas collected and delivered to the site by system=s collection blower. The meter shall be accurate to plus or minus five (5) percent and shall be calibrated at least once every twelve (12) months. [District Rule 3.4]

21. A non-resettable, totalizing gaseous fuel flow meter shall be installed and utilized to measure the quantity (in standard cubic feet) of landfill gas combusted in the flare. The meter shall be accurate to plus or minus five (5) percent and shall be calibrated at least once every twelve (12) months. [District Rule 3.4]

22. The Permit Holder shall install and maintain such facilities on the flare stack as are necessary for sampling and testing purposes. The number, size, and location of sampling ports shall be in accordance with Air Resources Board Test Method 1. The location and access to the sampling platform shall be in accordance with the General Industry Safety Orders of the State of California. [District Rule 3.4]

23. The particulate matter (as PM_{10}) emission concentration for the enclosed flare shall not exceed 0.0035 gr/dscf at standard conditions. [District Rule 3.4]

24. The hydrogen sulfide (H_2S) content of the landfill gas combusted in the enclosed flare shall not exceed 162 ppmv. [District Rule 3.4]

25. The Permit Holder shall analyze the fuel=s higher heating value (wet basis) and sulfur content (as H_2S) at least once every twelve (12) consecutive month period. [District Rule 3.4]

26. The emission concentrations for the flare shall not exceed the following:
    a. VOC (measured as hexane): 0.0114 lb/MMBTU;
    b. CO: 0.370 lb/MMBTU; and
    c. NO_X (as NO_2): 0.060 lb/MMBTU. [District Rule 3.4]

27. The Permit Holder shall perform a source test at least once every twelve (12) months in order to demonstrate compliance with the VOC, CO, and NO_X emission limits. [District Rule 3.4]

28. Source testing shall be conducted using the following test methods:
    a. VOC - EPA Method 18, or other District approved methods;
    b. CO - EPA Method 10 or CARB Method 100;
    c. NO_X (as NO_2) - EPA Method 7E or CARB Method 100; and
    d. Stack gas oxygen - EPA Method 3A or CARB Method 100. [District Rule 3.4]

29. The District must be notified prior to any emissions testing event and a protocol must be submitted for approval thirty (30) days prior to testing. The results of an emissions testing event shall be submitted to the District within sixty (60) days of the test date. The protocol and report shall be mailed to the attention of the Supervising Air Quality Engineer. [District Rule 3.4]

30. The Permit Holder shall maintain a written log of all maintenance work performed that requires the shutdown of the gas collection system. The log shall include a description of work, the date work was performed, and the amount of time needed to complete the maintenance work. Emissions of landfill gas to the atmosphere shall be minimized during each shutdown. [District Rule 3.4]

31. The Permit Holder shall operate the gas collection system in a manner which maximizes the amount of landfill gas extracted from the landfill, while preventing overdraw that can cause a fire or the damage of the gas collection system. [District Rule 3.4]

32. Except for active disposal areas, or areas undergoing maintenance or repair, or areas not served by the gas collection system, the Permit Holder shall operate the gas collection system in such a manner that the surface emissions testing of the landfill demonstrates the concentrations of total organic compounds (measured as methane) do not exceed 500 ppmv at any point on the surface of the solid waste disposal site or along the gas transfer path of the gas collection system. [District Rule 3.4]

33. The Permit Holder shall comply with all applicable standards, criteria and requirements of Section 60.752(b) of 40 CFR Part 60, Subpart WWW, Standards of Performance for Municipal Solid Waste Landfills, upon determination by the District that the Yolo County Central Landfill=s uncontrolled non-methane organic compounds (NMOC) emission rate exceeds 50 megagrams per year. [District Rule 3.4]

34. The Permit Holder shall monitor and record on a daily basis the following quantities of landfill gas:
    a. Measured amount of landfill gas collected by the system=s collection blower (in standard cubic feet);

b. Measured amount of landfill gas combusted in the flare (in standard cubic feet); and

c. Calculated amount of landfill gas combusted in the flare (in British thermal units). [District Rule 3.4]

35. The Permit Holder shall calculate and record the actual combined quarterly and annual VOC, CO, NO_X, SO_X (converted from the inlet H_2S concentration using mass balance), and PM_{10} emissions from all landfill gas combustion equipment served by this collection system. The calculations shall use each emissions unit=s actual fuel usage and either:

a. For pollutants with on-going source testing requirements, the emission factors from the most recent source test submitted to, and approved in writing by, the District; or

b. For pollutants without on-going testing requirements, the established emission factor for the emissions unit used in the most recent emission evaluation. [District Rule 3.4]

36. The Permit Holder shall maintain all records on site for a period of five (5) years from the date of entry and these records shall be made readily available to District personnel upon request. [District Rule 3.8, '302.6(b)]

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26, Part 4, Chapter 3, of the Health & Safety Codes of the State of California or the Rules and Regulations of the Yolo-Solano Air Quality Management District.

INTERIM AIR POLLUTION CONTROL OFFICER

By: Paul Hensleigh

Date of Issuance: April 6, 2023

ANNIVERSARY DATE: April 14

SB 04/06/2023

EXHIBIT H
PAYMENT BOND

BOND NO. _____

KNOW ALL PERSONS BY THESE PRESENTS:

WHEREAS, the County of Yolo, State of California, ("Owner") has awarded to _____ ("Contractor/Principal") a contract (County Agreement No._____, dated _____, YEAR, referred to as the "Agreement") for the work described as _____. The Agreement is incorporated by this reference into this Payment Bond ("Bond"); and

WHEREAS, Contractor/Principal is required to furnish a bond in connection with the Agreement and pursuant to California Civil Code section 9550;

NOW, THEREFORE, we, _____ _____ the undersigned Contractor/Principal, and _____ _, ("Surety"), a corporation organized and existing under the laws of the State of _____, and duly authorized to transact business under the laws of the State of California, as Surety, are held and firmly bound unto the County of Yolo, and to any and all persons, companies, or corporations entitled by law to file stop payment notices under California Civil Code Section 9100, or any person, company, or corporation entitled to make a claim on this bond, in the sum of _____DOLLARS ($_____ __), which such sum being not less than one hundred percent (100%) of the total amount payable by the Owner under the terms of the Agreement, for which payment will and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that if Contractor/Principal, its heirs, executors, administrators, successors, or assigns, or subcontractor, shall fail to pay any person or persons named in Civil Code section 9100; or fail to pay for any materials, provisions, or other supplies, used in, upon, for, or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or for amounts due under the Unemployment Insurance Code, with respect to work or labor thereon of any kind; or shall fail to deduct, withhold, and pay over to the Employment Development Department, any amounts required to be deducted, withheld, and paid over by Unemployment Insurance Code Section 13020 with respect to work and labor thereon of any kind, then Surety will pay for the same, in an amount not exceeding the amount herein above set forth, and in the event suit is brought upon this bond, also will pay such reasonable attorneys' fees as shall be fixed by the court, awarded and taxed as provided in California Civil Code Section 9550 et seq.

It is further stipulated and agreed that the Surety of this bond shall not be exonerated or released from the obligation of the bond by any change, extension of time for performance, addition, alteration or modification in, to, or of any contract, plans, or specifications, or agreement pertaining or relating to any scheme or work of improvement herein above described; or pertaining or relating to the furnishing of labor, materials, or equipment therefor; nor by any change or modification of any terms of payment or extension of time for payment pertaining or relating to any scheme or work of improvement herein above described; nor by any rescission or attempted rescission of the contract, agreement or bond; nor by any conditions precedent or subsequent in the bond attempting to limit the right of recovery of claimants

otherwise entitled to recover under any such contract or agreement or under the bond; nor by any fraud practiced by any person other than the claimant seeking to recover on the bond; and that this bond be construed most strongly against the Surety and in favor of all persons for whose benefit such bond is given; and under no circumstances shall the Surety be released from liability to those for whose benefit such bond has been given, by reason of any breach of contract between the Owner and Contractor/Principal or on the part of any obligee named in such bond; that the sole condition of recovery shall be that the claimant is a person described in California Civil Code section 9100, and who has not been paid the full amount of his or her claim; and that the Surety does hereby waive notice of any such change, extension of time, addition, alteration or modification herein mentioned, including but not limited to the provisions of sections 2819 and 2845 of the California Civil Code.

Any notice to Surety may be given in the manner specified in the Agreement and delivered or transmitted to Surety as follows:

Attn: _____
Address: _____
City/State/Zip: _____
Phone: _____
Fax: _____
Email: _____

IN WITNESS WHEREOF, two identical counterparts of this Bond, each of which shall for all purposes be deemed an original thereof, have been duly executed by Contractor/Principal and Surety above named, on the ____ day of _____, 20__.

EXHIBIT I

PERFORMANCE BOND

KNOW ALL PERSONS BY THESE PRESENTS:

THAT WHEREAS, the County of Yolo, organized and operating under the laws of the State of California, (hereinafter referred to as the "County") has awarded to _____, (hereinafter referred to as the "Contractor") an agreement for **Contract No.**_____, (hereinafter referred to as the "Project").

WHEREAS, the work to be performed by the Contractor is more particularly set forth in the Contract for the Project dated _____, (hereinafter referred to as "Contract Documents"), the terms and conditions of which are expressly incorporated herein by reference; and

WHEREAS, the Contractor is required by said Contract Documents to perform the terms thereof and to furnish a bond for the faithful performance of said Contract Documents.

NOW, THEREFORE, we, _____, the undersigned Contractor and _____ as Surety, a corporation organized and duly authorized to transact business under the laws of the State of California, are held and firmly bound unto the County in the sum of _____ DOLLARS, ($_____), said sum being not less than one hundred percent (100%) of the total amount of the Contract, for which amount well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH, that, if the Contractor, his or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by, and well and truly keep and perform the covenants, conditions and agreements in the Contract Documents and any alteration thereof made as therein provided, on its part, to be kept and performed at the time and in the manner therein specified, and in all respects according to their intent and meaning; and shall faithfully fulfill all obligations including the one (1) year guarantee of all materials and workmanship; and shall indemnify and save harmless the County, its officials, officers, employees, and authorized volunteers, as stipulated in said Contract Documents, then this obligation shall become null and void; otherwise it shall be and remain in full force and effect.

As a part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees including reasonable attorney's fees, incurred by the County in enforcing such obligation.

As a condition precedent to the satisfactory completion of the Contract Documents, unless otherwise provided for in the Contract Documents, the above obligation shall hold good for a period of one (1) year after the acceptance of the work by the County, during which time if Contractor shall fail to make full, complete, and satisfactory repair and replacements and totally

protect the County from loss or damage resulting from or caused by defective materials or faulty workmanship. The obligations of Surety hereunder shall continue so long as any obligation of Contractor remains. Nothing herein shall limit the County's rights or the Contractor or Surety's obligations under the Contract, law or equity, including, but not limited to, California Code of Civil Procedure Section 337.15.

Whenever Contractor shall be, and is declared by the County to be, in default under the Contract Documents, the Surety shall remedy the default pursuant to the Contract Documents, or shall promptly, at the County's option:

i. Take over and complete the Project in accordance with all terms and conditions in the Contract Documents; or

ii. Obtain a bid or bids for completing the Project in accordance with all terms and conditions in the Contract Documents and upon determination by Surety of the lowest responsive and responsible bidder, arrange for a contract between such bidder, the Surety and the County, and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the County under the Contract and any modification thereto, less any amount previously paid by the County to the Contractor and any other set offs pursuant to the Contract Documents.

iii. Permit the County to complete the Project in any manner consistent with California law and make available as work progresses sufficient funds to pay the cost of completion of the Project, less the balance of the contract price, including other costs and damages for which Surety may be liable. The term "balance of the contract price" as used in this paragraph shall mean the total amount payable to Contractor by the County under the Contract and any modification thereto, less any amount previously paid by the County to the Contractor and any other set offs pursuant to the Contract Documents.

Surety expressly agrees that the County may reject any contractor or subcontractor which may be proposed by Surety in fulfillment of its obligations in the event of default by the Contractor.

Surety shall not utilize Contractor in completing the Project nor shall Surety accept a bid from Contractor for completion of the Project if the County, when declaring the Contractor in default, notifies Surety of the County's objection to Contractor's further participation in the completion of the Project.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project to be performed thereunder shall in any way affect its obligations on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Contract Documents or to the Project.

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 10.
Board of Supervisors **Natural Resources**

Meeting Date:	06/06/2023
Brief Title:	Approval of Rodgers Property Conservation Easement
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Elisa Sabatini, Manager of Natural Resources, Department of Community Services, x5773
Supervisorial District Impact:	Districts 3 & 5

Subject
Approve and authorize the Chair to sign the Conservation Easement with the Yolo Habitat Conservancy related to the County-owned Rodgers Property along Cache Creek; and direct staff to proceed with the steps necessary to enroll the Rodgers Property into the Yolo Habitat Conservation Plan and Natural Community Conservation Plan ("Yolo HCP/NCCP") reserve system. (No general fund impact) (Lindbo/Sabatini)

Recommended Action

A. Approve and authorize the Chair to sign the Conservation Easement with the Yolo Habitat Conservancy related to the County-owned Rodgers Property along Cache Creek; and

B. Direct staff to proceed with the steps necessary to enroll the Rodgers Property in the Yolo HCP/NCCP reserve system.

Strategic Plan Goal(s)

Sustainable Environment

Reason for Recommended Action/Background
On December 2, 2014, the Yolo County Board of Supervisors adopted Resolution No. 14-126 supporting a conservation partnership with the Yolo HCP/NCCP Joint Powers Agency ("Yolo Habitat Conservancy") (Minute Order No. 14-166). The partnership envisioned easements on between 250 and 660 acres of County-owned land within the area covered by the Cache Creek Area Plan ("CCAP"). A total of 154.4 acres of County-owned property within the CCAP has been placed under Yolo HCP/NCCP conservation easements to-date: the 38.9-acre Correll Property (APN #025-340-036), and the 115.5-acre Granite Woodland Reiff Property (APN #025-350-035).

The 30-acre Rodgers Property (APN #025-350-025) is within the CCAP, located south of Cache Creek at the northern terminus of County Road 96, approximately 1.85 miles northwest of the City of Woodland (Att. A). The property was previously mined for gravel by Teichert before being restored to native habitat and open space. The property was then transferred to the County on October 4, 2004, pursuant to the Teichert Woodland Development Agreement. The site contains valley foothill riparian and grasslands habitat that support the conservation of Yolo HCP/NCCP covered species.

The Rodgers Property Conservation Easement is based on the Yolo HCP/NCCP conservation easement template. County staff have coordinated with the Yolo Habitat Conservancy to ensure that the proposed conservation easement is consistent with the biological goals and objectives of the CCAP and the HCP/NCCP, while also being compatible with the goals and objectives of the Cache Creek Parkway Plan which will establish an integrated system of trails and recreational areas along Lower Cache Creek. The conservation easement has been approved by the Yolo Habitat Conservancy, California Department of Fish and Wildlife, and U.S. Fish and Wildlife Service. As the Easement Holder, the Yolo Habitat Conservancy will pay for the on-going monitoring and habitat management costs associated with the conservation easement.

At this time, Staff is recommending that the Board of Supervisors approve the Rodgers Property Conservation Easement (Att. B). The proposed conservation easement will count towards the fulfillment of the conservation commitments of the Yolo HCP/NCCP, and support the partnership between the County and the Yolo Habitat Conservancy as described in Resolution No. 14-126.

Collaborations (including Board advisory groups and external partner agencies)
Natural Resources Division staff collaborated with the Office of County Counsel and representatives from the Yolo Habitat Conservancy on this item.

DEED OF CONSERVATION EASEMENT AND PERMANENT RESTRICTIONS ON USE

THIS DEED OF CONSERVATION EASEMENT AND PERMANENT RESTRICTIONS ON USE (the **"Conservation Easement"**) shall be effective upon the date it is recorded with the Yolo County Recorder and is dated for reference purposes only as of this _____ day of _____, 2023, by County of Yolo (**"Landowner"**), in favor of the Yolo County Natural Community Conservation Plan Joint Powers Agency, a California Joint Powers Agency (**"Easement Holder"** or **"Yolo Habitat Conservancy"**). Landowner and Easement Holder are also referred to herein individually as a **"Party"** and collectively as the **"Parties".**

RECITALS

A. Landowner is the owner in fee simple of certain real property containing 30.0 acres, located in the County of Yolo, State of California, designated Assessor's Parcel Number(s) 025-350-025. Said real property is more particularly described and depicted in **Exhibit A** attached hereto and incorporated herein by this reference (the **"Easement Area"**).

B. The Easement Area possesses wildlife and habitat values of great importance to Easement Holder, the people of the State of California and the people of the United States. The Easement Area will provide high quality habitat for valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*), western pond turtle (*Actinemys marmorata*), Swainson's hawk (*Buteo swainsoni*), and white-tailed kite (*Elanus leucurus*) and contains riverine, grassland, and valley

foothill riparian habitat which contain suitable nest tree sites and mature elderberry shrubs. Individually and collectively, these wildlife and habitat values comprise the "**Conservation Values**" of the Easement Area. The status of the Conservation Values, including the open space uses that support these Conservation Values and compatible recreational uses such as hiking, birdwatching, and other forms of passive recreation by the general public ("Compatible Recreational Uses"), as well as other uses and improvements within the Easement Area at the time of the execution of the Conservation Easement are described in the **"Baseline Documentation Report."** Both Parties acknowledge, as described in **Exhibit B** attached hereto and incorporated herein by reference, that each has received a copy of the Baseline Documentation Report, and that it accurately represents the Easement Area as of the date of the Conservation Easement.

C. This Conservation Easement is being executed and delivered to satisfy certain habitat conservation requirements set forth in the following documents (collectively, the **"Yolo HCP/NCCP Instruments"**):

a. The Yolo Habitat Conservation Plan/Natural Community Conservation Plan (**"Yolo HCP/NCCP"**), dated April 2018, prepared by the County of Yolo (**"County"**), City of Davis (**"Davis"**), City of West Sacramento (**"West Sacramento"**), City of Winters (**"Winters"**), and City of Woodland (**"Woodland"**), and approved by the United States Fish and Wildlife Service (**"USFWS"**) under Section 10 of the federal Endangered Species Act of 1973 (16 U.S.C. Section 1531 *et seq.*, as it may be amended from time to time) (**"ESA"**), and by the California Department of Fish and Wildlife (**"CDFW"**) under the California Natural Community Conservation Planning Act (California Fish and Game Code Section 2800 *et seq.*, as it may be amended from time to time) (**"NCCPA"**); and

b. Implementing Agreement for the Yolo HCP/NCCP (the **"Implementing Agreement"**), dated January 10, 2019, by and among USFWS and CDFW (collectively, the **"Wildlife Agencies"**), the Yolo County Habitat/Natural Community Conservation Plan Joint Powers Agency (**"Yolo Habitat Conservancy"**), County, Davis, West Sacramento, Winters, and Woodland (collectively, the Yolo Habitat Conservancy, County, Davis, West Sacramento, Winters, and Woodland, are referred to herein as **"Permittees"**); and

c. The federal incidental take permit issued by USFWS to Permittees for the Yolo HCP/NCCP pursuant to Section 10 of ESA; and

d. The state NCCP permit issued by CDFW to Permittees for the Yolo HCP/NCCP pursuant to the NCCPA.

D. The State of California recognizes the public importance and validity of conservation easements by enactment of California Civil Code Section 815 *et seq.*

E. CDFW has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants and the habitat necessary for biologically sustainable populations of those species pursuant to Fish and Game Code Section 1802. CDFW is authorized to hold easements for

these purposes pursuant to Civil Code Section 815.3, Fish and Game Code Section 1348, and other provisions of California law.

F. USFWS, an agency within the United States Department of the Interior, has jurisdiction over the conservation, protection, restoration, and management of fish, wildlife, native plants, and the habitat necessary for biologically sustainable populations of these species within the United States pursuant to the Endangered Species Act, 16 U.S.C. section 1531 et seq. ("**ESA**"), the Fish and Wildlife Coordination Act, 16 U.S.C. sections 661-666c, the Fish and Wildlife Act of 1956, 16 U.S.C. section 742(f) et seq., and other provisions of federal law.

G. The Easement Holder is a California joint powers agency, and authorized to hold conservation easements pursuant to, among other provisions of law, California Civil Code Section 815.3.

H. The Yolo Habitat Conservancy serves as the **"Implementing Entity"** of the Yolo HCP/NCCP, and as such, is responsible for overseeing implementation of the Yolo HCP/NCCP Instruments, including carrying out planning and design, habitat restoration, monitoring, adaptive management programs, and periodic coordination with the Wildlife Agencies. The Yolo HCP/NCCP Instruments confer separate rights and obligations on the Implementing Entity that will survive any future transfer of the Conservation Easement.

I. Following recordation of this Conservation Easement, the Easement Area will be incorporated into the Reserve System (as such term is defined in the Yolo HCP/NCCP) (**"Reserve System"**) and will count toward the land acquisition requirements set forth in the Yolo HCP/NCCP.

J. The Yolo Habitat Conservancy has developed a management plan, known as "Rodgers Property Site-Specific Management Plan," that applies to the Easement Area (the **"Management Plan"**) and is incorporated herein by reference. The Management Plan has been developed in accordance with the applicable requirements of the Yolo HCP/NCCP Instruments and the Lower Cache Creek Reserve Unit Management Plan. The Management Plan also includes provisions that allow for open space use and Compatible Recreational Uses of the Easement Area to the fullest extent such uses are compatible with the preservation of its Conservation Values.

Landowner and Easement Holder recognize that changes (e.g., in technologies, weather cycles, natural resource management technologies, conservation practices) may dictate changes in the management of the Easement Area, consistent with the purposes of this Conservation Easement and the Yolo HCP/NCCP Instruments. The Management Plan may be revised from time to time only with the written approval of both the Landowner and Easement Holder, so long as the revisions are consistent with the requirements of the Yolo HCP/NCCP Instruments and the Lower Cache Creek Reserve Unit Management Plan. The final, approved copy of the Management Plan, and any amendments thereto approved by the Parties, shall be kept on file at the Yolo Habitat Conservancy.

AGREEMENT

NOW, THEREFORE, in consideration of the above and mutual covenants, terms, conditions and restrictions contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and pursuant to the laws of the State of California, including California Civil Code Section 815 *et seq*., Landowner hereby voluntarily grants and conveys to Easement Holder, its successors and assigns, a conservation easement forever in, on, over and across the Easement Area, subject to the terms and conditions set forth herein, restricting in perpetuity the uses which may be made of the Easement Area, and the Parties agree as follows:

1. **Purposes**. The purposes of this Conservation Easement are to ensure the Easement Area will be retained forever in its natural, restored, enhanced, or otherwise functional habitat condition as contemplated by the Yolo HCP/NCCP and the site-specific Management Plan, and to prevent any use of the Easement Area that will impair or interfere with the Conservation Values of the Easement Area. Landowner intends that this Conservation Easement will confine the use of the Easement Area to such activities that are consistent with the purposes set forth herein, including Compatible Recreational Uses. The Parties agree that the protection of the Conservation Values may be achieved by maintaining the Easement Area in its natural or existing condition (not precluding future enhancement or restoration). The establishment of a trail and other minor amenities (e.g., signage, occasional benches) that support Compatible Recreational Uses within the Easement Area are allowed provided that these amenities do not interfere with the Easement Area's covered species and their associated functional habitats as described in the Baseline Documentation Report and are consistent with the terms and conditions of this Conservation Easement and the Management Plan.

2. **Reserved Rights.** Landowner reserves to itself, and to its personal representatives, heirs, successors, and assigns, all rights accruing from Landowner's ownership of the Easement Area, including the right to establish a trail and other minor amenities (e.g., signage, occasional benches) that support Compatible Recreational Uses within the Easement Area, so long as such activities are consistent with the purposes of this Conservation Easement, as set forth above in Section 1, the Management Plan, and do not impair the Conservation Values.

3. **Rights of Easement Holder**. To accomplish the purposes of this Conservation Easement, Landowner hereby grants and conveys the following rights to Easement Holder:

(a) To preserve and protect the Conservation Values of the Easement Area**;**

(b) To restore or enhance the Conservation Values with the consent of the Landowner in accordance with the Management Plan and the terms and conditions of this Conservation Easement;

(c) To enter upon the Easement Area, no less than once annually, at reasonable times to monitor compliance with and otherwise enforce the terms of this Conservation Easement or to carry out, at Easement Holder's sole cost and expense, scientific research and management and monitoring requirements applicable to the Easement Area that are set forth in the Management Plan and in Yolo HCP/NCCP Chapters 6 and 7, provided that Easement Holder shall not unreasonably interfere with Landowner's allowed uses and quiet

enjoyment of the Easement Area. Except where there is an imminent threat to the Easement Area or its Conservation Values, Easement Holder and its employees, contractors or agents will only enter the Easement Area at reasonable times and with at least forty-eight (48) hours advance notice to Landowner in writing or by phone. The Landowner may waive these requirements in whole or in part by written notice to Easement Holder;

(d) To prevent any activity on or use of the Easement Area that is inconsistent with the purposes of this Conservation Easement and to require the restoration of such areas or features of the Easement Area that may be damaged by any act, failure to act, or any use or activity that is inconsistent with the purposes of this Conservation Easement;

(e) To require that all mineral, air, and water rights that Easement Holder deems necessary to preserve and protect the Conservation Values of the Easement Area shall remain a part of and be put to beneficial use upon the Easement Area, consistent with the purposes of this Conservation Easement; and

(f) All present and future development rights and wind power rights appurtenant to, allocated, implied, reserved or inherent in the Easement Area; such rights are hereby terminated and extinguished, and may not be used on or transferred to any portion of the Property, nor any other property adjacent or otherwise.

4. **Prohibited Uses**. Any activity on or use of the Easement Area that adversely affects the purpose of this Conservation Easement, as set forth in Section 1, above, is prohibited except as may be otherwise expressly provided in this Conservation Easement or in the Management Plan. Without limiting the generality of the foregoing, the Landowner, Landowner's personal representatives, heirs, successors, assigns, employees, agents, lessees, licensees and invitees are expressly prohibited from doing or allowing any of the following uses and activities on the Easement Area, unless, and then only to the extent that, a generally prohibited activity set forth below is a management practice, lawful and routine agricultural practice, or other activity that does not impair the Conservation Values of the Easement Area and is allowed in the Management Plan.

(a) Unseasonal watering activities that promote the establishment of invasive species that act as predators of covered species, impair the habitat quality of the site for covered species, or otherwise impair the Conservation Values of the site;

(b) Use of fertilizers, pesticides, biocides, herbicides or other chemicals except as allowable under applicable law and as provided in the Management Plan in connection with activities or uses that are authorized or reserved hereunder. Under no circumstance are rodenticides allowed to be used within the Easement Area unless specifically authorized in writing by the Easement Holder and the Wildlife Agencies due to unforeseen or exceptional circumstance, such as proclamation of a local state of emergency;

(c) Use of heavy equipment, off-road vehicles, or other motorized vehicles, except on existing roadways or use of equipment or vehicles as required to conduct any management practice or other activity as provided for in the Management Plan. The long-term storage of wrecked, dismantled, or inoperative nonagricultural vehicles and industrial or commercial equipment is prohibited;

(d) Except as set forth in the Management Plan, any construction, reconstruction, relocation or placement of any road, building, billboard, or signs (excluding small directional and interpretative signs on any hiking trails or as needed to define sensitive habitat areas), or any other structure or improvement of any kind, or altering the surface or general topography of the Easement Area without written approval by the Easement Holder and Wildlife Agencies;

(e) Vineyards, orchards, nurseries, intensive livestock use (e.g., dairy, feedlot), and other agricultural uses except as allowed in the Management Plan;

(f) Commercial, industrial, residential, or other institutional uses;

(g) Depositing or accumulation of soil, trash, ashes, refuse, waste, bio-solids or any other materials, except in connection with lawful uses that do not impair the Conservation Values of the Easement Area and are allowed in the Management Plan;

(h) Planting, introduction, or dispersal of invasive plant or animal species;

(i) Filling, dumping, excavating, draining, dredging, mining, drilling, removing, or exploring for or extracting minerals, loam, soil, sands, gravel, rocks, or other material on or below the surface of the Easement Area, or granting or authorizing any surface entry for any exploring for or extracting minerals. This provision is not intended to prohibit lawful uses that are associated with site management activities, do not impair the Conservation Values of the Easement Area, and are allowed in the Management Plan;

(j) Removing, destroying, or cutting of trees, shrubs, or other vegetation except as allowed in the Management Plan;

(k) Manipulating, impounding, or altering any water course, body of water, or water circulation on the Easement Area, and activities or uses detrimental to water quality, including but not limited to degradation or pollution of any surface or subsurface waters, except as needed to conduct a management practice or other activity that does not impair the Conservation Values of the Easement Area and is allowed in the Management Plan; and

(l) Without the prior written consent of Easement Holder, which Easement Holder may reasonably withhold or condition, transferring, encumbering, selling, leasing or otherwise separating the mineral, air or water rights for the

Easement Area; changing the place or purpose of use of the water rights; abandoning or allowing the abandonment of, by action or inaction, any water or water rights, ditch or ditch rights, spring rights, reservoir or storage rights, wells, ground water rights or other rights in and to the use of water historically used on or otherwise appurtenant to the Easement Area, including but not limited to: (i) riparian water rights; (ii) appropriative water rights; (iii) rights to waters which are secured under contract with any irrigation or water district, to the extent such waters are customarily applied to the Easement Area; and (iv) any water from wells that are in existence or may be constructed in the future on the Easement Area. In determining whether to consent to a short-term transfer (i.e. a transfer of water from the Property for a period of not more than one year as defined by California law) or other change relating to water rights under this subsection (k), the Easement Holder shall evaluate whether the transfer will, during the transfer period, preclude the Landowner from maintaining the Conservation Values, for the covered species that the Easement Area is managed to benefit at the time of the proposed transfer. This determination shall be subject to approval by the Wildlife Agencies and the Yolo Habitat Conservancy.

(m) All Subdivisions, including but not limited to the Subdivision of rangeland, open space, and other types of land not used for the active cultivation of crops. The fee transfer of less than the entire Easement Area is also prohibited to the extent such a transfer would constitute a subdivision of land under California law, including but not limited to the Subdivision Map Act.

(n) Any activity or use that may violate or fail to comply with relevant federal, state, or local laws, regulations, or policies applicable to Landowner, the Easement Area, or the activity or use in question.

5. **Unlawful Entry.** Landowner shall undertake all reasonable actions to prevent the unlawful entry and trespass on the Easement Area and shall take reasonable steps to prevent uses or activities may degrade or harm the Conservation Values or are otherwise inconsistent with the purposes of this Conservation Easement, acknowledging that public access for Compatible Recreational Uses is permitted on the Easement Area and does not constitute unlawful entry or trespass. This duty extends to activities undertaken by members of the public that are outside the scope of "Compatible Recreational Uses" as set forth herein (and as may be further described in the Management Plan). Reasonable actions to prevent trespass and/or incompatible activities may include, but are not limited to, posting "No Trespassing" or "Stay on Improved Trails" signs, constructing barriers, gates, and/or trail demarcations, and good faith efforts to exclude any person who is not a designated representative of Landowner, Easement Holder, member of the public engaged in Compatible Recreational Uses or others with lawful access rights. In addition, Landowner shall undertake all necessary actions to perfect the rights of Easement Holder under Section 3 of this Conservation Easement.

6. **Easement Holder's Remedies.** If Easement Holder or any Third-Party Beneficiary (as defined in **Section 6(d)** below) determines there is a violation of the terms of this Conservation Easement or that such violation is threatened, written notice of such violation and a demand for corrective action sufficient to cure the violation shall be given to Landowner, with a copy provided

to Easement Holder and each Third-Party Beneficiary. The notice of violation shall specify the measures the Landowner must take to cure the violation. If Landowner fails to cure the violation within thirty (30) days after receipt of written notice and demand from Easement Holder or any Third-Party Beneficiary, as applicable; or if the cure reasonably requires more than thirty (30) days to complete and Landowner fails to begin the cure within such thirty (30) day period; or Landowner fails to continue diligently to complete the cure, Easement Holder or any Third-Party Beneficiary may bring an action at law or in equity in a court of competent jurisdiction to enforce the terms of this Conservation Easement, to recover any damages to which Easement Holder and the Third-Party Beneficiaries may be entitled for violation of the terms of this Conservation Easement or for any injury to the Conservation Values, to enjoin the violation, *ex parte* as necessary, by temporary or permanent injunction without the necessity of proving either actual damages or the inadequacy of otherwise available legal remedies, or for legal or other equitable relief, including, but not limited to, the restoration of the Easement Area to the condition in which it existed prior to any such violation or injury, or to otherwise enforce this Conservation Easement. Without limiting Landowner's liability therefor, any damages recovered may be applied to the cost of undertaking any corrective action on the Easement Area at the election of the party receiving such damages.

If Easement Holder in its sole discretion, determines that circumstances require immediate action to prevent or mitigate damage to the Conservation Values, Easement Holder and/or any Third-Party Beneficiary may pursue its remedies under this section without prior notice to Landowner or without waiting for the period provided for cure to expire. The rights of Easement Holder and the Third-Party Beneficiaries under this section apply equally to actual or threatened violations of the terms of this Conservation Easement. Landowner agrees that Easement Holder's and Third-Party Beneficiaries' remedies at law for any violation of the terms of this Conservation Easement are inadequate and that Easement Holder and/or any Third-Party Beneficiary shall be entitled to the injunctive relief described in this section, both prohibitive and mandatory, in addition to such other relief to which Easement Holder and the Third-Party Beneficiaries may be entitled, including specific performance of the terms of this Conservation Easement, without the necessity of proving either actual damages or the inadequacy of otherwise available legal remedies. Remedies described in this section shall be cumulative and shall be in addition to all remedies now or hereafter existing at law or in equity, including but not limited to, the remedies set forth in California Civil Code Section 815, *et seq*. The failure of Easement Holder or any Third-Party Beneficiary to discover a violation or to take immediate legal action in response to such action shall not bar such party from taking legal action at a later time.

If at any time in the future Landowner or any subsequent transferee uses or threatens to use the Property for purposes inconsistent with this Conservation Easement then, despite the provisions of Civil Code section 815.7, the California Attorney General and the Third-Party Beneficiaries each has standing as an interested party in any proceeding affecting this Conservation Easement.

(a) **Costs of Enforcement.** Any reasonable costs incurred by the Easement Holder or any Third-Party Beneficiary, where it is the prevailing party, in enforcing the terms of this Conservation Easement against the Landowner, including, but not limited to, costs of suit and attorneys' and experts' fees, and any costs of restoration necessitated by Landowner's negligence or breach of this Conservation Easement shall be borne by Landowner. In any action where an agency of the United States is a party, the right to recover fees and costs shall be governed by federal law.

(b) **Enforcement Discretion.** Enforcement of the terms of this Conservation Easement against Landowner shall be at the respective discretion of Easement Holder and each of the Third-Party Beneficiaries, and any forbearance by any such party to exercise its rights under this Conservation Easement in the event of any breach of any term of this Conservation Easement shall not be deemed or construed to be a waiver by such party of such term or of any subsequent breach of the same or any other term of this Conservation Easement or of any of such party's rights under this Conservation Easement. No delay or omission by Easement Holder or any Third-Party Beneficiary in the exercise of any right or remedy upon any breach shall impair such right or remedy or be construed as a waiver.

(c) **Acts Beyond Landowner's Control.** Nothing contained in this Conservation Easement shall be construed to entitle Easement Holder or any Third-Party Beneficiary to bring any action against Landowner for any injury to or change in the Property resulting from (i) any natural cause beyond Landowner 's control, including, without limitation, fire not caused by Landowner, flood, storm, and earth movement, or any prudent action taken by Landowner under emergency conditions to prevent, abate, or mitigate significant injury to the Property resulting from such causes; or (ii) acts by Easement Holder or any Third-Party Beneficiary or employees of Easement Holder or any Third-Party Beneficiary; or (iii) acts by persons that entered the Easement Area unlawfully or by trespass whose activities degrade or harm the Conservation Values of the Easement Area or whose activities are otherwise inconsistent with this Conservation Easement where Landowner has undertaken all reasonable actions to prevent such activities or (iii) acts by persons that entered the Easement Area lawfully or unlawfully whose activities degrade or harm the Conservation Values of the Easement Area or whose activities are otherwise inconsistent with this Conservation Easement and/or the Management Plan where Landowner has undertaken all reasonable actions to discourage or prevent such activities.

(d) **Third-Party Beneficiary Rights**. The parties intend for Yolo Habitat Conservancy (during any such period, if any, that Yolo Habitat Conservancy does not also constitute Easement Holder), USFWS and CDFW (collectively, **"Third-Party Beneficiaries"**) to be third-party beneficiaries of this Conservation Easement. All rights and remedies conveyed to Easement Holder under this Conservation Easement shall extend to and are enforceable by each of the Third-Party Beneficiaries in accordance with the terms hereof. Landowner and Easement Holder acknowledge that, as Third-Party Beneficiaries of this Conservation Easement, the Third-Party Beneficiaries shall have the same rights of access to the Easement Area granted to Easement Holder in **Section 3** above, and with rights to enforce all of the provisions of this Conservation Easement. If at any time in the future Landowner uses, allows the use, or threatens to use or allow use of, the Easement Area for any purpose that is inconsistent with or in violation of this Conservation Easement then, despite the provisions of California Civil Code Section 815.7, the California Attorney General and each Third-Party Beneficiary has standing as an interested party in any proceeding affecting the Conservation Easement.

These rights are in addition to, and do not limit, the Easement Holder's obligations under federal, state, and local laws and regulations relating to the protection of biological resources and the environment. In addition, if the Wildlife Agencies reasonably determines that the Easement Area is not being held, monitored, or stewarded for conservation purposes in the manner specified in this Conservation Easement, the Yolo HCP/NCCP Instruments,

or the Management Plan, the Conservation Easement shall revert to the State of California or another entity as described in California Government Code Section 65967(e), and subject to approval as set forth therein.

7. **Public Access.** Nothing contained in this Conservation Easement gives or grants to the public an independent right to enter upon or use the Easement Area or any portion thereof. Nor shall this Conservation Easement extinguish any existing public right to enter upon or use the Easement Area, provided said right is disclosed to the Easement Holder and documented in the Management Plan and/or an exhibit to this Conservation Easement.

8. **Costs and Liabilities.** Except for those specific obligations to be undertaken by Easement Holder under Section 3 above, or in the Management Plan, Landowner shall retain all responsibilities and shall bear all costs and liabilities of any kind related to Landowner's ownership, operation, upkeep, management, and maintenance activities on and relating to the Easement Area as well as the Easement Area itself. Landowner agrees that neither the Easement Holder nor Third Party Beneficiaries shall have any duty or responsibility for the operation, upkeep, or maintenance of the Easement Area, the monitoring of hazardous conditions thereon, or the protection of Landowner, the public or any third parties from risks relating to conditions on the Easement Area. Landowner shall remain responsible for obtaining any applicable governmental permits and approvals for any activity or use allowed on the Easement Area under this Conservation Easement, and Landowner shall undertake all allowed activities and uses of the Easement Area in accordance with all applicable federal, state, local and administrative agency statutes, ordinances, rules, regulations, orders and requirements. Landowner shall pay before delinquency all taxes, assessments, fees, and charges of whatever description levied on or assessed against the Easement Area by competent authority (collectively **"taxes"**), including any taxes imposed upon, or incurred as a result of, this Conservation Easement, and shall furnish Easement Holder with satisfactory evidence of payment upon request.

9. **Indemnification.**

(a) **Indemnification by Landowner.** Landowner shall hold harmless, protect and indemnify Easement Holder and the Third-Party Beneficiaries, and their respective members, directors, officers, employees, agents, contractors, and representatives and the heirs, personal representatives, successors and assigns of each of them (each a **"Landowner Indemnified Party"** and, collectively, the **"Landowner Indemnified Parties"**) from and against any and all liabilities, penalties, costs, losses, damages, expenses (including, without limitation, reasonable attorneys' and experts' fees and costs), causes of action, claims, demands, orders, liens or judgments (each a **"Claim"** and, collectively, **"Claims"**), arising from or in any way connected with: (i) injury to or the death of any person, or physical damage to any Easement Area, resulting from any act, omission, condition, or other matter related to or occurring on or about the Easement Area, regardless of cause, except that this indemnification shall be inapplicable to Landowner Indemnified Parties with respect to any Claim due solely to the negligence of Landowner Indemnified parties; (ii) the obligations specified in Sections 5 and 8; and (iii) the existence or administration of this Conservation Easement. If any action or proceeding is brought against any of the Landowner Indemnified Parties by reason of any such Claim, Landowner shall, at the election of and upon written notice from Landowner Indemnified Parties, defend such action or proceeding by counsel reasonably acceptable to the Landowner Indemnified Parties

or reimburse Landowner Indemnified Parties for all charges incurred for services of the California Attorney General in defending the action or proceeding.

(b) **Indemnification by Easement Holder.** Easement Holder shall hold harmless, protect, and indemnify Landowner and the Third-Party Beneficiaries, and their respective members, directors, officers, employees, agents, contractors, and representatives and the heirs, personal representatives, successors and assigns of each of them (each, an **"Easement Holder Indemnified Party,"** and collectively, the **"Easement Holder Indemnified Parties"**) from and against any and all Claims arising from or in any way connected with: (a) the activities of Easement Holder on the Easement Area, including without limitation the Easement Holder's performance of management and monitoring activities set forth in the Management Plan; (b) breach by Easement Holder of any provision of this Conservation Easement; (c) any injury to or the death of any person, or physical damage to any Easement Area occurring on or about the Easement Area resulting from any act, omission, condition, or other matter related to, an activity on, or use of, the Easement Area by Easement Holder, including without limitation, those performed under the Management Plan, unless due solely to the negligence or willful misconduct of the Easement Holder Indemnified Party; and (d) any violation of, or failure to comply with, any state, federal or local law, regulation or requirement, by Easement Holder in any way affecting, involving or relating to the Easement Area. If any action or proceeding is brought against any of the Easement Holder Indemnified Parties by reason of any such Claim, Easement Holder shall, at the election of and upon written notice from Landowner, defend such action or proceeding by counsel reasonably acceptable to the Easement Holder Indemnified Party.

10. **Extinguishment.** The Conservation Easement created by this agreement constitutes a property right. It is the Parties' intention that the terms and conditions of this Conservation Easement shall be carried out in perpetuity. Liberal construction is expressly required for purposes of effectuating the Conservation Easement in perpetuity, notwithstanding economic hardship or changed conditions of any kind. If circumstances arise in the future that render the purposes of this Conservation Easement impossible to accomplish, this Conservation Easement can only be terminated or extinguished, in whole or in part, by judicial proceedings in a court of competent jurisdiction commenced after written notice of the anticipated initiation of proceedings is provided in the same manner, and to the same entities, as set forth in Section 12(a), below. In addition, no such extinguishment shall affect the value of Yolo Habitat Conservancy's interest in the Easement Area, and if the Easement Area, or any interest therein, is sold, exchanged or taken by power of eminent domain after such extinguishment, the Yolo Habitat Conservancy shall be entitled to receive the fair market value of the Conservation Easement at the time of such extinguishment. If such extinguishment occurs with respect to fewer than all acres of the Easement Area, the amounts described above shall be calculated based on the actual number of acres subject to extinguishment.

11. **Condemnation.** This Conservation Easement is a "conservation easement" as defined in California Code of Civil Procedure section 1240.055(a)(1) and constitutes "property appropriated to public use" as defined in California Code of Civil Procedure section 1240.055(a)(3). A person authorized to acquire property for public use by eminent domain shall seek to acquire the Property, if at all, only as provided in Code of Civil Procedure § 1240.055. CDFW is a public entity that imposed conditions of approval on a project that were satisfied, in whole or part, by the creation of this Conservation Easement. If any person seeks to acquire the Property for public use,

Easement Holder shall provide notice to CDFW and comply with all obligations of the holder of a conservation easement under Code of Civil Procedure § 1240.055. If the Conservation Easement is condemned, the net proceeds from condemnation of the Conservation Easement interest shall be distributed according to Paragraph 10 above and, as applicable, used in compliance with Government Code § 65966(j).

12. **Transfer of Conservation Easement.** This Conservation Easement may be assigned or transferred by Easement Holder upon written approval of the Third-Party Beneficiaries which approval shall not be unreasonably withheld or delayed; provided, that Easement Holder shall give the Third-Party Beneficiaries and Landowner at least sixty (60) calendar days prior written notice of the proposed assignment or transfer. Easement Holder may transfer its rights under this Conservation Easement only to an entity or organization: (a) authorized to acquire and hold conservation easements pursuant to California law, including Civil Code Section 815.3 and California Government Code Section 65967(c) (and any successor or other provisions applicable at the time of the proposed transfer), or the laws of the United States; (b) otherwise reasonably acceptable to the Third-Party Beneficiaries. Easement Holder shall require the transferee to record the conveyance in the Official Records of the County where the Easement Area is located. The failure of Easement Holder to perform any act provided in this section shall not impair the validity of this Conservation Easement or limit its enforcement in any way. Any transfer under this section shall be subject to the requirements of **Section 16** below.

13. **Transfer of Easement Area.** Landowner agrees to incorporate the terms of this Conservation Easement by reference in any deed or other legal instrument by which Landowner divests itself of any interest in all or any portion of the Easement Area, including, without limitation, a leasehold interest. For all transfers except routine and customary agricultural leases, Landowner further agrees to give written notice to Easement Holder and the Third-Party Beneficiaries of the intent to transfer any interest at least thirty (30) calendar days prior to the date of such transfer. Easement Holder and the Third-Party Beneficiaries shall have the right to prevent subsequent transfers in which prospective subsequent claimants or transferees are not given actual notice of the covenants, terms, conditions and restrictions of this Conservation Easement. The failure of Landowner to perform any act provided in this section shall not impair the validity of this Conservation Easement or limit its enforceability in any way. Any successor in interest or lessor of Landowner, by acceptance of a deed, lease, or other document purporting to convey an interest in the Easement Area, shall be deemed to have consented to, reaffirmed and agreed to be bound by all of the terms, covenants, restrictions, and conditions of this Conservation Easement.

14. **Transfer Fee Easement Holder.** Landowner and Easement Holder recognize and agree that any transfer of the Easement Area and any division of ownership will result in an additional burden on the monitoring and enforcement responsibilities of Easement Holder. Therefore, each transfer of the Easement Area (except for a Permitted Transfer) shall require Landowner's payment of a transfer fee to Easement Holder's easement stewardship fund. The fee shall be equal to the greater of three-fourths of one percent (0.75%) of the fair market value of the property transferred or twenty-five hundred dollars ($2,500.00), whichever is greater. Easement Holder may reduce or waive this fee at its sole discretion. For purposes of this Easement, **"Permitted Transfer"** shall mean any of the following: (i) a transfer without consideration (e.g. an inter vivos or testamentary gift), (ii) a transfer to an entity in which Landowner continues to retain both at least fifty-one percent (51%) of the voting rights in, and direct control of and participation in, such entity, or (iii) any transfer of any portion of the Property made as a result of condemnation or eminent

domain proceedings, including any negotiated transfer made to an entity with condemning authority in response to actual or threatened condemnation proceedings by that entity. Landowner and Easement Holder agree to execute and record a "NOTICE OF PAYMENT OF TRANSFER FEE REQUIRED" in accordance with California Civil Code Section 1098.5 respecting the transfer fee. The transfer fee shall be the obligation of the seller of the Property and shall be paid to Easement Holder at the address for giving notices to Easement Holder as set forth hereinbelow.

15. **Notices.** Any notice, demand, request, consent, approval, or communication that Landowner, Easement Holder, or any Third-Party Beneficiary desires or is required to give to the others shall be in writing and be served personally or sent by recognized overnight courier that guarantees next-day delivery or by first class mail, postage fully prepaid, addressed as follows:

To Landowner: *County of Yolo*
Attn: Natural Resources Division
292 West Beamer Street
Woodland, CA 95695
Telephone: (530) 666-8775

To Easement Holder: Yolo Habitat Conservancy
Attn: Executive Director
P.O. Box 2202
Woodland, CA 95776
Telephone: (530) 666-8150

To Third-Party Beneficiaries:

United States Fish and Wildlife Service
Attn: Sacramento Valley Division Supervisor
2800 Cottage Way, Room W-2605
Sacramento, CA 95825
Telephone: (916) 414-6600

California Department of Fish and Wildlife
Attn: Regional Manager
1701 Nimbus Road
Rancho Cordova, CA 95670
Telephone: (916) 358-2900

With a copy to: *California Department of Fish and Wildlife*
Office of the General Counsel
Attn: General Counsel
Post Office Box 944209
Sacramento, California 94244-2090
Telephone: (916) 445-8448

or to such other address as a party shall designate by written notice to the others. Notice shall be deemed effective upon delivery in the case of personal delivery or delivery by overnight courier or,

in the case of delivery by first class mail, five (5) calendar days after deposit into the United States mail.

16. **Amendment.** This Conservation Easement may not be amended, modified or otherwise changed in any manner, except by a written amendment executed by the Landowner and the Easement Holder, or their successors in interest, in their sole discretion. Any such amendment shall be subject to the prior written consent of the Third-Party Beneficiaries. Any amendment that is not made in strict accordance with the consent and other requirements of this Section shall be void and without effect. Any such amendment shall be consistent with the purposes of the Conservation Easement and shall not affect the perpetual duration of the Conservation Easement. Any such amendment must refer to this Conservation Easement by reference to its recordation data and must be recorded in the Official Records of the County where the Easement Area is located.

17. **Merger.** The doctrine of merger shall not operate to extinguish the Conservation Easement if the Conservation Easement and the Easement Area become vested in the same party. If, despite this intent, the doctrine of merger applies to extinguish the Conservation Easement then, a replacement conservation easement, with a new Easement Holder identified by the Yolo Habitat Conservancy and approved by the Third-Party Beneficiaries, containing the same protections embodied in this Conservation Easement shall be recorded against the Easement Area.

18. **No Hazardous Materials Liability.** Landowner represents and warrants that Landowner has no knowledge or notice of any Hazardous Materials (as defined below) or underground storage tanks existing, generated, treated, stored, used, released, disposed of, deposited or abandoned in, on, under, or from the Easement Area, or transported to or from or affecting the Easement Area. Landowner further represents, warrants and covenants that activities upon and use of the Easement Area by Landowner, its agents, employees, invitees and contractors shall comply with all Environmental Laws (as defined below) in using the Easement Area and that Landowner shall keep the Easement Area free of any material environmental defect, including, without limitation, contamination from Hazardous Materials (as defined below). Without limiting the obligations of Landowner under this Conservation Easement, including **Section 9(a)**, Landowner hereby releases and agrees to indemnify, protect and hold harmless the Landowner Indemnified Parties (as defined in **Section 9(a)**) from and against any and all Claims (as defined in **Section 9(a)**) arising from or connected with any Hazardous Materials or underground storage tanks present, alleged to be present, released in, from, or about or otherwise associated with the Easement Area at any time, except any Hazardous Materials placed, disposed or released by Landowner Indemnified Parties, or their employees or agents. This release and indemnification includes, without limitation, Claims for (a) injury to or death of any person or physical damage to any Easement Area; and (b) the violation or alleged violation of, or other failure to comply with, any Environmental Laws (as defined below). If any action or proceeding is brought against any of the Landowner Indemnified Parties by reason of any such Claim, Landowner shall, at the election of and upon written notice, defend such action or proceeding by counsel reasonably acceptable to the Landowner Indemnified Party including reimbursing CDFW for all charges incurred for services of the California Attorney General in defending the action or proceeding.

Despite any contrary provision of this Conservation Easement, the parties do not intend this Conservation Easement to be, and this Conservation Easement shall not be, construed such that it creates in or gives to Easement Holder or the Third-Party Beneficiaries any of the following:

(a) The obligations or liability of a "Landowner" or "operator," as those terms are defined and used in Environmental Laws (as defined below), including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (42 U.S.C. Section 9601 et seq.; hereinafter, **"CERCLA"**); or

(b) The obligations or liabilities of a person described in 42 U.S.C. Section 9607(a)(3) or (4); or

(c) The obligations of a responsible person under any applicable Environmental Laws; or

(d) The right to investigate and remediate any Hazardous Materials associated with the Easement Area; or

(e) Any control over Landowner's ability to investigate, remove, remediate or otherwise clean up any Hazardous Materials associated with the Easement Area.

The term **"Hazardous Materials"** includes, without limitation, (a) material that is flammable, explosive or radioactive; (b) petroleum products, including by-products and fractions thereof; and (c) hazardous materials, hazardous wastes, hazardous or toxic substances, or related materials defined in CERCLA, the Resource Conservation and Recovery Act of 1976 (42 U.S.C. Section 6901 et seq.; hereinafter **"RCRA"**); the Hazardous Materials Transportation Act (49 U.S.C. Section 6901 et seq.; hereinafter **"HTA"**); the Hazardous Waste Control Law (California Health & Safety Code Section 25100 et seq.; hereinafter **"HCL"**); the Carpenter-Presley-Tanner Hazardous Substance Account Act (California Health & Safety Code Section 25300 et seq.; hereinafter **"HAS"**), and in the regulations adopted and publications promulgated pursuant to them, or any other applicable Environmental Laws now in effect or enacted after the date of this Conservation Easement.

The term **"Environmental Laws"** includes, without limitation, CERCLA, RCRA, HTA, HCL, HSA, and any other federal, state, local or administrative agency statute, code, ordinance, rule, regulation, order or requirement relating to pollution, protection of human health or safety, the environment or Hazardous Materials.

19. **Representations and Warranties.** Landowner hereby makes the following representations and warranties for the benefit of Easement Holder and the Third-Party Beneficiaries:

(a) **Authority.** Landowner has good and sufficient title to the Easement Area including all appurtenances thereto, including, without limitation, all minerals and mineral rights and all water and water rights, and Landowner has full right and authority to enter into this Conservation Easement and convey the Conservation Easement to Easement Holder. There are no monetary liens and encumbrances recorded against the Easement Area except as expressly identified in **Exhibit C**, that may conflict or are otherwise inconsistent with this Conservation Easement and which have not been expressly subordinated to this Conservation Easement by a written Subordination Agreement approved by Easement

Holder and the Wildlife Agencies. All deeds of trust and mortgages recorded against the Easement Area, or any portion thereof, are and shall continue to be subordinated to this Conservation Easement; documentation of such subordinations are contained in **Exhibit C**. No provisions of this Conservation Easement should be construed as impairing the ability of the Landowner to use the Property as collateral for subsequent borrowing, provided that any mortgage or lien arising from such a borrowing would be subordinated to this Deed of Conservation Easement.

(b) **Compliance with Laws.** Landowner has not received notice of, and has no knowledge of, any material violation of any federal, state, county or other governmental or quasi-governmental statute, ordinance, regulation, law or administrative or judicial order with respect to the Easement Area.

(c) **No Litigation.** There is no action, suit or proceeding which is pending or threatened against the Easement Area or any portion thereof relating to or arising out of the ownership or use of the Easement Area, or any portion thereof, in any court or in any federal, state, county, or municipal department, commission, board, bureau, agency or other governmental instrumentality.

20. **General Provisions.**

(a) **Controlling Law.** The interpretation and performance of this Conservation Easement shall be governed by the laws of the State of California, disregarding the conflicts of law principles of such state, and by applicable federal law.

(b) **Liberal Construction.** Despite any general rule of construction to the contrary, this Conservation Easement shall be liberally construed to accomplish the purposes of this Conservation Easement and the policy and purpose of Civil Code section 815, *et seq.* If any provision in this instrument is found to be ambiguous, an interpretation consistent with the purposes of this Conservation Easement that would render the provision valid shall be favored over any interpretation that would render it invalid. It is the intent of this Conservation Easement to preserve the condition of the Easement Area and each of the Conservation Values protected herein, notwithstanding economic or other hardship or changes in circumstances or conditions. The provisions of this Conservation Easement shall be liberally construed to effectuate the purposes of the Conservation Easement and to allow Landowner's use and enjoyment of the Easement Area to the extent consistent with such purposes. Liberal construction is expressly required for purposes of effectuating this Conservation Easement in perpetuity, notwithstanding changed conditions of any kind. The Conservation Easement created by this agreement is the intended best and most productive use of the Easement Area. No remedy or election given by any provision in this Conservation Easement shall be deemed exclusive unless so indicated, but it shall, wherever possible, be cumulative with all other remedies at law or in equity. The parties acknowledge that each party and its counsel have had the opportunity to review and revise this Conservation Easement and that no rule of construction that ambiguities are to be resolved against the drafting party shall be employed in the interpretation of this Conservation Easement.

(c) **Severability.** If a court of competent jurisdiction voids or invalidates on its face any provision of this Conservation Easement, such action shall not affect the remainder of this Conservation Easement. If a court of competent jurisdiction voids or invalidates the application of any provision of this Conservation Easement to a person or circumstance, such action shall not affect the application of the provision to other persons or circumstances.

(d) **Entire Agreement.** This instrument sets forth the entire agreement of the parties with respect to this Conservation Easement and supersedes all prior discussions, negotiations, understandings, or agreements relating to this Conservation Easement. No alteration or variation of this instrument shall be valid or binding unless contained in an amendment in accordance with **Section 15**.

(e) **No Forfeiture.** Nothing contained herein will result in a forfeiture or reversion of Landowner's title in any respect.

(f) **Successors.** The covenants, terms, conditions, and restrictions of this Conservation Easement shall be binding upon, and inure to the benefit of, the parties hereto and their respective personal representatives, heirs, successors, and assigns and shall constitute a servitude running in perpetuity with the Easement Area.

(g) **Termination of Rights and Obligations.** A party's rights and obligations under this Conservation Easement terminate upon a valid transfer of the party's interest in the Conservation Easement in accordance with the terms and provisions hereof, except that liability for acts or omissions or breaches occurring prior to transfer shall survive transfer.

(h) **Captions.** The captions in this instrument have been inserted solely for convenience of reference and are not a part of this instrument and shall have no effect upon its construction or interpretation.

(i) **Additional Easements.** Landowner shall not grant any additional easements, rights of way or other interests in the Property (other than a security interest that is expressly subordinated to this Conservation Easement), or grant, transfer, or otherwise abandon or relinquish (each a "Transfer") any mineral, air, or water right or agreement relating to the Property, without first obtaining the written consent of Easement Holder and the Third-Party Beneficiaries. Easement Holder and the Third-Party Beneficiaries may withhold such consent if it determines that the proposed interest or transfer is inconsistent with the purposes of this Conservation Easement or may impair or interfere with the Conservation Values. This section shall not prohibit transfer of a fee or leasehold interest in the Property that is subject to this Conservation Easement and complies with **Section 13**. Landowner shall provide a certified copy of any recorded or unrecorded grant or Transfer document to Easement Holder and Third-Party Beneficiaries.

(j) **Recording.** Easement Holder shall record this Conservation Easement in the Official Records of the county where the Easement Area is located and may re-record it at any time as Easement Holder deems necessary to preserve its rights hereunder.

(k) **Counterparts.** The parties may execute this Conservation Easement in two or more counterparts, which shall, in the aggregate, be signed by both parties; each counterpart shall be deemed an original instrument as against any party who has signed it. In the event of any disparity between the counterparts produced, the recorded counterpart shall be controlling.

(l) **Exhibits.** The following Exhibit(s) referenced in this Conservation Easement are attached to and incorporated by reference in this Conservation Easement:

Exhibit A – Legal Description of the Easement Area
Exhibit B – Baseline Documentation Certification
Exhibit C – Title Encumbrances
Exhibit D – Notice/Memorandum of Unrecorded Site-Specific Management Plan

Exhibit D shall be executed and recorded concurrently with this Conservation Easement as separate documents in the chain of title for the Property.

IN WITNESS WHEREOF, Landowner and Easement Holder have executed this Conservation Easement the day and year first above written.

Legal Description

The land described herein is situated in the State of California, County of Yolo, unincorporated area, described as follows:

Parcel B of Parcel Map No. 2887 for Frank Rodgers, filed July 12, 1979, in Book 4 of Parcel Maps, Page 99, Yolo County Records.

Excepting therefrom, an undivided one-half interest in all oil, gas and other hydrocarbons and minerals now or at any time hereafter situate therein and thereunder, as reserved in the Deed from Capital Company, a Corporation to Frank A. Rodgers and Anna Ilg Rodgers, his wife, recorded March 25, 1942, in Book 168 of Official Records, Page 38.

Surface rights down to a depth of 500 feet were quitclaimed to Francis O. Rodgers, also known as Frank O. Rodgers, Lucille E. Rodgers, Francis J. Rodgers and Carol Ann Rodgers, by Quitclaim Deed recorded July 31, 1979, in Book 1379 of Official Records, Page 171.

Also excepting therefrom, an undivided one-half interest in all oil, gas and other hydrocarbons and minerals now or at any time hereafter situate below a depth of 500 feet, as reserved in the deed from Francis J. Rodgers, et al., recorded July 31, 1979, in Book 1379 of Official Records, Page 175.

APN: 025-350-025-000

Exhibit B – Baseline Documentation Certification

Acknowledgment of Baseline Documentation Report and Receipt of Baseline Documentation Report

The undersigned, Oscar E. Villegas, representing the County of Yolo, as Landowner, and Alexander Tengolics, representing the Yolo Habitat Conservancy, as Easement Holder, certify as follows:

a) Each is familiar with the condition of the approximately 30.0 acres, located in the County of Yolo, State of California, designated Assessor's Parcel Number 025-350-025. Said real property is referred to as the "Easement Area," in that certain Deed of Conservation Easement and Permanent Restrictions on Use to which this Exhibit B is attached; and

b) Each does hereby acknowledge and certify that the Baseline Documentation Report, and all of its inclusions, dated April 28, 2023, prepared by Christine Alford, owner of Alford Environmental LLC, is an inventory of the natural resources of the Property and an accurate representation of the condition of the Easement Area as of the date of conveyance of the Deed of Conservation Easement and Permanent Restrictions on Use.

Duplicate originals of the Baseline Documentation Report were signed and delivered by each of Landowner and Easement Holder, and each will receive a duplicate original of the Baseline Documentation Report at the close of escrow.

MEMORANDUM OF UNRECORDED MANAGEMENT PLAN

This Memorandum of Unrecorded Management Plan (Plan), shall be effective upon the date it is recorded with the Yolo County Recorder and is dated for reference purposes only as of June 30, 2023, is recorded to provide notice of a Management Plan affecting a portion of the property encumbered by the Conservation Easement between the Yolo Habitat Conservancy and owner(s) of real property, "Property", as described in Attachment A.

A **Conservation Easement** was recorded against a portion of the Property consistent with the Yolo Habitat Conservation Plan/Natural Community Conservation Plan (**"Yolo HCP/NCCP"**), dated April 2018; and

The **Yolo Habitat Conservancy** is required to monitor and enforce the terms of the **Conservation Easement**.

Along with the **Conservation Easement** a Management Plan was agreed to by all parties to protect habitat and species on a portion of the Property. The Management Plan provides agreed upon methods/practices and activities as well as restrictions that affect the property. Any changes to the Conservation Easement Management Plan require **Yolo Habitat Conservancy** written approval. It is the Property owner's responsibility to comply with all requirements of the Conservation Easement Management Plan. A copy of the Management Plan may be obtained by mailing a request to the Yolo Habitat Conservancy P.O. Box 2202, Woodland, CA 95776.

Failure to comply with the terms of the Conservation Easement and Management Plan may result in financial penalties to the property owner.

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 11.
Board of Supervisors **Natural Resources**

Meeting Date:	06/06/2023
Brief Title:	Reorganization Application for Elkhorn Fire Protection District
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Elisa Sabatini, Manager of Natural Resources, Department of Community Services, x5773
Supervisorial District Impact:	Districts 1 & 3

Subject
Adopt Amended Resolution of Application Initiating Proceedings with the Yolo Local Agency Formation Commission (LAFCo) for a Change of Organization to Dissolve the Elkhorn Fire Protection District and Concurrent Annexation of Territory within the District's Boundaries into County Service Area No. 9. (No general fund impact) (Lindbo/Sabatini)

Recommended Action
Staff recommends that the Board adopt the attached Amended Resolution of Application initiating proceedings with LAFCo for a change of organization to dissolve the Elkhorn Fire Protection District and concurrent annexation of territory within the District's Boundaries into County Service Area No. 9 (Attachment A).

Strategic Plan Goal(s)

Safe Communities

Reason for Recommended Action/Background
On December 6, 2022, the Board adopted a resolution (Item #51; Resolution No. 22-167) initiating a Yolo Local Agency Formation Commission (Yolo LAFCo) application for the purpose of dissolving the Elkhorn Fire Protection District (FPD) and reorganizing the Elkhorn FPD territory into Springlake FPD and County Service Area 9 (CSA9). On April 18, 2023, the Board modified their previous direction and recommended that the successor agency for Elkhorn FPD be solely CSA9, and removing Springlake FPD from the anticipated Yolo LAFCo application (Item #28; Minute Order #23-36).

The modified Elkhorn FPD successor agency proposal was derived from the feedback during the engagement efforts with the East Davis and Springlake FPDs--specifically, the concern over impacting contract-only fire protection districts that are performing well. If Elkhorn becomes part of CSA 9, the County Board of Supervisors would assume responsibility for the district and the necessary fire protection contracts with the cities of Woodland and West Sacramento.

As directed at the April 18, 2023, Board meeting, staff has amended the Resolution of Application to initiate the reorganization proceedings (see Att. A) to reflect the Board's modified direction. The attached resolution, if adopted, directs staff to file an application with Yolo LAFCo seeking the dissolution of the Elkhorn FPD and reorganization of Elkhorn's territory into CSA9.

Collaborations (including Board advisory groups and external partner agencies)
Staff have collaborated with various rural fire protection districts, the Woodland Fire Department, the Davis Fire Department, the Fire Sustainability Ad Hoc Committee (Supervisors Barajas and Sandy), the Department of Finance, and the Office of County Counsel on this effort.

RESOLUTION NO. 23-_____

AMENDED RESOLUTION OF APPLICATION OF THE YOLO COUNTY BOARD OF SUPERVISORS INITIATING PROCEEDINGS WITH THE YOLO LOCAL AGENCY FORMATION COMMISSION FOR A CHANGE OF ORGANIZATION TO DISSOLVE THE ELKHORN FIRE PROTECTION DISTRICT AND CONCURRENT ANNEXATION OF THE TERRITORY WITHIN THAT DISTRICT'S BOUNDARIES INTO COUNTY SERVICE AREA NO. 9

WHEREAS, the Elkhorn Fire Protection District ("Elkhorn FPD") operates and exists pursuant to the provisions of the Fire Protection District Law of 1987, Health and Safety Code section 13800 et seq. with a board appointed by the Yolo County Board of Supervisors;

WHEREAS, the County's Long-Term Fire Sustainability effort began in 2018 and has since continued exploring options to improve the long-term sustainability of the County's 15 rural fire protection districts ("FPDs") that serve the unincorporated area of Yolo County, including the Elkhorn FPD; and

WHEREAS, the County produced a report following this initial effort entitled, "Yolo County Fire Protection Districts: A Review of Challenges and Strategic Approaches," which was presented to the Board of Supervisors on July 23, 2019 and described challenges facing the Yolo County rural fire protection districts, including:

- Recruitment and retention of volunteers
- Increased calls for services
- Obtaining sufficient funding to maintain operations; and

WHEREAS, the challenges faced by the FPDs are not unique to Yolo County and mirror challenges in the delivery of fire protection services at both the state and national level; and

WHEREAS, the challenges affecting the County's rural FPDs affect all Supervisorial districts throughout the County and is a County-wide concern; and

WHEREAS, the County of Yolo is an "affected local agency" within the meaning of Government Code section 56014; and

WHEREAS, on September 27, 2022, the Board of Supervisors received an update on the Yolo Local Agency Formation Commission's ("LAFCo") Municipal Services Review ("MSR") and Sphere of Influence ("SOI") Update for the 15 FPDs that serve the unincorporated area of Yolo County, including County staff's regional governance recommendations; and

WHEREAS, the purpose of a MSR in general is to provide a comprehensive inventory and analysis of the services provided by local municipalities, county service areas, and special districts, to evaluate the structure and operation of such agencies, and to discuss possible areas for improvement and coordination; and

WHEREAS, the LAFCo MSR, adopted July 28, 2022, determined that the FPDs are fragmented and could be improved primarily by adopting joint operation agreements or through reorganization of certain districts to address efficient service delivery and health or safety concerns; and

WHEREAS, the MSR determined that Elkhorn FPD's demand for service/call volume has increased significantly, and Elkhorn FPD is not able to adequately respond to its current service demands, with personnel, apparatus levels and response times significantly below recommended levels, including a significant number of missed calls; and

WHEREAS, the MSR recommended that Elkhorn FPD be dissolved, and its territory annexed into Springlake Fire Protection District ("Springlake FPD") (for the City of Woodland service area) and County Service Area No. 9 ("CSA 9") (for the City of West Sacramento service area), and approved corresponding sphere of influence updates, dividing Elkhorn FPD's territory between the Springlake FPD and CSA 9 geographically to minimize response times; and

WHEREAS, the Board of Supervisors adopted Resolution No. 22-167 on December 6, 2022, initiating an application to the Yolo Local Agency Formation Commission to reorganize and dissolve the Elkhorn Fire Protection District and concurrently annex the Elkhorn Fire District territory into Springlake Fire Protection District and County Service Area No. 9; and

WHEREAS, the Board of Supervisors modified its previous approval and direction on April 18, 2023 (Minute Order No. 23-36) and approved a change in the successor agencies to Elkhorn Fire Protection District from Springlake Fire Protections District and County Service Area No. 9, to County Service Area No. 9 only; and

WHEREAS, in accordance with Government Code section 56654(a), the County of Yolo, as an affected local agency, may request a change of organization to dissolve Elkhorn FPD and further request that Elkhorn FPD's territory be annexed into CSA 9.

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of Yolo County as follows:

1. Incorporation of Recitals. The recitals set forth above are true and hereby incorporated as substantive findings for this Resolution of Application.

2. Reorganization Proposal. A proposal is hereby made by the Yolo County Board of Supervisors to LAFCo, amending its prior Resolution of Application (Resolution No. 22-167), as follows:

   a. This proposal for the Reorganization is made pursuant to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 commencing with Section 56000 of the California Government Code.
   b. The nature of the proposed reorganization is dissolution of the Elkhorn FPD and concurrent annexation of the FPD's territory into CSA 9 for the

provision of the fire protection and emergency services provided by Elkhorn FPD
with services provided pursuant to the respective principal acts of the CSA 9 (Government Code, §§ 25210 et seq.).

c. The boundaries of the proposed reorganization area are depicted on the corresponding map attached hereto as Exhibit "A," and incorporated herein by this reference.
d. The reasons for proposed Reorganization are as follows:
    i. Ensure continuity and eliminate redundancies of emergency response services within the boundaries of the Elkhorn FPD and improve service response times with consolidation; and
    ii. Produce savings by eliminating duplication of personnel, purchase of equipment, and oversight associated with the operation of multiple agencies providing the same service.

3. Application. Staff is directed to prepare the required reorganization application materials, including the information required by Government Code section 56652 and a Plan for Services in accordance with Government Code section 56653, and submit the application to LAFCo.

4. Delegation. The Board authorizes the County Administrative Officer ("CAO") or CAO's designee to execute the application for reorganization and any other documents, in forms approved by County Counsel, and to administer all actions necessary to carry out this Resolution of Application and the proposed reorganization of the Elkhorn FPD.

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 12.
Board of Supervisors **Natural Resources**

Meeting Date:	06/06/2023
Brief Title:	Easement Agreement for Knights Landing Flood Management Project
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Elisa Sabatini, Manager of Natural Resources, Department of Community Services, x5773
Supervisorial District Impact:	District 5

Subject

Approve agreement with Marvin L. Crawford Jr., in the amount of $60,300, for acquisition of a permanent drainage easement and a temporary construction easement for the Knights Landing Drainage Infrastructure Improvements Project; and authorize the Director of Public Works to sign the agreement and take the administrative actions necessary to complete acquisition of the easements. (No general fund impact) (Lindbo/Sabatini)

Recommended Action

A. Approve agreement with Marvin L. Crawford Jr., in the amount of $60,300, for acquisition of a permanent drainage easement and a temporary construction easement for the Knights Landing Drainage Infrastructure Improvements Project; and

B. Authorize the Director of Public Works to sign the agreement, approve payment, open escrow, accept the easement, record the deeds once the signed deeds have been received and escrow has closed, and take other actions necessary to complete the acquisition of the easements.

Strategic Plan Goal(s)

Safe Communities

Robust Economy

Reason for Recommended Action/Background

In 2017, Yolo County received a grant from the California Department of Water Resources' ("DWR") Small Communities Flood Risk Reduction Program ("SCFRRP") to complete a feasibility study of structural and non-structural actions that could reduce flood risk to the town of Knights Landing. The County prepared the *2019 Knights Landing Small Community Flood Risk Reduction Feasibility Study* as a deliverable for the grant.

In 2020, the County received additional grant funding from DWR as part of Phase 2 of the SCFRRP to implement the Knights Landing Flood Management Project, which consists of the design, environmental documentation, permitting, real estate, and construction activities required to improve the conditions of the existing State Plan of Flood Control levees that protect Knights Landing, as well as ecosystem restoration and enhancement. When the Knights Landing Flood Management Project is completed, it will reduce or prevent flooding to a population of 995 County residents, approximately 321 structures, and 3,400 acres of prime agricultural lands.

The Project contains four elements - one of which is the design, permitting, and construction of drainage infrastructure improvements within the town. This project element is the focus of this staff report.

Project Description

Yolo County, in cooperation with DWR, is proposing to construct drainage facility improvements within the town of

Knights Landing. This project is referred to as the Knights Landing Drainage Infrastructure Improvements Project ("Project"). The Project is designed to incorporate the following features:

- road-side ditch improvements along 2nd Street between the Post Office and Railroad Street to improve storm water drainage capacity;
- a buried closed conduit under Railroad Street between 2nd Street and 4th Street (approximately 2.25-feet-wide by 1-foot-deep);
- an open channel along the east side of Railroad Street between 4th Street and 7th Street (approximately 3-feet-deep; 2:1 side slopes);
- the removal of the existing concrete arch culvert; and
- the degrade of the abandoned railroad embankment using a 50-foot-wide open cut channel.

An aerial map depicting the locations of these features has been included with the staff report (Att. A).

Environmental Review
An Initial Study/Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the Project was adopted by the Board of Supervisors on May 10, 2022 (Minute Order No. 22-57; Item No. 11). A Notice of Determination was filed with the County Clerk-Recorder and the State Clearinghouse in compliance with Section 21152 of the Public Resources Code on May 12, 2022 (Document No. 57-05122022-054). A State Clearinghouse Number of 2022030394 was attributed to this Project.

Procurement and Real Estate
On August 30, 2022, the Board of Supervisors adopted the plans and specifications for construction of the Project and authorized the Department of Community Services ("Department") to advertise for competitive bids, in addition to other procurement related actions (Minute Order No. 22-89; Item No. 9).

The Department plans to go out to bid for this Project in Summer 2023; however, all outstanding real estate related items must be complete in order to do so. One such outstanding item is the acquisition of a permanent drainage easement and a temporary construction easement on APN 056-334-001 (Att. B). The subject property is a 0.45-acre tract of residential land located at the northeast corner of Railroad Street and County Road 116 located near the southernmost portion of the project. The property is owned by Mr. Marvin L. Crawford Jr.

An independent appraisal was prepared by CBRE Valuation & Advisory Services to determine the value of the easement interests the County must acquire for the Project. In accordance with federal requirements for property acquisition, just compensation was established by the County based on this appraisal. County staff, and its consultant team, worked with Mr. Crawford Jr. to come to a mutually acceptable agreement for the purchase of the easements and compensation.

Current Request
At this time, staff is requesting that the Board of Supervisors approve the agreement with Marvin L. Crawford Jr., in the amount of $60,300, for acquisition of a permanent drainage easement and a temporary construction easement for the Knights Landing Drainage Infrastructure Improvements Project (Att. C).

Additionally, Staff is requesting the Board authorize the Director of Public Works to sign the agreement, approve payment, open escrow, accept the easement, record the deeds once the signed deeds have been received and escrow has closed, and take other actions necessary to complete the acquisition of the easements.

Collaborations (including Board advisory groups and external partner agencies)
Department staff and its Knights Landing Flood Management Project consultant team, specifically MBK Engineers and Monument Row, Inc., collaborated with the Office of County Counsel and the property owner on this item.

Fiscal Information
No Fiscal Impact

Fiscal Impact of this Expenditure	
Total cost of recommended action	$60,300
Amount budgeted for expenditure	$60,300
Additional expenditure authority needed	$0

One-time commitment	Yes

Source of Funds for this Expenditure

DWR Funding	$54,270
Local	$6,030

Further explanation as needed

This item falls under Task 5 (Real Estate) of the County's Funding Agreement with DWR for the Knights Landing Flood Management Project. Task 5 has a cost share split of 90% State and 10% Local. Based on this split, the cost share of the proposed easement acquisitions is as follows:

- State: $54,270
- County: $6,030 (paid via the Knights Landing Levee Capital Project Fund)

All expenditures related to this item are accounted for in the adopted FY 22-23 budget.

AGREEMENT FOR PURCHASE OF INTEREST IN REAL PROPERTY

APN: 056-334-001
Owner: Marvin L. Crawford Jr, a single man

AGREEMENT NO. _____

AGREEMENT FOR PURCHASE OF INTEREST IN REAL PROPERTY
Knights Landing Drainage Infrastructure Improvement Project

This Agreement ("Agreement") is made and entered into this ____ day of _____, 2023 by and between the County of Yolo ("County") and Marvin L. Crawford Jr, a single man ("Grantor").

The parties hereby mutually agree as follows:

1. **Deeds Delivery.** Within seven (7) calendar days of the full execution of this Agreement, Grantor shall execute and deliver one Permanent Drainage Easement Deed and one Temporary Construction Easement Deed ("Deeds") to the County for the purpose of conveying to the County the certain interests described in the Deeds. A copy of the Deeds are attached hereto as Exhibit 1 & Exhibit 2 and incorporated by this reference. A legal description and plat depicting the subject property are included in Exhibit 1 and Exhibit 2 as Exhibits A and B and are incorporated herein by this reference.

2. **Purchase Price and Title.** The County shall pay the Grantor the sum of **Sixty Thousand Three Hundred Dollars ($60,300.00)** ("Purchase Price"). By execution of this Agreement, Grantor acknowledges that this Agreement and payment of the Purchase Price to Grantor includes any and all just compensation to which Grantor may be entitled for the interests conveyed by the Deeds and construction and use of the Knights Landing Drainage Infrastructure Improvement Project.

   Payment for the interest conveyed by the Deeds ($60,300.00), shall be made within 60 days after this agreement is fully executed and the signed/notarized Deeds are delivered to the County free and clear of all liens, encumbrances, taxes, assessments, easements and leases, recorded and/or unrecorded, except:

   a. Taxes for the tax year in which this escrow closes shall be cleared and paid in the manner required by Section 5086 of the Revenue and taxation Code, if unpaid at the close of escrow.

   b. Covenants, conditions, restrictions, and reservations of record, if any; and

   c. Easements or rights of way over said land for public or quasi-public utility or public street purposes, if any.

3. **Escrow.** The conveyance of the Deeds will be handled through an escrow with Fidelity National Title Company, located 8525 Madison Avenue, Suite 110, Fair Oaks, CA 95628, Phone (916) 646-6018 or other title company designated by the Director of Public Works. The County shall pay all costs of escrow and recording incurred in this transaction, and if title insurance is desired by the County, title insurance policy expenses. Escrow and recording costs shall not, however, include any trustee fees, forwarding fees, or penalty for any full or partial reconveyance of Deeds or full release of any mortgage paid.

4. **Deductions.** The County shall have the authority to deduct and pay from the Purchase Price any amount necessary to satisfy any bond, lender, lien, or other encumbrance demands and delinquent taxes due in any year except the year in which this escrow closes, together with penalties and interest thereon, and/or delinquent and unpaid non-delinquent assessments which have become a lien at the close of escrow.

   Any monies payable under this contract up to and including the total amount of unpaid principal and interest on note(s) secured by mortgage(s) or Deeds(s) of trust, if any, and all other amounts due and payable in accordance with the terms and conditions of said trust Deeds(s) or mortgage(s), shall upon demand(s) be made payable to the mortgagee(s) or beneficiary(ies) entitled thereunder; said mortgagee(s) or beneficiary(ies) to furnish grantor with good and sufficient receipt showing said monies credited against the indebtedness secured by said mortgage(s) or Deeds(s) of trust.

5. **Warranties.**

   a. The persons signing on behalf of Grantor warrants that they are the owner in fee simple or has the authority to sign on behalf of the owner of the Subject Property, that this Agreement, and Deeds have been properly executed by Grantor, and that no other persons are required to execute this Agreement, and Deeds on behalf of Grantor in order to fully convey to the County that interest in the Subject Property described in the Deeds. The person signing this Agreement on behalf of Grantor understands that the County is entering into this Agreement in reliance upon these warranties made by Grantor.

   b. Grantor warrants that there are no oral or written leases on all or any portion of the property exceeding a period of one month, or that any leases on the property described in the Deeds will be terminated by the date of possession and Grantor agrees to hold the County harmless and reimburse the County for any and all of its losses and expenses occasioned by reason of any lease of the property held by any tenant of Grantor for a period exceeding one month.

6. **Indemnification.** Grantor covenants and agrees to indemnify and hold the County harmless from all claims that other parties may make or assert on the title to the premises for interests not set forth in the record title.

7. **Permission to Enter.** Permission is hereby granted to the County or its authorized agent to enter on Grantor's land, where necessary, for the purpose of performing the work.

8. **Date of Possession.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this Agreement, the right of possession and use of the Subject Property by the County, including the right to remove and dispose of improvements, shall commence on the date funds are deposited into said escrow account or delivery of Purchase Price to Grantor, whichever occurs later, and that the Purchase Price includes, but is not limited to, full payment for such possession and use including damages, if any from said date.

9. **Temporary Construction Easement.** It is agreed and confirmed by the parties hereto that notwithstanding other provisions in this Agreement, the right of possession and use of the TCE by the County, including the right to remove and dispose of improvements, shall commence on upon the date funds are deposited into said escrow account or delivery of Purchase Price to Grantor and the TCE and shall terminate six (6) months after the execution date, or when the Yolo County Board of Supervisors access the work as complete, whichever occurs first.

   In case of unpredictable delays in construction, upon written notification, the terms of the TCE may be extended by an amendment to the Agreement. Grantor shall be compensated based on the fair market value at the time of the extension. Payment shall be made to the Grantor for the extension prior to the expiration of the original term.

   If the TCE is recorded, the County will quitclaim the interests conveyed by the TCE, to Grantor at the expiration of said terms in this Agreement.

10. **Hazardous Materials.** The property being acquired in this transaction reflects the fair market value of the property without the presence of contamination. If the property being acquired is found to be contaminated by the presence of hazardous waste, which required mitigation under Federal or State law, the County may elect to recover its cleanup costs from those who caused or contributed to the contamination.

11. **Successors and Assigns.** The parties hereto understand and agree that this Agreement insures to the benefit of, and is binding on, the parties, their respective heirs, personal representative, successors, and assigns.

12. **Entire Agreement.** The parties have set forth the whole of their Agreement. The performance of the Agreement constitutes the entire consideration for the Deeds and shall relieve the County of all further obligation or claims on this account, or on account of the location, grade, or construction of the proposed public improvement. No obligations other than those set forth in this Agreement will be legally binding on either party.

13. **Counterparts.** This Agreement may be executed in counterparts, each of which so executed shall, irrespective of the date of its execution and delivery, be deemed an original, and all such counterparts together shall constitute one and the same instrument.

14. **Title VI Assurances.** The parties to this Agreement shall, pursuant to Section 21.7(a) of Title 49, Code of Federal Regulations, comply with all elements of Title VI of the Civil Rights Act of 1964. This requirement under Title VI and the Code of Federal Regulations is to complete the USDOT-Non-Discrimination Assurance requiring compliance with Title VI of the Civil Rights Act of 1964, 49 C.F.R. Section 50.3.

    No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity that is the subject of this Agreement.

APN: 056-334-001

EXHIBIT 'A'

LEGAL DESCRIPTION FOR A DRAINAGE EASEMENT MARVIN L. CRAWFORD JR APN:056-334-001-000

All that real property located in the Town of Knights Landing, County of Yolo, State of California, described as follows:

Being a portion of Parcel Three, as described in that certain Grant Deed, filed for record June 4, 2007, as Document No. 2007-0020109-00, Yolo County Records, also being a portion of Parcel "B", as shown on that certain Parcel Map entitled "Parcel Map No 2906", filed for record November 27, 1979, in Book 5 of Parcel Maps, at Page 27, said County Records, situated within Section 14, Township 11 North, Range 2 East, Mount Diablo Base and Meridian, more particularly described as follows:

BEGINNING at the northwesterly corner of said Parcel Three; thence from said **POINT OF BEGINNING**, along the northerly line of said Parcel Three, South 68°43'35" East, a distance of 33.12 feet; thence leaving said northerly line and within said Parcel Three, the following eleven (11) arcs, courses, and distances:

1. South 14°49'44" West, a distance of 7.70 feet;
2. South 69°02'02" East, a distance of 33.20 feet;
3. from a radial line which bears North 62°07'00" East, along a non-tangent curve concave to the west, having a radius of 48.50 feet, southerly 32.98 feet along said curve through a central angle of 38°57'28";
4. South 19°40'53" West, a distance of 18.40 feet;
5. from a radial line which bears South 56°11'20" East, along a non-tangent curve concave to the northwest, having a radius of 40.00 feet, southwesterly 37.40 feet along said curve through a central angle of 53°34'15";
6. North 68°36'46" West, a distance of 30.30 feet;
7. South 22°02'24" West, a distance of 33.62 feet;
8. South 49°48'38" West, a distance of 21.80 feet;
9. South 23°50'17" West, a distance of 29.32 feet;
10. South 48°21'30" West, a distance of 6.76 feet;
11. South 34°13'11" West, a distance of 19.71 feet to the northerly line of that certain Highway Easement, as described in the Easement Agreement filed for record July 29, 1965, in Book 803, at Page 626, Official Records of said County;

Thence along said southerly and continuing through said , North 45°03'35" West, a distance of 11.90 feet to the westerly line of said Parcel Three, also being the easterly right-of-way line of Railroad Street, as shown on that certain Record of Survey entitled , "Town of Knights Landing", filed for record May 31, 2006, in Book 2006 of Maps, at Page 102, said County Records; thence along said westerly line, North 21°16'25" East, a distance of 184.30 feet to the **POINT OF BEGINNING.**

Containing 8,457 square feet, more or less.

See Exhibit 'B', Plat to accompany description, attached hereto and made a part hereof.

The Basis of Bearings for this description is line between NGS Designations “F 859 Reset” (PID-AI5062) and “Cody” (PID-AI5056), as shown on said Record of Survey, filed for record in Book 2006 of Maps, at Page 102, said County Records. Said bearing is taken to bear North 88°19’06” West.

EXHIBIT 'A'

LEGAL DESCRIPTION FOR A TEMPORARY CONSTRUCTION EASEMENT MARVIN L. CRAWFORD JR APN: 056-334-001-00

All that real property located in the Town of Knights Landing, County of Yolo, State of California, described as follows:

Being a portion of Parcel Three, as described in that certain Grant Deed, filed for record June 4, 2007, as DOC-2007-0020109-00, Yolo County Records, also being a portion of Parcel "B", as shown on that certain Parcel Map entitled "Parcel Map No 2906", filed for record November 27, 1979, in Book 5 of Parcel Maps, at Page 27, said County Records, situated within Section 14, Township 11 North, Range 2 East, Mount Diablo Base and Meridian, more particularly described as follows:

COMMENCING at the northwesterly corner of said Parcel Three; thence along the westerly line of said Parcel Three, also being the easterly right-of-way line of Railroad Street, as shown on that certain Record of Survey entitled, "Town of Knights Landing", filed for record May 31, 2006, in Book 2006 of Maps, at Page 102, said County Records, South 21°16'25" West, a distance of 184.30 feet to the intersection with the northerly line of that certain Highway Easement, as described in the Easement Agreement filed for record July 29, 1965, in Book 803, at Page 626, Official Records of said County; thence along said northerly line and into said Parcel Three, the following two (2) courses and distances:

1. South 54°03'35" East, a distance of 32.11 feet;
2. North 68°36'25" East, a distance of 19.16 feet to the **TRUE POINT OF BEGINNING**;

Thence from said **TRUE POINT OF BEGINNING**, leaving said northerly line and continuing within said Parcel Three, the following five (5) arcs, courses, and distances:

1. from a radial line which bears South 78°19'27" West, along a non-tangent curve concave to the east, having a radius of 85.00 feet, northerly 50.02 feet along said curve through a central angle of 33°42'57";
2. North 22°02'24" East, a distance of 55.04 feet;
3. South 68°36'46" East, a distance of 10.00 feet;
4. South 22°02'24" West, a distance of 55.15 feet;
5. along a tangent curve concave to the east, having a radius of 75.00 feet, southerly 42.42 feet along said curve through a central angle of 32°24'18" to said northerly line;

Thence along said northerly line, North 68°36'25" East, a distance of 10.17 feet to the **TRUE POINT OF BEGINNING**

Containing 1,013 square feet, more or less.

See Exhibit 'B', Plat to accompany description, attached hereto and made a part hereof.

The Basis of Bearings for this description is line between NGS Designations “F 859 Reset” (PID-AI5062) and “Cody” (PID-AI5056), as shown on said Record of Survey, filed for record in Book 2006 of Maps, at Page 102, said County Records. Said bearing is taken to bear North 88°19’06” West.

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 13.
Board of Supervisors **Natural Resources**

Meeting Date:	06/06/2023
Brief Title:	MBK Engineers Contract Amendment #3
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Elisa Sabatini, Manager of Natural Resources, Department of Community Services, x5773
Supervisorial District Impact:	District 5

Subject
Approve third amendment to Agreement No. 21-23 with MBK Engineers to extend the contract term by three years to June 30, 2026; modify the scope of work to reallocate funding between tasks and update sub-subconsultants; and make other administrative updates project management services for the Knights Landing Flood Risk Reduction Project. (No general fund impact) (Lindbo/Sabatini)

Recommended Action
Approve third amendment to Agreement No. 21-23 with MBK Engineers to extend the contract term by three years to June 30, 2026; modify the scope of work to reallocate funding between tasks and update sub-subconsultants; and make other administrative updates project management services for the Knights Landing Flood Risk Reduction Project.

Strategic Plan Goal(s)
Safe Communities

Flourishing Agriculture

Reason for Recommended Action/Background
Agreement No. 21-23
On January 26, 2021, the Board of Supervisors approved a three-year agreement with MBK Engineers in the amount of $13,178,593 to provide design, engineering, environmental compliance, regulatory permitting, and project management services for the Knights Landing Flood Risk Reduction Project for a period of January 1, 2021, through June 30, 2023 (Minute Order No. 21-09).

First Amendment
On February, 28, 2022, a First Amendment was executed to modify the scope of work to add a new Task 7 *(Construction Management)* and reallocate funding from Task 2 *(Design Plans, Specifications, and Estimates)* to the newly created Task 7. This reallocation did not result in an increase to the agreement's maximum compensation amount.

Second Amendment
On October 19, 2022, a Second Amendment was executed to reallocate funding between multiple tasks to align the respective task budgets with anticipated project expenses. This reallocation did not result in an increase to the agreement's maximum compensation amount.

Proposed Third Amendment
At this time, Staff is recommending the Board of Supervisors approve a Third Amendment to Agreement No. 21-23 (Att. A.).

The proposed Third Amendment will:

1. Reallocate funding between tasks to further align the respective task budgets with current and anticipated project expenses; and

2. Extend the term of the agreement by three years to June 30, 2026, consistent with the extended term of the County's Department of Water Resources Small Communities Flood Risk Reduction Funding Agreement; and

3. Update the insurance requirements for the contract; and

4. Update the contact information for the Contractor and County; and

5. Revise Exhibit A-2: Scope of Work to update the budgets for each task and project sub-subconsultants.

Collaborations (including Board advisory groups and external partner agencies)
Office of County Counsel
Department of General Services - Procurement Division

Competitive Bid Process/Vendor Performance
Agreement No. 21-23 was the result of an RFQ (AUDRFQKK2011) that opened on June 2, 2020, and closed on June 19, 2020.

Vendor Performance

The Department of Community Services confirms that MBK Engineers has performed satisfactorily on the current agreement.

Fiscal Information
No Fiscal Impact

Fiscal Impact of this Expenditure	
Total cost of recommended action	$0
Amount budgeted for expenditure	$0
Additional expenditure authority needed	$0
On-going commitment (annual cost)	

Source of Funds for this Expenditure	
General Fund	$0

Further explanation as needed
The proposed amendment does not result in an increase to the maximum compensation of the contract.

All expenditures related to the agreement are budgeted appropriately in the FY 22-23 and FY 23-24 budgets.

This agreement is being funded by a Funding Agreement with the California Department of Water Resources' Small Communities Flood Risk Reduction Program. The County's local match is being provided by the Knights Landing Levee Capital Project fund.

THIRD AMENDMENT

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

THIRD AMENDMENT TO AGREEMENT NO. 21-23
(BOS AGREEMENT NO ____ - ____)

This Third Amendment to Agreement No. 21-23 is made and entered into as of the last date signed below, by and between the County of Yolo, a political subdivision of the State of California ("County"), and MBK Engineers ("Contractor"), jointly referred to as the "Parties" herein and who agree as follows.

WHEREAS, on January 26, 2021, the Parties entered into Agreement No. 21-23 ("Agreement") for Contractor to provide preliminary engineering and design services for the Knights Landing Flood Risk Reduction and Multi-Benefits Project ("Project");

WHEREAS, on February 28, 2022, the Parties amended the Agreement, via Amendment #1, to modify the scope of work to add Task 7 and reallocate $572,750 from Task 2 to the new Task 7; and

WHEREAS, on October 19, 2022, the Parties amended the Agreement, via Amendment #2, to reallocate funding between tasks to align the respective task budgets with anticipated project expenses; and

WHEREAS, the Parties wish to amend the Agreement, as previously amended, to:

1. Revise **Paragraph III.A.** to reallocate funding between tasks to align the respective budgets with current and anticipated project expenses; and

2. Revise **Paragraph IX.A.** to extend the agreement term by three years to June 30, 2026, consistent with the extended term of the County's California Department of Water Resources Small Communities Flood Risk Reduction Funding Agreement (4600013795) for the Project; and

3. Revise **Section XIII** to reflect the new County insurance requirements; and

4. Revise **Paragraph XV** to update contact information for the Parties; and

5. Revise **Exhibit A-2: Scope of Work** to update the budgets for each task, as well as project sub-subconsultants.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. **Paragraph III.A.** of the Agreement is hereby amended to read as follows:

III. COMPENSATION AND REIMBURSEMENT OF EXPENSES

A. For the services described in Paragraph I above, and subject to the condition that the services have been completed in a manner satisfactory to the Director, or their designee, County

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

shall compensate Contractor for each task, on a time-and-material basis, in the amount up to the maximum amounts set both below:

Task 1: Geotechnical Investigation (DWR-1) $2,300,000
Task 2: Design Plans, Specifications, and Estimates (DWR-2) $4,513,719
Task 3: Environmental Documentation (DWR-3) $1,021,167
Task 4: Permitting and Cultural Resources Compliance (DWR-4).....$1,300,000
Task 5: Real Estate (DWR-5).....$290,367
Task 6: Program and Project Management (DWR-7) $1,347,000
Task 7: Construction Management (DWR-6).....$2,406,340

2. **Paragraph IX.A.** of the Agreement is hereby amended to read as follows:

IX. TERM AND TERMINATION

A. The term of this Agreement shall be from January 1, 2021, through June 30, 2026, unless sooner terminated as hereinafter provided.

3. **Section XIII** of the Agreement is hereby amended to read as follows:

XIII. INSURANCE

A. During the term of this Agreement, Contractor shall at all times maintain, at its expense, the following coverages and requirements:

1. Minimum Scope of Insurance – coverage shall be at least as broad as the latest version of the following:

a. Commercial General Liability: Insurance Services Office form CG 000. The policy shall not contain any exclusions contrary to the Agreement, including but not limited to endorsements or provisions limiting coverage for 1) Contractual liability such as ISO CG 24 26 or 21 29; or 2) cross liability or suits by one insured against another.

b. Automobile Liability: Insurance Services Office form CA 00 01, code 1- Any Auto or including Hired and Non-Owned vehicles.

c. Workers' Compensation and Employers' Liability: Workers' Compensation insurance as required by the State of California and Employers' Liability.

d. Professional Liability (Errors and Omissions) (If applicable, see below)

2. Minimum Limits (as applicable) – Insurance coverage shall be with limits not less than the following:

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

a. Commercial General Liability – $2,000,000/occurrence and $4,000,000 annual aggregate or an aggregate of $2,000,000 that applies separately to this project (ISO CG 25 03 or 25 04).

b. Automobile Liability – $1,000,000 per accident for bodily injury and property damage.

c. Professional Liability/Malpractice/Errors and Omissions – $2,000,000 per occurrence and annual aggregate (If any engineer, architect, attorney, accountant, medical professional, psychologist, or other licensed professional performs work under a contract, or other professional contractors, such as computer and software designers, the contractor must provide this insurance. If not, then this requirement automatically does not apply.)

d. Workers' Compensation – Statutory Limits/Employers' Liability – $1,000,000/accident for bodily injury or disease (If no employees, this requirement automatically does not apply.)

3. It shall be a requirement under this Agreement that any available insurance proceeds broader than or in excess of the specified minimum Insurance coverage requirements and/or limits shall be available to the Additional Insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this Agreement; or (2) the broader coverage and maximum limits of coverage of any Insurance policy or proceeds available to the named Insured; whichever is greater.

4. Other Insurance Provisions

a. **Additional Insured Status** – The County, its officers, agents, employees, and volunteers shall be named as additional insured on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including, materials, parts, or equipment furnished in connection with such work or operations. Coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as CG 20 10 11 85 or if not available, through the addition of both CG 20 37 and one of the following: CG 20 10, CG 20 26, or CG 20 33). [NOTE: Evidence of additional insured is needed as a separate endorsement or comparable policy language due to wording on the certificate negating any additional coverage listed writing in the description box.]

b. **Primary Coverage** – The Contractor's policy shall be "primary and non-contributory" and will not seek contribution from the County's insurance or self-insurance and shall be at least as broad as CG 20 01 04 13.

c. **Notice of Cancellation** – Each insurance policy required above shall provide that coverage shall not be cancelled, except with notice to the County.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

d. **Waiver of Subrogation** – Contractor hereby grants to the County a waiver of any right to subrogation which any insurer of said Contractors may acquire against the County by virtue of the payment or any loss under such insurance. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation, but this provision applies regardless of whether or not the County has received a waiver of subrogation endorsement from the insurer.

5. The limits of Insurance required in this Agreement may be satisfied by a combination of primary and umbrella or excess Insurance. Any umbrella or excess Insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non-contributory basis for the benefit of the County of Yolo (if agreed to in a written contract or agreement) before the County's own Insurance or self-insurance shall be called upon to protect it as a named insured.

6. Said policies shall remain in force through the life of this Agreement and, with the exception of professional liability coverage, shall be payable on a "per occurrence" basis unless the County Risk Manager specifically consents in writing to a "claims made" basis. For all "claims made" coverage, in the event that the Contractor changes insurance carriers, Contractor shall purchase "tail" coverage covering the term of this Agreement and not less than three years thereafter. Proof of such "tail" coverage shall be required at any time that the Contractor changes to a new carrier prior to receipt of any payments due.

7. The Contractor shall declare all aggregate limits on the coverage before commencing performance of this Agreement, and the County's Risk Manager reserves the right to require higher aggregate limits to ensure that the coverage limits required for this Agreement as set forth above are available throughout the performance of the Agreement.

8. Any deductibles or self-insured retentions must be declared to and are subject to the approval of the County Risk Manager. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied either by the named Insured or Yolo County.

9. Insurance is to be placed with insurers with current A.M. Best's rating of no less than A:VII, unless otherwise approved by the County Risk Manager.

10. The policies shall cover all activities of Contractor, its officers, employees, agents and volunteers arising out of or in connect with this Agreement.

11. For any claims relating to this Agreement, the Contractor's insurance coverage shall be primary, including as respects the County, its officers, agents, employees and volunteers. Any insurance maintained by the County shall apply in excess of, and not contribute with, insurance provided by Contractor's liability insurance policy.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

B. Prior to commencing services pursuant to this Agreement, Contractor shall furnish the County with original policies or endorsements reflecting coverage required by this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. All endorsements are to be received by, and are subject to the approval of, the County Risk Manager before work commences. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by the specifications.

C. During the term of this Agreement, Contractor shall furnish the County with original endorsements reflecting renewals, changes in insurance companies and any other documents reflecting the maintenance of the required coverage throughout the entire term of this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications. Yolo County reserves the right to obtain a full certified copy of any Insurance policy and endorsements. Failure to exercise this right shall not constitute a waiver of right to exercise later.

D. Contractor agrees to include with all Subcontractors in their subcontract the same requirements and provisions of this Agreement including the indemnity and Insurance requirements to the extend they apply to the scope of the Subcontractor's work. Subcontractors hired by Contractor agree to be bound to Contractor and the County of Yolo in the same manner and to the same extent as Contractor is bound to the County of Yolo under the Contract Documents. Subcontractor further agrees to include these same provisions with any Sub-subcontractor. A copy of the Owner Contract Document Indemnity and Insurance provisions will be furnished to the Subcontractor upon request. The General Contractor/and or Contractor shall require all Subcontractors to provide a valid certificate of insurance and the required endorsements included in the Agreement prior to commencement of any work and General Contractor/and or Contractor will provide proof of compliance to the County of Yolo. (Coverage can be provided in the form or an endorsement to the Contractor's insurance at least as broad as CG 20 38 for operations and CG 20 40 for completed operations).

E. Contractor shall maintain insurance as required by this Agreement to the fullest amount allowed by law and shall maintain insurance for a minimum of five years following the completion of this project. In the event Contractor fails to obtain or maintain completed operations coverage as required by this Agreement, the County at its sole discretion may purchase the coverage required and the cost will be paid by Contractor.

4. **Paragraph XV.A.** of the Agreement is hereby amended to read as follows:

XV. NOTICE

A. All notices shall be deemed to have been given when made in writing and delivered or mailed to the respective representatives of County and Contractor at their respective addresses as follows:

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

EXHIBIT A-2: SCOPE OF WORK

PRELIMINARY ENGINEERING AND DESIGN SERVICES FOR THE KNIGHTS LANDING FLOOD RISK REDUCTION AND MULTI-BENEFITS PROJECT

The County of Yolo received a grant (DWR Funding Agreement 46000013795) under the California Department of Water Resources (DWR) Small Community Flood Risk Reduction Program (SCFRRP) to design and implement a portion of the recommended Knights Landing Flood Management Project (Project) described in the Knights Landing Small Community Flood Risk Reduction Feasibility Study Report (July 2019), as detailed in the following sections of this Scope of Work (SOW).

The Project area is in the Knights Landing Basin, at the northern boundary of Yolo County, at the Sacramento River and northwest end of the Yolo Bypass. It is bounded by the Knights Landing Levee System (KLLS) with approximately 15.2 miles of levee that provide protection from flows in the Sacramento River on the East; the Knights Landing Ridge Cut (KLRC) on the West; the Colusa Basin Drain, through the Sycamore Slough, in the North; and the Yolo Bypass in the South. These levees are associated with the State Plan of Flood Control (SPFC), in Yolo and Sutter County.

This SOW describes the scope and deliverables for the design of the following features of the Project (Figure 1) as it relates to the DWR funding agreement, and the associated budget and schedule.

1. Levee Improvements
    - Sacramento River, right bank between LM 2.7 to LM 2.9, LM 3.0 to LM 3.2 and LM 4.3 to LM 5.4) and Widened Parking area on Sacramento River near Wild Irishman Bend;
    - Sacramento River, Adjacent to Town (right bank between LM 0.13 to LM 0.9) and New Cross Levee Loop Trail;
    - Sacramento River, right bank between LM 0.9 to LM 5.0; and
    - Knights Landing Ridge Cut (KLRC) (left bank between LM 4.9 to LM 5.3) and New Cross Levee Loop Trail.
2. Portuguese Bend and Grays Bend Habitat Enhancement,
3. Drainage Infrastructure Improvements, and
4. New Cross Levee (6,800 linear feet across the Knights Landing Basin from Sacramento River LM 4.9 to the KLRC LM 0.9) and New Cross Levee Loop Trail.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

MBK Engineers will assist Yolo County with the program and project management, including the grant management, and lead the consultant team. The organization chart for the consultant team is in Figure 2.

Task 1: Geotechnical Investigation (DWR-1)

Task 1 will include geotechnical investigation and exploration to determine the subsurface conditions along the right bank of the Sacramento River levee, Adjacent to Town, the left bank of the KLRC levee and the New Cross Levee.

GEI Consultants, Inc will be leading the design effort for the Sacramento River levee, Adjacent to Town and the New Cross Levee. Gregg Drilling and/or Tabor Drilling will be assisting GEI Consultants on this task.

KSN will be leading the design effort for the KLRC levee. Shannon and Wilson (formerly Hultgren & Tillis) will be assisting KSN on this task, along with Gregg Drilling.

Wood Rodgers will be leading the design effort for the Sacramento River levee improvements below the proposed New Cross Levee to LM 4.0 and Shannon and Wilson (formerly Hultgren & Tillis) is assisting on this task along with Gregg Drilling.

Geotechnical investigation for the levee improvements will be limited to the right bank along the Sacramento River, Adjacent to Town from LM 0.13 and LM 0.9, to the left bank of the KLRC levee from LM 4.9 and LM 5.3, to the New Cross Levee alignment through the Knights Landing Basin between the Sacramento River and KLRC levees, and proposed internal drainage facilities, as shown in Figure 1. Preliminary profile sheets and plan sheets will be prepared to include historic explorations, DWR Non-Urban Levee Evaluation (NULE) Phase 2 explorations for Knights Landing, waterside and landside toes, and the updated 100-year water surface elevation (WSE) (on the profile sheets only). Available data will be reviewed to identify the areas requiring additional subsurface data for the design level evaluation of existing conditions and remedial repairs.

The explorations within the footprint of the existing Sacramento River levee and the KLRC levee will be planned and described in a Drilling Program Plan (DPP), as required by the Central Valley Flood Protection Board (CVFPB) and the United States Army Corps of Engineers (USACE). The DPP will outline the proposed exploration locations, methods, depths, types of sampling, and laboratory tests of collected samples. DPP will be updated based on the comments received and submitted for approval. DPP will be submitted to the CVFPB with review from USACE. Prior to performing geotechnical explorations along the alignment of the New Cross Levee, a Subsurface

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Exploration Workplan will be prepared outlining the proposed exploration locations, methods, depths, types of sampling, and laboratory tests of collected samples.

Geotechnical explorations will be performed through the existing levee and foundation along the levee crown and/or the landside of the levee to characterize the subsurface conditions for geotechnical analysis, meet USACE design level spacing and depth requirements, and provide information to appropriate depths for design purposes. For the Sacramento River Levee, Adjacent to Town it is assumed that there will be at least 15 but no more than 25 explorations and there will be between 20 and 40 explorations for the New Cross Levee. Based on the data gaps identified through the data review process described above, the explorations may include a combination of cone penetration tests (CPTs) and geotechnical borings (e.g. hollow stem auger and mud-rotary). Exploration depths will also consider specific data needs at the location which may include characterization of the shallow foundation (on the order of 30 feet) and/or deep foundation (up to 150 feet) materials.

Site conditions will be explored along the existing levee alignment along the KLRC at about 1,000 feet spacing in both the levee crest and the levee toe at 5 locations, two additional borings will be drilled to the landside of the levee where access is available, for a total of 12 borings. The crest borings will extend to depths up to 65 feet below the crest and the landside borings will extend up to 50 feet deep. Exploration of the existing landside slope to shallow depth will be done using a backhoe or portable drilling equipment. The borings will be drilled with truck mounted drilling equipment.

For the investigation of the proposed drainage facilities, six boreholes will be advanced with a truck-mounted drill to a depth of 50 feet below the existing ground surface. Subsurface conditions encountered during drilling will be logged by a geologist or engineer and monitored by a cultural resource monitor, with locations documented by the Global Positioning System (GPS).

Geotechnical laboratory testing will be performed on selected soil samples collected during the subsurface exploration program to aid in soil classification and development of engineering parameters for levee design. Sampling and laboratory testing to evaluate material properties for the existing levee and foundation soils will be performed. Soil testing may include gradation, unit weight, in-situ moisture, Atterberg limits, compaction, permeability, consolidation, and shear strength.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

A Geotechnical Data Report (GDR) will be prepared that will present available geotechnical data and data collected during the investigation phase of this project. Information in this report will include:

- Updated Profile sheets and Plan sheets, including new explorations completed under this scope
- Summary of current geotechnical field investigations and laboratory testing
- Borehole and CPT logs
- Laboratory testing results

Potential Borrow Site for Project

As needed, GEI Consultants and Gregg Drilling and/or Tabor Drilling will be leading the investigation of borrow material for the Project. Borrow material will be required for the levee improvements and the New Cross Levee. To identify suitable material, geotechnical investigation and evaluation will be performed to inform the plans, specifications and estimate portion of the Project design. The geotechnical investigation will be limited to test pit exploration of the potential borrow site identified by the consultant team. Investigation is limited to approximately 50-acres of test pits, with an average of one test pit per acre. Subsurface conditions encountered during investigation will be logged by geologist or engineer, monitored by a cultural resource monitor, and locations documented by GPS.

A Subsurface Exploration Workplan will be prepared outlining the proposed exploration locations, methods, depths, types of sampling, and laboratory tests of collected samples.

Geotechnical laboratory testing will be performed on selected bulk soil samples collected from the test pit exploration to aid in soil classification and identification of material meeting design requirements for the new levee fill. Anticipated soil testing may include the following: gradation, moisture content, Atterberg limits, compaction, permeability, consolidation, and shear strength. A Borrow Site Technical Memorandum will be prepared. The memorandum will present the data collected through the borrow site investigation program.

Information in this report will include:

- Summary of test pit investigations and laboratory testing
- Test pit logs
- Laboratory testing results
- Conclusions on material suitability

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 1 Deliverables

- Geotechnical Exploration DPP (Sacramento River, Adjacent to Town and KLRC)
- Subsurface Exploration Workplan (New Cross Levee and Borrow Sites)
- Draft and Final GDR (including results from borings and a geophysical survey)
- Draft and Final Borrow Site Technical Memorandum

Third Amendment – increase of budget by $70,725 to perform additional geotechnical investigation along the Sacramento River downstream of the New Cross Levee; added Tabor Drilling as possible sub-sub consultant.

Task 1 Budget = $2,300,000

Task 2: Design Plans, Specifications, and Estimates (DWR-2)

The results and conclusions from the geotechnical explorations, the hydrology and hydraulic modeling will be used to account for climate change, and the surveying and utilities identification for the Project. This task includes, but not limited to performing and preparing: all related field investigations (surveying/biological/cultural), the Basis of Design, hydraulic modeling, geotechnical engineering, and the 65%, 95% and Final (100%) design plans, except where described otherwise, technical specifications and construction cost estimates (PS&E) for the Project and Bid documents. At a minimum, the review of the plans will be reviewed by DWR, the CVFPB and USACE for the levee improvements and New Cross Levee. All final Project documents for bidding and contracting will be prepared based on Yolo County standard documents. The technical specifications will follow the Construction Specification Institute (CSI) Master Format 2016 Format.

If required by USACE, the County will comply with the Engineering Circular (EC) 1165-2-220, for Safety Assurance Reviews (SARs) for the Project levee designs. The SAR process is described separately below.

The levee designs for the Sacramento River, Adjacent to Town, the KLRC, and the New Cross Levee will be in accordance with the Code of Federal Regulations (CFR), Title 44 Section 65.10 to meet the Federal Emergency Management Agency's (FEMA's) 100-year accreditation. The completed civil engineering and geotechnical engineering design and analyses will be compiled into an appendix for submittal for the Knights Landing FEMA package.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Hydrology and Hydraulic Modeling

MBK Engineers will be performing the hydrology and hydraulic modeling for the project. ESA may assist MBK Engineers. MBK Engineers will verify 100-year water surface profiles for the Knights Landing Basin along the Sacramento River right levee, along the KLRC left levee, the right bank of the Sycamore Slough levee and internal to the Basin for the New Cross Levee. MBK Engineers will use the two recently completed USACE Central Valley Hydrology Study (CVHS) event selection for this region 1) USACE, Sacramento District American River Common Features 2016 and 2) MBK Engineers event selection for the Sacramento River General Reevaluation Report study for DWR and the Sacramento Area Flood Control Agency. These will be used for the levee designs. The Project's hydrodynamic modeling will use the climate change assumptions developed during preparation of the 2017 Update to the Central Valley Flood Protection Plan (CVFPP) to assess how larger storm events would affect project design. In addition, the consultant team will consult recent resources on climate change in California during the Project design process, including the following: California Natural Resources Agency's Safeguarding California Plan: 2018 Update, Cal-Adapt, the California Climate Commons, and DWR's 2016 Draft Technical Memorandum: Climate Change Analysis – Phase IIB, Point Blue Conservation Science's Climate-Smart Restoration Toolkit.

The detailed hydraulic modeling will identify WSE's over a range of flood frequencies (2-year through 100-year). Conducting this modeling of the Sacramento River and using the climate change projections will allow the consultant team to assess anticipated climate change impacts and to identify how project components can be adapted to minimize adverse effects.

To provide the level of protection with and without project implementation, additional seepage and stability analyses will be performed under Task 1 at several WSEs. Based on the results of these additional analyses the WSEs will correlate to a percent annual flood chance.

Task 2 (Hydrology and Hydraulic Modeling) Deliverables

- Draft and Final Modeling Reports (H&H models, GIS shape files, data spreadsheets)
- Draft and Final Hydraulic Impact Analysis

Surveying, Mapping, and Utility Investigations

Wood Rodgers, KSN and PSOMAS will providing the team with professional surveying services that will include establishing the horizontal and vertical survey control at the Project site. Horizontal survey control will be referenced to the California Coordinate System of 1983, Zone 3, U.S. Survey Foot units (CA83IIIF). Vertical control will be referenced to the North American Vertical Datum of 1988 (NAVD88). Digital orthophotos will be acquired using a Small Unmanned Aerial System (sUAS), to be used as background imagery for design sheet layouts. Ground based

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

surveys utilizing conventional and Global Positioning System/Global Navigation Satellite System (GPS/GNSS) surveying techniques to develop an existing topographic survey of the Project site.

In addition, utility research will be performed to include a desktop study, site reconnaissance, non-destructive utility locating and potholing, mapping, and coordination within the Project limits. Utility providers will be identified and provided a Utility Request Letter to utility companies.

Task 2 (Surveying and Utility) Deliverables:

- Electronic AutoCAD Civil 3D drawing file of base mapping/surveying.
- Text file of all surveyed points (P, N, E, Z, D format).
- Orthophotos in TIF format
- Digital files of utility contact summary in Excel format
- Electronic Mapping and Property Boundaries in AutoCAD 2018.

Safety Assurance Review (SAR) *(if required)*

If required by USACE, MBK Engineers will assist Yolo County to comply with USACE guidelines for U.S. Code title 33, section 408, outlined in (EC 1165-2-220, where the levee design portion of the Project would need a Type II Independent External Peer Review or SAR (as set out under Section 2035 of the Water Resources Development Act (WRDA) 2007) as part of the submission of the 408 request for approval to the USACE. As necessary, MBK engineers will assist Yolo County in hiring (under a separate contract) a panel of experts in design and construction of levee projects to provide the required SAR for the Project levee designs. As a part of this contract, MBK Engineers will provide a SAR Plan for Yolo County to submit to the CVFPB and USACE for review.

Geotechnical Engineering

The results of the field exploration and laboratory testing from Task 1 will be used to develop conclusions and recommendations for design the levee remediation. Geotechnical engineering analyses will include slope stability including static and seismic loading, settlement, and a seepage evaluation. Freeboard screening will also be performed for the updated WSE between LM 0.13 and LM 0.9. The Geotechnical Engineering Design Recommendations Report will include documentation of the geotechnical analyses performed for existing conditions and remedial alternatives. It will also include a conceptual level design dimensions of selected remedial alternatives.

Task 2 (Geotechnical Engineering) Deliverables

- Draft and Final Geotechnical Design Recommendations Report
- If needed, SAR Plan and SOW for separate Yolo County procurement

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

PS&E

MGE Engineering, Inc. will be updating the 2012 USACE completed design for the levee improvements to remediate underseepage for the USACE Authorized Sacramento Flood Control Project System Evaluation (SRFCP), Mid-Valley Levee Reconstruction Area 3, Sites 9, 10, and 11 (Mid-Valley). The USACE and CVFPB have an active Project Cooperation Agreement for this area, therefore a Section 408 permission should not be required. These areas are located along the Sacramento River, right bank between LM 2.7 to LM 2.9, LM 3.0 to LM 3.2 and LM 4.3 to LM 5.4 respectively.

KSN will be leading the design for the levee improvements along the KLRC will be for a landside stability improvement and waterside rock slope protection from LM 4.9 to LM 5.8. GEI Consultants, Inc. will lead the design along the right bank of the Sacramento River, Adjacent to Town, the design will include a combination berm and ditch fill from LM 0.86 to LM 0.9; drained stability berm from LM 0.67 to LM 0.86 and a deep cutoff wall from LM 0.13 to LM 0.67. A New Cross levee will be designed by GEI Consultants to reduce the potential for floodwaters to back up into the town of Knights Landing, and to provide up to 100-year level of protection. The design includes the New Cross Levee Loop Trail.

Wood Rodgers design the drainage improvements that will include an expanded channel along the east side of Railroad Street south to the southeast corner of the town, then other drainage improvements necessary to convey the increased flow south and east to the existing pump station located approximately 2.25 miles downstream of the KLRC and Colusa Basin Drain confluence at the KLRC Canal left bank. New pipelines to convey flow beneath Railroad Street are anticipated at 2nd Street through 6th Street. The pipe will extend west towards Mill Street and be equipped with a drop inlet structure at each of these pipe crossings of Railroad Street. The addition of an additional pump and motor unit is anticipated for the pump station.
The consultant team will provide four design submittals, as described below.

Wood Rodgers is designing the levee improvements between the New Cross Levee downstream to Site 9 for freeboard, seepage and stability and between Site 9 to LM 4.0 for freeboard and between Site 10 and 11 for freeboard and seepage mitigation.

35% Plan Submittal - The plans will be developed to clearly convey the project's proposed design at a concept level. For LM 2.7 to LM 2.9 and LM 3.0 to LM 3.2 and about 2,400 feet starting at LM 4.3 (shallow cutoff wall), the 2012 USACE Mid-Valley plans will be compared to current levee standards. Any deviations from current standards will be revised to comply with current USACE standards. This plan submittal will include degrade limits and depth, width of working platform, landside and waterside slopes (if applicable), and configuration of the clay cap. Proposed patrol

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

roads and staging area locations will also be shown. Outline specifications will be prepared to identify the relevant specification sections that correspond to the work shown on the plans.

During this phase of design, the consultant team will initiate contact with the utility companies that have facilities adjacent to and crossing the levee to ascertain the presence of utilities that could be affected.

65% Plan Submittal - The 35% plans will be revised to incorporate the 35% review comments and developed to a 65% design completion level. This submittal will also have complete details and profiles for the preferred levee remediation (i.e., cutoff wall, seepage/stability berm), and patrol roads. The 65% design level technical specifications will be prepared based on the outline specifications from the 35% submittal. Complete quantities will be prepared to support the 65% design level cost estimate.

At the 65% stage of design, the consultant team will provide the support necessary to facilitate the acquisition of the temporary and permanent easements required for the Project. This effort will include the preparation of real estate take mapping and a real estate take register (if required). The consultant team will provide the utility companies with copies of the plans of facilities impacted by the Project to facilitate the utility design necessary to clear the obstructions.

95% Plan Submittal - The 65% plans, specifications, quantities, and real estate mapping will be revised based on the 65% review comments and developed to the 95% design level. At 95% stage, the plans, specifications, and quantities will be fully developed. The real estate take maps and register will be considered final.

100% (Final) Plan Submittal - The 95% plans, specifications and quantities will be revised based on the 95% review comments. The resulting 100% deliverable will be considered final and ready for construction contract bid advertising.

Task 2 (PS&E) Deliverables

- 35%, 65%, 95% and final design documentation (design plans, bid documentation including specifications and quantities)

Grays Bend and Portuguese Bend Habitat Enhancement

Douglas Environmental and River Partners will evaluate and design the restoration opportunities for two of the recommended habitat enhancement concepts for the Project at Portuguese Bend and Grays Bend. At Grays Bend, the design will include lowering the elevation of the interior

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

perimeter of the Grays Bend oxbow to expand the width of vegetated riparian area surrounding the oxbow channel. The excavated soil will be evaluated under Task 1 to be used as source material for the construction of berms for improvements along the Sacramento River or for the construction of the New Cross Levee.

Douglas Environmental shall prepare an environmental constraints analysis to identify the restoration opportunities on the two sites and to ensure the restoration concepts are feasible and practicable, in association with the Project levee improvements, and that they will specifically achieve measurable objectives included in the CVFPP Conservation Strategy. The consultant team will ensure that the restoration concepts are acceptable to stakeholders, to include local maintaining agencies, residents, business owners in Knights Landing, neighboring agricultural landowners, Sutter County, the California Department of Fish and Wildlife and USACE, as expressed during outreach meetings. River Partners will prepare a Design Report that includes a detailed description of the project characteristics including the habitat improvements, operational constraints, long-term operations and maintenance requirements, water rights, and adaptive management components. This will also include a detailed description of the project's contributions to the Conservation Strategy metrics in the Lower Sacramento River Conservation Planning Area (CPA). It will also include the key steps necessary to implement the project including permitting, construction schedules, required construction equipment, areas of responsibility, required funding, and expected annual budgets.

Task 2 (Portuguese Bend and Grays Bend) Deliverables

- Draft and Final Preliminary Design Report (65% design package and cost estimate)
- Memorandum documenting stakeholder input
- Modeling and outputs from salmon habitat quantification tool

Third Amendment – reduction of budget by $1,903,824 to cover the Emergency Levee Rebuild at Sites 9 and 10 and cover County expenses for the SAR Panel and PG&E.

Task 2 Budget = $4,513,719

Task 3: Environmental Documentation (DWR-3)

Construction of the Project will require California Environmental Quality Act (CEQA) environmental review process to be completed. For the levee improvements the National Environmental Protection Act (NEPA) process will be required. Yolo County is the lead agency for

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

the CEQA process. USACE is the lead agency for the NEPA process; however, USACE may rely upon the Yolo County to complete NEPA documentation for them.

HDR, Inc will conduct CEQA compliance as well as necessary project information and assessments necessary to support NEPA documentation for federal actions (Sections 404, 408, etc.). The CEQA documentation will include all statutorily required notices and postings and preliminary CEQA support documentation. On behalf of Yolo County, HDR, Inc will coordinate with the USACE as the lead federal agency for required NEPA documentation.

Task 3 Deliverables

- Notices and postings of a Notice of Availability and a Notice of Determination
- Draft and Final CEQA documentation

Task 3 Budget = $1,021,167

Task 4: Permitting and Cultural Resources Compliance (DWR-4)

HDR, Inc. will perform the necessary surveys to support any application for obtain the necessary local, State and Federal permits for implementation of the Project. The Feasibility Report identified the regulations and ordinances listed as a preliminary assessment which will be refined through project design and a detailed project description.

HDR, Inc will assist Yolo County in consulting with California Native American Tribes as required pursuant to CEQA. This will include performing technical studies and cultural monitoring during Task 1 and Task 6 efforts.

Task 4 Deliverables

- Permit application packages
- Administrative record (consultation letters, summary of tribal meetings, review comments on the pertinent sections of CEQA documentation)

Third Amendment – increase of budget by $36,620 to cover bird surveys and biological monitoring during construction and/or geotechnical investigation.

Task 4 Budget = $1,300,000

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 5: Real Estate (DWR-5)

Monument, Inc. will assist Yolo County by preparing Phase 1 Environmental Site Assessments (ESAs) for all properties to be acquired and will also complete Phase 2 ESAs for any parcels with the potential for hazardous materials. This will include a survey of existing titles and prepare site assessment.

For the Sacramento River, right bank between LM 2.7 to LM 2.9 and LM 3.0 to LM 3.2 and LM 4.3 to LM 5.4 and the KLRC, Monument, Inc. will prepare a right-of-way acquisition package to include legal descriptions, exhibit plats, and closure reports for each permanent right-of way acquisition, each temporary construction easement, each lease, each maintenance easement, and each utility easement. The legal descriptions will be prepared in metes and bounds format. The Monument, Inc will work closely with the County and the DWR team and adhere to DWR's Land Acquisition Process and requirements.

After CEQA compliance is completed and 95% design is the Monument, Inc. will assist the County to obtain appraisals, plat and legal descriptions, title support, and legal support for land acquisition and securing easements. For the KLRC it's estimated that seven parcels will be acquired.

The appraisal reports for the right of way need to accommodate the new construction area. The reports will be prepared in conformance with and subject to the requirements of the Uniform Standards of Professional Practice (USPAP) of the Appraisal Foundation to arrive at estimates of just compensation.

Monument, Inc. will assist Yolo County in performing acquisition and making contact with the property owners for the purpose of negotiating the acquisition of the real property interests. All offers will be made to property owners will include a written notice indicating they are eligible to receive reimbursement of up to $5,000 for reasonable costs of an independent appraisal of the property the County intends to purchase.

Once negotiations with the property owner are complete and acquisition documents are signed, the closing (escrow) process will begin, which involves coordinating the following activities with the designated title company. Monument, Inc. will assist Yolo County to work with the property owners, and the title company to obtain any other documents required for closing.

Monument, Inc. assist the County in preparing the Final Accounting Package for the individual real property acquisition for review and approval by DWR.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 5 Deliverables

- Phase 1 Environmental Site Assessments (ESAs) for all properties to be acquired
- Phase 2 ESAs for any parcels with the potential for hazardous materials. This will include a survey of existing titles and prepare site assessment.
- Obtain appraisals, plat and legal descriptions, title support, and legal support for land acquisition (for Sacramento River, right bank between LMs 2.7 to 2.9, LMs 3.0 to 3.2 and LM 4.3 to 5.4 and for the KLRC).
- Rights of Way Acquired per Approved Real Estate Plan and Property transferred to the Sacramento-San Joaquin Drainage District (SSJDD)
- Final Accounting Package

Third Amendment – increase of budget by $22,935 to cover the Temporary Construction Easement Right-of-Way that MBK Engineers paid on behalf of the County.

Task 5 Budget = $290,367

Task 6: Program and Project Management (DWR-7)

This task involves Yolo County staff and MBK Engineers time and effort for day-to-day managing and coordination of Project tasks and activities, including preparation of necessary reports, meetings, presentations to the Board of Supervisors (BOS) on the status and progress of the project, minimum of three meetings with DWR team to present Project plans and progress (for 35%, 65% and 95% design completion level) and stakeholder engagement. This task will also include grant management to include processing consultant invoices; preparing monthly progress reports to DWR; preparing Statement of Costs and DWR reimbursement; and maintaining and tracking the project scope, budget, and schedule.

Task 6 Deliverables

- Staff reports, presentations to the BOS
- Grant management, processing invoices, preparing monthly progress reports and Statement of Costs
- Meeting agendas and summaries
- Updated schedule
- General contract management

Third Amendment – increase of budget by $14,604 to cover additional Project Management services.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 6 Budget = $1,347,000

Task 7: Construction Management (DWR-6)

Task 7.1 – Pre-Construction Services

Task 7.1.1 – Biddability & Constructability Review
KSN will review the project 90% construction documents to identify constructability, work sequencing and/or permitting constraints, identify potential risk items in the design drawings and specifications (Contract Documents), and will offer suggestions to help mitigate project implementation risks. During the biddability and constructability review, KSN will work with the Design Team to develop a full list of required submittals so it is clear to the Contract what is required.

KSN will provide review comments in a tabular form to the Client. A meeting to review these comments will be held with the Client and Design Team, the outcome of which may be revision of the drawings and specifications to incorporate the review comments.

Task 7.1.1 Deliverables

- Constructability review comments in tabular format referencing sheet and/or specification section number.

Task 7.1.2 – Project Management Plan
The KSN team, with input from Client and Design Team, will create a Project Management Plan (PMP). The PMP will describe the processes to be applied in managing major portions of the work, from routing and review of submittals and requests for information (RFIs), Quality Assurance Testing, identifying points of contact for local and permitting agencies, utilities, and designers, to outline field procedures that provide confidence in the quality of materials in workmanship employed by the Contractor.

Task 7.1.2 Deliverables

- Draft and Final Project Management Plan

Task 7.1.3 – Pre-Bid Site Visit
This task assumes that the Client will handle bid advertising and processing, including preparing and issuing any addenda to the bid documents. The task also assumes that the Client will conduct a voluntary pre-bid site visit for prospective bidders to ensure that prospective bidders have an opportunity to see the project site first-hand to gauge the project constraints, complexities, access, and scale. KSN will assist the Client and Design Team in preparing for the pre-bid site

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

visit. KSN will attend the pre-bid site visit and take notes of key questions asked so the Design Team can update the construction bid documents as appropriate.

Task 7.1.3 Deliverables

- Meeting notes summarizing key questions asked and any follow-up items identified.

Task 7.2 – Construction Management Services

KSN will act as a liaison between the Client, the Contractor, the Design Team, and utility companies to ensure effective and timely communications, as well as resolution of construction questions and issues. Proposed services include project construction management (CM), and inspection/observation, Quality Assurance testing services, and monitoring of cutoff well embedment.

Task 7.2.1 – Construction Management and Administration

KSN will administer the construction contract on behalf of the Client. This contract administration will include:

- Preparing for and conducting project meetings.
- Tracking Contractor progress.
- Managing, tracking, and conducting initial review of Contractor submittals.
- Coordinating with the County and Design Team on submittal reviews.
- Reviewing and processing request for information on contract change order requests.
- Preparing weekly statements of working days.
- Reviewing and processing Contractor pay requests.
- Monitoring certified payrolls by preparing daily reports and performing spot checks of labor compliance.
- Reviewing Contractor's compliance with workplace safety and health standards.
- Reviewing and managing Contractor change orders and potential claims.
- Preparing cost estimates for potential contract changes.
- Compiling and maintaining documentation necessary for project monthly documentation or final documentation and closeout.
- Preparing reports documenting the progress of construction.

Task 7.2.1 Deliverables

- Weekly meeting agendas.
- Weekly meeting notes.
- Weekly statements of working days.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

- Contractor pay requests.
- Potential change cost estimates.
- A complete set of project construction management files to be provided to the County upon project completion.

Task 7.2.2 – Construction Inspection/Observation

KSN will provide construction inspection/observation for the duration of the project. The KSN team will perform field inspection and observation activities of the contractor and its subcontractors to confirm that the work follows contract drawings and specifications. For a total construction period of four (4) consecutive months, KSN has assumed the following:

- Construction observation by one staff person to cover the expected construction activities.
- Daily observation of Contractor progress and performance under the technical terms of the contract.
- Monitoring the Contractor's conformance with provisions of approval submittals.
- Coordination on project process, scheduling, required environmental/cultural resource monitoring.
- Collection of detailed construction progress documentation.
- Preparing daily and weekly field reports to document the work performed including photographs as necessary to depict job progress and/or address potential claims and verify the as-built drawings are complete.
- Documenting and coordinating with the Contractor corrective actions needed to bring work in compliance with the Contract Documents.
- Bringing potential safety issues to the attention of the Contractor who is responsible for jobsite safety.
- Coordinating with utility companies and the Contractor as necessary to facilitate utility relocation work, if required.
- Coordinating with the Client, Design Team, and Environmental Compliance Team.
- Conducting QA inspection in accordance with Contract Documents.

<u>Task 7.2.2 Deliverables</u>

- Daily reports.
- Weekly construction reports.
- Monthly reports.
- QA Documentation.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 7.2.3 – Testing & Inspection Services

KSN subconsultant Shannon and Wilson (SW), formerly Hultgren-Tillis Engineers, will provide Quality Assurance (QA) observation and testing for the project. Construction activities that will require observation and/or testing by HT include:

- Degrading of the existing levee to the working surface and excavation for the initial clay cap.
- Placement and compaction of the initial clay cap.
- Excavation of the cutoff wall trench and bentonite slurry replacement.
- Placement of the soil-bentonite cutoff wall backfill.
- Placement and compaction of the clap cap.
- General fill and aggregate base placement and compaction.

SW will perform QA materials testing of the bentonite slurry, soil-bentonite cutoff wall back-fill, and other materials at the frequency specified in Contract Document. SW will utilize the Contractor's on-site laboratory to perform viscosity, density, filtrate loss, and pH of the bentonite slurry and soil-bentonite cutoff wall backfill materials. SW will utilize an off-site USACE-accredited laboratory to perform permeability testing of the soil-bentonite cutoff wall backfill. HT will also use this off-site laboratory to perform other materials testing including sieve analysis, Atterberg limits, and compaction curves.

SW will provide a full-time technician during earthwork, cutoff wall, and aggregate baes operations to observe and check materials properties.

- Observation of cutoff wall excavation to confirm embedment into a low permeability soil.
- Compaction testing of the levee embankment fill as required in the Contract Documents.
- Checking the in-place dry density and moisture content of compacted material with a nuclear probe.
- Laboratory testing of materials to evaluate the materials maximum dry density and optimum moisture content.
- Comparison of laboratory results with the dry density measured in the field to calculate relative compaction.
- Preparing required reports and letters.

Task 7.2.3 Deliverables

- Daily reports.
- Materials testing reports.
- QA summary report in conformance with funding requirements.

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Task 7.3 – Post-Construction Services

The KSN team will provide post-construction services for the project, including construction administration closeout activities, preparation of the final construction project report, complete construction administration documentation, and final payment recommendations. The Contractor's as-built drawings will be monitoring to ensure that changes are tracked, logged, and red-lined indicating that the project was built according to the Contract Documents, approved addenda and change orders, and revisions. The Client will be provided with all construction administration documents.

Activities under this task will include:

- Preparing a final construction project report.
- Providing as-build drawings to the County for preparation of the record drawings.
- Preparing recommendations for final progress payment.
- Prepare and coordinate with Contractor on contract closeout documentation.

Task 7.3 Deliverables

- As-build drawings and field notes.
- Final construction report.
- Final pay recommendation.

Task 7 – Assumptions, Limitations, and Understandings

In addition to the above details, the proposed task is based on, and is limited to, the following assumptions, limitations, and understandings:

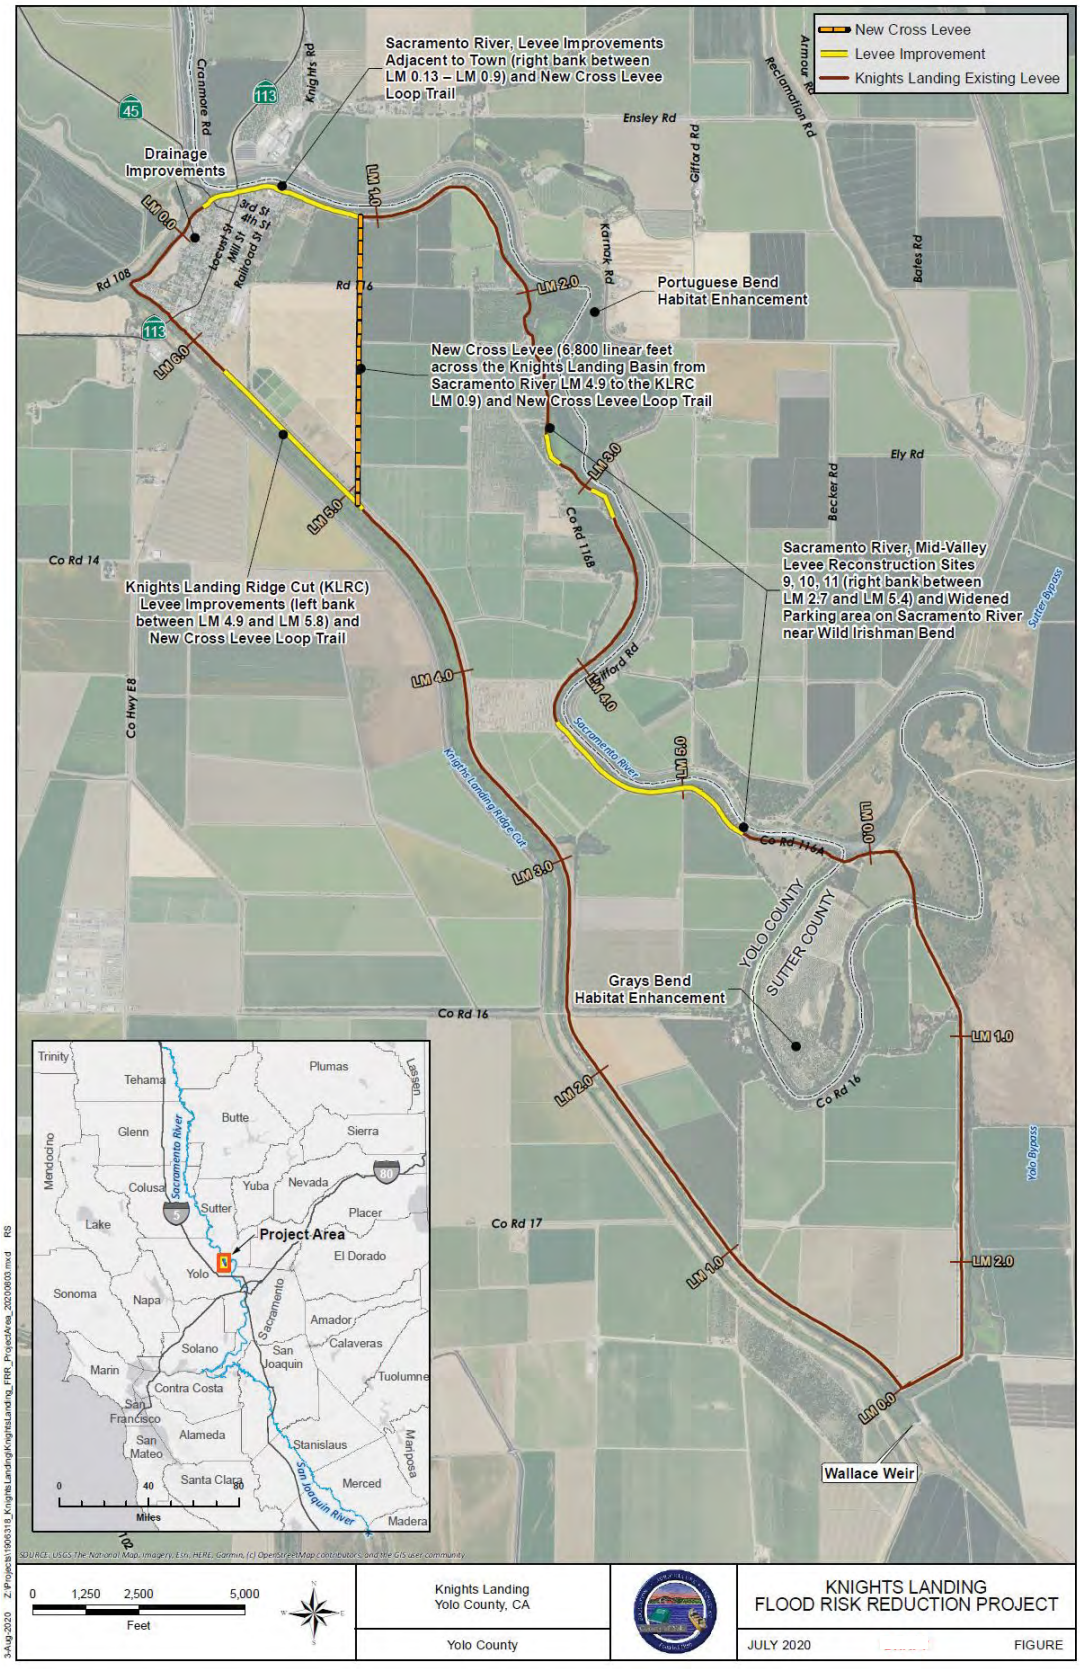
- The construction schedule is estimated to last four (4) consecutive months, until approximately September 2022.
- KSN has assumed staffing the project with one inspector under prevailing wage compensation requirements.
- Environment and Archaeological monitoring and permit compliance will be by others.
- Survey control, staking, surveys to determined progress payments, QA surveys, and the final 'line and grade' certification surveys will be by others.

Third Amendment – increase of budget by $1,758,940 for Contingency if FEMA does not cover the Emergency Levee Build at Site 9 & 10; updated Hultgren-Tillis Engineers name to Shannon and Wilson.

Task 7 Budget = $2,406,340

DocuSign Envelope ID: CCDE749F-3024-4336-BFF2-1B988F8A0E2D

Overall Contract Budget Breakdown*



Task	Amount
Task 1: Geotechnical Investigation (DWR-1)	$ 2,300,000
Task 2: Design Plans, Specifications, and Estimates (DWR-2)	$ 4,513,719
Task 3: Environmental Documentation (DWR-3)	$ 1,021,167
Task 4: Permitting and Cultural Resources Compliance (DWR-4)	$ 1,300,000
Task 5: Real Estate (DWR-5)	$ 290,367
Task 6: Program and Project Management (DWR-7)	$ 1,347,000
Task 7: Construction Management (DWR-6)	$ 2,406,340
Total:	**$ 13,178,593**

**Budget was adjusted by Third Amendment to reallocate $1,903,824 from Task 2 to Task 1 (+$70,725), Task 4 (+$36,620), Task 5 (+$22,935), Task 6 (+14,604), and Task 7 (+$1,758,940).*

There was no change in the maximum compensation.

Note 3: *Per Diem Expense is a Minimum of $220.00 per day, per person; actual rates are based on project location, per current General Services Administration Rates.

OCTOBER 15, 2022 TIER II

County of Yolo
www.yolocounty.org

To: The Chair and Members of the Board of Supervisors

Consent-Community Services 14.
Board of Supervisors **Natural Resources**

Meeting Date:	06/06/2023
Brief Title:	Amendment to YCFCWCD Agreement
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Elisa Sabatini, Manager of Natural Resources, Department of Community Services, x5773
Supervisorial District Impact:	Countywide

Subject

Approve fourth amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with the Yolo County Flood Control and Water Conservation District, increasing total compensation from $360,000 to $860,000 to develop and implement a comprehensive flood risk reduction and flood management strategy for the western valley floor portion of Yolo County and adopt budget resolution increasing Public Works budget by $500,000. (No general fund impact) (4/5 vote required) (Lindbo/Sabatini)

Recommended Action

A. Approve fourth amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with the Yolo County Flood Control and Water Conservation District, increasing total compensation from $360,000 to $860,000 to develop and implement a comprehensive flood risk reduction and flood management strategy for the western valley floor portion of Yolo County (Attachment A); and

B. Adopt a budget resolution increasing Public Works budget by $500,000 (Attachment B).

Strategic Plan Goal(s)

Safe Communities
- Emergency preparedness & resiliency
- Infrastructure

Sustainable Environment
- Quality and quantity of water
- Climate action and resilience

Flourishing Agriculture
- Agricultural preservation
- Flood Insurance

Robust Economy
- Rural Community Support

Reason for Recommended Action/Background

On June 4, 2019, the Board of Supervisors (Item #32) approved the FloodSAFE Yolo 2.0 program, a comprehensive effort led by the County and the Yolo County Flood Control and Water Conservation District (YCFCWCD) to develop and implement a comprehensive flood risk reduction and flood management strategy for the western valley floor portion of Yolo County. FloodSAFE Yolo was first undertaken in 2006 by the County, the City of Woodland, and YCFCWCD in response to major storm events in 2005/2006. That original effort concluded after two years, but resulted in the development of several key technical reports, one of which led to the Lower Cache Creek Feasibility Study, a Study and proposed flood management project that the City is currently trying to implement.

During January and February 2019, the western side of Yolo County experienced significant localized flooding. This flooding situation is a recurring problem taking place almost every year when average or above average precipitation occurs. There is no formal comprehensive flood prevention and management strategy for the western side of Yolo County. Instead, various agencies and landowners attempt individually to maintain drainages where feasible. Additionally, annual meetings are held among government agencies to prepare for possible flooding. When flood events occur, it becomes an emergency management exercise to contain the flooding where practicable and to detour and evacuate people otherwise. In June 2019, the Board and the Yolo County Flood Control and Water Conservation District jointly agreed to fund ($100,000 each, per year) and implement FloodSAFE Yolo 2.0.

Mission Statement

The FloodSAFE Yolo 2.0 Program (FSY2.0) will minimize the risk from flooding in rural areas of Yolo County to the maximum extent possible. FSY 2.0 will focus upon areas that are not currently addressed by existing flood control programs managed by other entities.

Founding Principles

- Work collaboratively with the agricultural, environmental, local government, and regulatory agency, and public stakeholders in the development of policies that reduce the risks associated with localized and regional flooding;
- Develop performance measures and reporting periodically to Yolo County, stakeholders, and the public regarding the progress we have made in developing acceptable policies and projects;
- Remain aware of relevant federal, state, and regional flood and environmental policies;
- Utilize the most appropriate technology available to forecast impacts associated with flood and environmental management policies and recommend actions based upon the technology while respecting the quality of life in Yolo County;
- Remain sensitive to the costs associated with environmental and flood management policies, which could become a burden to property owners, local governments, and other stakeholders; and
- Pursue and implement our work in a collaborative, cost-effective, and efficient manner in order to demonstrate that we are trustworthy guardians of the public's resources.

Since 2019, the FloodSAFE Yolo 2.0 effort has undertaken the following:

- Town of Madison: Study, design, and construction of approximately $600,000 in drainage improvements in and around the town of Madison in 2020, resulting in minimal flood impacts during the atmospheric storm events of 2022/2023;
- Rolling Acres/West Plainfield: Review and analysis of existing studies and literature related to valley floor flooding that affects the areas surrounding the Yolo County Airport, which led to the formation of the Rolling Acres/West Plainfield Flood Ad Hoc Subcommittee (Supervisors Barajas and Frerichs);
- Flood Monitoring: Additional sensors and monitors have been purchased and installed, and connected to the YCFCWCD's SCADA system to improve early flood detection and data collection;
- Improved Maintenance: Mapping of waterways to determine whether private or public, jurisdictional authority (if any), and coordinated maintenance of publicly maintained sloughs and waterways; and
- State Route 16 Flood Mitigation Analysis: Study and feasibility analysis of additional improvements, such as rerouting peak storm events into retention/detention areas, to reduce flood risk to the towns of Esparto and Madison, and reduce flood waters that affect Highway 16. This effort was funded by a CalOES/FEMA grant (HMGP #4407-432-9R).

The subject of this recommended action is the final bullet - the State Route 16 Flood Mitigation Analysis. This effort is funded by a grant from CALOES/FEMA. Upon conclusion of the grant funded feasibility analysis for Highway 16 flood risk reduction projects, there remained a balance of $201,933.80 on the grant funding contract. CalOES staff encouraged the County to undertake additional work on the project and expend the full grant amount.

Staff Recommendation

The additional $500,000 will allow the proposed project to be taken from the feasibility analysis stage through 35% design and engineering, including additional hydraulic analysis, geotechnical investigations, and identification of potential environmental impacts. This additional scope of work also includes robust public outreach, including fact sheets, online outreach, and open houses. Staff recommends that the Board approve Amendment #4 to the intergovernmental agreement with the Yolo County Flood Control and Water Conservation District, increasing the total agreement amount by $500,000, from a maximum of $360,000 to a new maximum of $860,000. The additional expenses will be paid from the existing CalOES/FEMA grant ($201, 933.80) and the Madison Flood Mitigation Fund ($298,066.20). There is no general fund expenditure associated with this request.

Collaborations (including Board advisory groups and external partner agencies)

Staff have collaborated with Yolo County Public Works, County Administrators Office, Madison CSD, Madison FPD, Yolo County Flood Control and Water Conservation District, and the Yocha DeHe Wintun Nation.

Competitive Bid Process/Vendor Performance

Not applicable; the County proposes to amend the existing intergovernmental agreement with Yolo County Flood Control and Water Conservation District. The purpose of the agreement is to jointly fund, analyze, and implement flood risk reduction activities, consistent with FloodSAFE Yolo 2.0.

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$500,000
Amount budgeted for expenditure	$0
Additional expenditure authority needed	$500,000
One-time commitment	Yes

Source of Funds for this Expenditure	
CalOES/FEMA grant	$201,934
Madison Flood Mitigation	$298,066

Further explanation as needed

The Governor's Office of Emergency Services (CalOES) encouraged the County to conduct additional analysis on flood risk reduction activities under consideration for the town of Madison with unspent grant funds (CalOES HMGP #4407-432-9R). The additional analysis will cost $500,000, with $201,933.80 being paid from the funding balance on the HMPG grant and $298,066.20 paid from the Madison Flood Mitigation Fund. There is no general fund impact from this request. The unused portion from the current fiscal year will be re-budgeted in FY2023-24 during the Adopted Budget process.

YOLO COUNTY AGREEMENT NO. _____

(Fourth Amendment to Agreement No. **7676-2020-FLOODSAFE2.0** with Yolo County Flood Control and Water Conservation District, relating to Floodsafe Yolo 2.0 Program Services, to Increase the Maximum Compensation for continued services and Extend the Term)

THIS Agreement is made and entered into as of this **6th** day of **June** 2023, by and between the **County of Yolo**, a political subdivision of the State of California ("County"), and **Yolo County Flood Control and Water Conservation District** ("District"). County and District are jointly referred to as the "Parties" and agree as follows.

WHEREAS, on or about August 26, 2019, the Parties entered into an agreement for District to provide Floodsafe Yolo 2.0 Program services to the County (Agreement No. 7676-2020-FLOODSAFE2.0); and

WHEREAS, on or about June 23, 2020, the Parties entered into a First Amendment of Agreement No. 7676-2020-FLOODSAFE2.0 to revise the terms of payment, increase the maximum compensation, and revise the scope of services; and

WHEREAS, on or about May 4, 2021, the Parties entered into a Second Amendment of Agreement No. 7676-2020-FLOODSAFE2.0 to extend the term; and

WHEREAS, on or about May 24, 2022, the Parties entered into a Third Amendment of Agreement No. 7676-2020-FLOODSAFE2.0 to increase the maximum compensation and extend the term; and

WHEREAS, the parties wish to further amend Agreement No. 7676-2020-FLOODSAFE2.0 to increase the maximum compensation for continued services per proposal attached and extend the term.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. Paragraph 9 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   9. TERM. This Agreement will terminate on **December 31, 2024**, unless otherwise extended in writing by the Parties prior to that date.

2. Paragraph I.A of Exhibit 1 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   I. TASK 1: FloodSafe Yolo 2.0 Program:

   A. The District will retain services of an experienced flood management professional and other support services as deemed appropriate. The District will use these resources in developing the institutional, financial and legal framework for creating an ongoing flood management division within the District. The initial funding will be provided by the participating entities for the period extending through **December 31, 2024**. This funding will allow for a focused effort to develop a long-term funding source and institutional framework for continuing regional flood management activities (implementation, maintenance, and planning). Some of this funding will be used for implementation of specific projects. Other specific tasks are outlined below.

3. Paragraph II of Exhibit A of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

II. BUDGET

A. Initially, County and district shall each contribute up to a maximum of $100,000 per year for a combined $200,000 over the term of this Agreement as Funds for this Task. Further, County shall contribute up to a maximum of $30,000 per fiscal year for fiscal years 2021/22 and 2022/23. For continued services outlined in Proposal for Professional Engineering Services, County shall contribute up to a maximum of $500,000 over fiscal years 2022/23 and 2023/24. In addition, as full compensation for reimbursement of all expenses incurred by District in the performance of the Madison Public Works Drainage Improvement Project, the County shall also contribute Funds for this Task in an amount up to but shall not exceed $100,000. Therefore, the total maximum Funds contributed to this Task is $860,000. Authorized Expenses under this Task shall include the following:

1. Paying a salary for a contract employee(s) and/or consultant(s) (including salary, benefits, and incidental office expenses).
2. Development and/or validation of flood maps, hydrological, climatological, and other foundational information.
3. Engineering and legal work to develop and appropriate overall governance structure and/or assessment district(s) within defined zones of benefit.
4. Development of potential flood management solutions for the localized floodplain areas and develop justification and boundaries for the establishment of a benefit district.
5. Implementation of actual flood management work (e.g. identified waterway maintenance schedule).
6. Land acquisitions.

4. Except as specifically amended hereinabove, Agreement No. 7676-2020-FLOODSAFE2.0 shall remain in full force and effect according to its terms.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first written above.

AMENDMENT #1

YOLO COUNTY AGREEMENT NO. 20-100

(First Amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with Yolo County Flood Control and Water Conservation District, relating to Floodsafe Yolo 2.0 Program Services, to revise the Terms of Payment, increase the Maximum Compensation, and Revise the Scope of Services)

THIS First Agreement is made and entered into as of this **23rd** day of **June**, 2020, by and between the **County of Yolo**, a political subdivision of the State of California ("County"), and **Yolo County Flood Control and Water Conservation District** ("District"). County and District are jointly referred to as the "Parties" and agree as follows.

WHEREAS, on or about August 26, 2019, the parties entered into an agreement for District to provide Floodsafe Yolo 2.0 Program services to the County (Yolo County Agreement No. 7676-2020-FLOODSAFE2.0); and

WHEREAS, the parties wish to amend Agreement No. 7676-2020-FLOODSAFE2.0 to revise the terms of payment, increase the maximum compensation, and revise its scope of services.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. Paragraph II of Exhibit A of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

II. BUDGET

A. Initially, County and District shall each contribute up to a maximum of $100,000 per year for a combined $200,000 over the term of this Agreement as Funds for this Task. In addition, as full compensation for reimbursement of all expenses incurred by District in the performance of the Madison Public Works Drainage Improvement Project, the County shall also contribute Funds for this Task in an amount up to, but shall not exceed $100,000. Therefore, the total maximum Funds contributed to this Task is $300,000. Authorized Expenses under this Task shall include the following:

1. Paying a salary for a contract employee(s) and/or consultant(s) (including salary, benefits, and incidental office expenses).
2. Development and/or validation of flood maps, hydrological, climatological and other foundational information.
3. Engineering and legal work to develop and appropriate overall governance structure and/or assessment district(s) within defined zones of benefit.
4. Development of potential flood management solutions for the localized floodplain areas and develop justification and boundaries for the establishment of a benefit district.
5. Implementation of actual flood management work (e.g. identified waterway maintenance schedule).
6. Land acquisitions.

2. Except as specifically amended hereinabove, Agreement No. 7676-2020-FLOODSAFE2.0 shall remain in full force and effect according to its terms.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first written above.

Brief Title: FloodSAFE Yolo 2.0 Agreement - 2nd Amendment

From: Jill Cook, Deputy County Administrator, County Administrator's Office

Staff Contact: Elisa Sabatini, Manager of Natural Resources, County Administrator's Office, x5773

Subject

Approve second amendment to FloodSAFE Yolo 2.0 Agreement extending expiration date to June 30, 2021. (No general fund impact) (Cook/Sabatini)

Recommended Action

Approve second amendment to FloodSAFE Yolo 2.0 agreement extending expiration date to June 30, 2021.

Strategic Plan Goal(s)

Safe Communities

Flourishing Agriculture

Reason for Recommended Action/Background

Background

As a result of flooding events in western Yolo County 2017 and 2019, the County identified a need for a more comprehensive approach to flood prevention. On June 4, 2019, the Yolo County Board of Supervisors received a presentation on this identified need and authorized the revival of a previous regional effort from 2007 referred to as "FloodSAFE Yolo". (Item No. 32, June 4, 2019 Board meeting) The County and the Yolo County Flood Control and Water Conservation District ("District") entered into an agreement (provided as Attachment B to this staff report) and each contributed $100,000 in FY 19/20 towards implementation of the revived and re-imagined effort - now known as FloodSAFE Yolo 2.0. Building on the success of the first year of FloodSAFE Yolo 2.0, the County and the District renewed their staffing and fiscal commitment for FY 20/21 ($100,000 each).

Current Request

Though both agencies (the County and the District) budgeted funds for FloodSAFE Yolo 2.0 in FY 20/21, the enabling legal agreement (Agreement No. 7676-2020-FLOODSAFE2.0) was not extended at that time. This request would extend the expiration of the FloodSAFE Yolo 2.0 agreement to June 30, 2021. The proposed amendment is provided as Attachment A to this staff report.

Collaborations (including Board advisory groups and external partner agencies)

Staff has collaborated with the Yolo County Flood Control and Water Conservation District and County Counsel on this item.

Fiscal Information

No Fiscal Impact

Fiscal Impact of this Expenditure	
Total cost of recommended action	$100,000
Amount budgeted for expenditure	$100,000
Additional expenditure authority needed	$0
On-going commitment (annual cost)	

Source of Funds for this Expenditure	
General Fund	$0

Further explanation as needed

The County and Yolo County Flood Control and Water Conservation District each contribute $100,000 per year to the Flood SAFE Yolo 2.0 effort. The County's $100,000 contribution was included in the FY 20-21 adopted budget. This request is for an extension of time only.

YOLO COUNTY AGREEMENT NO. 21-73

(Second Amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with Yolo County Flood Control and Water Conservation District, relating to Floodsafe Yolo 2.0 Program Services, to Extend the Term)

THIS Second Amendment is made and entered into as of this 4th day of May 2021, by and between the **County of Yolo**, a political subdivision of the State of California ("County"), and **Yolo County Flood Control and Water Conservation District** ("District"). County and District are jointly referred to as the "Parties" and agree as follows.

WHEREAS, on or about August 26, 2019, the Parties entered into an agreement for District to provide Floodsafe Yolo 2.0 Program services to County (Agreement No. 7676-2020-FLOODSAFE2.0); and

WHEREAS, on or about June 23, 2020, the Parties entered into a First Amendment of Agreement No. 7676-2020-FLOODSAFE2.0 to revise the terms of payment, increase the maximum compensation, and revise the scope of services; and

WHEREAS, the Parties wish to further amend Agreement No. 7676-2020-FLOODSAFE2.0 to extend the term.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. Paragraph 9 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   9. TERM. This Agreement will terminate on **June 30, 2021,** unless otherwise extended in writing by the Parties prior to that date.

2. Paragraph I.A of Exhibit 1 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   I. TASK 1: FloodSafe Yolo 2.0 Program:

   A. The District will retain services of an experienced flood management professional and other support services as deemed appropriate. The District will use these resources in developing the institutional, financial and legal framework for creating an ongoing flood management division within the District. The initial funding will be provided by the participating entities for the period extending through **June 30, 2021**. This funding will allow for a focused effort to develop a long-term funding source and institutional framework for continuing regional flood management activities (implementation, maintenance, and planning). Some of this funding will be used for implementation of specific projects. Other specific tasks are outlined below.

3. Except as specifically amended hereinabove, Agreement No. 7676-2020-FLOODSAFE2.0 shall remain in full force and effect.

IN WITNESS WHEREOF, the Parties hereto have executed this Second Amendment to Agreement No. 7676-2020-FLOODSAFE2.0 as of the day and year first written above.

Yolo County Agreement No. _____

MEMORANDUM OF UNDERSTANDING
FLOODSAFE YOLO 2.0 PROGRAM

This Agreement is entered into by and between the County of Yolo ("County") and Yolo County Flood Control and Water Conservation District ("District") and will take effect as of the last date on which each Party has executed this Agreement. Defined terms are set forth in Section 2 of this Agreement.

RECITALS

A. The Parties recognize that flood protection is important to the health, safety, and economic vitality of the Western Yolo County Region.

B. The Parties recognize the need for floodSAFE Yolo 2.0 to address flood protection issues in the rural areas of Western Yolo County that are not currently addressed by other flood control programs.

C. The Parties recognize that a regional approach to a flood protection solution is critical to success.

D. The Parties believe that a regional flood control entity, separate from the County, may best advance flood control planning/activities for the region in conjunction with efforts by responsible State agencies.

E. The Parties believe that while flood control is generally a State responsibility, local funding for flood control is critical to sustaining a focused, ongoing effort to improve regional flood protection, recognizing that successful projects can take decades to plan and implement.

F. The Parties have collaborated on regional water planning activities (such as formation of the Water Resources Association and development of a Storm Water Management Plan and an Integrated Regional Water Management Plan). The Parties each desire to collaborate regarding the investigation of flood control planning activities that would be in their mutual interest.

G. The Parties desire to provide in this Agreement authorization and cost-sharing for the District to develop the institutional, financial and legal framework for creating an ongoing flood management division within the District, to lead to a regional flood protection solution that provides appropriate levels of protection to urban and rural areas.

AGREEMENT

The Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are hereby incorporated by reference.

2. **Definitions.** When used in this Agreement, the following terms will have the meanings set forth below:
    a. "Agreement" means this Agreement.
    b. "Authorized Expenses" means those expenses incurred by the District in utilizing employees, contracting with consultants and incurring other costs to implement a Task consistent with the approved Budget for the Task.
    c. "Budget" means the budget approved for a Task, which will include Authorized Expenses and the apportionment among the Parties of the responsibility for payment thereof.

d. "CEQA" means the California Environmental Quality Act.
e. "Funds" means payments from the Parties to implement a Task consistent with the Budget.
f. "Parties" means the parties to this Agreement.
g. "Party" means one of the Parties.
h. "Party Representative" means the person identified in Section 3, below, who will be authorized to take actions under this Agreement on behalf of the - Party, until such time as the chief executive officer (or equivalent) notifies the District and the other Parties of a change in its Party Representative.
i. "Task" means a scope of work that the Parties have authorized the District to carry out in the manner provided for in this Agreement.

3. **Purpose of this Agreement.** The Parties intend that the District will have the latitude, authority, and responsibility to undertake those acts the District deems necessary, consistent with Exhibit 1, to establish ongoing flood management that will be successful, in collaboration with the County, in providing appropriate levels of flood protection for rural and urban areas. Consistent with this intention, this Agreement authorizes the District to implement the Task(s) described in Exhibit 1, which is incorporated herein by this reference. The scope of work and budget for the Task are set forth in Exhibit 1 to this Agreement. The Parties may amend the Task or authorize the District to carry out an additional task(s) in the manner provided for in this Agreement

   In carrying out its duties under this Agreement, the District will comply with the applicable legal requirements (including but not limited to bidding requirements and contracting procedures). The District will serve as lead agency under CEQA with respect to any activities to implement a Task that are subject to CEQA. The District will have the authority to take all actions the District reasonably determines are appropriate to implement a Task and pay Authorized Expenses that are consistent with the approved Budget.

4. **Actions of the Representatives of the Parties.** Each Party Representative will have authority to take action under this Agreement on behalf of the Party that he or she represents. The Party Representatives may take action under this Agreement at a meeting, during a telephone conference call, through electronic correspondence or other means approved by the Party Representatives, so long as each Party Representative was provided reasonable notice of the proposed action and a reasonable opportunity to participate in the consideration of the action item. The Party Representatives are as follows:

   County: County Administrator, or designee
   District: General Manager, or designee

5. **Actions Requiring Approval by All Parties.** Notwithstanding any contrary provision in this Agreement, the following actions will not be effective unless approved in writing by all of the Parties that would be affected by the action:
   a. Amendment of this Agreement, including but not limited to extensions of its Term.
   b. Addition of Parties. The terms and conditions applicable to a new party will be set forth in an amendment to this Agreement. The Parties may provide that a new party will be

liable only for obligations that existed from or after the effective date of the action approving the new party.

c. Approval or amendment of a Task.
d. Adoption or amendment of a Budget.
e. Termination of this Agreement or withdrawal of a Party.

6. **Termination.**
   a. This Agreement may be terminated by either Party, at any time, with or without cause, upon 30 days' written notice from one to the other.
   b. Either Party may terminate this Agreement for cause immediately upon determining that the other Party has materially failed to perform any of the covenants contained in this Agreement in the time and/or manner specified. Notice of termination for cause shall be deemed effective upon delivery, including delivery via facsimile or e-mail, unless otherwise specified therein. If notice of termination for cause is given by a Party and it is later determined that the receiving Party was not in default or the default was excusable, then the notice of termination shall be deemed to have been given without cause pursuant to paragraph (a) above.
   c. Following termination under paragraph (a) or (b) above, the terminating Party will be responsible for its share of financial obligations consistent with Exhibit 1 and incurred under this Agreement or earmarked for expenditures in connection with costs or debts prior to the effective date of termination, unless otherwise agreed by the Parties.

7. **Funds.** The County will make payments to the District within ninety days of invoicing by the District, consistent with the approved Budget. The District will be authorized to use the Funds collected for a Task to pay Authorized Expenses for the Task. The District will provide an accounting to the County of all Funds received and expended under this Agreement, in accordance with the provisions of Government Code section 6505 and other applicable provisions of law. Upon expiration or earlier termination of this Agreement, all unexpended funds of the County will be returned to the County.

8. **Privileges and Immunities.** All of the privileges and immunities from liability, exemptions from laws, ordinances and rules, all pension, relief, disability, worker's compensation and other benefits that apply to the activity of officers, agents or employees of any of the Parties when performing their respective functions will apply to them to the same degree and extent while engaged in the performance of any of the functions and other duties under this Agreement. None of the officers, agents or employees of a Party will be deemed to be officers, agents or employees of any other Party. Nothing in this Agreement will be construed to create a partnership, joint venture, co- ownership, or agency relationship between the Parties.

9. **Term.** This Agreement will terminate on December 31, 2020, unless otherwise extended in writing by the Parties prior to that date.

10. **Notices.** The time for providing any notices specified in this Agreement may be extended within the term of this Agreement with the consent of all Parties, confirmed in writing, without

requiring an amendment to this Agreement. All notices and other communications required under this Agreement will be in writing, and will be deemed to have been duly given upon the date of service, if: (a) served personally on the Party to whom notice is to be given; (b) sent by electronic mail, and the Party to whom notice is to be given confirms receipt; or (c) on the third day after mailing, if mailed to the Party to whom notice is to be given by first-class mail, postage prepaid, and properly addressed to the designated representatives of the Party.

11. **Signatories' Authority.** The signatories to this Agreement represent that they have authority to execute this Agreement and to bind the Party on whose behalf they execute this Agreement.

12. **Counterparts of this Agreement.** This Agreement may be signed in any number of counterparts by the Parties, each of which will be deemed to be an original, and all of which together will be deemed to be one and the same instrument. This Agreement, if executed in counterparts, will be valid and binding on a Party as if fully executed all in one copy.

13. **Reasonable Cooperation.** The Parties will reasonably cooperate with each other, including the execution of all necessary documents required to perform the obligations under this Agreement, and to carry out the purpose and intent of this Agreement.

14. **Construction and Interpretation.** This Agreement is entered into freely and voluntarily. This Agreement has been arrived at through negotiation, and each Party has had a full and fair opportunity to revise the terms of this Agreement. Consequently, the normal rule of construction that any ambiguities are to be resolved against the drafting party will not apply in construing or interpreting this Agreement.

15. **Complete Agreement.** This Agreement constitutes the sole, final, complete, exclusive and integrated expression and statement of the terms of this Agreement among the Parties concerning the subject matter, and supersedes all prior negotiations, representations or agreement, either oral or written, that may be related to the subject matter of this Agreement.

16. **Waiver.** The waiver at any time by a Party of its rights with respect to a default or other matter arising in connection with this Agreement will not be deemed a waiver with respect to any other default or matter.

17. **Remedies Not Exclusive.** The remedies provided in this Agreement are cumulative and not exclusive, and are in addition to any other remedies that may be provided by law or equity. The exercise by a Party of any remedy under this Agreement will be without prejudice to the enforcement of any other remedy.

18. **Binding on Successors.** The rights and obligations under this Agreement will be binding on the successors of the Parties. These rights may not be assigned without the written consent of the other Parties.

19. **Mutual Indemnification.** Each Party will indemnify, defend, protect and hold harmless the other Party, its respective officers, employees and agents from and against any and all liability, losses, claims, damages, expenses, demands and costs (including, but not limited to, attorney, expert witness and consultant fees, and litigation costs) of every nature arising out of the respective Party's performance of its obligations under this Agreement and caused in whole or part by any negligent act or omission, willful misconduct or violation of law of or by the respective Party or its employees, agents or contractors. Any persons hired by the District pursuant to this Agreement will be considered to be solely District employees for all purposes. The Parties' respective obligations under this indemnification provision will survive the termination of this Agreement.

The foregoing is hereby agreed to by the Parties.

EXHIBIT 1

Scope of Work and Budget
floodSafe Yolo 2.0

I. TASK 1: floodSafe Yolo 2.0 Program:

A. The District will retain services of an experienced flood management professional and other support services as deemed appropriate. The District will use these resources in developing the institutional, financial and legal framework for creating an ongoing flood management division within the District. The initial funding will be provided by the participating entities for the period extending through December 31, 2020. This funding will allow for a focused effort to develop a long-term funding source and institutional framework for continuing regional flood management activities (implementation, maintenance and planning). Some of this funding will be used for implementation of specific projects Other specific tasks are outlined below.

B. It is the expressed intention of the District and County that the floodSafe Yolo 2.0 Program will inherently contain multi-benefit objectives that will include the following complimentary aspects of flood control projects and policies whenever possible.

1. Ecosystem enhancement
2. Enhance water supply
3. Aquifer recharge and support to the Region's Involvement with the Sustainable Groundwater Management Act ("SGMA")
4. Infrastructure improvements
5. Improve surface water quality and groundwater quality
6. Compatibility with Yolo County's Habitat Conservation Plan/Natural Community Conservation Plan ("HCP/NCCP")
7. Compatibility with existing and reasonably foreseeable land uses
8. Preserve community values

C. By the conclusion of the one-year term of this Agreement, the District and the County will attempt to have identified or developed a sustainable funding source to implement continuing regional flood management activities (implementation, maintenance and planning).

D. Oversight: Daily and routine work of the contract employee or consultant will be overseen by the District. The District will provide the County with regular briefings and organize planning sessions. The District will prepare and provide to the County annual end-of-year (2019 & 2020) written reports on the activities to implement this Task.

E. Public Outreach: The District will coordinate with the Water Resources Association and the IRWMP program on general public outreach and information dissemination.

II. Budget

A. Funding: County and District shall each contribute up to a maximum of $100,000 per year for one year for a combined $200,000 over the term of this Agreement as Funds for this Task. Authorized Expenses under this Task will include the following:

1. Paying a salary for a contract employee(s) and/or consultant(s) (including salary, benefits and incidental office expenses).
2. Development and/or validation of flood maps, hydrological, climatological and other foundational information.
3. Engineering and legal work to develop an appropriate overall governance structure and/or assessment district(s) with defined zones of benefit.
4. Development of potential flood management solutions for the localized floodplain areas and develop justification and boundaries for the establishment of a benefit district.
5. Implementation of actual flood management work (e.g. identified waterway maintenance schedule).
6. Land acquisitions.

RESOLUTION NO. 19.05

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE YOLO COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT DESIGNATING A TEMPORARY DELEGATION OF GENERAL MANAGER DUTIES TO INTERIM GENERAL MANAGERS

WHEREAS, Tim O'Halloran is the General Manager of the Yolo County Flood Control and Water Conservation District (District); and

WHEREAS, Tim O'Halloran has formally requested temporary medical leave starting July 31, 2019; and

WHEREAS, Max Stevenson and Kristin Sicke are the Assistant General Managers of the District;

NOW, THEREFORE, BE IT RESOLVED, by the Board of Directors of the Yolo County Flood Control and Water Conservation District that Tim O'Halloran's formal request for temporary medical leave is approved effective July 31, 2019, and while Tim O'Halloran is on temporary medical leave, the two Assistant General Managers are delegated all authority previously delegated to the General Manager, including the General Manager's appointment of Secretary. The Board of Directors direct the Assistant General Managers to cooperate and coordinate on their shared duties and authority as General Manager for the District until the General Manager returns.

PASSED AND ADOPTED by the Board of Directors of the Yolo County Flood Control and Water Conservation District on August 6, 2019 by the following vote:

AYES: DIRECTORS BARTH, KIMBALL, MAYER, ROMINGER, AND VINK
NOES: NONE
ABSENT: NONE

Signed by me after its passage this 6th day of August 2019.

Consent-General Government 11.
Board of Supervisors **County Administrator**
Meeting Date: 05/24/2022
Brief Title: Third Amendment to FloodSAFE Yolo 2.0 Agreement with YCFC&WCD
From: Jill Perez, Chief Deputy County Administrator, County Administrator's Office
Staff Contact: Elisa Sabatini, Manager of Natural Resources, County Administrator's Office, x5773

Subject
Approve third amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with the Yolo County Flood Control and Water Conservation District (YCFC&WCD) to extend the term to December 31, 2022, and increase the maximum compensation by $60,000 for a new agreement maximum of $360,000. (No general fund impact) (Perez/Sabatini)

Recommended Action
Approve third amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with the Yolo County Flood Control and Water Conservation District (YCFC&WCD) to extend the term through December 31, 2022, and increase the maximum compensation by $60,000 for a new agreement maximum of $360,000.

Strategic Plan Goal(s)
Safe Communities - Infrastructure

Sustainable Environment - Quality and Quantity of Water

Flourishing Agriculture - Ag Preservation; Flood Insurance

Robust Economy - Rural Community Support

Reason for Recommended Action/Background
Original Agreement (Agreement No. 7676-2020-FLOODSAFE2.0)
On June 4, 2019, the Board of Supervisors approved the proposed FloodSAFE Yolo 2.0 concept, a coordinated comprehensive flood management planning effort, between the County and the Yolo County Flood Control and Water Conservation District (YCFC&WCD) (Minute Order No. 19-78). Following Board direction, staff executed a Memorandum of Understanding with the Flood Control District regarding the FloodSAFE Yolo 2.0 Program (Agreement No. 7676-2020-FLOODSAFE2.0).

First Amendment (Agreement No. 20-100)
On June 23, 2020, the Board of Supervisors approved a First Amendment to the Agreement to revise the terms of payment, increase the maximum compensation, and revise the scope of services (Minute Order No. 20-75; Item No. 10).

Second Amendment (Agreement No. 21-73)

On May 4, 2021, the Board of Supervisors approved a Second Amendment to the Agreement to extend the term through June 30, 2021 (Minute Order No. 21-58; Item No. 8).

Proposed Third Amendment

At this time, Staff is recommending the Board of Supervisors approve a Third Amendment to the Agreement to extend the term through December 31, 2022, and increase the maximum compensation by $60,000. This amendment will fund the following on-going efforts:

- Drainage/flood management system maintenance and improvements;
- Updated hydraulic modeling;
- Flood risk reduction project development for State Route 16;
- Grant funding efforts for Madison and Rolling Acres/Plainfield region;
- Outreach and education to residents and landowners;
- Permitting strategies; and
- National Flood Insurance Program ("NFIP") Community Rating System Improvements.

Collaborations (including Board advisory groups and external partner agencies)

Staff has collaborated with the Yolo County Flood Control and Water Conservation District, Department of Financial Services, and Office of the County Counsel on this item.

Competitive Bid Process/Vendor Performance

Not required for inter-agency agreements.

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$60,000

YOLO COUNTY AGREEMENT NO. 22-95

(Third Amendment to Agreement No. 7676-2020-FLOODSAFE2.0 with Yolo County Flood Control and Water Conservation District, relating to Floodsafe Yolo 2.0 Program Services, to Increase the Maximum Compensation and Extend the Term)

THIS Third Amendment is made and entered into as of this **24th** day of **May**, 2022, by and between the **County of Yolo**, a political subdivision of the State of California ("County"), and **Yolo County Flood Control and Water Conservation District** ("District"). County and District are jointly referred to as the "Parties" and agree as follows.

WHEREAS, on or about August 26, 2019, the parties entered into an agreement for District to provide Floodsafe Yolo 2.0 Program services to the County (Yolo County Agreement No. 7676-2020-FLOODSAFE2.0); and

WHEREAS, on or about June 23, 2020 the parties entered into Amendment #1 (Agreement No. 20-100) to Yolo County Agreement No. 7676-2020-FLOODSAFE2.0 to revise the terms of payment, increase the maximum compensation, and revise the scope of services; and

WHEREAS, on or about May 4, 2021 the parties entered into Amendment #2 (Agreement No. 21-73) to Yolo County Agreement No. 7676-2020-FLOODSAFE2.0 to extend the term; and

WHEREAS, the Parties wish to further amend Agreement No. 7676-2020-FLOODSAFE2.0 to increase the maximum compensation and extend its term.

NOW, THEREFORE, IT IS HEREBY AGREED AS FOLLOWS:

1. Paragraph 9 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   9. TERM. This Agreement will terminate on **December 31, 2022**, unless otherwise extended in writing by the Parties prior to that date.

2. Paragraph I.A of Exhibit 1 of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   I. TASK 1: FloodSafe Yolo 2.0 Program:

   A. The District will retain services of an experienced flood management professional and other support services as deemed appropriate. The District will use these resources in developing the institutional, financial and legal framework for creating an ongoing flood management division within the District. The initial funding will be provided by the participating entities for the period extending through **December 31, 2022**. This funding will allow for a focused effort to develop a long-term funding source and institutional framework for continuing regional flood management activities (implementation, maintenance, and planning). Some of this funding will be used for implementation of specific projects. Other specific tasks are outlined below.

3. Paragraph II of Exhibit A of Agreement No. 7676-2020-FLOODSAFE2.0 is hereby amended to read as follows:

   II. BUDGET

A. Initially, County and district shall each contribute up to a maximum of $100,000 per year for a combined $200,000 over the term of this Agreement as Funds for this Task. Further, County shall contribute up to a maximum of $30,000 per fiscal year for fiscal years 2021/22 and 2022/23. In addition, as full compensation for reimbursement of all expenses incurred by District in the performance of the Madison Public Works Drainage Improvement Project, the County shall also contribute Funds for this Task in an amount up to, but shall not exceed $100,000. Therefore, the total maximum Funds contributed to this Task is $360,000. Authorized Expenses under this Task shall include the following:

1. Paying a salary for a contract employee(s) and/or consultant(s) (including salary, benefits, and incidental office expenses).
2. Development and/or validation of flood maps, hydrological, climatological, and other foundational information.
3. Engineering and legal work to develop and appropriate overall governance structure and/or assessment district(s) within defined zones of benefit.
4. Development of potential flood management solutions for the localized floodplain areas and develop justification and boundaries for the establishment of a benefit district.
5. Implementation of actual flood management work (e.g. identified waterway maintenance schedule).
6. Land acquisitions.

4. Except as specifically amended hereinabove, Agreement No. 7676-2020-FLOODSAFE2.0 shall remain in full force and effect according to its terms.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the day and year first written above.

Yolo County Agreement No. _____

MEMORANDUM OF UNDERSTANDING
FLOODSAFE YOLO 2.0 PROGRAM

This Agreement is entered into by and between the County of Yolo ("County") and Yolo County Flood Control and Water Conservation District ("District") and will take effect as of the last date on which each Party has executed this Agreement. Defined terms are set forth in Section 2 of this Agreement.

RECITALS

A. The Parties recognize that flood protection is important to the health, safety, and economic vitality of the Western Yolo County Region.

B. The Parties recognize the need for floodSAFE Yolo 2.0 to address flood protection issues in the rural areas of Western Yolo County that are not currently addressed by other flood control programs.

C. The Parties recognize that a regional approach to a flood protection solution is critical to success.

D. The Parties believe that a regional flood control entity, separate from the County, may best advance flood control planning/activities for the region in conjunction with efforts by responsible State agencies.

E. The Parties believe that while flood control is generally a State responsibility, local funding for flood control is critical to sustaining a focused, ongoing effort to improve regional flood protection, recognizing that successful projects can take decades to plan and implement.

F. The Parties have collaborated on regional water planning activities (such as formation of the Water Resources Association and development of a Storm Water Management Plan and an Integrated Regional Water Management Plan). The Parties each desire to collaborate regarding the investigation of flood control planning activities that would be in their mutual interest.

G. The Parties desire to provide in this Agreement authorization and cost-sharing for the District to develop the institutional, financial and legal framework for creating an ongoing flood management division within the District, to lead to a regional flood protection solution that provides appropriate levels of protection to urban and rural areas.

AGREEMENT

The Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are hereby incorporated by reference.

2. **Definitions.** When used in this Agreement, the following terms will have the meanings set forth below:
    a. "Agreement" means this Agreement.
    b. "Authorized Expenses" means those expenses incurred by the District in utilizing employees, contracting with consultants and incurring other costs to implement a Task consistent with the approved Budget for the Task.
    c. "Budget" means the budget approved for a Task, which will include Authorized Expenses and the apportionment among the Parties of the responsibility for payment thereof.

d. "CEQA" means the California Environmental Quality Act.
e. "Funds" means payments from the Parties to implement a Task consistent with the Budget.
f. "Parties" means the parties to this Agreement.
g. "Party" means one of the Parties.
h. "Party Representative" means the person identified in Section 3, below, who will be authorized to take actions under this Agreement on behalf of the - Party, until such time as the chief executive officer (or equivalent) notifies the District and the other Parties of a change in its Party Representative.
i. "Task" means a scope of work that the Parties have authorized the District to carry out in the manner provided for in this Agreement.

3. **Purpose of this Agreement.** The Parties intend that the District will have the latitude, authority, and responsibility to undertake those acts the District deems necessary, consistent with Exhibit 1, to establish ongoing flood management that will be successful, in collaboration with the County, in providing appropriate levels of flood protection for rural and urban areas. Consistent with this intention, this Agreement authorizes the District to implement the Task(s) described in Exhibit 1, which is incorporated herein by this reference. The scope of work and budget for the Task are set forth in Exhibit 1 to this Agreement. The Parties may amend the Task or authorize the District to carry out an additional task(s) in the manner provided for in this Agreement

   In carrying out its duties under this Agreement, the District will comply with the applicable legal requirements (including but not limited to bidding requirements and contracting procedures). The District will serve as lead agency under CEQA with respect to any activities to implement a Task that are subject to CEQA. The District will have the authority to take all actions the District reasonably determines are appropriate to implement a Task and pay Authorized Expenses that are consistent with the approved Budget.

4. **Actions of the Representatives of the Parties.** Each Party Representative will have authority to take action under this Agreement on behalf of the Party that he or she represents. The Party Representatives may take action under this Agreement at a meeting, during a telephone conference call, through electronic correspondence or other means approved by the Party Representatives, so long as each Party Representative was provided reasonable notice of the proposed action and a reasonable opportunity to participate in the consideration of the action item. The Party Representatives are as follows:

   County: County Administrator, or designee
   District: General Manager, or designee

5. **Actions Requiring Approval by All Parties.** Notwithstanding any contrary provision in this Agreement, the following actions will not be effective unless approved in writing by all of the Parties that would be affected by the action:
   a. Amendment of this Agreement, including but not limited to extensions of its Term.
   b. Addition of Parties. The terms and conditions applicable to a new party will be set forth in an amendment to this Agreement. The Parties may provide that a new party will be

liable only for obligations that existed from or after the effective date of the action approving the new party.

c. Approval or amendment of a Task.
d. Adoption or amendment of a Budget.
e. Termination of this Agreement or withdrawal of a Party.

6. **Termination.**
   a. This Agreement may be terminated by either Party, at any time, with or without cause, upon 30 days' written notice from one to the other.
   b. Either Party may terminate this Agreement for cause immediately upon determining that the other Party has materially failed to perform any of the covenants contained in this Agreement in the time and/or manner specified. Notice of termination for cause shall be deemed effective upon delivery, including delivery via facsimile or e-mail, unless otherwise specified therein. If notice of termination for cause is given by a Party and it is later determined that the receiving Party was not in default or the default was excusable, then the notice of termination shall be deemed to have been given without cause pursuant to paragraph (a) above.
   c. Following termination under paragraph (a) or (b) above, the terminating Party will be responsible for its share of financial obligations consistent with Exhibit 1 and incurred under this Agreement or earmarked for expenditures in connection with costs or debts prior to the effective date of termination, unless otherwise agreed by the Parties.

7. **Funds.** The County will make payments to the District within ninety days of invoicing by the District, consistent with the approved Budget. The District will be authorized to use the Funds collected for a Task to pay Authorized Expenses for the Task. The District will provide an accounting to the County of all Funds received and expended under this Agreement, in accordance with the provisions of Government Code section 6505 and other applicable provisions of law. Upon expiration or earlier termination of this Agreement, all unexpended funds of the County will be returned to the County.

8. **Privileges and Immunities.** All of the privileges and immunities from liability, exemptions from laws, ordinances and rules, all pension, relief, disability, worker's compensation and other benefits that apply to the activity of officers, agents or employees of any of the Parties when performing their respective functions will apply to them to the same degree and extent while engaged in the performance of any of the functions and other duties under this Agreement. None of the officers, agents or employees of a Party will be deemed to be officers, agents or employees of any other Party. Nothing in this Agreement will be construed to create a partnership, joint venture, co- ownership, or agency relationship between the Parties.

9. **Term.** This Agreement will terminate on December 31, 2020, unless otherwise extended in writing by the Parties prior to that date.

10. **Notices.** The time for providing any notices specified in this Agreement may be extended within the term of this Agreement with the consent of all Parties, confirmed in writing, without

requiring an amendment to this Agreement. All notices and other communications required under this Agreement will be in writing, and will be deemed to have been duly given upon the date of service, if: (a) served personally on the Party to whom notice is to be given; (b) sent by electronic mail, and the Party to whom notice is to be given confirms receipt; or (c) on the third day after mailing, if mailed to the Party to whom notice is to be given by first-class mail, postage prepaid, and properly addressed to the designated representatives of the Party.

11. **Signatories' Authority.** The signatories to this Agreement represent that they have authority to execute this Agreement and to bind the Party on whose behalf they execute this Agreement.

12. **Counterparts of this Agreement.** This Agreement may be signed in any number of counterparts by the Parties, each of which will be deemed to be an original, and all of which together will be deemed to be one and the same instrument. This Agreement, if executed in counterparts, will be valid and binding on a Party as if fully executed all in one copy.

13. **Reasonable Cooperation.** The Parties will reasonably cooperate with each other, including the execution of all necessary documents required to perform the obligations under this Agreement, and to carry out the purpose and intent of this Agreement.

14. **Construction and Interpretation.** This Agreement is entered into freely and voluntarily. This Agreement has been arrived at through negotiation, and each Party has had a full and fair opportunity to revise the terms of this Agreement. Consequently, the normal rule of construction that any ambiguities are to be resolved against the drafting party will not apply in construing or interpreting this Agreement.

15. **Complete Agreement.** This Agreement constitutes the sole, final, complete, exclusive and integrated expression and statement of the terms of this Agreement among the Parties concerning the subject matter, and supersedes all prior negotiations, representations or agreement, either oral or written, that may be related to the subject matter of this Agreement.

16. **Waiver.** The waiver at any time by a Party of its rights with respect to a default or other matter arising in connection with this Agreement will not be deemed a waiver with respect to any other default or matter.

17. **Remedies Not Exclusive.** The remedies provided in this Agreement are cumulative and not exclusive, and are in addition to any other remedies that may be provided by law or equity. The exercise by a Party of any remedy under this Agreement will be without prejudice to the enforcement of any other remedy.

18. **Binding on Successors.** The rights and obligations under this Agreement will be binding on the successors of the Parties. These rights may not be assigned without the written consent of the other Parties.

19. **Mutual Indemnification.** Each Party will indemnify, defend, protect and hold harmless the other Party, its respective officers, employees and agents from and against any and all liability, losses, claims, damages, expenses, demands and costs (including, but not limited to, attorney, expert witness and consultant fees, and litigation costs) of every nature arising out of the respective Party's performance of its obligations under this Agreement and caused in whole or part by any negligent act or omission, willful misconduct or violation of law of or by the respective Party or its employees, agents or contractors. Any persons hired by the District pursuant to this Agreement will be considered to be solely District employees for all purposes. The Parties' respective obligations under this indemnification provision will survive the termination of this Agreement.

The foregoing is hereby agreed to by the Parties.

The District:

for Tim O'Halloran, General Manager
Yolo County Flood Control and
Water Conservation District

Dated: 8/16/19

EXHIBIT 1

Scope of Work and Budget
floodSafe Yolo 2.0

I. TASK 1: floodSafe Yolo 2.0 Program:

A. The District will retain services of an experienced flood management professional and other support services as deemed appropriate. The District will use these resources in developing the institutional, financial and legal framework for creating an ongoing flood management division within the District. The initial funding will be provided by the participating entities for the period extending through December 31, 2020. This funding will allow for a focused effort to develop a long-term funding source and institutional framework for continuing regional flood management activities (implementation, maintenance and planning). Some of this funding will be used for implementation of specific projects Other specific tasks are outlined below.

B. It is the expressed intention of the District and County that the floodSafe Yolo 2.0 Program will inherently contain multi-benefit objectives that will include the following complimentary aspects of flood control projects and policies whenever possible.

1. Ecosystem enhancement
2. Enhance water supply
3. Aquifer recharge and support to the Region's Involvement with the Sustainable Groundwater Management Act ("SGMA")
4. Infrastructure improvements
5. Improve surface water quality and groundwater quality
6. Compatibility with Yolo County's Habitat Conservation Plan/Natural Community Conservation Plan ("HCP/NCCP")
7. Compatibility with existing and reasonably foreseeable land uses
8. Preserve community values

C. By the conclusion of the one-year term of this Agreement, the District and the County will attempt to have identified or developed a sustainable funding source to implement continuing regional flood management activities (implementation, maintenance and planning).

D. Oversight: Daily and routine work of the contract employee or consultant will be overseen by the District. The District will provide the County with regular briefings and organize planning sessions. The District will prepare and provide to the County annual end-of-year (2019 & 2020) written reports on the activities to implement this Task.

E. Public Outreach: The District will coordinate with the Water Resources Association and the IRWMP program on general public outreach and information dissemination.

II. Budget

A. Funding: County and District shall each contribute up to a maximum of $100,000 per year for one year for a combined $200,000 over the term of this Agreement as Funds for this Task. Authorized Expenses under this Task will include the following:

1. Paying a salary for a contract employee(s) and/or consultant(s) (including salary, benefits and incidental office expenses).
2. Development and/or validation of flood maps, hydrological, climatological and other foundational information.
3. Engineering and legal work to develop an appropriate overall governance structure and/or assessment district(s) with defined zones of benefit.
4. Development of potential flood management solutions for the localized floodplain areas and develop justification and boundaries for the establishment of a benefit district.
5. Implementation of actual flood management work (e.g. identified waterway maintenance schedule).
6. Land acquisitions.

RESOLUTION NO. 19.05

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE YOLO COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT DESIGNATING A TEMPORARY DELEGATION OF GENERAL MANAGER DUTIES TO INTERIM GENERAL MANAGERS

WHEREAS, Tim O'Halloran is the General Manager of the Yolo County Flood Control and Water Conservation District (District); and

WHEREAS, Tim O'Halloran has formally requested temporary medical leave starting July 31, 2019; and

WHEREAS, Max Stevenson and Kristin Sicke are the Assistant General Managers of the District;

NOW, THEREFORE, BE IT RESOLVED, by the Board of Directors of the Yolo County Flood Control and Water Conservation District that Tim O'Halloran's formal request for temporary medical leave is approved effective July 31, 2019, and while Tim O'Halloran is on temporary medical leave, the two Assistant General Managers are delegated all authority previously delegated to the General Manager, including the General Manager's appointment of Secretary. The Board of Directors direct the Assistant General Managers to cooperate and coordinate on their shared duties and authority as General Manager for the District until the General Manager returns.

PASSED AND ADOPTED by the Board of Directors of the Yolo County Flood Control and Water Conservation District on August 6, 2019 by the following vote:

AYES: DIRECTORS BARTH, KIMBALL, MAYER, ROMINGER, AND VINK
NOES: NONE
ABSENT: NONE

Signed by me after its passage this 6th day of August 2019.

Tom Barth, Chair

RESOLUTION NO. _____

(Resolution Increasing the Fiscal Year 2022-23 Department of Community Services, Public Works Budget by $500,000)

WHEREAS, during January and February 2019, the western side of Yolo County experienced significant localized flooding; and

WHEREAS, the FloodSAFE Yolo 2.0 Program ("Program") was approved by the Board of Supervisors on June 4th, 2019; and

WHEREAS, the Program was implemented to develop a comprehensive flood risk reduction and flood management strategy for the western valley floor of Yolo County; and

WHEREAS, the flooding situation is a recurring issue taking place almost annually when average or above-average precipitation occurs; and

WHEREAS, currently there is no formal comprehensive flood prevention and management strategy for the western side of Yolo County; and

WHEREAS, as a result of no formal strategy, various agencies and landowners attempt to individually maintain drainages; and

WHEREAS, part of the Program includes the State Route 16 Flood Mitigation Analysis to undertake a feasibility analysis of additional improvements, such as rerouting peak storm events into retention/detention areas, to reduce flood risk to the towns of Esparto and Madison, and reduce flood waters that affect Highway 16 ("project"), which is funded by a CalOES/FEMA grant (HMGP #4407-432-9R); and

WHEREAS, CalOES staff encouraged the County to undertake additional work on the project and expend the full grant amount; and

WHEREAS, the additional allocation of $500,000 will allow the proposed project to be taken from the feasibility analysis stage through 35% design and engineering, including additional hydraulic analysis, geotechnical investigations, identification of potential environmental impacts, and robust public outreach; and

WHEREAS, said funds were not included in the Department of Community Services budget for Fiscal Year 2022-23; and

WHEREAS, additional funds are available through use of the Highway 16 Flood Control/Madison Flood Mitigation Fund Balance ($298,066) and the remaining balance from the CalOES/FEMA grant ($201,934); and

WHEREAS, Section 29125 of the Government Code provides for the appropriations of these funds by a four-fifths vote of the Board of Supervisors.

NOW, THEREFORE, BE IT ORDERED AND FOUND as follows:

1. The foregoing recitals are true and correct.

2. The Chief Financial Officer is authorized and directed to amend the budget for Fiscal Year 2022-23 as follows:

0301-20-3011 Public Works	
Current Appropriations	**$43,091,188**
Increase: Services and Supplies	$500,000
Total Amended Appropriations	**$43,591,188**
Current Estimated Revenue & Fund Balance	**$43,091,188**
Increase: Other Financing Sources	$500,000
Total Amended Revenue & Fund Balance	**$43,591,188**
0303-20-3011 Highway 16 Flood Control	
Current Appropriations	**$300,000**
Increase: Other Financing Uses	$500,000
Total Amended Appropriations	**$800,000**
Current Estimated Revenue & Fund Balance	**$300,000**
Increase: Use of Fund Balance	$298,066
Increase: Intergovernmental Revenue	$201,934
Total Amended Revenue & Fund Balance	**$800,000**

PASSED AND ADOPTED by the Yolo County Board of Supervisors this 6th day of June, 2023, by the following vote:

Board of Supervisors **Public Works**

Meeting Date:	06/06/2023
Brief Title:	Accept 2022 Pavement Preservation Project
From:	Leslie Lindbo, Director, Department of Community Services
Staff Contact:	Mark Christison, Senior Civil Engineer, Department of Community Services, x8842
Supervisorial District Impact:	District 5

Subject

Accept as complete the construction work on the 2022 Pavement Preservation Project performed under Agreement 5555-2022-3011-VSS INTERNATIONAL by VSS International, Inc. (No general fund impact) (Lindbo/Christison)

Recommended Action

A. Accept as complete the construction work on the 2022 Pavement Preservation Project performed under Agreement 5555-2022-3011-VSS INTERNATIONAL by VSS International, Inc.; and

B. Authorize the Director of Public Works to sign and record the Notice of Completion of the 2022 Pavement Preservation Project.

Strategic Plan Goal(s)

Safe Communities

Reason for Recommended Action/Background

VSS International, Inc. substantially completed construction of this project on March 17, 2023, in accordance with the contract plans and specifications. The Board of Supervisors' acceptance of the work, and authorization for the Director of Public Works to record the Notice of Completion, will allow the project to be closed out.

Background

The County Roads (CR) where pavement was improved by this project are located throughout the County as shown on the location map (see Attachment A) and listed below:

- All public roads in the Town of Yolo
- CR 99W from CR 1 to CR 18
- CR 8 from CR 90B to CR 99W
- CR 18 from I-5 to Railroad Tracks
- CR 19A from CR 99 to Railroad Tracks
- CR 1 from I-5 to CR 84
- CR 84 from CR 1 to CR 2
- CR 89W from CR 6 to 2,850ft south of CR 6
- CR 89 from CR 89 to 4,750ft south of CR 89
- CR 7A from CR89 to 1,300ft east of CR89
- CR 89A from CR 7A to 1,300ft south of CR 7A
- CR 8 from CR 89 to 1,400ft east of CR89
- CR 90 from CR 8 to 3,700ft south of CR 8

The treatment included digging out and replacing failed areas, applying micro-surfacing, followed by installation of an asphalt rubber chip seal. An application of slurry seal above the asphalt rubber chip seal was used in portions of the Town of Yolo and on CR 19A. This work was followed by shoulder work to conform to existing grades and

driveways.

The asphalt rubber chip seal portion of the treatment was partially funded through a $250,000 grant from CalRecycle. County staff applied for the Rubberized Pavement Grant Program in order to compete for these funds and use a proven, sustainable pavement treatment for over eighteen miles of pavement maintenance. We estimate some 9,000 ground-up, used rubber tires were used to create this pavement seal and were diverted from landfills.

The project was completed without any claims, and within the authorized budget, including change orders.

Collaborations (including Board advisory groups and external partner agencies)

CalRecycle administers the grant program for funds contributed toward the asphalt rubber chip seal portion of the work.
Encroachment permits were secured by the contractor from Caltrans and the California Northern Railroad (Genesee & Wyoming Inc.).

Competitive Bid Process/Vendor Performance

The competitive bid process was completed in accordance with State law. The project was advertised on April 18, 2022, and bids were opened and read publicly at the Department of Community Services on May 12, 2022. Six bids were received at the bid opening on May 12, 2022, ranging from $5,194,120.00 to $6,601,577.60.

Bids Received

Bidder	Bid
VSS International, Inc.	$5,194,120.00
Pavement Coatings Co.	$5,292,530.00
American Pavement Systems Inc.	$5,311,268.64
All American Construction, Inc.	$5,913,664.97
Northwest Paving, Inc.	$6,049,407.00
B & M Builders, Inc.	$6,601,577.60

Vendor Performance
VSS International, Inc. was the lowest bidder and following receipt of the contractor's bond and insurance certificates, the contract was executed on June 3, 2022. The Department confirms VSS International, Inc. performed satisfactorily on the contract.

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$5,632,056
Amount budgeted for expenditure	$7,000,000
Additional expenditure authority needed	$0
One-time commitment	Yes

Source of Funds for this Expenditure	
Road Fund	$5,632,056

Further explanation as needed
Sufficient funds were budgeted in the FY 22/23 Road Fund budget to complete the construction. CalRecycle grant funds have been allocated up to $250,000 toward reimbursement of the asphalt rubber chip seal portion of the work. Senate Bill 1 (SB 1), the Road Improvement and Accountability Act of 2017, provided the balance of the funds for construction.

Final Approval Date: 12/05/2022

Yolo County
Board of Supervisors

Resolution No. 23-86

Recognizing June as Lesbian, Gay, Bisexual, Transgender & Queer (LGBTQ+) Pride Month in Yolo County

WHEREAS, California state law addresses discrimination, harassment, intimidation, and bullying towards LGBTQ+ individuals, there have been inequities experienced by the LGBTQ+ community, including poverty, homelessness, mental health issues and substance abuse concerns; and

WHEREAS, while there has been remarkable progress towards acceptance and equality in recent years, the rights of LGBTQ+ Americans remain under attack with anti-LGBQT+ legislation passed in states across the country, particularly targeting trans children and their parents.

WHEREAS, there is a need to focus on localized efforts that support the LGBTQ+ community with resources that focus on positive behavioral interactions and support among our service delivery systems, schools, families and business community; and

WHEREAS, it is incumbent upon everyone to provide a safe space for LGBTQ+ individuals to coexist within our society free from harassment and bullying; and

WHEREAS, Pride month offers the community an opportunity to join in the national reflection of the strides and work still left to do to bring true equality to the LGBTQ+ community and recommit to celebrating and embracing the work of individuals and organizations who have continuously fought to create equality for all.

NOW, THEREFORE, BE IT RESOLVED that the Yolo County Board of Supervisors proclaims June as Pride month in the County of Yolo and affirm our support for our LGBTQ+ residents and stand with them to protect their civil rights and ability to live openly without fear and protect their human rights.

PASSED AND ADOPTED this 6th day of June, 2023 by the following vote:

AYES: Barajas, Frerichs, Provenza, Villegas.
NOES: None
ABSTAIN: None
ABSENT: Sandy

_____
Oscar E. Villegas, Chair
Yolo County Board of Supervisors

Yolo County
Board of Supervisors

Resolution No. 23-87

Proclaiming June 19th, 2023, as Juneteenth in Yolo County

WHEREAS, Juneteenth commemorates the day that enslaved African Americans in Galveston, Texas were informed of their emancipation by the Union Army, over two years after President Abraham Lincoln issued the Emancipation Proclamation; and

WHEREAS, slavery was formally abolished in the United States by the ratification of the 13th Amendment on December 6, 1865; and

WHEREAS, on June 19, 1866, formerly enslaved African Americans in Texas celebrated the first "Jubilee Day", the holiday we now know as Juneteenth; and

WHEREAS, June 19th, 2023, will mark the 158th Anniversary of that historic day and 3 years since President Biden signed a bill to officially designate Juneteenth as a federal holiday and a national day of observance; and

WHEREAS, Juneteenth has been celebrated in Yolo County for over 20 years, and was first celebrated by Yolo County Library and the Culture C.O.-O.P. in 2011; and, with the help of the Friends of the Davis Public Library, the City of Davis, and UC Davis, has been celebrated annually (except in 2020) since 2017; and

WHEREAS, in 2019, the Yolo County Board of Supervisors worked with county staff to create the Yolo County Inclusion and Diversity Taskforce, a multi-agency taskforce designed to make concrete changes to address systemic racism within the county's many agencies and take a more equitable approach to providing services; and

WHEREAS, under the guidance of the County's Umoja Committee, "Together we Heal" has been made the theme for 2023, which recognizes the importance the community makes in overcoming the systemic injustices that the African Americans continue to endure; and

WHEREAS, the Board of Supervisors has committed to hire a Diversity, Equity, and Inclusion Officer for the County of Yolo to advance the goals of creating a more inclusive and equitable county government; and

WHEREAS, while Juneteenth celebrates the liberation of African Americans, no true celebration of Juneteenth can be achieved without addressing modern-day inequities; and

WHEREAS, the Yolo County Board of Supervisors will continue to work alongside the Inclusion and Diversity Taskforce to address systemic inequalities in the policies of Yolo County; and with the efforts of the County's Umoja, a cultural competency affinity group of Black/African American leaders, the County is providing various support programs focused on helping Black communities navigate past systemic barriers that infringe upon their freedoms and opportunities that would improve their quality of life.

NOW, THEREFORE, BE IT RESOLVED that the Yolo County Board of Supervisors does hereby proclaim June 19th, 2023, as Juneteenth in Yolo County and reaffirms the County of Yolo's commitment to racial justice.

PASSED AND ADOPTED this 6th day of June 2023 by the following vote:

AYES: Frerichs, Provenza, Barajas, Villegas.
ABSENT: Sandy.

Conferences, meetings and events the Board of Supervisors attended.

Recommended Action
Where reimbursement is otherwise authorized by statute, members of a legislative body may be reimbursed for actual and necessary expenses incurred in the performance of official duties, provided that (1) the local agency has adopted a written reimbursement policy specifying the types of expenses that may be incurred, (2) expense reports and receipts are submitted, and (3) the members give a brief report on meetings attended at public expense at the next regular meeting of the local agency. (Gov. Code, §§ 53232 et seq.)

The following lists meetings attended by members of the Board of Supervisors since the posting of the last Board of Supervisors meeting agenda:

District 1, Oscar Villegas
None attended.

District 2, Lucas Frerichs
None attended.

District 3, Gary Sandy
None attended.

District 4, Jim Provenza
None attended.

District 5, Angel Barajas
None attended.

Meeting Date: 06/06/2023

Brief Title: Memorandum of Understanding for Administrative Services with Yolo Habitat Conservancy

From: Gerardo Pinedo, County Administrator

Staff Contact: Alexander Tengolics, Manager of Governmental Relations, County Administrator's Office, x8068

Supervisorial District Impact: Countywide

Subject

Approve amendment to the Memorandum of Understanding with the Yolo Habitat Conservancy for the provision of administrative services. (General fund impact: estimated revenue of $235,000 in fiscal year 2023-24) (Pinedo/Tengolics)

Recommended Action

Approve amendment to the Memorandum of Understanding with the Yolo Habitat Conservancy for the provision of administrative services.

Strategic Plan Goal(s)

Sustainable Environment

Reason for Recommended Action/Background

The Yolo Habitat Conservancy (Conservancy) is a joint powers agency comprised of the County of Yolo and the cities of Davis, West Sacramento, Winters, and Woodland. In FY20-21, the Conservancy and the County entered into a Memorandum of Understanding (MOU) for the County to provide administrative services to the Conservancy, which continued through FY22-23.

Staff recommends the Board extend the term of the MOU with the County for administrative services through June 30, 2024, and amend to allow Department of Community Services staff (in addition to CAO staff) to provide such services. Pursuant to Section 5 of the Memorandum of Understanding, the County's lead assigned staff conferred with the Chair of the Conservancy's Board of Directors about this proposed amendment. In FY23-24, it is estimated that the Conservancy would reimburse the County $235,000 for services, including administration, legal, fiscal, accounting, and IT. This amendment was approved by the Conservancy Board of Directors on May 15, 2023.

AGREEMENT NO. -_____

Third Amendment to Memorandum of Understanding Between the County of Yolo and the Yolo Habitat Conservancy Regarding Administrative Services

THIS THIRD AMENDMENT to the June 2, 2020 Agreement with Count of Yolo ("County") is entered into as of the ___th day of ___ 2023 by and between the Yolo Habitat Conservancy ("the Conservancy"), and County of Yolo ("Consultant"), who agree as follows:

AMENDMENT

1. Section 1 of the Agreement is hereby amended to read as follows (deletions in strikethrough; new language is underlined):

> For FY ~~22/23~~ 23/24 the CAO and/or the Department of Community Services will provide 0.25 FTE within a management classification and ~~0.6~~ 0.5 FTE within an analyst or similar classification to complete these tasks in addition to existing consultant support within the FY ~~22/23~~ 23/24 HCP budget.

The anticipated cost of these services in FY 23/24 is:

> 0.25 FTE Management Classification- $83,000
>
> 0.5 FTE Analyst Classification- $88,000
>
> Legal: $20,000
>
> Overhead (HR, IT, etc., but excluding legal): $14,000
>
> Department of Financial Services- $30,000

2. Section 4 of the Agreement is hereby amended to read as follows (deletions in strikethrough; new language is underlined):

> A. Term. This MOU has an initial term of one year, commencing on ~~July 1, 2022~~ July 1, 2023 and extending through ~~June 30, 2023~~ June 30, 2024. By mutual agreement, the parties may agree to extend this MOU for one or more subsequent years. Any such extended term shall be memorialized in a written amendment to this MOU pursuant to Section 5, below.
>
> B. Termination. Either party may terminate this MOU, with or without cause, by giving thirty days' prior written notice to the other party.

IN WITNESS WHEREOF, the parties hereto have entered this Third Amendment by affixing their signatures hereafter.

Meeting Date:	06/06/2023
Brief Title:	Authorized Agent for Emergency Management Performance Grants and Homeland Security Grants
From:	Gerardo Pinedo, County Administrator, County Administrators Office
Staff Contact:	Kristin Weivoda, Chief of Emergency Services, County Administrators Office, x4933
Supervisorial District Impact:	Counytwide

Subject

Adopt resolutions designating the County Administrator or designee as the authorized agent to apply for and administer the Federal Emergency Management Performance Grant (EMPG-S and EMPG) funding and Homeland Security Grant Program (HSGP) funding as managed through the California Governor's Office of Emergency Services for federal fiscal years 2023, 2024 and 2025. (No general fund impact) (Pinedo/Weivoda)

Recommended Action

A. Adopt resolution designating the County Administrator or designee as the authorized agent to apply for and administer the Federal Emergency Management Performance Grant COVID-19 Supplemental (EMPG-S) funding for FY 2020, and the Federal Emergency Management Performance Grant (EMPG) funding for FY 2023, FY 2024, FY 2025 as managed through the California Governor's Office of Emergency Services;

B. Adopt resolution designating the County Administrator or designee as the authorized agent to apply for and administer the federal Homeland Security Grant Program (HSGP) funding for FY 2023, FY 2024, and FY 2025 as managed through the California Governor's Office of Emergency Services; and

C. Authorize signatory authority to County Administrator or designee for the grant application, claims, progress reporting, and grant fund disbursement.

Strategic Plan Goal(s)

Thriving Residents

Safe Communities

Sustainable Environment

Robust Economy

Reason for Recommended Action/Background

The California Governor's Office of Emergency Services (Cal OES) sub-grants federal funding for the Emergency Services Performance Grant and the Homeland Security Grant Program to local jurisdictions throughout the state. For each year's grant application process, Cal OES requires that the local governing board of each subgrantee jurisdiction designate an authorized agent to execute the necessary documents to obtain and administer the available federal funding. This designation will allow the Yolo Operational Area to continue to receive available

funding during the federal fiscal years 2023, 2024, and 2025 and to apply for future funds as they become available.

Board of Supervisors **County Administrator**

Meeting Date:	06/06/2023
Brief Title:	Yolo County Operational Area Multi-Jurisdictional Hazard Mitigation Plan
From:	Gerardo Pinedo, County Administrator, County Administrators Office
Staff Contact:	Kristin Weivoda, Chief of Emergency Services, County Administrators Office, x4933
Supervisorial District Impact:	Countywide

Subject
Adopt resolution approving the Yolo County Operational Area Multi-Jurisdictional Hazard Mitigation Plan update 2023. (No general fund impact) (Pinedo/Weivoda)

Recommended Action
Adopt resolution approving the Yolo County Operational Area Multi-Jurisdictional Hazard Mitigation Plan update.

Strategic Plan Goal(s)
Thriving Residents

Safe Communities

Sustainable Environment

Flourishing Agriculture

Robust Economy

Reason for Recommended Action/Background
The Yolo County Operational Area Joint-Hazard Mitigation Plan of 2023 is a comprehensive planning effort that identifies the hazards that Yolo County and each of its jurisdictions are at risk from and which leads to the development of projects and actions to mitigate that risk. The plan is a living document that must be officially updated every five years for the County and each of its jurisdictions to be eligible for hazard mitigation assistance grant funding from the Federal Emergency Management Agency (FEMA). Each jurisdiction that is seeking FEMA approval must adopt the mitigation plan. Adoption by the local governing body is an essential part of the planning process, as outlined in the regulations and requirements for mitigation planning. This is the final step that each jurisdiction must take to complete the mitigation planning process and receive plan approval. Adopting the plan before submission to FEMA allows for FEMA approval after their review and will expedite the plan approval process if it meets all FEMA requirements.

The plan's first draft was completed by the County and approved by FEMA in 2013 and again in 2018. As part of the official 2023 update process that began in early 2019, the County held numerous meetings with internal stakeholders and the public to gather information and input for the plan.

The 2023 update per the County of Yolo adopting resolutions, the County of Yolo adopts the Yolo County

Operational Area Joint-Hazard Mitigation Plan pending FEMA's approval. While content related to the County of Yolo may require revisions to meet the plan approval requirements, changes occurring after adoption will not require the County of Yolo to re-adopt any further iterations of the plan. Subsequent plan updates following the approval period for this plan will require separate adoption resolutions.

The County will continue to update the plan as part of its annual maintenance cycle. The official 2023 plan update process will commence in early July 2024.

RESOLUTION NO. _____

A Resolution of the County of Yolo Adopting the 2023 Yolo Operational Area Multi-Jurisdictional Hazard Mitigation Plan

WHEREAS the County of Yolo ("County") recognizes the threat that natural hazards pose to people and property within the operational area; and

WHEREAS the County has prepared a multi-hazard mitigation plan, hereby known as the 2023 Yolo Operational Area Multi-Jurisdictional Hazard Mitigation Plan, in accordance with federal laws, including the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended; the National Flood Insurance Act of 1968, as amended; and the National Dam Safety Program Act, as amended; and

WHEREAS the 2023 Yolo Operational Area Multi-Jurisdictional Hazard Mitigation Plan identifies mitigation goals and actions to reduce or eliminate long-term risk to people and property in the County from the impacts of future hazards and disasters; and

WHEREAS adoption by the County demonstrates its commitment to hazard mitigation and achieving the goals outlined in the 2023 Yolo Operational Area Multi-Jurisdictional Hazard Mitigation Plan;

NOW, THEREFORE, BE IT RESOLVED by the Yolo County Board of Supervisors that:

In accordance with the local rule for adopting resolutions, the County has adopted the 2023 Yolo Operational Area Multi-Jurisdictional Hazard Mitigation Plan. While content related to the County may require revisions to meet the plan approval requirements, changes occurring after adoption will not require the County to re-adopt any further plan iterations. Subsequent plan updates following the approval period for this plan will require separate adoption resolutions.

Board of Supervisors **County Administrator**

Meeting Date:	06/06/2023
Brief Title:	Work authorization with Yolo County Resource Conservation District
From:	Gerardo Pinedo, County Administrator
Staff Contact:	Kristin Weivoda, Chief of Emergency Services, County Administrator's Office, x4933
Supervisorial District Impact:	Countywide

Subject

Approve and authorize the County Administrator to sign a work authorization with Yolo County Resource Conservation District for an amount not to exceed $1,007,079 to assist with implementing county conservation projects and plans. (No general fund impact) (Pinedo/Weivoda)

Recommended Action

Approve and authorize the County Administrator to sign a work authorization with Yolo County Resource Conservation District (RCD) for an amount not to exceed $1,007,079 to assist with implementing county conservation projects and plans.

Strategic Plan Goal(s)

Safe Communities

Reason for Recommended Action/Background

On February 24, 2009, the county entered into a Memorandum of Understanding (MOU) with the Yolo County Resource Conservation District (RCD) to assist with implementing county conservation projects and plans due to the Resource Conservation District's unique expertise, capabilities, and equipment. Since the approval of the original MOU, the county has recognized a need for additional services and further collaboration with the RCD due to the increased prevalence of wildland fires in the county, including the County Fire in 2018 that burned over 90,000 acres in Napa and Yolo, the Sand Fire in 2019 that burned over 2,500 acres in Yolo and the LNU Complex Fire in 2020 that burned an area of nearly 400,000 acres in Lake, Napa, Sonoma, Solano, and Yolo.

The original MOU had no cap, which was approved before receiving the additional CFSC and CALFIRE grant dollars. The grants are budgeted, and the contract increase covers the grant amounts. The total amount we need to increase the RCD's contract (PO# 4549) is $1,007,079. This amount will cover the lifetime of the grants. See the lines below.

CALFIRE CWPP
RCD Total Grant: $280,405
Contract Increase Amount: $116,417

State Budget Reflect to Detect
RCD Total Grant: $54,901
Contract Increase Amount: $44,901

CFSC Fire Coordinator
RCD Total Grant Amount: $120,000
Contract Increase Amount: $49,004

CALFIRE PBA
RCD Total Grant Amount: $551,773

Contract Increase Amount: $461,773

Approve and authorize the County Administrator to sign a work authorization with Yolo County Resource Conservation District (RCD) for an amount not to exceed $1,007,079.

FILED
July 15, 2021
BY Julie Dachtler
DEPUTY CLERK OF THE BOARD

AGREEMENT NO. 21-112

REVISED AND RESTATED MEMORANDUM OF UNDERSTANDING BETWEEN THE COUNTY OF YOLO AND THE YOLO COUNTY RESOURCE CONSERVATION DISTRICT FOR CONSERVATION PROJECT AND PLANNING SERVICES

THIS REVISED AND RESTATED MEMORANDUM OF UNDERSTANDING ("MOU") is made and entered into as of this **8th** day of **June** 2021, by and between the COUNTY OF YOLO, a political subdivision of the State of California, hereinafter referred to as "COUNTY," and YOLO COUNTY RESOURCE CONSERVATION DISTRICT, a special district of the State of California, whose business address is 221 W. Court St., #1 Woodland, California, 95695, hereinafter referred to as "RCD."

RECITALS

WHEREAS, COUNTY has jurisdiction over zoning, planning, and land use matters within the unincorporated territory of the County of Yolo, and it has adopted various regulations ("Conservation Regulations") set forth in Chapter 10 of the Yolo County Code for the purpose of minimizing erosion from development projects permitted within COUNTY's jurisdiction; managing the use of groundwater and stormwater; overseeing the implementation of the Cache Creek Resource Management Plan ("CCRMP") and Cache Creek Improvement Program ("CCIP") with various programs for bank stabilization, riparian restoration, conservation of biodiversity, and invasive species management; and

WHEREAS, RCD is a special district of the State of California organized as a resource conservation district subject to Division 9 (commencing with section 9000) of the California Public Resources Code, whose jurisdiction includes some of the incorporated and the majority of unincorporated territory of the County of Yolo, and whose primary purpose is to improve and sustain the natural resources of Yolo County through promotion of responsible watershed management, demonstrating and implementing conservation practices, providing technical assistance to landowners, and sponsoring and facilitating partnerships and voluntary community land stewardship groups to implement sustainable land management practices, protect and enhance waterways and water quality, reduce soil erosion, preserve and restore wildlife habitat, sequester carbon, reduce catastrophic wildfire and foster an informed and knowledgeable community; and

WHEREAS, in furtherance of these shared interests and jurisdictions RCD and COUNTY entered into a Memorandum of Understanding (the "Original MOU") on February 24, 2009 (Yolo County Agreement No. 09-17) to secure RCD assistance with the implementation of COUNTY conservation projects and plans by providing planning, design and implementation services for on-ground conservation and restoration work for which RCD has unique expertise, capabilities and equipment; and

WHEREAS, RCD is willing and COUNTY wishes to retain RCD to provide services for which it is well-suited in light of its unique expertise, capabilities and equipment; and

WHEREAS, RCD is specifically skilled and staffed to provide services of on-farm conservation and open space restoration project planning, permitting and implementation, vegetation and wildlife monitoring, digital mapping, vegetation management and noxious weed control, improving soil health, planning and implementing land-based strategies that reduce GHG emissions and sequester carbon, planning and implementing wildfire prevention projects, coordinating the countywide fire safe council, and fostering partnerships that effectively address conservation issues of importance and relevance to the County of Yolo; and

WHEREAS, the purpose of this MOU is to update the Original MOU in minor respects and document the terms that will apply to the provision of services by RCD within the jurisdictions of both RCD and COUNTY for the mutual benefit of both agencies.

NOW, THEREFORE, COUNTY hereby reengages the services of RCD, and RCD agrees to serve COUNTY in accordance with the terms and conditions set forth herein.

TERMS

1. **Term of the MOU.** The term of this MOU shall commence on the date first above written and shall not expire unless terminated in accordance with Paragraphs 8 (Termination for Cause) or 9 (Termination for Convenience); except that the obligations of RCD to COUNTY under Paragraph 7 (Indemnification) shall continue in full force and effect after early termination in relation to acts or omissions occurring prior to such dates during the term of the MOU, and the obligations of RCD to COUNTY shall also continue after early termination in relation to the obligations prescribed by Paragraphs 14 (Confidentiality), 19 (Taxes) and 20 (Access to Records/Retention).

2. **Scope of Services.** RCD shall provide COUNTY those services set forth in Exhibit A, attached hereto and incorporated by reference herein. Additional services may be added by the parties from time to time through supplements to either Exhibit subject to prior approval by the Board of Supervisors. Nothing in this MOU provides RCD with an exclusive right to perform the services set forth in Exhibit A or otherwise precludes the County from contracting with third parties to perform any or all such services.

3. **Compensation.**

(a) Rates. In consideration of RCD's satisfactory performance of the services described in Exhibit A, COUNTY shall pay RCD for RCD personnel time in accordance with the YCRCD's annually-published schedule of billable rates (sample attached as Exhibit B).

(b) Expenses. COUNTY will reimburse travel and direct expenses that are justifiably related to the requested services.

4. **Method of Payment.** All compensation shall be made only upon presentation by RCD to COUNTY of an itemized billing invoice in a form acceptable to the Yolo County Department of Financial Services which indicates, at a minimum, RCD's name, address, Taxpayer Identification Number, the COUNTY agreement number for this MOU, the month for which

compensation is sought, and the monthly rate. Each invoice shall also include a description of the tasks engaged in and/or completed during the month billed, the persons performing the work, and the positions held and number of hours worked by such persons. This summary description shall be in addition to any project accounting records maintained by RCD pursuant to Exhibit A. RCD shall submit such invoices no more often than monthly to the appropriate point of contact (set forth in Section 11, below) for the services rendered who, after review and approval as to form and content, shall submit the invoices for payment to the Yolo County Department of Financial Services no later than fifteen (15) calendar days following receipt unless he or she has any concerns with an invoice. If the County point of contact has any concerns with an invoice, he or she shall advise RCD of those concerns in writing within fifteen (15) calendar days of receiving such invoice. The parties shall then work cooperatively and expeditiously to resolve those concerns prior to the submission of the invoice to the Yolo County Department of Financial Services for review and payment.

5. **Independent Contractor.** RCD shall perform all services covered by this MOU as an independent contractor and not as an employee, agent, partner or joint venturer of or with the County. RCD and its officers, agents and employees are not, and shall not be deemed, COUNTY employees for any purpose, including workers' compensation and employee benefits. RCD shall, at RCD's own risk and expense, determine the method and manner by which duties undertaken by RCD under this MOU shall be performed; provided, however, that COUNTY may monitor the work performed by RCD. COUNTY shall not deduct or withhold any amounts whatsoever from the compensation paid to RCD, including, but not limited to amounts required to be withheld for state and federal taxes. As between the parties to this MOU, RCD shall be solely responsible for all such payments.

6. **Hold Harmless/Indemnification.**

(a) In General. To the full extent permitted by law, RCD and COUNTY shall each defend, indemnify and hold harmless each other as well as their respective elected officials, officers, agents and employees from any claims, suits, proceedings, loss or liability, including reasonable attorneys' fees, arising out of or connected with any acts or omissions of that party or its officers, agents, employees, volunteers, contractors or subcontractors when performing any activities or obligations required of that party under this MOU. Each party shall notify the other party immediately in writing of any claim or damage related to activities performed under this MOU. The parties shall cooperate with each other in the investigation and disposition of any claim arising out of the activities under this Agreement, providing that nothing shall require either party to disclose any documents, records or communications that are protected under peer review privilege, attorney-client privilege, or attorney work product privilege. In providing any defense under this Paragraph, the party obligated to provide such defense shall use counsel reasonably acceptable to the other party.

(b) Employee Character and Fitness. RCD accepts responsibility for determining and approving the character and fitness of its employees (including volunteers, agents or representatives) to provide the services required of RCD under this MOU, including completion of a satisfactory criminal/background check and periodic rechecks to the extent permitted by law. Notwithstanding anything to the contrary in this Paragraph, RCD shall defend, indemnify, and hold COUNTY and its elected officials, officers, agents and employees harmless from any

liability for injuries or damages resulting from a breach of this provision or RCD's actions in this regard.

7. **Termination for Cause.** If either party should fail to fulfill in a timely and proper manner that party's obligations under this MOU or otherwise breach this MOU and fail to cure such failure or breach within ten (10) days of receipt of written notice from the other party describing the nature of the breach, the non-defaulting party may, in addition to any other remedies it may have, terminate this MOU by giving five (5) days written notice to the defaulting party in the manner set forth in Paragraph 11 (Notices).

8. **Termination for Convenience.** This MOU may be terminated by either party for any reason and at any time by giving no less than thirty (30) days written notice of such termination to the other party and specifying the effective date thereof; provided, however, that no such termination may be effected by COUNTY unless an opportunity for consultation regarding the reason(s) for termination, if any, is provided by County to RCD prior to the effective date of the termination.

9. **Disposition of and Payment for Work upon Termination.** In the event of termination for cause under Paragraph 7 or termination for the convenience of a party under Paragraph 8, all finished or unfinished documents and other materials, if any, at the option of COUNTY, become the property of COUNTY and RCD shall be entitled to receive compensation for any satisfactory work completed prior to receipt of the notice of termination or commenced prior to receipt of the notice and completed satisfactorily prior to the effective date of the termination; except that RCD shall not be relieved of liability to COUNTY for damages sustained by COUNTY by virtue of any breach of the MOU by RCD whether or not the MOU was terminated for convenience or cause, and COUNTY may withhold any payments not yet made to RCD for purpose of setoff until such time as the exact amount of damages due to COUNTY from RCD is determined.

10. **No Waiver.** The waiver by either party of any breach or violation of any requirement of this MOU shall not be deemed to be a waiver of any such breach in the future, or of the breach of any other requirement of this MOU.

11. **Notices.** All notices required or authorized by this MOU shall be in writing and shall be delivered in person or by deposit in the United States mail, by certified mail, postage prepaid, return receipt requested. Any mailed notice, demand, request, consent, approval or communication that either party desires to give the other party shall be addressed to the other party at the address set forth below. Either party may change its address by notifying the other party of the change of address. Any notice sent by mail in the manner prescribed by this Paragraph shall be deemed to have been received on the date noted on the return receipt or five days following the date of deposit, whichever is earlier.

12. **Non-Discrimination.** RCD certifies that any service provided pursuant to this Agreement shall be without discrimination based on color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability in accordance with all applicable Federal, State and County laws and regulations and any administrative directives established by the County Board of Supervisors or the County Administrative Officer. For the purpose of this Agreement, distinctions on the grounds of color, race, creed, national origin, religion, sex, age, sexual preferences, or physical or mental disability include but are not limited to the following: denying a participant any service or benefit which is different, or is provided in a different manner or at a different time from that provided to other participants under this Agreement; subjecting a participant to segregation or separate treatment in any way in the enjoyment or any advantage or privilege enjoyed by others receiving any service or benefit; treating a participant differently from others in determining whether the participant has satisfied any admission, enrollment quota, eligibility, membership, or other requirement or condition which individuals must meet in order to be provided any service or benefit; and the assignment of times or places for the provision of services.

13. **No Assignments or Subcontracts.** RCD shall not assign any interest in this MOU or subcontract any of the services RCD is to perform hereunder without the prior written consent of COUNTY, which shall not be unreasonably withheld. The inability of the assignee to provide personnel equivalent in experience, expertise, and numbers to those provided by RCD, or to perform any of the remaining services required under this MOU within the same time frame required of RCD shall be deemed to be reasonable grounds for COUNTY to withhold its consent to assignment. For purposes of this subparagraph, the consent of COUNTY may be given by its appropriate point of contact, depending on the nature of services to be rendered.

14. **Amendment/Modification.** Except as specifically provided herein, this MOU may be modified or amended only in writing and with the prior written consent of both parties. In particular, only COUNTY, through its Board of Supervisors in the form of an amendment of this MOU, may authorize extra and/or changed work if beyond the scope of services prescribed by Exhibit A or B. Failure of RCD to secure such authorization in writing in advance of performing any of the extra or changed work shall constitute a waiver of any and all rights to adjustment in the contract price or contract time and no compensation shall be paid for such extra work.

15. **Interpretation; Venue.**

(a) **Interpretation.** The headings used herein are for reference only. The terms of the MOU are set out in the text under the headings. This MOU shall be governed by the laws of the State of California.

(b) **Venue.** This MOU is made in Yolo County, California. The venue for any legal action in state court filed by either party to this MOU for the purpose of interpreting or enforcing any provision of this MOU shall be in the Superior Court of California, County of Yolo.

16. **Compliance with Laws.** RCD shall observe and comply with all applicable Federal, State and local laws, ordinances, and codes. Such laws shall include, but not be limited to, the following, except where prohibited by law:

(a) Non-Discrimination. During the performance of this MOU, RCD shall comply with the provisions of the Fair Employment and Housing Act (Government Code section 12900, et seq.), the regulations promulgated thereunder (Title 2, California Code of Regulations, section 7285.0, et seq.), the provisions of Article 9.5, Chapter 1, Part 1, Division 3, Title 2 of the Government Code (sections 11135-11139.5) and any state or local regulations adopted to implement any of the foregoing, as such statutes and regulations may be amended from time to time. To the extent this MOU subcontracts to RCD services or works required of COUNTY by the State of California pursuant to agreement between COUNTY and the State, the applicable regulations of the Fair Employment and Housing Commission implementing Government Code section 12990 (a) through (f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations are expressly incorporated into this MOU by reference and made a part hereof as if set forth in full, and RCD and any of its subcontractors shall give written notice of their obligations thereunder to labor organizations with which they have collective bargaining or other agreements.

(b) Documentation of Right to Work. RCD agrees to abide by the requirements of the Immigration and Control Reform Act pertaining to assuring that all newly-hired employees of RCD performing any services under this MOU have a legal right to work in the United States of America, that all required documentation of such right to work is inspected, and that INS Form 1-9 (as it may be amended from time to time) is completed and on file for each employee. RCD shall make the required documentation available upon request to COUNTY for inspection.

(c) Inclusion in Subcontracts. To the extent any of the services required of RCD under this MOU are subcontracted to a third party in accordance with the provisions of this MOU, RCD shall include the provisions of (a) and (b), above, in all such subcontracts as obligations of the subcontractor.

17. **Taxes.** RCD agrees to file all required withholdings documents on amounts paid pursuant to this MOU and, as between RCD and COUNTY, RCD shall be solely liable and responsible to make such withholdings including those for state and federal income and FICA taxes. RCD agrees to indemnify and hold COUNTY harmless from any liability it may incur to the United States or the State of California as a consequence of RCD's failure to withhold, when due, all such taxes and obligations. In the event that COUNTY is audited for compliance regarding any withholdings for applicable taxes or other similar amounts, RCD agrees to furnish COUNTY with proof of payment of withholdings on those earnings.

18. **Access to Records/Retention**. COUNTY, any federal, state or local grantor agency funding all or part of the compensation payable hereunder, the State Controller, the Comptroller

General of the United States, or the duly authorized representatives of any of the above, shall have access to any books, documents, papers and records of RCD which are directly pertinent to the subject matter of this MOU for the purpose of making audit, examination, excerpts and transcriptions. Except where longer retention is required by any federal or state law, RCD shall maintain all required records for at least five (5) years after COUNTY makes final payment for any other work authorized hereunder and all pending matters are closed, whichever is later. The County recognizes and agrees that nothing in this MOU creates any greater right of access to records of the Natural Resources Conservation Service (a potential subcontractor under this MOU) than may exist under laws applicable to records disclosure at the time of any future request for access.

19. **Authority to Contract**. RCD and COUNTY each warrant hereby that they are legally permitted and otherwise have the authority to enter into and perform the activities under this MOU.

20. **Conflict of Interest.**

(a) Covenant of No Undisclosed Conflict. The parties to the MOU acknowledge that they are aware of the provisions of Government Code section 1090, et seq., and section 87100, et seq., relating to conflict of interest of public officers and employees. RCD hereby covenants that it presently has no interest not disclosed to COUNTY and shall not acquire any interest, direct or indirect, which would conflict in any material manner or degree with the performance of its services or confidentiality obligation hereunder, except as such as COUNTY may consent to in writing prior to the acquisition by RCD of such conflict. RCD further warrants that it is unaware of any financial or economic interest of any public officer or employee of COUNTY relating to this MOU other than interest resulting from employment as a COUNTY officer or employee. RCD agrees that if such financial interest does exist at the inception of this MOU, COUNTY may terminate this MOU immediately upon giving written notice without further obligation by either party to the other under this MOU.

21. **Insurance Requirements.** RCD shall maintain, at its sole cost and expense, the insurance required by Exhibit C to this Agreement, which is incorporated herein by this reference.

22. **Third Party Beneficiaries**. Nothing contained in this MOU shall be construed to create any rights in third parties and the parties do not intend to create such rights.

23. **Severability.** If any provision of this MOU, or any portion thereof, is found by any court of competent jurisdiction to be unenforceable or invalid for any reason, such provision shall be severable and shall not in any way impair the enforceability of any other provision of this MOU.

24. **Entirety of Contract; Termination of Prior Agreement.** This MOU constitutes the entire agreement between the parties relating to the subject of this MOU and supersedes all previous agreements, promises, representations, understandings and negotiations, whether written or oral, among the parties with respect to the subject matter hereof or any portion thereof. It is the express intention of the parties by executing this MOU to terminate and replace

henceforth as of the effective date of this MOU the Original MOU, as described in the Recitals hereto.

IN WITNESS WHEREOF, this MOU was executed by the parties hereto as of the date first above written.

Exhibit A
Scope of Services

Services to be provided as needed by Yolo County Resource Conservation District to the County of Yolo through the Associated MOU:

- Project development
- Conservation planning
- Grant writing
- Project management
- Permit coordination/completion
- Carbon farm and climate beneficial programming and technical assistance
- Habitat restoration planning and design
- Habitat restoration implementation
- Natural lands management and maintenance
- Noxious weed management
- Farm and ranch technical assistance
- Integrating conservation with agricultural operations
- Farm/wildlife monitoring
- Digital mapping
- Water quality and water use efficiency monitoring and management
- Education and outreach materials development
- Interpretive signage development and production
- Education and outreach presentations/workshops
- Wildfire prevention planning, programming and technical assistance

RCD has also and will continue to be involved in the following countywide and regional natural resource management and conservation efforts including:

- Yolo County Fire Safe Council (See Description and Scope of Work on following page.)
- Yolo County Weed Management Area
- Water Resources Association of Yolo County
- Yolo Groundwater Sustainability Agency
- Yolo County Sustainability Plan Climate Action Subcommittee
- Yolo Habitat Conservancy/Yolo HCP/NCCP
- Yolo Bypass Working Group
- Cache Creek Technical Advisory Committee
- Westside Sacramento Integrated Regional Water Management Plan (IRWMP)
- Statewide IRWM Roundtable of Regions

Yolo County Fire Safe Council Coordination
Description and Scope of Work

The RCD will coordinate the activities of the Yolo County Fire Safe Council including but not limited to organizing meetings, outreach, recommending a set of bylaws, facilitating the adoption of bylaws, and seeking and administering grant funds in order to complete The Community Wildfire Protection Plan (CWPP) and other wildfire prevention projects identified as priorities for the Yolo County FSC.

Background
Following the County Fire in 2018, Yolo County Resource Conservation District (RCD) and County of Yolo Office of Emergency Services (OES) submitted a grant proposal for development of a Community Wildfire Protection Plan (CWPP). CAL FIRE funded a second proposal in early 2020 and work began September 2020. The CWPP will identify priority projects such as fuels reduction, fire breaks, access and evacuation planning and home hardening.

The CWPP is being developed by the CWPP Steering Committee. CWPP Steering Committee efforts are being led by the RCD with support from a team of consultants and Yolo County OES. Committee members include Yolo County OES, CAL FIRE Battalion Chief, CAL FIRE Lake Napa Unit (LNU) Division Chief, Local Fire Chief representatives, Homeowners Association (HOA) and ranching community representatives, and a Registered Professional Forester (RPF). The CWPP process includes gathering stakeholders, establishing a community base map, agreeing on wildfire risks, developing and prioritizing a set of projects, determining roles and responsibilities and funding, completing projects and updating the plan as needed.

Purpose of the Fire Safe Council
The Yolo County Fire Safe Council (FSC) was formed with the purpose of providing a venue for stakeholder representatives and interested members of the public to communicate and collaborate to effectively implement the CWPP. FSC stakeholders include agencies, utilities, first responders, local organizations, local government, tribal interests, county services and community groups such as community-led, locally based Fire Safe Councils, and other interested members of the public.

Role of the RCD in the Fire Safe Council
The RCD has been serving Yolo County with stakeholder outreach, landowner collaboration, conservation project management and grant administration for over 25 years. The County of Yolo Office of Emergency Services and Board of Supervisors have identified the RCD as the most appropriate entity to coordinate the activities of the Yolo County Fire Safe Council. The RCD will coordinate the countywide Fire Safe Council meetings, facilitate the development of a voting membership and bylaws, draft agendas for Fire Safe Council meetings including discussion of actions to take on implementing and keeping current the CWPP and other priority fire prevention projects, lead efforts to find funding to complete priority projects and act as a fiscal sponsor and grant manager for community-based Fire Safe Councils and other efforts as appropriate.

FILED

JUN 14 2021

BY J. Ramirez
DEPUTY CLERK OF THE BOARD

RESOLUTION NO. 21-68

Resolution of the Yolo County Board of Supervisors Regarding Creation of the Yolo Fire Safe Council

WHEREAS, after the County Fire in 2018, the Yolo County Resource Conservation District (YCRCD) and the Yolo County Office of Emergency Services (OES) submitted a grant proposal to the California Department of Forestry and Fire Prevention (CalFIRE) to create a Community Wildfire Protection Plan (CWPP);

WHEREAS, with grant funding from CalFIRE, YCRCD and OES have worked together with other local public agencies and private stakeholders to take the initial steps to develop a CWPP for Yolo County; and

WHEREAS, actions taken in furtherance of a CWPP include, but are not limited to, holding stakeholder meetings, developing a CWPP Steering Committee (with members that include CalFIRE representatives, a local fire chief, and other public agency and private sector representatives), and assembling a consultant team qualified to produce a CWPP; and

WHEREAS, in connection with the foregoing, YCRCD, OES, and stakeholders have discussed creating a Countywide Fire Safe Council to promote and lead efforts to, among other things:

- Reduce community wildfire risk
- Improve wildfire resiliency
- Educate and informing residents on wildfire safety and risk reduction
- Implement projects that include hazardous fuels reduction, creating defensible space, home hardening, firescaping, and establishing evacuation plans
- Establish community Fire Safe Councils or other localized efforts
- Hold public meetings to identify projects for the CWPP
- Complete the CWPP and obtain CalFIRE approval
- Obtain grant and other funding to support all of the foregoing

WHEREAS, the Board of Supervisors would like to support the creation of a Countywide Fire Safe Council and affirm the role of YCRCD in leading the effort, as described more fully in a scope of work approved concurrently with the adoption of this Resolution;

NOW, THEREFORE, the Board of Supervisors hereby finds and resolves as follows:

1. The creation of a Countywide Fire Safe Council and completion of a CWPP are essential steps in addressing wildfire risk in Yolo County, particularly in the western region of the County;

2. YCRCD has the expertise, capacity, and legal authority to lead the establishment of a Countywide Fire Safe Council, adopt appropriate governance procedures (including bylaws), and guide its efforts to complete a CWPP, obtain funding, and implement projects to reduce wildfire risk and otherwise protect local homes, communities, and environments from catastrophic wildfire; and

3. The County Administrator and other County staff are authorized to take such necessary and further actions as are appropriate to implement this Resolution and carry out the intent of the Board of Supervisors.

PASSED AND ADOPTED by the Board of Supervisors on this 8th day of June, 2021, by the following vote:

AYES: Barajas, Villegas, Saylor, Sandy, Provenza.
NOES: None.
ABSTENTIONS: None.
ABSENT: None.

BOS Agreement Number: 21-112

Project: Office of Emergency Services

Contractor: Yolo County Resource Conservation District (RCD)

Contact Person: Heather Nichols **Phone**: 530-661-1688

Project Description: Assist with implementing county conservation projects and plans due to the Resource Conservation District's unique expertise, capabilities, and equipment. Since the approval of the original MOU, signed July 15, 2021 by BOS agreement 21-112, the county has recognized a need for additional services and further collaboration with the RCD due to the increased prevalence of wildland fires in the county, including the County Fire in 2018 that burned over 90,000 acres in Napa and Yolo, the Sand Fire in 2019 that burned over 2,500 acres in Yolo and the LNU Complex Fire in 2020 that burned an area of nearly 400,000 acres in Lake, Napa, Sonoma, Solano, and Yolo.

The original MOU had no cap, which was approved before receiving the additional CFSC and CALFIRE grant dollars. The grants are budgeted, and the contract increase covers the grant amounts.

Board of Supervisors **County Administrator**

Meeting Date:	06/06/2023
Brief Title:	Water Hauling Agreement with YCFCWCD
From:	Gerardo Pinedo, County Administrator, County Administrators Office
Staff Contact:	Kristin Weivoda, Chief of Emergency Services, County Administrators Office, x4933
Supervisorial District Impact:	Countywide

Subject

Authorize the Yolo County Administrator to execute an agreement with the Yolo County Flood Control and Water Conservation District for water hauling for $439,500. (No general fund impact) (Pinedo/Weivoda)

Recommended Action

Authorize the Yolo County Administrator to execute an agreement with the Yolo County Flood Control and Water Conservation District for water hauling for $439,500.

Strategic Plan Goal(s)

Thriving Residents

Safe Communities

Reason for Recommended Action/Background

The County and the Office of Emergency Services secured a commitment from the California Department of Water Resources (DWR) from the Small Community Drought Relief Program to provide $885,669 in funding for financing the Yolo County Water Hauling and Water System Improvement Project through a funding agreement signed between the County and DWR in February 2023, Grant Agreement No. 4600015007.

The Yolo County Water Hauling and Water System Improvement Project invoices several different projects to address dry goods concerns in the county, which provides purchasing above-ground water tanks, installing them on private property, and providing hauled water and potable water for Yolo County residents whose wells have gone dry due to the ongoing drought. Includes Tank installation and Water Deliveries of potable and non-potable water. Water delivery is allocated $439,500 of the total dollars of the grant.

Yolo County Flood Control and Water Conservation District (YCFCWCD) has closely coordinated with OES on several other emergency response projects, including Chipper Pilot Program. The aggregate value of all the OES/YCFCWCD contracts exceeds the $200,000 allowable departmental amount, and this agreement requires Board approval. Therefore, OES requests approval for this water hauling contract to continue the water delivery allowed through the grant agreement to Yolo County Residents who have met the requirements to get above-ground water tanks and water deliveries.

Collaborations (including Board advisory groups and external partner agencies)

County Counsel, Yolo County Flood Control and Water Conservation District, Yolo County Procurement.

Competitive Bid Process/Vendor Performance

During the summer of 2021, Cal Aqua was the only vendor that was found to deliver full-time potable and non-potable water deliveries to property in Yolo County. The other companies found in Yolo County are construction water haulers and can only deliver after hours.

At the July 27, 2021, Board of Supervisors meeting, the County Board of Supervisors adopted Resolution No. 21-98 proclaiming the existence of a local drought emergency. Water hauling to properties with dry wells was considered an emergency activity within the County for the immediate preservation of public health, welfare, and safety (PCC §1102, 10340).

A sole source document is attached to this item.

Fiscal Information

Fiscal impact (see budgetary detail below)

Fiscal Impact of this Expenditure	
Total cost of recommended action	$439,500
Amount budgeted for expenditure	$439,500
Additional expenditure authority needed	$0
On-going commitment (annual cost)	$0

Source of Funds for this Expenditure	
Grant	$885,669

Further explanation as needed

Funding for this agreement has been secured through the Department of Water Resources Small Communities Drought Relief program.

Agreement No. __-____

Subaward Agreement Between the County of Yolo and the Yolo County Flood Control and Water Conservation District Regarding Yolo County Temporary Tank and Water Hauling Project

This Agreement (the "Agreement") is dated for reference purposes only as of June 6,, 2023 and is entered into by and between the County of Yolo, a political subdivision of the State of California (the "County"), and Yolo County Flood Control and Water Conservation District ("District"), an independent special district created by the California Legislature. The County and the District are referenced in this Agreement as the "Parties" and individually as a "Party."

RECITALS

A. The County and its Office of Emergency Services secured a commitment from the California Department of Water Resources ("DWR") from the Small Community Drought Relief Program to provide $885,669 in funding for financing the Yolo County Water Hauling and Water System Improvement Project through a funding agreement signed between the County and DWR in February, 2023 (Grant Agreement No. 4600015007, hereafter "Funding Agreement").

B. The County's Board of Supervisors approved Resolution 23-19 on February 7, 2023, authorizing its Office of Emergency Services to take such actions as necessary related to the Funding Agreement. The Funding Agreement is attached hereto as **Exhibit A** and incorporated herein by reference.

C. The Yolo County Water Hauling and Water System Improvement Project involves several different projects to address dry well concerns in the County, as specified in Exhibit A (Work Plan) of the Funding Agreement, including "Task 1 – Project Administration, Task 2 – Tank Installation, Task 3 – Water Deliveries and Task 4 – Tank Removal," which collectively provide for purchasing above-ground water tanks, installing them on private properties, and providing hauled water for Yolo County residents, whose wells have gone dry due to the ongoing drought.

Tasks 1 through 4 includes all work related to the temporary tank and water hauling project, as more particularly described in the scope of services, attached hereto as **Exhibit B** and incorporated herein by reference (hereafter referred to as "the Project").

D. The Funding Agreement authorizes $559,500 in grant funding for the Project (Tasks 1 through 4.)

NOW, THEREFORE, in consideration of the foregoing Recitals and in consideration of other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, the Parties agree as follows:

AGREEMENT

I. **Definitions.**

A. "Costs" or "Project Costs" shall have the same meaning as the term "Eligible Project Cost" in Section 8 of the Funding Agreement.

B. "Effective Date" means the date this Agreement is signed on behalf of the last of the Parties to do so.

C. "Project Schedule" means completion of the Project no later than June 30, 2024 in accordance with the schedule the District provided in Exhibit B hereto.

II. **Recitals.** The foregoing Recitals set forth above are incorporated into the body of this Agreement as if set forth in full in this Section.

III. **Term; Termination.** The term of this Agreement shall commence on the Effective Date and shall terminate on June 30, 2024, commensurate with the deadline to expend grant funds pursuant to the Funding Agreement, unless earlier terminated or extended written agreement of the Parties as provided herein.

A. Termination for Cause. Subject to the right to cure under Paragraph 11 of the Funding Agreement, the County may terminate this Agreement and be relieved of any payment obligations should the District fail to perform the requirements of this Agreement and applicable portions of the Funding Agreement at the time and in the manner provided in these agreements and attachments thereto, including but not limited to reasons of default under Paragraph 11 of the Funding Agreement.

B. Termination without Case. The County may terminate this Agreement without cause on 30 days' advance written notice if DWR terminates the Funding Agreement without cause as provided in Paragraph D.41 of the Funding Agreement. The District shall be reimbursed for all costs reasonably incurred up to the date of termination.

IV. **The District's Obligations.**

Subject to reimbursement by the County pursuant to this Agreement, District shall provide the following services and discharge related responsibilities as described below:

A. Temporary Tank and Water Hauling.

1. The District will provide administration, invoicing and reporting. Project administration includes working with the Office of Emergency Services to oversee dry well inspections and deliveries, water deliveries and other activities related to the project. Invoicing includes, preparing and submitting invoices and appropriate backup documentation to the Office of Emergency Services describing the work completed and listing the costs incurred during the billing cycle. Reporting includes preparing and

submitting quarterly progress reports to the Office of Emergency Services in the manner required by the Funding Agreement for the tasks covered by this Agreement.

2. The District will purchase and install above-ground plastic water tanks ranging on size from 2,500 to 3,000 gallons, delivering them to households, contracting the installation work, installing tanks along with booster pumps if needed, and connecting the tanks to household water lines. Documentation for all tank installation activities, including tan size, date, and drop-off location, shall be recorded. This task also includes completing the Environmental Information Form and CEQA documents and obtaining other permits (if needed) and submitting them to the Office of Emergency Services.

3. The District will contract and provide non-potable hauled water weekly or biweekly that will be arranged as needed to Yolo County residents with reported dry wells. Water deliveries shall not exceed 50 gallons per person per day. Water haulers must use trucks that comply with the California Air Resources Control Board Truck and Bus Regulations through a Certification of Operation. Water haulers may have some inactive trucks without a certification. These inactive trucks may be used to provide sufficient hauled water capability on a limited, temporary basis to respond to water outages during this drought. Documentation for all hauling activities, including volume transported, date and drop-off location will be recorded.

4. The District will remove tanks from properties once the tanks have been disconnected from the existing domestic water systems at the end of the terms of this agreement.

5. Competitive Bidding. In consultation and coordination with the County to the extent necessary, the District will complete a competitive bidding or other solicitation process required for public projects under California law and consistent with the County's Procurement Procedures for the completion of Tasks 1 through 4.

B. The District, at its sole cost and expense, shall obtain and maintain throughout the entire term of this Agreement the insurance set forth in **Exhibit C** attached hereto.

The District shall not commence any work associated with the Project until it has submitted all the insurance required and such insurance has been approved by the County. All insurance shall be sent to the County's Procurement Division at procurement@yolocounty.org for review and approval.

C. The District shall keep, and provide to County or its agents upon request, accurate financial records (including invoices) necessary to enable County to review the District expenditure of funds provided pursuant to this Agreement. These records

shall demonstrate the funding has been used for Project Costs relating to the Project. The District shall maintain all such records for in accordance with the requirements of Exhibit G to the Funding Agreement.

D. Per California Government Code section 8546.7, expenditures pursuant to this Agreement are subject to the examination and audit of the California State Auditor. The District will provide notice of the completion of any required third party (e.g., state or federal) audits and provide access to such audits upon request.

E. Acknowledgment of Credit and Signage. The District shall include appropriate acknowledgement of credit to the State of California for its support when promoting the Project or using any data and/or information developed under this Funding Agreement. Signage shall be posted in a prominent location at the Project site(s) or at the District's headquarters and shall include the Department of Water Resources color logo and the following disclosure statement: "Funding for this project has been provided in full or in part from the State Department of Water Resources."

F. To the extent not expressly required in this Agreement, the District further acknowledges and agrees to comply with the requirements of the Funding Agreement, including but not limited to the requirements set forth in Exhibit D (Standard Conditions) of the Funding Agreement regarding the accounting and deposit of grant funds, compliance with the Americans with Disabilities Act, budget contingency, the California Environmental Quality Act (CEQA), the Child Support Compliance Act, conflict of interest prohibitions, and final inspection and certification of the Project by a registered civil engineer.

V. **County Obligations; Reimbursement.** County agrees to provide up to $559,500 in funding for the Project to the District on a reimbursement basis.

A. The District shall submit invoices not more often than monthly and not less frequently than quarterly for allowable costs incurred for the Project. Upon the receipt of proper invoices, the County agrees to process payments in accordance with this Agreement and the Funding Agreement. All invoices shall be submitted using detailed invoices that include current and cumulative costs (including cost sharing) and that otherwise meet all requirements of the Funding Agreement

B. All reimbursement payments shall be considered provisional and subject to adjustment if necessary as a result of an adverse audit finding against the District or if DWR refuses to provide full or partial reimbursement to the County of costs incurred. The District also agrees that it must immediately return to the County any funds expended by the District under this Agreement that are later determined by DWR, the County, or representatives thereof not to have been allowable under applicable State or local federal laws and regulations.

VI. **Indemnity.** The District hereby agrees to defend, indemnify and hold harmless the County and its respective officers, agents and employees from any and all claims, losses

or liabilities arising or alleged to arise in connection with the Project, including but not limited to its duty to implement the Project and its sole and exclusive responsibility to comply with all applicable laws relating to Project implementation (including compliance with the California Environmental Quality Act and Prevailing Wage Laws), The County shall not have any liability for claims relating to the Project or other matters within the responsibility of the District. In the event of any claim or litigation within the scope of this provision, the District shall retain Counsel reasonably acceptable to the County Counsel to defend the County. This provision shall survive the termination of this Agreement.

VII. **Nondiscrimination.** During the performance of this Agreement, the District and its contractors or subcontractors shall not unlawfully discriminate, harass, or allow harassment against any employee or applicant for employment because of sex (gender), sexual orientation, race, color, ancestry, religion, creed, national origin (including language use restriction), pregnancy, physical disability (including HIV and AIDS), mental disability, medical condition (cancer/genetic characteristics), age (over 40), marital/domestic partner status, gender identity, and denial of medical and family care leave or pregnancy disability leave. The District and its contractors or subcontractors shall ensure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. The District and its contractors or subcontractors shall comply with the provisions of the California Fair Employment and Housing Act (Gov. Code, § 12990.) and the applicable regulations promulgated thereunder (Cal. Code Regs., tit. 2, § 11000 et seq.). The applicable regulations of the Fair Employment and Housing Commission are incorporated into this Agreement by reference. The District and its contractors or subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

VIII. **Drug-Free Workplace Certification**. By signing this Agreement, the District, its contractors or subcontractors hereby certify, under penalty of perjury under the laws of State of California, compliance with the requirements of the Drug-Free Workplace Act of 1990 (Gov. Code, § 8350 et seq.) and have or will provide a drug-free workplace by taking the following actions:

A. Publish a statement notifying employees, contractors, and subcontractors that unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited and specifying actions to be taken against employees, contractors, or subcontractors for violations, as required by the Government Code section 8355.

B. Establish a Drug-Free Awareness Program, as required by Government Code section 8355 to inform employees, contractors, or subcontractors about all of the following:

i. The dangers of drug abuse in the workplace,

ii. The County's policy of maintaining a drug-free workplace,

iii. Any available counseling, rehabilitation, and employee assistance programs, and

iv. Penalties that may be imposed upon employees, contractors, and subcontractors for drug abuse violations.

C. Provide, as required by Government Code section 8355, that every employee, contractor, and/or subcontractor who works under this Funding Agreement:

i. Will receive a copy of the County's drug-free policy statement, and

ii. Will agree to abide by terms of the County's condition of employment, contract, or subcontract.

IX. **Relationship of Parties.** The District and its contractors, subcontractors, and other vendors shall perform all services under this Agreement as independent contractors, and not as employees, officers or agents of the County.

X. **Cooperation; Supremacy Clause.** The Parties agree to cooperate as needed to ensure timely completion of the Project. In the event of a conflict between the terms of this Agreement and any of the documents included as exhibits, including but not limited to the Funding Agreement, the parties shall meet and confer to reconcile the conflict in a manner that, to the greatest feasible extent, ensures full state reimbursement to the County of costs reimbursed to the District for performance of the Project.

XI. **Choice of Law.** This Agreement will be governed and construed in accordance with the laws of the State of California.

XII. **Notices.** Any notices, bills, invoices, or reports required by this Agreement shall be deemed received on: (i) the day of delivery if delivered by hand, facsimile or overnight courier service during the receiving Party's regular business hours; or (ii) on the third business day following deposit in the United States mail if delivered by mail, postage prepaid, to the addresses listed below (or to such other addresses as the parties may, from time to time, designate in writing).

XIII. **Dispute Resolution.** If any dispute arises as to this Agreement, the Parties agree the dispute shall first be submitted to non-binding mediation in Yolo County. Any Party may serve a demand for mediation on another Party or Parties, which such demand shall be in writing. The Party which sends, and the Parties named in, the notice constitute the Dispute Parties, and each shall bear an equal share of mediator fees and any related costs. If any Dispute Party fails to participate in the mediation on the terms set forth in this section, it forfeits any right it may have to seek attorney's fees should it prevail in litigation of the dispute. Nothing contained herein shall prevent any party from (i) seeking and obtaining equitable relief, including, but not limited to, prohibitory or mandatory injunctions or specific performance, nor (ii) filing legal action hereunder.

XIV. **Remedies; Attorney Fees.** Each right, power and remedy provided for herein or now or hereafter existing at law, in equity, by statute, or otherwise shall be cumulative and shall be in addition to every other right, power, or remedy provided for herein or now or hereafter existing at law, in equity, by statute, or otherwise. The exercise, the commencement of the exercise, or the forbearance from the exercise by any party of any one or more of such rights, powers or remedies shall not preclude the simultaneous or later exercise by such party of any or all of such other rights, powers or remedies. If legal action shall be necessary to enforce any term, covenant or condition contained in this Agreement, the party prevailing in such action, whether or not reduced to judgment, shall be entitled to its reasonable court costs, including any accountants' and attorneys' fees expended in the action. Venue for any litigation shall be in Yolo County, California and the Parties hereby consent to jurisdiction in Yolo County for purposes of resolving any dispute or enforcing any obligation arising under this Agreement.

XV. **Assignment; No Third-Party Beneficiaries**. No Party may assign its interest in this Agreement or the rights under it to any third party, voluntarily or otherwise, without the prior written consent of the other two Parties. The Parties do not intend to benefit any third party by this Agreement and only the Parties may enforce it.

XVI. **Licensure; Permits and Approvals.** The District certifies that it will hold all applicable licenses and/or certifications required for performance of its obligations under this Agreement. The District will obtain all permits and regulatory approvals necessary for the Project.

XVII. **Waiver.** The waiver by any of the Parties of any breach of any term, covenant or condition herein contained shall not be deemed to be a waiver of any other term, covenant or condition or of any subsequent breach of the same or any other term, covenant or condition herein contained. No term, covenant or condition of this Agreement shall be deemed to have been waived by the Parties unless in writing signed by one authorized to bind the Party to be charged with the waiver.

XVIII. **Severability.** If any term or provision of this Agreement (including all Exhibits hereto) or the application thereof to any person or circumstance shall, to any extent, be invalid or

unenforceable, then such term or provision shall be amended to, and solely to the extent necessary to, cure such invalidity or unenforceability, and in its amended form shall be enforceable. In such event, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and be enforced to the fullest extent permitted by law.

XIX. **Amendments; Counterparts.** This Agreement may be amended only by a writing executed on behalf of the Parties to be bound. This Agreement may be executed in counterparts, including electronic counterparts, each of which when taken together shall constitute a single agreement.

XX. **Entire Agreement.** All documents referenced as exhibits to this Agreement are hereby incorporated by this reference. In the event of any material discrepancy between the provisions of this Agreement and any document incorporated herein by reference, the provisions of this Agreement shall prevail. This instrument contains the entire agreement among Parties with respect to the transactions contemplated herein. No other prior oral or written agreements are binding upon the Parties.

TO EFFECTUATE THIS AGREEMENT, the Parties have caused their duly authorized representatives to execute this Agreement as of the last date indicated below:

REQUEST FOR SOLE/SINGLE SOURCE

To: Procurement Division or for use at the Board of Supervisors
*to include in AgendaQuick

From: Yolo County Flood Control & Water Conservation District (independent special district of Yolo County)

Reference Number:

Since sole/single source purchasing is an exception to the normal procurement function, it must be objectively justified. Completion of this form should facilitate that process and provide a written record of the basis used in sole procurement decisions. **Completion of this request does not constitute approval.**

Supplier Name:	CAL AQUA (Environmental AQUA, Inc.)
Street Address:	896-D Aldridge Road
City/State/Zip:	Vacaville, CA 95688
Phone:	800.447.2778
General Description of Commodity or Service requested to be Purchased and its function:	
Hauling of potable and non-potable water deliveries to dry well owners within Yolo County.	

***Note**: Please use as much space needed to completely answer each question, or attach additional pages.*

1) Explain why this is the only product or service that can meet the needs of the Department.

During the summer of 2021, Cal Aqua was the only vendor that was found to deliver full-time potable and non-potable water deliveries to property in Yolo County. The other companies found in Yolo County are construction water haulers and can only deliver after hours.

At the July 27, 2021 Board of Supervisors meeting, the County Board of Supervisors adopted Resolution No. 21-98 proclaiming the existence of a local drought emergency. Water hauling to properties with dry wells was considered emergency activities within the County as it is for the immediate preservation of public health, welfare, and safety (PCC §1102, 10340)

2) What necessary features does this vendor provide which are not available from other Vendors?

Full-time water delivery service in Yolo County.

3) Why are these specific features/qualifications required?

DocuSign Envelope ID: BEB68F89-2990-4E77-838B-36B57F32A7FE

4) Why are other sources providing like goods or services unacceptable?

There were no other options available with full-time service in the County.

5) What other products/services have been examined and rejected?

See above.

6) Will this purchase obligate us to a particular vendor for future purchases?
(Either in terms of maintenance or more "like" items in the future)

No.

7) Explain why the price for this commodity/service is considered to be fair, reasonable, and the best possible price, and explain the negotiation efforts that were taken to obtain this price.

Based on the immediate need and demand for water hauling services, there was not a negotiation over the price; however, the quoted price was compared to the 2015 drought emergency when the County implemented the Groundwater Assistance Program and provided a similar water hauling service. The cost per gallon was similar to the 2015 program.

8) Explain the impact to the County if the Sole/Single Source justification were not approved.

I have made a diligent effort to review comparable products or services. I feel confident that the sole/single source purchase is justified and feel confident in explaining the justification to the general public. I hereby certify as to the validity of the information and feel confident this justification for sole/single source would withstand audit or vendor protest.

REQUESTERS NAME	SIGNATURE	DATE
Kristin Weivoda		5/16/23
DEPARTMENT HEAD NAME	SIGNATURE	DATE
Gerardo Pinedo		5.16.23

Based on the above statements and justification, I hereby agree with the purchase of this product or service on a sole/single source basis.

Electronic Record and Signature Disclosure

CONSUMER DISCLOSURE

From time to time, Yolo County (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign, Inc. (DocuSign) electronic signing system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to these terms and conditions, please confirm your agreement by clicking the 'I agree' button at the bottom of this document.

Getting paper copies

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after signing session and, if you elect to create a DocuSign signer account, you may access them for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a $0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

Withdrawing your consent

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

Consequences of changing your mind

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. To indicate to us that you are changing your mind, you must withdraw your consent using the DocuSign 'Withdraw Consent' form on the signing page of a DocuSign envelope instead of signing it. This will indicate to us that you have withdrawn your consent to receive required notices and disclosures electronically from us and you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

All notices and disclosures will be sent to you electronically

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

How to contact Yolo County:

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:
To contact us by email send messages to: ryan.pistochini@yolocounty.org

To advise Yolo County of your new e-mail address

To let us know of a change in your e-mail address where we should send notices and disclosures electronically to you, you must send an email message to us at ryan.pistochini@yolocounty.org and in the body of such request you must state: your previous e-mail address, your new e-mail address. We do not require any other information from you to change your email address..

In addition, you must notify DocuSign, Inc. to arrange for your new email address to be reflected in your DocuSign account by following the process for changing e-mail in the DocuSign system.

To request paper copies from Yolo County
To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an e-mail to ryan.pistochini@yolocounty.org and in the body of such request you must state your e-mail address, full name, US Postal address, and telephone number. We will bill you for any fees at that time, if any.
To withdraw your consent with Yolo County

To inform us that you no longer want to receive future notices and disclosures in electronic format you may:

i. decline to sign a document from within your DocuSign session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;

ii. send us an e-mail to ryan.pistochini@yolocounty.org and in the body of such request you must state your e-mail, full name, US Postal Address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

Required hardware and software

Operating Systems:	Windows® 2000, Windows® XP, Windows Vista®; Mac OS® X
Browsers:	Final release versions of Internet Explorer® 6.0 or above (Windows only); Mozilla Firefox 2.0 or above (Windows and Mac); Safari™ 3.0 or above (Mac only)
PDF Reader:	Acrobat® or similar software may be required to view and print PDF files
Screen Resolution:	800 x 600 minimum

Enabled Security Settings:	Allow per session cookies

** These minimum requirements are subject to change. If these requirements change, you will be asked to re-accept the disclosure. Pre-release (e.g. beta) versions of operating systems and browsers are not supported.

Acknowledging your access and consent to receive materials electronically

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please verify that you were able to read this electronic disclosure and that you also were able to print on paper or electronically save this page for your future reference and access or that you were able to e-mail this disclosure and consent to an address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format on the terms and conditions described above, please let us know by clicking the 'I agree' button below.

By checking the 'I agree' box, I confirm that:

- I can access and read this Electronic CONSENT TO ELECTRONIC RECEIPT OF ELECTRONIC CONSUMER DISCLOSURES document; and
- I can print on paper the disclosure or save or send the disclosure to a place where I can print it, for future reference and access; and
- Until or unless I notify Yolo County as described above, I consent to receive from exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to me by Yolo County during the course of my relationship with you.

County of Yolo
www.yolocounty.org

To: The Chair and Members of the Board of Supervisors

Consent-General Government 26.
Board of Supervisors **Financial Services**

Meeting Date: 06/06/2023
Brief Title: 2021 Pension Funding Report and Additional Discretionary Contribution
From: Chad Rinde, Chief Financial Officer, Department of Financial Services
Staff Contact: Chad Rinde, Chief Financial Officer, Department of Financial Services, x8050
Supervisorial District Impact: Countywide

Subject
Accept CalPERS Annual Valuation Reports as of June 30, 2021; receive update on the status of pension funding; and authorize the Chief Financial Officer to make an additional discretionary contribution to CalPERS in coordination with the Yolo County Superior Court. (No general fund impact) (Rinde)

Recommended Action

A. Accept the CalPERS Annual Valuation Reports as of June 30, 2021 for the Miscellaneous and Safety Plans;

B. Receive an update on the status of pension funding; and

C. Authorize the Chief Financial Officer to update the Memorandum of Understanding with the Yolo County Superior Court and make an additional discretionary funding contribution to CalPERS.

Strategic Plan Goal(s)

In Support of All Goals (Internal Departments Only)

Reason for Recommended Action/Background
The Pension Funding Policy (Attachment A), adopted in May 2018, requires that the County Administrator or Chief Financial Officer provide an annual report to the Board of Supervisors on the status of pension funding as well as a summary of the actuarial valuation reports for the upcoming fiscal year once released by the California Public Employees' Retirement System (CalPERS).

Pension Funding Status
The tables below provide a summary of the funded status for the Miscellaneous and Safety plans for the most recent five years:

Miscellaneous Plan

Valuation Date	Accrued Liability	Market Value of Assets	Unfunded Liability	Funded Ratio	Annual Covered Payroll
6/30/2021	$873,682,659	$659,854,549	$213,828,111	75.5%	$98,622,923
6/30/2020	$821,817,657	$538,969,551	$282,848,106	65.6%	$96,433,712
6/30/2019	$788,803,907	$521,305,474	$267,498,433	66.1%	$92,741,240
6/30/2018	$753,503,877	$498,338,141,	$255,165,736	66.1%	$86,457,783
6/30/2017	$694,805,957	$468,048,005	$226,757,952	67.4%	$82,607,781

Safety Plan

Valuation	Accrued	Market	Unfunded	Funded	Annual

Date	Liability	Value of Assets	Liability	Ratio	Covered Payroll
6/30/2021	$279,995,683	$215,350,599	$64,645,084	76.9%	$24,265,000
6/30/2020	$259,208,391	$172,366,557	$86,841,834	66.5%	$23,547,159
6/30/2019	$245,793,550	$163,046,769	$82,746,781	66.3%	$23,638,718
6/30/2018	$232,675,846	$152,555,374	$80,120,472	65.6%	$22,153,328
6/30/2017	$211,921,385	$140,459,704	$71,461,681	66.3%	$22,260,933

As the tables above show, the funded ratio for the Miscellaneous Plan increased from 65.6% to 75.5%, while the funded ratio for the Safety Plan increased from 66.5% to 76.9%%. These increases in funded status were a result of CalPERS returns of 21.3% in 2020-21 significantly exceeding the target rate of return of 7.0%. While not yet reflected, CalPERS announced returns of -6.1% in 2021-22 that underperformed their targeted rate of return. These returns will be factored into the June, 2022 valuation (to be received in Summer 2023) and will decrease funded status and increase contributions when compared to the current valuation.

Actuarial Report Summary

As the pension plan administrator, CalPERS performs various administrative services including investment, benefit administration, and actuarial services for the County of Yolo. The Actuarial Valuation Reports as of June 30, 2021 for both the Miscellaneous and Safety plans (Attachment B and C) are used to set the County's pension funding rates for the 2023-24 fiscal year. Key assumptions used in the Actuarial Reports are summarized below:

Actuarial Assumption	June 30, 2021 Valuation	June 30, 2020 Valuation
Actuarial Cost Method	Entry Age Normal	Entry Age Normal
Discount Rate	6.80%	7.00%
Payroll Growth	2.80%	2.75%
Inflation	2.30%	2.50%
Amortization Period	Investment gains/ losses - 20 years Assumption/Benefit changes - 20 years	Investment gains/ losses - 20 years Assumption/Benefit changes - 20 years

CalPERS performed their Asset Liability Management (ALM) process leading into the June 30, 2021 valuation. This along with the Risk Mitigation policy resulted in the CalPERS Board of Administration voting to reduce the current discount rate to 6.8% and adopt new actuarial assumptions including a slightly longer life expectancy for retirees and beneficiaries. While this results in a higher liability, strong investment gains during the 2020-21 fiscal year mitigated the increase in the short term.

The table below provides a summary of the required employer contribution rates for both the Miscellaneous and Safety plans over the past five years, as well as projected employer contribution rates for the next five years as included in the actuarial valuation report:

Fiscal Year	Miscellaneous	Safety
2019-20 Actual	38.44%	40.15%
2020-21 Actual	30.40%	43.70%
2021-22 Actual	31.37%	44.44%
2022-23 Actual	32.69%	46.88%
2023-24 Actual	32.57%	46.29%
2024-25 Projected	31.80%	45.30%
2025-26 Projected	28.80%	43.80%
2026-27 Projected	27.80%	40.90%
2027-28 Projected	26.40%	39.10%
2028-29 Projected	24.90%	36.90%

Pension Trust

The Pension Funding Policy approved by the Board in 2018 provided for the establishment of a Section 115 Pension Trust in order to accumulate assets to safeguard the County's ability to pay the required annual pension contribution and to obtain long-term savings from paying down the unfunded liability. The table below shows the activity and balances of the Pension trust since it was established in 2018:

Fiscal Year	Contributions	Earnings	Fees	Ending Balance
2017-18	$800,000	$67	$0	$800,067
2018-19	$2,523,500	$52,501	$3,688	$3,372,380
2019-20	$2,425,800	$146,619	$14,290	$5,930,509
2020-21*	$0	$749,012	$23,029	$6,656,493
2021-22*	$0	-$783,491	$24,456	$5,845,398

** No contribution made due to an additional discretionary contribution made to CalPERS in coordination with the Yolo County Superior Court.*

Additional Discretionary Contribution

In Fiscal Year 2021-22 the Board of Supervisors authorized the Chief Financial Officer to make a discretionary contribution to CalPERS in coordination with the Yolo County Superior Court. Based on an analysis prepared by the Department of Financial Services (DFS), the Courts contributed a share of 7.0046% and the County 92.9954% based on the calculated share of the Miscellaneous Plan unfunded liability between the two agencies. The County also made a proportional contribution to the Safety Plan. These additional discretionary contributions are shown below:

	Miscellaneous Plan		Safety Plan	Total County Contribution
Fiscal Year	Courts	County		
2021-22 Actual	$236,388	$2,401,161	$737,201	$3,318,362

For 2022-23, DFS has updated the analysis to determine if additional discretionary contributions are feasible while maintaining the target balance in the Pension Trust. Based on this updated analysis (Attachment D), the County is able to make an additional discretionary contribution of up to $3.7 million assuming the Court makes a proportionate contribution of $277,000.

	Miscellaneous Plan		Safety Plan	Total County Contribution
Fiscal Year	Courts	County		
2022-23 Proposed	$276,930	$2,894,538	$875,084	$3,769,622

Staff recommends that the Board authorize the Chief Financial Officer to make an additional discretionary contribution to CalPERS based on the proportionate Miscellaneous Plan share between the County and the Court as reflected in Attachment D, and in an amount not to exceed a total County contribution of $3,769,622.

Collaborations (including Board advisory groups and external partner agencies)

The Department of Financial Services has worked with the Yolo County Superior Court to gauge the Court's interest in making an additional discretionary contribution. Staff from DFS provided the updated analysis to the Court in May 2023 and the Court indicated their interest in paying a budgeted amount toward the pension plan's unfunded liability.

County of Yolo

Administrative Policies and Procedures Manual

TITLE: PENSION FUNDING POLICY	DEPARTMENT: FINANCIAL SERVICES
TYPE: **POLICY**	DATE: May 8, 2018

A. PURPOSE

This Policy statement pertains to the actuarial, funding and cost recovery aspects of Pension benefits. This policy does not purport to address the sustainability of established pension benefits under current defined benefit formulas, which are the subject of Human Resources administrative policies. This policy may also be referred to, in brief, as "Pension Policy".

This Policy will be updated periodically in light of actuarial valuation results, changes in benefits, other material changes in Pension benefits or obligations, or other changes caused by state laws.

B. APPLICABILITY

This policy is an extension of the County *Policy on Cost Recovery and Fees* (adopted 06/07/2011) and the *Policy on Borrowing, Debt, and Obligations* (revised 02/06/2018), and is generally consistent with best practices recommended by the Government Finance Officers Association (GFOA). Variances from best practices are identified herein together with the underlying reasons.

This policy is applicable to the County's two key defined benefit plans which are administered by the California Public Employees' Retirement System (CalPERS):

- Miscellaneous Plan of the County of Yolo hereafter referred to as the "Miscellaneous Plan". The Miscellaneous plan includes employees of the County and employees of the Yolo County Superior Court which separated from the County through the Trial Court Employment Protection and Governance Act in 2001, but whose employees still remain part of the County's pension plan.
- Safety Plan of the County of Yolo hereafter referred to as the "Safety Plan".

The County receives actuarial valuations prepared by the actuarial office of CalPERS on an annual basis for funding purposes. The County has ordered accounting valuations since 2015 to report its obligation for pension benefits in accordance with Government Accounting Standards Board (GASB) *Statement No. 68 Accounting and Financial Reporting for Pensions – An Amendment of GASB Statement No. 27*.

C. DEFINITIONS

Key actuarial or accounting terms related to pensions are defined below:

Accrued Liability (also called Actuarial Accrued Liability) – The total dollars needed as of the actuarial valuation date to fund all benefits earned in the past for current and retired members and their beneficiaries.

Actuarial Assumptions – Assumptions made about certain events that will affect pension costs. Assumptions can generally be broken down into two categories: demographic and economic. Demographic assumptions include such things as mortality, disability and retirement rates. Economic assumptions include discount rate, salary growth, and inflation.

Actuarial Valuation – The determination, as of a point in time (valuation date), of the Normal Cost, Accrued Liability, and related actuarial present values for a pension plan.

Actuarially Determined Contribution (ADC) – An amount that is actuarially determined in accordance with GASB Standard No. 68 and Actuarial Standards of Practice (ASOP) so that, if paid on an ongoing basis, would be expected to provide sufficient resources to fund both the normal cost for each year and amortize the unfunded accrued liability.

Funded Status – A measure of how well funded, or how "on track" a pension plan is with respect to having sufficient assets to fund liabilities. A ratio greater than 100 percent means the plan has more assets than liabilities and a ratio of less than 100 percent means liabilities are greater than assets.

Normal Cost – The annual cost of service accrual for a fiscal year for current active employees. The portion that is allocated to future years of service are referred to as future normal costs.

Prepayment Contribution – A payment made by the employer in advance toward the Unfunded Accrued Liability at the beginning of a fiscal year to reduce or eliminate the year's required employer contribution on each bi-weekly payroll period.

Pension Benefit – Pension benefits are provided pursuant to a defined benefit formula. The formula used by the retirement system will be based on key factors such as the benefit factor, service credit and final pensionable compensation. A simplified example is below:

Service Credit (Years)	X	Benefit Factor (percent per year)	X	Final Pensionable Compensation (dollars)	=	Pension Benefit

Pensionable Compensation – Pensionable compensation is defined in government code and retirement law and generally refers to the normal monthly rate of pay or base pay of the member paid in cash for employment rendered on a full-time basis during normal hours according to publically available pay schedules.

Present Value of Benefits (PVB) – The total dollars needed as of the valuation date to fund all benefits earned in the past or expected to be earned in the future for current members.

Unfunded Accrued Liability (UAL) – When the value of the plan's assets is less than its Accrued Liability, the difference is the plan's Unfunded Accrued Liability (or unfunded liability). If there is an unfunded liability, the plan will have to pay contributions exceeding the Normal Cost.

D. GUIDING PRINCIPLES

1. INTERGENERATIONAL EQUITY

Pension benefits are offered as part of a compensation package for employees as a benefit by the County of Yolo for a career of public service. The employee accumulates (or earns) the benefit through accrual of years of service with the agency over their service life (or career). The County as a matter of principle strives to comply with maintaining intergenerational equity. As this relates to pension benefits, the objective is to ensure that adequate employee and employer contributions are made to the pension system during the service lives of employees to avoid shifting the cost or burden to future generations of employees and taxpayers.

2. FINANCIAL SUSTAINABILITY

Financial Sustainability is the overarching principle in Yolo County financial operations. Within the context of pension funding, this principle expresses that the county provides and fund benefits to its employees within available means while proactively taking measures to build and preserve its ability to continue providing these benefits in the long run.

E. POLICY

1. ACTUARIAL VALUATION

In accordance with best practices and generally accepted accounting principles, the County will receive an Actuarial Valuation for both (1) funding and (2) accounting for pension benefits annually from the Actuarial Office of CalPERS. CalPERS, as the pension plan administrator, establishes actuarial assumptions for all pension plans under their administration.

The County Administrator and Chief Financial Officer annually shall review the actuarial report including actuarial assumptions applied by the pension plan administrator for conformity with best practices as established by GFOA including but not limited to:

- Actuarial Cost Method – Ensure methods conform to actuarial standards of practice and are designed to fully fund the long-term costs of promised benefits.
- Asset Smoothing – Ensure that: the same smoothing periods are used for both gains and losses; market corridors if used are symmetrical; and smoothing occurs over fixed periods not longer than five years.
- Amortization – Ensure that: the unfunded actuarial accrued liability is amortized over fixed (closed) periods to balance the goals of demographic matching and volatility management; the amortization period does not exceed 25 years; and a layered approach is used to amortize the various components.

The County Administrator and Chief Financial Officer shall transmit the actuarial report, together with a lay summary regarding the funded status of the pension plans, any noted deviations from best practices, and any additional recommendations to the Board of Supervisors.

The Chief Financial Officer shall use the actuarial valuation report as the basis for financial reporting in accordance with *generally accepted accounting principles*. The Chief Financial Officer should allocate the liability to participating agencies and enterprise or internal service funds to show their respective share of the long term pension liability. The Chief Financial Officer, at his discretion, may contract an external auditor to opine on the allocation of the liability to other agencies or segments of the governmental agency.

2. TRANSPARENCY IN GROWTH OF LIABILITY

The County Administrator shall evaluate opportunities and implement procedures to enhance transparency in collective bargaining on the employee and employer share of pension contributions, with the purpose of identifying clearly any significant financial impact of any proposed salary or benefit modification.

All future benefit modifications (including those that effect the key pension benefit factors of the defined benefit formula) for members and beneficiaries should be carefully considered and impacts of such proposed changes on the County's pension plan shall be evaluated by the County Administrator and the Chief Financial Officer (utilizing actuaries if required) and presented to the Board of Supervisors prior to adoption so the effect of the modifications can be understood and considered in relation to the plan's actuarial accrued liability, funded ratio, and contribution rate.

3. FUNDED STATUS

The target Funded Status is 100% (full funding) of the Actuarial Accrued Liability related the County's pension plans. The County's goal is to accumulate sufficient assets to fund all projected benefit payments.

4. FUNDING PENSION COST

a) ACTUARIALLY DETERMINED CONTRIBUTION (ADC)

The ADC is determined annually by the pension plan administrator CalPERS for subsequent fiscal years (for example: CalPERS Actuarial Valuation report as of June 30, 2016 determines 2018-19 required contributions). The County Administrator shall each year budget the Actuarially Determined Contribution to CalPERS and establish and maintain the necessary reserve to ensure that this obligation is met annually. The County will prioritize the funding of the ADC above the funding of any supplemental contributions.

b) PREPAYMENT OF ANNUAL REQUIRED CONTRIBUTION

The pension plan administrator (CalPERS) at times may provide an incentive (or discount) for the County to pay a full year of UAL contribution in advance at the beginning of the fiscal year, rather than remitting the contribution with each monthly period during the fiscal year.

The Chief Financial Officer shall prepare a financial analysis on an annual basis when a financial incentive is offered to make a prepayment of the UAL contribution to determine whether this is in the best interest of the County. The analysis should take into account the savings and cash flow impact from remitting the pension contribution in advance compared to any costs of borrowing or financing. This recommendation shall be submitted to the County Administrator as part of the County's recommended budget.

c) OPPORTUNITIES FOR SAVINGS

CalPERS applies an amortization period of up 30 years for the amortization of the Unfunded Accrued Liability (UAL) arising from each event (change in actuarial assumptions; investment gain/loss; change in benefit, etc.). Without any additional action, provided that the actuarial assumptions are accurate, the plan would move to a fully funded status within 30 years of the last event that created the liability. In line with industry best practices, CalPERS has recently revised its amortization policy to shorten the period for amortizing future actuarial gains and losses to 20 years, beginning from the actuarial report for June 30, 2019, and effective in 2021-22 for Yolo County.

CalPERS new amortization policy does not affect the current unfunded liabilities ($310 million as of 6/30/2018), which are still being amortized over 30 years. CalPERS has offered alternative 20-year and 15-year amortization schedules available for voluntarily election that would result in substantial long-term savings to the County ($49 million and $147 million respectively). As part of long-term financial planning, County staff should periodically evaluate the feasibility and cost-benefits of adopting one of these alternative amortization schedules and make appropriate recommendations to the Board of Supervisors.

d) PENSION FUNDING STABILIZATION PROGRAM

Although there is no legal requirement to make a pension contribution above the Actuarially Determined Contribution (ADC), the Board of Supervisors has determined that fulfilling its full pension obligation is a primary objective of the County and directed staff to establish safeguards to ensure that this obligation is met annually. As a result, based on staff research and recommendation, the Board has approved a formal pension funding stabilization program that is centered on the establishment of an irrevocable trust, hereafter referred to as Pension Trust.

As shown in Exhibit A, the Board of Supervisors has considered various options to addressing pension funding prior to adoption of this program.

5. PENSION TRUST

a) ESTABLISHMENT OF TRUST

The Chief Financial Officer shall establish a Section 115 Trust for the purpose of Pension Funding Stabilization. The Section 115 Trust, which is exempt from federal income taxes, will be the vehicle to accumulate assets for the sole purpose of pension funding, as authorized by the Board.

b) OBJECTIVE OF TRUST

The purpose of the pension trust is to accumulate assets incrementally in the long-run for the sole purpose of supplementing the County's effort to fulfill its pension funding obligation. To this purpose, the trust is maintained for the primary objective of bolstering the County's ability to pay the ADC; and the secondary objective of obtaining long-term savings that result from paying down the unfunded actuarial liability earlier.

c) MINIMUM BALANCE

The initial target balance for minimum level of the pension funding stabilization program will be sixty (60) days-worth (based on 360 days) of the County's required pension contributions (including normal cost and UAL) from the CalPERS funding valuation. The minimum balance will be calculated annually by the Chief Financial Officer. For the initial year (2018/19), this target would approximately be $3,730,000 for the Miscellaneous Plan and $1,415,000 for the Safety Plan for an aggregate Trust target balance of $5,145,000.

An illustration of projected future target balances based on the June 30, 2016 actuarial valuation is provided in Exhibit B of this policy. After the minimum target balance is achieved, it shall be maintained every year and shall be used to ensure sufficient funding for the actuarially determined contribution.

Balances accumulated above the minimum target balance for the trust shall be utilized to explore methods described above as *Opportunities for Savings* to further reduce the County's Unfunded Actuarial Liability, upon Board approval.

d) FUNDING TRUST

(1) INITIAL FUNDING

The Section 115 Trust shall initially be funded by the $800,000 Pension Reserve established in the 2017/18 Adopted Budget.

(2) ON-GOING FUNDING

To provide a dedicated on-going funding source for the Pension Trust, a supplemental pension charge will be applied to all departments as a percentage of basic salary. This charge will be set annually as part of the County budget process, and will be in the range 0.5% - 2.5%. The rate would initially be set at 1.0% for fiscal year 2018/19. However, a proposed ramp-up of funding of the trust is shown below:

- 2018/19 = 1.00%
- 2019/20 = 1.25%
- 2020/21 = 1.50%
- 2021/22 = 1.75%
- 2022/23 = 2.00%
- 2023/24 = 2.25%
- 2024/25 = 2.50%

An illustration of the accumulation effect of the ramp-up on the trust funding is shown in Exhibit C. According to this estimated ramp-up, the County is expected to achieve the minimum trust balance by the fourth year, in 2021-22.

(3) PREPAYMENT SAVINGS

During the annual budget process, the County Administrator shall provide a recommendation to the Board of Supervisors on the amount to transfer from savings generated by prepayment of annual contributions to the Pension Funding Stabilization Program based on consideration of available balances in the Internal Service Fund (refer to Section 7(a)).

e) INVESTING ASSETS

The Board of Supervisors delegates the plan administrator function to the County Treasurer (now Chief Financial Officer) who may contract with third party providers. The purpose of investing funds is to accumulate sufficient assets to implement this pension funding policy. Assets that are in the irrevocable Pension Trust are not subject to County Investment Policy and laws governing county treasury investments.

Pension trust assets should be invested to achieve an objective of capital preservation prior to the target balance being achieved. After the target balance has been achieved, the trust assets should be invested to achieve a return that matches the discount rate used by actuaries to determine the actuarial liability, and that is equivalent to the average return on the pension assets invested by CalPERS.

The Chief Financial Officer should regularly review and monitor the investment results. Annually the Plan Administrator shall assess and recommend any adjustments to the investment strategies to the Board of Supervisors.

f) WITHDRAWING ASSETS

Assets contributed to the Irrevocable Trust can only be withdrawn to pay pension costs of the pension plans listed above. The County's stated intention is to specifically reserve these assets to support the funding of the ADC and to reduce the unfunded actuarial liability. Therefore, these assets will be drawn on to provide pension rate stabilization during periods of fiscal distress.

The Chief Financial Officer shall request board approval prior to the withdrawal of assets from the trust. If assets are being withdrawn due to fiscal distress, some of the factors that should be considered in determining whether the County is in a period of fiscal distress are as follows:

- Uncertainty regarding ability to pay short term obligations on time.
- Ability to meet long term obligations including those from debt issuances, pension plans or other postemployment benefits is uncertain given the extent of obligations in comparison to available resources.
- Ability to maintain financial stability is impaired including reductions to credit rating, reliance on declining or unstable sources of revenue, and inability to raise revenues to support commitments.
- Ability to maintain services is not possible based on fiscal condition and the County is required to layoff personnel.

g) RESTORATION OF TRUST BALANCE

In the first year of funding, or after drawdown, the Pension Trust shall be funded or replenished to the target level within five fiscal years.

6. RECOVERING PENSION COSTS

Pension costs including the normal cost and the monthly (or annual if prepaid) UAL contribution to CalPERS will be translated to a percentage of payroll. The employer contribution of pension cost will be charged as a percentage of payroll as calculated by CalPERS in the annual actuarial report consistent with the employee's specific benefit plan. Similarly, any supplemental funding to the Pension Trust will be charged to County departments and programs as a percentage of payroll.

7. ACCOUNTING FOR PENSION COSTS

a. INTERNAL SERVICE FUND

The Chief Financial Officer shall create a Pension Internal Service Fund to record the following:

- Pension contributions deducted from Payroll
- Contributions paid to CalPERS and to the Pension Trust.
- Transactions related to prepayment of UAL contributions.
- UAL contributions from other plan participants (e.g. Yolo Superior Court).

Beside the normal transactions that are authorized by the Board of Supervisors or the County Administrator, the Pension Internal Service fund will hold any savings realized through investment or prepayment until recommendation by the County Administrator through the budget process.

b. PENSION TRUST FUND

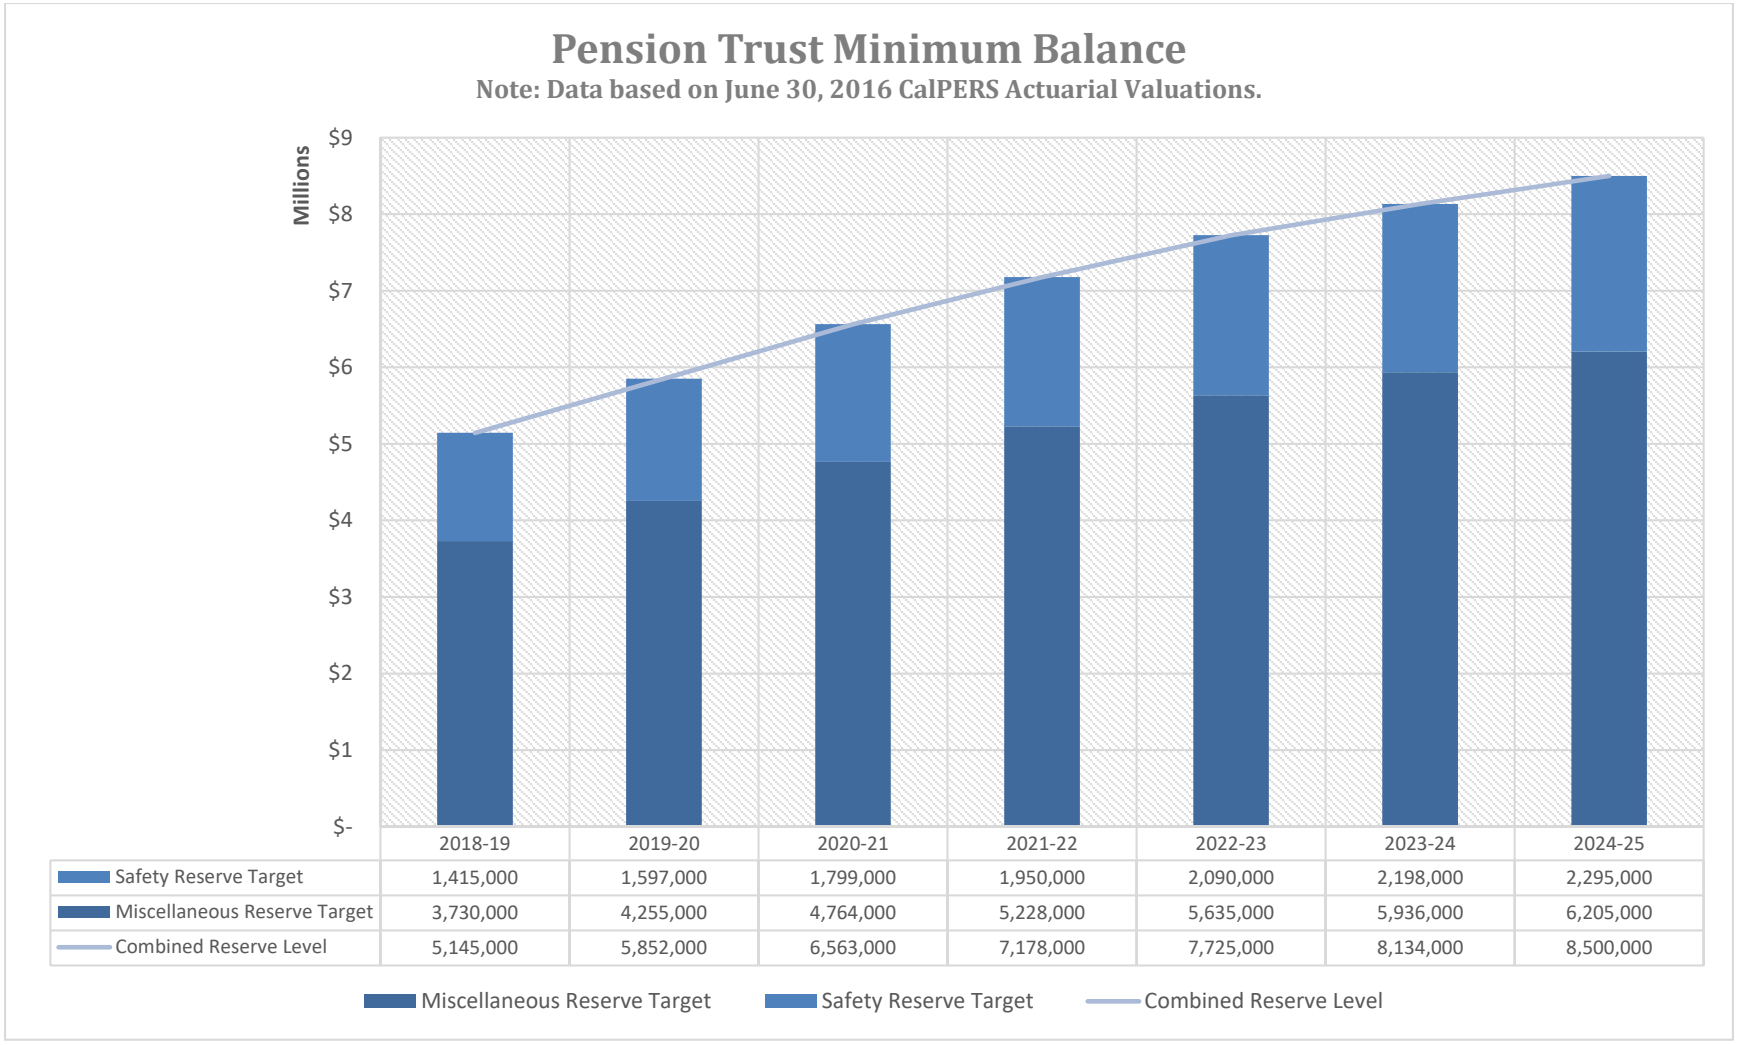
The Chief Financial Officer shall create a Pension Trust fund in the accounting and financial reporting system. The fund will track all of the assets, investment gains, and losses and other activities of the Section 115 Pension Rate Stabilization Trust. All assets of the Pension Trust shall be restricted to the purpose of funding pension obligations.

The Chief Financial Officer shall report annually to the Board of Supervisors on the financial condition and performance of the Pension Trust Fund, within six months of fiscal year end. Such report shall include appropriate recommendations regarding the investment and use of assets to achieve the purpose of the Trust.

Exhibit A – Pension Funding Stabilization Options

COUNTY OF YOLO

Pension Funding Stabilization Options



(Listed in increasing degree of commitment)

	Funding Stabilization Options	Definition of Option	Advantages of Option	Disadvantages of Option	Chargeable to Grants	Reduce Contribution Rates	Reduce Pension Liability
1	Accounting Reserve	Reservation of fund balance by Board of Supervisors to be used toward pension liability.	✓ Reserve level can be adjusted up or down by Board to respond to unforeseen circumstances. ✓ Withdrawal can be made to supplement contributions. ✓ Easiest option to implement	✓ Assets would not be invested long-term and therefore would not keep up with inflation. ✓ Undisciplined saving since reserve is susceptible to changing organizational priorities.	No	No	No
2	Discretionary Contributions (to CalPERS)	Additional lump sum contributions made to the pension plan as cash flows allow.	✓ Provides flexibility since contributions can be made whenever cash is available. ✓ No long term commitment in relation to other options.	✓ Undisciplined approach to reducing liability. ✓ May require buy-in or method to address other employers in the pension plan. ✓ Costs must be allocated cost centers for claim purposes.	May be	Yes, delayed	Yes
3	Prepayment of Annual Contributions	Prepay the required contributions in a lump sum to CalPERS by July 15th rather than bi-weekly for the entire fiscal year to take advantage of discount	✓ Reduces amount payable annually to CalPERS ✓ For FY16/17 potential $1 million premium saving for a net cash saving of about $900K.	✓ Requires County to find $24 million by July 15th to make contribution. ✓ May require buy-in from other employers in the pension plan. ✓ Is mainly a cash saving mechanism; must direct saving toward pension funding.	Yes	No	No
4	Section 115 Trust	Open an irrevocable trust account for additional contributions which are invested similar to the OPEB trust to provide a mechanism for pension contribution stabilization.	✓ Local control of assets and can be used to offset future contribution increases ✓ Likely higher returns since assets invested by trustee outside of county treasury. ✓ Positive effect on credit rating. ✓ Don't need buy-in from other employers in plan. ✓ Could reduce pension liability on financial statements	✓ Assets are restricted to pension funding. ✓ Assets would not be included by CalPERS in their funding valuations to determine future contributions ✓ Risk of market volatility and underperforming investments in relation to CalPERS ✓ Additional cost and effort to administer. ✓ Discipline plan required.	Yes	No	Yes
5	Alternative Amortization Schedule as offered by CalPERS	Refinancing of the net pension liability to amortize and pay off liability over a shorter time period, at a level rate. 15-year or 20-year amortization instead of 30.	✓ Quickest way to reduce unfunded liabilities. ✓ Substantial long term savings of interest on pension liability (Total $18 million for 20-yr option; $86 million for 15-yr option) ✓ Reduces negative amortization as keeps contribution percentage level and eliminates ramp up/down.	✓ Increased annual budgetary burden due to accelerated payments (Add'l $1.7 million for 20-yr option; $5.1 million for 15-yr) ✓ No flexibility to change once alternative amortization base has been selected. ✓ Would affect other employers in the Misc. Plan require their agreement.	Yes	No	Yes

July 2022

Miscellaneous Plan of the County of Yolo (CalPERS ID: 6380137448)
Annual Valuation Report as of June 30, 2021

Dear Employer,

Attached to this letter, you will find the June 30, 2021 actuarial valuation report for the rate plan noted above. Provided in this report is the determination of the minimum required employer contributions for fiscal year (FY) 2023-24. In addition, the report also contains important information regarding the current financial status of the plan as well as projections and risk measures to aid in planning for the future.

Actuarial valuations are based on assumptions regarding future plan experience including investment return and payroll growth, eligibility for the types of benefits provided, and longevity among retirees. The CalPERS Board of Administration (board) adopts these assumptions after considering the advice of CalPERS actuarial and investment teams and other professionals. Each actuarial valuation reflects all prior differences between actual and assumed experience and adjusts the contribution requirements as needed. This valuation is based on an investment return assumption of 6.8%, which was adopted by the board in November 2021. Other assumptions used in this report are those recommended in the CalPERS Experience Study and Review of Actuarial Assumptions report from November 2021.

Required Contributions

The table below shows the minimum required employer contributions and the PEPRA member rate for FY 2023-24 along with an estimate of the required contribution for FY 2024-25. Employee contributions other than cost sharing (whether paid by the employer or the employee) are in addition to the results shown below. The required employer contributions in this report do not reflect any cost sharing arrangement between the agency and the employees.

Fiscal Year	Employer Normal Cost Rate	Employer Amortization of Unfunded Accrued Liability	PEPRA Member Rate
2023-24	10.40%	$23,754,643	7.50%
Projected Results			
2024-25	*10.2%*	*$23,820,000*	*TBD*

The actual investment return for FY 2021-22 was not known at the time this report was prepared. The projections above assume the investment return for that year would be 6.8%. *To the extent the actual investment return for FY 2021-22 differs from 6.8%, the actual contribution requirements for FY 2024-25 will differ from those shown above.* For additional details regarding the assumptions and methods used for these projections, please refer to the "Projected Employer Contributions" in the "Highlights and Executive Summary" section. This section also contains projected required contributions through FY *2028-29*.

Changes from Previous **Year's Valuation**s

On July 12, 2021, CalPERS reported a preliminary 21.3% net return on investments for FY 2020-21. Since the return exceeded the 7.00% discount rate sufficiently, the CalPERS Funding Risk Mitigation policy allows CalPERS to use a portion of the investment gain to offset the cost of reducing the expected volatility of future investment returns. Based on the thresholds specified in the policy, the excess return of 14.3% prescribes a reduction in investment volatility that corresponds to a reduction in the discount rate of 0.20%, from 7.00% to 6.80%.

On November 17, 2021, the board adopted new actuarial assumptions based on the recommendations in the November 2021 CalPERS Experience Study and Review of Actuarial Assumptions. This study reviewed the retirement rates, termination rates, mortality rates, rates of salary increases, and inflation assumption for public agencies. These new assumptions are incorporated in this actuarial valuation and will impact the required contribution for FY 2023-24. In addition, the board adopted a new strategic asset allocation as part of its Asset Liability Management process. The new

asset allocation, along with the new capital market assumptions and economic assumptions, support a discount rate of 6.80%. This includes a reduction in the price inflation assumption from 2.50% to 2.30%.

Besides the above noted changes, there may also be changes specific to the plan such as contract amendments and funding changes.

Further descriptions of general changes are included in the "Highlights and Executive Summary" section and in Appendix A, "Actuarial Methods and Assumptions." The effects of the changes on the required contributions are included in the "Reconciliation of Required Employer Contributions" section.

Questions

We understand that you might have questions about these results, and the plan actuary whose signature is on the valuation report is available to discuss. If you have other questions, you may call the Customer Contact Center at (888)-CalPERS or (888-225-7377).

Sincerely,

SCOTT TERANDO, ASA, EA, MAAA, FCA, CFA

Actuarial Certification

To the best of our knowledge, this report is complete and accurate and contains sufficient information to disclose, fully and fairly, the funded condition of the Miscellaneous Plan of the County of Yolo and satisfies the actuarial valuation requirements of Government Code section 7504. This valuation is based on the member and financial data as of June 30, 2021 provided by the various CalPERS databases and the benefits under this plan with CalPERS as of the date this report was produced. It is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles, in accordance with standards of practice prescribed by the Actuarial Standards Board, and that the assumptions and methods are internally consistent and reasonable for this plan, as prescribed by the CalPERS Board of Administration according to provisions set forth in the California Public Employees' Retirement Law.

The undersigned is an actuary who satisfies the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States with regard to pensions.

MAY SHUANG YU, ASA, MAAA
Senior Pension Actuary, CalPERS

Introduction

This report presents the results of the June 30, 2021 actuarial valuation of the Miscellaneous Plan of the County of Yolo of the California Public Employees' Retirement System (CalPERS). This actuarial valuation sets the minimum required employer contributions for fiscal year (FY) 2023-24.

Purpose of the Report

The actuarial valuation was prepared by the CalPERS Actuarial Office using data as of June 30, 2021. The purpose of the report is to:

- Set forth the assets and accrued liabilities of this plan as of June 30, 2021;
- Determine the minimum required employer contributions for the FY July 1, 2023 through June 30, 2024;
- Provide actuarial information as of June 30, 2021 to the CalPERS Board of Administration (board) and other interested parties.

The pension funding information presented in this report should not be used in financial reports subject to Governmental Accounting Standards Board (GASB) Statement No. 68 for an Agent Employer Defined Benefit Pension Plan. A separate accounting valuation report for such purposes is available from CalPERS and details for ordering are available on the CalPERS website (www.calpers.ca.gov).

The measurements shown in this actuarial valuation may not be applicable for other purposes. The agency should contact the plan actuary before disseminating any portion of this report for any reason that is not explicitly described above.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; changes in actuarial policies; changes in plan provisions or applicable law; and differences between the required contributions determined by the valuation and the actual contributions made by the agency.

Assessment and Disclosure of Risk

This report includes the following risk disclosures consistent with the recommendations of Actuarial Standards of Practice No. 51 and recommended by the California Actuarial Advisory Panel (CAAP) in the Model Disclosure Elements document:

- A "Scenario Test," projecting future results under different investment income returns.
- A "Sensitivity Analysis," showing the impact on current valuation results using alternative discount rates 5.8% and 7.8%.
- A "Sensitivity Analysis," showing the impact on current valuation results assuming rates of mortality are 10% lower or 10% higher than our current post-retirement mortality assumptions adopted in 2021.
- Plan maturity measures indicating how sensitive a plan may be to the risks noted above.

Required Contributions

Required Employer Contributions	Fiscal Year 2023-24
Employer Normal Cost Rate	10.40%
Plus	
Required Payment on Amortization Bases	$23,754,643
Paid either as	
1) Monthly Payment	$1,979,554
Or	
2) Annual Prepayment Option*	$22,985,972
Required PEPRA Member Contribution Rate	7.50%

The total minimum required employer contribution is the sum of the Plan's Employer Normal Cost Rate (expressed as a percentage of payroll and paid as payroll is reported) plus the Employer Unfunded Accrued Liability (UAL) Contribution Amount (billed monthly (1) or prepaid annually (2) in dollars).

** Only the UAL portion of the employer contribution can be prepaid (which must be received in full no later than July 31).*

For additional detail regarding the determination of the required contribution for PEPRA members, see "PEPRA Member Contribution Rates" in the "Liabilities and Contributions" section. Required member contributions for Classic members can be found in Appendix B.

	Fiscal Year 2022-23	Fiscal Year 2023-24
Normal Cost Contribution as a Percentage of Payroll		
Total Normal Cost	16.80%	18.09%
Employee Contribution[1]	7.38%	7.69%
Employer Normal Cost[2]	9.42%	10.40%
Projected Annual Payroll for Contribution Year	$104,610,283	$107,141,375
Estimated Employer Contributions Based On Projected Payroll		
Total Normal Cost	$17,574,528	$19,381,875
Employee Contribution	7,720,239	8,239,172
Employer Normal Cost	9,854,289	11,142,703
Unfunded Liability Contribution	24,342,547	23,754,643
% of Projected Payroll (illustrative only)	23.27%	22.17%
Estimated Total Employer Contribution	$34,196,836	$34,897,346
% of Projected Payroll (illustrative only)	32.69%	32.57%

[1] For classic members, this is the percentage specified in the Public Employees' Retirement Law, net of any reduction from the use of a modified formula or other factors. For PEPRA members, the member contribution rate is based on 50% of the normal cost. A development of PEPRA member contribution rates can be found in the "Liabilities and Contributions" section. Employee cost sharing is not shown in this report.

[2] The Employer Normal Cost is a blended rate for all benefit groups in the plan. For a breakout of normal cost by benefit group, see "Normal Cost by Benefit Group" in the "Liabilities and Contributions" section.

Additional Discretionary Employer Contributions

The minimum required employer contribution towards the Unfunded Accrued Liability (UAL) for this rate plan for FY 2023-24 is $23,754,643. CalPERS allows agencies to make additional discretionary payments (ADPs) at any time and in any amount. These optional payments serve to reduce the UAL and future required contributions and can result in significant long-term savings. Agencies can also use ADPs to stabilize annual contributions as a fixed dollar amount, percent of payroll or percent of revenue.

Provided below are select ADP options for consideration. Making such an ADP during FY 2023-24 does not require an ADP be made in any future year, nor does it change the remaining amortization period of any portion of unfunded liability. For information on permanent changes to amortization periods, see the "Amortization Schedule and Alternatives" section of the report.

Agencies considering making an ADP should contact CalPERS for additional information.

Minimum Required Employer Contribution for Fiscal Year 2023-24

Estimated Normal Cost	Minimum UAL Payment	ADP	Total UAL Contribution	Estimated Total Contribution
$11,142,703	$23,754,643	$0	$23,754,643	$34,897,346

Alternative Fiscal Year 2023-24 Employer Contributions for Greater UAL Reduction

Funding Target	Estimated Normal Cost	Minimum UAL Payment	ADP[1]	Total UAL Contribution	Estimated Total Contribution
10 years	$11,142,703	$23,754,643	$2,839,681	$26,594,324	$37,737,027
5 years	$11,142,703	$23,754,643	$21,979,274	$45,733,917	$56,876,620

[1] The ADP amounts are assumed to be made in the middle of the fiscal year. A payment made earlier or later in the fiscal year would have to be less or more than the amount shown to have the same effect on the UAL amortization.

Note that the calculations above are based on the projected Unfunded Accrued Liability as of June 30, 2023 as determined in the June 30, 2021 actuarial valuation. New unfunded liabilities can emerge in future years due to assumption or method changes, changes in plan provisions, and actuarial experience different than assumed. Making an ADP illustrated above for the indicated number of years will not result in a plan that is exactly 100% funded in the indicated number of years. Valuation results will vary from one year to the next and can diverge significantly from projections over a period of several years.

Plan's Funded Status

	June 30, 2020	June 30, 2021
1. Present Value of Projected Benefits	$963,060,370	$1,036,162,479
2. Entry Age Accrued Liability	821,817,657	873,682,657
3. Market Value of Assets (MVA)	538,969,551	659,854,546
4. Unfunded Accrued Liability (UAL) [(2) – (3)]	$282,848,106	$213,828,111
5. Funded Ratio [(3) / (2)]	65.6%	75.5%

The UAL and funded ratio are assessments of the need for future employer contributions based on the actuarial cost method used to fund the plan. The UAL is the present value of future employer contributions for service that has already been earned and is in addition to future normal cost contributions for active members. The funded ratio, on the other hand, is a relative measure of funded status that allows for comparison between plans of different sizes. For measures of funded status that are appropriate for assessing the sufficiency of plan assets to cover estimated termination liabilities, please see "Hypothetical Termination Liability" in the "Risk Analysis" section.

Projected Employer Contributions

The table below shows the required and projected employer contributions (before cost sharing) for the next six fiscal years. The projection assumes that all actuarial assumptions will be realized and that no further changes to assumptions, contributions, benefits, or funding will occur during the projection period. In particular, the investment return beginning with FY 2021-22 is assumed to be 6.80% per year, net of investment and administrative expenses. Actual contribution rates during this projection period could be significantly higher or lower than the projection shown below. The projected normal cost percentages below reflect that the normal cost will continue to decline over time as new employees are hired into lower cost benefit tiers. Future contribution requirements may differ significantly from those shown below. The actual long-term cost of the plan will depend on the actual benefits and expenses paid and the actual investment experience of the fund.

	Required Contribution	Projected Future Employer Contributions (Assumes 6.80% Return for Fiscal Year 2021-22 and Beyond)				
Fiscal Year	2023-24	2024-25	2025-26	2026-27	2027-28	2028-29
Normal Cost %	10.40%	10.2%	10.0%	9.9%	9.7%	9.5%
UAL Payment	$23,754,643	$23,820,000	$21,284,000	$20,864,000	$19,985,000	$18,919,000
*Total as a % of Payroll**	*32.57%*	*31.8%*	*28.8%*	*27.8%*	*26.4%*	*24.9%*
Projected Payroll	*$107,141,375*	*$110,141,333*	*$113,225,290*	*$116,395,599*	*$119,654,675*	*$123,005,006*

*Illustrative only and based on the projected payroll shown.

For some sources of UAL, the change in UAL is amortized using a 5-year ramp up. For more information, please see "Amortization of the Unfunded Actuarial Accrued Liability" under "Actuarial Methods" in Appendix A. This method phases in the impact of the change in UAL over a 5-year period in order to reduce employer cost volatility from year to year. As a result of this methodology, dramatic changes in the required employer contributions in any one year are less likely. However, required contributions can change gradually and significantly over the next five years. In years when there is a large increase in UAL, the relatively small amortization payments during the ramp up period could result in a funded ratio that is projected to decrease initially while the contribution impact of the increase in the UAL is phased in.

For projected contributions under alternate investment return scenarios, please see the "Future Investment Return Scenarios" in the "Risk Analysis" section. Our online pension plan projection tool, Pension Outlook, is available in the Employers section of the CalPERS website. Pension Outlook can help plan and budget pension costs under various scenarios.

Cost

Actuarial Determination of Plan Cost

Contributions to fund the plan are comprised of two components:

- Normal Cost, expressed as a percentage of total active payroll
- Amortization of the Unfunded Accrued Liability (UAL), expressed as a dollar amount

For fiscal years prior to 2017-18, the Amortization of UAL component was expressed as a percentage of total active payroll. Starting with FY 2017-18, the Amortization of UAL component is expressed as a dollar amount and invoiced on a monthly basis. There is an option to prepay this amount during July of each fiscal year.

The Normal Cost component is expressed as a percentage of active payroll with employer and employee contributions payable as part of the regular payroll reporting process.

The determination of both components requires complex actuarial calculations. The calculations are based on a set of actuarial assumptions which can be divided into two categories:

- Demographic assumptions (e.g., mortality rates, retirement rates, employment termination rates, disability rates)
- Economic assumptions (e.g., future investment earnings, inflation, salary growth rates)

These assumptions reflect CalPERS' best estimate of future experience of the plan and are long term in nature. We recognize that all assumptions will not be realized in any given year. For example, the investment earnings at CalPERS have averaged 6.9% over the 20 years ending June 30, 2021, yet individual fiscal year returns have ranged from -23.6% to +21.3%. In addition, CalPERS reviews all actuarial assumptions by conducting in-depth experience studies every four years, with the most recent experience study completed in 2021.

Changes Since the Prior **Year's** Valuation

Benefits

The standard actuarial practice at CalPERS is to recognize mandated legislative benefit changes in the first annual valuation following the effective date of the legislation. Voluntary benefit changes by plan amendment are generally included in the first valuation that is prepared after the amendment becomes effective, even if the valuation date is prior to the effective date of the amendment.

This valuation generally reflects plan changes by amendments effective before the date of the report. Please refer to the "Plan's Major Benefit Options" and Appendix B for a summary of the plan provisions used in this valuation. The effect of any mandated benefit changes or plan amendments on the unfunded liability is shown in the "(Gain) / Loss Analysis 6/30/20 – 6/30/21" and the effect on the employer contribution is shown in the "Reconciliation of Required Employer Contributions." It should be noted that no change in liability or contribution is shown for any plan changes which were already included in the prior year's valuation.

Actuarial Methods and Assumptions

On November 17, 2021, the board adopted new actuarial assumptions based on the recommendations in the 2021 CalPERS Experience Study and Review of Actuarial Assumptions. This study reviewed the retirement rates, termination rates, mortality rates, rates of salary increases, and inflation assumptions for Public Agencies. These new assumptions are incorporated in this actuarial valuation and will impact the required contribution for FY 2023-24. In addition, the board adopted a new asset portfolio as part of its Asset Liability Management process. The new asset mix supports a 6.80% discount rate, which reflects a change in the price inflation assumption to 2.30%.

Subsequent Events

The contribution requirements determined in this actuarial valuation report are based on demographic and financial information as of June 30, 2021. Changes subsequent to that date are not reflected. Investment returns below the assumed rate of return may increase future required contributions while investment returns above the assumed rate of return may decrease future required contributions.

The projected employer contributions on Page 6 are calculated under the assumption that the discount rate remains at 6.8% going forward and that the realized rate of return on assets for FY 2021-22 is 6.8%.

This actuarial valuation report reflects statutory changes, regulatory changes, and board actions through January 2022. Any subsequent changes or actions are not reflected.

Reconciliation of the Market Value of Assets

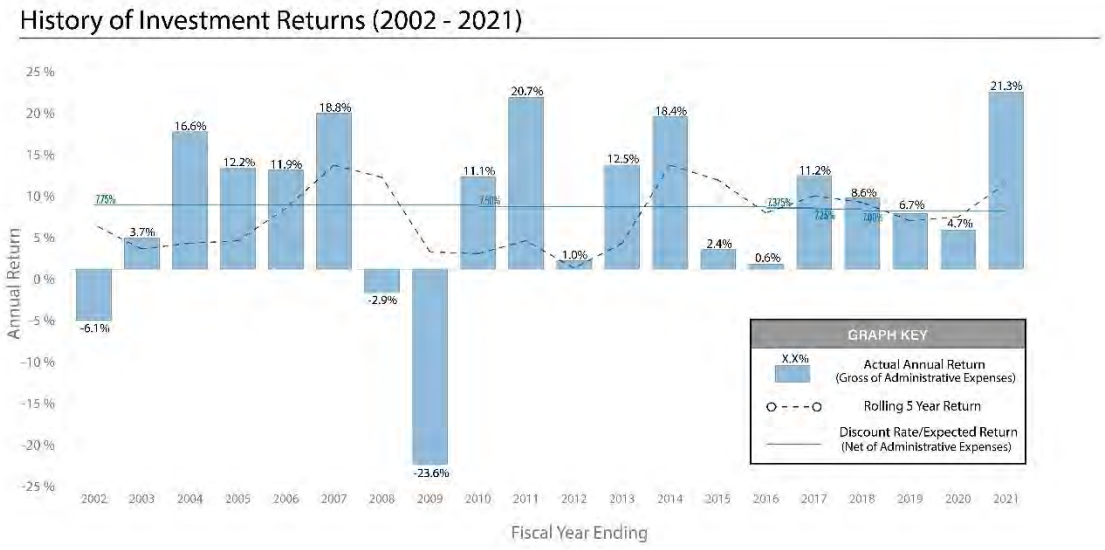
1.	Market Value of Assets as of 6/30/20 including Receivables	$538,969,551
2.	Change in Receivables for Service Buybacks	(136,027)
3.	Employer Contributions	31,150,762
4.	Employee Contributions	7,371,507
5.	Benefit Payments to Retirees and Beneficiaries	(41,430,382)
6.	Refunds	(221,077)
7.	Transfers	(686)
8.	Service Credit Purchase (SCP) Payments and Interest	231,586
9.	Administrative Expenses	(681,992)
10.	Miscellaneous Adjustments	0
11.	Investment Return (Net of Investment Expenses)	124,601,303
12.	Market Value of Assets as of 6/30/21 including Receivables	$659,854,546

Asset Allocation

CalPERS adheres to an Asset Allocation Strategy which establishes asset class allocation policy targets and ranges and manages those asset class allocations within their policy ranges. CalPERS Investment Belief No. 6 recognizes that strategic asset allocation is the dominant determinant of portfolio risk and return.

The asset allocation shown below reflects the allocation of the Public Employees' Retirement Fund (PERF) in its entirety as of June 30, 2021. The assets for County of Yolo Miscellaneous Plan are part of the PERF and are invested accordingly.

Asset Class	Current Allocation as of 6/30/2021	Policy Target Allocation as of 6/30/2021
Public Equity	51.4%	50.0%
Private Equity	8.3%	8.0%
Global Fixed Income	29.8%	28.0%
Real Assets	9.6%	13.0%
Liquidity	1.0%	1.0%
Total Fund Level Portfolios	2.5%	0.0%
Trust Level Financing	(2.6%)	0.0%
Total Fund	100.0%	100.0%



On November 17, 2021, the board adopted changes to the strategic asset allocation as shown in the Policy Target Allocation below expressed as a percentage of total assets.

Strategic Asset Allocation Policy Targets

Asset Class	Policy Target Allocation effective 11/17/2021
Global Equity Cap-weighted	30.0%
Global Equity Non-cap-weighted	12.0%
Private Equity	13.0%
Private Debt	5.0%
Emerging Market Sovereign Bonds	5.0%
High Yield Bonds	5.0%
Investment Grade Corporates	10.0%
Mortgage-backed Securities	5.0%
Treasuries	5.0%
Real Assets	15.0%
Leverage	(5.0%)
Total Fund	100.0%

CalPERS History of Investment Returns

The following is a chart with the 20-year historical annual returns of the PERF for each fiscal year ending on June 30 as reported by the Investment Office. Investment returns reported are net of investment expenses but without reduction for administrative expenses. The assumed rate of return, however, is net of both investment and administrative expenses. The Investment Office uses a three-month lag on private assets for investment performance reporting purposes. This can lead to a timing difference in the returns below and those used for financial reporting purposes. The investment gain or loss calculation in this report relies on assets that have been audited and are appropriate for financial reporting. Because of these differences, it is possible for the Investment Office to report a return higher than the discount rate while the rate plan experiences an investment loss, or a return lower than the discount rate while the rate plan experiences an investment gain.

The table below shows annualized investment returns of the PERF for various time periods ending on June 30, 2021 (figures reported are net of investment expenses but without reduction for administrative expenses). These returns are the annual rates that if compounded over the indicated number of years would equate to the actual time-weighted investment performance of the PERF. It should be recognized that in any given year the rate of return is volatile. The portfolio has an expected volatility of 12.0% per year based on the most recent Asset Liability Management study. The realized volatility is a measure of the risk of the portfolio expressed as the standard deviation of the fund's total monthly return distribution, expressed as an annual percentage. Due to their volatile nature, when looking at investment returns, it is more instructive to look at returns over longer time horizons.

History of CalPERS Compound Annual Rates of Return and Volatilities					
	1 year	5 year	10 year	20 year	30 year
Compound Annual Return	21.3%	10.3%	8.5%	6.9%	8.4%
Realized Volatility	–	7.3%	7.2%	8.5%	8.5%

c) Terminated Members	22,009,941	25,732,738
d) Members and Beneficiaries Receiving Payments	488,932,386	509,735,415
e) Total	$963,060,370	$1,036,162,479
2. Present Value of Future Employer Normal Costs	$76,388,349	$93,901,492
3. Present Value of Future Employee Contributions	$64,854,364	$68,578,330
4. Entry Age Accrued Liability		
a) Active Members [(1a) - (2) - (3)]	$263,021,612	$284,670,822
b) Transferred Members (1b)	47,853,718	53,543,682
c) Terminated Members (1c)	22,009,941	25,732,738
d) Members and Beneficiaries Receiving Payments (1d)	488,932,386	509,735,415
e) Total	$821,817,657	$873,682,657
5. Market Value of Assets (MVA)	$538,969,551	$659,854,546
6. Unfunded Accrued Liability (UAL) [(4e) - (5)]	$282,848,106	$213,828,111
7. Funded Ratio [(5) / (4e)]	65.6%	75.5%

(Gain)/Loss Analysis 6/30/20 – 6/30/21

To calculate the cost requirements of the plan, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year, actual experience is compared to the expected experience based on the actuarial assumptions. This results in actuarial gains or losses, as shown below.

1.	**Total (Gain)/Loss for the Year**	
a)	Unfunded Accrued Liability (UAL) as of 6/30/20	$282,848,106
b)	Expected Payment on the UAL during 2020-21	21,752,676
c)	Interest through 6/30/21 [.07 x (1a) - ((1.07)^{½} - 1) x (1b)]	19,050,900
d)	Expected UAL before all other changes [(1a) - (1b) + (1c)]	280,146,330
e)	Change due to plan changes	0
f)	Change due to AL Significant Increase	0
g)	Change due to assumption change	3,824,440
h)	Change due to method change	0
i)	Change due to Funding Risk Mitigation	20,573,364
j)	Expected UAL after all other changes [(1d) + (1e) + (1f) + (1g) + (1h) + (1i)]	304,544,134
k)	Actual UAL as of 6/30/21	213,828,111
l)	Total (Gain)/Loss for 2020-21 [(1k) - (1j)]	($90,716,023)
2.	**Investment (Gain)/Loss for the Year**	
a)	Market Value of Assets as of 6/30/20	$538,969,551
b)	Prior Fiscal Year Receivables	(944,485)
c)	Current Fiscal Year Receivables	808,458
d)	Contributions Received	38,522,270
e)	Benefits and Refunds Paid	(41,651,459)
f)	Transfers, SCP Payments and Interest, and Miscellaneous Adjustments	230,900
g)	Expected Return at 7% per year	38,148,569
h)	Expected Assets as of 6/30/21 [(2a) + (2b) + (2c) + (2d) + (2e) + (2f) + (2g)]	574,083,804
i)	Actual Market Value of Assets as of 6/30/21	659,854,546
j)	Investment (Gain)/Loss [(2h) - (2i)]	($85,770,741)
3.	**Non-Investment (Gain)/Loss for the Year**	
a)	Total (Gain)/Loss (1l)	($90,716,023)
b)	Investment (Gain)/Loss (2j)	(85,770,741)
c)	Non-Investment (Gain)/Loss [(3a) - (3b)]	($4,945,282)

Schedule of Amortization Bases

Below is the schedule of the plan's amortization bases. Note that there is a two-year lag between the valuation date and the start of the contribution year.

- The assets, liabilities, and funded status of the plan are measured as of the valuation date: June 30, 2021.
- The required employer contributions determined by the valuation are for the fiscal year beginning two years after the valuation date: FY 2023-24.

This two-year lag is necessary due to the amount of time needed to extract and test the membership and financial data, and the need to provide public agencies with their required employer contribution well in advance of the start of the fiscal year.

The Unfunded Accrued Liability (UAL) is used to determine the employer contribution and therefore must be rolled forward two years from the valuation date to the first day of the fiscal year for which the contribution is being determined. The UAL is rolled forward each year by subtracting the expected payment on the UAL for the fiscal year and adjusting for interest. The expected payment on the UAL for a fiscal year is equal to the Expected Employer Contribution for the fiscal year minus the Expected Normal Cost for the year. The Employer Contribution for the first fiscal year is determined by the actuarial valuation two years ago and the contribution for the second year is from the actuarial valuation one year ago. Additional discretionary payments are reflected in the Expected Payments column in the fiscal year they were made by the agency.

Reason for Base	Date Est.	Ramp Level 2023-24	Ramp Shape	Escala-tion Rate	Amort. Period	Balance 6/30/21	Expected Payment 2021-22	Balance 6/30/22	Expected Payment 2022-23	Balance 6/30/23	Minimum Required Payment 2023-24

Amortization Schedule and Alternatives

The amortization schedule on the previous page shows the minimum contributions required according to the CalPERS amortization policy. Many agencies have expressed a desire for a more stable pattern of payments or have indicated interest in paying off the unfunded accrued liabilities more quickly than required. As such, we have provided alternative amortization schedules to help analyze the current amortization schedule and illustrate the potential savings of accelerating unfunded liability payments.

Shown on the following page are future year amortization payments based on 1) the current amortization schedule reflecting the individual bases and remaining periods shown on the previous page, and 2) alternative "fresh start" amortization schedules using two sample periods that would both result in interest savings relative to the current amortization schedule. To initiate a Fresh Start, please contact the plan actuary.

The Current Amortization Schedule typically contains both positive and negative bases. Positive bases result from plan changes, assumption changes, method changes or plan experience that increase unfunded liability. Negative bases result from plan changes, assumption changes, method changes, or plan experience that decrease unfunded liability. The combination of positive and negative bases within an amortization schedule can result in unusual or problematic circumstances in future years, such as:

- When a negative payment would be required on a positive unfunded actuarial liability; or
- When the payment would completely amortize the total unfunded liability in a very short time period, and results in a large change in the employer contribution requirement.

In any year when one of the above scenarios occurs, the actuary will consider corrective action such as replacing the existing unfunded liability bases with a single "fresh start" base and amortizing it over an appropriate period.

The Current Amortization Schedule on the following page may appear to show that, based on the current amortization bases, one of the above scenarios will occur at some point in the future. It is impossible to know today whether such a scenario will in fact arise since there will be additional bases added to the amortization schedule in each future year. Should such a scenario arise in any future year, the actuary will take appropriate action based on guidelines in the CalPERS amortization policy.

Reconciliation of Required Employer Contributions

Normal Cost (% of Payroll)	
1. For Period 7/1/22 – 6/30/23	
a) Employer Normal Cost	9.42%
b) Employee contribution	7.38%
c) Total Normal Cost	16.80%
2. Changes since the prior year annual valuation	
a) Effect of demographic experience	(0.16%)
b) Effect of plan changes	0.00%
c) Effect of Funding Risk Mitigation	0.79%
d) Effect of assumption changes	0.66%
e) Effect of method changes	0.00%
f) Net effect of the changes above [sum of (a) through (e)]	1.29%
3. For Period 7/1/23 – 6/30/24	
a) Employer Normal Cost	10.40%
b) Employee contribution	7.69%
c) Total Normal Cost	18.09%
Employer Normal Cost Change [(3a) – (1a)]	0.98%
Employee Contribution Change [(3b) – (1b)]	0.31%
Unfunded Liability Contribution ($)	
1. For Period 7/1/22 – 6/30/23	24,342,547
2. Changes since the prior year annual valuation	
a) Effect of adjustments to prior year's amortization schedule	0
b) Effect of elimination of amortization bases	0
c) Effect of progression of amortization bases[1]	1,423,540
d) Effect of net investment (gain) after Funding Risk Mitigation[2]	(1,561,177)
e) Effect of non-investment (gain)/loss during the prior year	(507,232)
f) Effect of Funding Risk Mitigation (re-amortize existing bases at 6.8%)	(401,903)
g) Effect of Golden Handshake	0
h) Effect of plan changes	0
i) Effect of AL Significant Increase	0
j) Effect of assumption changes	458,868
k) Effect of changes due to Fresh Start or one year recognition of small balances	0
l) Effect of method change	0
m) Net effect of the changes above [sum of (a) through (l)]	(587,904)
3. For Period 7/1/23 – 6/30/24 [(1) + (2m)]	23,754,643

The amounts shown for the period 7/1/22 – 6/30/23 may be different if a prepayment of unfunded actuarial liability is made or a plan change became effective after the prior year's actuarial valuation was performed.

[1] Includes scheduled escalation in individual amortization base payments due to the 5-year ramp and payroll growth assumption used in the pre-2019 amortization policy.

[2] The unfunded liability contribution for the investment (gain)/loss during the year prior to the valuation date is 20% of the "full" annual requirement due to the 5-year ramp. Increases to this amount that occur during the ramp period will be included in line c) in future years.

Employer Contribution History

The table below provides a recent history of the required employer contributions for the plan. The amounts are based on the actuarial valuation from two years prior and does not account for prepayments or benefit changes made during a fiscal year. Additional discretionary payments before July 1, 2018 or after June 30, 2021 are not included.

Fiscal Year	Employer Normal Cost	Unfunded Rate	Unfunded Liability Payment ($)	Additional Discretionary Payments
2014 - 15	8.702%	11.856%	N/A	N/A
2015 - 16	8.674%	13.165%	N/A	N/A
2016 - 17	8.599%	14.198%	N/A	N/A
2017 - 18	8.227%	N/A	12,611,455	N/A
2018 - 19	8.550%	N/A	14,804,716	0
2019 - 20	9.277%	N/A	17,233,916	1,373,696
2020 - 21	10.023%	N/A	19,077,430	2,742,800
2021 - 22	9.51%	N/A	21,995,500	
2022 - 23	9.42%	N/A	24,342,547	
2023 - 24	10.40%	N/A	23,754,643	

Funding History

The table below shows the recent history of actuarial accrued liability, market value of assets, unfunded accrued liability, funded ratio and annual covered payroll.

Valuation Date	Accrued Liability (AL)	Market Value of Assets (MVA)	Unfunded Accrued Liability (UAL)	Funded Ratio	Annual Covered Payroll
6/30/2012	$518,628,139	$341,595,561	$177,032,578	65.9%	$67,579,904
6/30/2013	545,443,882	377,879,242	167,564,640	69.3%	68,975,063
6/30/2014	589,529,588	434,324,206	155,205,382	73.7%	71,013,770
6/30/2015	621,622,997	434,857,444	186,765,553	70.0%	77,396,858
6/30/2016	656,120,093	428,536,758	227,583,335	65.3%	81,109,780
6/30/2017	694,805,957	468,048,005	226,757,952	67.4%	82,607,781
6/30/2018	753,503,877	498,338,141	255,165,736	66.1%	86,457,783
6/30/2019	788,803,907	521,305,474	267,498,433	66.1%	92,741,240
6/30/2020	821,817,657	538,969,551	282,848,106	65.6%	96,433,712
6/30/2021	873,682,657	659,854,546	213,828,111	75.5%	98,622,923

Normal Cost by Benefit Group

The table below displays the Total Normal Cost broken out by benefit group for FY 2023-24. The Total Normal Cost is the annual cost of service accrual for the fiscal year for active employees and can be viewed as the long-term contribution rate for the benefits contracted. Generally, the normal cost for a benefit group subject to more generous benefit provisions will exceed the normal cost for a group with less generous benefits. However, based on the characteristics of the members (particularly when the number of actives is small), this may not be the case. Future measurements of the Total Normal Cost for each group may differ significantly from the current values due to such factors as: changes in the demographics of the group, changes in economic and demographic assumptions, changes in plan benefits or applicable law.

Rate Plan Identifier	Benefit Group Name	Total Normal Cost FY 2023-24	Number of Actives	Payroll on 6/30/2021
425	Miscellaneous First Level	20.83%	604	$53,504,152
26326	Miscellaneous PEPRA Level	14.88%	729	$45,118,771
	Plan Total	18.09%	1,333	$98,622,923

Note that if a Benefit Group above has multiple bargaining units, each of which has separately contracted for different benefits such as Employer Paid Member Contributions, then the Normal Cost shown for the respective benefit level does not reflect those differences. Additionally, if a Second Level Benefit Group amended to the same benefit formula as a First Level Benefit Group, their Normal Costs may be dissimilar due to demographic or other population differences. For questions in these situations, please contact the plan actuary.

PEPRA Member Contribution Rates

The California Public Employees' Pension Reform Act of 2013 ("PEPRA") established new benefit formulas, final compensation period, and contribution requirements for "new" employees (generally those first hired into a CalPERS-covered position on or after January 1, 2013). In accordance with Government Code section 7522.30(b), "new members ... shall have an initial contribution rate of at least 50% of the normal cost rate." The normal cost for the plan is dependent on the benefit levels, actuarial assumptions, and demographics of the plan, particularly members' entry age into the plan. Should the total normal cost of the plan change by more than 1% from the base total normal cost established for the plan, the new member rate shall be 50% of the new normal cost rounded to the nearest quarter percent.

The table below shows the determination of the PEPRA member contribution rates effective July 1, 2023, based on 50% of the Total Normal Cost for each respective plan as of the June 30, 2021 valuation.

		Basis for Current Rate		Rates Effective July 1, 2023			
Rate Plan Identifier	Benefit Group Name	Total Normal Cost	Member Rate	Total Normal Cost	Change	Change Needed	Member Rate
26326	Miscellaneous PEPRA Level	13.564%	6.75%	14.88%	1.316%	Yes	7.50%

For purposes of setting member rates, it is preferable to determine total normal cost using a large active population so that the rate remains relatively stable. While each CalPERS non-pooled plan has a sufficiently large active population for this purpose, the PEPRA active population by itself may not be sufficiently large. The total PEPRA normal cost will be determined based on the plan's PEPRA membership only if the number of members covered under the PEPRA formula meets either:

1. 50% of the active population, or
2. 25% of the active population and 100 or more PEPRA members

Until one of these conditions is met, the plan's total PEPRA normal cost will be determined using the entire active plan population (both PEPRA and Classic) based on the PEPRA benefit provisions. For this reason, the PEPRA member contribution rate determined in the table above may not equal 50% of the total normal cost of the PEPRA group shown on the "Normal Cost by Benefit Group" page.

Future Investment Return Scenarios

Analysis using the investment return scenarios from the Asset Liability Management process completed in 2021 was performed to determine the effects of various future investment returns on required employer contributions. The projections below reflect the impact of the CalPERS Funding Risk Mitigation policy. The projected normal cost rates reflect that the rates are anticipated to decline over time as new employees are hired into lower-cost benefit tiers. The projections also assume that all other actuarial assumptions will be realized and that no further changes in assumptions, contributions, benefits, or funding will occur.

The first table shows projected contribution requirements if the fund were to earn either 3.0% or 10.8% annually. These alternate investment returns were chosen because 90% of long-term average returns are expected to fall between them over the 20-year period ending June 30, 2041.

Assumed Annual Return FY 2021-22 through FY 2040-41	Projected Employer Contributions				
	FY 2024-25	FY 2025-26	FY 2026-27	FY 2027-28	FY 2028-29
3.0% (5th percentile)					
Normal Cost Rate	10.2%	10.0%	9.9%	9.7%	9.5%
UAL Contribution	$24,433,000	$23,142,000	$24,614,000	$26,293,000	$28,469,000
10.8% (95th percentile)					
Normal Cost Rate	10.5%	10.5%	10.6%	10.6%	10.7%
UAL Contribution	$23,239,000	$19,587,000	$17,434,000	$14,139,000	$0

Required contributions outside of this range are also possible. In particular, whereas it is unlikely that investment returns will average less than 3.0% or greater than 10.8% over a 20-year period, the likelihood of a single investment return less than 3.0% or greater than 10.8% in any given year is much greater. The following analysis illustrates the effect of an extreme, single year investment return.

The portfolio has an expected volatility (or standard deviation) of 12.0% per year. Accordingly, in any given year there is a 16% probability that the annual return will be -5.2% or less and a 2.5% probability that the annual return will be -17.2% or less. These returns represent one and two standard deviations below the expected return of 6.8%.

The following table shows the effect of a one or two standard deviation investment loss in FY 2021-22 on the FY 2024-25 contribution requirements. Note that a single-year investment gain or loss decreases or increases the required UAL contribution amount incrementally for each of the next five years, not just one, due to the 5-year ramp in the amortization policy. However, the contribution requirements beyond the first year are also impacted by investment returns beyond the first year. Historically, significant downturns in the market are often followed by higher than average returns. Such investment gains would offset the impact of these single year negative returns in years beyond FY 2024-25.

Assumed Annual Return for Fiscal Year 2021-22	Required Employer Contributions	Projected Employer Contributions
	FY 2023-24	FY 2024-25
(17.2%) (2 standard deviation loss)		
Normal Cost Rate	10.40%	10.2%
UAL Contribution	$23,754,643	$27,695,000
(5.2%) (1 standard deviation loss)		
Normal Cost Rate	10.40%	10.2%
UAL Contribution	$23,754,643	$25,757,000

- Without investment gains (returns higher than 6.8%) in year FY 2022-23 or later, projected contributions rates would continue to rise over the next four years due to the continued phase-in of the impact of the illustrated investment loss in FY 2021-22.
- The Pension Outlook Tool can be used to model projected contributions for these scenarios beyond FY 2024-25 as well as to model other investment return scenarios.

Discount Rate Sensitivity

The discount rate assumption is calculated as the sum of the assumed real rate of return and the assumed annual price inflation, currently 4.5% and 2.3%, respectively. Changing either the price inflation assumption or the real rate of return assumption will change the discount rate. The sensitivity of the valuation results to the discount rate assumption depends on which component of the discount rate is changed. Shown below are various valuation results as of June 30, 2021 assuming alternate discount rates by changing the two components independently. Results are shown using the current discount rate of 6.8% as well as alternate discount rates of 5.8% and 7.8%. The rates of 5.8% and 7.8% were selected since they illustrate the impact of a 1.0% increase or decrease to the 6.8% assumption.

Sensitivity to the Real Rate of Return Assumption

As of June 30, 2021	1% Lower Real Return Rate	Current Assumptions	1% Higher Real Return Rate
Discount Rate	5.8%	6.8%	7.8%
Price Inflation	2.3%	2.3%	2.3%
Real Rate of Return	3.5%	4.5%	5.5%
a) Total Normal Cost	23.07%	18.09%	14.36%
b) Accrued Liability	$992,210,535	$873,682,657	$776,180,117
c) Market Value of Assets	$659,854,546	$659,854,546	$659,854,546
d) Unfunded Liability/(Surplus) [(b) - (c)]	$332,355,989	$213,828,111	$116,325,571
e) Funded Ratio	66.5%	75.5%	85.0%

Sensitivity to the Price Inflation Assumption

As of June 30, 2021	1% Lower Inflation Rate	Current Assumptions	1% Higher Inflation Rate
Discount Rate	5.8%	6.8%	7.8%
Price Inflation	1.3%	2.3%	3.3%
Real Rate of Return	4.5%	4.5%	4.5%
a) Total Normal Cost	19.08%	18.09%	16.40%
b) Accrued Liability	$902,572,299	$873,682,657	$805,129,936
c) Market Value of Assets	$659,854,546	$659,854,546	$659,854,546
d) Unfunded Liability/(Surplus) [(b) - (c)]	$242,717,753	$213,828,111	$145,275,390
e) Funded Ratio	73.1%	75.5%	82.0%

Mortality Rate Sensitivity

The following table looks at the change in the June 30, 2021 plan costs and funded status under two different longevity scenarios, namely assuming rates of post-retirement mortality are 10% lower or 10% higher than our current mortality assumptions. This type of analysis highlights the impact on the plan of improving or worsening mortality over the long term.

As of June 30, 2021	10% Lower Mortality Rates	Current Assumptions	10% Higher Mortality Rates
a) Total Normal Cost	18.38%	18.09%	17.82%
b) Accrued Liability	$892,307,476	$873,682,657	$856,577,300
c) Market Value of Assets	$659,854,546	$659,854,546	$659,854,546
d) Unfunded Liability/(Surplus) [(b) - (c)]	$232,452,930	$213,828,111	$196,722,754
e) Funded Ratio	73.9%	75.5%	77.0%

Maturity Measures

As pension plans mature they become more sensitive to risks. Understanding plan maturity and how it affects the ability of a pension plan sponsor to tolerate risk is important in understanding how the plan is impacted by investment return volatility, other economic variables and changes in longevity or other demographic assumptions. One way to look at the maturity level of CalPERS and its plans is to look at the ratio of a plan's retiree liability to its total liability. A pension plan in its infancy will have a very low ratio of retiree liability to total liability. As the plan matures, the ratio increases. A mature plan will often have a ratio above 60%-65%.

Ratio of Retiree Accrued Liability to Total Accrued Liability	June 30, 2020	June 30, 2021
1. Retiree Accrued Liability	488,932,386	509,735,415
2. Total Accrued Liability	821,817,657	873,682,657
3. Ratio of Retiree AL to Total AL [(1) / (2)]	59%	58%

Another measure of the maturity level of CalPERS and its plans is the ratio of actives to retirees, also called the support ratio. A pension plan in its infancy will have a very high ratio of active to retired members. As the plan matures and members retire, the ratio declines. A mature plan will often have a ratio near or below one.

To calculate the support ratio for the rate plan, retirees and beneficiaries receiving a continuance are each counted as one, even though they may have only worked a portion of their careers as an active member of this rate plan. For this reason, the support ratio, while intuitive, may be less informative than the ratio of retiree liability to total accrued liability above. For comparison, the support ratio for all CalPERS public agency plans is 0.82 and is calculated consistently with how it is for the individual rate plan. Note that to calculate the support ratio for all public agency plans, a retiree with service from more than one CalPERS agency is counted as a retiree more than once.

Support Ratio	June 30, 2020	June 30, 2021
1. Number of Actives	1,329	1,333
2. Number of Retirees	2,125	2,147
3. Support Ratio [(1) / (2)]	0.63	0.62

The actuarial calculations supplied in this communication are based on various assumptions about long-term demographic and economic behavior. Unless these assumptions (e.g., terminations, deaths, disabilities, retirements, salary growth, investment return) are exactly realized each year, there will be differences on a year-to-year basis. The year-to-year differences between actual experience and the assumptions are called actuarial gains and losses and serve to lower or raise required employer contributions from one year to the next. Therefore, employer contributions will inevitably fluctuate, especially due to the ups and downs of investment returns.

Maturity Measures (continued)

Asset Volatility Ratio

Shown in the table below is the asset volatility ratio (AVR), which is the ratio of market value of assets to payroll. Plans that have a higher AVR experience more volatile employer contributions (as a percentage of payroll) due to investment return. For example, a plan with AVR of 8 may experience twice the contribution volatility due to investment return volatility than a plan with AVR of 4. It should be noted that this ratio is a measure of the current situation. It increases over time but generally tends to stabilize as a plan matures.

Liability Volatility Ratio

Also shown in the table below is the liability volatility ratio (LVR), which is the ratio of accrued liability to payroll. Plans that have a higher LVR experience more volatile employer contributions (as a percentage of payroll) due to changes in liability. For example, a plan with LVR of 8 is expected to have twice the contribution volatility of a plan with LVR of 4 when there is a change in accrued liability, such as when there is a change in actuarial assumptions. It should be noted that this ratio indicates a longer-term potential for contribution volatility, since the AVR, described above, will tend to move closer to the LVR as the funded ratio approaches 100%.

Contribution Volatility	June 30, 2020	June 30, 2021
1. Market Value of Assets without Receivables	$538,025,066	$659,046,087
2. Payroll	96,433,712	98,622,923
3. Asset Volatility Ratio (AVR) [(1) / (2)]	5.6	6.7
4. Accrued Liability	$821,817,657	$873,682,657
5. Liability Volatility Ratio (LVR) [(4) / (2)]	8.5	8.9

Maturity Measures History

Valuation Date	Ratio of Retiree Accrued Liability to Total Accrued Liability	Support Ratio	Asset Volatility Ratio	Liability Volatility Ratio
6/30/2017	57%	0.65	5.7	8.4
6/30/2018	58%	0.66	5.8	8.7
6/30/2019	60%	0.64	5.6	8.5
6/30/2020	59%	0.63	5.6	8.5
6/30/2021	58%	0.62	6.7	8.9

Hypothetical Termination Liability

The hypothetical termination liability is an estimate of the financial position of the plan had the contract with CalPERS been terminated as of June 30, 2021. The plan liability on a termination basis is calculated differently from the plan's ongoing funding liability. For this hypothetical termination liability calculation, both compensation and service are frozen as of the valuation date and no future pay increases or service accruals are assumed. This measure of funded status is not appropriate for assessing the need for future employer contributions in the case of an ongoing plan, that is, for an employer that continues to provide CalPERS retirement benefits to active employees.

A more conservative investment policy and asset allocation strategy was adopted by the board for the Terminated Agency Pool. The Terminated Agency Pool has limited funding sources since no future employer contributions will be made. Therefore, expected benefit payments are secured by risk-free assets and benefit security for members is increased while limiting the funding risk. However, this asset allocation has a lower expected rate of return than the PERF and consequently, a lower discount rate assumption. The lower discount rate for the Terminated Agency Pool results in higher liabilities for terminated plans.

The effective termination discount rate will depend on actual market rates of return for risk-free securities on the date of termination. As market discount rates are variable the table below shows a range for the hypothetical termination liability based on the lowest and highest interest rates observed during an approximate 19-month period from 12 months before the valuation date to seven months after.

Market Value of Assets (MVA)	Hypothetical Termination Liability[1,2] at 1.00%	Funded Ratio	Unfunded Termination Liability at 1.00%	Hypothetical Termination Liability[1,2] at 2.25%	Funded Ratio	Unfunded Termination Liability at 2.25%
$659,854,546	$1,916,941,045	34.4%	$1,257,086,499	$1,572,599,880	42.0%	$912,745,334

[1] The hypothetical liabilities calculated above include a 5% contingency load. The contingency load and other actuarial assumptions can be found in Appendix A.

[2] The discount rate used for termination valuations is a weighted average of the 10-year and 30-year U.S. Treasury yields where the weights are based on matching asset and liability durations as of the termination date. The discount rates used in the table are based on 20-year Treasury bonds, rounded to the nearest quarter percentage point, which is a good proxy for most plans. The 20-year Treasury yield was 2.00% on June 30, 2021, the valuation date.

In order to terminate the plan, first contact our Pension Contract Services unit to initiate a Resolution of Intent to Terminate. The completed Resolution will allow the plan actuary to provide a preliminary termination valuation with a more up-to-date estimate of the plan liabilities. Before beginning this process, please consult with the plan actuary.

Plan's Major Benefit Provisions

Plan's Major Benefit Options

Shown below is a summary of the major optional benefits for which the agency has contracted. A description of principal standard and optional plan provisions is in Appendix B.

	Benefit Group

Appendix A

Actuarial Methods and Assumptions

- Actuarial Data
- Actuarial Methods
- Actuarial Assumptions
- Miscellaneous

Actuarial Data

As stated in the Actuarial Certification, the data which serves as the basis of this valuation has been obtained from the various CalPERS databases. We have reviewed the valuation data and believe that it is reasonable and appropriate in aggregate. We are unaware of any potential data issues that would have a material effect on the results of this valuation, except that data does not always contain the latest salary information for former members now in reciprocal systems and does not recognize the potential for unusually large salary deviation in certain cases such as elected officials. Therefore, salary information in these cases may not be accurate. These situations are relatively infrequent, however, and generally do not have a material impact on the required employer contributions.

Actuarial Methods

Actuarial Cost Method

The actuarial cost method used is the Entry Age Actuarial Cost Method. Under this method, projected benefits are determined for all members and the associated liabilities are spread in a manner that produces level annual cost as a percentage of pay in each year from the member's entry age to their assumed retirement age on the valuation date. The cost allocated to the current fiscal year is called the normal cost.

The actuarial accrued liability for active members is then calculated as the portion of the total cost of the plan allocated to prior years. The actuarial accrued liability for members currently receiving benefits and for members entitled to deferred benefits is equal to the present value of the benefits expected to be paid. No normal costs are applicable for these participants.

CalPERS uses an in-house proprietary actuarial model for calculating plan costs. We believe this model is fit for its intended purpose and meets all applicable Actuarial Standards of Practice. Furthermore, the actuarial results of our model are independently confirmed periodically by outside auditing actuaries. The actuarial assumptions used are internally consistent and the generated results are reasonable.

Amortization of Unfunded Actuarial Accrued Liability

The excess of the total actuarial accrued liability over the market value of plan assets is called the unfunded actuarial accrued liability (UAL). Funding requirements are determined by adding the normal cost and a payment toward the UAL. The UAL payment is equal to the sum of individual amortization payments, each representing a different source of UAL for a given measurement period.

Amortization payments are determined according to the CalPERS amortization policy. The board adopted a new policy effective for the June 30, 2019 actuarial valuation. The new policy applies prospectively only; amortization bases (sources of UAL) established prior to the June 30, 2019 valuation will continue to be amortized according to the prior policy.

Prior Policy (Bases Established prior to June 30, 2019)

Amortization payments are determined as a level percentage of payroll whereby the payment increases each year at an escalation rate. Gains or losses are amortized over a fixed 30-year period with a 5-year ramp up at the beginning and a 5-year ramp down at the end of the amortization period. All changes in liability due to plan amendments (other than golden handshakes) are amortized over a 20-year period with no ramp. Changes in actuarial assumptions or changes in actuarial methodology are amortized over a 20-year period with a 5-year ramp up at the beginning and a 5-year ramp down at the end of the amortization period. Changes in unfunded accrued liability due to a Golden Handshake will be amortized over a period of five years. Bases established prior to June 30, 2013 may be amortized differently. A summary is provided in the following table:

Driver	Source				
	(Gain)/Loss				
	Investment	Non-investment	Assumption/Method Change	Benefit Change	Golden Handshake
Amortization Period	30 Years	30 Years	20 Years	20 Years	5 Years
Escalation Rate - Active Plans - Inactive Plans	2.80% 0%	2.80% 0%	2.80% 0%	2.80% 0%	2.80% 0%
Ramp Up	5	5	5	0	0
Ramp Down	5	5	5	0	0

The 5-year ramp up means that the payments in the first four years of the amortization period are 20%, 40%, 60% and 80% of the "full" payment which begins in year five. The 5-year ramp down means that the reverse is true in the final four years of the amortization period.

Current Policy (Bases Established on or after June 30, 2019)

Amortization payments are determined as a level dollar amount. Investment gains or losses are amortized over a fixed 20-year period with a 5-year ramp up at the beginning of the amortization period. Non-investment gains or losses are amortized over a fixed 20-year period with no ramps. All changes in liability due to plan amendments (other than golden handshakes) are amortized over a 20-year period with no ramps. Changes in actuarial assumptions or changes in actuarial methodology are amortized over a 20-year period with no ramps. Changes in unfunded accrued liability due to a Golden Handshake are amortized over a period of five years. A summary is provided in the table below:

	Source				
	(Gain)/Loss				
	Investment	Non-investment	Assumption/ Method Change	Benefit Change	Golden Handshake
Amortization Period	20 Years	20 Years	20 Years	20 Years	5 Years
Escalation Rate	0%	0%	0%	0%	0%
Ramp Up	5	0	0	0	0
Ramp Down	0	0	0	0	0

Exceptions for Inconsistencies

An exception to the amortization rules above is used whenever their application results in inconsistencies. In these cases, a "fresh start" approach is used. This means that the current unfunded actuarial liability is projected and amortized over a set number of years. For example, a fresh start is needed in the following situations:

- When a negative payment would be required on a positive unfunded actuarial liability; or
- When the payment would completely amortize the total unfunded liability in a very short time period, and results in a large change in the employer contribution requirement.

It should be noted that the actuary may determine that a fresh start is necessary under other circumstances. In all cases of a fresh start, the period is set by the actuary at what is deemed appropriate; however, the period will not be greater than 20 years.

Exceptions for Plans in Surplus

If a surplus exists (i.e., the Market Value of Assets exceeds the plan's accrued liability) any prior amortization layers shall be considered fully amortized, and the surplus shall not be amortized.

In the event of any subsequent unfunded liability, a Fresh Start shall be used with an amortization period of 20 years or less.

Exceptions for Small Amounts

Where small unfunded liabilities are identified in annual valuations which result in small payment amounts, the actuary may shorten the remaining period for these bases.

- When the balance of a single amortization base has an absolute value less than $250, the amortization period is reduced to one year.
- When the entire unfunded liability is a small amount, the actuary may perform a Fresh Start and use an appropriate amortization period.

Exceptions for Inactive Plans

The following exceptions apply to plans classified as Inactive. These plans have no active members and no expectation to have active members in the future.

- Amortization of the unfunded liability is on a "level dollar" basis rather than a "level percent of pay" basis. For amortization layers, which utilize a ramp up and ramp down, the "ultimate" payment is constant.
- Actuarial judgment will be used to shorten amortization periods for Inactive plans with existing periods that are deemed too long given the duration of the liability. The specific demographics of the plan will be used to determine if shorter periods may be more appropriate.

Exceptions for Inactive Agencies

For a public agency with no active members in any CalPERS rate plan, the unfunded liability shall be amortized over a closed amortization period of no more than 15 years.

Asset Valuation Method

The Actuarial Value of Assets is set equal to the market value of assets. Asset values include accounts receivable.

PEPRA Normal Cost Rate Methodology

Per Government Code Section 7522.30(b), the "normal cost rate" shall mean the annual actuarially determined normal cost for the plan of retirement benefits provided to the new member and shall be established based on actuarial assumptions used to determine the liabilities and costs as part of the annual actuarial valuation. The plan of retirement benefits shall include any elements that would impact the actuarial determination of the normal cost, including, but not limited to, the retirement formula, eligibility and vesting criteria, ancillary benefit provisions, and any automatic cost-of-living adjustments as determined by the public retirement system.

For purposes of setting member rates, it is preferable to determine total normal cost using a large active population so that the rate remains relatively stable. While each CalPERS non-pooled plan has a sufficiently large active population for this purpose, the PEPRA active population by itself may not be sufficiently large. The total PEPRA normal cost will be determined based on the plan's PEPRA membership only if the number of members covered under the PEPRA formula meets either:

1. 50% of the active population, or
2. 25% of the active population and 100 or more PEPRA members

Until one of these conditions is met, the plan's total PEPRA normal cost will be determined using the entire active plan population (both PEPRA and Classic) based on the PEPRA benefit provisions.

Actuarial Assumptions

In 2021, CalPERS completed its most recent asset liability management study incorporating actuarial assumptions and strategic asset allocation. In November 2021, the board adopted changes to the asset allocation that increased the expected volatility of returns. The adopted asset allocation was expected to have a long-term blended return that continued to support a discount rate assumption of 6.80%. The board also approved several changes to the demographic assumptions that more closely aligned with actual experience.

For more details and additional rationale for the selection of the actuarial assumptions, please refer to the CalPERS Experience Study and Review of Actuarial Assumptions report from November 2021 that can be found on the CalPERS website under: Forms and Publications. Click on "View All" and search for Experience Study.

All actuarial assumptions (except the discount rates used for the hypothetical termination liability) represent an estimate of future experience rather than observations of the estimates inherent in market data.

Economic Assumptions

Discount Rate

The prescribed discount rate assumption, adopted by the board on November 17, 2021, is 6.80% compounded annually (net of investment and administrative expenses) as of June 30, 2021.

Termination Liability Discount Rate

The current discount rate assumption used for termination valuations is a weighted average of the 10-year and 30-year U.S. Treasury yields where the weights are based on matching asset and liability durations as of the termination date.

The hypothetical termination liabilities in this report are calculated using an observed range of market interest rates. This range is based on the lowest and highest 20-year Treasury bond observed during an approximate 19-month period from 12 months before the valuation date to seven months after. The 20-year Treasury bond has a similar duration to most plan liabilities and serves as a good proxy for the termination discount rate. The 20-year Treasury yield was 2.00% on June 30, 2021.

Salary Growth

Annual increases vary by category, entry age, and duration of service. A sample of assumed increases are shown below. Wage inflation assumption in the valuation year (2.80% for 2021) is added to these factors for total salary growth.

Public Agency Miscellaneous

Duration of Service	(Entry Age 20)	(Entry Age 30)	(Entry Age 40)
0	0.0764	0.0621	0.0521
1	0.0663	0.0528	0.0424
2	0.0576	0.0449	0.0346
3	0.0501	0.0381	0.0282
4	0.0435	0.0324	0.0229

- The Miscellaneous salary scale is used for Local Prosecutors.
- The Police salary scale is used for Other Safety, Local Sheriff, and School Police.

Price Inflation

2.30% compounded annually.

Wage Inflation

2.80% compounded annually (used in projecting individual salary increases).

Payroll Growth

2.80% compounded annually (used in projecting the payroll over which the unfunded liability is amortized for level percent of payroll bases). This assumption is used for all plans with active members.

Non-valued Potential Additional Liabilities

The potential liability loss for a cost-of-living increase exceeding the 2.30% price inflation assumption and any potential liability loss from future member service purchases that are not reflected in the valuation.

Miscellaneous Loading Factors

Credit for Unused Sick Leave

Total years of service is increased by 1% for those plans that have adopted the provision of providing Credit for Unused Sick Leave.

Conversion of Employer Paid Member Contributions (EPMC)

Total years of service is increased by the Employee Contribution Rate for those plans with the provision providing for the Conversion of Employer Paid Member Contributions (EPMC) during the final compensation period.

Norris Decision (Best Factors)

Employees hired prior to July 1, 1982 have projected benefit amounts increased in order to reflect the use of "Best Factors" in the calculation of optional benefit forms. This is due to a 1983 Supreme Court decision, known as the Norris decision, which required males and females to be treated equally in the determination of benefit amounts. Consequently, anyone already employed at that time is given the best possible conversion factor when optional benefits are determined. No loading is necessary for employees hired after July 1, 1982.

Termination Liability

The termination liabilities include a 5% contingency load. This load is for unforeseen improvements in mortality.

Demographic Assumptions

Pre-Retirement Mortality

The mortality assumptions are based on mortality rates resulting from the most recent CalPERS Experience Study adopted by the CalPERS Board in November 2021. For purposes of the mortality rates, the rates incorporate generational mortality to capture on-going mortality improvement. Generational mortality explicitly assumes that members born more recently will live longer than the members born before them thereby capturing the mortality improvement seen in the past and expected continued improvement. For more details, please refer to the 2021 experience study report that can be found on the CalPERS website

Rates vary by age and gender are shown in the table below. This table only contains a sample of the 2017 base table rates for illustrative purposes. The non-industrial death rates are used for all plans. The industrial death rates are used for Safety plans (except for local Safety members described in Section 20423.6 where the agency has not specifically contracted for industrial death benefits.)

	Miscellaneous		Safety			
	Non-Industrial Death (Not Job-Related)		Non-Industrial Death (Not Job-Related)		Industrial Death (Job-Related)	
Age	Male	Female	Male	Female	Male	Female
20	0.00039	0.00014	0.00038	0.00014	0.00004	0.00002
25	0.00033	0.00013	0.00034	0.00018	0.00004	0.00002
30	0.00044	0.00019	0.00042	0.00025	0.00005	0.00003
35	0.00058	0.00029	0.00048	0.00034	0.00005	0.00004
40	0.00075	0.00039	0.00055	0.00042	0.00006	0.00005
45	0.00093	0.00054	0.00066	0.00053	0.00007	0.00006
50	0.00134	0.00081	0.00092	0.00073	0.00010	0.00008
55	0.00198	0.00123	0.00138	0.00106	0.00015	0.00012
60	0.00287	0.00179	0.00221	0.00151	0.00025	0.00017
65	0.00403	0.00250	0.00346	0.00194	0.00038	0.00022
70	0.00594	0.00404	0.00606	0.00358	0.00067	0.00040
75	0.00933	0.00688	0.01099	0.00699	0.00122	0.00078
80	0.01515	0.01149	0.02027	0.01410	0.00225	0.00157

- The pre-retirement mortality rates above are for 2017 and are projected generationally for future years using 80% of the Society of Actuaries' Scale MP-2020.
- Miscellaneous plans usually have industrial death rates set to zero unless the agency has specifically contracted for industrial death benefits. If so, each non-industrial death rate shown above will be split into two components: 99% will become the non-industrial death rate and 1% will become the industrial death rate.

Post-Retirement Mortality

Rates vary by age, type of retirement, and gender. See sample rates in table below. These rates are used for all plans.

	Healthy Recipients		Non-Industrially Disabled (Not Job-Related)		Industrially Disabled (Job-Related)	
Age	Male	Female	Male	Female	Male	Female
50	0.00267	0.00199	0.01701	0.01439	0.00430	0.00311
55	0.00390	0.00325	0.02210	0.01734	0.00621	0.00550

85	0.08274	0.06166	0.11561	0.09385	0.10137	0.08045
90	0.14539	0.11086	0.16608	0.14396	0.16584	0.12434
95	0.24665	0.20364	0.24665	0.20364	0.24665	0.20364
100	0.36198	0.31582	0.36198	0.31582	0.36198	0.31582
105	0.52229	0.44679	0.52229	0.44679	0.52229	0.44679
110	1.00000	1.00000	1.00000	1.00000	1.00000	1.00000

The post-retirement mortality rates above are for 2017 and are projected generationally for future years using 80% of the Society of Actuaries' Scale MP-2020.

Marital Status

For active members, a percentage who are married upon retirement is assumed according to the member category as shown in the following table.

Member Category	Percent Married
Miscellaneous Member	70%
Local Police	85%
Local Fire	85%
Other Local Safety	70%
School Police	85%
Local County Peace Officers	75%

Age of Spouse

It is assumed that female spouses are 3 years younger than male spouses. This assumption is used for all plans.

Terminated Members

It is assumed that terminated members refund immediately if non-vested. Terminated members who are vested are assumed to retire at age 59 for Miscellaneous members and age 54 for Safety members.

Termination with Refund

Rates vary by entry age and service for Miscellaneous plans. Rates vary by service for Safety plans. See sample rates in tables below.

Non-Industrial (Not Job-Related) Disability

Rates vary by age and gender for Miscellaneous plans. Rates vary by age and category for Safety plans.

	Miscellaneous		Fire	Police	County Peace Officer	Schools	
Age	Male	Female	Male and Female	Male and Female	Male and Female	Male	Female
20	0.0001	0.0000	0.0001	0.0001	0.0001	0.0000	0.0002
25	0.0001	0.0001	0.0001	0.0001	0.0001	0.0000	0.0002
30	0.0002	0.0003	0.0001	0.0001	0.0001	0.0002	0.0002
35	0.0004	0.0007	0.0001	0.0002	0.0003	0.0005	0.0004
40	0.0009	0.0012	0.0001	0.0002	0.0006	0.0010	0.0008
45	0.0015	0.0019	0.0002	0.0003	0.0011	0.0019	0.0015
50	0.0015	0.0019	0.0004	0.0005	0.0016	0.0027	0.0021
55	0.0014	0.0013	0.0006	0.0007	0.0009	0.0024	0.0017
60	0.0012	0.0009	0.0006	0.0011	0.0005	0.0020	0.0010

- The Miscellaneous non-industrial disability rates are used for Local Prosecutors.
- The police non-industrial disability rates are also used for Other Safety, Local Sheriff, and School Police.

Industrial (Job-Related) Disability

Rates vary by age and category.

Age	Fire	Police	County Peace Officer
20	0.0001	0.0000	0.0004
25	0.0002	0.0017	0.0013
30	0.0006	0.0048	0.0025
35	0.0012	0.0079	0.0037
40	0.0023	0.0110	0.0051
45	0.0040	0.0141	0.0067
50	0.0208	0.0185	0.0092
55	0.0307	0.0479	0.0151
60	0.0438	0.0602	0.0174

- The police industrial disability rates are also used for Local Sheriff and Other Safety.
- 50% of the police industrial disability rates are used for School Police.
- 1% of the police industrial disability rates are used for Local Prosecutors.
- Normally, rates are zero for Miscellaneous plans unless the agency has specifically contracted for industrial disability benefits. If so, each Miscellaneous non-industrial disability rate will be split into two components: 50% will become the non-industrial disability rate and 50% will become the industrial disability rate.

Service Retirement

Retirement rates vary by age, service, and formula, except for the Safety Half Pay at 55 and 2% at 55 formulas, where retirement rates vary by age only.

Miscellaneous

Internal Revenue Code Section 415

The limitations on benefits imposed by Internal Revenue Code Section 415 are taken into account in this valuation. Each year the impact of any changes in this limitation since the prior valuation is included and amortized as part of the actuarial gain or loss base. This results in lower contributions for those employers contributing to the Replacement Benefit Fund and protects CalPERS from prefunding expected benefits in excess of limits imposed by federal tax law. The Section 415(b) dollar limit for the 2021 calendar year is $230,000.

Internal Revenue Code Section 401(a)(17)

The limitations on compensation imposed by Internal Revenue Code Section 401(a)(17) are taken into account in this valuation. Each year, the impact of any changes in the compensation limitation since the prior valuation is included and amortized as part of the actuarial gain or loss base. The compensation limit for classic members for the 2021 calendar year is $290,000.

Appendix B

Principal Plan Provisions

The following is a description of the principal plan provisions used in calculating costs and liabilities. We have indicated whether a plan provision is standard or optional. Standard benefits are applicable to all members while optional benefits vary among employers. Optional benefits that apply to a single period of time, such as Golden Hands bakes, have not been included. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the Public Employees' Retirement Law. The law itself governs in all situations.

Service Retirement

Eligibility

A classic CalPERS member or PEPRA Safety member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements). For employees hired into a plan with the 1.5% at age 65 formula, eligibility for service retirement is age 55 with at least 5 years of service. PEPRA Miscellaneous members become eligible for service retirement upon attainment of age 52 with at least 5 years of service.

Benefit

The service retirement benefit is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*.

- The *benefit factor* depends on the benefit formula specified in the agency's contract. The table below shows the factors for each of the available formulas. Factors vary by the member's age at retirement. Listed are the factors for retirement at whole year ages:

Miscellaneous Plan Formulas

Retirement Age	1.5% at 65	2% at 60	2% at 55	2.5% at 55	2.7% at 55	3% at 60	PEPRA 2% at 62

61	1.2334%	2.134%	2.314%	2.500%	2.700%	3.000%	1.900%
62	1.3000%	2.272%	2.366%	2.500%	2.700%	3.000%	2.000%
63	1.3667%	2.418%	2.418%	2.500%	2.700%	3.000%	2.100%
64	1.4334%	2.418%	2.418%	2.500%	2.700%	3.000%	2.200%
65	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.300%
66	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.400%
67 & up	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.500%

Safety Plan Formulas

Retirement Age	Half Pay at 55*	2% at 55	2% at 50	3% at 55	3% at 50
50	1.783%	1.426%	2.000%	2.400%	3.000%
51	1.903%	1.522%	2.140%	2.520%	3.000%
52	2.035%	1.628%	2.280%	2.640%	3.000%
53	2.178%	1.742%	2.420%	2.760%	3.000%
54	2.333%	1.866%	2.560%	2.880%	3.000%
55 & Up	2.500%	2.000%	2.700%	3.000%	3.000%

* For this formula, the benefit factor also varies by entry age. The factors shown are for members with an entry age of 35 or greater. If entry age is less than 35, then the age 55 benefit factor is 50% divided by the difference between age 55 and entry age. The benefit factor for ages prior to age 55 is the same proportion of the age 55 benefit factor as in the above table.

PEPRA Safety Plan Formulas

Retirement Age	2% at 57	2.5% at 57	2.7% at 57
50	1.426%	2.000%	2.000%
51	1.508%	2.071%	2.100%
52	1.590%	2.143%	2.200%
53	1.672%	2.214%	2.300%
54	1.754%	2.286%	2.400%
55	1.836%	2.357%	2.500%
56	1.918%	2.429%	2.600%
57 & Up	2.000%	2.500%	2.700%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. An agency may contract for an optional benefit where any unused sick leave accumulated at the time of retirement will be converted to credited service at a rate of 0.004 years of service for each day of sick leave.

- The *final compensation* is the monthly average of the member's highest 36 or 12 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this compensation). The standard benefit is 36 months. Employers had the option of providing a final compensation equal to the highest 12 consecutive months for classic plans only. Final compensation must be defined by the highest 36 consecutive months' pay under the 1.5% at 65 formula. PEPRA members have a cap on the annual salary that can be used to calculate final compensation for all new members based on the Social Security contribution and benefit base. For employees that participate in Social Security this cap is $128,059 for 2021 and for those employees that do not participate in Social Security the cap for 2021 is $153,671. Adjustments to the caps are permitted annually based on changes to the CPI for all urban consumers.

- Employees must be covered by Social Security with the 1.5% at 65 formula. Social Security is optional for all other benefit formulas. For employees covered by Social Security, the modified formula is the standard benefit. Under this type of formula, the final compensation is offset by $133.33 (or by one third if the final compensation is less than $400). Employers may contract for the full benefit with Social Security that will eliminate the offset applicable to the final compensation. For employees not covered by Social Security, the full benefit is paid with no offsets.

Auxiliary organizations of the CSUC system may elect reduced contribution rates, in which case the offset is $317 if members are not covered by Social Security or $513 if members are covered by Social Security.

- The Miscellaneous and PEPRA Safety service retirement benefit is not capped. The classic Safety service retirement benefit is capped at 90% of final compensation.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, and has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS classic members and PEPRA Safety members become eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for deferred status and upon attainment of age 50 (55 for employees hired into a 1.5% at 65 plan). PEPRA Miscellaneous members become eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for deferred status and upon attainment of age 52.

Benefit

The vested deferred retirement benefit is the same as the service retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury, which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively employed by any CalPERS employer at the time of disability in order to be eligible for this benefit.

Standard Benefit

The standard Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *Service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or

- *Service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33⅓% of final compensation.

Improved Benefit

Employers have the option of providing the improved Non-Industrial Disability Retirement benefit. This benefit provides a monthly allowance equal to 30% of final compensation for the first 5 years of service, plus 1% for each additional year of service to a maximum of 50% of final compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Industrial (Job Related) Disability Retirement

This is a standard benefit for Safety members except those described in Section 20423.6. For excluded Safety members and all Miscellaneous members, employers have the option of providing this benefit. An employer may choose to provide the increased benefit option or the improved benefit option.

Eligibility

An employee is eligible for Industrial Disability Retirement if he or she becomes disabled while working, where disabled means the member is unable to perform the duties of the job because of a work-related illness or injury, which is expected to be permanent or to last indefinitely. A CalPERS member who has left active employment within this group is not eligible for this benefit, except to the extent described below.

Standard Benefit

The standard Industrial Disability Retirement benefit is a monthly allowance equal to 50% of final compensation.

Increased Benefit (75% of Final Compensation)

The increased Industrial Disability Retirement benefit is a monthly allowance equal to 75% of final compensation for total disability.

Improved Benefit (50% to 90% of Final Compensation)

The improved Industrial Disability Retirement benefit is a monthly allowance equal to the Workman's Compensation Appeals Board permanent disability rate percentage (if 50% or greater, with a maximum of 90%) times the final compensation.

For a CalPERS member not actively employed in this group who became disabled while employed by some other CalPERS employer, the benefit is a return of accumulated member contributions with respect to employment in this group. With the standard or increased benefit, a member may also choose to receive the annuitization of the accumulated member contributions.

If a member is eligible for service retirement and if the service retirement benefit is more than the industrial disability retirement benefit, the member may choose to receive the larger benefit.

Post-Retirement Death Benefit

Standard Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of $500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Improved Lump Sum Payment

Employers have the option of providing an improved lump sum death benefit of $600, $2,000, $3,000, $4,000 or $5,000.

Form of Payment for Retirement Allowance

Standard Form of Payment

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. Such reduction takes into account the amount to be provided to the beneficiary and the probable duration of payments (based on the ages of the member and beneficiary) made subsequent to the member's death.

Improved Form of Payment (Post-Retirement Survivor Allowance)

Employers have the option to contract for the post-retirement survivor allowance.

For retirement allowances with respect to service subject to the modified formula, 25% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, without a reduction in the retiree's allowance. For retirement allowances with respect to service subject to the full or supplemental formula, 50% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, without a reduction in the retiree's allowance. This additional benefit is referred to as post-retirement survivor allowance (PRSA) or simply as survivor continuance.

In other words, 25% or 50% of the allowance, the continuance portion, is paid to the retiree for as long as he or she is alive, and that same amount is continued to the retiree's spouse (or if no eligible spouse, to unmarried child (ren) until they attain age 18; or, if no eligible child(ren), to a qualifying dependent parent) for the rest of his or her lifetime. This benefit will not be discontinued in the event the spouse remarries.

The remaining 75% or 50% of the retirement allowance, which may be referred to as the option portion of the benefit, is paid to the retiree as an annuity for as long as he or she is alive. Or, the retiree may choose to provide for some of this option portion to be paid to any designated beneficiary after the retiree's death. Benefit options applicable to the option portion are the same as those offered with the standard form. The reduction is calculated in the same manner but is applied only to the option portion.

Pre-Retirement Death Benefits

Basic Death Benefit

This is a standard benefit.

Eligibility

An employee's beneficiary (or estate) may receive the basic death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this basic death benefit.

Benefit

The basic death benefit is a lump sum in the amount of the member's accumulated contributions, where interest is credited annually at the greater of 6% or the prevailing discount rate through the date of death, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

This is a standard benefit.

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50 for classic and PEPRA Safety members and age 52 for PEPRA Miscellaneous members, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other retirement systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried child(ren) under age 18. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this 1957 Survivor benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified service retirement benefit that the member would have been entitled to receive if the member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to dependent child(ren), the benefit will be discontinued upon death or attainment of age 18, unless the child(ren) is disabled. The total amount paid will be at least equal to the basic death benefit.

Optional Settlement 2 Death Benefit

This is an optional benefit.

Eligibility

An employee's *eligible survivor* may receive the Optional Settlement 2 Death benefit if the member dies while actively employed, has attained at least age 50 for classic and PEPRA Safety members and age 52 for PEPRA Miscellaneous members, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other retirement systems with which CalPERS has reciprocity agreements). A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married at least one year before death. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this Optional Settlement 2 Death benefit.

Benefit

The Optional Settlement 2 Death benefit is a monthly allowance equal to the service retirement benefit that the member would have received had the member retired on the date of his or her death and elected 100% to continue to the eligible survivor after the member's death. The allowance is payable as long as the surviving spouse lives, at which time it is continued to any unmarried child(ren) under age 18, if applicable. The total amount paid will be at least equal to the basic death benefit.

Special Death Benefit

This is a standard benefit for Safety members except those described in Section 20423.6. For excluded Safety members and all Miscellaneous members, employers have the option of providing this benefit.

Eligibility

An employee's *eligible survivor(s)* may receive the special death benefit if the member dies while actively employed and the death is job-related. A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married prior to the onset of the injury or illness that resulted in death. If there is no eligible spouse, an eligible survivor means the member's unmarried child(ren) under age 22. An eligible survivor who chooses to receive this benefit will not receive any other death benefit.

Benefit

The special death benefit is a monthly allowance equal to 50% of final compensation and will be increased whenever the compensation paid to active employees is increased but ceasing to increase when the member would have attained age 50. The allowance is payable to the surviving spouse until death at which time the allowance is continued to any unmarried child(ren) under age 22. There is a guarantee that the total amount paid will at least equal the basic death benefit.

If the member's death is the result of an accident or injury caused by external violence or physical force incurred in the performance of the member's duty, and there are *eligible* surviving child(ren) (*eligible* means unmarried child(ren) under age 22) in addition to an eligible spouse, then an additional monthly allowance is paid equal to the following:

- if 1 eligible child: 12.5% of final compensation
- if 2 eligible children: 20.0% of final compensation
- if 3 or more eligible children: 25.0% of final compensation

Alternate Death Benefit for Local Fire Members

This is an optional benefit available only to local fire members.

Eligibility

An employee's *eligible survivor(s)* may receive the alternate death benefit in lieu of the basic death benefit or the 1957 Survivor benefit if the member dies while actively employed and has at least 20 years of total CalPERS service. A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married prior to the onset of the injury or illness that resulted in death. If there is no eligible spouse, an eligible survivor means the member's unmarried child(ren) under age 18.

Benefit

The Alternate Death benefit is a monthly allowance equal to the service retirement benefit that the member would have received had the member retired on the date of his or her death and elected Optional Settlement 2. (A retiree who elects Optional Settlement 2 receives an allowance that has been reduced so that it will continue to be paid after his or her death to a surviving beneficiary.) If the member has not yet attained age 50, the benefit is equal to that which would be payable if the member had retired at age 50, based on service credited at the time of death. The allowance is payable as long as the surviving spouse lives, at which time it is continued to any unmarried child(ren) under age 18, if applicable. The total amount paid will be at least equal to the basic death benefit.

Cost-of-Living Adjustments (COLA)

Standard Benefit

Retirement and survivor allowances are adjusted each year in May for cost of living, beginning the second calendar year after the year of retirement. The standard cost-of-living adjustment (COLA) is 2%. Annual adjustments are calculated by first determining the lesser of 1) 2% compounded from the end of the year of retirement or 2) actual rate of price inflation. The resulting increase is divided by the total increase provided in prior years. For any given year, the COLA adjustment may be less than 2% (when the rate of price inflation is low), may be greater than the rate of price inflation (when the rate of price inflation is low after several years of high price inflation) or may even be greater than 2% (when price inflation is high after several years of low price inflation).

Improved Benefit

Employers have the option of providing a COLA of 3%, 4%, or 5%, determined in the same manner as described above for the standard 2% COLA. An improved COLA is not available with the 1.5% at 65 formula.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against price inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for price inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the retirement formula. The standard employee contribution is as described below.

- The percent contributed below the monthly compensation breakpoint is 0%.
- The monthly compensation breakpoint is $0 for full and supplemental formula members and $133.33 for employees covered by the modified formula.
- The percent contributed above the monthly compensation breakpoint depends upon the benefit formula, as shown in the table below.

Benefit Formula	Percent Contributed above the Breakpoint
Miscellaneous, 1.5% at 65	2%
Miscellaneous, 2% at 60	7%
Miscellaneous, 2% at 55	7%
Miscellaneous, 2.5% at 55	8%
Miscellaneous, 2.7% at 55	8%
Miscellaneous, 3% at 60	8%
Miscellaneous, 2% at 62	50% of the Total Normal Cost
Miscellaneous, 1.5% at 65	50% of the Total Normal Cost
Safety, Half Pay at 55	Varies by entry age
Safety, 2% at 55	7%
Safety, 2% at 50	9%
Safety, 3% at 55	9%
Safety, 3% at 50	9%
Safety, 2% at 57	50% of the Total Normal Cost
Safety, 2.5% at 57	50% of the Total Normal Cost
Safety, 2.7% at 57	50% of the Total Normal Cost

The employer may choose to "pick-up" these contributions for classic members (Employer Paid Member Contributions or EPMC). EPMC is prohibited for new PEPRA members.

An employer may also include Employee Cost Sharing in the contract, where employees agree to share the cost of the employer contribution. These contributions are paid in addition to the member contribution.

Auxiliary organizations of the CSU system may elect reduced contribution rates, in which case the offset is $317 and the contribution rate is 6% if members are not covered by Social Security. If members are covered by Social Security, the offset is $513 and the contribution rate is 5%.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited with 6% interest compounded annually.

1959 Survivor Benefit

This is a pre-retirement death benefit available only to members not covered by Social Security. Any agency joining CalPERS subsequent to 1993 is required to provide this benefit if the members are not covered by Social Security. The benefit is optional for agencies joining CalPERS prior to 1994. Levels 1, 2, and 3 are now closed. Any new agency or any agency wishing to add this benefit or increase the current level may only choose the 4th or Indexed Level.

This benefit is not included in the results presented in this valuation. More information on this benefit is available on the CalPERS website.

Appendix C

Participant Data

- Summary of Valuation Data
- Active Members
- Transferred and Terminated Members
- Retired Members and Beneficiaries

Summary of Valuation Data

	June 30, 2020	June 30, 2021
1. Active Members		
a) Counts	1,329	1,333
b) Average Attained Age	42.65	42.74
c) Average Entry Age to Rate Plan	33.79	33.73
d) Average Years of Credited Service	8.65	8.79
e) Average Annual Covered Pay	$72,561	$73,986
f) Annual Covered Payroll	96,433,712	98,622,923
g) Projected Annual Payroll for Contribution Year	104,610,283	107,141,375
h) Present Value of Future Payroll	889,096,041	944,819,528
2. Transferred Members		
a) Counts	654	670
b) Average Attained Age	46.87	46.55
c) Average Years of Credited Service	3.51	3.60
d) Average Annual Covered Pay	$84,761	$86,715
3. Terminated Members		
a) Counts	956	984
b) Average Attained Age	46.97	47.35
c) Average Years of Credited Service	2.53	2.59
d) Average Annual Covered Pay	$47,391	$48,620
4. Retired Members and Beneficiaries		
a) Counts	2,125	2,147
b) Average Attained Age	70.58	71.00
c) Average Annual Benefits	$19,115	$19,706
5. Active to Retired Ratio [(1a) / (4a)]	0.63	0.62

Counts of members included in the valuation are counts of the records processed by the valuation. Multiple records may exist for those who have service in more than one valuation group. This does not result in double counting of liabilities.

Average Annual Benefits represents benefit amounts payable by this plan only. Some members may have service with another agency and would therefore have a larger total benefit than would be included as part of the average shown here.

Active Members

Counts of members included in the valuation are counts of the records processed by the valuation. Multiple records may exist for those who have service in more than one valuation group. This does not result in double counting of liabilities.

30 and Over	7,062	9,376	86	0	0	2,980	6,856
All Years	$21,043	$9,759	$1,651	$12,898	$2,138	$12,222	$19,706

* Counts of members do not include alternate payees receiving benefits while the member is still working. Therefore, the total counts may not match information on C-1 of the report. Multiple records may exist for those who have service in more than one coverage group. This does not result in double counting of liabilities.

Appendix D

Glossary of Actuarial Terms

Glossary of Actuarial Terms

Accrued Liability *(Actuarial Accrued Liability)*

The portion of the Present Value of Benefits allocated to prior years. Based on CalPERS funding policies, the accrued liability is the target level of assets on any valuation date.

Actuarial Assumptions

Assumptions made about certain events that will affect pension costs. Assumptions generally can be broken down into two categories: demographic and economic. Demographic assumptions include such things as mortality, disability, and retirement rates. Economic assumptions include discount rate, salary growth, and inflation.

Actuarial Methods

Procedures employed by actuaries to achieve certain funding goals of a pension plan. Actuarial methods include an actuarial cost method, an amortization policy, and an asset valuation method.

Actuarial Valuation

The determination as of a valuation date of the Normal Cost, Accrued Liability, and related actuarial present values for a pension plan. These valuations are performed annually or when an employer is contemplating a change in plan provisions.

Amortization Bases

Separate payment schedules for different portions of the Unfunded Accrued Liability (UAL). The total UAL of a rate plan can be segregated by cause. The impact of such individual causes on the UAL are quantified at the time of their occurrence, resulting in new amortization bases. Each base is separately amortized and paid for over a specific period of time. Generally, in an actuarial valuation, the separate bases consist of changes in UAL due to contract amendments, actuarial assumption changes, method changes, and/or gains and losses.

Amortization Period

The number of years required to pay off an Amortization Base.

Classic Member (under PEPRA)

A member who joined a public retirement system prior to January 1, 2013 and who is not defined as a new member under PEPRA. (See definition of New Member below.)

Discount Rate

This is the rate used to discount the expected future benefit payments to the valuation date to determine the Projected Value of Benefits. The discount rate is based on the assumed long-term rate of return on plan assets, net of investment and administrative expenses. This rate is called the "actuarial interest rate" in Section 20014 of the California Public Employees' Retirement Law.

Entry Age

The earliest age at which a plan member begins to accrue benefits under a defined benefit pension plan. In most cases, this is the age of the member on their date of hire.

Entry Age Actuarial Cost Method

An actuarial cost method designed to fund a member's total plan benefit evenly over the course of his or her career. This method yields a total normal cost rate, expressed as a percentage of payroll, which is designed to remain level throughout the member's career.

Fresh Start

A Fresh Start is when multiple amortization bases are combined into a single base and amortized over a new Amortization Period.

Funded Ratio

Defined as the Market Value of Assets divided by the Accrued Liability. It is a measure of how well funded a rate plan is. A ratio greater than 100% means the rate plan has more assets than the target established by CalPERS

funding policies on the valuation date and the employer need only contribute the Normal Cost. A ratio less than 100% means assets are less than the funding target and contributions in addition to Normal Cost are required.

GASB 68

Statement No. 68 of the Governmental Accounting Standards Board. The accounting standard governing a state or local governmental employer's accounting and financial reporting for pensions.

New Member (under PEPRA)

A new member includes an individual who becomes a member of a public retirement system for the first time on or after January 1, 2013, and who was not a member of another public retirement system prior to that date, and who is not subject to reciprocity with another public retirement system.

Normal Cost

The portion of the Present Value of Benefits allocated to the upcoming fiscal year for active employees. The normal cost plus the required amortization of the UAL, if any, make up the required contributions.

Pension Actuary

A business professional proficient in mathematics and statistics who performs the calculations necessary to properly fund a pension plan and allow the plan sponsor to disclose its liabilities. A pension actuary must satisfy the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States with regard to pensions.

PEPRA

The California Public Employees' Pension Reform Act of 2013

Present Value of Benefits (PVB)

The total dollars needed as of the valuation date to fund all benefits earned in the past or expected to be earned in the future for *current* members.

Unfunded Accrued Liability (UAL)

The Accrued Liability minus the Market Value of Assets. If the UAL for a rate plan is positive, the employer is required to make contributions in excess of the Normal Cost.

July 2022

Safety Plan of the County of Yolo (CalPERS ID: 6380137448)
Annual Valuation Report as of June 30, 2021

Dear Employer,

Attached to this letter, you will find the June 30, 2021 actuarial valuation report for the rate plan noted above. Provided in this report is the determination of the minimum required employer contributions for fiscal year (FY) 2023-24. In addition, the report also contains important information regarding the current financial status of the plan as well as projections and risk measures to aid in planning for the future.

Actuarial valuations are based on assumptions regarding future plan experience including investment return and payroll growth, eligibility for the types of benefits provided, and longevity among retirees. The CalPERS Board of Administration (board) adopts these assumptions after considering the advice of CalPERS actuarial and investment teams and other professionals. Each actuarial valuation reflects all prior differences between actual and assumed experience and adjusts the contribution requirements as needed. This valuation is based on an investment return assumption of 6.8%, which was adopted by the board in November 2021. Other assumptions used in this report are those recommended in the CalPERS Experience Study and Review of Actuarial Assumptions report from November 2021.

Required Contributions

The table below shows the minimum required employer contributions and the PEPRA member rate for FY 2023-24 along with an estimate of the required contribution for FY 2024-25. Employee contributions other than cost sharing (whether paid by the employer or the employee) are in addition to the results shown below. The required employer contributions in this report do not reflect any cost sharing arrangement between the agency and the employees.

Fiscal Year	Employer Normal Cost Rate	Employer Amortization of Unfunded Accrued Liability	PEPRA Member Rate
2023-24	20.00%	$6,930,525	13.75%
Projected Results			
2024-25	*19.7%*	*$6,943,000*	*TBD*

The actual investment return for FY 2021-22 was not known at the time this report was prepared. The projections above assume the investment return for that year would be 6.8%. *To the extent the actual investment return for FY 2021-22 differs from 6.8%, the actual contribution requirements for FY 2024-25 will differ from those shown above.* For additional details regarding the assumptions and methods used for these projections, please refer to the "Projected Employer Contributions" in the "Highlights and Executive Summary" section. This section also contains projected required contributions through FY *2028-29*.

Changes from Previous **Year's Valuation**s

On July 12, 2021, CalPERS reported a preliminary 21.3% net return on investments for FY 2020-21. Since the return exceeded the 7.00% discount rate sufficiently, the CalPERS Funding Risk Mitigation policy allows CalPERS to use a portion of the investment gain to offset the cost of reducing the expected volatility of future investment returns. Based on the thresholds specified in the policy, the excess return of 14.3% prescribes a reduction in investment volatility that corresponds to a reduction in the discount rate of 0.20%, from 7.00% to 6.80%.

On November 17, 2021, the board adopted new actuarial assumptions based on the recommendations in the November 2021 CalPERS Experience Study and Review of Actuarial Assumptions. This study reviewed the retirement rates, termination rates, mortality rates, rates of salary increases, and inflation assumption for public agencies. These new assumptions are incorporated in this actuarial valuation and will impact the required contribution for FY 2023-24. In addition, the board adopted a new strategic asset allocation as part of its Asset Liability Management process. The new

asset allocation, along with the new capital market assumptions and economic assumptions, support a discount rate of 6.80%. This includes a reduction in the price inflation assumption from 2.50% to 2.30%.

Besides the above noted changes, there may also be changes specific to the plan such as contract amendments and funding changes.

Further descriptions of general changes are included in the "Highlights and Executive Summary" section and in Appendix A, "Actuarial Methods and Assumptions." The effects of the changes on the required contributions are included in the "Reconciliation of Required Employer Contributions" section.

Questions

We understand that you might have questions about these results, and the plan actuary whose signature is on the valuation report is available to discuss. If you have other questions, you may call the Customer Contact Center at (888)-CalPERS or (888-225-7377).

Sincerely,

SCOTT TERANDO, ASA, EA, MAAA, FCA, CFA
Chief Actuary, CalPERS

Actuarial Certification

To the best of our knowledge, this report is complete and accurate and contains sufficient information to disclose, fully and fairly, the funded condition of the Safety Plan of the County of Yolo and satisfies the actuarial valuation requirements of Government Code section 7504. This valuation is based on the member and financial data as of June 30, 2021 provided by the various CalPERS databases and the benefits under this plan with CalPERS as of the date this report was produced. It is our opinion that the valuation has been performed in accordance with generally accepted actuarial principles, in accordance with standards of practice prescribed by the Actuarial Standards Board, and that the assumptions and methods are internally consistent and reasonable for this plan, as prescribed by the CalPERS Board of Administration according to provisions set forth in the California Public Employees' Retirement Law.

The undersigned is an actuary who satisfies the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States with regard to pensions.

MAY SHUANG YU, ASA, MAAA
Senior Pension Actuary, CalPERS

Introduction

This report presents the results of the June 30, 2021 actuarial valuation of the Safety Plan of the County of Yolo of the California Public Employees' Retirement System (CalPERS). This actuarial valuation sets the minimum required employer contributions for fiscal year (FY) 2023-24.

Purpose of the Report

The actuarial valuation was prepared by the CalPERS Actuarial Office using data as of June 30, 2021. The purpose of the report is to:

- Set forth the assets and accrued liabilities of this plan as of June 30, 2021;
- Determine the minimum required employer contributions for the FY July 1, 2023 through June 30, 2024;
- Provide actuarial information as of June 30, 2021 to the CalPERS Board of Administration (board) and other interested parties.

The pension funding information presented in this report should not be used in financial reports subject to Governmental Accounting Standards Board (GASB) Statement No. 68 for an Agent Employer Defined Benefit Pension Plan. A separate accounting valuation report for such purposes is available from CalPERS and details for ordering are available on the CalPERS website (www.calpers.ca.gov).

The measurements shown in this actuarial valuation may not be applicable for other purposes. The agency should contact the plan actuary before disseminating any portion of this report for any reason that is not explicitly described above.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; changes in actuarial policies; changes in plan provisions or applicable law; and differences between the required contributions determined by the valuation and the actual contributions made by the agency.

Assessment and Disclosure of Risk

This report includes the following risk disclosures consistent with the recommendations of Actuarial Standards of Practice No. 51 and recommended by the California Actuarial Advisory Panel (CAAP) in the Model Disclosure Elements document:

- A "Scenario Test," projecting future results under different investment income returns.
- A "Sensitivity Analysis," showing the impact on current valuation results using alternative discount rates 5.8% and 7.8%.
- A "Sensitivity Analysis," showing the impact on current valuation results assuming rates of mortality are 10% lower or 10% higher than our current post-retirement mortality assumptions adopted in 2021.
- Plan maturity measures indicating how sensitive a plan may be to the risks noted above.

Required Contributions

Required Employer Contributions	Fiscal Year 2023-24
Employer Normal Cost Rate	20.00%
Plus	
Required Payment on Amortization Bases	$6,930,525
Paid either as	
1) Monthly Payment	$577,544
Or	
2) Annual Prepayment Option*	$6,706,262
Required PEPRA Member Contribution Rate	13.75%

The total minimum required employer contribution is the sum of the Plan's Employer Normal Cost Rate (expressed as a percentage of payroll and paid as payroll is reported) plus the Employer Unfunded Accrued Liability (UAL) Contribution Amount (billed monthly (1) or prepaid annually (2) in dollars).

** Only the UAL portion of the employer contribution can be prepaid (which must be received in full no later than July 31).*

For additional detail regarding the determination of the required contribution for PEPRA members, see "PEPRA Member Contribution Rates" in the "Liabilities and Contributions" section. Required member contributions for Classic members can be found in Appendix B.

	Fiscal Year 2022-23	Fiscal Year 2023-24
Normal Cost Contribution as a Percentage of Payroll		
Total Normal Cost	29.06%	30.52%
Employee Contribution[1]	10.20%	10.52%
Employer Normal Cost[2]	18.86%	20.00%
Projected Annual Payroll for Contribution Year	$25,543,712	$26,360,864
Estimated Employer Contributions Based On Projected Payroll		
Total Normal Cost	$7,423,003	$8,045,336
Employee Contribution	2,605,459	2,773,163
Employer Normal Cost	4,817,544	5,272,173
Unfunded Liability Contribution	7,157,394	6,930,525
% of Projected Payroll (illustrative only)	28.02%	26.29%
Estimated Total Employer Contribution	$11,974,938	$12,202,698
% of Projected Payroll (illustrative only)	46.88%	46.29%

[1] For classic members, this is the percentage specified in the Public Employees' Retirement Law, net of any reduction from the use of a modified formula or other factors. For PEPRA members, the member contribution rate is based on 50% of the normal cost. A development of PEPRA member contribution rates can be found in the "Liabilities and Contributions" section. Employee cost sharing is not shown in this report.

[2] The Employer Normal Cost is a blended rate for all benefit groups in the plan. For a breakout of normal cost by benefit group, see "Normal Cost by Benefit Group" in the "Liabilities and Contributions" section.

Additional Discretionary Employer Contributions

The minimum required employer contribution towards the Unfunded Accrued Liability (UAL) for this rate plan for FY 2023-24 is $6,930,525. CalPERS allows agencies to make additional discretionary payments (ADPs) at any time and in any amount. These optional payments serve to reduce the UAL and future required contributions and can result in significant long-term savings. Agencies can also use ADPs to stabilize annual contributions as a fixed dollar amount, percent of payroll or percent of revenue.

Provided below are select ADP options for consideration. Making such an ADP during FY 2023-24 does not require an ADP be made in any future year, nor does it change the remaining amortization period of any portion of unfunded liability. For information on permanent changes to amortization periods, see the "Amortization Schedule and Alternatives" section of the report.

Agencies considering making an ADP should contact CalPERS for additional information.

Minimum Required Employer Contribution for Fiscal Year 2023-24

Estimated Normal Cost	Minimum UAL Payment	ADP	Total UAL Contribution	Estimated Total Contribution
$5,272,173	$6,930,525	$0	$6,930,525	$12,202,698

Alternative Fiscal Year 2023-24 Employer Contributions for Greater UAL Reduction

Funding Target	Estimated Normal Cost	Minimum UAL Payment	ADP[1]	Total UAL Contribution	Estimated Total Contribution
10 years	$5,272,173	$6,930,525	$1,163,289	$8,093,814	$13,365,987
5 years	$5,272,173	$6,930,525	$6,988,303	$13,918,828	$19,191,001

[1] The ADP amounts are assumed to be made in the middle of the fiscal year. A payment made earlier or later in the fiscal year would have to be less or more than the amount shown to have the same effect on the UAL amortization.

Note that the calculations above are based on the projected Unfunded Accrued Liability as of June 30, 2023 as determined in the June 30, 2021 actuarial valuation. New unfunded liabilities can emerge in future years due to assumption or method changes, changes in plan provisions, and actuarial experience different than assumed. Making an ADP illustrated above for the indicated number of years will not result in a plan that is exactly 100% funded in the indicated number of years. Valuation results will vary from one year to the next and can diverge significantly from projections over a period of several years.

Plan's Funded Status

	June 30, 2020	June 30, 2021
1. Present Value of Projected Benefits	$323,790,782	$349,998,190
2. Entry Age Accrued Liability	259,208,391	279,995,683
3. Market Value of Assets (MVA)	172,366,557	215,350,599
4. Unfunded Accrued Liability (UAL) [(2) – (3)]	$86,841,834	$64,645,084
5. Funded Ratio [(3) / (2)]	66.5%	76.9%

The UAL and funded ratio are assessments of the need for future employer contributions based on the actuarial cost method used to fund the plan. The UAL is the present value of future employer contributions for service that has already been earned and is in addition to future normal cost contributions for active members. The funded ratio, on the other hand, is a relative measure of funded status that allows for comparison between plans of different sizes. For measures of funded status that are appropriate for assessing the sufficiency of plan assets to cover estimated termination liabilities, please see "Hypothetical Termination Liability" in the "Risk Analysis" section.

Projected Employer Contributions

The table below shows the required and projected employer contributions (before cost sharing) for the next six fiscal years. The projection assumes that all actuarial assumptions will be realized and that no further changes to assumptions, contributions, benefits, or funding will occur during the projection period. In particular, the investment return beginning with FY 2021-22 is assumed to be 6.80% per year, net of investment and administrative expenses. Actual contribution rates during this projection period could be significantly higher or lower than the projection shown below. The projected normal cost percentages below reflect that the normal cost will continue to decline over time as new employees are hired into lower cost benefit tiers. Future contribution requirements may differ significantly from those shown below. The actual long-term cost of the plan will depend on the actual benefits and expenses paid and the actual investment experience of the fund.

	Required Contribution	Projected Future Employer Contributions (Assumes 6.80% Return for Fiscal Year 2021-22 and Beyond)				
Fiscal Year	2023-24	2024-25	2025-26	2026-27	2027-28	2028-29
Normal Cost %	20.00%	19.7%	19.4%	19.1%	18.8%	18.4%
UAL Payment	$6,930,525	$6,943,000	$6,788,000	$6,254,000	$5,982,000	$5,608,000
*Total as a % of Payroll**	*46.29%*	*45.3%*	*43.8%*	*40.9%*	*39.1%*	*36.9%*
Projected Payroll	*$26,360,864*	*$27,098,968*	*$27,857,740*	*$28,637,756*	*$29,439,613*	*$30,263,922*

*Illustrative only and based on the projected payroll shown.

For some sources of UAL, the change in UAL is amortized using a 5-year ramp up. For more information, please see "Amortization of the Unfunded Actuarial Accrued Liability" under "Actuarial Methods" in Appendix A. This method phases in the impact of the change in UAL over a 5-year period in order to reduce employer cost volatility from year to year. As a result of this methodology, dramatic changes in the required employer contributions in any one year are less likely. However, required contributions can change gradually and significantly over the next five years. In years when there is a large increase in UAL, the relatively small amortization payments during the ramp up period could result in a funded ratio that is projected to decrease initially while the contribution impact of the increase in the UAL is phased in.

For projected contributions under alternate investment return scenarios, please see the "Future Investment Return Scenarios" in the "Risk Analysis" section. Our online pension plan projection tool, Pension Outlook, is available in the Employers section of the CalPERS website. Pension Outlook can help plan and budget pension costs under various scenarios.

Cost

Actuarial Determination of Plan Cost

Contributions to fund the plan are comprised of two components:

- Normal Cost, expressed as a percentage of total active payroll
- Amortization of the Unfunded Accrued Liability (UAL), expressed as a dollar amount

For fiscal years prior to 2017-18, the Amortization of UAL component was expressed as a percentage of total active payroll. Starting with FY 2017-18, the Amortization of UAL component is expressed as a dollar amount and invoiced on a monthly basis. There is an option to prepay this amount during July of each fiscal year.

The Normal Cost component is expressed as a percentage of active payroll with employer and employee contributions payable as part of the regular payroll reporting process.

The determination of both components requires complex actuarial calculations. The calculations are based on a set of actuarial assumptions which can be divided into two categories:

- Demographic assumptions (e.g., mortality rates, retirement rates, employment termination rates, disability rates)
- Economic assumptions (e.g., future investment earnings, inflation, salary growth rates)

These assumptions reflect CalPERS' best estimate of future experience of the plan and are long term in nature. We recognize that all assumptions will not be realized in any given year. For example, the investment earnings at CalPERS have averaged 6.9% over the 20 years ending June 30, 2021, yet individual fiscal year returns have ranged from -23.6% to +21.3%. In addition, CalPERS reviews all actuarial assumptions by conducting in-depth experience studies every four years, with the most recent experience study completed in 2021.

Changes Since the Prior **Year's** Valuation

Benefits

The standard actuarial practice at CalPERS is to recognize mandated legislative benefit changes in the first annual valuation following the effective date of the legislation. Voluntary benefit changes by plan amendment are generally included in the first valuation that is prepared after the amendment becomes effective, even if the valuation date is prior to the effective date of the amendment.

This valuation generally reflects plan changes by amendments effective before the date of the report. Please refer to the "Plan's Major Benefit Options" and Appendix B for a summary of the plan provisions used in this valuation. The effect of any mandated benefit changes or plan amendments on the unfunded liability is shown in the "(Gain) / Loss Analysis 6/30/20 – 6/30/21" and the effect on the employer contribution is shown in the "Reconciliation of Required Employer Contributions." It should be noted that no change in liability or contribution is shown for any plan changes which were already included in the prior year's valuation.

Actuarial Methods and Assumptions

On November 17, 2021, the board adopted new actuarial assumptions based on the recommendations in the 2021 CalPERS Experience Study and Review of Actuarial Assumptions. This study reviewed the retirement rates, termination rates, mortality rates, rates of salary increases, and inflation assumptions for Public Agencies. These new assumptions are incorporated in this actuarial valuation and will impact the required contribution for FY 2023-24. In addition, the board adopted a new asset portfolio as part of its Asset Liability Management process. The new asset mix supports a 6.80% discount rate, which reflects a change in the price inflation assumption to 2.30%.

Subsequent Events

The contribution requirements determined in this actuarial valuation report are based on demographic and financial information as of June 30, 2021. Changes subsequent to that date are not reflected. Investment returns below the assumed rate of return may increase future required contributions while investment returns above the assumed rate of return may decrease future required contributions.

The projected employer contributions on Page 6 are calculated under the assumption that the discount rate remains at 6.8% going forward and that the realized rate of return on assets for FY 2021-22 is 6.8%.

This actuarial valuation report reflects statutory changes, regulatory changes, and board actions through January 2022. Any subsequent changes or actions are not reflected.

Assets

- Reconciliation of the Market Value of Assets
- Asset Allocation

Reconciliation of the Market Value of Assets

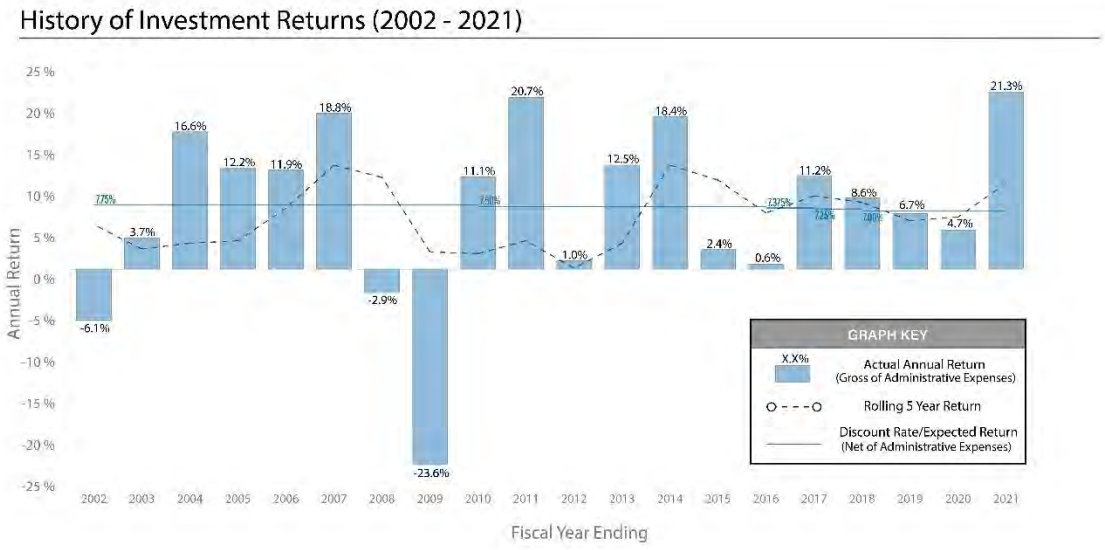
1.	Market Value of Assets as of 6/30/20 including Receivables	$172,366,557
2.	Change in Receivables for Service Buybacks	(7,015)
3.	Employer Contributions	11,264,300
4.	Employee Contributions	2,441,037
5.	Benefit Payments to Retirees and Beneficiaries	(10,751,019)
6.	Refunds	(75,749)
7.	Transfers	686
8.	Service Credit Purchase (SCP) Payments and Interest	29,328
9.	Administrative Expenses	(217,206)
10.	Miscellaneous Adjustments	0
11.	Investment Return (Net of Investment Expenses)	40,299,679
12.	Market Value of Assets as of 6/30/21 including Receivables	$215,350,599

Asset Allocation

CalPERS adheres to an Asset Allocation Strategy which establishes asset class allocation policy targets and ranges and manages those asset class allocations within their policy ranges. CalPERS Investment Belief No. 6 recognizes that strategic asset allocation is the dominant determinant of portfolio risk and return.

The asset allocation shown below reflects the allocation of the Public Employees' Retirement Fund (PERF) in its entirety as of June 30, 2021. The assets for County of Yolo Safety Plan are part of the PERF and are invested accordingly.

Asset Class	Current Allocation as of 6/30/2021	Policy Target Allocation as of 6/30/2021
Public Equity	51.4%	50.0%
Private Equity	8.3%	8.0%
Global Fixed Income	29.8%	28.0%
Real Assets	9.6%	13.0%
Liquidity	1.0%	1.0%
Total Fund Level Portfolios	2.5%	0.0%
Trust Level Financing	(2.6%)	0.0%
Total Fund	100.0%	100.0%



On November 17, 2021, the board adopted changes to the strategic asset allocation as shown in the Policy Target Allocation below expressed as a percentage of total assets.

Strategic Asset Allocation Policy Targets

Asset Class	Policy Target Allocation effective 11/17/2021
Global Equity Cap-weighted	30.0%
Global Equity Non-cap-weighted	12.0%
Private Equity	13.0%
Private Debt	5.0%
Emerging Market Sovereign Bonds	5.0%
High Yield Bonds	5.0%
Investment Grade Corporates	10.0%
Mortgage-backed Securities	5.0%
Treasuries	5.0%
Real Assets	15.0%
Leverage	(5.0%)
Total Fund	100.0%

CalPERS History of Investment Returns

The following is a chart with the 20-year historical annual returns of the PERF for each fiscal year ending on June 30 as reported by the Investment Office. Investment returns reported are net of investment expenses but without reduction for administrative expenses. The assumed rate of return, however, is net of both investment and administrative expenses. The Investment Office uses a three-month lag on private assets for investment performance reporting purposes. This can lead to a timing difference in the returns below and those used for financial reporting purposes. The investment gain or loss calculation in this report relies on assets that have been audited and are appropriate for financial reporting. Because of these differences, it is possible for the Investment Office to report a return higher than the discount rate while the rate plan experiences an investment loss, or a return lower than the discount rate while the rate plan experiences an investment gain.

The table below shows annualized investment returns of the PERF for various time periods ending on June 30, 2021 (figures reported are net of investment expenses but without reduction for administrative expenses). These returns are the annual rates that if compounded over the indicated number of years would equate to the actual time-weighted investment performance of the PERF. It should be recognized that in any given year the rate of return is volatile. The portfolio has an expected volatility of 12.0% per year based on the most recent Asset Liability Management study. The realized volatility is a measure of the risk of the portfolio expressed as the standard deviation of the fund's total monthly return distribution, expressed as an annual percentage. Due to their volatile nature, when looking at investment returns, it is more instructive to look at returns over longer time horizons.

History of CalPERS Compound Annual Rates of Return and Volatilities					
	1 year	5 year	10 year	20 year	30 year
Compound Annual Return	21.3%	10.3%	8.5%	6.9%	8.4%
Realized Volatility	–	7.3%	7.2%	8.5%	8.5%

b) Transferred Members	19,028,248	21,732,682
c) Terminated Members	4,197,863	5,378,592
d) Members and Beneficiaries Receiving Payments	139,555,931	144,917,549
e) Total	$323,790,782	$349,998,190
2. Present Value of Future Employer Normal Costs	$39,884,700	$44,329,134
3. Present Value of Future Employee Contributions	$24,697,691	$25,673,373
4. Entry Age Accrued Liability		
a) Active Members [(1a) - (2) - (3)]	$96,426,349	$107,966,860
b) Transferred Members (1b)	19,028,248	21,732,682
c) Terminated Members (1c)	4,197,863	5,378,592
d) Members and Beneficiaries Receiving Payments (1d)	139,555,931	144,917,549
e) Total	$259,208,391	$279,995,683
5. Market Value of Assets (MVA)	$172,366,557	$215,350,599
6. Unfunded Accrued Liability (UAL) [(4e) - (5)]	$86,841,834	$64,645,084
7. Funded Ratio [(5) / (4e)]	66.5%	76.9%

(Gain)/Loss Analysis 6/30/20 – 6/30/21

To calculate the cost requirements of the plan, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year, actual experience is compared to the expected experience based on the actuarial assumptions. This results in actuarial gains or losses, as shown below.

1.	**Total (Gain)/Loss for the Year**	
a)	Unfunded Accrued Liability (UAL) as of 6/30/20	$86,841,834
b)	Expected Payment on the UAL during 2020-21	6,581,741
c)	Interest through 6/30/21 [.07 x (1a) - ((1.07)^{½} - 1) x (1b)]	5,852,465
d)	Expected UAL before all other changes [(1a) - (1b) + (1c)]	86,112,558
e)	Change due to plan changes	0
f)	Change due to AL Significant Increase	0
g)	Change due to assumption change	130,176
h)	Change due to method change	0
i)	Change due to Funding Risk Mitigation	7,213,371
j)	Expected UAL after all other changes [(1d) + (1e) + (1f) + (1g) + (1h) + (1i)]	93,456,105
k)	Actual UAL as of 6/30/21	64,645,084
l)	Total (Gain)/Loss for 2020-21 [(1k) - (1j)]	($28,811,021)
2.	**Investment (Gain)/Loss for the Year**	
a)	Market Value of Assets as of 6/30/20	$172,366,557
b)	Prior Fiscal Year Receivables	(78,132)
c)	Current Fiscal Year Receivables	71,117
d)	Contributions Received	13,705,337
e)	Benefits and Refunds Paid	(10,826,767)
f)	Transfers, SCP Payments and Interest, and Miscellaneous Adjustments	30,014
g)	Expected Return at 7% per year	12,340,209
h)	Expected Assets as of 6/30/21 [(2a) + (2b) + (2c) + (2d) + (2e) + (2f) + (2g)]	187,608,335
i)	Actual Market Value of Assets as of 6/30/21	215,350,599
j)	Investment (Gain)/Loss [(2h) - (2i)]	($27,742,264)
3.	**Non-Investment (Gain)/Loss for the Year**	
a)	Total (Gain)/Loss (1l)	($28,811,021)
b)	Investment (Gain)/Loss (2j)	(27,742,264)
c)	Non-Investment (Gain)/Loss [(3a) - (3b)]	($1,068,757)

Schedule of Amortization Bases

Below is the schedule of the plan's amortization bases. Note that there is a two-year lag between the valuation date and the start of the contribution year.

- The assets, liabilities, and funded status of the plan are measured as of the valuation date: June 30, 2021.
- The required employer contributions determined by the valuation are for the fiscal year beginning two years after the valuation date: FY 2023-24.

This two-year lag is necessary due to the amount of time needed to extract and test the membership and financial data, and the need to provide public agencies with their required employer contribution well in advance of the start of the fiscal year.

The Unfunded Accrued Liability (UAL) is used to determine the employer contribution and therefore must be rolled forward two years from the valuation date to the first day of the fiscal year for which the contribution is being determined. The UAL is rolled forward each year by subtracting the expected payment on the UAL for the fiscal year and adjusting for interest. The expected payment on the UAL for a fiscal year is equal to the Expected Employer Contribution for the fiscal year minus the Expected Normal Cost for the year. The Employer Contribution for the first fiscal year is determined by the actuarial valuation two years ago and the contribution for the second year is from the actuarial valuation one year ago. Additional discretionary payments are reflected in the Expected Payments column in the fiscal year they were made by the agency.

Amortization Schedule and Alternatives

The amortization schedule on the previous page shows the minimum contributions required according to the CalPERS amortization policy. Many agencies have expressed a desire for a more stable pattern of payments or have indicated interest in paying off the unfunded accrued liabilities more quickly than required. As such, we have provided alternative amortization schedules to help analyze the current amortization schedule and illustrate the potential savings of accelerating unfunded liability payments.

Shown on the following page are future year amortization payments based on 1) the current amortization schedule reflecting the individual bases and remaining periods shown on the previous page, and 2) alternative "fresh start" amortization schedules using two sample periods that would both result in interest savings relative to the current amortization schedule. To initiate a Fresh Start, please contact the plan actuary.

The Current Amortization Schedule typically contains both positive and negative bases. Positive bases result from plan changes, assumption changes, method changes or plan experience that increase unfunded liability. Negative bases result from plan changes, assumption changes, method changes, or plan experience that decrease unfunded liability. The combination of positive and negative bases within an amortization schedule can result in unusual or problematic circumstances in future years, such as:

- When a negative payment would be required on a positive unfunded actuarial liability; or
- When the payment would completely amortize the total unfunded liability in a very short time period, and results in a large change in the employer contribution requirement.

In any year when one of the above scenarios occurs, the actuary will consider corrective action such as replacing the existing unfunded liability bases with a single "fresh start" base and amortizing it over an appropriate period.

The Current Amortization Schedule on the following page may appear to show that, based on the current amortization bases, one of the above scenarios will occur at some point in the future. It is impossible to know today whether such a scenario will in fact arise since there will be additional bases added to the amortization schedule in each future year. Should such a scenario arise in any future year, the actuary will take appropriate action based on guidelines in the CalPERS amortization policy.

Reconciliation of Required Employer Contributions

Normal Cost (% of Payroll)	
1. For Period 7/1/22 – 6/30/23	
a) Employer Normal Cost	18.86%
b) Employee contribution	10.20%
c) Total Normal Cost	29.06%
2. Changes since the prior year annual valuation	
a) Effect of demographic experience	(0.27%)
b) Effect of plan changes	0.00%
c) Effect of Funding Risk Mitigation	1.32%
d) Effect of assumption changes	0.41%
e) Effect of method changes	0.00%
f) Net effect of the changes above [sum of (a) through (e)]	1.46%
3. For Period 7/1/23 – 6/30/24	
a) Employer Normal Cost	20.00%
b) Employee contribution	10.52%
c) Total Normal Cost	30.52%
Employer Normal Cost Change [(3a) – (1a)]	1.14%
Employee Contribution Change [(3b) – (1b)]	0.32%
Unfunded Liability Contribution ($)	
1. For Period 7/1/22 – 6/30/23	7,157,394
2. Changes since the prior year annual valuation	
a) Effect of adjustments to prior year's amortization schedule	0
b) Effect of elimination of amortization bases	0
c) Effect of progression of amortization bases[1]	480,449
d) Effect of net investment (gain) after Funding Risk Mitigation[2]	(487,984)
e) Effect of non-investment (gain)/loss during the prior year	(109,621)
f) Effect of Funding Risk Mitigation (re-amortize existing bases at 6.8%)	(122,240)
g) Effect of Golden Handshake	0
h) Effect of plan changes	0
i) Effect of AL Significant Increase	0
j) Effect of assumption changes	12,527
k) Effect of changes due to Fresh Start or one year recognition of small balances	0
l) Effect of method change	0
m) Net effect of the changes above [sum of (a) through (l)]	(226,869)
3. For Period 7/1/23 – 6/30/24 [(1) + (2m)]	6,930,525

The amounts shown for the period 7/1/22 – 6/30/23 may be different if a prepayment of unfunded actuarial liability is made or a plan change became effective after the prior year's actuarial valuation was performed.

[1] Includes scheduled escalation in individual amortization base payments due to the 5-year ramp and payroll growth assumption used in the pre-2019 amortization policy.

[2] The unfunded liability contribution for the investment (gain)/loss during the year prior to the valuation date is 20% of the "full" annual requirement due to the 5-year ramp. Increases to this amount that occur during the ramp period will be included in line c) in future years.

Employer Contribution History

The table below provides a recent history of the required employer contributions for the plan. The amounts are based on the actuarial valuation from two years prior and does not account for prepayments or benefit changes made during a fiscal year. Additional discretionary payments before July 1, 2018 or after June 30, 2021 are not included.

Fiscal Year	Employer Normal Cost	Unfunded Rate	Unfunded Liability Payment ($)	Additional Discretionary Payments
2014 - 15	15.713%	11.401%	N/A	N/A
2015 - 16	15.761%	12.958%	N/A	N/A
2016 - 17	17.331%	14.445%	N/A	N/A
2017 - 18	17.082%	N/A	3,671,079	N/A
2018 - 19	17.539%	N/A	4,349,533	0
2019 - 20	18.954%	N/A	5,137,061	403,808
2020 - 21	19.514%	N/A	5,813,113	788,037
2021 - 22	19.03%	N/A	6,514,978	
2022 - 23	18.86%	N/A	7,157,394	
2023 - 24	20.00%	N/A	6,930,525	

Funding History

The table below shows the recent history of actuarial accrued liability, market value of assets, unfunded accrued liability, funded ratio and annual covered payroll.

Valuation Date	Accrued Liability (AL)	Market Value of Assets (MVA)	Unfunded Accrued Liability (UAL)	Funded Ratio	Annual Covered Payroll
6/30/2012	$143,895,851	$92,737,450	$51,158,401	64.4%	$20,160,515
6/30/2013	152,968,871	104,815,777	48,153,094	68.5%	19,774,223
6/30/2014	172,135,582	123,296,009	48,839,573	71.6%	20,101,152
6/30/2015	182,537,621	125,791,611	56,746,010	68.9%	19,810,589
6/30/2016	195,919,390	125,914,064	70,005,326	64.3%	21,600,778
6/30/2017	211,921,385	140,459,704	71,461,681	66.3%	22,260,933
6/30/2018	232,675,846	152,555,374	80,120,472	65.6%	22,153,328
6/30/2019	245,793,550	163,046,769	82,746,781	66.3%	23,638,718
6/30/2020	259,208,391	172,366,557	86,841,834	66.5%	23,547,159
6/30/2021	279,995,683	215,350,599	64,645,084	76.9%	24,265,000

Normal Cost by Benefit Group

The table below displays the Total Normal Cost broken out by benefit group for FY 2023-24. The Total Normal Cost is the annual cost of service accrual for the fiscal year for active employees and can be viewed as the long-term contribution rate for the benefits contracted. Generally, the normal cost for a benefit group subject to more generous benefit provisions will exceed the normal cost for a group with less generous benefits. However, based on the characteristics of the members (particularly when the number of actives is small), this may not be the case. Future measurements of the Total Normal Cost for each group may differ significantly from the current values due to such factors as: changes in the demographics of the group, changes in economic and demographic assumptions, changes in plan benefits or applicable law.

Rate Plan Identifier	Benefit Group Name	Total Normal Cost FY 2023-24	Number of Actives	Payroll on 6/30/2021
426	Safety County Peace Officer First Level	30.64%	115	$10,394,461
25348	Safety County Peace Officer PEPRA Level	27.81%	87	$5,808,219
25349	Safety Sheriff PEPRA Level	26.64%	25	$2,267,511
30421	Safety Sheriff First Level	34.75%	48	$5,794,809
	Plan Total	30.52%	275	$24,265,000

Note that if a Benefit Group above has multiple bargaining units, each of which has separately contracted for different benefits such as Employer Paid Member Contributions, then the Normal Cost shown for the respective benefit level does not reflect those differences. Additionally, if a Second Level Benefit Group amended to the same benefit formula as a First Level Benefit Group, their Normal Costs may be dissimilar due to demographic or other population differences. For questions in these situations, please contact the plan actuary.

PEPRA Member Contribution Rates

The California Public Employees' Pension Reform Act of 2013 ("PEPRA") established new benefit formulas, final compensation period, and contribution requirements for "new" employees (generally those first hired into a CalPERS-covered position on or after January 1, 2013). In accordance with Government Code section 7522.30(b), "new members ... shall have an initial contribution rate of at least 50% of the normal cost rate." The normal cost for the plan is dependent on the benefit levels, actuarial assumptions, and demographics of the plan, particularly members' entry age into the plan. Should the total normal cost of the plan change by more than 1% from the base total normal cost established for the plan, the new member rate shall be 50% of the new normal cost rounded to the nearest quarter percent.

The table below shows the determination of the PEPRA member contribution rates effective July 1, 2023, based on 50% of the Total Normal Cost for each respective plan as of the June 30, 2021 valuation.

		Basis for Current Rate		Rates Effective July 1, 2023			
Rate Plan Identifier	Benefit Group Name	Total Normal Cost	Member Rate	Total Normal Cost	Change	Change Needed	Member Rate
25348	Safety County Peace Officer PEPRA Level	26.220%	13.00%	27.48%	1.260%	Yes	13.75%
25349	Safety Sheriff PEPRA Level	26.220%	13.00%	27.48%	1.260%	Yes	13.75%

For purposes of setting member rates, it is preferable to determine total normal cost using a large active population so that the rate remains relatively stable. While each CalPERS non-pooled plan has a sufficiently large active population for this purpose, the PEPRA active population by itself may not be sufficiently large. The total PEPRA normal cost will be determined based on the plan's PEPRA membership only if the number of members covered under the PEPRA formula meets either:

1. 50% of the active population, or
2. 25% of the active population and 100 or more PEPRA members

Until one of these conditions is met, the plan's total PEPRA normal cost will be determined using the entire active plan population (both PEPRA and Classic) based on the PEPRA benefit provisions. For this reason, the PEPRA member contribution rate determined in the table above may not equal 50% of the total normal cost of the PEPRA group shown on the "Normal Cost by Benefit Group" page.

Future Investment Return Scenarios

Analysis using the investment return scenarios from the Asset Liability Management process completed in 2021 was performed to determine the effects of various future investment returns on required employer contributions. The projections below reflect the impact of the CalPERS Funding Risk Mitigation policy. The projected normal cost rates reflect that the rates are anticipated to decline over time as new employees are hired into lower-cost benefit tiers. The projections also assume that all other actuarial assumptions will be realized and that no further changes in assumptions, contributions, benefits, or funding will occur.

The first table shows projected contribution requirements if the fund were to earn either 3.0% or 10.8% annually. These alternate investment returns were chosen because 90% of long-term average returns are expected to fall between them over the 20-year period ending June 30, 2041.

Assumed Annual Return FY 2021-22 through FY 2040-41	Projected Employer Contributions				
	FY 2024-25	FY 2025-26	FY 2026-27	FY 2027-28	FY 2028-29
3.0% (5th percentile)					
Normal Cost Rate	19.7%	19.4%	19.1%	18.8%	18.4%
UAL Contribution	$7,145,000	$7,404,000	$7,504,000	$8,097,000	$8,831,000
10.8% (95th percentile)					
Normal Cost Rate	20.1%	20.2%	20.3%	20.3%	20.4%
UAL Contribution	$6,758,000	$6,240,000	$5,141,000	$4,071,000	$0

Required contributions outside of this range are also possible. In particular, whereas it is unlikely that investment returns will average less than 3.0% or greater than 10.8% over a 20-year period, the likelihood of a single investment return less than 3.0% or greater than 10.8% in any given year is much greater. The following analysis illustrates the effect of an extreme, single year investment return.

The portfolio has an expected volatility (or standard deviation) of 12.0% per year. Accordingly, in any given year there is a 16% probability that the annual return will be -5.2% or less and a 2.5% probability that the annual return will be -17.2% or less. These returns represent one and two standard deviations below the expected return of 6.8%.

The following table shows the effect of a one or two standard deviation investment loss in FY 2021-22 on the FY 2024-25 contribution requirements. Note that a single-year investment gain or loss decreases or increases the required UAL contribution amount incrementally for each of the next five years, not just one, due to the 5-year ramp in the amortization policy. However, the contribution requirements beyond the first year are also impacted by investment returns beyond the first year. Historically, significant downturns in the market are often followed by higher than average returns. Such investment gains would offset the impact of these single year negative returns in years beyond FY 2024-25.

Assumed Annual Return for Fiscal Year 2021-22	Required Employer Contributions	Projected Employer Contributions
	FY 2023-24	FY 2024-25
(17.2%) (2 standard deviation loss)		
Normal Cost Rate	20.00%	19.7%
UAL Contribution	$6,930,525	$8,220,000
(5.2%) (1 standard deviation loss)		
Normal Cost Rate	20.00%	19.7%
UAL Contribution	$6,930,525	$7,582,000

- Without investment gains (returns higher than 6.8%) in year FY 2022-23 or later, projected contributions rates would continue to rise over the next four years due to the continued phase-in of the impact of the illustrated investment loss in FY 2021-22.
- The Pension Outlook Tool can be used to model projected contributions for these scenarios beyond FY 2024-25 as well as to model other investment return scenarios.

Discount Rate Sensitivity

The discount rate assumption is calculated as the sum of the assumed real rate of return and the assumed annual price inflation, currently 4.5% and 2.3%, respectively. Changing either the price inflation assumption or the real rate of return assumption will change the discount rate. The sensitivity of the valuation results to the discount rate assumption depends on which component of the discount rate is changed. Shown below are various valuation results as of June 30, 2021 assuming alternate discount rates by changing the two components independently. Results are shown using the current discount rate of 6.8% as well as alternate discount rates of 5.8% and 7.8%. The rates of 5.8% and 7.8% were selected since they illustrate the impact of a 1.0% increase or decrease to the 6.8% assumption.

Sensitivity to the Real Rate of Return Assumption

As of June 30, 2021	1% Lower Real Return Rate	Current Assumptions	1% Higher Real Return Rate
Discount Rate	5.8%	6.8%	7.8%
Price Inflation	2.3%	2.3%	2.3%
Real Rate of Return	3.5%	4.5%	5.5%
a) Total Normal Cost	38.59%	30.52%	24.41%
b) Accrued Liability	$321,640,099	$279,995,683	$246,085,447
c) Market Value of Assets	$215,350,599	$215,350,599	$215,350,599
d) Unfunded Liability/(Surplus) [(b) - (c)]	$106,289,500	$64,645,084	$30,734,848
e) Funded Ratio	67.0%	76.9%	87.5%

Sensitivity to the Price Inflation Assumption

As of June 30, 2021	1% Lower Inflation Rate	Current Assumptions	1% Higher Inflation Rate
Discount Rate	5.8%	6.8%	7.8%
Price Inflation	1.3%	2.3%	3.3%
Real Rate of Return	4.5%	4.5%	4.5%
a) Total Normal Cost	32.09%	30.52%	27.68%
b) Accrued Liability	$290,035,425	$279,995,683	$257,264,728
c) Market Value of Assets	$215,350,599	$215,350,599	$215,350,599
d) Unfunded Liability/(Surplus) [(b) - (c)]	$74,684,826	$64,645,084	$41,914,129
e) Funded Ratio	74.2%	76.9%	83.7%

Mortality Rate Sensitivity

The following table looks at the change in the June 30, 2021 plan costs and funded status under two different longevity scenarios, namely assuming rates of post-retirement mortality are 10% lower or 10% higher than our current mortality assumptions. This type of analysis highlights the impact on the plan of improving or worsening mortality over the long term.

As of June 30, 2021	10% Lower Mortality Rates	Current Assumptions	10% Higher Mortality Rates
a) Total Normal Cost	30.96%	30.52%	30.12%
b) Accrued Liability	$285,105,028	$279,995,683	$275,274,728
c) Market Value of Assets	$215,350,599	$215,350,599	$215,350,599
d) Unfunded Liability/(Surplus) [(b) - (c)]	$69,754,429	$64,645,084	$59,924,129
e) Funded Ratio	75.5%	76.9%	78.2%

Maturity Measures

As pension plans mature they become more sensitive to risks. Understanding plan maturity and how it affects the ability of a pension plan sponsor to tolerate risk is important in understanding how the plan is impacted by investment return volatility, other economic variables and changes in longevity or other demographic assumptions. One way to look at the maturity level of CalPERS and its plans is to look at the ratio of a plan's retiree liability to its total liability. A pension plan in its infancy will have a very low ratio of retiree liability to total liability. As the plan matures, the ratio increases. A mature plan will often have a ratio above 60%-65%.

Ratio of Retiree Accrued Liability to Total Accrued Liability	June 30, 2020	June 30, 2021
1. Retiree Accrued Liability	139,555,931	144,917,549
2. Total Accrued Liability	259,208,391	279,995,683
3. Ratio of Retiree AL to Total AL [(1) / (2)]	54%	52%

Another measure of the maturity level of CalPERS and its plans is the ratio of actives to retirees, also called the support ratio. A pension plan in its infancy will have a very high ratio of active to retired members. As the plan matures and members retire, the ratio declines. A mature plan will often have a ratio near or below one.

To calculate the support ratio for the rate plan, retirees and beneficiaries receiving a continuance are each counted as one, even though they may have only worked a portion of their careers as an active member of this rate plan. For this reason, the support ratio, while intuitive, may be less informative than the ratio of retiree liability to total accrued liability above. For comparison, the support ratio for all CalPERS public agency plans is 0.82 and is calculated consistently with how it is for the individual rate plan. Note that to calculate the support ratio for all public agency plans, a retiree with service from more than one CalPERS agency is counted as a retiree more than once.

Support Ratio	June 30, 2020	June 30, 2021
1. Number of Actives	284	275
2. Number of Retirees	353	359
3. Support Ratio [(1) / (2)]	0.80	0.77

The actuarial calculations supplied in this communication are based on various assumptions about long-term demographic and economic behavior. Unless these assumptions (e.g., terminations, deaths, disabilities, retirements, salary growth, investment return) are exactly realized each year, there will be differences on a year-to-year basis. The year-to-year differences between actual experience and the assumptions are called actuarial gains and losses and serve to lower or raise required employer contributions from one year to the next. Therefore, employer contributions will inevitably fluctuate, especially due to the ups and downs of investment returns.

Maturity Measures (continued)

Asset Volatility Ratio

Shown in the table below is the asset volatility ratio (AVR), which is the ratio of market value of assets to payroll. Plans that have a higher AVR experience more volatile employer contributions (as a percentage of payroll) due to investment return. For example, a plan with AVR of 8 may experience twice the contribution volatility due to investment return volatility than a plan with AVR of 4. It should be noted that this ratio is a measure of the current situation. It increases over time but generally tends to stabilize as a plan matures.

Liability Volatility Ratio

Also shown in the table below is the liability volatility ratio (LVR), which is the ratio of accrued liability to payroll. Plans that have a higher LVR experience more volatile employer contributions (as a percentage of payroll) due to changes in liability. For example, a plan with LVR of 8 is expected to have twice the contribution volatility of a plan with LVR of 4 when there is a change in accrued liability, such as when there is a change in actuarial assumptions. It should be noted that this ratio indicates a longer-term potential for contribution volatility, since the AVR, described above, will tend to move closer to the LVR as the funded ratio approaches 100%.

Contribution Volatility	June 30, 2020	June 30, 2021
1. Market Value of Assets without Receivables	$172,288,425	$215,279,482
2. Payroll	23,547,159	24,265,000
3. Asset Volatility Ratio (AVR) [(1) / (2)]	7.3	8.9
4. Accrued Liability	$259,208,391	$279,995,683
5. Liability Volatility Ratio (LVR) [(4) / (2)]	11.0	11.5

Maturity Measures History

Valuation Date	Ratio of Retiree Accrued Liability to Total Accrued Liability	Support Ratio	Asset Volatility Ratio	Liability Volatility Ratio
6/30/2017	53%	0.90	6.3	9.5
6/30/2018	55%	0.85	6.9	10.5
6/30/2019	55%	0.86	6.9	10.4
6/30/2020	54%	0.80	7.3	11.0
6/30/2021	52%	0.77	8.9	11.5

Hypothetical Termination Liability

The hypothetical termination liability is an estimate of the financial position of the plan had the contract with CalPERS been terminated as of June 30, 2021. The plan liability on a termination basis is calculated differently from the plan's ongoing funding liability. For this hypothetical termination liability calculation, both compensation and service are frozen as of the valuation date and no future pay increases or service accruals are assumed. This measure of funded status is not appropriate for assessing the need for future employer contributions in the case of an ongoing plan, that is, for an employer that continues to provide CalPERS retirement benefits to active employees.

A more conservative investment policy and asset allocation strategy was adopted by the board for the Terminated Agency Pool. The Terminated Agency Pool has limited funding sources since no future employer contributions will be made. Therefore, expected benefit payments are secured by risk-free assets and benefit security for members is increased while limiting the funding risk. However, this asset allocation has a lower expected rate of return than the PERF and consequently, a lower discount rate assumption. The lower discount rate for the Terminated Agency Pool results in higher liabilities for terminated plans.

The effective termination discount rate will depend on actual market rates of return for risk-free securities on the date of termination. As market discount rates are variable the table below shows a range for the hypothetical termination liability based on the lowest and highest interest rates observed during an approximate 19-month period from 12 months before the valuation date to seven months after.

Market Value of Assets (MVA)	Hypothetical Termination Liability[1,2] at 1.00%	Funded Ratio	Unfunded Termination Liability at 1.00%	Hypothetical Termination Liability[1,2] at 2.25%	Funded Ratio	Unfunded Termination Liability at 2.25%
$215,350,599	$680,252,138	31.7%	$464,901,539	$546,290,886	39.4%	$330,940,287

[1] The hypothetical liabilities calculated above include a 5% contingency load. The contingency load and other actuarial assumptions can be found in Appendix A.

[2] The discount rate used for termination valuations is a weighted average of the 10-year and 30-year U.S. Treasury yields where the weights are based on matching asset and liability durations as of the termination date. The discount rates used in the table are based on 20-year Treasury bonds, rounded to the nearest quarter percentage point, which is a good proxy for most plans. The 20-year Treasury yield was 2.00% on June 30, 2021, the valuation date.

In order to terminate the plan, first contact our Pension Contract Services unit to initiate a Resolution of Intent to Terminate. The completed Resolution will allow the plan actuary to provide a preliminary termination valuation with a more up-to-date estimate of the plan liabilities. Before beginning this process, please consult with the plan actuary.

Plan's Major Benefit Provisions

Plan's Major Benefit Options

Shown below is a summary of the major optional benefits for which the agency has contracted. A description of principal standard and optional plan provisions is in Appendix B.

	Benefit Group						
Member Category	Peace	Local Sheriff	Peace	Peace	Local Sheriff	Peace	Peace
Demographics							
Actives	Yes	Yes	No	Yes	Yes	No	No
Transfers/Separated	Yes	Yes	No	Yes	Yes	No	No
Receiving	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Benefit Provision							
Benefit Formula	3% @ 55	3% @ 50		2.7% @ 57	2.7% @ 57

- Appendix D – Glossary of Actuarial Terms

Appendix A

Actuarial Methods and Assumptions

- Actuarial Data
- Actuarial Methods
- Actuarial Assumptions
- Miscellaneous

Actuarial Data

As stated in the Actuarial Certification, the data which serves as the basis of this valuation has been obtained from the various CalPERS databases. We have reviewed the valuation data and believe that it is reasonable and appropriate in aggregate. We are unaware of any potential data issues that would have a material effect on the results of this valuation, except that data does not always contain the latest salary information for former members now in reciprocal systems and does not recognize the potential for unusually large salary deviation in certain cases such as elected officials. Therefore, salary information in these cases may not be accurate. These situations are relatively infrequent, however, and generally do not have a material impact on the required employer contributions.

Actuarial Methods

Actuarial Cost Method

The actuarial cost method used is the Entry Age Actuarial Cost Method. Under this method, projected benefits are determined for all members and the associated liabilities are spread in a manner that produces level annual cost as a percentage of pay in each year from the member's entry age to their assumed retirement age on the valuation date. The cost allocated to the current fiscal year is called the normal cost.

The actuarial accrued liability for active members is then calculated as the portion of the total cost of the plan allocated to prior years. The actuarial accrued liability for members currently receiving benefits and for members entitled to deferred benefits is equal to the present value of the benefits expected to be paid. No normal costs are applicable for these participants.

CalPERS uses an in-house proprietary actuarial model for calculating plan costs. We believe this model is fit for its intended purpose and meets all applicable Actuarial Standards of Practice. Furthermore, the actuarial results of our model are independently confirmed periodically by outside auditing actuaries. The actuarial assumptions used are internally consistent and the generated results are reasonable.

Amortization of Unfunded Actuarial Accrued Liability

The excess of the total actuarial accrued liability over the market value of plan assets is called the unfunded actuarial accrued liability (UAL). Funding requirements are determined by adding the normal cost and a payment toward the UAL. The UAL payment is equal to the sum of individual amortization payments, each representing a different source of UAL for a given measurement period.

Amortization payments are determined according to the CalPERS amortization policy. The board adopted a new policy effective for the June 30, 2019 actuarial valuation. The new policy applies prospectively only; amortization bases (sources of UAL) established prior to the June 30, 2019 valuation will continue to be amortized according to the prior policy.

Prior Policy (Bases Established prior to June 30, 2019)

Amortization payments are determined as a level percentage of payroll whereby the payment increases each year at an escalation rate. Gains or losses are amortized over a fixed 30-year period with a 5-year ramp up at the beginning and a 5-year ramp down at the end of the amortization period. All changes in liability due to plan amendments (other than golden handshakes) are amortized over a 20-year period with no ramp. Changes in actuarial assumptions or changes in actuarial methodology are amortized over a 20-year period with a 5-year ramp up at the beginning and a 5-year ramp down at the end of the amortization period. Changes in unfunded accrued liability due to a Golden Handshake will be amortized over a period of five years. Bases established prior to June 30, 2013 may be amortized differently. A summary is provided in the following table:

Driver	Source				
	(Gain)/Loss				
	Investment	Non-investment	Assumption/Method Change	Benefit Change	Golden Handshake
Amortization Period	30 Years	30 Years	20 Years	20 Years	5 Years
Escalation Rate - Active Plans - Inactive Plans	2.80% 0%	2.80% 0%	2.80% 0%	2.80% 0%	2.80% 0%
Ramp Up	5	5	5	0	0
Ramp Down	5	5	5	0	0

The 5-year ramp up means that the payments in the first four years of the amortization period are 20%, 40%, 60% and 80% of the "full" payment which begins in year five. The 5-year ramp down means that the reverse is true in the final four years of the amortization period.

Current Policy (Bases Established on or after June 30, 2019)

Amortization payments are determined as a level dollar amount. Investment gains or losses are amortized over a fixed 20-year period with a 5-year ramp up at the beginning of the amortization period. Non-investment gains or losses are amortized over a fixed 20-year period with no ramps. All changes in liability due to plan amendments (other than golden handshakes) are amortized over a 20-year period with no ramps. Changes in actuarial assumptions or changes in actuarial methodology are amortized over a 20-year period with no ramps. Changes in unfunded accrued liability due to a Golden Handshake are amortized over a period of five years. A summary is provided in the table below:

	Source				
	(Gain)/Loss				
	Investment	Non-investment	Assumption/ Method Change	Benefit Change	Golden Handshake
Amortization Period	20 Years	20 Years	20 Years	20 Years	5 Years
Escalation Rate	0%	0%	0%	0%	0%
Ramp Up	5	0	0	0	0
Ramp Down	0	0	0	0	0

Exceptions for Inconsistencies

An exception to the amortization rules above is used whenever their application results in inconsistencies. In these cases, a "fresh start" approach is used. This means that the current unfunded actuarial liability is projected and amortized over a set number of years. For example, a fresh start is needed in the following situations:

- When a negative payment would be required on a positive unfunded actuarial liability; or
- When the payment would completely amortize the total unfunded liability in a very short time period, and results in a large change in the employer contribution requirement.

It should be noted that the actuary may determine that a fresh start is necessary under other circumstances. In all cases of a fresh start, the period is set by the actuary at what is deemed appropriate; however, the period will not be greater than 20 years.

Exceptions for Plans in Surplus

If a surplus exists (i.e., the Market Value of Assets exceeds the plan's accrued liability) any prior amortization layers shall be considered fully amortized, and the surplus shall not be amortized.

In the event of any subsequent unfunded liability, a Fresh Start shall be used with an amortization period of 20 years or less.

Exceptions for Small Amounts

Where small unfunded liabilities are identified in annual valuations which result in small payment amounts, the actuary may shorten the remaining period for these bases.

- When the balance of a single amortization base has an absolute value less than $250, the amortization period is reduced to one year.
- When the entire unfunded liability is a small amount, the actuary may perform a Fresh Start and use an appropriate amortization period.

Exceptions for Inactive Plans

The following exceptions apply to plans classified as Inactive. These plans have no active members and no expectation to have active members in the future.

- Amortization of the unfunded liability is on a "level dollar" basis rather than a "level percent of pay" basis. For amortization layers, which utilize a ramp up and ramp down, the "ultimate" payment is constant.
- Actuarial judgment will be used to shorten amortization periods for Inactive plans with existing periods that are deemed too long given the duration of the liability. The specific demographics of the plan will be used to determine if shorter periods may be more appropriate.

Exceptions for Inactive Agencies

For a public agency with no active members in any CalPERS rate plan, the unfunded liability shall be amortized over a closed amortization period of no more than 15 years.

Asset Valuation Method

The Actuarial Value of Assets is set equal to the market value of assets. Asset values include accounts receivable.

PEPRA Normal Cost Rate Methodology

Per Government Code Section 7522.30(b), the "normal cost rate" shall mean the annual actuarially determined normal cost for the plan of retirement benefits provided to the new member and shall be established based on actuarial assumptions used to determine the liabilities and costs as part of the annual actuarial valuation. The plan of retirement benefits shall include any elements that would impact the actuarial determination of the normal cost, including, but not limited to, the retirement formula, eligibility and vesting criteria, ancillary benefit provisions, and any automatic cost-of-living adjustments as determined by the public retirement system.

For purposes of setting member rates, it is preferable to determine total normal cost using a large active population so that the rate remains relatively stable. While each CalPERS non-pooled plan has a sufficiently large active population for this purpose, the PEPRA active population by itself may not be sufficiently large. The total PEPRA normal cost will be determined based on the plan's PEPRA membership only if the number of members covered under the PEPRA formula meets either:

1. 50% of the active population, or
2. 25% of the active population and 100 or more PEPRA members

Until one of these conditions is met, the plan's total PEPRA normal cost will be determined using the entire active plan population (both PEPRA and Classic) based on the PEPRA benefit provisions.

Actuarial Assumptions

In 2021, CalPERS completed its most recent asset liability management study incorporating actuarial assumptions and strategic asset allocation. In November 2021, the board adopted changes to the asset allocation that increased the expected volatility of returns. The adopted asset allocation was expected to have a long-term blended return that continued to support a discount rate assumption of 6.80%. The board also approved several changes to the demographic assumptions that more closely aligned with actual experience.

For more details and additional rationale for the selection of the actuarial assumptions, please refer to the CalPERS Experience Study and Review of Actuarial Assumptions report from November 2021 that can be found on the CalPERS website under: Forms and Publications. Click on "View All" and search for Experience Study.

All actuarial assumptions (except the discount rates used for the hypothetical termination liability) represent an estimate of future experience rather than observations of the estimates inherent in market data.

Economic Assumptions

Discount Rate

The prescribed discount rate assumption, adopted by the board on November 17, 2021, is 6.80% compounded annually (net of investment and administrative expenses) as of June 30, 2021.

Termination Liability Discount Rate

The current discount rate assumption used for termination valuations is a weighted average of the 10-year and 30-year U.S. Treasury yields where the weights are based on matching asset and liability durations as of the termination date.

The hypothetical termination liabilities in this report are calculated using an observed range of market interest rates. This range is based on the lowest and highest 20-year Treasury bond observed during an approximate 19-month period from 12 months before the valuation date to seven months after. The 20-year Treasury bond has a similar duration to most plan liabilities and serves as a good proxy for the termination discount rate. The 20-year Treasury yield was 2.00% on June 30, 2021.

Salary Growth

Annual increases vary by category, entry age, and duration of service. A sample of assumed increases are shown below. Wage inflation assumption in the valuation year (2.80% for 2021) is added to these factors for total salary growth.

Public Agency Miscellaneous

Duration of Service	(Entry Age 20)	(Entry Age 30)	(Entry Age 40)
0	0.0764	0.0621	0.0521
1	0.0663	0.0528	0.0424
2	0.0576	0.0449	0.0346

- The Miscellaneous salary scale is used for Local Prosecutors.
- The Police salary scale is used for Other Safety, Local Sheriff, and School Police.

Price Inflation

2.30% compounded annually.

Wage Inflation

2.80% compounded annually (used in projecting individual salary increases).

Payroll Growth

2.80% compounded annually (used in projecting the payroll over which the unfunded liability is amortized for level percent of payroll bases). This assumption is used for all plans with active members.

Non-valued Potential Additional Liabilities

The potential liability loss for a cost-of-living increase exceeding the 2.30% price inflation assumption and any potential liability loss from future member service purchases that are not reflected in the valuation.

Miscellaneous Loading Factors

Credit for Unused Sick Leave

Total years of service is increased by 1% for those plans that have adopted the provision of providing Credit for Unused Sick Leave.

Conversion of Employer Paid Member Contributions (EPMC)

Total years of service is increased by the Employee Contribution Rate for those plans with the provision providing for the Conversion of Employer Paid Member Contributions (EPMC) during the final compensation period.

Norris Decision (Best Factors)

Employees hired prior to July 1, 1982 have projected benefit amounts increased in order to reflect the use of "Best Factors" in the calculation of optional benefit forms. This is due to a 1983 Supreme Court decision, known as the Norris decision, which required males and females to be treated equally in the determination of benefit amounts. Consequently, anyone already employed at that time is given the best possible conversion factor when optional benefits are determined. No loading is necessary for employees hired after July 1, 1982.

Termination Liability

The termination liabilities include a 5% contingency load. This load is for unforeseen improvements in mortality.

Demographic Assumptions

Pre-Retirement Mortality

The mortality assumptions are based on mortality rates resulting from the most recent CalPERS Experience Study adopted by the CalPERS Board in November 2021. For purposes of the mortality rates, the rates incorporate generational mortality to capture on-going mortality improvement. Generational mortality explicitly assumes that members born more recently will live longer than the members born before them thereby capturing the mortality improvement seen in the past and expected continued improvement. For more details, please refer to the 2021 experience study report that can be found on the CalPERS website

Rates vary by age and gender are shown in the table below. This table only contains a sample of the 2017 base table rates for illustrative purposes. The non-industrial death rates are used for all plans. The industrial death rates are used for Safety plans (except for local Safety members described in Section 20423.6 where the agency has not specifically contracted for industrial death benefits.)

	Miscellaneous		Safety			
	Non-Industrial Death (Not Job-Related)		Non-Industrial Death (Not Job-Related)		Industrial Death (Job-Related)	
Age	Male	Female	Male	Female	Male	Female
20	0.00039	0.00014	0.00038	0.00014	0.00004	0.00002
25	0.00033	0.00013	0.00034	0.00018	0.00004	0.00002
30	0.00044	0.00019	0.00042	0.00025	0.00005	0.00003
35	0.00058	0.00029	0.00048	0.00034	0.00005	0.00004
40	0.00075	0.00039	0.00055	0.00042	0.00006	0.00005
45	0.00093	0.00054	0.00066	0.00053	0.00007	0.00006
50	0.00134	0.00081	0.00092	0.00073	0.00010	0.00008
55	0.00198	0.00123	0.00138	0.00106	0.00015	0.00012
60	0.00287	0.00179	0.00221	0.00151	0.00025	0.00017
65	0.00403	0.00250	0.00346	0.00194	0.00038	0.00022
70	0.00594	0.00404	0.00606	0.00358	0.00067	0.00040
75	0.00933	0.00688	0.01099	0.00699	0.00122	0.00078
80	0.01515	0.01149	0.02027	0.01410	0.00225	0.00157

- The pre-retirement mortality rates above are for 2017 and are projected generationally for future years using 80% of the Society of Actuaries' Scale MP-2020.
- Miscellaneous plans usually have industrial death rates set to zero unless the agency has specifically contracted for industrial death benefits. If so, each non-industrial death rate shown above will be split into two components: 99% will become the non-industrial death rate and 1% will become the industrial death rate.

Post-Retirement Mortality

Rates vary by age, type of retirement, and gender. See sample rates in table below. These rates are used for all plans.

	Healthy Recipients		Non-Industrially Disabled (Not Job-Related)		Industrially Disabled (Job-Related)	
Age	Male	Female	Male	Female	Male	Female
50	0.00267	0.00199	0.01701	0.01439	0.00430	0.00311
55	0.00390	0.00325	0.02210	0.01734	0.00621	0.00550

90	0.14539	0.11086	0.16608	0.14396	0.16584	0.12434
95	0.24665	0.20364	0.24665	0.20364	0.24665	0.20364
100	0.36198	0.31582	0.36198	0.31582	0.36198	0.31582
105	0.52229	0.44679	0.52229	0.44679	0.52229	0.44679
110	1.00000	1.00000	1.00000	1.00000	1.00000	1.00000

The post-retirement mortality rates above are for 2017 and are projected generationally for future years using 80% of the Society of Actuaries' Scale MP-2020.

Marital Status

For active members, a percentage who are married upon retirement is assumed according to the member category as shown in the following table.

Member Category	Percent Married
Miscellaneous Member	70%
Local Police	85%
Local Fire	85%
Other Local Safety	70%
School Police	85%
Local County Peace Officers	75%

Age of Spouse

It is assumed that female spouses are 3 years younger than male spouses. This assumption is used for all plans.

Terminated Members

It is assumed that terminated members refund immediately if non-vested. Terminated members who are vested are assumed to retire at age 59 for Miscellaneous members and age 54 for Safety members.

Termination with Refund

Rates vary by entry age and service for Miscellaneous plans. Rates vary by service for Safety plans. See sample rates in tables below.

Non-Industrial (Not Job-Related) Disability

Rates vary by age and gender for Miscellaneous plans. Rates vary by age and category for Safety plans.

	Miscellaneous		Fire	Police	County Peace Officer	Schools	
Age	Male	Female	Male and Female	Male and Female	Male and Female	Male	Female
20	0.0001	0.0000	0.0001	0.0001	0.0001	0.0000	0.0002
25	0.0001	0.0001	0.0001	0.0001	0.0001	0.0000	0.0002
30	0.0002	0.0003	0.0001	0.0001	0.0001	0.0002	0.0002
35	0.0004	0.0007	0.0001	0.0002	0.0003	0.0005	0.0004
40	0.0009	0.0012	0.0001	0.0002	0.0006	0.0010	0.0008
45	0.0015	0.0019	0.0002	0.0003	0.0011	0.0019	0.0015
50	0.0015	0.0019	0.0004	0.0005	0.0016	0.0027	0.0021
55	0.0014	0.0013	0.0006	0.0007	0.0009	0.0024	0.0017
60	0.0012	0.0009	0.0006	0.0011	0.0005	0.0020	0.0010

- The Miscellaneous non-industrial disability rates are used for Local Prosecutors.
- The police non-industrial disability rates are also used for Other Safety, Local Sheriff, and School Police.

Industrial (Job-Related) Disability

Rates vary by age and category.

Age	Fire	Police	County Peace Officer
20	0.0001	0.0000	0.0004
25	0.0002	0.0017	0.0013
30	0.0006	0.0048	0.0025
35	0.0012	0.0079	0.0037
40	0.0023	0.0110	0.0051
45	0.0040	0.0141	0.0067
50	0.0208	0.0185	0.0092
55	0.0307	0.0479	0.0151
60	0.0438	0.0602	0.0174

- The police industrial disability rates are also used for Local Sheriff and Other Safety.
- 50% of the police industrial disability rates are used for School Police.
- 1% of the police industrial disability rates are used for Local Prosecutors.
- Normally, rates are zero for Miscellaneous plans unless the agency has specifically contracted for industrial disability benefits. If so, each Miscellaneous non-industrial disability rate will be split into two components: 50% will become the non-industrial disability rate and 50% will become the industrial disability rate.

Service Retirement

Retirement rates vary by age, service, and formula, except for the Safety Half Pay at 55 and 2% at 55 formulas, where retirement rates vary by age only.

Miscellaneous

Internal Revenue Code Section 415

The limitations on benefits imposed by Internal Revenue Code Section 415 are taken into account in this valuation. Each year the impact of any changes in this limitation since the prior valuation is included and amortized as part of the actuarial gain or loss base. This results in lower contributions for those employers contributing to the Replacement Benefit Fund and protects CalPERS from prefunding expected benefits in excess of limits imposed by federal tax law. The Section 415(b) dollar limit for the 2021 calendar year is $230,000.

Internal Revenue Code Section 401(a)(17)

The limitations on compensation imposed by Internal Revenue Code Section 401(a)(17) are taken into account in this valuation. Each year, the impact of any changes in the compensation limitation since the prior valuation is included and amortized as part of the actuarial gain or loss base. The compensation limit for classic members for the 2021 calendar year is $290,000.

Appendix B

Principal Plan Provisions

The following is a description of the principal plan provisions used in calculating costs and liabilities. We have indicated whether a plan provision is standard or optional. Standard benefits are applicable to all members while optional benefits vary among employers. Optional benefits that apply to a single period of time, such as Golden Hands bakes, have not been included. Many of the statements in this summary are general in nature, and are intended to provide an easily understood summary of the Public Employees' Retirement Law. The law itself governs in all situations.

Service Retirement

Eligibility

A classic CalPERS member or PEPRA Safety member becomes eligible for Service Retirement upon attainment of age 50 with at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements). For employees hired into a plan with the 1.5% at age 65 formula, eligibility for service retirement is age 55 with at least 5 years of service. PEPRA Miscellaneous members become eligible for service retirement upon attainment of age 52 with at least 5 years of service.

Benefit

The service retirement benefit is a monthly allowance equal to the product of the *benefit factor*, *years of service*, and *final compensation*.

- The *benefit factor* depends on the benefit formula specified in the agency's contract. The table below shows the factors for each of the available formulas. Factors vary by the member's age at retirement. Listed are the factors for retirement at whole year ages:

Miscellaneous Plan Formulas

Retirement Age	1.5% at 65	2% at 60	2% at 55	2.5% at 55	2.7% at 55	3% at 60	PEPRA 2% at 62
50	0.5000%	1.092%	1.426%	2.000%	2.000%	2.000%	N/A

61	1.2334%	2.134%	2.314%	2.500%	2.700%	3.000%	1.900%
62	1.3000%	2.272%	2.366%	2.500%	2.700%	3.000%	2.000%
63	1.3667%	2.418%	2.418%	2.500%	2.700%	3.000%	2.100%
64	1.4334%	2.418%	2.418%	2.500%	2.700%	3.000%	2.200%
65	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.300%
66	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.400%
67 & up	1.5000%	2.418%	2.418%	2.500%	2.700%	3.000%	2.500%

Safety Plan Formulas

Retirement Age	Half Pay at 55*	2% at 55	2% at 50	3% at 55	3% at 50
50	1.783%	1.426%	2.000%	2.400%	3.000%
51	1.903%	1.522%	2.140%	2.520%	3.000%
52	2.035%	1.628%	2.280%	2.640%	3.000%
53	2.178%	1.742%	2.420%	2.760%	3.000%
54	2.333%	1.866%	2.560%	2.880%	3.000%
55 & Up	2.500%	2.000%	2.700%	3.000%	3.000%

* For this formula, the benefit factor also varies by entry age. The factors shown are for members with an entry age of 35 or greater. If entry age is less than 35, then the age 55 benefit factor is 50% divided by the difference between age 55 and entry age. The benefit factor for ages prior to age 55 is the same proportion of the age 55 benefit factor as in the above table.

PEPRA Safety Plan Formulas

Retirement Age	2% at 57	2.5% at 57	2.7% at 57
50	1.426%	2.000%	2.000%
51	1.508%	2.071%	2.100%
52	1.590%	2.143%	2.200%
53	1.672%	2.214%	2.300%
54	1.754%	2.286%	2.400%
55	1.836%	2.357%	2.500%
56	1.918%	2.429%	2.600%
57 & Up	2.000%	2.500%	2.700%

- The *years of service* is the amount credited by CalPERS to a member while he or she is employed in this group (or for other periods that are recognized under the employer's contract with CalPERS). For a member who has earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance. An agency may contract for an optional benefit where any unused sick leave accumulated at the time of retirement will be converted to credited service at a rate of 0.004 years of service for each day of sick leave.

- The *final compensation* is the monthly average of the member's highest 36 or 12 consecutive months' full-time equivalent monthly pay (no matter which CalPERS employer paid this compensation). The standard benefit is 36 months. Employers had the option of providing a final compensation equal to the highest 12 consecutive months for classic plans only. Final compensation must be defined by the highest 36 consecutive months' pay under the 1.5% at 65 formula. PEPRA members have a cap on the annual salary that can be used to calculate final compensation for all new members based on the Social Security contribution and benefit base. For employees that participate in Social Security this cap is $128,059 for 2021 and for those employees that do not participate in Social Security the cap for 2021 is $153,671. Adjustments to the caps are permitted annually based on changes to the CPI for all urban consumers.

- Employees must be covered by Social Security with the 1.5% at 65 formula. Social Security is optional for all other benefit formulas. For employees covered by Social Security, the modified formula is the standard benefit. Under this type of formula, the final compensation is offset by $133.33 (or by one third if the final compensation is less than $400). Employers may contract for the full benefit with Social Security that will eliminate the offset applicable to the final compensation. For employees not covered by Social Security, the full benefit is paid with no offsets.

Auxiliary organizations of the CSUC system may elect reduced contribution rates, in which case the offset is $317 if members are not covered by Social Security or $513 if members are covered by Social Security.

- The Miscellaneous and PEPRA Safety service retirement benefit is not capped. The classic Safety service retirement benefit is capped at 90% of final compensation.

Vested Deferred Retirement

Eligibility for Deferred Status

A CalPERS member becomes eligible for a deferred vested retirement benefit when he or she leaves employment, keeps his or her contribution account balance on deposit with CalPERS, and has earned at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements).

Eligibility to Start Receiving Benefits

The CalPERS classic members and PEPRA Safety members become eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for deferred status and upon attainment of age 50 (55 for employees hired into a 1.5% at 65 plan). PEPRA Miscellaneous members become eligible to receive the deferred retirement benefit upon satisfying the eligibility requirements for deferred status and upon attainment of age 52.

Benefit

The vested deferred retirement benefit is the same as the service retirement benefit, where the benefit factor is based on the member's age at allowance commencement. For members who have earned service with multiple CalPERS employers, the benefit from each employer is calculated separately according to each employer's contract, and then added together for the total allowance.

Non-Industrial (Non-Job Related) Disability Retirement

Eligibility

A CalPERS member is eligible for Non-Industrial Disability Retirement if he or she becomes *disabled* and has at least 5 years of credited service (total service across all CalPERS employers, and with certain other retirement systems with which CalPERS has reciprocity agreements). There is no special age requirement. *Disabled* means the member is unable to perform his or her job because of an illness or injury, which is expected to be permanent or to last indefinitely. The illness or injury does not have to be job related. A CalPERS member must be actively employed by any CalPERS employer at the time of disability in order to be eligible for this benefit.

Standard Benefit

The standard Non-Industrial Disability Retirement benefit is a monthly allowance equal to 1.8% of final compensation, multiplied by *service*, which is determined as follows:

- *Service* is CalPERS credited service, for members with less than 10 years of service or greater than 18.518 years of service; or

- *Service* is CalPERS credited service plus the additional number of years that the member would have worked until age 60, for members with at least 10 years but not more than 18.518 years of service. The maximum benefit in this case is 33⅓% of final compensation.

Improved Benefit

Employers have the option of providing the improved Non-Industrial Disability Retirement benefit. This benefit provides a monthly allowance equal to 30% of final compensation for the first 5 years of service, plus 1% for each additional year of service to a maximum of 50% of final compensation.

Members who are eligible for a larger service retirement benefit may choose to receive that benefit in lieu of a disability benefit. Members eligible to retire, and who have attained the normal retirement age determined by their service retirement benefit formula, will receive the same dollar amount for disability retirement as that payable for service retirement. For members who have earned service with multiple CalPERS employers, the benefit attributed to each employer is the total disability allowance multiplied by the ratio of service with a particular employer to the total CalPERS service.

Industrial (Job Related) Disability Retirement

This is a standard benefit for Safety members except those described in Section 20423.6. For excluded Safety members and all Miscellaneous members, employers have the option of providing this benefit. An employer may choose to provide the increased benefit option or the improved benefit option.

Eligibility

An employee is eligible for Industrial Disability Retirement if he or she becomes disabled while working, where disabled means the member is unable to perform the duties of the job because of a work-related illness or injury, which is expected to be permanent or to last indefinitely. A CalPERS member who has left active employment within this group is not eligible for this benefit, except to the extent described below.

Standard Benefit

The standard Industrial Disability Retirement benefit is a monthly allowance equal to 50% of final compensation.

Increased Benefit (75% of Final Compensation)

The increased Industrial Disability Retirement benefit is a monthly allowance equal to 75% of final compensation for total disability.

Improved Benefit (50% to 90% of Final Compensation)

The improved Industrial Disability Retirement benefit is a monthly allowance equal to the Workman's Compensation Appeals Board permanent disability rate percentage (if 50% or greater, with a maximum of 90%) times the final compensation.

For a CalPERS member not actively employed in this group who became disabled while employed by some other CalPERS employer, the benefit is a return of accumulated member contributions with respect to employment in this group. With the standard or increased benefit, a member may also choose to receive the annuitization of the accumulated member contributions.

If a member is eligible for service retirement and if the service retirement benefit is more than the industrial disability retirement benefit, the member may choose to receive the larger benefit.

Post-Retirement Death Benefit

Standard Lump Sum Payment

Upon the death of a retiree, a one-time lump sum payment of $500 will be made to the retiree's designated survivor(s), or to the retiree's estate.

Improved Lump Sum Payment

Employers have the option of providing an improved lump sum death benefit of $600, $2,000, $3,000, $4,000 or $5,000.

Form of Payment for Retirement Allowance

Standard Form of Payment

Generally, the retirement allowance is paid to the retiree in the form of an annuity for as long as he or she is alive. The retiree may choose to provide for a portion of his or her allowance to be paid to any designated beneficiary after the retiree's death. CalPERS provides for a variety of such benefit options, which the retiree pays for by taking a reduction in his or her retirement allowance. Such reduction takes into account the amount to be provided to the beneficiary and the probable duration of payments (based on the ages of the member and beneficiary) made subsequent to the member's death.

Improved Form of Payment (Post-Retirement Survivor Allowance)

Employers have the option to contract for the post-retirement survivor allowance.

For retirement allowances with respect to service subject to the modified formula, 25% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, without a reduction in the retiree's allowance. For retirement allowances with respect to service subject to the full or supplemental formula, 50% of the retirement allowance will automatically be continued to certain statutory beneficiaries upon the death of the retiree, without a reduction in the retiree's allowance. This additional benefit is referred to as post-retirement survivor allowance (PRSA) or simply as survivor continuance.

In other words, 25% or 50% of the allowance, the continuance portion, is paid to the retiree for as long as he or she is alive, and that same amount is continued to the retiree's spouse (or if no eligible spouse, to unmarried child (ren) until they attain age 18; or, if no eligible child(ren), to a qualifying dependent parent) for the rest of his or her lifetime. This benefit will not be discontinued in the event the spouse remarries.

The remaining 75% or 50% of the retirement allowance, which may be referred to as the option portion of the benefit, is paid to the retiree as an annuity for as long as he or she is alive. Or, the retiree may choose to provide for some of this option portion to be paid to any designated beneficiary after the retiree's death. Benefit options applicable to the option portion are the same as those offered with the standard form. The reduction is calculated in the same manner but is applied only to the option portion.

Pre-Retirement Death Benefits

Basic Death Benefit

This is a standard benefit.

Eligibility

An employee's beneficiary (or estate) may receive the basic death benefit if the member dies while actively employed. A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this basic death benefit.

Benefit

The basic death benefit is a lump sum in the amount of the member's accumulated contributions, where interest is credited annually at the greater of 6% or the prevailing discount rate through the date of death, plus a lump sum in the amount of one month's salary for each completed year of current service, up to a maximum of six months' salary. For purposes of this benefit, one month's salary is defined as the member's average monthly full-time rate of compensation during the 12 months preceding death.

1957 Survivor Benefit

This is a standard benefit.

Eligibility

An employee's *eligible survivor(s)* may receive the 1957 Survivor benefit if the member dies while actively employed, has attained at least age 50 for classic and PEPRA Safety members and age 52 for PEPRA Miscellaneous members, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other retirement systems with which CalPERS has reciprocity agreements). A CalPERS member must be actively employed with the CalPERS employer providing this benefit to be eligible for this benefit. An eligible survivor means the surviving spouse to whom the member was married at least one year before death or, if there is no eligible spouse, to the member's unmarried child(ren) under age 18. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this 1957 Survivor benefit.

Benefit

The 1957 Survivor benefit is a monthly allowance equal to one-half of the unmodified service retirement benefit that the member would have been entitled to receive if the member had retired on the date of his or her death. If the benefit is payable to the spouse, the benefit is discontinued upon the death of the spouse. If the benefit is payable to dependent child(ren), the benefit will be discontinued upon death or attainment of age 18, unless the child(ren) is disabled. The total amount paid will be at least equal to the basic death benefit.

Optional Settlement 2 Death Benefit

This is an optional benefit.

Eligibility

An employee's *eligible survivor* may receive the Optional Settlement 2 Death benefit if the member dies while actively employed, has attained at least age 50 for classic and PEPRA Safety members and age 52 for PEPRA Miscellaneous members, and has at least 5 years of credited service (total service across all CalPERS employers and with certain other retirement systems with which CalPERS has reciprocity agreements). A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married at least one year before death. A member's survivor who is eligible for any other pre-retirement death benefit may choose to receive that death benefit instead of this Optional Settlement 2 Death benefit.

Benefit

The Optional Settlement 2 Death benefit is a monthly allowance equal to the service retirement benefit that the member would have received had the member retired on the date of his or her death and elected 100% to continue to the eligible survivor after the member's death. The allowance is payable as long as the surviving spouse lives, at which time it is continued to any unmarried child(ren) under age 18, if applicable. The total amount paid will be at least equal to the basic death benefit.

Special Death Benefit

This is a standard benefit for Safety members except those described in Section 20423.6. For excluded Safety members and all Miscellaneous members, employers have the option of providing this benefit.

Eligibility

An employee's *eligible survivor(s)* may receive the special death benefit if the member dies while actively employed and the death is job-related. A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married prior to the onset of the injury or illness that resulted in death. If there is no eligible spouse, an eligible survivor means the member's unmarried child(ren) under age 22. An eligible survivor who chooses to receive this benefit will not receive any other death benefit.

Benefit

The special death benefit is a monthly allowance equal to 50% of final compensation and will be increased whenever the compensation paid to active employees is increased but ceasing to increase when the member would have attained age 50. The allowance is payable to the surviving spouse until death at which time the allowance is continued to any unmarried child(ren) under age 22. There is a guarantee that the total amount paid will at least equal the basic death benefit.

If the member's death is the result of an accident or injury caused by external violence or physical force incurred in the performance of the member's duty, and there are *eligible* surviving child(ren) (*eligible* means unmarried child(ren) under age 22) in addition to an eligible spouse, then an additional monthly allowance is paid equal to the following:

- if 1 eligible child: 12.5% of final compensation
- if 2 eligible children: 20.0% of final compensation
- if 3 or more eligible children: 25.0% of final compensation

Alternate Death Benefit for Local Fire Members

This is an optional benefit available only to local fire members.

Eligibility

An employee's *eligible survivor(s)* may receive the alternate death benefit in lieu of the basic death benefit or the 1957 Survivor benefit if the member dies while actively employed and has at least 20 years of total CalPERS service. A CalPERS member who is no longer actively employed with any CalPERS employer is not eligible for this benefit. An *eligible survivor* means the surviving spouse to whom the member was married prior to the onset of the injury or illness that resulted in death. If there is no eligible spouse, an eligible survivor means the member's unmarried child(ren) under age 18.

Benefit

The Alternate Death benefit is a monthly allowance equal to the service retirement benefit that the member would have received had the member retired on the date of his or her death and elected Optional Settlement 2. (A retiree who elects Optional Settlement 2 receives an allowance that has been reduced so that it will continue to be paid after his or her death to a surviving beneficiary.) If the member has not yet attained age 50, the benefit is equal to that which would be payable if the member had retired at age 50, based on service credited at the time of death. The allowance is payable as long as the surviving spouse lives, at which time it is continued to any unmarried child(ren) under age 18, if applicable. The total amount paid will be at least equal to the basic death benefit.

Cost-of-Living Adjustments (COLA)

Standard Benefit

Retirement and survivor allowances are adjusted each year in May for cost of living, beginning the second calendar year after the year of retirement. The standard cost-of-living adjustment (COLA) is 2%. Annual adjustments are calculated by first determining the lesser of 1) 2% compounded from the end of the year of retirement or 2) actual rate of price inflation. The resulting increase is divided by the total increase provided in prior years. For any given year, the COLA adjustment may be less than 2% (when the rate of price inflation is low), may be greater than the rate of price inflation (when the rate of price inflation is low after several years of high price inflation) or may even be greater than 2% (when price inflation is high after several years of low price inflation).

Improved Benefit

Employers have the option of providing a COLA of 3%, 4%, or 5%, determined in the same manner as described above for the standard 2% COLA. An improved COLA is not available with the 1.5% at 65 formula.

Purchasing Power Protection Allowance (PPPA)

Retirement and survivor allowances are protected against price inflation by PPPA. PPPA benefits are cost-of-living adjustments that are intended to maintain an individual's allowance at 80% of the initial allowance at retirement adjusted for price inflation since retirement. The PPPA benefit will be coordinated with other cost-of-living adjustments provided under the plan.

Employee Contributions

Each employee contributes toward his or her retirement based upon the retirement formula. The standard employee contribution is as described below.

- The percent contributed below the monthly compensation breakpoint is 0%.
- The monthly compensation breakpoint is $0 for full and supplemental formula members and $133.33 for employees covered by the modified formula.
- The percent contributed above the monthly compensation breakpoint depends upon the benefit formula, as shown in the table below.

Benefit Formula	Percent Contributed above the Breakpoint
Miscellaneous, 1.5% at 65	2%
Miscellaneous, 2% at 60	7%
Miscellaneous, 2% at 55	7%
Miscellaneous, 2.5% at 55	8%
Miscellaneous, 2.7% at 55	8%
Miscellaneous, 3% at 60	8%
Miscellaneous, 2% at 62	50% of the Total Normal Cost
Miscellaneous, 1.5% at 65	50% of the Total Normal Cost
Safety, Half Pay at 55	Varies by entry age
Safety, 2% at 55	7%
Safety, 2% at 50	9%
Safety, 3% at 55	9%
Safety, 3% at 50	9%
Safety, 2% at 57	50% of the Total Normal Cost
Safety, 2.5% at 57	50% of the Total Normal Cost
Safety, 2.7% at 57	50% of the Total Normal Cost

The employer may choose to "pick-up" these contributions for classic members (Employer Paid Member Contributions or EPMC). EPMC is prohibited for new PEPRA members.

An employer may also include Employee Cost Sharing in the contract, where employees agree to share the cost of the employer contribution. These contributions are paid in addition to the member contribution.

Auxiliary organizations of the CSU system may elect reduced contribution rates, in which case the offset is $317 and the contribution rate is 6% if members are not covered by Social Security. If members are covered by Social Security, the offset is $513 and the contribution rate is 5%.

Refund of Employee Contributions

If the member's service with the employer ends, and if the member does not satisfy the eligibility conditions for any of the retirement benefits above, the member may elect to receive a refund of his or her employee contributions, which are credited with 6% interest compounded annually.

1959 Survivor Benefit

This is a pre-retirement death benefit available only to members not covered by Social Security. Any agency joining CalPERS subsequent to 1993 is required to provide this benefit if the members are not covered by Social Security. The benefit is optional for agencies joining CalPERS prior to 1994. Levels 1, 2, and 3 are now closed. Any new agency or any agency wishing to add this benefit or increase the current level may only choose the 4th or Indexed Level.

This benefit is not included in the results presented in this valuation. More information on this benefit is available on the CalPERS website.

- Retired Members and Beneficiaries

Summary of Valuation Data

	June 30, 2020	June 30, 2021
1. Active Members		
a) Counts	284	275
b) Average Attained Age	40.63	41.21
c) Average Entry Age to Rate Plan	30.21	30.14
d) Average Years of Credited Service	10.28	10.92
e) Average Annual Covered Pay	$82,913	$88,236
f) Annual Covered Payroll	23,547,159	24,265,000
g) Projected Annual Payroll for Contribution Year	25,543,712	26,360,864
h) Present Value of Future Payroll	230,926,805	238,540,767
2. Transferred Members		
a) Counts	177	173
b) Average Attained Age	42.53	43.14
c) Average Years of Credited Service	3.91	4.11
d) Average Annual Covered Pay	$87,846	$90,847
3. Terminated Members		
a) Counts	124	132
b) Average Attained Age	42.57	42.76
c) Average Years of Credited Service	2.38	2.57
d) Average Annual Covered Pay	$50,388	$51,907
4. Retired Members and Beneficiaries		
a) Counts	353	359
b) Average Attained Age	67.04	67.20
c) Average Annual Benefits	$30,147	$30,556
5. Active to Retired Ratio [(1a) / (4a)]	0.80	0.77

Counts of members included in the valuation are counts of the records processed by the valuation. Multiple records may exist for those who have service in more than one valuation group. This does not result in double counting of liabilities.

Average Annual Benefits represents benefit amounts payable by this plan only. Some members may have service with another agency and would therefore have a larger total benefit than would be included as part of the average shown here.

Active Members

Counts of members included in the valuation are counts of the records processed by the valuation. Multiple records may exist for those who have service in more than one valuation group. This does not result in double counting of liabilities.

All Years	$34,951	$9,956	$23,147	$0	$20,730	$23,054	$30,556

* Counts of members do not include alternate payees receiving benefits while the member is still working. Therefore, the total counts may not match information on C-1 of the report. Multiple records may exist for those who have service in more than one coverage group. This does not result in double counting of liabilities.

Appendix D

Glossary of Actuarial Terms

Glossary of Actuarial Terms

Accrued Liability *(Actuarial Accrued Liability)*
: The portion of the Present Value of Benefits allocated to prior years. Based on CalPERS funding policies, the accrued liability is the target level of assets on any valuation date.

Actuarial Assumptions
: Assumptions made about certain events that will affect pension costs. Assumptions generally can be broken down into two categories: demographic and economic. Demographic assumptions include such things as mortality, disability, and retirement rates. Economic assumptions include discount rate, salary growth, and inflation.

Actuarial Methods
: Procedures employed by actuaries to achieve certain funding goals of a pension plan. Actuarial methods include an actuarial cost method, an amortization policy, and an asset valuation method.

Actuarial Valuation
: The determination as of a valuation date of the Normal Cost, Accrued Liability, and related actuarial present values for a pension plan. These valuations are performed annually or when an employer is contemplating a change in plan provisions.

Amortization Bases
: Separate payment schedules for different portions of the Unfunded Accrued Liability (UAL). The total UAL of a rate plan can be segregated by cause. The impact of such individual causes on the UAL are quantified at the time of their occurrence, resulting in new amortization bases. Each base is separately amortized and paid for over a specific period of time. Generally, in an actuarial valuation, the separate bases consist of changes in UAL due to contract amendments, actuarial assumption changes, method changes, and/or gains and losses.

Amortization Period
: The number of years required to pay off an Amortization Base.

Classic Member (under PEPRA)
: A member who joined a public retirement system prior to January 1, 2013 and who is not defined as a new member under PEPRA. (See definition of New Member below.)

Discount Rate
: This is the rate used to discount the expected future benefit payments to the valuation date to determine the Projected Value of Benefits. The discount rate is based on the assumed long-term rate of return on plan assets, net of investment and administrative expenses. This rate is called the "actuarial interest rate" in Section 20014 of the California Public Employees' Retirement Law.

Entry Age
: The earliest age at which a plan member begins to accrue benefits under a defined benefit pension plan. In most cases, this is the age of the member on their date of hire.

Entry Age Actuarial Cost Method
: An actuarial cost method designed to fund a member's total plan benefit evenly over the course of his or her career. This method yields a total normal cost rate, expressed as a percentage of payroll, which is designed to remain level throughout the member's career.

Fresh Start
: A Fresh Start is when multiple amortization bases are combined into a single base and amortized over a new Amortization Period.

Funded Ratio
: Defined as the Market Value of Assets divided by the Accrued Liability. It is a measure of how well funded a rate plan is. A ratio greater than 100% means the rate plan has more assets than the target established by CalPERS

funding policies on the valuation date and the employer need only contribute the Normal Cost. A ratio less than 100% means assets are less than the funding target and contributions in addition to Normal Cost are required.

GASB 68

Statement No. 68 of the Governmental Accounting Standards Board. The accounting standard governing a state or local governmental employer's accounting and financial reporting for pensions.

New Member (under PEPRA)

A new member includes an individual who becomes a member of a public retirement system for the first time on or after January 1, 2013, and who was not a member of another public retirement system prior to that date, and who is not subject to reciprocity with another public retirement system.

Normal Cost

The portion of the Present Value of Benefits allocated to the upcoming fiscal year for active employees. The normal cost plus the required amortization of the UAL, if any, make up the required contributions.

Pension Actuary

A business professional proficient in mathematics and statistics who performs the calculations necessary to properly fund a pension plan and allow the plan sponsor to disclose its liabilities. A pension actuary must satisfy the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States with regard to pensions.

PEPRA

The California Public Employees' Pension Reform Act of 2013

Present Value of Benefits (PVB)

The total dollars needed as of the valuation date to fund all benefits earned in the past or expected to be earned in the future for *current* members.

Unfunded Accrued Liability (UAL)

The Accrued Liability minus the Market Value of Assets. If the UAL for a rate plan is positive, the employer is required to make contributions in excess of the Normal Cost.

Court Pension Contribution

Prepared by: Chad Rinde
Updated on: May 16, 2023

Background:

In May 2018 the County of Yolo adopted a pension funding policy in order to (1) bolster the ability for the County to pay annual actuarial determined contributions and (2) to accumulate resources in order to obtain long term savings from paying down the unfunded actuarial liability earlier.

Since July 1, 2018 the County charged an additional rate of payroll and begun to set aside the funds in a Section 115 Trust. The County has signed a Memorandum of Understanding with the Yolo Superior Courts to achieve the secondary objective above of paying down the unfunded actuarial liability. This memo serves to put forth options in order to approximate what a pay down could look like while preserve reserves intended by the Pension policy.

Calculation:

Balance in Pension 115 Trust as of April 30, 2023:	$ 6,028,413
Estimate of Additional Trust Contributions for 2022-23:	$ 5,466,209
Estimated Ending Value of Pension Trust as of June 30, 2023:	**$ 11,494,622**
Pension Policy Target Balance as of June 30, 2023:	$ 7,725,000
Funds Available for Current Year Contribution [(1)]:	$ 3,769,622

Assumptions:

We assume for purposes of the analysis that the County and the Court would make proportional contributions to the Miscellaneous Plan. We further assume that to maintain equity in the County, the County would make a proportional share to the Safety plan based on the UAL.

Miscellaneous Plan [(2)]: Court share = 6.8436%, County = 93.1564%
Miscellaneous UAL = $213,828,111 (76.51%), Safety UAL = $64,645,084 (23.49%)

Options:

		Miscellaneous Contribution		Safety Contribution	County Total Contribution
Option	Description	Courts	County		
A	County contributes maximum amount and Court matches proportionally	$276,930	$2,894,538	$875,084	$3,769,622
B	Court provides Budgeted Amount of $147,923	$147,923	$2,013,556	$663,614	$2,677,170

Note (1): Based on estimate as of May 16, 2023.
Note: (2) Calendar Year 2021 data was used for the 2022-23 budget and UAL shares between County and Court. Calendar Year 2022 data will be used for the 2023-24 budget.

County of Yolo

www.yolocounty.org

To: The Chair and Members of the Board of Supervisors

Consent-General Government 27.

Board of Supervisors **Financial Services**

Meeting Date: 06/06/2023
Brief Title: Adopt Amended Community Benefit Fund Policy
From: Chad Rinde, Chief Financial Officer, Department of Financial Services
Staff Contact: Chad Rinde, Chief Financial Officer, Department of Financial Services, x8050
Supervisorial District Impact: Countywide

Subject

Adopt amended Community Benefit Fund Policy. (No general fund impact) (Rinde)

Recommended Action

Adopt amended Community Benefit Fund Policy to add annual reporting requirement and certain other provisions.

Strategic Plan Goal(s)

In Support of All Goals (Internal Departments Only)

Reason for Recommended Action/Background

The Board of Supervisors initially funded the Community Benefit Fund program in the 2022-23 Adopted Budget (September 2022) and adopted the initial policy framework for the program in October 2022. Annually, the Board makes a discretionary decision about continuing the program and the level of funding for the program. Staff plan to include recommendations on the funding for next year's program as part of the Budget hearing on June 13.

As part of discussions with the Budget Ad-Hoc committee leading into the budget, there were discussions on the program and any enhancements needed. Given that this was the initial year of the program, it was not unexpected that improvements may be necessary to ensure the program is responsive to community needs as well as has a solid structure to ensure its continued success. During those discussions, two areas were suggested for policy improvements as follows:

- Annual Reporting Requirement - The Community Benefit Fund policy has been amended to include an annual reporting requirement where DFS will bring a report forward after the end of the fiscal year on the program's use. This will also bring transparency to any rollforward amounts still retained by districts for use in subsequent years. The report also will briefly summarize the organizations, needs, and amounts funded for transparency.
- Funding Acknowledgment - The Community Benefit Fund policy has been amended to note that where a recipient of Community Benefit Funds provides acknowledgment of the County in written materials or other forms that the source of funds is the County of Yolo Community Benefit Funds.

These two minor changes should improve clarity and transparency around the use of Community Benefit Funds, which overall has been a well utilized program and already contributed to numerous needs that were previously unaddressed.

Collaborations (including Board advisory groups and external partner agencies)

The Department of Financial Services collaborated with the County Administrator's Office on these recommended changes. These changes were discussed with the Budget Ad-Hoc Committee at their April 2023 meeting when the funding for the 2023-24 Community Benefit Fund was discussed. This provided an opportunity to discuss enhancements to the existing policy to address areas not contemplated in the original adoption.

Competitive Bid Process/Vendor Performance

Not applicable.

Department: Board of Supervisors

TYPE: POLICY **DATE:** June 6, 2023

A. PURPOSE

The purpose of this policy is to establish and document the eligible uses of the Community Benefit Fund. The Community Benefit Fund was established to provide funding to allow individual Supervisors to be responsive to community needs in a flexible manner that promotes the general welfare of the constituents of the County of Yolo. As used here, the terms "community needs" and "community benefit" are considered synonymous and shall be understood to include any public purpose that affects the welfare of a broad class of people.

B. APPLICABILITY

This policy applies to Community Benefit Funds set aside specifically for use in accordance with this policy in the County budget.

C. POLICY

1. Allowable Uses

The Community Benefit Fund is exclusively for one-time purchases, grants, or similar expenditures that provide a documented community benefit, including but not limited to:

- Community outreach events, information and education
- District-sponsored activities
- Grants and similar contributions to nonprofits

All expenditures from the Community Benefit Fund must be for a public purpose that affects the welfare of a broad class of people that live or work within the County of Yolo. To that end expenditures must meet the criteria of the *Policy on Allowing Charges Against County Funds* including:

a. Transaction is supported by information and documentation
b. Transaction is related to County business
c. Transaction is in compliance with laws and regulations
d. Transaction is reasonable
e. Transaction was appropriately authorized by individual supervisor

Purchases of food and meals must comply with the County *Policy on Travel and Expense Reimbursement*. Similarly, purchases of tickets must comply with the *Ticket Distribution and Disclosure Policy*.

Expenditures shall not be for any political purpose or to promote a local candidate, campaign or committee. Where recognition of contributors is provided, published materials and statements shall recognize the source of funding as the County of Yolo Community Benefit fund

2. Allocation

The amount appropriated into the Community Benefit shall be determined annually as part of the County budget process and shall be split evenly amongst the five (5) supervisorial districts. The recommended amount shall depend on the County's fiscal situation.

County staff shall confer annually with the Budget Ad-Hoc Committee to make a recommendation of the appropriate amount for deposit in the Community Benefit Fund. The maximum amount allocated to each individual district shall not exceed $25,000.

Any increase to a district's allocation shall require approval by the Board of Supervisors.

3. Rollforward

Supervisorial districts are permitted to rollforward unspent allocations up to a maximum of 50% of their authorized allocation to the next fiscal year. Allocations may be rolled forward no more than one-time.

4. Annual Report

The Department of Financial Services shall prepare an annual report for each fiscal year to the Board of Supervisors on the activities performed through the Community Benefit Fund. This summary report should include information on the use of the funds and the benefits derived, such as a brief description of community organizations and needs that were supported.

~~4.~~**5. Accounting**

Supervisorial districts are required to track their use of Community Benefit funds, to document a public purpose for each expenditure, grant, or similar allocation, and ensure they remain within their allocation. The Department of Financial Services shall establish separate ledgers in the accounting system to allow for tracking of funds by district.

TITLE: Community Benefit Fund

Department: Board of Supervisors

TYPE: POLICY **DATE:** June 6, 2023

A. PURPOSE

The purpose of this policy is to establish and document the eligible uses of the Community Benefit Fund. The Community Benefit Fund was established to provide funding to allow individual Supervisors to be responsive to community needs in a flexible manner that promotes the general welfare of the constituents of the County of Yolo. As used here, the terms "community needs" and "community benefit" are considered synonymous and shall be understood to include any public purpose that affects the welfare of a broad class of people.

B. APPLICABILITY

This policy applies to Community Benefit Funds set aside specifically for use in accordance with this policy in the County budget.

C. POLICY

1. Allowable Uses

The Community Benefit Fund is exclusively for one-time purchases, grants, or similar expenditures that provide a documented community benefit, including but not limited to:

- Community outreach events, information and education
- District-sponsored activities
- Grants and similar contributions to nonprofits

All expenditures from the Community Benefit Fund must be for a public purpose that affects the welfare of a broad class of people that live or work within the County of Yolo. To that end expenditures must meet the criteria of the *Policy on Allowing Charges Against County Funds* including:

a. Transaction is supported by information and documentation
b. Transaction is related to County business
c. Transaction is in compliance with laws and regulations
d. Transaction is reasonable
e. Transaction was appropriately authorized by individual supervisor

Purchases of food and meals must comply with the County *Policy on Travel and Expense Reimbursement*. Similarly, purchases of tickets must comply with the *Ticket Distribution and Disclosure Policy*.

Expenditures shall not be for any political purpose or to promote a local candidate, campaign or committee. Where recognition of contributors is provided, published materials and statements shall recognize the source of funding as the County of Yolo Community Benefit fund

2. Allocation

The amount appropriated into the Community Benefit shall be determined annually as part of the County budget process and shall be split evenly amongst the five (5) supervisorial districts. The recommended amount shall depend on the County's fiscal situation.

County staff shall confer annually with the Budget Ad-Hoc Committee to make a recommendation of the appropriate amount for deposit in the Community Benefit Fund. The maximum amount allocated to each individual district shall not exceed $25,000.

Any increase to a district's allocation shall require approval by the Board of Supervisors.

3. Rollforward

Supervisorial districts are permitted to rollforward unspent allocations up to a maximum of 50% of their authorized allocation to the next fiscal year. Allocations may be rolled forward no more than one-time.

To: The Chair and Members of the Board of Supervisors

Consent-General Government 28.
Board of Supervisors **Financial Services**

Meeting Date:	06/06/2023
Brief Title:	Adopt Amended Capital Administration Policy
From:	Chad Rinde, Chief Financial Officer, Department of Financial Services
Staff Contact:	Holly Alves, Accounting Manager, Department of Financial Services, x8219
Supervisorial District Impact:	Countywide

Subject
Adopt amended Capital Asset Administration Policy to establish intangible capital asset thresholds. (No general fund impact) (Rinde)

Recommended Action
Adopt amended Capital Asset Administration Policy to establish intangible capital asset thresholds.

Strategic Plan Goal(s)
In Support of All Goals (Internal Departments Only)

Reason for Recommended Action/Background
The policy on Capital Asset Administration describes the process for development of the capital improvement plan, roles and responsibilities, as well as defines the accounting treatment of capital assets, such as the thresholds for capitalization of fixed assets. This item is intended to update the fixed asset thresholds for specific items (leases and software) along with other minor revisions to the policy to bring current.

In the past year, the County faces two additional accounting standards that require the County to begin to account for the right to use certain intangible assets, including certain leases and software-based information technology arrangements (SBITA). In these types of arrangements, the County has obligated itself via a contract or agreement to pay for the utilization of this space or software. As these arrangements can be large, long-term, and difficult to change, the Government Accounting Standards Board (GASB) determined through GASB87 and GASB96 that local governments need to account for these agreements recognizing an intangible right to use and to record a liability. The local agency then consumes that right-to-use the facility or software over the time period where access is received while the liability is liquidated as payments are made pursuant to the agreement or contract.

This represents an additional accounting burden to identify these agreements, track the asset and liability over their life, and to perform financial reporting on these individual arrangements. As a result, local governments are allowed to establish an accounting threshold for these types of intangible assets for when these arrangements are significant enough to require this additional accounting treatment. After consulting with the external auditors, other peer counties, and extensive review of these accounting standards, the Department of Financial Services recommends establishing a capitalization threshold of $100,000 for GASB87 Lease arrangements and GASB96 Software Based Subscription Arrangements. The attached Capital Asset Administration Policy contains these changes in a redline version as well as contains a clean version for the Board's consideration.

Should the Board not approve these policy changes, this would require the Department of Financial Services to perform additional accounting and financial reporting for every lease and software agreement regardless of the dollar amount. This would result in inefficiencies of not focusing effort on the most significant arrangements and may require a re-evaluation of the accounting staff needed to perform these new standards. With this policy change, staff believe these additional accounting burdens can be accomplished with existing staff.

Collaborations (including Board advisory groups and external partner agencies)
The Department of Financial Services (DFS) collaborated with the County Administrator's Office on this

recommendation. In addition, DFS obtained input from the County's external audit firm LSL and the staff Capital Improvement Committee before bringing this forward.

Competitive Bid Process/Vendor Performance
Not applicable.

Fiscal Information
No Fiscal Impact

Fiscal Impact of this Expenditure	
Total cost of recommended action	$0
Amount budgeted for expenditure	$0
Additional expenditure authority needed	$0
On-going commitment (annual cost)	

Source of Funds for this Expenditure	
General Fund	$0

Further explanation as needed
There is no fiscal impact of this policy change. This change will reduce the accounting burden associated with new accounting standards required to be implemented by the County of Yolo for the 2022-23 and the 2023-24 fiscal years.

County of Yolo
Administrative Policies and Procedure Manual

TITLE: CAPITAL ASSET MANAGEMENT	DEPARTMENT: COUNTY ADMINISTRATIVE OFFICE
TYPE: **POLICY**	DATE: JUNE 6, 2023

A. POLICY STATEMENT

Yolo County's government is accountable for considerable investment in buildings, land, infrastructure, equipment and other capital assets. The preservation, maintenance, and future improvement of these assets are a primary responsibility of the County. Planning and implementing a sound capital asset management plan, policy, and program today will not only help Yolo County avoid emergencies and major costs in the future, but strategically plan for the future needs of the County.

The Yolo County Board of Supervisors (Board) in recognition of the need to develop and adopt a consolidated capital asset management plan, budget for its implementation, and incorporate its impact on the operating budget, established the ~~Three~~Five-year Capital Improvement Plan (CIP). The CIP includes capital projects that have been completed, are in the stages of implementation, and those projects to be implemented within the next ~~three~~ five fiscal years. Additionally, the CIP is used as a tool for the implementation of projects included in various Board-adopted plans (General Plan, County Strategic Plan, Information Technology ~~Strategic Plan, Tactical Plan~~Framework, Facilities plans, Parks Master Plan, Airport Master Plan, Cache Creek Area Management Plan, etc.). Yolo County's CIP is a dynamic ~~-~~document, where new projects are incorporated in the plan and previously submitted projects are updated. The CIP only includes projects that are over $200,000. Projects under this threshold are ordinarily contained in department budgets.

The CIP is prepared and updated annually by the Capital Projects Coordinator with assistance from the Capital Improvement Committee, and includes all projects meeting the definition as outlined herein. Considered a tactical planning tool, the CIP may be used by the Board to prioritize county-wide capital projects. The CIP also provides such detail as necessary regarding funding of projects. While the CIP does not indicate approval of a project, only projects included in the Board-approved CIP will be considered for funding with the exception of emergency needs. Final appropriations for projects are included in the respective department budgets submitted in the recommended budget.

B. PURPOSE

Establishing a capital asset policy aides in the provision of control and accountability over the County's capital assets to ensure compliance with State and Federal laws and to assist departments in gathering and maintaining information required for maintenance, replacement, insurance, cost recovery, rate setting, and financial reporting.

The purpose of this policy is:

1. To describe the policies and procedures utilized in the County's CIP;
2. To put in place guidelines for the budgeting, financing, and accounting of the County's capital assets; and
3. To provide County officials and employees in elected offices, county divisions, departments, and special districts criteria for the prioritization of County CIP projects.

This capital asset policy ~~(CAP)~~ is in accordance with Generally Accepted Accounting Principles (GAAP) for proper recording, valuation, depreciation, useful lives, retirements and disposals, and financial reporting.

C. APPLICABILITY

The following policy applies to all County officials and employees in elected offices, County divisions, departments and special districts for whom the Board is required to adopt an annual budget that includes capital asset management plan items. In situations where the Board serves as the entity's governing body, projects meeting the definitions outlined herein must be presented to the Board for approval.

D. DEFINITIONS

Capital Assets: The term capital assets include tangible assets such as land, improvements to land, building, building improvements, vehicles, machinery, equipment, works of art and historical treasures, infrastructure, and intangible assets such as software, easements and land use rights, that are used in operations and have initial useful lives extending beyond a single reporting year.

Capital Expenditures: Expenditures incurred for the improvement to, or acquisition of, capital assets.

Capital Improvement Plan Amendment: A change of the adopted CIP that adds or deletes a project, modifies the total adopted budget of a project, or alters the approved scope of a project.

Capital Project: A Capital Project is the use of resources to acquire, construct, or improve a capital asset. Each project has a specific purpose, justification, and cost. Projects propose physical improvements in different elements of the County's infrastructure. Improvements include, but are not limited to, construction, reconstruction, rehabilitation, modification, renovation, expansion, replacement, extension of streets, bridges, buildings, sidewalks, playgrounds, traffic signals and signs, ramps, lights; acquisition of land, buildings with associated relocation, demolition; and improvements such as landscaping, fencing and paving.

Capitalization: Capitalization refers to the act of recording outlays as capital assets based on certain criteria for financial reporting purposes. The capitalization threshold is the dollar amount below which capitalization does not occur.

E. ADMINISTRATIVE PROCEDURES

I. Capital Improvement Plan Development

The Capital Projects Coordinator will solicit Capital Improvement Plan Project Questionnaires from Capital Project Managers pursuant to the timeline established in the annual budget preparation schedule.

a) Capital Improvement Plan Project Questionnaires will be submitted in a format and with content to be determined by the Capital Projects Coordinator.
b) The Capital Projects Coordinator will present all submitted Capital Improvement Plan Project Questionnaires to the Capital Improvement Committee for review and prioritization.
c) The Capital Improvement Committee will evaluate each submitted Capital Improvement Plan Project Questionnaire and assess its relative importance based on the approved Capital Project Evaluation and Prioritization Criteria, which may be revised by the County Administrator.
d) The Chief Financial Officer will review and recommend funding sources for each Capital Improvement Plan Project Questionnaire, and may propose that the timeline for project completion be altered to match the availability of funding.
e) Projects deemed to be insufficiently planned, or which are proposed for completion more than ~~three~~ five years in the future, or for which sufficient available funding cannot be identified, may be placed on a 'watch list' containing known projects that may be added to the capital improvement program in the future.
f) The final proposed Capital Improvement Plan will be submitted to the County Administrator for review and, as the County Administrator deems appropriate, revision.

II. Capital Improvement Plan Adoption

a) The County Administrator will annually submit a recommended ~~three~~five-year Capital Improvement Plan for review by the Board pursuant to the timeline established in the annual budget preparation schedule.
b) The Capital Improvement Plan will provide:
    1. A statement of the objectives of the Capital Improvement Plan and its relationship with the Board's Strategic Planning Goals and Objectives and approved County Plans
    2. An implementation schedule for each of the proposed capital improvements
    3. An estimate of the costs and sources of revenue for financing each project, and an estimate of the impact of each project on the County operating budget
    4. A schedule of debt issuance proposed to fund any portion of the CIP
    5. An estimate of the impact of proposed debt issuance on the debt ~~ceiling~~ limit established by the County's debt policy.

III. Amending the Adopted Capital Improvement Plan

a) No work on a capital project shall be undertaken if it is inconsistent with the approved scope of the project or if it will require expenditures that, when combined with all other project costs previously incurred or reasonably expected to be incurred, would exceed the approved project budget.

b) The approved scope and budget of a project may be revised by amendment.
   1. The Capital Project Manager will submit proposed amendments in a form, and with content, to be determined by the Capital Projects Coordinator.
   2. The Capital Projects Coordinator will assess the need for the amendment and make a recommendation for approval, denial, or revision to the Capital Improvement Committee.
   3. The Capital Improvement Committee will review the proposed amendment and recommendation, and will by majority vote recommend approval, denial, or revision to the County Administrator.
   4. The County Administrator will approve or deny the recommended action.
   5. If approved, the project amendment will be placed by the Capital Projects Coordinator on a Board agenda for approval or denial.

IV. Capital Project Evaluation and Prioritization Criteria:

All Capital Improvement Plan Project Questionnaires will be evaluated based on their ability to foster the achievement of the Board's Strategic Planning Goals:

Yolo County Strategic Planning Goals

1. Thriving Residents
2. Safe Communities
3. Sustainable Environment
4. Flourishing Agriculture
5. Robust Economy

~~1. Advance innovation~~
~~2. Champion job creation and economic opportunities~~
~~3. Collaborate to maximize success~~
~~4. Enhance and sustain the safety net~~
~~5. Preserve and ensure safe and crime free communities~~
~~6. Preserve and support agriculture~~
~~7. Protect open space and the environment~~
~~8. Provide fiscally sound, dynamic and responsive services~~

Departments should identify not only which goal the project is in-line with, but also whether the project satisfies multiple goals in their completed Capital Improvement Plan Project Questionnaires.

In addition to assessing each project's alignment with the Board's Strategic Planning Goals, the Capital Improvement Committee will review and prioritize each project based on the following criteria:

a) Project Need:
Is this project needed? Will the project bring the County into compliance with an existing or new legal mandate? Does the project enhance or maintain a current asset of Yolo County? Does the project address an existing or potential threat to lives and property? What are the potential benefits of the project? What problems does this project solve? What are the impacts of the deferral of this project?

b) Project Readiness:
Has the appropriate project planning been completed? Is this project ready to be implemented? What is needed to make this project ready for implementation? Who will be involved in management and implementation of this project? Is this project connected to other capital projects?

c) Project Funding;
What are the project's impacts on the departments operating budget? How does the project impact the General Fund? Does this project require additional FTEs? Does this project have funding available? What applications, if any, have been submitted for project funding (i.e. grant applications)? Are you requesting funding through the CIP?

d) Project Sustainability:
Is this project based on not only what is makes the most sense now, but what makes the most sense in the future? Does this project represent a fiscally responsible decision?

e) Project Outcomes:
What are the expected outcomes or goals of the project? How will this project allow your department to meet standards for performance and customer service?

f) Quality and completeness of proposal

The Capital Improvement Plan Project Questionnaire provides opportunities for Departments to address the criteria listed above and provide the Capital Projects Coordinator and Capital Improvement Committee with a detailed narrative on the need, readiness, funding, sustainability, and outcomes of their proposed project.

V. Capital Improvement Plan Project Questionnaire

Capital Improvement Plan Project Questionnaires will be disseminated by the Capital Projects Coordinator pursuant to the timeline established in the annual budget preparation schedule. Departments can also access the questionnaire on the Forms & Documents section of Inside Yolo.

A Capital Improvement Plan Project Questionnaire must be submitted for all new projects and Capital Project Managers are expected to submit a revised Capital Improvement Plan Project Questionnaire for any previously approved project whose scope and budget must be revised. For projects that fall under the equipment, improvements (other than buildings), and infrastructure capital asset categories listed in Section G., a short form version of the Capital Improvement Plan Project Questionnaire will replace the full version. This form will also be available on the Forms & Document section of Inside Yolo.

Based on the complexity and magnitude of the project, and whether it meets the dollar of significance standard as defined by the Capital Improvement Committee, the project may require the Capital Project Management detailed below.

F. CAPITAL PROJECT MANAGEMENT

I. Responsibilities

Capital Projects Coordinator – An individual, ~~appointed~~ designed by the County Administrator (CAO), to guide the preparation of the CIP and the completion of approved capital projects.

Capital Improvement Committee – A body comprised of the Chief Financial Officer, CAO Designee, Capital Projects Coordinator, General Services Director, and other individuals appointed by the CAO, responsible for the review of all CIP Project Proposals, and the development and recommendation of the CIP and any CIP amendments.

Operating Project Review Committee – A body comprised of the Chief Financial Officer and Capital Projects Coordinator responsible for the review of all active CIP projects. Presentations will be made quarterly to the board on the status of each active CIP project.

II. Project Management

Capital Project Manager – Each CIP project will have a formally identified project manager selected by the project's department, responsible for the day-to-day management of the CIP project.

III. Reporting

The following reporting will be completed with regard to the Capital Improvement Plan for capital projects included in the Board approved CIP:

a) Within 90 days of project completion the Capital Projects Coordinator will close out all open contracts and the Chief Financial Officer will transfer any remaining unused budget authority to a capital project reserve account, from which it may be reallocated to other projects.
b) The Chief Financial Officer will provide the Board with a report each quarter showing the status of each approved capital project.

G. CAPITAL ASSET CATEGORIES

Yolo County provides for the following Capital Asset categories:

I. Buildings

Buildings are capital assets with physical properties of a permanent nature, such as structures, structural attachments, storage facilities, storage tanks, towers, etc. Buildings are capitalized when the acquisition and ancillary costs, or appraised fair market value at time of donation, exceed $10,000.

Includes (not all inclusive):

a) Acquisition price if purchased, legal fees and title search.

Includes, if constructed (not all inclusive):

b) Site preparation, surveying fees, soil testing
c) Architectural, engineering, cost of construction, permits and licenses
d) Construction management, direct and indirect (except general administration costs), legal fees
e) Condemnation costs
f) Insurance during construction
g) Cost of fixtures attached to and forming a permanent part of the structure (e.g., boilers, lighting fixtures, plumbing, shelving – if attached, air conditioning, heating systems, etc.)

Additions are extensions of an existing unit which increases the unit's capacity. Costs include the same items as if constructed new and are capitalized if costs exceed $10,000.

Improvements (or betterments) are capitalized expenditures if it materially adds value to the property or appreciably extends its life. The cost of replacing an existing component with one of higher quality is to be added to the value of the asset when the original cost of the replaced component can be specifically identified. If the original cost of the component cannot be identified, the expenditure is treated as maintenance though the asset's life may be extended. Replacing part of an existing asset with another of like quality is not betterment, even though the useful life is extended. All betterments are capitalized when costs exceed $10,000. Improvements are added to the cost of the related structure rather than treated as separate asset.

II. Construction (or development) in progress **–**

This class is used to accumulate costs incurred to construct or develop a capital asset before it is substantially ready to be placed into service.

III. Energy Infrastructure and Systems

This class of capital assets refers to infrastructure, systems, and improvements that result in increased energy efficiency, power generation and distribution, and/or reductions in greenhouse gas emissions. Projects may include: the installation or electric vehicle supple equipment (EVSE); solar power systems; and other alternate energy systems.

IV. Equipment

Tangible personal property which is moveable or, if attached, is readily detachable without appreciable impairment to the unit to which it is attached, has a useful life of more than one (1) year, and a value of $5,000 or more. Equipment includes vehicles, heavy machinery, furnishings, computers, office equipment, instruments, technical and diagnostics equipment, and similar moveable items. Equipment should be recorded at historical cost plus ancillary charges, net of all trade discounts and rebates necessary to place the asset into its intended location and condition for use.

Includes (not all inclusive):

a) Preparation costs
b) Freight or other transportation charges
c) All taxes
d) Installation costs

Exception: Yolo County does not capitalize partitions and other office landscaping and workstations or library books.

V. Improvements other than buildings (land improvements)

Includes permanent (non-moveable) improvements, other than buildings, that add value to land, but do not have an indefinite life. Examples include fences, retaining walls, parking lots, and most landscaping. All improvements to land are capitalized if costs related to a specific improvement exceed $5,000.

VI. Infrastructure

Long-lived capital assets that normally are stationary in nature and can be preserved for a significantly greater number of years than most other capital assets are infrastructure. Infrastructure with costs exceeding $25,000 is capitalized. Infrastructure assets include roads, bridges, tunnels, drainage and flood control systems (dams), underground pipe (other than

related to utilities), water and sewer systems, traffic signals and lighting systems. The County has elected to not capitalize infrastructure acquired prior to July 1, 1980.

Original cost may be estimated if records are unavailable or inadequate. Expenditures that are capital in nature (additions and improvements) should be capitalized as part of the infrastructure asset if they increase the capacity or efficiency of the related infrastructure asset and costs exceed $25,000.

Includes (not all inclusive):

a) Architectural, engineering and surveyor fees
b) Condemnation costs
c) Legal fees
d) Construction costs
e) Permits and licenses
f) Appurtenances (e.g., traffic signs, signals, street signs, grade separations)

VII. Intangible capital assets

Software, licenses of commercially available software, easements and land use rights, and other purchased intangible assets are valued at historical cost, including all appropriate ancillary costs. Intangible assets with cost exceeding $100~~5~~,000 are capitalized:

a) Software (pursuant to GASB 96)
~~a)~~b) Leases (pursuant to GASB 87)
~~b)~~c) Easements and land use rights

VIII. Land

Land is the investment held in fee title in real estate, other than structures and improvements, including land acquired for infrastructure purposes. Any rights (e.g., mineral rights) purchased with the land are not valued separately unless they are acquired separately. Normally land is characterized by indefinite life and not depreciated. Land used as a landfill or used as a source of gravel, or used in other ways that impairs the land, may need to be depreciated and classified under a separate asset category other than land. Land is capitalized regardless of cost and should be valued at fair value at date of acquisition.

Include (not all inclusive):

a) Acquisition price or estimated fair market value (FMV) if donated.
b) Appraisal negotiation, legal fees, title search and surveying fees.
c) Costs of obtaining consents and payments for condemnation costs
d) Filing costs.
e) Basic site improvements, including the cost of removing, relocating, or reconstructing the property of others (e.g. power lines).

IX. Works of art, historical treasures, and similar assets described as a collection

The County has elected to not capitalize these assets regardless of costs as long as the collections meet the following criteria:

a) The purpose of the collection is display or research;
b) The collection is being adequately maintained; and
c) The proceeds from the sale of collection items will be applied to acquire new items.

Yolo County does not classify maintenance as a capital asset. Maintenance includes expenditures, which neither materially add to the value of property nor appreciably prolong its life, but merely keep it in an ordinary efficient operating condition.

H. CAPITAL BUDGETING

For each fiscal year the Board shall include any capital project funding as part of the annual budget process. The Capital Budget is the first year of a three year plan for capital expenditures. These capital expenditures are to be incurred over a given fiscal year from funds appropriated by the Board for projects scheduled in the same year. All capital expenditures to be incurred during a given fiscal year will be included in the County's annual budget document. The Capital Improvement Committee shall recommend annual ongoing funding levels for each of the capital asset categories identified within the CIP. The Board will consider approval of these

funding levels during their annual review of the CIP.

Preparing and maintaining the Capital Budget is an imperative to continue the County's strong fiscal management practices. Central to this management effort is providing accurate and thorough justifications for proposed capital projects, making the capital budgeting cycle transparent and straightforward. The County will develop a process for ensuring that capital investments provide the maximum community benefit and that appropriate supporting policies are implemented.

I. CAPITAL FINANCING

The County shall include with each annual capital budget the long-term plan for CIP financing, which includes a multi-year financial forecast for the major funds available to the CIP. The capital financing strategy should promote financial strength and flexibility; limit the cost of acquiring capital assets while meeting community needs; and strengthening the County's standing with bond rating agencies, investors, and community stakeholders.

Financial analysis of funding sources is conducted for all proposed major capital improvement projects. The CIP shall be updated and priorities reviewed annually in light of changes in needs, available funding, or available staffing. The Board has established the Operating Project Review Committee to review the status of all projects. County financial staff determines the funding sources and, if not available, provides input toward scope changes to meet the fiscal constraints.

A detailed Capital Improvement Plan Project Questionnaire must be submitted annually for each project before project funds can be expended. Any costs of operating and maintaining the projects listed in the plan should be identified within this proposal, to ensure that adequate funds will be available for ongoing costs relating to the projects. When considering the priority and funding of each capital project, the County shall consider the operating impacts (i.e., increased staff, facilities maintenance, and outside rentals) of the project.

Financing Plan

Each capital project shall identify the financing plan to be utilized in funding the project. Available options include:

a) Pay-as-you-go financing. Funded from the operating budget using fund balance and/or capital reserves
b) Inter-fund borrowing
c) Debt financing. In accordance with the County policy on *Borrowing, Debts and Obligations*
d) Public-Private partnerships and economic development
e) Federal and other intergovernmental grants
f) Any combination of the above

Financing shall be designed to allow proper matching of benefits and costs. A project's financing term shall never exceed the estimated useful life of the capital asset.

J. ACCOUNTING FOR CAPITAL ASSETS

I. Capitalization Thresholds

Capital assets are recorded at historical cost or at estimated historical cost if actual historical cost is not available. Contributed capital assets are valued at their estimated fair market value on the date contributed. Capital include assets with an initial individual cost of more than $10,000 for land, structures, improvements and easements; infrastructure with a cost of $25,000 or more; and equipment with a cost greater than $5,000 and leases and software subscription arrangements with a cost greater than $100,000 ~~software with a cost greater than $5,000~~ and an estimated useful life in excess of one year.

II. Capital Asset Depreciation and Estimated Useful Life

Capital assets used in operations are depreciated and amortized using the straight-line method over the lesser of the capital lease period or their estimated useful lives in the government-wide statements and the proprietary funds.

The County's depreciation policy for Capital Assets, including estimated useful lives, is detailed below:

Asset Type	**Method**	**Useful Life**
Nondepriciable Capital Assets		
Land	N/A	N/A
Easements in perpetuity	N/A	N/A
Construction (or development) in progress	N/A	N/A
Asset Type	**Method**	**Useful Life**
Depreciable Capital Assets		
Land improvements	Straight line, full month convention	10 – 40 years
Buildings	Straight line, full month convention	10 – 40 years
Infrastructure	Straight line, full year convention	10 – 50 years
Equipment	Straight line, full month convention	2 – 20 years
Software	Straight line, full month convention	Life of License/Subscription, or 2-7 years ~~or 2-7 years~~
Leases	Straight line, full month convention	Life of Lease

The County considers salvage value immaterial.

III. Capital Asset Control and Accountability

The Department of Financial Services maintains an inventory of all capital assets, which is updated annually based on certifications from all departments.

Land and Buildings

All acquisitions and disposals of land and buildings must be approved by the Board of Supervisors. The Department of Financial Services will review all minutes to ensure that land and buildings are acquired and disposed of in accordance with Board instructions and make the necessary changes to the land and buildings listings. As part of the budget process, County departments submit space requirements to General Services, who will review all requirements and determine whether additional space is required through lease or acquisition of real property.

Federally funded real estate general requirements:

a) Title to real property funded from federal funds shall vest with the County and shall be used only for authorized purpose and shall not be encumbered without approval of federal awarding agency.
b) Approval of the federal awarding agency is required to use the property for other purposes when the County determines it is no longer needed for the original purpose. Use is limited to federal programs consistent with those sponsored by the federal awarding agency.
c) When the property is no longer needed the County shall request disposition instructions from the federal awarding agency.

In addition to the above general requirements, some awards may have more stringent requirements that will need to be complied with.

Equipment

All acquisitions of equipment must be made in accordance with County policies and procedures and State and Federal regulations. At a minimum all equipment purchases shall be approved by the County Administrator and acquired in accordance with County procurement procedures.

Departments shall notify the Purchasing Agent of all equipment transfers, trade-ins and disposals.

Federally funded equipment general requirements:

a) Title to equipment funded from federal funds shall vest with the County.
b) The equipment shall not be used to service non-federal entities for a fee that is less than private companies charge for equivalent services.

c) The County shall use the equipment for which it was intended as long as it is needed, whether or the not the purpose continues to be supported by federal funds and shall not be encumbered without approval of the federal awarding

agency. When no longer needed for the original purpose the County shall use the equipment in connection with other federally sponsored programs in the following order of priority:

1. Activities sponsored by the federal awarding agency which funded the equipment, then
2. Activities sponsored by other federal awarding agencies.

d) When acquiring replacement equipment, the County may use the equipment to be replaced as trade-in or sell the equipment and use the proceeds to offset the cost of the replacement equipment subject to the federal awarding agency.
e) Equipment records shall include the following:

1. A description of the equipment
2. Serial number, model number or other identification number
3. Source of the equipment, award number, CFDA number
4. Whether title vests with the County or awarding agency
5. Acquisition date and cost
6. Information to determine the federal participation percentage
7. Location and condition of the equipment and the date the information was reported (part of physical inventory)
8. Ultimate disposition data

f) Equipment owned by federal agency shall be identified to indicate federal ownership
g) Physical inventory of the equipment and reconciliation to equipment records shall be conducted at least once every two years.
h) A control system shall be in effect to ensure adequate safeguard to prevent loss, damage or theft. Any loss, damage or theft shall be fully investigated and documented.
i) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.
j) Where the County is authorized or required to sell the equipment, proper sales procedures shall be established to provide for competition to the extent practicable and result in the highest possible return.
k) When the equipment is no longer needed by the County for the original intended purpose, the equipment may be used for other activities in accordance with the following standards.

1. Equipment with a current fair market value (FMV) exceeding $5,000, the County may retain the equipment for other uses provided that compensation is made to the original federal awarding agency. Compensation shall be computed by applying the federal participation to the current FMV.
2. If the County no longer needs the equipment, the County shall request disposition instructions from the federal awarding agency.

In addition to the above general requirements, some awards may have more stringent requirements that will need to be complied with.

County of Yolo
Administrative Policies and Procedure Manual

TITLE: CAPITAL ASSET MANAGEMENT	DEPARTMENT: COUNTY ADMINISTRATIVE OFFICE
TYPE: **POLICY**	DATE: JUNE 6, 2023

A. POLICY STATEMENT

Yolo County's government is accountable for considerable investment in buildings, land, infrastructure, equipment and other capital assets. The preservation, maintenance, and future improvement of these assets are a primary responsibility of the County. Planning and implementing a sound capital asset management plan, policy, and program today will not only help Yolo County avoid emergencies and major costs in the future, but strategically plan for the future needs of the County.

The Yolo County Board of Supervisors (Board) in recognition of the need to develop and adopt a consolidated capital asset management plan, budget for its implementation, and incorporate its impact on the operating budget, established the Five-year Capital Improvement Plan (CIP). The CIP includes capital projects that have been completed, are in the stages of implementation, and those projects to be implemented within the next five fiscal years. Additionally, the CIP is used as a tool for the implementation of projects included in various Board-adopted plans (General Plan, County Strategic Plan, Information Technology Framework, Facilities plans, Parks Master Plan, Airport Master Plan, Cache Creek Area Management Plan, etc.). Yolo County's CIP is a dynamic document, where new projects are incorporated in the plan and previously submitted projects are updated. The CIP only includes projects that are over $200,000. Projects under this threshold are ordinarily contained in department budgets.

The CIP is prepared and updated annually by the Capital Projects Coordinator with assistance from the Capital Improvement Committee, and includes all projects meeting the definition as outlined herein. Considered a tactical planning tool, the CIP may be used by the Board to prioritize county-wide capital projects. The CIP also provides such detail as necessary regarding funding of projects. While the CIP does not indicate approval of a project, only projects included in the Board-approved CIP will be considered for funding with the exception of emergency needs. Final appropriations for projects are included in the respective department budgets submitted in the recommended budget.

B. PURPOSE

Establishing a capital asset policy aides in the provision of control and accountability over the County's capital assets to ensure compliance with State and Federal laws and to assist departments in gathering and maintaining information required for maintenance, replacement, insurance, cost recovery, rate setting, and financial reporting.

The purpose of this policy is:

1. To describe the policies and procedures utilized in the County's CIP;
2. To put in place guidelines for the budgeting, financing, and accounting of the County's capital assets; and
3. To provide County officials and employees in elected offices, county divisions, departments, and special districts criteria for the prioritization of County CIP projects.

This capital asset policy is in accordance with Generally Accepted Accounting Principles (GAAP) for proper recording, valuation, depreciation, useful lives, retirements and disposals, and financial reporting.

C. APPLICABILITY

The following policy applies to all County officials and employees in elected offices, County divisions, departments and special districts for whom the Board is required to adopt an annual budget that includes capital asset management plan items. In situations where the Board serves as the entity's governing body, projects meeting the definitions outlined herein must be presented to the Board for approval.

D. DEFINITIONS

Capital Assets: The term capital assets include tangible assets such as land, improvements to land, building, building improvements, vehicles, machinery, equipment, works of art and historical treasures, infrastructure, and intangible assets such as software, easements and land use rights, that are used in operations and have initial useful lives extending beyond a single reporting year.

Capital Expenditures: Expenditures incurred for the improvement to, or acquisition of, capital assets.

Capital Improvement Plan Amendment: A change of the adopted CIP that adds or deletes a project, modifies the total adopted budget of a project, or alters the approved scope of a project.

Capital Project: A Capital Project is the use of resources to acquire, construct, or improve a capital asset. Each project has a specific purpose, justification, and cost. Projects propose physical improvements in different elements of the County's infrastructure. Improvements include, but are not limited to, construction, reconstruction, rehabilitation, modification, renovation, expansion, replacement, extension of streets, bridges, buildings, sidewalks, playgrounds, traffic signals and signs, ramps, lights; acquisition of land, buildings with associated relocation, demolition; and improvements such as landscaping, fencing and paving.

Capitalization: Capitalization refers to the act of recording outlays as capital assets based on certain criteria for financial reporting purposes. The capitalization threshold is the dollar amount below which capitalization does not occur.

E. ADMINISTRATIVE PROCEDURES

I. Capital Improvement Plan Development

The Capital Projects Coordinator will solicit Capital Improvement Plan Project Questionnaires from Capital Project Managers pursuant to the timeline established in the annual budget preparation schedule.

a) Capital Improvement Plan Project Questionnaires will be submitted in a format and with content to be determined by the Capital Projects Coordinator.
b) The Capital Projects Coordinator will present all submitted Capital Improvement Plan Project Questionnaires to the Capital Improvement Committee for review and prioritization.
c) The Capital Improvement Committee will evaluate each submitted Capital Improvement Plan Project Questionnaire and assess its relative importance based on the approved Capital Project Evaluation and Prioritization Criteria, which may be revised by the County Administrator.
d) The Chief Financial Officer will review and recommend funding sources for each Capital Improvement Plan Project Questionnaire, and may propose that the timeline for project completion be altered to match the availability of funding.
e) Projects deemed to be insufficiently planned, or which are proposed for completion more than five years in the future, or for which sufficient available funding cannot be identified, may be placed on a ‘watch list’ containing known projects that may be added to the capital improvement program in the future.
f) The final proposed Capital Improvement Plan will be submitted to the County Administrator for review and, as the County Administrator deems appropriate, revision.

II. Capital Improvement Plan Adoption

a) The County Administrator will annually submit a recommended five-year Capital Improvement Plan for review by the Board pursuant to the timeline established in the annual budget preparation schedule.
b) The Capital Improvement Plan will provide:
    1. A statement of the objectives of the Capital Improvement Plan and its relationship with the Board’s Strategic Planning Goals and Objectives and approved County Plans
    2. An implementation schedule for each of the proposed capital improvements
    3. An estimate of the costs and sources of revenue for financing each project, and an estimate of the impact of each project on the County operating budget
    4. A schedule of debt issuance proposed to fund any portion of the CIP
    5. An estimate of the impact of proposed debt issuance on the debt limit established by the County’s debt policy.

III. Amending the Adopted Capital Improvement Plan

a) No work on a capital project shall be undertaken if it is inconsistent with the approved scope of the project or if it will require expenditures that, when combined with all other project costs previously incurred or reasonably expected to be incurred, would exceed the approved project budget.
b) The approved scope and budget of a project may be revised by amendment.
    1. The Capital Project Manager will submit proposed amendments in a form, and with content, to be determined by the Capital Projects Coordinator.
    2. The Capital Projects Coordinator will assess the need for the amendment and make a recommendation for approval, denial, or revision to the Capital Improvement Committee.
    3. The Capital Improvement Committee will review the proposed amendment and recommendation, and will by majority vote recommend approval, denial, or revision to the County Administrator.
    4. The County Administrator will approve or deny the recommended action.
    5. If approved, the project amendment will be placed by the Capital Projects Coordinator on a Board agenda for approval or denial.

IV. Capital Project Evaluation and Prioritization Criteria:

All Capital Improvement Plan Project Questionnaires will be evaluated based on their ability to foster the achievement of the Board's Strategic Planning Goals:

Yolo County Strategic Planning Goals

1. Thriving Residents
2. Safe Communities
3. Sustainable Environment
4. Flourishing Agriculture
5. Robust Economy

Departments should identify not only which goal the project is in-line with, but also whether the project satisfies multiple goals in their completed Capital Improvement Plan Project Questionnaires.

In addition to assessing each project's alignment with the Board's Strategic Planning Goals, the Capital Improvement Committee will review and prioritize each project based on the following criteria:

a) Project Need:
Is this project needed? Will the project bring the County into compliance with an existing or new legal mandate? Does the project enhance or maintain a current asset of Yolo County? Does the project address an existing or potential threat to lives and property? What are the potential benefits of the project? What problems does this project solve? What are the impacts of the deferral of this project?

b) Project Readiness:
Has the appropriate project planning been completed? Is this project ready to be implemented? What is needed to make this project ready for implementation? Who will be involved in management and implementation of this project? Is this project connected to other capital projects?

c) Project Funding;
What are the project's impacts on the departments operating budget? How does the project impact the General Fund? Does this project require additional FTEs? Does this project have funding available? What applications, if any, have been submitted for project funding (i.e. grant applications)? Are you requesting funding through the CIP?

d) Project Sustainability:
Is this project based on not only what is makes the most sense now, but what makes the most sense in the future? Does this project represent a fiscally responsible decision?

e) Project Outcomes:
What are the expected outcomes or goals of the project? How will this project allow your department to meet standards for performance and customer service?

f) Quality and completeness of proposal

The Capital Improvement Plan Project Questionnaire provides opportunities for Departments to address the criteria listed above and provide the Capital Projects Coordinator and Capital Improvement Committee with a detailed narrative on the need, readiness, funding, sustainability, and outcomes of their proposed project.

V. Capital Improvement Plan Project Questionnaire

Capital Improvement Plan Project Questionnaires will be disseminated by the Capital Projects Coordinator pursuant to the timeline established in the annual budget preparation schedule. Departments can also access the questionnaire on the Forms & Documents section of Inside Yolo.

A Capital Improvement Plan Project Questionnaire must be submitted for all new projects and Capital Project Managers are expected to submit a revised Capital Improvement Plan Project Questionnaire for any previously approved project whose scope and budget must be revised. For projects that fall under the equipment, improvements (other than buildings), and infrastructure capital asset categories listed in Section G., a short form version of the Capital Improvement Plan Project Questionnaire will replace the full version. This form will also be available on the Forms & Document section of Inside Yolo.

Based on the complexity and magnitude of the project, and whether it meets the dollar of significance standard as defined by the Capital Improvement Committee, the project may require the Capital Project Management detailed below.

F. CAPITAL PROJECT MANAGEMENT

I. Responsibilities

Capital Projects Coordinator – An individual, designed by the County Administrator (CAO), to guide the preparation of the CIP and the completion of approved capital projects.

Capital Improvement Committee – A body comprised of the Chief Financial Officer, CAO Designee, Capital Projects Coordinator, General Services Director, and other individuals appointed by the CAO, responsible for the review of all CIP Project Proposals, and the development and recommendation of the CIP and any CIP amendments.

Operating Project Review Committee – A body comprised of the Chief Financial Officer and Capital Projects Coordinator responsible for the review of all active CIP projects. Presentations will be made quarterly to the board on the status of each active CIP project.

II. Project Management

Capital Project Manager – Each CIP project will have a formally identified project manager selected by the project's department, responsible for the day-to-day management of the CIP project.

III. Reporting

The following reporting will be completed with regard to the Capital Improvement Plan for capital projects included in the Board approved CIP:

a) Within 90 days of project completion the Capital Projects Coordinator will close out all open contracts and the Chief Financial Officer will transfer any remaining unused budget authority to a capital project reserve account, from which it may be reallocated to other projects.
b) The Chief Financial Officer will provide the Board with a report each quarter showing the status of each approved capital project.

G. CAPITAL ASSET CATEGORIES

Yolo County provides for the following Capital Asset categories:

I. Buildings

Buildings are capital assets with physical properties of a permanent nature, such as structures, structural attachments, storage facilities, storage tanks, towers, etc. Buildings are capitalized when the acquisition and ancillary costs, or appraised fair market value at time of donation, exceed $10,000.

Includes (not all inclusive):

a) Acquisition price if purchased, legal fees and title search.

Includes, if constructed (not all inclusive):

b) Site preparation, surveying fees, soil testing
c) Architectural, engineering, cost of construction, permits and licenses
d) Construction management, direct and indirect (except general administration costs), legal fees
e) Condemnation costs
f) Insurance during construction
g) Cost of fixtures attached to and forming a permanent part of the structure (e.g., boilers, lighting fixtures, plumbing, shelving – if attached, air conditioning, heating systems, etc.)

Additions are extensions of an existing unit which increases the unit's capacity. Costs include the same items as if constructed new and are capitalized if costs exceed $10,000.

Improvements (or betterments) are capitalized expenditures if it materially adds value to the property or appreciably extends its life. The cost of replacing an existing component with one of higher quality is to be added to the value of the asset when the original cost of the replaced component can be specifically identified. If the original cost of the component cannot be identified, the expenditure is treated as maintenance though the asset's life may be extended. Replacing part of an existing asset with another of like quality is not betterment, even though the useful life is extended. All betterments are capitalized when costs exceed $10,000. Improvements are added to the cost of the related structure rather than treated as separate asset.

II. Construction (or development) in progress **–**

This class is used to accumulate costs incurred to construct or develop a capital asset before it is substantially ready to be placed into service.

III. Energy Infrastructure and Systems

This class of capital assets refers to infrastructure, systems, and improvements that result in increased energy efficiency, power generation and distribution, and/or reductions in greenhouse gas emissions. Projects may include: the installation or electric vehicle supple equipment (EVSE); solar power systems; and other alternate energy systems.

IV. Equipment

Tangible personal property which is moveable or, if attached, is readily detachable without appreciable impairment to the unit to which it is attached, has a useful life of more than one (1) year, and a value of $5,000 or more. Equipment includes vehicles, heavy machinery, furnishings, computers, office equipment, instruments, technical and diagnostics equipment, and similar moveable items. Equipment should be recorded at historical cost plus ancillary charges, net of all trade discounts and rebates necessary to place the asset into its intended location and condition for use.

Includes (not all inclusive):

a) Preparation costs
b) Freight or other transportation charges
c) All taxes
d) Installation costs

Exception: Yolo County does not capitalize partitions and other office landscaping and workstations or library books.

V. Improvements other than buildings (land improvements)

Includes permanent (non-moveable) improvements, other than buildings, that add value to land, but do not have an indefinite life. Examples include fences, retaining walls, parking lots, and most landscaping. All improvements to land are capitalized if costs related to a specific improvement exceed $5,000.

VI. Infrastructure

Long-lived capital assets that normally are stationary in nature and can be preserved for a significantly greater number of years than most other capital assets are infrastructure. Infrastructure with costs exceeding $25,000 is capitalized. Infrastructure assets include roads, bridges, tunnels, drainage and flood control systems (dams), underground pipe (other than

related to utilities), water and sewer systems, traffic signals and lighting systems. The County has elected to not capitalize infrastructure acquired prior to July 1, 1980.

Original cost may be estimated if records are unavailable or inadequate. Expenditures that are capital in nature (additions and improvements) should be capitalized as part of the infrastructure asset if they increase the capacity or efficiency of the related infrastructure asset and costs exceed $25,000.

Includes (not all inclusive):

a) Architectural, engineering and surveyor fees
b) Condemnation costs
c) Legal fees
d) Construction costs
e) Permits and licenses
f) Appurtenances (e.g., traffic signs, signals, street signs, grade separations)

VII. Intangible capital assets

Software, licenses of commercially available software, easements and land use rights, and other purchased intangible assets are valued at historical cost, including all appropriate ancillary costs. Intangible assets with cost exceeding $100,000 are capitalized:

a) Software (pursuant to GASB 96)
b) Leases (pursuant to GASB 87)
c) Easements and land use rights

VIII. Land

Land is the investment held in fee title in real estate, other than structures and improvements, including land acquired for infrastructure purposes. Any rights (e.g., mineral rights) purchased with the land are not valued separately unless they are acquired separately. Normally land is characterized by indefinite life and not depreciated. Land used as a landfill or used as a source of gravel, or used in other ways that impairs the land, may need to be depreciated and classified under a separate asset category other than land. Land is capitalized regardless of cost and should be valued at fair value at date of acquisition.

Include (not all inclusive):

a) Acquisition price or estimated fair market value (FMV) if donated.
b) Appraisal negotiation, legal fees, title search and surveying fees.
c) Costs of obtaining consents and payments for condemnation costs
d) Filing costs.
e) Basic site improvements, including the cost of removing, relocating, or reconstructing the property of others (e.g. power lines).

IX. Works of art, historical treasures, and similar assets described as a collection

The County has elected to not capitalize these assets regardless of costs as long as the collections meet the following criteria:

a) The purpose of the collection is display or research;
b) The collection is being adequately maintained; and
c) The proceeds from the sale of collection items will be applied to acquire new items.

Yolo County does not classify maintenance as a capital asset. Maintenance includes expenditures, which neither materially add to the value of property nor appreciably prolong its life, but merely keep it in an ordinary efficient operating condition.

H. CAPITAL BUDGETING

For each fiscal year the Board shall include any capital project funding as part of the annual budget process. The Capital Budget is the first year of a three year plan for capital expenditures. These capital expenditures are to be incurred over a given fiscal year from funds appropriated by the Board for projects scheduled in the same year. All capital expenditures to be incurred during a given fiscal year will be included in the County's annual budget document. The Capital Improvement Committee shall recommend annual ongoing funding levels for each of the capital asset categories identified within the CIP. The Board will consider approval of these funding levels during their annual review of the CIP.

Preparing and maintaining the Capital Budget is an imperative to continue the County's strong fiscal management practices. Central to this management effort is providing accurate and thorough justifications for proposed capital projects, making the capital budgeting cycle transparent and straightforward. The County will develop a process for ensuring that capital investments provide the maximum community benefit and that appropriate supporting policies are implemented.

I. CAPITAL FINANCING

The County shall include with each annual capital budget the long-term plan for CIP financing, which includes a multi-year financial forecast for the major funds available to the CIP. The capital financing strategy should promote financial strength and flexibility; limit the cost of acquiring capital assets while meeting community needs; and strengthening the County's standing with bond rating agencies, investors, and community stakeholders.

Financial analysis of funding sources is conducted for all proposed major capital improvement projects. The CIP shall be updated and priorities reviewed annually in light of changes in needs, available funding, or available staffing. The Board has established the Operating Project Review Committee to review the status of all projects. County financial staff determines the funding sources and, if not available, provides input toward scope changes to meet the fiscal constraints.

A detailed Capital Improvement Plan Project Questionnaire must be submitted annually for each project before project funds can be expended. Any costs of operating and maintaining the projects listed in the plan should be identified within this proposal, to ensure that adequate funds will be available for ongoing costs relating to the projects. When considering the priority and funding of each capital project, the County shall consider the operating impacts (i.e., increased staff, facilities maintenance, and outside rentals) of the project.

Financing Plan

Each capital project shall identify the financing plan to be utilized in funding the project. Available options include:

a) Pay-as-you-go financing. Funded from the operating budget using fund balance and/or capital reserves
b) Inter-fund borrowing
c) Debt financing. In accordance with the County policy on *Borrowing, Debts and Obligations*
d) Public-Private partnerships and economic development
e) Federal and other intergovernmental grants
f) Any combination of the above

Financing shall be designed to allow proper matching of benefits and costs. A project's financing term shall never exceed the estimated useful life of the capital asset.

J. ACCOUNTING FOR CAPITAL ASSETS

I. Capitalization Thresholds

Capital assets are recorded at historical cost or at estimated historical cost if actual historical cost is not available. Contributed capital assets are valued at their estimated fair market value on the date contributed. Capital include assets with an initial individual cost of more than $10,000 for land, structures, improvements and easements; infrastructure with a cost of $25,000 or more; and equipment with a cost greater than $5,000 and leases and software subscription arrangements with a cost greater than $100,000 and an estimated useful life in excess of one year.

II. Capital Asset Depreciation and Estimated Useful Life

Capital assets used in operations are depreciated and amortized using the straight-line method over the lesser of the capital lease period or their estimated useful lives in the government-wide statements and the proprietary funds.

The County's depreciation policy for Capital Assets, including estimated useful lives, is detailed below:

Asset Type	**Method**	**Useful Life**
Nondepriciable Capital Assets		
Land	N/A	N/A
Easements in perpetuity	N/A	N/A
Construction (or development) in progress	N/A	N/A
Asset Type	**Method**	**Useful Life**
Depreciable Capital Assets		
Land improvements	Straight line, full month convention	10 – 40 years
Buildings	Straight line, full month convention	10 – 40 years
Infrastructure	Straight line, full year convention	10 – 50 years
Equipment	Straight line, full month convention	2 – 20 years
Software	Straight line, full month convention	Life of License/Subscription, or 2-7 years
Leases	Straight line, full month convention	Life of Lease

The County considers salvage value immaterial.

III. Capital Asset Control and Accountability

The Department of Financial Services maintains an inventory of all capital assets, which is updated annually based on certifications from all departments.

Land and Buildings

All acquisitions and disposals of land and buildings must be approved by the Board of Supervisors. The Department of Financial Services will review all minutes to ensure that land and buildings are acquired and disposed of in accordance with Board instructions and make the necessary changes to the land and buildings listings. As part of the budget process, County departments submit space requirements to General Services, who will review all requirements and determine whether additional space is required through lease or acquisition of real property.

Federally funded real estate general requirements:

a) Title to real property funded from federal funds shall vest with the County and shall be used only for authorized purpose and shall not be encumbered without approval of federal awarding agency.
b) Approval of the federal awarding agency is required to use the property for other purposes when the County determines it is no longer needed for the original purpose. Use is limited to federal programs consistent with those sponsored by the federal awarding agency.
c) When the property is no longer needed the County shall request disposition instructions from the federal awarding agency.

In addition to the above general requirements, some awards may have more stringent requirements that will need to be complied with.

Equipment

All acquisitions of equipment must be made in accordance with County policies and procedures and State and Federal regulations. At a minimum all equipment purchases shall be approved by the County Administrator and acquired in accordance with County procurement procedures.

Departments shall notify the Purchasing Agent of all equipment transfers, trade-ins and disposals.

Federally funded equipment general requirements:

a) Title to equipment funded from federal funds shall vest with the County.
b) The equipment shall not be used to service non-federal entities for a fee that is less than private companies charge for equivalent services.
c) The County shall use the equipment for which it was intended as long as it is needed, whether or the not the purpose continues to be supported by federal funds and shall not be encumbered without approval of the federal awarding

agency. When no longer needed for the original purpose the County shall use the equipment in connection with other federally sponsored programs in the following order of priority:

1. Activities sponsored by the federal awarding agency which funded the equipment, then
2. Activities sponsored by other federal awarding agencies.

d) When acquiring replacement equipment, the County may use the equipment to be replaced as trade-in or sell the equipment and use the proceeds to offset the cost of the replacement equipment subject to the federal awarding agency.
e) Equipment records shall include the following:

1. A description of the equipment
2. Serial number, model number or other identification number
3. Source of the equipment, award number, CFDA number
4. Whether title vests with the County or awarding agency
5. Acquisition date and cost
6. Information to determine the federal participation percentage
7. Location and condition of the equipment and the date the information was reported (part of physical inventory)
8. Ultimate disposition data

f) Equipment owned by federal agency shall be identified to indicate federal ownership
g) Physical inventory of the equipment and reconciliation to equipment records shall be conducted at least once every two years.
h) A control system shall be in effect to ensure adequate safeguard to prevent loss, damage or theft. Any loss, damage or theft shall be fully investigated and documented.
i) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.
j) Where the County is authorized or required to sell the equipment, proper sales procedures shall be established to provide for competition to the extent practicable and result in the highest possible return.
k) When the equipment is no longer needed by the County for the original intended purpose, the equipment may be used for other activities in accordance with the following standards.

1. Equipment with a current fair market value (FMV) exceeding $5,000, the County may retain the equipment for other uses provided that compensation is made to the original federal awarding agency. Compensation shall be computed by applying the federal participation to the current FMV.
2. If the County no longer needs the equipment, the County shall request disposition instructions from the federal awarding agency.

In addition to the above general requirements, some awards may have more stringent requirements that will need to be complied with.

County of Yolo
www.yolocounty.org

To: The Chair and Members of the Board of Supervisors

Consent-General Government 29.
Board of Supervisors **Financial Services**

Meeting Date:	06/06/2023
Brief Title:	Approve amended Policy on Grant Administration
From:	Chad Rinde, Chief Financial Officer, Department of Financial Services
Staff Contact:	Chad Rinde, Chief Financial Officer, Department of Financial Services, x8050
Supervisorial District Impact:	Countywide

Subject
Adopt amended Policy on Grant Administration. (No general fund impact) (Rinde)

Recommended Action
Adopt amended Policy on Grant Administration.

Strategic Plan Goal(s)
In Support of All Goals (Internal Departments Only)

Reason for Recommended Action/Background
The County of Yolo adopted a Policy on Grant Administration in September 2017, which is the current policy in effect that contains guidance to County departments on grant development, application, management, audit and closeout, and coordination required internally. Prior to this policy, guidance to staff on grants was limited, and the Board had previously delegated authority to the County Administrator to apply for grants on behalf of the organization.

The 2017 policy formalized the authority of the Board to retain the role of accepting grants and appropriating funds however continued to allow the County Administrator (and designees) to apply for grants that met County goals and strategic plan interests. It also added a grant oversight committee to the process comprised of technical subject-matter experts from several functions of the County that would review grants in advance of application for concerns and inform the County Administrator of concerns prior to applying for grants. The County Administrator was then responsible to address these concerns but retained the ultimate authority on whether to proceed with the application of a grant. But the Board still played a key role in the process of accepting or rejecting grants and appropriating funds.

In February, 2023, the Board asked staff to examine the grant administration process for improvement. The major concern expressed by the Board was to ensure the Board has awareness of significant grants that the County applied for, especially those that may involve a long-term commitment or significant matching funds. County staff examined two different possibilities in approach to revise the policy.

1. Requiring departments for grants meeting certain criteria or grants over a certain dollar threshold to be pre-approved by the Board before application.
2. Having notification requirements to inform the Board promptly of grant applications submitted will allow the Board to have an awareness of applications submitted and to allow Board members to question or agendize grant submissions for further examination early in the process.

Given the strict timelines for grant submission and the timelines required to get an agenda item completed to be on the agenda, staff do not recommend returning to a system of required Board pre-approval before grant submissions. The risk of this system would be deterring grant applications that may provide significant benefit as an agenda item can't make it to the Board in time. This was part of the reason for the prior delegation of authority to the CAO to submit for grants consistent with Board goals and strategic plans.

As a result, staff recommend approving the amended policy (Attachment A), which would require Departments that submit for any grant over $250,000 to provide prompt notification to the Board (within 14 days of Grant Submission) via a memo included in the Board correspondence. A redline version of the policy is included as Attachment B. This will allow Board members to be aware of the details of major grant submissions and also allow board members to request further discussion on specific grants to be added to the next Board agenda.

Collaborations (including Board advisory groups and external partner agencies)
The Department of Financial Services collaborated with the County Administrator's Office on amendments to the Grants Administration Policy. A copy of the proposed policy revisions was shared with Department Heads and discussed as part of the April 12, 2023, Department Head Meeting.

County of Yolo
Administrative Policies and Procedures Manual

TITLE: GRANTS ADMINISTRATION	DEPARTMENT: DEPARTMENT OF FINANCIAL SERVICES
TYPE: POLICY	DATE: MAY 23, 2023

A. PURPOSE

The purpose of this policy is to provide guidance to Yolo County departments on applying and managing grant opportunities, and to establish oversight of countywide grant activity. This policy incorporates best practices and draws upon grant and financial management principles to provide direction to staff in applying for, administering, and closing out grants. The goal is to facilitate the County's access to additional financial resources while minimizing financial impact of a grant on the County, and to ensure that grant opportunities are in alignment with strategic priorities adopted by the Board of Supervisors.

B. APPLICABILITY

This policy applies to departments that are seeking discretionary one-time or limited-term grant funding opportunities, regardless of the type of funding source and match requirements. This policy does not apply to funding sources that are ongoing or that fund mandated services.

C. DEFINITIONS

1. GRANT: A grant is an award of financial assistance in the form of money or property by a funding source including the federal government, state government, other local governments, non-profit agencies, private businesses and citizens that the County has the ability to accept or reject. A grant agreement makes the County accountable for spending and tracking the grant funds in accordance with the purpose specified in the grant contract, and obligates the County to comply with the grant terms, Public Contracting Code, and all applicable laws and regulations, including Office of Management and Budget (OMB) Uniform Guidance (Title 2-Code of Federal Regulations (CFR), Part 200).

   Grants are different from gifts or donations, which typically carry no reciprocal obligations between donor and recipient, and are often unrelated to the business interests of the donor. In contrast, grants are generally motivated by business interests of the grantor and stipulates what purpose(s) the funding may be used for. Additionally, gifts or donations typically do not have a time limit associated with the use of funds, whereas grants are generally awarded for a specified period of time, with any unused funds reverting back to the grantor upon expiration of the grant period. Refer to the *Donations Acceptance Policy* for provisions regarding the acceptance and use of donations.

2. GRANT ADMINISTRATOR: A grant administrator plans, organizes, implements, monitors and evaluates a County-wide grant funding plan under administrative direction, and provides training and technical guidance to departments to ensure compliance with grant requirements and managing County grant contracts with grant sub-recipients.

3. SUB-RECIPIENT: A County government may pass grant funds to another entity. The second entity, known as the "sub-recipient" of the grant funds, may be another governmental entity or a non-profit organization. In this situation, the original recipient of the funds has a responsibility to monitor the sub-recipient to ensure the grant funds are being used for authorized purposes and as required by the grant agreement and applicable regulations.

D. POLICY

1. GRANT DEVELOPMENT:

   a. Grant funding opportunities shall be reviewed by departments for applicability, eligibility, grant stipulations, and compliance requirements prior to application submittals.

   b. Priority shall be given to grant funding opportunities that most closely align with Yolo County's Strategic Plan Goals, and to grants that do not require a match or require lower matches from the County.

   c. Grants that require long-term commitments and obligate the County to continue funding for initiatives or commit resources after grant funding ends should be avoided.

   d. A multi-year cost/benefit analysis shall be performed prior to grant application to evaluate matching funds and any other direct costs, overhead costs, in-kind contributions, audit and close-out costs, and costs that may need to be incurred beyond the grant period. This analysis should also identify outcome measures to gauge success of the grant program.

2. GRANT APPLICATION:

   a. The Board of Supervisors delegates authority to the County Administrator or designee to review, approve and submit grant applications on behalf of the County (Minute Order 09-62). The County Administrator may designate the Grants Oversight Committee as their designee to review and approve grant submissions.

   b. A Grants Oversight Committee shall be established to provide administrative oversight of grant activity and to ensure compliance with this Policy. The Committee shall be composed of representatives from the County Administrator's Office, the Department of Financial Services and a grantee department.

   c. Grant opportunities shall be submitted to the Grants Oversight Committee for review and approval prior to application under the following circumstances:
      i. The grant requires a County match;
      ii. The County is required to maintain assets post expiration of a grant award; or
      iii. The cumulative value of the grant and any renewals is $50,000 or more.

d. Departments shall notify the Department of Financial Services of grant funding opportunities prior to application and upon receiving notification of a grant award.

e. Department Heads shall notify the Board of Supervisors within 14 days of grant application for any application in the cumulative amount greater than $250,000. The notification shall be submitted by formal memo to the Clerk of the Board for inclusion in the Board correspondence file. Financial Services shall make available a template memo to ensure relevant details are included (included as Exhibit A).

3. GRANT MANAGEMENT:

a. Grant funds shall be spent in compliance with grant stipulations, Yolo County policies and procedures, Public Contracting Code, and applicable laws and regulations including OMB Uniform Guidance. Grant stipulations should always be considered in addition to and not as replacement for County policies and procedures.

b. If grant funding is not appropriated, upon receipt of the grant award a budget resolution shall be submitted to the Board of Supervisors for approval

c. Unless otherwise prohibited by the grantor, indirect costs shall be allocated to grant funded programs.

d. New positions funded by grants shall be filled as limited term to match the term of the grant, up to a maximum of two years.

e. Departments shall carefully plan the spend-down of grant funds to avoid year-end pressures and the potential loss of unused funds.

f. Departments shall maintain sufficient and proper documentation and accounting records to comply with laws, regulations, Public Contracting Code, policies, procedures, and applicable audit requirements. Departments shall ensure that all required reports are submitted on a timely basis to the granting agencies.

g. When grant funds are passed by Yolo County to sub-recipients, the department administering the grant shall ensure that the sub-recipients are in compliance with the grant requirements, Public Contracting Code, and applicable laws and regulations including OMB Uniform Guidance.

4. AUDIT AND CLOSE-OUT:

a. Departments shall follow the terms of the grant agreement in regards to treatment of unspent grant funds at expiration of a grant.

b. Departments shall ensure that all audit requirements of the grant are met.

c. Grant files shall be retained for future reference as per grant stipulations, audit requirements, and Yolo County's records retention policy.

5. OVERSIGHT AND COORDINATION

a. The Grants Oversight Committee shall provide administrative oversight of grant activity and ensure compliance with the Grant Policy.

b. The Board of Supervisors shall provide policy direction and establish overall County goals and objectives. In addition, the Board of Supervisors shall approve grant applications (if required by the granting agency), acceptance of grant awards and budget resolutions to appropriate grant funds.

c. The County Administrator's Office, through the Grant Administrator, shall provide county-wide grant coordination and administration, facilitate and lead the Grants Oversight Committee, establish and maintain a comprehensive inventory of countywide grants, and maintain current registration with the federal System for Award Management (SAM).

d. The Department of Financial Services shall be responsible for establishing the necessary accounting framework (grant funds, etc.), providing financial support to grant recipients, establishing and maintaining a system of internal control, and approving cost-recovery mechanisms including indirect cost rate proposals and county overhead charges.

e. Internal Audit shall provide guidance and audit support services to grant recipients regarding system of internal controls, cost allocation and reporting.

f. Departments/Grant Recipients shall be responsible for adhering to all applicable Grant Policy provisions in sections D-1 through D-4. In addition, Departments/Grant Recipients shall be responsible for:
   i. Determining if grant funds will be provided to sub-recipients or vendors
   ii. Verifying that vendors and sub-recipients are eligible to receive federal grant funds
   iii. Ensuring that sub-recipients maintain compliance with grant terms; grant accounting, reporting, and record keeping requirements; Public Contracting Code; and applicable laws and regulations including OMB Uniform Guidance.

g. Sub-Recipients shall comply with all grant terms; grant accounting, reporting and record-keeping requirements; Public Contracting Code; and all applicable laws and regulations, including OMB Uniform Guidance.

County of Yolo

Administrative Policies and Procedures Manual

TITLE: GRANTS ADMINISTRATION	DEPARTMENT: DEPARTMENT OF FINANCIAL SERVICES
TYPE: POLICY	DATE: MAY 23, 2023

A. PURPOSE

The purpose of this policy is to provide guidance to Yolo County departments on applying and managing grant opportunities, and to establish oversight of countywide grant activity. This policy incorporates best practices and draws upon grant and financial management principles to provide direction to staff in applying for, administering, and closing out grants. The goal is to facilitate the County's access to additional financial resources while minimizing financial impact of a grant on the County, and to ensure that grant opportunities are in alignment with strategic priorities adopted by the Board of Supervisors.

B. APPLICABILITY

This policy applies to departments that are seeking discretionary one-time or limited-term grant funding opportunities, regardless of the type of funding source and match requirements. This policy does not apply to funding sources that are ongoing or that fund mandated services.

C. DEFINITIONS

1. GRANT: A grant is an award of financial assistance in the form of money or property by a funding source including the federal government, state government, other local governments, non-profit agencies, private businesses and citizens that the County has the ability to accept or reject. A grant agreement makes the County accountable for spending and tracking the grant funds in accordance with the purpose specified in the grant contract, and obligates the County to comply with the grant terms, Public Contracting Code, and all applicable laws and regulations, including Office of Management and Budget (OMB) Uniform Guidance (Title 2-Code of Federal Regulations (CFR), Part 200).

   Grants are different from gifts or donations, which typically carry no reciprocal obligations between donor and recipient, and are often unrelated to the business interests of the donor. In contrast, grants are generally motivated by business interests of the grantor and stipulates what purpose(s) the funding may be used for. Additionally, gifts or donations typically do not have a time limit associated with the use of funds, whereas grants are generally awarded for a specified period of time, with any unused funds reverting back to the grantor upon expiration of the grant period. Refer to the *Donations Acceptance Policy* for provisions regarding the acceptance and use of donations.

2. GRANT ADMINISTRATOR: A grant administrator plans, organizes, implements, monitors and evaluates a County-wide grant funding plan under administrative direction, and provides training and technical guidance to departments to ensure compliance with grant requirements and managing County grant contracts with grant sub-recipients.

3. SUB-RECIPIENT: A County government may pass grant funds to another entity. The second entity, known as the "sub-recipient" of the grant funds, may be another governmental entity or a non-profit organization. In this situation, the original recipient of the funds has a responsibility to monitor the sub-recipient to ensure the grant funds are being used for authorized purposes and as required by the grant agreement and applicable regulations.

D. POLICY

1. GRANT DEVELOPMENT:

   a. Grant funding opportunities shall be reviewed by departments for applicability, eligibility, grant stipulations, and compliance requirements prior to application submittals.

   b. Priority shall be given to grant funding opportunities that most closely align with Yolo County's Strategic Plan Goals, and to grants that do not require a match or require lower matches from the County.

   c. Grants that require long-term commitments and obligate the County to continue funding for initiatives or commit resources after grant funding ends should be avoided.

   d. A multi-year cost/benefit analysis shall be performed prior to grant application to evaluate matching funds and any other direct costs, overhead costs, in-kind contributions, audit and close-out costs, and costs that may need to be incurred beyond the grant period. This analysis should also identify outcome measures to gauge success of the grant program.

2. GRANT APPLICATION:

   a. The Board of Supervisors delegates authority to the County Administrator or designee to review, approve and submit grant applications on behalf of the County (Minute Order 09-62). The County Administrator may designate the Grants Oversight Committee as their designee to review and approve grant submissions.

   ~~a.~~b. A Grants Oversight Committee shall be established to provide administrative oversight of grant activity and to ensure compliance with this Policy. The Committee shall be composed of representatives from the County Administrator's Office, the Department of Financial Services and a grantee department.

   ~~b.~~c. Grant opportunities shall be submitted to the Grants Oversight Committee for review and approval prior to application under the following circumstances:
      i. The grant requires a County match;
      ii. The County is required to maintain assets post expiration of a grant award; or
      iii. The cumulative value of the grant and any renewals is $50,000 or more.

d. Departments shall notify the Department of Financial Services of grant funding opportunities prior to application and upon receiving notification of a grant award.

~~c.~~e. Department Heads shall notify the Board of Supervisors within 14 days of grant application for any application in the cumulative amount greater than $250,000. The notification shall be submitted by formal memo to the Clerk of the Board for inclusion in the Board correspondence file. Financial Services shall make available a template memo to ensure relevant details are included (included as Exhibit A).

3. GRANT MANAGEMENT:

a. Grant funds shall be spent in compliance with grant stipulations, Yolo County policies and procedures, Public Contracting Code, and applicable laws and regulations including OMB Uniform Guidance. Grant stipulations should always be considered in addition to and not as replacement for County policies and procedures.

b. If grant funding is not appropriated, upon receipt of the grant award a budget resolution shall be submitted to the Board of Supervisors for approval

c. Unless otherwise prohibited by the grantor, indirect costs shall be allocated to grant funded programs.

d. New positions funded by grants shall be filled as limited term to match the term of the grant, up to a maximum of two years.

e. Departments shall carefully plan the spend-down of grant funds to avoid year-end pressures and the potential loss of unused funds.

f. Departments shall maintain sufficient and proper documentation and accounting records to comply with laws, regulations, Public Contracting Code, policies, procedures, and applicable audit requirements. Departments shall ensure that all required reports are submitted on a timely basis to the granting agencies.

g. When grant funds are passed by Yolo County to sub-recipients, the department administering the grant shall ensure that the sub-recipients are in compliance with the grant requirements, Public Contracting Code, and applicable laws and regulations including OMB Uniform Guidance.

4. AUDIT AND CLOSE-OUT:

a. Departments shall follow the terms of the grant agreement in regards to treatment of unspent grant funds at expiration of a grant.

b. Departments shall ensure that all audit requirements of the grant are met.

c. Grant files shall be retained for future reference as per grant stipulations, audit requirements, and Yolo County's records retention policy.

5. OVERSIGHT AND COORDINATION

a. The Grants Oversight Committee shall provide administrative oversight of grant activity and ensure compliance with the Grant Policy.

b. The Board of Supervisors shall provide policy direction and establish overall County goals and objectives. In addition, the Board of Supervisors shall approve grant applications (if required by the granting agency), acceptance of grant awards and budget resolutions to appropriate grant funds.

c. The County Administrator's Office, through the Grant Administrator, shall provide county-wide grant coordination and administration, facilitate and lead the Grants Oversight Committee, establish and maintain a comprehensive inventory of countywide grants, and maintain current registration with the federal System for Award Management (SAM).

d. The Department of Financial Services shall be responsible for establishing the necessary accounting framework (grant funds, etc.), providing financial support to grant recipients, establishing and maintaining a system of internal control, and approving cost-recovery mechanisms including indirect cost rate proposals and county overhead charges.

e. Internal Audit shall provide guidance and audit support services to grant recipients regarding system of internal controls, cost allocation and reporting.

f. Departments/Grant Recipients shall be responsible for adhering to all applicable Grant Policy provisions in sections D-1 through D-4. In addition, Departments/Grant Recipients shall be responsible for:
   i. Determining if grant funds will be provided to sub-recipients or vendors
   ii. Verifying that vendors and sub-recipients are eligible to receive federal grant funds
   iii. Ensuring that sub-recipients maintain compliance with grant terms; grant accounting, reporting, and record keeping requirements; Public Contracting Code; and applicable laws and regulations including OMB Uniform Guidance.

g. Sub-Recipients shall comply with all grant terms; grant accounting, reporting and record-keeping requirements; Public Contracting Code; and all applicable laws and regulations, including OMB Uniform Guidance.

Consent-General Government 30.

Board of Supervisors **General Services**

Meeting Date: 06/06/2023

Brief Title: Yolo Branch Library at 37750 Sacramento St Yolo

From: Ryan Pistochini, Director, General Services Department

Staff Contact: Sofia Mejia, Associate Administrative Analyst, General Services Department, x5021

Supervisorial District Impact: District 5

Subject

Accept as complete the construction project at 37750 Sacramento Street, Yolo for the Yolo Branch Library, performed under Agreement PO4038-Broward Builders, Inc.; and authorize the Director of General Services to sign and record the Notice of Completion. (No general fund impact) (Pistochini)

Recommended Action

A. Accept as complete the new construction project at 37750 Sacramento Street, Yolo for the Yolo Branch Library, performed under Agreement PO4038-Broward Builders Inc.; and

B. Authorize the Director of General Services to sign and record the Notice of Completion.

Strategic Plan Goal(s)

	In Support of All Goals (Internal Department Only)

Reason for Recommended Action/Background

Broward Builders, Inc. completed the new construction project for the Yolo Branch Library, at 37750 Sacramento Street, Yolo, on November 14, 2022 in accordance with the contract plans and specifications. The Board of Supervisors acceptance of the work, and authorization for the Director of General Services to record the Notice of Completion (Attachment A), will allow the Project to be closed out, and final payment be made to the contractor. Additional background information on the project can be found in the last documents submitted to the Yolo County Board Supervisors on July 7, 2020 (Attachment B) on July 21, 2020 (Attachment C) on September 1, 2020 (Attachment D) on December 15, 2020 (Attachment E) and on July 27, 2021 (Attachment F).

Collaborations (including Board advisory groups and external partner agencies)

The County Administrator's Office collaborated with the Yolo County Library, Friends of the Library, County Counsel, General Services, County Department of Finance.

To: The Chair and Members of the Board of Supervisors

Regular-General Government 28.
Board of Supervisors **Library**
Meeting Date: 07/07/2020
Brief Title: Yolo Library Project Design
From: Mark Fink, County Librarian & Chief Archivist, Library
Staff Contact: Connie Robledo, Associate Management Analyst, County Administrator's Office, x5776

Subject
Consider approval of the Yolo Branch Library project design plan. (No general fund impact) (Fink/Robledo)

Recommended Action
Consider approval of the Yolo Branch Library project design plan and authorize the Friends of the Yolo Branch Library of Yolo to accept reclaimed items from the old building, sell them, and donate the proceeds to enhance the new Yolo Branch Library's facilities and services.

Strategic Plan Goal(s)

Thriving Residents

Reason for Recommended Action/Background
The Yolo Branch Library building is over 100 years old and serves the unincorporated communities of Yolo, Dunnigan, and Zamora. In 2018 this building was condemned due to structural and other concerns, and the Library began operating out of a temporary modular building placed at the site. In 2017 this project was given approval to move forward with an Environmental Impact Report (EIR) and preparation of the building design. The EIR was completed and certified in 2018. Today, staff requests the Board consider approving the final project design of the new Yolo Branch Library Building (project drawings have been filed with the Clerk of the Board). A Notice of Determination, pursuant to the California Environmental Quality Act (CEQA) process, will be filed upon approval of the design.

Project Design

The Yolo Branch Library was constructed in 1918 and is a historical resource listed on the National Register of Historic Places. For this reason, the library is making a concerted effort to ensure the historic nature – the “look and feel” of the existing Yolo Branch Library building – is brought into the planning and design of the proposed New Yolo Branch Library Building Project. The conceptual design is based on the Branch library’s program goals and certain design concepts that guide both the form and function of the proposed new building. To date, the County has developed a list of character defining features which include both architectural and experiential features associated with the existing, historic Yolo Branch Library building.

The front of the new Yolo Branch Library building would have concrete pedestrian paths, bordered by

decomposed granite paths and low-impact / drought tolerant ornamental planters (Attachment A). An activity lawn will be located to the north of the building. Pedestrian access would be provided via a walkway from Sacramento Street to the library's main entrance door, which also faces Sacramento Street. Vehicular access would utilize a driveway entrance from Sacramento Street near the southwest corner of the project area which provides a one-way circulation pattern around the western and northern perimeters of the site, ultimately exiting through a driveway at 2nd Street on the northeast corner of the project area. A total of five parking spaces would be provided (including one ADA compliant space) along the western property boundary and to the west of the proposed new library building. An informal, gravel paved parking area would also be provided along the access route near the northwest corner of the proposed project area.

The interior property lines will be landscaped with native plants and trees, and ornamental shrubs and plantings will also be planted on the site. The project includes perimeter planters and a bioswale in the northwest corner of the site to detain and treat stormwater runoff to ensure the project area maintains pre-development rates and volumes of stormwater runoff.

The new facility will upgrade and improve existing Yolo Branch Library services such as expanding the existing book and media collections, increasing the number of public use computer stations, creating study rooms and distinct user group areas for children/family, teens and adults, expanding staff workspace areas, offering a covered outdoor activity area, seating, picnic areas and activity lawn and providing a dedicated meeting room for joint use by library programs and the community.

Staff recommends that the Board approve the Yolo Branch Library's project design and authorize the Friends of the Yolo Branch Library of Yolo to accept reclaimed items from the old building, sell them, and donate the proceeds to enhance the new Yolo Branch Library's facilities and services. This action will allow the project to proceed to construction of the new Yolo Branch Library as soon as project funding is confirmed.

Collaborations (including Board advisory groups and external partner agencies)

The Yolo Branch Library construction project has been a coordinated effort by staff from the CAO's office, Library staff, and the Friends of the Yolo Branch Library of Yolo. Library staff and the lead architect from WMB Architects have participated in multiple meetings with the Friends and the Yolo Community Advisory Group to obtain input on the community's needs and priorities for the new Yolo Branch Library. The General Services Department has also been heavily involved with the Yolo Branch Library construction project.

Yolo Branch Library Project Update

YOLO COUNTY LIBRARY

County of Yolo

JULY 2020

Project Summary

YOLO COUNTY LIBRARY

Current Library Services
Replace a 100-year old building that has major fire, safety, and environmental deficiencies, with a new library for the communities of Yolo, Dunnigan and Zamora.

New Facility
Provide 4,000 square feet of space with stable Wi-Fi, access to computers and technology resources, adult literacy tutoring, ESL programs, early childhood literacy programs, social activities for adults and seniors, as well as homework help for children and teens.

New Community Room
Will strengthen the library's role as a community gathering place and hub of civic engagement and education.

Space for library programs, meetings, classes and community services such as food distribution.

Project Objectives

YOLO COUNTY LIBRARY

The objectives for the new Yolo Branch Library:

- Incorporate the look, feel, character, and history of the existing Yolo Branch Library building and the Town of Yolo
- Provide programming flexibility
- Operate facility with a limited staff
- Upgrade and improve Yolo Branch Library services
- Expand the Yolo Branch Library's total book and media collections
- Provide a dedicated meeting room space for community use

Project Features

YOLO COUNTY LIBRARY

- Expanded book and media collections in English and Spanish
- Expanded public-use computer stations
- Efficient use of daylight, lighting, natural ventilation and heating, ventilation, and air conditioning systems
- A community meeting room for library programs, local meetings and gatherings
- Quiet spaces and study rooms
- Free Wi-Fi, public computers, copier and printer
- Easier access to library services in an ADA accessible building

Community Involvement

YOLO COUNTY LIBRARY

- County partnership with the Friends of the Yolo Branch Library
    - The Friends of the Yolo Branch Library support the Yolo Branch Library in its service to the communities of Dunnigan, Yolo, Zamora and the surrounding rural areas and work in concert with Yolo County Library staff to understand community needs, develop services to meet those needs, and build community engagement.
- Extensive community involvement from the beginning of this project
    - Surveyed our communities
    - Formed Community Advisory Group
    - Updated communities periodically
    - Held community forums at key decision points

Community Support

Goal - $150,000

Friends of the Yolo Branch Library - $40,000
Community - $110,000

Funds Raised – $121,850

Friends of the Yolo Branch Library - $31,000
Community - $90,850

Percentage Raised To Date – 81%

YOUR LIBRARY NEEDS YOU!

To: The Chair and Members of the Board of Supervisors

Regular-General Government 46.

Board of Supervisors **Library**

Meeting Date: 07/21/2020

Brief Title: Yolo Library Project Design

From: Mark Fink, County Librarian & Chief Archivist, Library

Staff Contact: Connie Robledo, Associate Management Analyst, County Administrator's Office, x5776

Subject

Approve Plans and Specifications for the Yolo Branch Library project. (No general fund impact) (Fink/Robledo)

Recommended Action

Approve Plans and Specifications for the Yolo Branch Library project and authorize the Friends of the Yolo Branch Library of Yolo to accept reclaimed items from the old building, sell them, and donate the proceeds to enhance the new Yolo Branch Library's facilities and services.

Strategic Plan Goal(s)

Thriving Residents

Reason for Recommended Action/Background

The Yolo Branch Library building is over 100 years old and serves the unincorporated communities of Yolo, Dunnigan, and Zamora. In 2018 this building was condemned due to structural and other concerns, and the Library began operating out of a temporary modular building placed at the site. In 2017 this project was given approval to move forward with an Environmental Impact Report (EIR) and preparation of the building design. The EIR was completed and certified in 2018. Today, staff requests the Board approve the final project design plans and specifications for a new Yolo Branch Library Building. The plans and specifications are on file with the Clerk of the Board. Select drawings and renderings are included with this staff report. A Notice of Determination, pursuant to the California Environmental Quality Act (CEQA) process, will be filed upon approval of the design.

Project Design

The Yolo Branch Library was constructed in 1918 and is a historical resource listed on the National Register of Historic Places. For this reason, the library is making a concerted effort to ensure the historic nature – the “look and feel” of the existing Yolo Branch Library building – is brought into the planning and design of the proposed New Yolo Branch Library Building Project. The conceptual design is based on the Branch library’s program goals and certain design concepts that guide both the form and function of the proposed new building. To date, the County has developed a list of character defining features which include both architectural and experiential features associated with the existing, historic Yolo Branch Library building.

The front of the new Yolo Branch Library building would have concrete pedestrian paths, bordered by decomposed granite paths and low-impact / drought tolerant ornamental planters (Attachment A). An activity lawn will be located to the north of the building. Pedestrian access would be provided via a walkway from Sacramento Street to the library's main entrance door, which also faces Sacramento Street. Vehicular access would utilize a driveway entrance from Sacramento Street near the southwest corner of the project area which provides a one-way circulation pattern around the western and northern perimeters of the site, ultimately exiting through a driveway at 2nd Street on the northeast corner of the project area. A total of five parking spaces would be provided (including one ADA compliant space) along the western property boundary and to the west of the proposed new library building. An informal, gravel paved parking area would also be provided along the access route near the northwest corner of the proposed project area.

The interior property lines will be landscaped with native plants and trees, and ornamental shrubs and plantings will also be planted on the site. The project includes perimeter planters and a bioswale in the northwest corner of the site to detain and treat stormwater runoff to ensure the project area maintains pre-development rates and volumes of stormwater runoff.

The new facility will upgrade and improve existing Yolo Branch Library services such as expanding the existing book and media collections, increasing the number of public use computer stations, creating study rooms and distinct user group areas for children/family, teens and adults, expanding staff workspace areas, offering a covered outdoor activity area, seating, picnic areas and activity lawn and providing a dedicated meeting room for joint use by library programs and the community.

Staff recommends that the Board approve the Yolo Branch Library's project design and authorize the Friends of the Yolo Branch Library of Yolo to accept reclaimed items from the old building, sell them, and donate the proceeds to enhance the new Yolo Branch Library's facilities and services. This action will allow the project to proceed to construction of the new Yolo Branch Library as soon as project funding is confirmed.

Collaborations (including Board advisory groups and external partner agencies)

The Yolo Branch Library construction project has been a coordinated effort by staff from the CAO's office, Library staff, and the Friends of the Yolo Branch Library of Yolo. Library staff and the lead architect from WMB Architects have participated in multiple meetings with the Friends and the Yolo Community Advisory Group to obtain input on the community's needs and priorities for the new Yolo Branch Library. The General Services Department has also been heavily involved with the Yolo Branch Library construction project.

Yolo Branch Library Project Update

YOLO COUNTY LIBRARY

EDUCATION · AGRICULTURE · INDUSTRY
County of Yolo
Founded 1850

JULY 2020

Project Summary

YOLO COUNTY LIBRARY

Current Library Services
Replace a 100-year old building that has major fire, safety, and environmental deficiencies, with a new library for the communities of Yolo, Dunnigan and Zamora.

New Facility
Provide 4,000 square feet of space with stable Wi-Fi, access to computers and technology resources, adult literacy tutoring, ESL programs, early childhood literacy programs, social activities for adults and seniors, as well as homework help for children and teens.

New Community Room
Will strengthen the library's role as a community gathering place and hub of civic engagement and education.

Space for library programs, meetings, classes and community services such as food distribution.

Project Objectives

YOLO COUNTY LIBRARY

The objectives for the new Yolo Branch Library:

- Incorporate the look, feel, character, and history of the existing Yolo Branch Library building and the Town of Yolo
- Provide programming flexibility
- Operate facility with a limited staff
- Upgrade and improve Yolo Branch Library services
- Expand the Yolo Branch Library's total book and media collections
- Provide a dedicated meeting room space for community use

Project Features

YOLO COUNTY LIBRARY

- Expanded book and media collections in English and Spanish
- Expanded public-use computer stations
- Efficient use of daylight, lighting, natural ventilation and heating, ventilation, and air conditioning systems
- A community meeting room for library programs, local meetings and gatherings
- Quiet spaces and study rooms
- Free Wi-Fi, public computers, copier and printer
- Easier access to library services in an ADA accessible building

Community Involvement

YOLO COUNTY LIBRARY

- County partnership with the Friends of the Yolo Branch Library
    - The Friends of the Yolo Branch Library support the Yolo Branch Library in its service to the communities of Dunnigan, Yolo, Zamora and the surrounding rural areas and work in concert with Yolo County Library staff to understand community needs, develop services to meet those needs, and build community engagement.
- Extensive community involvement from the beginning of this project
    - Surveyed our communities
    - Formed Community Advisory Group
    - Updated communities periodically
    - Held community forums at key decision points

Community Support

Goal - $150,000

Friends of the Yolo Branch Library - $40,000
Community - $110,000

Funds Raised – $121,850

Friends of the Yolo Branch Library - $31,000
Community - $90,850

Percentage Raised To Date – 81%

Brief Title: Approve Budget Revision

From: Mark Fink, County Librarian & Chief Archivist, Library

Staff Contact: Meredith Beales, Fiscal Administrative Officer, Library, x8085

Subject

Adopt budget resolution appropriating funds for the Yolo Branch Library construction project in the amount of $219,539. (No general fund impact) (Fink/Yarris)

Recommended Action

Adopt budget resolution appropriating funds for the Yolo Branch Library construction project in the amount of $219,539.

Strategic Plan Goal(s)

Thriving Residents

Reason for Recommended Action/Background

The existing Yolo Branch Library building, originally constructed in 1918, requires replacement for a number of reasons, including structural issues, code compliance, and ADA compliance. Library services were moved into a leased on-site portable building in January 2018, and will continue there until a new building is constructed. The new building will be approximately 3,900 square feet and will contain study rooms, a community room, and a covered outdoor area. The environmental impact report was certified in November 2018, and WMB Architects subsequently began work on the schematic design and construction documents. Due to delays in the project timeline, unspent appropriations from fiscal year 2019-2020 need to be appropriated for work occurring in fiscal year 2020-2021, including salvage, demolition, site monitoring, septic removal, permitting, design, and project management.

Collaborations (including Board advisory groups and external partner agencies)

The Yolo Branch Library construction project has been a coordinated effort by staff from the County Administrator's Office, Library staff, and the Friends of the Yolo Branch Library of Yolo. Library staff and the lead architect from WMB Architects have participated in multiple meetings with the Friends and the Yolo Community Advisory Group to obtain input on the community's needs and priorities for the new Yolo Branch Library. The General Services Department has also been heavily involved with the Yolo Branch Library construction project.

Competitive Bid Process

DEPUTY CLERK OF THE BOARD

RESOLUTION NO. 20-61.07

A Resolution Increasing the Fiscal Year 2020-2021 Yolo Library Capital Project Fund Budget by $219,539 for Delayed Project Work

WHEREAS, the County has been working on the replacement of the Yolo Branch Library for several years; and

WHEREAS, certain aspects of the project expected to occur in fiscal year 2019-2020 were delayed until fiscal year 2020-2021, including salvage, demolition, site monitoring, septic removal, project design, and project management costs; and

WHEREAS, funds were appropriated for the abovementioned tasks in fiscal year 2019-2020 and were unspent at the end of fiscal year 2019-2020; and

WHEREAS, said funds were not included in the appropriations of the Yolo Library Capital Project Fund Budget for fiscal year 2020-2021; and

WHEREAS, Section 29125 of the Government Code provides for the appropriation of these funds by a four-fifths vote of the Board of Supervisors;

NOW, THEREFORE, BE IT RESOLVED as follows:

1. The foregoing recitals are true and correct.

2. The Chief Financial Officer is authorized and directed to amend the budget for fiscal year 2020-2021 as follows:

Level Group 3601-11-1354 YOLO LIBRARY CPF

Current Appropriations	$ 0
Increase: Services & Supplies	$100,000
Increase: Capital Assets	$119,539
Total Amended Appropriations	$219,539
Current Revenue and Use of Fund Balance	$ 0
Increase: Use of Fund Balance	$219,539
Total Amended Revenue and Use of Fund Balance	$219,539

Meeting Date: 12/15/2020

Brief Title: Approve Funding for Yolo Library Replacement

From: Mindi Nunes, Assistant County Administrator, CAO/Mark Fink, County Librarian, Library

Staff Contact: Mindi Nunes, Assistant County Administrator, County Administrator's Office, x8426

Subject

Approve funding for Yolo Branch Library Replacement and adopt budget resolution appropriating $750,000 in additional funding for 2020-21; and authorize staff to proceed with bids for construction. (No general fund impact) (4/5 vote required) (Nunes/Fink)

Recommended Action

Approve funding for Yolo Branch Library Replacement and adopt budget resolution appropriating $750,000 in additional funding for fiscal year 2020-21; and authorize staff to proceed with soliciting bids for construction of the project.

Strategic Plan Goal(s)

Thriving Residents

Reason for Recommended Action/Background

The County has been working on the replacement of the Yolo Branch Library for several years. The architect drawings are complete as well as 95% construction documents and environmental impact work. The Board previously approved a preliminary budget of $4,900,000 in order to ensure project costs are in line with Board funding expectations.

The facility is in need of replacement and in order to fully fund a new building, the County and the Yolo Friends of the Library have been actively seeking a variety of funding sources including a Community Development Block Grant (CDBG), fundraising and participation from other County funds. The current building is 100 years old and can no longer adequately serve the community. A new library in Yolo will ensure the communities of Dunnigan, Yolo, and Zamora have access to library and information services as well as a community gathering space.

The current round of CDBG grant funding was issued on a first come, first served basis for shovel ready projects. The Department of Housing and Community Development (HCD) who administers the grant, received $73,810,399 in funding requests and funded $23,000,000 in the first round. HCD has indicated that they will use this existing list for the next round of funding expected in January. Unfortunately, Yolo is second to the last on the existing list. Therefore it is highly unlikely the project will receive a CDBG grant in the near future and thus staff recommends proceeding with the project absent grant funding.

The Department of Financial Services has identified available funding for continuing the project. The table below identifies the source of funds for $3,900,000 of project costs. This leaves a gap of the total $4,900,000 budget of $1,000,000 for which the County will continue to seek donations and/or grant funding.

Remaining Funding Source Components

Funding Source	Prev Funding	New Funding	Total Funding
Capital Improvement Reserve (General Fund)	$289,800	$ 123,655	$413,455
Accumulated Capital Outlay	$551,987	$ 884,558	$1,436,545
Library Operating Fund		$ 600,000	$600,000
Friends of the Library Fundraising		$ 150,000	$150,000
Development Impact Fee - Library	$300,000	$1,000,000	$1,300,000
Total Identified Funding	$1,141,787	**$ 2,758,213**	**$3,900,000**
Budget			**$4,900,000**
GAP to be funded through donations			**($1,000,000)**

If the donation funding target is not met, the County would provide gap funding from one or more of the following funds:

- CIP Reserve
- 2017 CIP Bond Issuance
- Accumulated Capital Outlay Fund
- Additional Development Impact Fee funds

We anticipate the remaining expenditures for this fiscal year will require an additional $750,000 appropriation through the attached budget resolution for project management, demolition, tribal site monitoring during demolition, permit fees and the start of construction. Once the construction bids are known, staff will firm up the project budget and provide an update when seeking approval of the construction contract.

To: The Chair and Members of the Board of Supervisors

Consent-General Government 14.

Board of Supervisors **General Services**

Meeting Date: 07/27/2021

Brief Title: Approve construction agreement for the Yolo Branch Library

From: Kevin Yarris, Director, General Services Department

Staff Contact: Mike Martinez, Manager, General Services Department, x5015

Subject

Authorize the Director of General Services to execute an agreement with Broward Builders, Inc. in the amount of $3,575,000 for the construction of the Yolo Branch Library and authorize the Director of General Services to amend the construction contract with Broward Builders, Inc. up to an additional $203,750 should amendments be required by the scope of the project. (General fund impact $413,455) (Yarris)

Recommended Action

A. Award Contract to Broward Builders Inc. in the amount of $3,575,000 for the construction of the Yolo Branch Library;

B. Approve delegation of authority to the Director of General Services to negotiate and execute a contract with Broward Builders, Inc.; and

C. Authorize the Director of General Services to issue Change Orders, as necessary, up to $203,750 consistent with Public Contract Code section 20142.

Strategic Plan Goal(s)

Thriving Residents

Reason for Recommended Action/Background

On December 15, 2020, the Board approved the Yolo Branch Library Project budget and design.

The project will construct a new library now that the old library has been demolished. The new facility will upgrade and improve existing Yolo Branch Library services such as expanding the existing book and media collections in both English and Spanish languages, expanding public use computer stations, creating study rooms and distinct user group areas for children/family, teens and adults, expanding staff workspace areas, offering a covered outdoor activity area, possible outdoor gardens, seating, picnic areas and activity lawn and providing a dedicated meeting room for joint use by library programs and the community.

The project has been split into two separate phases with phase one beginning and ending before phase two begins. Phase one included salvage and demolishing the existing condemned Yolo Branch Library in

the first quarter of 2021. Phase two will construct a new 3,800 square foot Library Building.

The overall project budget summary is below.

Remaining Funding Source Components			
Funding Source	Previous Funding	New Funding	Total Funding
Capital Improvement Reserve (General Fund)	$ 289,800	$ 123,655	$ 413,455
Accumulated Capital Outlay	$ 551,987	$ 884,558	$ 1,436,545
Library Operating Fund		$ 600,000	$ 600,000
Friends of the Library Fundraising		$ 150,000	$ 150,000
Development Impact Fee - Library	$ 300,000	$ 1,000,000	$ 1,300,000
Total Identified Funding	$ 1,141,787	$ 2,758,213	$ 3,900,000
Budget			$ 4,900,000
GAP to be funded through donations			($1,000,000)

If the donation funding target is not met, the County would provide gap funding from one or more of the following funds:

- CIP Reserve
- 2017 CIP Bond Issuance
- Accumulated Capital Outlay Fund
- Additional Development Impact Fee funds

Staff will bring back information later in the fiscal year on the strategy to close the funding gap once additional information is known.

Collaborations (including Board advisory groups and external partner agencies)

The County Administrator's Office collaborated with the Yolo County Library, Friends of the Library, County Counsel, General Services, County Department of Finance.

Competitive Bid Process

On May 12, 2021, the County issued an Invitation for Bids. The County received three bids by the closing date of June 29, 2021. The table below lists the bids received and the County's Engineer's estimate:

Bidder	**Bid Amount**
Engineer's Estimate	$3,400,000.00
Broward Builders, Inc.	$3,575,000.00
Roebbelen Contracting, Inc.	$3,895,000.00
Arntz Builders, Inc.	$4,193,000.00

The County determined that Broward Builders, Inc., to be the lowest responsive and responsible bidder based on the bids received and should therefore be awarded the contract.

SECTION 00 52 00

COUNTY OF YOLO, CALIFORNIA

CONSTRUCTION AGREEMENT FOR THE YOLO BRANCH LIBRARY
37750 Sacramento Street, Yolo, California
CONTRACT NO. 21-170

This Agreement for Construction ("Agreement") is entered into as of the Effective Date 8/5/2021, as defined herein, between Broward Builders, Inc., a California Corporation ("Contractor"), and the County of Yolo ("County"), a political subdivision of the State of California.

1. SCOPE OF WORK. Contractor shall furnish all labor, services, transportation, materials, equipment, parts, and supplies necessary for **The Yolo Branch Library, 37750 Sacramento Street, Yolo, California,** in accordance with the plans and specifications included within the Contract Documents, as defined in Section 2, below. Contractor shall complete Yolo County Library Project per bid amount not to exceed $3,575,0000.

2. CONTRACT DOCUMENTS. The documents defined as the "Contract Documents" in Section 1.12 of the General Conditions, are incorporated as if fully set forth herein by this reference and comprise the entire Agreement between the County and Contractor concerning the above-referenced project. The documents that describe the work to be performed are sometimes collectively referred to herein as the Plans and Specifications. In the event of any conflict between any of the provisions of the Contract Documents, the provision that requires the highest level of performance from Contractor for the County's benefit shall prevail. The Contract Documents include:

Exhibit A ~ Proposal Response, including all required forms
Exhibit B ~ Subcontractor List
Exhibit C ~ Technical Specifications and Drawings
Exhibit D ~ Performance Bond and Payment Bond
Exhibit E ~ General Provisions, General Conditions, General Requirements and Notice
Exhibit F ~ Project Plans
Exhibit F ~ Addendas
Exhibit G – Change Order Form

3. CONDUCT OF WORK; CONTRACT ADMINISTRATOR. Contractor shall perform the services described in the Contract Documents in a manner that causes the least possible inconvenience to County and the public and safeguards persons and property from any dangerous activities or conditions conducted or created by Contractor. County's Manager of Facilities, Services and Capital Programs shall administer this Agreement for County. County's Board of Supervisors may designate a different person to serve as Contract Administrator by giving advance written notice to Contractor.

(a) Work Schedule. Unless otherwise agreed pursuant to Section 3.01 of the General Conditions, Contractor shall begin work within ten (10) days after receiving the Contract Administrator's Notice to Proceed and shall complete the work within **360 calendar days** after receiving that notice. This work must be complete, operational, have a Temporary Occupancy

Permit and be turned over to the County for its intended use for this milestone to be deemed complete. County understands the nature of delays and will allow for delays to the project, if applicable, pursuant to Section _3.08_ of the General Conditions.

(b) **Liquidated Damages.** Contractor shall pay County **$2,500.00** a day liquidated damages for each day's delay (excluding Saturdays, Sundays, and County observed holidays) in completing the work beyond the time specified for completion of work. All other aspects of the payment of such damages shall be governed by Section 3.12 of the General Conditions and other relevant provisions thereof.

4. INDEMNIFICATION. Contractor's indemnity, defense, and related obligations shall be as specified in Section 00 62 10 of the Project Manual.

5. COMPENSATION. All matters of compensation shall be governed by the General Conditions, including but not limited to Article 25 thereof.

6. INSURANCE. Contractor shall maintain the following insurance while performing the services covered by this Agreement. The comprehensive general liability insurance shall include broad form property damage insurance.

(a) Minimum Coverages (as applicable) - Insurance coverage shall be with limits not less than the following:

1. **Commercial General Liability** Occurrence form Insurance policy (ISO CG 00 01 or equivalent) covering all operations by or on behalf of Contractor, including coverage for:

   a) Premises and Operations

   b) Products and completed Operations

   c) Contractual Liability insuring the obligations assumed by Contractor in this agreement or Blanket Contractual Liability Coverage

   d) Broad Form Property Damage (including Completed Operations)

   e) Explosion, Collapse, and Underground Hazards

   f) Personal Injury Liability

   Limits of liability shall be not less than:

   $5,000,000 each occurrence (combined single limit for bodily injury and property damage)

   $5,000,000 for Personal Injury Liability

   $5,000,000 for Products Completed Operations

   $10,000,000 General Aggregate

   If the policy does not have an endorsement providing that the General Aggregate Limit applies separately, or if defense costs are included in the aggregate limits, then the required aggregate limits shall be $10,000,000.

2. **Automobile Liability** – Insurance policy (ISO CA 00 01) covering Bodily Injury, Property Damage and contractual Liability coverage for "Any Auto" which includes coverage for any owned, hired, borrowed and non-owned automobile, trailer, and equipment coverage, with limits no less than $1,000,000 occurrence (per accident for bodily injury and property damage) and $2,000,000 policy aggregate.

3. **Workers' Compensation** – Statutory Limits/**Employers' Liability** – No less than $1,000,000 per accident for bodily injury or disease.

4. **Builder's Risk** – (Course of Construction) insurance utilizing an "All Risk" (Special Perils) coverage form, with limits equal to the completed value of the project and no coinsurance penalty provisions.

5. **Contractor's Pollution Legal Liability Insurance** – Limits of no less than $2,000,000 per occurrence or claim, and $2,000,000 policy aggregate.

(b) The County, its officers, agents, employees and volunteers shall be named as additional insured on all but the workers' compensation and professional liability coverages. . **[NOTE: Evidence of additional insured may be needed as a separate endorsement due to wording on the certificate negating any additional writing in the description box.]** It shall be a requirement under this agreement that any available insurance proceeds broader than or in excess of the specified minimum Insurance coverage requirements and/or limits shall be available to the Additional Insured. Furthermore, the requirements for coverage and limits shall be (1) the minimum coverage and limits specified in this Agreement; or (2) the broader coverage and maximum limits of coverage of any Insurance policy or proceeds available to the named Insured; whichever is greater.

1. The Additional Insured coverage under the Contractor's policy shall be "primary and non-contributory" and will not seek contribution from the County's insurance or self insurance and shall be at least as broad as CG 20 01 04 13.

2. The limits of Insurance required in this agreement may be satisfied by a combination of primary and umbrella or excess Insurance. Any umbrella or excess Insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and non contributory basis for the benefit of the County of Yolo (if agreed to in a written contract or agreement) before the County's own Insurance or self insurance shall be called upon to protect it as a named insured.

3. Said policies shall remain in force through the life of this Agreement and, with the exception of professional liability coverage, shall be payable on a "per occurrence" basis unless the County Risk Manager specifically consents in writing to a "claims made" basis. For all "claims made" coverage, in the event that the Contractor changes insurance carriers Contractor shall purchase "tail" coverage covering the term of this Agreement and not less than three years thereafter. Proof of such "tail" coverage shall be required at any time that the Contractor changes to a new carrier prior to receipt of any payments due.

4. The Contractor shall declare all aggregate limits on the coverage before commencing performance of this Agreement, and the County's Risk Manager reserves the right to require higher aggregate limits to ensure that the coverage limits required for this Agreement as set forth above are available throughout the performance of this Agreement.

5. Any deductibles or self-insured retentions must be declared to and are subject to the approval of the County Risk Manager. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied either by the named Insured or Yolo County.

6. Each insurance policy shall be endorsed to state that coverage shall not be suspended, voided, canceled by either party, reduced in coverage or in limits except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the Director (ten (10) days for delinquent insurance premium payments).

7. Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise approved by the County Risk Manager.

8. The policies shall cover all activities of Contractor, its officers, employees, agents and volunteers arising out of or in connection with this Agreement.

9. For any claims relating to this Agreement, the Contractor's insurance coverage shall be primary, including as respects the County, its officers, agents, employees and volunteers. Any insurance maintained by the County shall apply in excess of, and not contribute with, insurance provided by Contractor's liability insurance policy.

10. The insurer shall waive all rights of subrogation against the County, its officers, employees, agents and volunteers.

(c) Prior to commencing services pursuant to this Agreement, Contractor shall furnish the County with original endorsements reflecting coverage required by this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. All endorsements are to be received by, and are subject to the approval of, the County Risk Manager before work commences. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications.

(d) During the term of this Agreement, Contractor shall furnish the County with original endorsements reflecting renewals, changes in insurance companies and any other documents reflecting the maintenance of the required coverage throughout the entire term of this Agreement. The endorsements are to be signed by a person authorized by that insurer to bind coverage on its behalf. Upon County's request, Contractor shall provide complete, certified copies of all required insurance policies, including endorsements reflecting the coverage required by these specifications. Yolo County reserves the right to

obtain a full certified copy of any Insurance policy and endorsements. Failure to exercise this right shall not constitute a waiver of right to exercise later.

(e) Contractor agrees to include with all Subcontractors in their subcontract the same requirements and provisions of this agreement including the indemnity and Insurance requirements to the extent they apply to the scope of the Subcontractor's work. Subcontractors hired by Contractor agree to be bound to Contractor and the County of Yolo in the same manner and to the same extent as Contractor is bound to the County of Yolo under the Contract Documents. Subcontractor further agrees to include these same provisions with any Sub-subcontractor. A copy of the Owner Contract Document Indemnity and Insurance provisions will be furnished to the Subcontractor upon request. The General Contractor/**and or Contractor** shall require all Subcontractors to provide a valid certificate of insurance and the required endorsements included in the agreement prior to commencement of any work and General Contractor/**and or Contractor** will provide proof of compliance to the County of Yolo.

(f) Contractor shall maintain insurance as required by this contract to the fullest amount allowed by law and shall maintain insurance for a minimum of five years following the completion of this project. In the event Contractor fails to obtain or maintain completed operations coverage as required by this agreement, the County at its sole discretion may purchase the coverage required and the cost will be paid by Contractor.

7. COMPLIANCE WITH LAWS. Contractor shall comply with all relevant federal, state, and local statutes, regulations, ordinances, rules, orders, and other laws in effect when performing the services required by this Agreement, all as set forth in the General Conditions (including but not limited to Article 20 thereof).

(a) Special Terms and Conditions for Federal Funded Contracts

1. Equal Employment Opportunity

a) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following:

i. Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

b) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

c) The contractor will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with the contractor's legal duty to furnish information.

d) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

e) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

f) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

g) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

h) The contractor will include the portion of the sentence immediately preceding paragraph (a) and the provisions of paragraphs (a) through (h) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States. The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work:

Provided, That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract. The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance. The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to the Executive Order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive Order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

2. Compliance with the Davis-Bacon Act

a) All transactions regarding this contract shall be done in compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) and the requirements of 29 C.F.R. pt. 5 as may be applicable. The contractor shall comply with 40 U.S.C. 3141-3144, and 3146-3148 and the requirements of 29 C.F.R. pt. 5 as applicable.

b) Contractors are required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor.

c) Additionally, contractors are required to pay wages not less than once a week.

3. Compliance with the Copeland Anti-Kickback Act

a) Contractor. The contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into this contract.

b) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as FEMA may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses.

c) Breach. A breach of the contract clauses above may be grounds for termination of the contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12.

4. Compliance with the Contract Work Hours and Safety Standards Act

a) Overtime requirements. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

b) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the clause set forth in paragraph (b)(1) of this section the contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (b)(1) of this section, in the sum of $27 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (b)(1) of this section.

c) Withholding for unpaid wages and liquidated damages. The United States Department of Treasury or the County of Yolo shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (b)(2) of this section.

d) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraph (b)(1) through (4) of this section and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (b)(1) through (4) of this section.

5. Clean Air Act:

a) The Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act, as amended, 42 USC §7401 et. Seq.

b) The Contractor agrees to report each violation to the County and understands and agrees that the County will, in turn, report each violation as required to assure notification to the

United States Department of the Treasury, and the appropriate Environmental Protection Agency Regional Office.

c) The Contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by United States Department of the Treasury.

6. Federal Water Pollution Control Act:

a) The Contractor agrees to comply with all applicable standards, orders or regulations issued pursuant to the Federal Water Pollution Control Act, as amended, 33 USC §1251 et. Seq.

b) The Contractor agrees to report each violation to the County and understands and agrees that the County will, in turn, report each violation as required to assure notification to the United States Department of the Treasury and the appropriate Environmental Protection Agency Regional Office.

c) The Contractor agrees to include these requirements in each subcontract exceeding $150,000 financed in whole or in part with Federal assistance provided by United States Department of the Treasury.

7. Procurement of Recovered Materials:

a) In performance of this contract, the Contractor shall make maximum use of products containing recovered materials that are EPA-designated items unless the product cannot be acquired –

i. Competitively within a timeframe providing for compliance with the contract performance schedule;
ii. Meeting contract performance requirements; or
iii. At a reasonable price.

b) Information about this requirement, along with the list of EPA-designate items, is available at EPA's Comprehensive Procurement Guidelines web site, https://www.epa.gov/smm/comprehensive-procurement-guideline-cpg-program

8. Domestic Preference for Procurements

To the extent consistent with law, and to the greatest extent practicable, the County prefers the purchase, acquisition, or use of goods, products, or materials produced in the United States, including, but not limited to iron, aluminum, steel, cement, and other manufactured products.

"Produced in the United States" means, for iron and steel products, that all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

"Manufactured products" means items and construction materials composed in whole or in part of non-ferrous metals such as aluminum; plastics and polymer-based products such as polyvinyl chloride pipe; aggregates such as concrete; glass, including optical fiber; and lumber.

9. No Obligation by the Federal Government:
The Federal Government is not a party to this contract and is not subject to any obligations or liability to the County, Contractor, or any other party pertaining to any matter resulting from this contract.

10. Program Fraud and False or Fraudulent Statements or Related Acts:
The Contractor acknowledges that 31 USC Chapter 38 (Administrative Remedies for False Claims and Statements) applies to the Contractor's actions pertaining to this contract.

8. INDEPENDENT CONTRACTOR. While performing the services required by this Agreement for Construction, Contractor shall act as an independent contractor, not as an employee of County, and thus shall be subject to the direction and control of County only for the final result. Contractor shall be solely responsible for paying all required employment taxes and for meeting all employment obligations related to its performance of the services, including but not limited to payment of worker's compensation, liability insurance, social security taxes (i.e., FICA), and tax withholding. Moreover, Contractor shall indemnify, defend (upon County's written request), and protect County from any liability County may incur to federal or state governments for such taxes and obligations. This Agreement does not entitle Contractor or its officers, employees, subcontractors, or agents to vacation pay, sick leave, retirement benefits, disability or unemployment insurance, or employee benefits of any kind from County.

9. INSPECTIONS. All inspections and any remedial action required in response thereto shall be governed by the General Conditions, including but not limited to Article 18 thereof.

10. PERFORMANCE BONDS. Within the time set forth in the Proposal and before performing any services pursuant to this Agreement, Contractor shall provide to County the bonds required by the General Conditions, including but not limited to Article 2 thereof. All other matters relating to bonds shall be governed by the General Conditions.

11. TERM OF AGREEMENT; EARLY TERMINATION. The term and termination of this Agreement shall be governed by the General Conditions, including but not limited to Article 27 thereof.

12. GUARANTY. Guarantees and warranties shall be governed by the General Conditions, including but not limited to Article 26 thereof.

13. AUDIT PROVISIONS. Contractor's records which shall include but not limited to accounting records, subcontract files, correspondence, change order files, and any other supporting evidence necessary to substantiate charges relating to this contact (all the foregoing hereinafter referred to as "records") shall be open to inspection and subject to audit and/or reproduction, during normal working hours, by County's agent or its authorized representative to the extent necessary to adequately permit evaluation and verification of any invoices, payments, or claims submitted by the contractor or any of his payees pursuant to the execution of this Agreement. For the purpose of such audits, inspections, examination, and evaluations, the County's agent or authorized representative shall have access to said records from the effective date of this Agreement, for the duration of the work, and until six years after the date of final payment by County to Contractor pursuant to this Agreement.

14. MISCELLANEOUS.

(a) Notice. Except as provided in Section 6, all correspondence regarding this Agreement, including invoices, payments, and notices, shall be directed to the following persons at the following addresses and phone number:

County:
Kevin Yarris
Director, General Services
120 West Main Street Suite D
Woodland, CA 95695
Telephone: (530) 406-5005

Contractor:
Broward Builders, Inc.
Randy Cantrell, Vice President
1200 E Kentucky Avenue
Woodland CA 95776
Telephone: (530) 666-5635

If written, correspondence shall be sent by personal delivery (including overnight delivery service); by U.S. Mail, postage prepaid; or by fax during business hours. Notices must be actually received to be effective.

(b) Time of Essence. Time is of the essence of this Agreement.

(c) Interpretation and Jurisdiction. This Agreement shall be interpreted and applied in accordance with California law. The plans and specifications attached as Exhibit A are part of this Agreement. If any conflict arises between Exhibit A and the terms and conditions set forth in Sections 1 through 14 of this Agreement, then Sections 1 through 14 shall govern.

(d) Waiver. A party's failure to insist on strict performance of this Agreement or to exercise any right or remedy upon breach of this Agreement shall not constitute a waiver of such performance, right, or remedy. No waiver is binding unless set forth in a writing signed by the waiving party.

(e) Assignments and subcontracts. Contractor shall not assign this Agreement. Contractor may subcontract any of the services described in Section 1 (Scope of Work) with County's prior written consent. Contractor shall require each subcontractor to agree in writing to be bound by Section 4 (Indemnification) and Section 6 (Insurance) of this Agreement. County shall consider all subcontractors to be Contractor’s employees, and Contractor shall be responsible for their work.

(f) Dispute Resolution. Unless the General Conditions provide otherwise, if the Contract

Administrator notifies Contractor that the work or any portion of it is unacceptable, then the Contract Administrator and Contractor shall meet at the Yolo County Office of County Administrator, 625 Court Street #202, Woodland, California, within five (5) days after Contractor receives the notice (excluding Saturdays, Sundays, and County observed holidays) and shall attempt in good faith to resolve their differences. Payment shall not constitute approval or acceptance of any defective work.

(g) Integration. This Agreement sets forth the parties' entire understanding regarding the matters set forth in Sections 1 through 14. It supersedes all prior Agreements and representations, written and oral, and may be modified only by a written Agreement approved by County's Board of Supervisors and signed by County and Contractor.

(h) Effective date. This Agreement shall be effective on the last date shown below.

SECTION 00 41 00

BID FORM
Project: Yolo Branch Library, 37750 Sacramento Street, Yolo, California

1. The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an agreement with the County of Yolo ("The County") in the form included in the Contract Documents, Document 00 52 00 Contract, to perform and furnish all Work as specified or indicated in the Contract Documents for the Contract Sum and within the Contract Time indicated in this Bid and in accordance with all other terms and conditions of Contract Documents.

2. Bidder accepts all of the terms and conditions of the Contract Documents and the Notice to Bidders, including without limitation, those dealing with the disposition of Bid security. Bidder will sign and submit the Agreement with Bonds and other documents required by Document 00 20 00 Instructions to Bidders, within ten (10) calendar days after receipt of the County's Notice of Award.

3. In submitting this Bid, Bidder represents:

   (a) Bidder has examined copies of all of the Contract Documents and of the following Addenda (receipt of all of which is hereby acknowledged).

Addendum #	Issue Date	Bidder's Acknowledgement (initials)
Addendum #1	June 16, 2021	
Addendum #2	June 22, 2021	
Addendum #3	June 24, 2021	

   (b) Bidder has visited the site and has examined thoroughly and understood the nature and extent of the Contract Documents, Work, Site, locality, actual conditions, as built conditions, and all local conditions and federal, state and local laws and regulations that in any manner may affect cost, progress, performance or furnishing of Work or which relate to any aspect of the means, methods, techniques, sequences or procedures of construction to be employed by Bidder and safety precautions and programs incident thereto;

   (c) Bidder has examined thoroughly and understood all reports, drawings and/or reports, available for Bidding purposes and accepts the determination set forth in these documents and Document 00700 General Conditions of the limited extent

of the information contained in such reports and drawings upon which the Bidder may be entitled to rely. Bidder agrees that except for the information so identified, Bidder does not and shall not rely on any other information contained in such reports and drawings.

(d) Bidder has conducted or obtained and has understood all such examinations, investigations, explorations, tests, reports and studies (in addition to or to supplement those referred to in paragraph 3(c) above) which pertain to the subsurface conditions, as built conditions, Underground Facilities and all other physical conditions at or contiguous to the site or otherwise which may affect the cost, progress, performance or furnishing of Work, as Bidder considers necessary for the performance or furnishing of Work at the Contract Sum, within the Contract Time and in accordance with the other terms and conditions of Contract Documents, including specifically the provisions of the General Conditions; and no additional examinations, investigations, explorations, tests, reports, studies or similar information or data are or will be required by Bidder for such purposes;

(e) Bidder has correlated its knowledge and the results of all such observations, examinations, investigations, explorations, tests, reports and studies with the terms and conditions of the Contract Documents;

(f) Bidder has given Project Manager prompt written notice of all conflicts, errors, ambiguities or discrepancies that it has discovered in or among the Contract Documents and as built and actual conditions and the written resolution thereof by Project Manager is acceptable to Bidder.

4. Based on the foregoing, Bidder proposes and agrees to fully perform the Work within the time stated and in strict accordance with the Contract Documents for the following sum of money listed in the following Bid Schedule:

Base Bid Total Price for the Yolo Branch Library Project

$3,575,000.00

(written) three million five hundred seventy five thousand **Dollars**

Enclosed find (Bidder's Bond) certified check or cashier's check No._____ of the

Travelers Casualty & Surety Co. (Company/Bank), for $_____.

Dated this 29th day of June, 2021

Unit Pricing

Off-haul and disposal of unsuitable soil (no haz mat), per cubic yard: $ 23.00

Import of engineered fill, per cubic yard: $ 31.00

5. Subcontractors are listed on the attached document 00 43 00, Subcontractors List.

6. The undersigned understands that the County reserves the right to reject this Bid, but that this Bid shall remain open and shall not be withdrawn for a period of ninety (90) calendar days from the date prescribed for its opening (to accommodate State financing process).

7. If written notice of the acceptance of this Bid, hereinafter referred to as Notice of Award, is mailed or delivered to the Undersigned within the stipulated time after the date set for the opening of this Bid, or at any other time thereafter before it is withdrawn, the undersigned will execute and deliver the documents required by Document 00 20 00 Instructions to Bidders including, but not limited to, Document 00 52 00 Agreement, Document 00 61 00 Performance Bond, and Document 00 62 00 Payment Bond and Escrow Bid Documents, all within ten (10) calendar days after personal delivery or after receipt in the mails of the Notice of Award.

8. Notice of Award or request for additional information may be addressed to the undersigned at the address set forth below.

9. The undersigned herewith encloses a cash, cashier's check, certified check or corporate surety bond in the amount of ten percent (10%) of the total of Bid Items and made payable to: County of Yolo and is subject to all conditions imposed by law.

10. The undersigned agrees to commence work under this Contract on the date established and to complete all work within the time specified in Document 00 52 00 (Contract).

11. The undersigned agrees that, in accordance with Document 00 70 00 General Conditions liquidated damages for failure to complete all work in the contract within the time specified are as set forth in Document 00 52 00 (Agreement).

12. The undersigned herewith encloses the completed Non-Collusion Affidavit – 00 45 10.

13. The undersigned herewith encloses the completed DAS Form 7 – 00 45 26.

14. The undersigned herewith encloses the completed Bidder Information Sheet – 00 45 00.

AGREEMENT TO TRAIN APPRENTICES

DAS Form 7

Joint Apprenticeship Committee Participation Requirement

The County adopted a policy that one of requirements to be deemed a responsive bidder is that the bidder must be participating in a joint apprenticeship committee. The California Department of Industrial Relations defines a joint apprenticeship committee as a committee made up of equal number of members from labor and management. **Bidders must complete and submit the attached California Department of Industrial Relations' DAS-7 form that documents the bidder's participation in a joint apprenticeship committee.** The County will verify participation prior to the award.

Re: Signatory Status

To Whom It May Concern,

The apprenticeship standards submitted by the Operating Engineers JATC were approved by the Federal Department of Labor in 2007 and the California Department of Industrial Relations, Division of Apprenticeship Standards in 1962. The apprenticeship program has operated continuously since its inception in 1962 and serves the 46 Counties of Northern California.

This letter is to advise you that Broward Builders, Inc. is approved to train apprentices by virtue of their signatory status with Operating Engineers Local #3 Union in Northern California.

All apprentices employed by Broward Builders, Inc. that perform operating engineer work are registered with both the State of California Division of Apprenticeship Standards and the Federal Department of Labor. The apprentices are active participants in the apprenticeship programs sponsored by Operating Engineers Local #3 – JATC Training Committee for Northern California. Furthermore, be advised that Operating Engineers Local #3 – JATC Training Committee for Northern California does maintain a graduation rate of at least 55%.

RE: BROWARD BUILDERS, INC.

To Whom It May Concern:

Please be advised that Broward Builders, Inc. is a signatory employer under the Cement Masons Master Labor Agreement between the Associated General Contractors of California, Inc. and District Council of Plasterers and Cement Masons of Northern California.

Pursuant to the terms of said agreement, Broward Builders, Inc. is approved to employ and train Cement Mason apprentices under the Apprenticeship Standards of the Northern California Cement Masons Joint Apprenticeship and Training Committee and as certified by the State of California, Department of Industrials Relations, Division of Apprenticeship Standards, and the U.S. Department of Labor, Office of Apprenticeship.

If you have any questions or need further information, please do not hesitate to call.

Sincerely,

Veronica Godinez
Director

SECTION 00 42 00

COUNTY OF YOLO BIDDER'S BOND

We, Broward Builders, Inc. as Principal, and Travelers Casualty and Surety Company of America as Surety, are bound unto THE COUNTY OF YOLO as Owner (Obligee), in the penal sum of ten percent (10%) of the total amount of the bid of the Principal submitted to the Obligee for the work described below, for the payment of which sum we bind ourselves, jointly and severally,

THE CONDITION OF THIS OBLIGATION IS SUCH, THAT:

WHEREAS, the Principal is submitting a bid to the Obligee, for the **Yolo Branch Library** for which bids are to be opened in public in the Erwin Meier Administration Building, 625 Court Street, Woodland, CA 95695.

NOW THEREFORE, if Principal is awarded the Contract and, within the time and manner required under the specifications, after the prescribed forms are presented to him for signature, enters into a written contract, in the prescribed form, in accordance with the bid, and files two bonds with the Obligee, one to guarantee faithful performance of the contract and the other to guarantee payment for labor and materials, as required by law, then this obligation shall be null and void; otherwise it shall remain in full force.

In the event suit is brought upon this bond by the Obligee and judgment is recovered, the Surety shall pay all costs incurred by the Obligee in such suit, including reasonable attorney's fees to be fixed by the Court.

My Commission expires the **30th** day of **June, 2021**

_____
Anna P. Nowik, Notary Public

This Power of Attorney is granted under and by the authority of the following resolutions adopted by the Boards of Directors of Travelers Casualty and Surety Company of America, Travelers Casualty and Surety Company, and St. Paul Fire and Marine Insurance Company, which resolutions are now in full force and effect, reading as follows:

RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President, any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary may appoint Attorneys-in-Fact and Agents to act for and on behalf of the Company and may give such appointee such authority as his or her certificate of authority may prescribe to sign with the Company's name and seal with the Company's seal bonds, recognizances, contracts of indemnity, and other writings obligatory in the nature of a bond, recognizance, or conditional undertaking, and any of said officers or the Board of Directors at any time may remove any such appointee and revoke the power given him or her; and it is

FURTHER RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President may delegate all or any part of the foregoing authority to one or more officers or employees of this Company, provided that each such delegation is in writing and a copy thereof is filed in the office of the Secretary; and it is

FURTHER RESOLVED, that any bond, recognizance, contract of indemnity, or writing obligatory in the nature of a bond, recognizance, or conditional undertaking shall be valid and binding upon the Company when (a) signed by the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary and duly attested and sealed with the Company's seal by a Secretary or Assistant Secretary; or (b) duly executed (under seal, if required) by one or more Attorneys-in-Fact and Agents pursuant to the power prescribed in his or her certificate or their certificates of authority or by one or more Company officers pursuant to a written delegation of authority; and it is

FURTHER RESOLVED, that the signature of each of the following officers: President, any Executive Vice President, any Senior Vice President, any Vice President, any Assistant Vice President, any Secretary, any Assistant Secretary, and the seal of the Company may be affixed by facsimile to any Power of Attorney or to any certificate relating thereto appointing Resident Vice Presidents, Resident Assistant Secretaries or Attorneys-in-Fact for purposes only of executing and attesting bonds and undertakings and other writings obligatory in the nature thereof, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be valid and binding upon the Company and any such power so executed and certified by such facsimile signature and facsimile seal shall be valid and binding on the Company in the future with respect to any bond or understanding to which it is attached.

I, **Kevin E. Hughes**, the undersigned, Assistant Secretary of Travelers Casualty and Surety Company of America, Travelers Casualty and Surety Company, and St. Paul Fire and Marine Insurance Company, do hereby certify that the above and foregoing is a true and correct copy of the Power of Attorney executed by said Companies, which remains in full force and effect.

Dated this 11th day of June , **2021** .

PROJECT MANUAL

Volume 2: Project Specifications

May 7, 2021

Yolo Branch Library

37750 Sacramento Street, Yolo, California

County of Yolo

YOLO COUNTY LIBRARY

DIVISION 1 - GENERAL REQUIREMENTS		
	01 00 00	General Requirements
	01 10 00	Summary
	01 20 00	Application for Payment
	01 23 13	Phasing
	01 25 00	Product Options and Substitutions
	01 26 00	Contract Modification Procedures
	01 26 15	Requests for Interpretation (RFI)
	01 29 73	Schedule of Values
	01 31 19	Project Meetings
	01 32 16	Construction Schedules
	01 32 33	Photographic Documentation
	01 33 23.21	Electronic Submittal Procedures
	01 42 00	References
	01 45 23	Testing Laboratory Procedures
	01 50 00	Temporary Facilities and Controls
	01 56 39	Temporary Tree and Plant Protection
	01 66 00	Product Storage and Handling Requirements
	01 70 00	Record Documents
	01 74 00	Cleaning and Waste Management
	01 74 19	Construction Waste Management and Disposal
	01 78 00	Contract Closeout
	01 78 37	Warranties
DIVISION 2 – EXISTING CONDITIONS		
	02 32 13	Subsurface Conditions
	02 41 19	Selective Demolition
DIVISION 3 - CONCRETE		
		Cast-in-Place Concrete - refer to Structural Drawings
DIVISION 4 - MASONRY		
	04 21 13	Thin Brick Veneer
	04 22 23	Concrete Unit Masonry
DIVISION 5 - METALS		
	05 50 00	Metal Fabrications
	05 51 33	Metal Ladders
	05 52 13	Pipe and Tube Railings
DIVISION 6 – WOOD, PLASTICS, AND COMPOSITES		
		Rough Carpentry and Glu-Laminated Wood Members - refer to Structural Drawings
	06 16 43	Insulating Sheathing
	06 20 00	Finish Carpentry
	06 41 00	Architectural Wood Casework
	06 60 00	PVC Moulding and Trim

DIVISION 7 – THERMAL AND MOISTURE PROTECTION		
	07 21 00	Thermal Insulation
	07 31 13	Composition Shingles
	07 46 46	Mineral Fiber Cement Siding
	07 54 19	Single Ply Membrane Roofing
	07 62 00	Sheet Metal Flashings and Trim
	07 71 00	Roof Specialties
	07 84 13	Penetration Firestopping
	07 92 00	Joint Sealants
DIVISION 8 – OPENINGS		
	08 11 13	Hollow Metal Doors and Frames
	08 13 73	Aluminum-Wood Multi-Slide Doors
	08 14 33	Stile and Rail Wood Doors
	08 34 00	Special Function Doors
	08 52 13	Aluminum Clad Wood Windows
	08 71 00	Door Hardware
	08 71 13	Automatic Door Operators
	08 80 00	Glazing
		Louvers and Vents - refer to Mechanical Drawings
DIVISION 9 - FINISHES		
	09 29 00	Gypsum Board
	09 30 00	Tiling
	09 51 13	Suspended Acoustical Ceilings
	09 54 26	Linear Wood Ceiling System
	09 65 19	Resilient Tile Flooring
	09 68 13	Tile Carpeting
	09 77 20	Fiberglass Reinforced Panels
	09 91 00	Painting and Coating
DIVISION 10 - SPECIALTIES		
	10 11 46	Linoleum Bulletin Board
	10 14 00	Signage
	10 21 13	Toilet Compartments
	10 28 00	Toilet Accessories
	10 31 00	Manufactured Fireplaces
	10 44 13	Fire Extinguishers and Cabinets
DIVISION 11 - EQUIPMENT		
	11 31 00	Kitchen Appliances
	11 51 00	Library Equipment
DIVISION 12 – FURNISHINGS		
	12 24 13	Roller Window Shades
	12 92 00	Site Furnishings
DIVISION 21 – FIRE SUPPRESSION		
		Water-Based Fire Suppression Systems – by Contractor

DIVISION 22 – PLUMBING		
	22 05 00	Basic Mechanical Materials and Methods
	22 05 29	Hangers and Supports for Plumbing Piping and Equipment
	22 07 19	Plumbing Piping Insulation
	22 11 16	Domestic Water Piping
	22 13 16	Sanitary Waste and Vent Piping
	22 13 19	Sanitary Waste Piping Specialties
	22 40 00	Plumbing
DIVISION 23 – HEATING, VENTILATION AND AIR CONDITIONING		
	23 07 13	Duct Insulation
	23 08 00	HVAC
	23 31 13	Metal Ducts
DIVISION 26 - ELECTRICAL		
	26 05 00	Common Work Results for Electrical
	26 05 19	Low-Voltage Electrical Power Conductors and Cables
	26 05 26	Grounding
	26 05 33	Raceways and Boxes for Electrical Systems
	26 24 16	Panelboards
	26 27 26	Wiring Devices
	26 28 00	Low-Voltage Circuit Protective Devices
	26 50 00	Exterior Lighting
	26 51 00	Interior Lighting
	26 52 00	Emergency Lighting
	26 53 00	Exit Signs
DIVISION 27 - COMMUNICATIONS		
	27 10 00	Structured Cabling System
DIVISION 28 – ELECTRONIC SAFETY AND SECURITY		
		Fire Detection and Alarm - refer to Electrical Drawings
DIVISION 31 – EARTHWORK		
		refer to Civil Drawings
DIVISION 32 EXTERIOR IMPROVEMENTS		
		Concrete and Asphalt Paving – refer to Civil Drawings
	32 14 16	Sand Set Brick Pavers
	32 15 40	Decomposed Granite
	32 84 00	Irrigation System
	32 92 10	Landscape Turf Grass
	32 93 00	Landscape Installation
	32 98 00	Landscape Maintenance
DIVISION 33 - UTILITIES		
		refer to Civil Drawings

END TABLE OF CONTENTS for VOLUME 2

GENERAL

1.1 SUMMARY

A. This Section describes general requirements that pertain to each Section of these Specifications.

1.2 COORDINATION OF DOCUMENTS

A. Documents affecting all Work in this contract and each Section of these Specifications include, but are not limited to, Sections in Division One of these Specifications, the General Conditions of the Contract and the Supplementary Conditions. These documents must be read with the other Contract Documents and Sections of this Specification as a whole to complete the intent of the contract.

B. Sections in Division One of these Specifications contain obligations for Work of remaining Sections and must be read with all Sections to identify all the requirements of each Section.

C. The layout of materials, equipment and systems is generally diagrammatic, unless specific dimensions are indicated. Some work may be shown offset for clarity. The actual location of all materials and systems above and below the ceiling, including but not limited to, piping, ductwork, fixtures, equipment, supports, conduit, suspension wires, ceiling grids and panels, etc., shall be carefully planned and coordinated by the General Contractor prior to installation of any work. The General Contractor shall be responsible for coordinating the architectural, structural, plumbing, mechanical, electrical, and/or other elements of the work.

1.3 RELATED WORK BETWEEN SECTIONS

A. This Contract may require several trades to complete the finished intent of the Work. Coordinate the various trades and pertinent sections of these Specifications with the Drawings to ensure proper and timely completion of the Work.

1.4 QUALITY ASSURANCE

A. For all Sections of Work in these Specifications and for all tasks and obligations of the Contract, provide skilled work persons thoroughly trained and experienced in the types of construction methods and techniques in each trade required to complete the Work, and who shall be present at all times during the progress of the Work of each trade.

B. No exception will be made to Contractor nor acceptance given to unacceptable work caused by lack of skill, inappropriate methods or lack of due care in craftsmanship. The level of performance shall, at a minimum, meet or exceed the level of performance set by a regionally or nationally recognized association that produces, publishes, and enforces industry standards for that trade or craft, unless a higher level of performance is specified herein. All such unacceptable work shall be replaced by the Contractor in a good craftsman-like manner at no additional expense to the Owner.

1.5 CODES AND STANDARDS

A. All Work of this contract shall conform to the latest edition of all pertinent codes and regulations governing the completion of the Work.

B. Trade association publications and industry standards as published by recognized bodies within each trade shall be references for conducting Work and in inspection of the quality of Work in each Section of these Specifications. See Section 014200 – References.

1.6 CUTTING AND PATCHING

A. Provide required protection including, but not necessarily limited to, shoring, bracing, and support to maintain structural integrity of the Work.

B. Perform cutting and demolition by methods which will prevent damage to other portions of the Work and provide proper surfaces to receive installation of repair and new work

C. Perform fitting and adjusting of products to provide finished installation complying with the specified tolerances and finishes.

1.7 SURFACE CONDITIONS

A. Prior to commencement of Work in any trade, carefully inspect the installed Work of all other trades and verify that all such Work is complete to the point where subsequent Work may properly commence.

B. Verify the Work to be performed may be installed in strict accordance with all pertinent codes and regulations, the original design, addendum and change orders, approved shop drawings and manufacturers' literature.

1.8 DISCREPANCIES

A. In the event of discrepancies in any area of Work, immediately notify the Architect. Do not proceed with installation until all such discrepancies have been fully resolved.

1.9 SITE DUST CONTROL

A. Use all means necessary to prevent spread of dust during performance of the Work. Thoroughly moisten all surfaces as required to prevent dust being a nuisance to the public and concurrent performance of other Work on the site.

1.10 PERMITS

A. Building Permit: The Contractor shall pull the Building Permit from the County (Jurisdiction Having Authority). The Owner will pay related permit and impact fees.

B. Other Permits: The Contractor shall secure Right-of-Way Encroachment permits and all deferred Fire Protection (fire sprinkler, fire underground service, and fire alarm) permits. Fees for these permits shall be included in the Contract and paid by the Contractor.

1.11 CONTRACT DOCUMENTS

A. The Owner will provide the Contractor with one electronic set of plans and specifications in PDF format for the construction of the project. The plans and specifications provided by the Owner will match the documents approved by the County under the building permit. All printed sets, in whole or in part, required by the Contractor to perform the work shall be at the Contractor’s expense.

1.12 FIELD CONDITION VERIFICATION

A. The Contractor shall field verify existing field conditions and accept them as conditions of this scope of work.

1.13 SEPARATE CONTRACTORS

A. If any part of this Contractor's work depends upon the work of a separate Contractor, this Contractor shall inspect such other work and promptly report in writing to the Architect any defects in such other work that render it unsuitable to receive the work of this Contractor. Failure of this Contractor to so inspect and report shall constitute an acceptance of the other Contractor's work, except as to defects which may develop in other Contractor's work after execution of this Contractor's work.

1.14 CONSTRUCTION LIMITS

A. Contractor and Subcontractor work shall be confined within the areas designated as Construction Limits. The Construction Limits shall be set by the Construction Project Manager, and it shall be the responsibility of the General Contractor and Subcontractors to verify and follow these limits.

B. The Contractor shall meet with the Construction Project Manager prior to the beginning of the work to establish storage areas for materials and equipment, and access routes for delivery and removal of materials, supplies, equipment, etc. that are required for this work.

1.15 COMPLETENESS OF WORK

A. It is the intent of the contract documents that the Contractor shall turn over to the Owner a complete project. Any work not specifically called for or specified but required to comply with the intent of quality and completeness, shall be performed as part of the contract.

1.16 PENETRATIONS AT FIRE-RATED WALLS

A. All penetrations/openings through rated walls, ceilings, floors, etc. shall be sealed with an approved fire stopping material of equal to or greater rating (i.e., 1-hr., 2-hr., 3-hr., etc.). Fire stopping material used must be approved for use by the California State Fire Marshal. Contractor must provide the Architect with written verification and installation details prior to installation which indicates proper fire rating for the given condition and proof of California State Fire Marshall approval. Reference Section 07 84 13 Penetration Firestopping in this specification.

1.17 ENCLOSING OF WORK

A. Do not allow or cause any of the work performed or installed to be covered up or enclosed by work of this Section prior to all required inspections, tests and approvals.

B. Should any of the work be so enclosed or covered up before it has been approved, uncover all such work at no additional cost to the Owner.

C. After the work has been completely inspected, tested and approved, make all repairs and replacements necessary to restore the work to the condition in which it was found at the time of uncovering, all at no additional cost to the Owner.

END OF SECTION 01 00 00

GENERAL

1.1 SUMMARY OF WORK

A. Project: Yolo Branch Library

B. Owner: Yolo County Library, County of Yolo

C. Architect: WMB Architects

D. Construction Manager: Kitchell

E. The Work consists of the construction of 4,000 square foot (approximate) single story Type VB library building and associated site improvements as set forth on the Drawings and described in these Specifications.

F. Owner-Furnished Items: The following products will be furnished by Owner and shall be installed by Contractor as part of the Work:

1. Items salvaged from original library building identified on the Drawings for integration into new construction.

1.2 WORK RESTRICTIONS

A. COMMON AREAS:

1. All "common" areas impacted by this scope of work shall be left in the same condition as prior to work commencing. This shall include but not be limited to cleaning and repairing finishes damaged or soiled in executing this Contract.

B. COORDINATION WITH OWNER:

1. All work is to be scheduled with the Construction Manager including construction access and storage. The Construction Schedule procedure shall be approved by the Construction Manager prior to Start of Construction. No work shall commence at project site prior to the issuance and posting of a building permit.

C. FACILITY UTILITIES:

1. The Contractor shall make every effort to keep the existing facility utilities in operation. The Contractor shall notify the Owner a minimum of 48 hours in advance for allowance of disruption in services. Disruption in services shall only be at the Owner's discretion.

D. FACILITY DAMAGE:

1. It shall be the Contractor's responsibility to repair or replace any existing items or surfaces that are damaged during the construction. They shall be restored to original condition or finished to match adjacent surfaces at no additional cost to the Owner.

E. BUILDING AND SITE SECURITY

1. The Contractor shall be responsible for maintaining the building and the site in a secured condition in the area that is involved in this work at all times during the construction.

1.3 COVID-19 SPECIAL REQUIREMENTS

A. Some or all of the work will be performed during a state of emergency due to the COVID-19 pandemic. Minimizing the risk of transmission among workers is essential. Contractor shall take reasonable efforts to follow these guidelines to increase hygiene on the jobsite and include within their bid the expense to accommodate:

1. Add sanitary facilities (toilet and hand washing stations with soap and hand sanitizer provided). Workers should both wash their hands with soap for twenty seconds and use hand sanitizer often.
2. Provide prescreening and temperature checks of all workers prior to entering site work area. Any worker suspected of being ill shall not be allowed to enter site without evidence of negative test results of Covid-19. Any positive testing of workers shall result in notification of County Health and most current tracing requirements established at the time.
3. Perform deep cleaning on jobsites including disinfecting handrails, doorknobs, equipment handles and tools on an accelerated basis.
4. Instead of having group safety meetings, and to keep the suggested social distance, hold smaller individual safety meetings at the jobsite maintaining social distancing guidelines.
5. Keep separation of at least 6 feet as feasible while on the job and always during rest and break periods and lunches; there should not be any group gatherings.
6. Ask workers to consider bringing a lunch made at home and stay away from congested lunch trucks and coffee shops. Ask workers to try and go directly from work to home and vice versa with as little contact with the general public as possible.
7. Ensure workers wear and utilize all safety equipment available on the jobsite. Contractors should provide all protective equipment as available.
8. Instruct sick workers to stay at home.
9. Remind workers not shake hands when greeting others.
10. Remind workers not to touch their eyes, notes, or mouth with unwashed hands.

END OF SECTION 01 10 00

GENERAL

1.1 SUMMARY

A. Comply with procedures described in this Section when applying for progress payment and final payment under the Contract.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 PROCEDURES

A. Prior to start of construction, secure the Construction Manager’s approval of the schedule of values as provided in Section 01 29 73.

B. INFORMAL SUBMITTAL (unless otherwise directed by the Construction Manager):

1. Make an informal submittal of request for payment by filling in, with erasable pencil, pertinent portions of AIA Document G702, "Application and Certificate for Payment," plus continuation sheet or sheets. Provide back-up data as required to verify all stockpiled materials.

C. FORMAL SUBMITTAL (unless otherwise directed by the Construction Manager):

1. After review of the informal request by the Construction Manager, make formal submittal of request for payment by filling in the data as agreed to in 1.3 B. Sign the Application and Certificate for Payment. Submit the original of the Application, Certificate for Payment, and the continuation sheets, to the Construction Manager.

1.4 RETENTION:

A. Five percent (5%) of the certified amount be retained from each application to completion of the project.

B. Upon completion of project closeout requirements and submission of final Certificate for Payment, retention will be released to the Contractor along with the balance of payment on the Contract.

END OF SECTION 01 20 00

GENERAL

1.1 SUMMARY

A. The project is to be planned and constructed in such a way as to allow the existing modular library building to remain on site and operational (open to the public) during construction activities for the longest period of time possible.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 DESCRIPTION

A. PLANNING AND TEMPORARY CONTROLS

1. The Contractor shall develop a Construction Schedule and Temporary Controls Plan that accommodate the operation of the existing library facility to the extent described on the Drawings.

a. The Construction Schedule shall identify the timeframe within which the existing modular building must be removed from the site in order to achieve project completion within the Contract Time.

b. The Temporary Controls Plan shall describe how the construction site will be secured and public protected while allowing access to the modular library building.

B. REMOVAL OF MODULAR BUILDING

1. The County shall be responsible for decommissioning and removing the modular building from the site.

2. The Contractor shall be responsible for modifying the construction fence and other temporary controls after the removal of the modular building in order to facilitate remaining construction work.

3. The Contractor shall be responsible for demolishing existing concrete pad under modular building and remaining site paving after the removal of the modular building as required to complete the construction work.

END OF SECTION 01 23 13

GENERAL

1.1 SUMMARY

A. Procedures for securing approval of proposed substitutions.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 PRODUCT OPTIONS

A. The Contract is based upon standards of quality established in the Contract Documents.

1. In agreeing to the terms and conditions of the Contract, the Contractor has accepted a responsibility to verify that the specified products will be available and to place orders for all required materials in such a timely manner as is needed to meet his agreed construction schedule.

2. Neither the Owner nor the Architect has agreed to the substitution of materials or methods called for in the Contract Documents, except as they may specifically be approved in this Section.

B. Where the phrase "or equal" occurs in the Contract Documents, equivalent materials and/or methods may be proposed for substitution to those specified.

C. The material and/or methods specified by name establish the standard of quality. All proposed substitutions to be used in lieu of specified materials and/or methods shall in all ways be equal to or exceed the qualities of that specification.

D. Where proprietary products and/or systems are specified without the phrase “or equal”, the Owner may require the use of the specified product/system in order to maintain property standards for parts and maintenance, and/or performance. It is the Contractor’s responsibility to verify acceptance of substitutions prior to bid.

E. Substitutions will not be considered for products/ systems when specification language clearly prohibits substitutions.

1.4 SUBMITTAL OF PROPOSED SUBSTITUTIONS

A. Proposed substitutions of specified products, materials or methods, or those designated as "or equal" in the Drawings or Specifications, shall be submitted to the Architect for review a minimum of seven (7) working days in advance of the General Contract bid date.

B. Proposed substitutions will be considered only when such proposals are accompanied by a completed ‘Substitution Request’ form (template follows), full and complete technical data, and all other information required by the Architect to evaluate the proposed substitution.

C. Proposed substitutions submitted after a minimum of seven (7) working days in advance of the bid date will not be reviewed.

D. The decision of the Architect will be final.

1.5 DELAYS

A. Delays in construction arising by the non-availability of a specified material and/or method will not be considered by the Architect as justifying an extension of the agreed Time of Completion. Propose substitution for non-available items as in 1.4 above.

SUBSTITUTION REQUEST continued

The Undersigned certifies:

- Proposed substitution has been fully investigated and determined to be equal or superior in all respects to specified product.
- Same warranty will be furnished for proposed substitution as for specified product.
- Same maintenance service and source of replacement parts, as applicable, is available.
- Proposed substitution will have no adverse effect on other trades and will not affect or delay progress schedule.
- Cost data as stated above is complete. Claims for additional costs related to accepted substitution which may subsequently become apparent are to be waived.
- Proposed substitution does not affect dimensions and functional clearances.
- Payment will be made for changes to building design, including A/E design, detailing and construction costs caused by the substitution.
- Coordination, installation, and changes in the Work as necessary for accepted substitution will be complete in all respects.

END OF SECTION 01 25 00

GENERAL

1.1 SUMMARY

A. Make such changes in the Work, in the Contract Sum, in the Contract Time of Completion, or any combination thereof, as are described in written Change Orders signed by the Owner and the Architect and issued after execution of the Contract, in accordance with the provisions of this Section.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 CHANGE ORDER PROCEDURES

A. From time to time during the course of the Work, the Architect may issue an order for a minor change in the Work without change in the contract sum or contract time.

B. Should the Contractor consider that a change in the contract sum or contract time is required, he will notify the Construction Manager before proceeding with the Work.

C. The Owner may solicit proposals from the Contractor for possible changes to the contract by issuing a request for a Cost Change Proposal through the Construction Manager for the desired change.

D. The Contractor will, upon receiving the request for a Cost Change Proposal, promptly complete the proposal for the described work. Provide an itemized proposal showing materials, labor, profit and overhead, and the effect on the critical path of the Construction Schedule. Include full back-up data such as subcontractors itemized letter of proposal, product data, invoices, and other pertinent data to substantiate the proposal. Return the completed proposal to the Architect on a copy of the Cost Change Proposal form at the end of this section. The Contractor may utilize his own form upon prior approval by the Owner.

E. When cost or credit has been agreed upon by the Owner and Contractor, the Contractor shall submit a Potential Change Order to the Construction Manager for signature by the Architect and Owner.

F. Approved Potential Change Orders will be collectively assembled into a Contract Change Order at certain intervals during the course of construction. Contract Change Orders shall be signed by all parties. The contract sum and contract time will be adjusted consecutively by each Contract Change Order as they are executed.

G. In the event the Contractor is not in agreement with the Owner and Architect as to change in Contract Sum and/or Time of a proposed change to the Contract Documents, the Architect may issue a Construction Change Directive through the Construction Manager as provided in the General Conditions to the Contract.

END OF SECTION 01 26 00

GENERAL

1.1 SUMMARY

A. This section contains the procedures to be followed by the General Contractor upon discovery of any apparent conflicts, omissions, or errors in the Contract Documents or upon having any questions concerning interpretation.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 DEFINITIONS

A. Requests for Interpretation: A request from the General Contractor seeking an interpretation or a clarification of some requirement of the Contract Documents. The General Contractor shall clearly and concisely set forth the issue requiring clarification or interpretation and why a response is needed. Include in the request interpretation or understanding of the contract's requirements along with documentation for the interpretation or understanding. Responses from the Architect will not change any requirements of the Contract Documents.

B. Drawing/Plan Clarification: An answer from the Architect in response to an inquiry from the General Contractor intended to make some requirement(s) of the drawings clearly understood. Drawing/plan clarifications maybe be sketches, drawings, or in narrative form and will not change any requirements of the drawings.

C. Non-Conformance Notice: A notice issued by the Architect documenting that the work or some portion thereof has not been performed in accordance with the requirements of the Contract Documents. Payment will not be made on any portion of the work which a Non-Conformance Notice has been issued and the work not corrected to the Satisfaction of the Architect. Upon receipt of a Non-Conformance Notice, the General Contractor shall provide written response within 5 working days after receipt, noting why they believe the work was performed in accordance with the Contract Documents or what corrective action they intend to take to correct the non-conforming work. Written responses from the General Contractor are not considered to be RFI's.

D. Project Communications: Routine written communications between the Architect and General Contractor shall be in writing, field memo, or e-mail. Such communications shall not be identified as RFI's.

1.4 PROCEDURES

A. Notification by General Contractor:

1. Submit all requests for clarification of additional information in PDF format to the Construction Manager using form approved by the Construction Manager and Architect.

2. Number RFI sequentially. Follow RFI number with sequential alphabetical suffix as necessary for each resubmission. For example, the first RFI would be "1"; the second would be "2". The first resubmittal of RFI "2" would be "2a", etc.

3. Limit each RFI to one subject.

4. Submit an RFI if one of the following conditions occurs:

a. The General Contractor discovers an unforeseen condition or circumstance that is not described in the Contract Documents.

b. The General Contractor discovers an apparent conflict or discrepancy between portions of the Contract Documents that appears to be inconsistent or cannot be reasonably inferred from the intent of the Contract Documents.

c. The General Contractor discovers what appears to be omission from the Contract Documents that cannot be reasonably inferred from the intent of the Contract Documents.

5. RFI's will not be recognized or accepted if, in the opinion of Architect, one of the following conditions exists:

a. The General Contractor submits the RFI under pretense of a Contract Documents discrepancy or omission without thorough review of the Contract Documents.

b. The General Contractor submits the RFI in a manner that suggests that specific portions of the Contract Documents are assumed to be excluded or by taking an isolated portion of the Contract Documents in part rather than whole.

c. The General Contractor submits an RFI in an untimely manner without proper coordination and scheduling of Work of related trades.

6. Ask for any clarification or request for interpretation immediately upon discovery. Submit RFIs in a reasonable time frame so as not to affect the Contract Schedule while allowing the full response time specified below.

1.5 RESPONSE TIME

A. The Architect, whose decision will be final and conclusive, will resolve such questions and issue instructions to the General Contractor through the Construction Manager within a reasonable time frame. In most cases, RFIs will receive a response within 10 working days. In some cases, this time may need to be lengthened for complex issues, or shortened for emergency situations, as mutually agreed in writing.

B. Should the General Contractor proceed with the work affected before receipt of a response from the Architect within the response time specified above, any portion of the work that is not done in accordance with the Architect's clarifications, instructions, or decisions is subject to removal or replacement and the General Contractor shall be responsible for all resultant losses.

END OF SECTION 01 26 15

GENERAL

1.1 SUMMARY

A. Provide a schedule of values for the Work.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SCHEDULE

A. Prepare a schedule which details the amounts allocated to each Section of the Work. The schedule shall total to the agreed Contract sum.

B. The Schedule of Values shall be consistent with the Construction Schedule.

1.4 SUBMITTALS

A. Prior to first application for payment, submit a proposed schedule of values to the Architect.

B. Meet with the Construction Manager and determine additional data, if any, required to be submitted. Secure the Construction Manager's approval of the schedule of values prior to submitting first application for payment.

END OF SECTION 01 29 73

GENERAL

1.1 SUMMARY

A. The Construction Manager will conduct project meetings throughout the construction period.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

B. The Contractor's relations with his subcontractors and materials suppliers, and discussions relative thereto, are the Contractor's responsibility and are not part of project meetings content.

EXECUTION

3.1 PRECONSTRUCTION MEETING

A. Preconstruction Meeting will be scheduled to be held within 15 working days after the Owner has issued the Notice to Proceed.

B. Provide attendance by authorized representatives of the Contractor and major subcontractors. The Construction Manager will advise other interested parties, including the Owner and the Architect, and request their attendance.

C. The Architect will coordinate with the Construction Manager, Contractor, and Owner to establish the agenda.

3.2 MEETING SCHEDULE AND LOCATION

A. Project meetings will be held every other week, unless otherwise determined by the parties. A mutually acceptable schedule for meetings will be determined at the pre-construction meeting.

B. Meetings will be held at the project site.

3.3 MEETING AGENDA ITEMS AND MINUTES

A. The Construction Manager shall develop agendas and compile minutes of each project meeting and distribute to Owner, Contractor, and Architect.

B. Advise the Construction Manager at least 24 hours in advance of project meetings of any changes to the agenda.

3.4 ATTENDANCE

A. Assign the project superintendent to represent the Contractor at project meetings throughout progress of the Work.

B. Subcontractors, materials suppliers, and others may be invited to attend those project meetings in which their aspect of the Work is involved.

3.5 REVISIONS TO MINUTES

A. Unless published minutes are challenged in writing prior to the next regularly scheduled progress meeting, they will be accepted as properly stating the activities and decisions of the meeting.

B. Persons challenging published minutes shall reproduce and distribute copies of the challenge to all indicated recipients of the particular set of minutes.

C. Challenge to minutes shall be settled as priority portion of "old business" at the next regularly scheduled meeting.

END OF SECTION 01 31 19

GENERAL

1.1 SUMMARY

A. Prepare and maintain the schedules and reports described in this Section.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the Contract.

1.3 RELIANCE UPON THE APPROVED SCHEDULE

A. The construction schedule as approved by the Construction Manager will be an integral part of the Contract and will establish interim completion dates for the various activities under the Contract.

B. Should any activity not be completed within 15 days after the stated scheduled date, the Owner shall have the right to require the Contractor to expedite completion of the activity by whatever means the Owner deems appropriate and necessary, without additional compensation to the Contractor.

C. Should any activity be 30 days or more behind schedule, the Owner shall have the right to perform the activity or have the activity performed by whatever method the Owner deems appropriate.

D. Costs incurred by the Owner in connection with expediting construction activity under this article shall be reimbursed by the Contractor.

E. It is expressly understood and agreed that failure by the Owner to exercise the option either to order the Contractor to expedite an activity or to expedite the activity by other means shall not be considered to set a precedent for any other activities.

PRODUCTS

2.1 CONSTRUCTION ANALYSIS

A. Graphically show by Gantt-chart-type schedule the order and interdependence of all activities necessary to complete the Work, and the sequence in which each activity is to be accomplished. Clearly identify the critical path of the project. Individual activities shall be no longer than 15 calendar days.

B. Include, but not necessarily limit, indicated activities to:

1. Project mobilization.
2. Submittal and approval of Shop Drawings and Samples.
3. Procurement of equipment and critical materials.
4. Fabrication of special material and equipment and its installation and testing.
5. Starting date, duration and completion of each major section of the Work.
6. Final cleanup.
7. Final inspecting and testing.
8. All activities by the Architect that affect progress, required dates for completion, or both, for all and each part of the Work.

EXECUTION

3.1 CONSTRUCTION SCHEDULE

A. Within 10 days after receipt of Notice to Proceed, complete the construction analysis in preliminary form, meet with the Construction Manager, review contents of the proposed construction schedule, and make all revisions agreed upon. Submit to Construction Manager copies of the baseline construction schedule for approval.

B. The Construction Schedule shall use calendar days for Project Start and Project Completion milestones. Individual activities may use a “working days” calendar.

3.2 PERIODIC REPORTS

A. Update the approved construction schedule and submit with the Application for Payment each month. Indicate "actual" progress in percent completion of each activity. Updates shall be shown against the approved baseline schedule. No logic changes shall be made without prior approval from the Construction Manager.

B. Provide a written summary of changes in the critical path, reasons causing any delays in the schedule, and an explanation of corrective actions taken or proposed.

C. Make only those revisions to approved construction schedule as are approved in advance by the Construction Manager.

END OF SECTION 01 32 16

GENERAL

1.1 DESCRIPTION

A. This Section describes the requirements for furnishing photographs depicting work progress.

B. Furnish photographs of the site construction throughout the progress of the work.

C. Take photographs on cutoff date for each Application for Payment.

D. In addition, take photographs at the beginning and completion of the following elements:

1. Excavation
2. Foundations
3. Structural framing
4. Enclosure of building
5. Final completion

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Digital photographs on CD/DVD disk; provide in JPEG format.

B. Identify each print. List name of Project, phase, orientation of view, date and time of view, name and of photographer, and photographer's numbered identification of exposure.

1.4 TECHNIQUE

A. Factual presentation with correct exposure and focus, high resolution and sharpness, maximum depth of field, and minimum distortion.

1.5 VIEWS

A. Take sufficient photographs at each specified time, until Date of Completion.

1.6 POSTING/ DELIVERY OF PHOTOGRAPHS

A. Post all photographs to project-specific construction management website and provide access for Architect and Construction Manager.

PRODUCTS

Not used

EXECUTION

Not used

END OF SECTION 01 32 33

GENERAL

1.1 SUMMARY

A. Shop drawing and product data submittals shall be transmitted to Architect in electronic (PDF) format using a website service designed specifically for transmitting submittals between construction team members.

B. The intent of electronic submittals is to expedite the construction process by reducing paperwork, improving information flow, and decreasing turnaround time.

C. The electronic submittal process is not sufficient for color samples, color charts, or physical material samples.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

PRODUCTS

2.1 PRODUCTS

A. Basis of specification is e-Builder web-based construction management database provided by the Owner.

B. The Owner may permit the use of a web-based construction management database service provided by the Contractor upon determination that the proposed service meets the requirements of the Project. If approved, the cost of such service shall be paid by the Contractor.

C. Product Requirements.

1. Independently hosted, web-based system for automated tracking, storage, and distribution of contract submittals, Requests for Information, and other contract related documents. FTP sites, e-mail exchanges, and server-based systems hosted from inside a contractor’s office will not be considered and are not acceptable.

2. Utilize 256-bit SSL encryption and hosted at SAS70 Type II compliant data centers.

3. Minimum five years documented experience of use on comparable commercial construction projects. “Comparable commercial construction projects” shall be defined as documented use on a minimum of five hundred governmental, public-entity, or private sector projects each of $1 million construction value or greater.

4. Minimum five years documented 99.5% website uptime.

5. Unlimited individual user accounts and system access for all project subcontractors, general contractor, owner staff, construction manager, architect, design consultants, and sub-consultants, with no additional fees for those parties to access the system.

6. Separate locations for owner, architect, design consultant, and sub-consultant review comments with contractors restricted from viewing comments until final review or release by owner or primary design consultant.

7. Full version histories and dates of exchanges automatically tracked and available for viewing, searching, and reporting in a linear log format compatible with AIA G712.

8. Functionality to group submittals as required packages and apply forms and review comments to entire package simultaneously.
9. Functionality for integrated online PDF viewing and review, including graphical markups and stamps, for owner, architect, design consultants, sub-consultants, and general contractor without need for additional software purchase.
10. Automatic, configurable e-mail reminders of past due items.
11. Customized, automated PDF form generation for submittals, RFIs and other documents matching standard templates used by owner, design consultants, sub-consultants and general contractor. Documentation and demonstration of automatic form generation using each entity's templates must be submitted as part of any substitution request.
12. Prior to project start, Construction Manager or General Contractor shall create submittal log with all required items from project manual or submittal register. Owner or primary design consultant shall have full control over required items list and access to edit, add, or remove items during project.
13. System vendor shall provide minimum one-hour live web meeting training sessions to contractors, design consultants, sub-consultants, and owner staff prior to project start.
14. System vendor shall make available minimum thirty-minute live web meeting training sessions for subcontractors at least twice weekly for the entire duration of the project.
15. Allowance for scanning and printing services provided by local third-party reprographic vendor to assist with obtaining documents electronically and online print ordering.

EXECUTION

3.1 SUBMITTAL REQUIREMENTS

A. SHOP DRAWINGS

1. Scale and measurements: Make Shop Drawings accurately to a scale sufficiently large to show all pertinent aspects of the item and its method of connection to the Work.
2. Submit Shop Drawings in the form of PDF electronic files of each sheet.

B. PRODUCT DATA

1. Provide PDF electronic files of required product data submittals.
2. Where contents of submitted literature from manufacturers includes data not pertinent to the submittal, clearly show which portions of the contents are being submitted for review.

C. HAZARDOUS MATERIALS SAFETY DATA SHEETS

1. Provide PDF electronic copies of required hazardous materials safety data sheets for each specific material and type.
2. Where contents of submitted literature from manufacturers includes data not pertinent to the submittal, clearly show which portions of the contents are being submitted for review.

D. SAMPLES

1. Provide Sample or Samples identical to the precise article proposed to be provided.

2. Submit Samples in the quantity which is required to be returned to the Contractor, plus one which will be retained by the Architect.

3. By prearrangement in specific cases, a single Sample may be submitted for review and, when approved, be installed in the Work at a location agreed upon by the Architect.

E. MOCK-UPS

1. Provide mock-ups of material applications and fabrications as identified in various sections of this specification. Mock-up shall be provided in the actual material and finish designated for the application. Make modifications and adjustments as required by the Architect

F. COLORS AND PATTERNS

1. Unless the precise color and pattern is specifically called out in the Contract Documents, and whenever a choice of color or pattern is available in the specified products, submit accurate color and pattern charts to the Architect for selection.

3.2 PROCEDURES

A. The Construction Manager shall establish a project-specific interactive database within construction management website.

B. Contractor shall upload submittals to project-specific database within construction management website. Contractor shall be responsible for uploading submittals in a timely manner as required to accommodate adequate review and processing of submittals within timeframes required to maintain the construction schedule.

C. Contractor shall review and apply electronic stamp certifying that the submittal complies with the requirements of the Contract Documents including verification of manufacturer/ product, dimensions and coordination of information with other parts of the work.

D. Architect/Engineer review comments will be uploaded to the project-specific database on the construction management website. Contractor will receive e-mail notice of completed review.

E. Distribution of reviewed submittals to subcontractors and suppliers is the responsibility of the Contractor.

3.3 GROUPING OF SUBMITTALS

A. Make submittals in groups containing all associated items to assure that information is available for checking each item when it is received.

B. Partial submittals may be rejected as not complying with the provisions of the Contract. The Contractor may be held liable for delays so occasioned.

3.4 TIMING OF SUBMITTALS

A. Make submittals far enough in advance of scheduled dates for installation to provide time required for reviews, for securing necessary approvals, for possible revisions and resubmittals, and for placing orders and securing delivery.

B. In scheduling, allow at least ten working days for review by the Architect following the Architect's receipt of the submittal; fifteen working days if the submittal requires review by consultants to the architect (civil, structural, electrical, mechanical engineers, landscape architects, etc.)

END OF SECTION 01 42 00

GENERAL

1.1 SUMMARY

A. Provide for testing, as required by Owner, to determine that materials provided for the Work meet the specified requirements.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 QUALITY ASSURANCE

A. The Owner will select a pre-qualified independent testing laboratory. Testing, when required, will be in accordance with all pertinent codes and regulations and with selected standards of the American Society for Testing and Materials.

1.4 PRODUCT HANDLING

A. Promptly process and distribute all required copies of test reports and related instructions to ensure all necessary retesting and/or replacement of materials with the least possible delay in progress of the Work.

PRODUCTS

2.1 PAYMENT FOR TESTING SERVICES

A. The Owner will pay for all initial testing services requested by the Owner. When initial tests indicate non-compliance with the Contract Documents, all subsequent retesting occasioned by the non-compliance shall be performed by the same testing laboratory and the costs thereof will be paid for by the Contractor.

B. Special Inspections and tests required by codes, ordinances, or by a plan approval authority shall be the responsibility of Contractor. The Contractor shall utilize the testing services firm retained by the Owner and testing shall be paid for by the Owner unless otherwise provided in the Contract Documents.

C. When initial tests indicate non-compliance with the Contract Documents, all subsequent retesting occasioned by the non-compliance shall be performed by the same testing laboratory and the costs thereof will be paid for by the Contractor.

D. Inspection or testing performed exclusively for the Contractor's convenience shall be the sole responsibility of the Contractor.

EXECUTION

3.1 COOPERATION WITH TESTING LABORATORY

A. Representatives of the testing laboratory shall have access to the Work at all times. Provide facilities for such access in order that the laboratory may properly perform its functions.

3.2 SCHEDULES FOR TESTING

A. By advance discussion with the testing laboratory selected by the Owner, determine the time required for the laboratory to perform its tests and to issue each of its findings.

B. Provide all required time within the construction schedule.

C. When changes of construction schedule are necessary during construction, coordinate all such changes of schedule with the testing laboratory as required.

D. When the testing laboratory is ready to test according to the determined schedule but is prevented from testing or taking specimens due to incompleteness of the Work, all extra costs for testing attributable to the delay may be backcharged to the Contractor and shall not be borne by the Owner,

3.3 TAKING SPECIMENS

A. All specimens and samples for testing, unless otherwise provided in these Contract Documents, will be taken by the testing laboratory; all sampling equipment and personnel will be provided by the testing laboratory; and all deliveries of specimens and samples to the testing laboratory will be performed by the testing laboratory.

END OF SECTION 01 45 23

GENERAL

1.1 SUMMARY

A. This Section describes construction facilities and temporary controls.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 USE CHARGES

A. Cost or use charges for temporary facilities shall be included in the Contract Sum.

EXECUTION

3.1 TEMPORARY UTILITIES

A. General: Arrange with utility company, Owner and existing users for time when service can be interrupted, if necessary, to make connections for temporary services.

B. Water: Provide necessary temporary piping and water supply.

C. Electricity: Provide necessary temporary wiring and distribution boxes to obtain power and lighting at points where needed for work, inspection and safety.

D. Heating: Provide and maintain heat necessary for proper conduct of operations.

E. Telephone and Internet Access: Make necessary arrangements for installation and operation of access for internet service to the Contractor's office at the site. Contractor shall provide a dedicated cellular phone service for the project superintendent.

3.2 FIELD OFFICES

A. Provide a field office building(s) for Contractor's offices, supply and storage. Provide and equip enclosed space adequate for holding project meetings.

3.3 SANITARY FACILITIES

A. Provide temporary toilets, wash facilities and drinking-water fixtures. Comply with regulations and health codes for type, number, location, operation and maintenance of fixtures and facilities.

3.4 TEMPORARY SECURITY AND PROTECTION FACILITIES

A. Provide temporary environmental protection, operate temporary facilities, and conduct construction in ways and by methods that comply with environmental regulations and that minimize possible air, waterway and subsoil contamination or pollution or other undesirable effects.

B. Provide measures to prevent soil erosion and discharge of soil-bearing water runoff and airborne dust to adjacent properties and walkways, according to requirements of authorities having jurisdiction.

C. Provide temporary enclosures for protection of construction and workers from inclement weather and for containment of heat.

D. Comply with requirements of authorities having jurisdiction for erecting structurally adequate barricades, including warning signs and lighting.

E. Enclosures: Provide and maintain for the duration of construction all scaffolds, tarpaulins, canopies, warning signs, steps, platforms, bridges, and other temporary construction necessary for proper completion of the Work in compliance with pertinent safety and other regulations.

F. Install and maintain temporary fire-protection facilities. Comply with NFPA 241.

3.5 TEMPORARY FENCING

A. Provide and maintain for the duration of construction a temporary fence of design and type needed to prevent people and animals from easily entering the site except by entrance gates.

3.6 PROJECT SIGNS

A. Within 15 days of the "Notice to Proceed", fabricate and install the job sign on the site as shown on the Drawings.

B. Contractor shall include the cost of temporary project sign fabrication and installation in the Contract.

C. Sign shall be ¾” min. 48” x 96” exterior A/C plywood mounted to 4x4 PT wood posts embedded 36” min. into ground or mounted on and braced to lumber skids. Height of sign shall be 72” above grade. All exposed wood shall be painted white with 2-coats gloss enamel. Sign face shall be professionally printed and included, at a minimum, the name of the project, architect, contractor, Yolo County Library logo, and the County of Yolo seal. Architect will provide digital artwork for sign after award of contract.

D. Contractor shall coordinate location of temporary construction sign with County Project Manager.

E. Upon completion of the Work, demount the job sign and return to the Owner at his direction.

3.7 MAINTENANCE

A. Maintain temporary facilities and controls as long as needed for safe and proper completion of the Work.

3.8 TERMINATION AND REMOVAL

A. Temporary Utilities: At earliest feasible time, when acceptable to Owner, change over from use of temporary services to use of permanent service.

B. Remove temporary facilities and controls no later than substantial Completion. Personnel remaining after Substantial Completion will be permitted to use permanent facilities, under conditions acceptable to Owner.

3.9 CONSTRUCTION-PHASE CONTROLS TO MITIGATE POTENTIAL ENVIRONMENTAL IMPACTS

A. Cultural Resources, Tribal Cultural Resources, and Human Remains

1. To ensure appropriate construction crews and personnel are aware of the potential for the New Yolo Branch Library Building Project to encounter unrecorded cultural resources (i.e., historical, archaeological, and paleontological resources), tribal cultural resources, and/or human remains, all construction personnel involved in supervising or performing ground disturbing activities (site clearing, excavation work, grading, and trenching) shall participate in pre-construction training provided by the County.

2. All ground disturbing activities (site clearing, excavation work, grading, and trenching) shall be monitored by an archeologist and/or tribal representative retained by the County. The Contractor shall accommodate monitors onsite and coordinate timing of subject construction activities with the County Project Manager.

3. To reduce the potential for equipment to inadvertently adversely affect unrecorded cultural resources and tribal cultural resources, all excavating machinery shall use toothless buckets during ground disturbing activities (site clearing, excavation work, grading, and trenching).

4. In the event that unrecorded cultural resources, tribal cultural resources, or human remains are discovered, ground disturbing activities shall cease immediately, and the Contractor shall notify the County Project Manager or onsite cultural monitor. Ground disturbing construction activities shall not resume until authorized by the County Project Manager.

B. During construction activities, Contractor will be required to abide by Mitigation Measure AIR-1A (Reduce Fugitive Dust Emissions) established in the Project Environmental Impact Report. Contractor will be held to the strictest requirements of those found elsewhere in the Contract Documents and those described below.

1. Water all exposed surfaces (e.g., staging areas, soil piles, graded areas, and unpaved access roads) two times per day during construction and adequately wet demolition surfaces to limit visible dust emissions.

2. Cover or maintain at least two feet of freeboard for all haul trucks transporting soil, sand, or other loose materials off the project site.

3. Sweep streets if visible soil material is carried out from the construction site.

4. Apply non-toxic binders (e.g., latex acrylic copolymer) to exposed areas after cut-and-fill operations and hydroseed area.

5. Apply chemical soil stabilizers on inactive construction areas (disturbed lands within construction projects that are unused for at least four consecutive days.

6. Minimize idling time of diesel-powered construction equipment to five minutes and post signs reminding workers of this idling restriction at access points and equipment staging areas during construction of the proposed project.

C. During construction activities, Contractor will be required to abide by Mitigation Measure HAZ-1A (Minimize and Avoid Impacts from Unanticipated Hazardous Materials) established in the Project Environmental Impact Report. Contractor will be held to the strictest requirements of those found elsewhere in the Contract Documents and those described below.

1. In the event unanticipated contamination or hazardous materials are discovered during project construction (e.g., gasoline odors, or oily soil or water), the Contractor shall:

a. Stop all work immediately, contact the Department of Environmental Health, and take appropriate investigative and/or remedial action to adequately characterize the contamination and ensure the release or potential release of hazardous materials would not pose a significant threat to human health and/or the environment.

b. Construction may proceed if, after coordinating with the Department of Environmental Health, it is determined activities would not affect the release or potential release of a hazardous material.

D. During construction activities, Contractor will be required to abide by Mitigation Measure HAZ-1D (Minimize and Avoid Impacts from Equipment Leaks and Spills) established in the Project Environmental Impact Report. Contractor will be held to the strictest requirements of those found elsewhere in the Contract Documents and those described below.

1. The Contractor shall minimize and avoid potential leaks and spills from heavy construction equipment used during demolition, site preparation, and building construction activities by:
    a. Designating vehicle and equipment storage, staging, and clean-up locations.
    b. Designating equipment fueling locations and ensuring appropriate spill containment measures and spill response equipment is on-site.
    c. Inspecting equipment for leaks prior to and at the conclusion of daily construction activities. If leaks are observed, the leaking equipment shall be repaired immediately. All contaminated water, sludge, spill residue, or other hazardous compounds discovered during inspections shall be contained and disposed of, as necessary, at lawfully permitted or authorized disposal sites.

E. During construction activities, Contractor will be required to abide by Mitigation Measure NOI-1A (Reduce Potential Temporary Construction Noise Impacts) established in the Project Environmental Impact Report. Contractor will be held to the strictest requirements of those found elsewhere in the Contract Documents and those described below.
    1. Construction deliveries and construction activities shall be restricted to the hours of 7:00 AM to 6:00 PM, Monday through Friday and 9:00 AM to 6:00 PM on Saturday. Construction activities on Sunday shall be prohibited.
    2. Provide electrical hook-up to the construction site and prohibit the use of diesel-powered generators to the extent it is logistically and technically feasible to do so.
    3. Impact tools such as jack hammers shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed air exhaust from pneumatically powered tools. When use of pneumatic tools is unavoidable, they shall include a noise suppression device on the compressed air exhaust.

F. During construction activities, Contractor will be required to abide by Mitigation Measure NOI-1B (Reduce Potential Temporary Construction Vibration Impacts) established in the Project Environmental Impact Report. Contractor will be held to the strictest requirements of those found elsewhere in the Bid Documents and those described below.
    1. The operation of vibratory rollers, plate compactors, and other large compaction equipment shall be prohibited within 15 feet of all adjacent residential structures.
    2. If it is not feasible to avoid the operation of large compaction equipment within 15 feet of adjacent residential structures, the Contractor shall develop and implement a Vibration Mitigation Plan that identifies the vibration control measures to ensure construction does not damage any adjacent residential structure. Such measures may include the use of before and after photos, vibration monitoring, barriers, pre-compaction activities, use of smaller equipment, or other measures that limit groundborne vibration to levels that would not result in structural damage (approximately 0.5 inches per second peak particle velocity).

G. Contractor is advised that the County has obligations under the Mitigation Monitoring and Reporting Program established by the Project Environmental Impact Report to perform a nesting bird and roosting bat survey onsite prior to start of construction and to ensure proper monitoring of site.
    1. Contractor shall not begin work onsite until County has performed survey and informed Contractor that construction may proceed.
    2. County will pay for biological survey.

3. Due to restrictions established by the California Department of Public Health, direct contact by workers with any bat is not allowed. The Contractor shall notify the County Project Manager immediately if a bat or bat roost is discovered or encountered during project construction.

END OF SECTION 01 50 00

GENERAL

1.1 SUMMARY

A. This Section specifies preservation of existing trees and plants, including pruning, protective barriers and irrigation during building demolition, site work and building construction.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 PERFORMANCE REQUIREMENTS

A. Do not allow trees and plans to be cut, broken, skinned, bark bruised on roots damaged.

B. Do not alter earth surface within drip lines of trees or plants.

1.4 SEQUENCE

A. Install temporary fencing before any other work is performed in the area of existing trees or plants.

1.5 SPECIAL WARRANTY

A. Remove and replace trees or plants with subsequently die and which are neglected or injured during the Contract time. Replace with approved 24-inch box specimen. Replant and provide 3-year care and maintenance contract for new tree.

B. Provide 3-year care and maintenance contract for trees with broken limbs, bruised bark, portions skinned or showing root damaged because of construction activities.

1.6 MAINTENANCE

A. Irrigate on a regular basis with potable water to maintain trees and plants in good health.

PRODUCTS

2.1 MATERIALS

A. Barricades:

1. Fabric: 6-foot high utility, snow type fencing consisting of 2-inch wood lath woven between 7 double strands of galvanized wire. Spaces between lath shall be 2-inch maximum.

2. Posts: As required to keep fabric upright and in fixed position during construction.

B. Tree Seal: Antibacterial fungicide of waterproof composition specifically manufactured for use in pruning plants.

EXECUTION

3.1 PREPARATION

A. Do not permit excavation or drilling equipment to disturb roots 2-inches or larger in diameter.

B. Determine limbs and roots that must be cut. In company with Architect, clearly mark limbs to designate approved point of cutting.

3.2 INSTALLATION

A. Barricades:

1. Install to encircle all trees to remain.
2. Set at drip line.
3. Set posts by hand. Locate roots by hand probing. Space posts approximately 4-feet apart and securely attach fabric.
4. Maintain during construction and remove upon completion of work.

B. Pruning:

1. Cut evenly and produce at neat severance. Do not tear bark or fracture limbs.
2. Promptly coat cut ends of limbs and roots larger that 2-inch caliper with tree seal.
3. Apply wet burlap to root ends after cutting roots larger that 2-inch caliper.

3.3 REPAIR

A. Prune and treat damaged areas as directed by the Architect.

B. Coat scars over 2-inches with tree seal.

END OF SECTION 01 56 39

GENERAL

1.1 SUMMARY

A. Provide storage and protection for all products scheduled for use in the Work.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 MANUFACTURERS' RECOMMENDATIONS

A. Determine and comply with manufacturers' recommendations on product handling, storage and protection for all products.

1.4 PACKAGING

A. Deliver products to the job site in their manufacturer's original container, with labels intact and legible. Maintain packaged materials with seals unbroken and labels intact until time of use.

B. Promptly remove damaged material and unsuitable items from the job site. Promptly replace with material meeting the specified requirements, at no additional cost to the Owner.

C. The Architect may reject as non-complying such material and products that do not bear identification satisfactory to the Architect as to manufacturer, grade, quality and other pertinent information.

1.5 PROTECTION

A. Protect finished surfaces, including jambs and soffits of openings used as passageways, through which equipment and materials are handled.

B. Provide protection for finished floor surfaces in traffic areas prior to allowing equipment or materials to be moved over such surfaces.

C. Maintain finished surfaces clean, unmarred, and suitably protected until accepted by the Owner.

1.6 STORAGE

A. Keep all construction materials subject to moisture damage under cover and dry. Protect against exposure to weather and contact with damp or wet surfaces. Stack lumber, plywood, sheet rock and other panels; provide for air circulation within and around stacks and under temporary coverings.

1.7 REPAIRS AND REPLACEMENTS

A. In event of damage, promptly make replacements and repairs to the approval of the Architect and at no additional cost to the Owner.

B. Additional time required to secure replacements and to make repairs will not be considered by the Architect to justify an extension in the Contract Time of Completion.

END OF SECTION 01 66 00

GENERAL

1.1 SUMMARY

A. This Section describes the requirements for maintaining records of actual conditions in the field and for changes in the work as contained on the As-Built drawings and transcribed to become the Record Documents.

B. The purpose of final Project Record Documents is to provide factual information regarding all aspects of the work, both concealed and visible, to enable future modifications of the work to proceed without lengthy and expensive site measurement, investigation, and examination.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

EXECUTION

3.1 DOCUMENTS REQUIRED

A. Maintain at the site the following record documents to be turned over to the Owner upon request for Substantial Completion.

1. Drawings.
2. Specifications.
3. Change Orders and other modifications to the Contract.
4. Field Instructions and other written instructions from the Architect.
5. Reviewed shop drawings, product data, and samples or access on computer to all submittal documents and tracking.
6. Test reports.
7. Requests for Information.
8. Claims.
9. Training.

3.2 MAINTENANCE OF DOCUMENTS AND SAMPLES

A. Store record documents and samples in Contractor's field office apart from documents used for construction.

1. Provide files and racks for storage of documents.
2. Provide locked cabinets or secure storage space for storage of samples.

B. File documents and samples in a manner acceptable to the Architect.

C. Make documents and samples available at all times for inspection by the Architect.

D. Update the document within 24 hours after receiving information that a change has occurred or clarification has been issued.

3.3 RECORDING

A. Label each document "AS BUILT PROJECT RECORD" in neat, large printed letters.

B. Record information concurrently with the construction process.

1. Do not conceal any work until required information is recorded.

2. Completely, accurately, and legibly record, to the satisfaction of the Architect, all deviations in construction, especially pipe and conduit locations, and any deviations caused by approved changes and/or clarifications to the work.

3. Use additional copies of prints, if necessary, to insure legible recording of data.

4. Date all entries.

5. Call attention to the entry by drawing a "cloud" around the area affected.

6. In the event of overlapping changes, use different colors for each change.

C. Legibly mark drawings to record actual construction.

1. Depths of various elements of foundation in relation to finish first floor datum.

2. Horizontal and vertical locations of underground utilities and appurtenances referenced to permit surface improvements.

3. Locations of internal utilities and appurtenances concealed in the construction, referenced to visible and accessible features of the structure.

4. Field changes of dimension and detail.

5. Changes made reflecting approved changes to the work.

6. Details not on original Contract Drawings.

D. Legibly mark each Section of the Specifications to record.

1. Manufacturer's trade name, catalog number, and supplier of each product and item of equipment installed.

2. Changes made reflecting approved changes to the work.

E. Maintain shop drawings as record drawings. Legibly annotate shop drawings to record changes made after approval.

F. Prior to submitting each request for payment, secure approval from the Architect of the current status of record documents.

G. Periodic payments or portions thereof to the Contractor may be withheld until the Architect verifies that all as-built information to date has been properly recorded on project record documents.

3.4 CONVERSION OF COORDINATIN DRAWINGS AND SCHEMATIC LAYOUTS

A. The drawings, arrangements of conduits, circuits, piping, ducts, and similar items are shown schematically and are not intended to portray precise physical layout. The final physical arrangement is determined by the Contractor, subject to the approval of the Architect, and shall be accurately recorded by the Contractor on the record documents.

B. Show on the job set of record drawings, by dimension accurate to one inch, the centerline of each run of all items specified in the preceding paragraph.

1. Clearly identify the item by accurate note such as "cast iron drain" or "galvanized flashing", etc.

2. Show by symbol or note the vertical location of the item ("6 inches below slab", "in ceiling plenum", "exposed", etc.).

3. Make identification sufficiently descriptive that it may be related reliably to the Specifications.

3.5 FINAL PROJECT RECORD DOCUMENTS

A. At a time nearing Substantial Completion of the work, obtain from the Architect through the Construction Manager one set of bond reproducibles of the contract documents. The Contractor will complete the As-Built prints.

B. Obtain approval from the Project Inspector of all data recorded on the As-Built set of prints.

C. After Substantial Completion, carefully transfer all data shown on the job set of As-Built Record Drawings to the corresponding reproducibles, coordinating the information as required.

D. Clearly indicate at each affected detail and other drawings a fully description of changes made during construction, and the actual location of items as previously specified.

E. “Cloud" all affected areas.

F. Stamp each record drawing with the following information:

1. Project Record Document.

2. Prepared by: Contractor's name, permanent address.

3. Date prepared.

4. Contractor’s signature.

3.6 SUBMITTALS

A. Submit the complete set of As-Built Project Record Documents to the Owner upon request for Substantial Completion.

B. Participate in review meetings with the Owner and the Architect as required.

C. Make the required changes and promptly deliver the final Project Record Documents on the reproducibles to the Architect.

3.7 DEMONSTRATION AND TRAINING

A. Engage qualified instructors to instruct Owner’s personnel to adjust, operate and maintain systems, subsystems and equipment not part of a system. Include a detailed review of the following:

1. Include instruction for basis of system design and operational requirements, review of documentation, emergency procedures, operations, adjustments, troubleshooting, maintenance and repairs.

END OF SECTION 01 70 00

GENERAL

1.1 SUMMARY

A. Through the construction period, maintain the building and site in a standard of cleanliness as described in this Section. Thoroughly clean all work prior to final acceptance.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

PRODUCTS

2.1 CLEANING MATERIALS AND EQUIPMENT

A. Provide all required personnel, equipment, and materials needed to maintain the specified standard of cleanliness.

2.2 COMPATIBILITY

A. Use only the cleaning materials and equipment which are compatible with the surface being cleaned, as recommended by the manufacturer of the material.

2.3 WASTE-COLLECTION CONTAINERS

A. Provide waste-collection containers in sizes adequate to handle waste from construction operations. When containers are full, legally dispose of waste off-site. Comply with requirements of authorities having jurisdiction.

2.4 WASTE MANAGEMENT COMPLIANCE

A. Contractor shall develop a Construction Waste Management Plan in compliance with Specification Section 01 74 19 “Construction Waste Management and Disposal”.

EXECUTION

3.1 PROGRESS CLEANING

A. Weekly, and more often if necessary, inspect all arrangements of materials stored on the site. Retain all stored items in an orderly arrangement allowing maximum access, not impeding drainage or traffic, and providing the required protection of materials.

B. Provide adequate storage for all items awaiting removal from the job site, observing all requirements for fire protection and protection of the ecology.

C. Daily, and more often if necessary, inspect the site and pick up all scrap, debris, and waste material. Remove all such items to the place designated for their storage.

D. Daily, and more often if necessary, inspect the structures and pick up all scrap, debris and waste material. Remove all such items to the place designated for their storage.

E. At least twice each month, and more often if necessary, completely remove all scrap, debris, and waste material from the job site.

F. Weekly, and more often if necessary, sweep all interior spaces clean. "Clean" will be interpreted as meaning free from dust and other material capable of being removed by reasonable diligence using a hand-held broom.

G. As required preparatory to installation of succeeding material, clean the structures or pertinent portions thereof to the degree of cleanliness recommended by the manufacturer of the succeeding material.

H. Following the installation of finish floor materials, clean the finish floor daily (and more often if necessary) at all times while work is being performed in the space in which finish materials have been installed. "Clean" will be interpreted as meaning free from all foreign material which may be injurious to the finish floor material.

3.2 FINAL CLEANING

A. Except as otherwise specifically provided, "clean" will be interpreted as meaning the level of cleanliness generally provided by commercial building maintenance subcontractors using commercial quality building maintenance equipment and materials.

B. Prior to completion of the work, remove from the job site all tools, surplus materials, equipment, scrap, debris and waste.

C. Hose down all paved areas on the site and all public sidewalks directly adjacent to the site. Completely remove all resultant debris.

D. Structures:

1. Visually inspect all exterior surfaces and remove all traces of soil, waste material, smudges, and other foreign matter. Remove all traces of splashed materials from adjacent surfaces. If necessary to achieve a uniform degree of exterior cleanliness, hose down the exterior of the structure. In the event of stubborn stains not removable with water, the Architect may require light sandblasting or other cleaning at no additional cost to the Owner.

2. Visually inspect all interior surfaces and remove all traces of soil, waste material, smudges and other foreign matter. Remove all traces of splashed materials from adjacent surfaces. Remove all paint drippings, spots, stains, and dirt from finished surfaces. Use only the specified cleaning materials and equipment.

E. Schedule final cleaning as approved by the Architect to provide a completely clean project.

3.3 CLEANING DURING OWNER'S OCCUPANCY

A. Should the Owner occupy the Work or any portion thereof prior to its completion by the Contractor and acceptance by the Owner, responsibilities for the interim and final cleaning of the occupied spaces shall be as determined by the Architect in accordance with the General Conditions of the Contract.

END OF SECTION 01 74 00

GENERAL

1.1 SUMMARY

A. Divert Construction and demolition debris from disposal in landfill by recycling and salvaging at least 50% of non-hazardous construction and demolition (C&D) or meet local construction and demolition waste management ordinance, whichever is more stringent. Provide construction management plan.

B. 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing shall be reused or recycled.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

PRODUCTS

2.1 WASTE COLLECTION CONTAINERS

A. Provide waste collection containers in sizes and types to collect debris.

EXECUTION

3.1 CONSTRUCTION MANAGEMENT PLAN

A. Contractor shall develop a construction management plan to recycle and salvage at least 50% of non-hazardous debris or meet local construction and demolition waste management ordinance, whichever is more stringent. Where a local jurisdiction does not have a construction and demolition waste management ordinance, submit a construction waste management plan for approval by the enforcement agency.

B. Waste Management Plan shall monitor construction waste by volume or weight; but not both. Plan shall monitor all recycled debris and mixed debris.

1. Plan shall identify the materials to be diverted from disposal by efficient usage, recycling, reuse on the project or salvage for future use or sale.

2. Plan shall specify whether materials will be sorted on-site or mixed for transportation to a diversion facility.

3. Plan shall identify haulers, recyclers, and the diversion facility or facilities where the material collected will be taken.

4. Plan shall identify construction methods employed to reduce the amount of waste generated.

5. The waste management plan shall be updated as necessary and shall be accessible during construction for examination by the enforcing agency.

C. Contractor shall divert 100% of trees, stumps, rocks and associated vegetation and soils resulting primarily from land clearing for reuse or recycling.

D. Provide for grinding of all existing asphaltic concrete paving on site to be reused for base rock on site or hauled off site by a paving recycler for grinding and reuse.

E. Provide separate waste collection containers for mixed debris, waste (landfill), and recycled materials. Materials to be considered for recycling shall include, but not be limited to, cardboard, metal, plastic, clean wood, glass, gypsum wallboard, carpet and insulation.

F. Designate a particular area on site for collection and sorting of materials.

G. Co-mingling of recycled debris may be allowed conforming to the local county trash/recycling policy.

H. Subcontractors may be required by Contractor to recycle their own waste products off site; require subcontractors to provide documentation of recycling by weight or volume.

I. Regularly remove debris from job site.

J. At project completion provide documentation log of all construction debris listing volume or weight and percentage calculation.

END OF SECTION 01 74 19

COMPLIANCE FORMS AND WORKSHEETS

Construction Waste Management (CWM) Plan

Note: This sample form may be used to assist in documenting compliance with the waste management plan.

Project Name: _____
Job #: _____
Project Manager: _____
Waste Hauling Company: _____
Contact Name: _____

All Subcontractors shall comply with the project's Construction Waste Management Plan.
All Subcontractor foremen shall sign the CWM Plan Acknowledgment Sheet.

Subcontractors who fail to comply with the Waste Management Plan will be subject to backcharges or withholding of payment, as deemed appropriate. For instance, Subcontractors who contaminate debris boxes that have been designated for a single material type will be subject to backcharge or withheld payment, as deemed appropriate.

1. The project's overall rate of waste diversion will be ____ %.
2. This project shall generate the least amount of waste possible by planning and ordering carefully, following all proper storage and handling procedures to reduce broken and damaged materials and reusing materials whenever possible. The majority of the waste that is generated on this jobsite will be diverted from the landfill and recycled for other use.
3. Spreadsheet 1, enclosed, identifies the waste materials that will be generated on this project, the diversion strategy for each waste type and the anticipated diversion rate.
4. Waste prevention and recycling activities will be discussed at the beginning of weekly subcontractor meetings. As each new subcontractor comes on-site, the WMP Coordinator will present him/her with a copy of the CWM Plan and provide a tour of the jobsite to identify materials to be salvaged and the procedures for handling jobsite debris. All Subcontractor foremen will acknowledge in writing that they have read and will abide by the CWM Plan. Subcontractor Acknowledgment Sheet enclosed. The CWM Plan will be posted at the jobsite trailer.
5. Salvage: Excess materials that cannot be used in the project, nor returned to the vendor, will be offered to site workers, the owner, or donated to charity if feasible.
6. [HAULING COMPANY] will provide a commingled drop box at the jobsite for most of the construction waste. These commingled drop boxes will be taken to [Sorting Facility Name and Location]. The average diversion rate for commingled waste will be ____%. As site conditions permit, additional drop boxes will be used for particular phases of construction (e.g., concrete and wood waste) to ensure the highest waste diversion rate possible.
7. In the event that the waste diversion rate achievable via the strategy described in (6) above, is projected to be lower than what is required , then a strategy of source-separated waste diversion and/or waste stream reduction will be implemented. Source separated waste refers to jobsite waste that is not commingled but is instead allocated to a debris box designated for a single material type, such as clean wood or metal.

   Notes:

   1. Waste stream reduction refers to efforts taken by the builder to reduce the amount of waste generated by the project to below four (4) pounds per square foot of building area.
   2. When using waste stream reduction measures, the gross weight of the product is subtracted from a base weight of four (4) pounds per square foot of building area. This reduction is considered additional diversion and can be used in the waste reduction percentage calculations.
8. [HAULING COMPANY] will track and calculate the quantity (in tons) of all waste leaving the project and calculate the waste diversion rate for the project. [HAULING COMPANY] will provide Project Manager with an updated monthly report on gross weight hauled and the waste diversion rate being achieved on the project. [HAULING COMPANY's] monthly report will track separately the gross weights and diversion rates for commingled debris and for each source-separated waste stream leaving the project. In the event that [HAULING COMPANY] does not service any or all of the debris boxes on the project, the [HAULING COMPANY] will work with the responsible parties to track the material type and weight (in tons) in such debris boxes in order to determine waste diversion rates for these materials.
9. In the event that Subcontractors furnish their own debris boxes as part of their scope of work, such Subcontractors shall not be excluded from complying with the CWM Plan and will provide [HAULING COMPANY] weight and waste diversion data for their debris boxes.
10. In the event that site use constraints (such as limited space) restrict the number of debris boxes that can be used for collection of designated waste the project Superintendent will, as deemed appropriate, allocate specific areas onsite where individual material types are to be consolidated. These collection points are not to be contaminated with non-designated waste types.
11. Debris from jobsite office and meeting rooms will be collected by [DISPOSAL SERVICE COMPANY]. [DISPOSAL SERVICE COMPANY] will, at a minimum, recycle office paper, plastic, metal and cardboard.

COMPLIANCE FORMS AND WORKSHEETS

Construction Waste Management (CWM) Acknowledgment

Note: This sample form may be used to assist in documenting compliance with the waste management plan.

Project Name: _____

Job Number: _____

Project Manager: _____

Waste Hauling Company: _____

CWM Plan Acknowledgment

The Foreman for each new Subcontractor that comes on site is to receive a copy of the Construction Waste Management Plan and complete this Acknowledgment Form.

I have read the Waste Management Plan for the project; I understand the goals of this plan and agree to follow the procedures described in this plan.

GENERAL

1.1 SUMMARY

A. This Section describes the procedure for transfer of the completed Work to the Owner.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBSTANTIAL COMPLETION

A. Prepare and submit to the Architect the list required by the A 201 General Conditions.

B. After the Contractor has notified the Architect that all corrections to the contractor list have been completed, the Architect will inspect to determine status of completion. The Architect will prepare a punch list of Work that is not substantially complete and deliver to the Contractor.

C. Remedy the deficiencies and notify the Architect when ready for re-inspection. The Architect will re-inspect the Work. Work remaining incomplete must be finished prior to Substantial Completion.

D. When the Architect concurs that the punch list items have been remedied and Work is substantially complete, a "Certificate of Substantial Completion" will be prepared by the Architect, accompanied by the list of items to be completed or corrected prior to final completion.

E. The Architect will submit the Certificate to the Owner and to the Contractor for their written acceptance.

1.4 FINAL COMPLETION

A. Prepare and submit notice required by General Conditions. Verify that the Work is complete including, but not necessarily limited to, the items mentioned in the General Conditions. Certify that:

1. Contract Documents have been reviewed.
2. Work has been inspected for compliance with the Contract Documents.
3. Work has been completed in accordance with the Contract Documents.
4. Equipment and systems have been tested as required and are operational.
5. Work is completed and ready for final inspection.

B. The Architect will make an inspection to verify status of completion. The Architect promptly will so notify the Contractor in writing of remaining deficiencies.

C. Remedy the deficiencies promptly and notify the Architect when ready for re-inspection.

D. When the Architect determines that the Work is acceptable under the Contract Documents, he will request the Contractor to make closeout submittals.

1.5 CLOSEOUT SUBMITTALS

A. Closeout submittals include, but are not necessarily limited to:

1. Project Record Documents described in Section 01 70 00.
2. Operation and maintenance data.

3. Warranties and bonds.
4. Keys and keying schedule.
5. Spare parts and materials extra stock.
6. Final lamping plan and schedule including list of manufacturer and model number for all light fixtures.
7. Evidence of compliance with requirements of governmental agencies having jurisdiction including, but not necessarily limited to, Certificate of Inspection and Certificate of Occupancy.
8. Certificates of Insurance for products and completed operations.
9. Evidence of payment and release of liens. List of subcontractors, service organizations, and principal vendors, including names, addresses and telephone numbers where they can be reached for emergency service at all times including nights, weekends, and holidays.
10. List of subcontractors, service organizations, and principal vendors, including names, addresses and telephone numbers where they can be reached for emergency service at all times including nights, weekends, and holidays.

B. Submit a final statement of accounting to the Architect showing all adjustments to the Contract Sum.

1.6 INSTRUCTION

A. Instruct the Owner's personnel in proper operation and maintenance of systems, equipment and similar items which were provided as part of the Work. All instruction will be given to the satisfaction of the Architect prior to final payment.

END OF SECTION 01 78 00

GENERAL

1.1 DESCRIPTION

A. This Section specifies general administrative and procedural requirements for warranties required by the Contract Documents, including manufacturer's standard warranties on products and special warranties.

B. Refer to the General Conditions for terms of the General Contractor's special warranty of workmanship and materials.

C. Specific requirements for warranties for the work products and installation that are specified to be warranted, are included in the individual Sections of Divisions 02 through 48.

D. Certifications and other commitments and agreements for continuing services to Owner are specified elsewhere in the Contract Documents.

E. Disclaimers and Limitations: Manufacturer's disclaimers and limitations on product warranties do not relieve the General Contractor of the warranty on the work that incorporates the products, nor does it relieve suppliers, manufacturers, and subcontractors required to countersign special warranties with the General Contractor.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 DEFINITIONS

A. Standard Product Warranties are pre-printed written warranties published by individual manufactures for particular products and are specifically endorsed by the manufacturer to the Owner.

B. Special Warranties are written warranties required by or incorporated in the Contract Documents, either to extend time limits provided by standard warranties or to provide greater rights for the Owner.

1.4 WARRANTY REQUIREMENTS

A. Related Damages and Losses: When correcting warranted work that has failed, remove and replace other work that has been damaged as a result of such failure or that must be removed and replaced to provide access for correction of warranted work.

B. Reinstatement of Warranty: When work covered by a warranty has failed and has been corrected by replacement or rebuilding, reinstate the warranty by written endorsement. The reinstated warranty shall be equal to the original warranty with an equitable adjustment for depreciation.

C. Replacement Cost: Upon determination that work covered by a warranty has failed, replace or rebuild the work to an acceptable condition complying with requirements of Contract Documents. The General Contractor is responsible for the cost of replacing or rebuilding defective work regardless of whether the Owner has benefited from use of the work through a portion of its anticipated useful service life.

D. Owners Recourse: Written warranties made to the Owner are in addition to implied warranties, and shall not limit the duties, obligations, rights and remedies otherwise available under the law, nor shall warranty periods be interpreted as limitations on time in which the Owner can enforce such other duties, obligations, rights, or remedies.

1. Rejection of Warranties: The Owner reserves the right to reject warranties and to limit selections to products with warranties not in conflict with requirements of the Contract Documents.

E. The Owner reservices the right to refuse to accept work for the Project where a special warranty, certification, or similar commitment is required on such work or part of the work, until evidence is presented that entities required to countersign such commitments are willing to do so.

1.5 SUBMITTALS

A. Submit written warranties to the Construction Manager prior to the date certified for Substantial Completion. If the Architect's Certification of Substantial Completion designates a commencement date for warranties other that the date of Substantial Completion for the work, or a designated portion of the work, submit written warranties upon request of the Architect.

1. When a designated portion of the work is completed and occupied or used by the Owner, by separate agreement with the General Contractor during the construction period, submit properly executed warranties to the Construction Manager within fifteen days of completion of that designated portion of the work.

B. When a special warranty is required to be executed by the General Contractor, or the General Contractor and a subcontractor, supplier or manufacturer, prepare a written document that contains appropriate terms and identification, ready for execution by the required parties. Submit a draft to the Construction Manager for approval prior to final execution.

C. Form of Submittal: At Final completion, compile two copies of each required warranty and bond properly executed by the General Contractor, or by the General Contractor and a subcontractor, supplier or manufacturer. Organize the warranty documents into an orderly sequence based on the table of contents of the Project Manual.

D. Bind warranties and bonds in heavy-duty, commercial quality, durable 3-ring vinyl covered loose-leaf binders, thickness as necessary to accommodate contents, and sized to receive 8-1/2-inch by 11-inch paper.

1. Provide heavy paper dividers with celluloid covered tabs for each separate warranty. Mark the tab to identify the product or installation. Provide a typed description of the product or installation, including the name, of the product, and the name, address and telephone number of the installer.

2. Identify each binder on the front and the spine with typed or printed title "WARRANTIES AND BONDS", the Project title or name, and the name of the Construction Manager/General Contractor.

3. When operating and maintenance manuals are required for warranted construction, provide additional copies of each required warranty, as necessary, for inclusion in each required manual.

PRODUCTS

Not Used.

EXECUTION

Not Used,

END OF SECTION 01 78 36

GENERAL

1.1 SUMMARY

A. A soil investigation report has been prepared by Wallace Kuhl & Associates, hereinafter referred to as the Soil Engineer. A copy of this report (WKA No. 12406.1P dated September 5, 2019) is included with the Bid Documents.

B. This report was obtained only for the Owner's use in design and is not a part of the Contract Documents. The report and log of borings is available for contractor's information but is not a warrant of subsurface conditions.

1.2 INCORPORATION OF SOIL INVESTIGATION REPORT RECOMMENDATIONS

A. Where soils investigation report recommendations have been referenced in the Contract Documents as standards for the performance of work, such recommendations shall be considered part of the Scope of Work under this Contract.

1.3 ADDITIONAL INFORMATION

A. The Contractor should visit the site and acquaint himself with all existing conditions. Prior to bidding, bidders may make their own subsurface investigations to satisfy themselves as to site and subsurface conditions, but such subsurface investigations shall be performed only under time schedules and arrangements approved in advance by the Architect.

1.4 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

END OF SECTION 02 32 13

GENERAL

1.1 SUMMARY

A. Demolish and remove from the site those items so indicated on the Drawings

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SECTION REQUIREMENTS

A. Demolished material shall be considered the property of the Contractor and shall be completely removed from the job site.

B. Items indicated on the Drawings to be removed and salvaged remain Owner's property. Remove, clean and deliver to Owner's designated storage area.

C. Comply with EPA regulations and hauling and disposal regulations of authorities having jurisdiction.

D. It is not expected that hazardous materials will be encountered in the Work. If materials suspected of containing hazardous materials are encountered, do not disturb; immediately notify the Construction Manager. Owner will remove hazardous materials under a separate contract.

EXECUTION

3.1 EXISTING CONDITIONS

A. Prior to all work of this Section, examine the areas and conditions under which work will be performed. If conditions detrimental to timely and proper completion of the work exist, notify the Construction Manager. Do not proceed until unsatisfactory conditions are corrected.

B. Visit the site and verify the extent and location of selective demolition required. Carefully identify limits of selective demolition. Mark interface surfaces as required to enable workmen also to identify items to be removed and items to be left in place intact.

C. By careful study of the Contract Documents, determine the location and extent of selective demolition to be performed.

D. The Drawings do not purport to show all objects existing on the site or in the building.

3.2 DEMOLITION

A. Maintain services / systems indicated to remain and protect them against damage during selective demolition operations. Before proceeding with demolition, provide temporary services / systems that bypass area of selective demolition and that maintain continuity of services / systems to other parts of the building.

B. Locate, identify, shut off, disconnect and cap off utility services and mechanical / electrical systems serving areas to be selectively demolished.

C. Provide temporary barricades and other protection required to prevent injury to people and damage to adjacent buildings and facilities to remain.

D. Provide and maintain shoring, bracing and structural supports as required to preserve stability and prevent movement, settlement, or collapse of construction and finishes to remain or construction being demolished.

E. Provide temporary weather protection to prevent water leakage and damage to structure and interior areas.

F. Protect walls, ceilings, floors and other existing finish work that are to remain. Erect and maintain dustproof partitions. Cover and protect furniture, furnishings and equipment that have not been removed.

G. Neatly cut openings and holes plumb, square and true to dimensions required. Use cutting methods least likely to damage construction to remain or adjoining construction.

H. Promptly removed demolished materials from Owner's property and legally dispose of them. Do not burn demolished materials.

3.3 REPLACEMENT

A. In the event of demolition of items not so scheduled to be demolished, promptly replace such items to the approval of the Architect and at no additional cost to the Owner.

END OF SECTION 02 41 19

GENERAL

1.1 SUMMARY:
Provide and install thin brick veneer where shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:
This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:
Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1.4 QUALITY ASSURANCE:

A. Use a subcontractor having not less than two years successful experience in installation of similar products, as approved by the Architect.

B. Mock-ups:
1. Prior to other work of this Section, prepare a sample panel of the work of this Section at a location on the site where approved by the Architect.
2. Provide one mock-up panel for each combination of brick pattern, bond pattern, and mortar color.
3. Make each mock-up panel approximately 3'-0" x 4'-0".
4. Show method of bedding, grouting, bond pattern, cleaning and other aspects of the work of this Section to the quality specified.
5. Make necessary adjustments in the mock-up panels and secure the Architect's approval.
6. The mock-up panels, when approved by the Architect, will be used as datum points for comparison with the remainder of the installation for the purpose of acceptance or rejection.

PRODUCTS

2.1 GENERAL:

A. Provide all materials comprising a complete system equal to, but not necessarily limited to, the following:
1. Thin brick - H. C. Muddox Company, color per drawings with integral corner pieces.
2. Non-sagging Adhesive– Latacrete 253 R Gold Rapid Adhesive meeting ANSI A118.4 or equal.
3. Grout – Latacrete SpectraLock Pro or equal. Color to be selected from manufacturer’s standard color line.

EXECUTION

3.1 PREPARATION:

A. Prior to commencing the installation, the Contractor shall examine the areas to be covered and advise the General Contractor and Architect of any existing conditions or surface

contamination which will require correction before the work commences.

B. Before starting, surface to be covered shall be cleaned to remove soil, mortar, etc.

C. Dry or dusty concrete or masonry surfaces shall be wet down or washed and excess water removed just prior to the application of thin brick.

3.2 INSTALLATION BY THIN BED METHOD:

A. The Laticrete mortar shall be applied with a notched trowel using a scraping motion to work the material into good contact with the surface to be covered. A trowel having notches approximately 1/4" x 1/4" (6 mm x 6mm) is recommended for thin brick; 1/4" x 3/8" (6 mm x 10mm) for large brick.

B. Only as much mortar shall be applied as can be covered within 20-30 minutes, or while surface is still tacky. A small quantity of the mortar shall be troweled onto the back of each piece. Thin brick shall then be set in place and rapped or beaten with a small beating block to insure 100% fill bedding and a true surface. Pieces shall be aligned to show uniform joints and then allowed to set until firm.

C. Excess mortar shall be cleaned from the surface of the thin brick with a wet cloth or sponge while the mortar is fresh.

3.3 EXPANSION AND CONTROL JOINTS:
Expansion joints shall be installed where thin brick abuts restraining surfaces, such as perimeter walls, curbs, columns, corners, etc.

3.4 GROUTING AND POINTING JOINTS:

A. Allow the adhesive bond coat to cure minimum of 24 hours or until joints can be filled without displacement of the brick.

B. Joints shall be filled and pointed with Grout by means of a mortar gun, grout bag or other mortar-to-joint delivery device. Tool joints to a concave (vee or grapevine) profile once they have achieved sufficient hardness (thumbprint hard) .

C. Joints shall be packed full and free of all voids and pits. (Tool or rake as specified.)

D. Excess mortar shall be cleaned from the surface with water and a damp sponge as the work progresses, while mortar is fresh and before it hardens.

E. Hardened grout film or haze shall be removed using Laticrete TC-500 Tile, Grout & Masonry Cleaner per manufacturer’s recommendations. CAUTION: DO NOT USE ACID TYPE CLEANERS ON COLORED GROUT JOINTS.

3.5 PROTECTION:
The Contractor shall take precautions to protect the finished work from damage by other trades. Cold Weather Note: The setting of Portland cement mortars is retarded by low temperatures and finished work should be protected for an extended period of time.

END OF SECTION 04 21 13

GENERAL

1.1 SUMMARY:

A. Provide and install concrete unit masonry as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provision of Section 013323 of these specifications.

B. Prior to delivery of concrete unit masonry to the job site, deliver to the Architect a letter from the manufacturers of the concrete masonry units certifying that all such concrete masonry units delivered to the job site are in strict conformance with the provisions of this Section of these Specifications.

PRODUCTS

2.1 CONCRETE BLOCKS:

A. Concrete blocks shall be normal weight, standard tan color split-face modular units to sizes shown as manufactured by Calstone, Basalite, or an equal approved in advance by the Architect in accordance with the provisions of Section 01 25 00 of these Specifications.

B. Shrinkage of standard concrete blocks shall not exceed the amount recommended in ASTM C-90.

C. Water content:

1. At the time of delivery to the job site, concrete masonry units shall have a value, in weight of contained water, of not more than 13 – 18 pcf of the fully saturated content for the unit tested.

2. Ship all units from the factory, and store at the job site, with all the necessary protection to prevent increase of water content from rain and other sources.

D. Certification required by Article 1.3-B of this Section of these Specifications shall show results of tests made not more than twelve months prior to delivery of concrete masonry units to the job site, shall prove compliance with the specified values and shall certify that the mix design, yield per batch, and curing procedures for the units delivered to the job site are equal to those submitted for test.

2.2 MORTAR:

A. All mortar for concrete block shall conform with ASTM C-270-05a, 1800 psi in 28 days, and shall consist of one part portland cement by volume, ¼ to ½ part hydrated lime, and four parts of damp, loose sand, plus water; color to match concrete block.

2.3 REINFORCEMENT STEEL:

A. All reinforcement steel required for concrete masonry units shall be the type and quality specified for concrete in Section 033000 of these Specifications.

2.4 GROUT:

A. All grout should be transit-mixed in accordance with ASTM C-476-02 and shall consist of one part portland cement, 2-1/2 parts sand, two parts pea gravel, and adequate water to produce a concrete with a slump of 8-11 inches, and shall have an ultimate compressive strength of at least 2000 psi in 28 days.

2.5 ADMIXTURES FOR GROUT:

A. Use Sika Grout Aid, or an equal approved in advance by the Architect, in all grout for high-lift applications, following manufacturer's recommendations as approved by the Architect.

2.6 OTHER MATERIALS:

A. All Other materials, not specifically described but required for a complete and proper installation of concrete unit masonry, shall be as selected by the Contractor subject to the approval of the Architect.

EXECUTION

3.1 MIXING MORTAR:

A. Use a mechanical mixer of one sack minimum capacity. Use measuring box for all volume measurements. Mix mortar at least three minutes after all materials have been added.

B. Mix only as much mortar as can be used in one hour after water has been first mixed into the match.

C. Do not re-temper mortar.

3.2 INSTALLATION:

A. General:

1. Lay up all walls in bond to match existing, plumb, level, and true to the lines and dimensions indicated on the Drawings.

2. Do not use chipped or broken units. If any such units are discovered in the finished wall, the Architect may require their immediate removal and replacement with new units at no additional cost to the Owner.

B. Dampening:

1. Store all masonry units on the job so that they are kept off the ground and protected from the rain.

2. Wetting the units shall not be permitted except when hot and dry weather exists causing the units to be warm to the touch, and then the surface only may be wetted with a light fog spray.

C. Laying up:

1. Place all units in mortar with full shoved bed and head joints.

2. Align all vertical cells to maintain a clear, unobstructed system of flues.

3. Hold racking to an absolute minimum.

4. Provide cleanouts at the bottom of each cell for removing mortar droppings. Do not close the cleanouts until they have been inspected and approved by the Architect.

D. Reinforcement:

1. Install all reinforcement as indicated on the drawings.

2. Fully embed reinforcement in grout, not in mortar or mortar joints.

3. Furnish and install all required metal accessories to ensure accurate alignment of steel during grout filling operations.

E. Tool all joints to a dense, smooth, concave surface, 3/8” thick, unless other tooling is indicated on Drawings. Tooling of the mortar joint should be done when its surface is thumb-print hard utilizing a jointer having a diameter slightly larger than the mortar joint width. Striking joints with the same degree of hardness produces uniform joint appearance. Finishing is not only for appearance, but to seal the interface between mortar and masonry unit, while densifying the surface of the mortar joint.

3.3 GROUTING

A. Do not grout until masonry has cured at least 24 hours.

B. Consolidate all grout at time of pouring by puddling with a mechanical vibrator, filling all cells of the masonry, and then reconsolidating later by puddling before the plasticity is lost.

3.4 CLEANING UP:

A. Clean mortar from block each day.

B. Upon completion of the work of this Section, make a thorough inspection of all installed concrete unit masonry and verify that all units have been installed in accordance with the provisions of the Section. Make all necessary adjustments.

C. Clean all surfaces of concrete unit masonry as required for proper application of the specified finishes.

D. Upon completion of the work of this Section, promptly remove from the job site all mortar droppings, broken units, debris arising from the Work of this Section, and all tools and equipment of this Section, leaving all areas in a neat and orderly condition to the approval of the Architect.

END OF SECTION 04 22 23

GENERAL

1.1 SUMMARY:

A. Provide and install all miscellaneous iron and steel items not specifically described in other sections of these specifications but required for a complete and operable facility as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 QUALITY ASSURANCE:

A. Use only certified welders and the shielded arc process for all welding performed in connection with the work of this Section.

PRODUCTS

2.1 STEEL TUBING:

A. All steel tubing shall be new, free from rust, and conforming with the requirements of ASTM A-500-B.

2.2 STEEL PLATE:

A. All steel plate shall be new, free from rust, and conforming with the requirements of ASTM A-36.

2.3 BOLTS AND NUTS:

A. All bolts and nuts shall be new, free from rust, and conforming with the requirements of A-307.

2.4 EXPANDED METAL:

A. Expanded metal shall be carbon steel bond shearing ½” diamond pattern, 18 gauge, flattened, by McNichols Company or equal.

2.5 PRIMER PAINT:

A. All primer paint shall be compatible with the finish coats specified in Section 09 91 00 of these Specifications except that, where no finish coats are required, all primer paint shall be Tnemec Series V10 99R, a primer meeting the requirements of Federal Specification TT-P-615(d), type I, or an equal approved in advance by the Architect.

2.6 OTHER MATERIALS:

A. All other materials, not specifically described but required for a complete and proper installation of miscellaneous metal, shall be new, free from rust, best quality of their respective kinds, and subject to the approval of the Architect.

EXECUTION

3.1 SURFACE CONDITIONS:

A. Make all required measurements in the field to ensure proper and adequate fit of miscellaneous metal items.

B. Verify that miscellaneous metal may be fabricated and installed in strict accordance with the original design and the approved Shop Drawings.

3.2 FABRICATION:

A. Fabricate all miscellaneous metal in strict accordance with the approved Shop Drawings and the referenced standards.

B. Insofar as possible, shop prefabricate all items complete and ready for installation.

C. Welding:

1. Unless otherwise indicated on the Drawings, weld all shop connections.
2. Make all joints and intersections of metal tight fitting and securely fastened.
3. Make all work square, plumb, straight and true.
4. All welds to be ground smooth.
5. Reference AWS D1.1 for types of materials being welded.

D. Holes:

1. Drill or punch all holes required for the attachment of work of other trades and for bolted connections.
2. Burned holes are not acceptable.

E. Workmanship:

1. Form exposed work true to line and level with accurate angles and surfaces and straight, sharp edges.
2. Ease exposed edges to a radius of approximately 1/32 inch, unless indicated otherwise.
3. Form bent-metal corners to the smallest radius possible without causing grain separation or otherwise impairing the work.
4. Weld corners and seams continuously, complying with AWS recommendations. At exposed connections, grind exposed welds smooth and flush to match and blend with adjoining surfaces. Welds to be imperceptible in finished work.
5. Form exposed connections with hairline joints, flush and smooth, using concealed fasteners wherever possible.

F. Assemblies.

1. Use materials of sizes and thickness indicated or required to produce strength and durability in finished product for use intended.
2. Work to dimensions indicated.
3. Fit and shop assemble in largest practical sections for delivery to site.
4. Cut, reinforce, drill and tap miscellaneous metal work as required to receive finished hardware and similar items.

5. Exposed mechanical fasteners: When application will not permit concealed fasteners, locate exposed fasteners in unobtrusive manner, consistent with design of component, except where specifically noted otherwise. Use Phillips flat-head countersunk screws or bolts for exposed fasteners.
6. Supply components required for anchorage of fabrications. Fabricate anchors and related components of same material and finish as fabrication, except where specifically noted otherwise.
7. Fabricate joints exposed to the weather to be weather tight and provide weep holes as required.
8. Continuously seal joined members by continuous welds.

3.3 SHOP PAINTING:

A. Preparation:

1. Thoroughly clean all metal as described in Section 099100 of these Specifications.
2. Provide all required protection for metal to be encased in concrete to prevent accumulation of deleterious foreign material.

B. Shop prime all steel except:

1. Steel to be encased in concrete or masonry;
2. Surfaces to be welded;
3. Steelwork which will be concealed by interior finish.

3.4 ERECTION:

A. Erect and install all miscellaneous metal in strict accordance with the Drawings, the approved Shop Drawings, and the referenced standards, aligning straight, plumb, and level within a tolerance of one in 200.

B. After the erection and installation are complete, touch-up all shop priming coats damaged during transportation and erection, using the priming paint specified for shop priming.

END OF SECTION 05 50 00

GENERAL

1.1 SUMMARY:

A. Provide and install vertical metal ladders where shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

PRODUCTS

2.1 METAL LADDERS:

A. Design is based on use of O'Keeffe's Inc. extruded aluminum vertical ladders #500 standard channel design, or equivalent fabricated steel per Drawings.

EXECUTION

3.1 INSTALLATION:

A. Install the ladders in strict accordance with all pertinent codes and regulations, the original design, and the manufacturer's recommendations, anchoring all components firmly and securely for long life under hard use.

END OF SECTION 05 51 33

GENERAL

1.1 SUMMARY:

A. Provide and Install steel pipe and tube handrails, balusters and fittings as shown on the Drawings and Specified herein.

B. Related Sections: 05 50 00 Metal Fabrications

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. Indicate component details, materials, finishes, connection and joining methods, and the relationship to adjoining work.

1.4 STRUCTURAL REQUIREMENTS:

A. Railing assembly, wall rails, and attachments to resist lateral force of 100 lbs. at any point without damage or permanent set.

PRODUCTS

2.1 BASIS OF DESIGN:

A. Julius Blum and Company, Inc.

B. Substitutions: Items of same function and performance are acceptable in accordance with the General and Special Provisions of these Specifications.

2.2 STEEL RAILING SYSTEM:

A. Rails and Posts: 1-1/2 inches outside diameter steel pipe; welded jointing, Schedule 40.

B. Intermediate Rails: 1” outside diameter steel pipe; welded jointing, Schedule 40.

C. Fittings: Elbows, t-shapes, wall brackets, escutcheons; machined steel.

D. Mounting: Brackets “Blum” WBHC with expansion shield or lag bolt per wall type application.

E. Splice connectors: Steel welding collars.

F. Primer: FS TT-P-31, red; two coats.

2.3 FABRICATION:

A. Verify dimensions on site prior to shop fabrication.

B. Fit and shop assemble sections in largest practical sizes, for delivery to site and installation.

C. Supply components required for secure anchorage of hand-rails and railings.

D. Grind exposed welds smooth and flush with adjacent surfaces.

E. Make exposed joint butt tight, flush and hairline.

F. Accurately form components required for anchorage of railings to each other and to building structure.

G. Provide expansion joints in all runs that exceed 20’.

EXECUTION

3.1 PREPARATION:

A. Supply items to be cast into concrete with setting templates and erection drawings to appropriate sections.

3.2 INSTALLATION:

A. Install in accordance with Shop Drawings and manufacturer’s instructions.

B. Erect work square and level, free from distortion or defects detrimental to appearance or performance.

C. Anchor handrailings securely to structure.

D. Weld field connections and grind smooth to complete assembly. Touch-up welds with primer.

END OF SECTION 05 52 13

GENERAL

1.1 SUMMARY

A. Section includes insulating wall sheathing with integral water-resistive barrier and air barrier.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Product Data: For each type of sheathing product specified.

B. Evaluation Reports: From ICC-ES, for wood sheathing and seam tape.

C. Product Certifications: From manufacturer, indicating that sheathing products comply with ICC-ES AC269 and ICC-ES AC310.

D. Warranty: Executed copy of manufacturer special warranties.

7. ICC-ES AC310 - Acceptance Criteria for Water-Resistive Membranes Factory-bonded to Wood-based Structural Sheathing, Used as Water-Resistive Barriers
8. ICC-ES ESR-1539 - Power Driven Staples and Nails for Use in Engineered and Non-Engineered Connections
9. ICC-ES NER-272 - Power Driven Staples and Nails for Use in All Types of Building Construction

1.5 QUALITY ASSURANCE

A. Manufacturer Qualifications: Provide wood products from manufacturer certified by SFI, FSC, or comparable sustainable forestry program acceptable to Architect.

B. Provide wall sheathing products meeting requirements for water-resistive barrier in accordance with ICC-ES AC310.

C. Provide wall sheathing products meeting requirements of ICC-ES AC269.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Comply with manufacturer's written instructions for protection of sheathing products from weather prior to installation.

1.7 WARRANTY

A. Special Manufacturer's Warranty: Manufacturer's standard form in which sheathing manufacturer agrees to repair or replace sheathing products that demonstrate deterioration or failure under normal use due to manufacturing defects within warranty period specified, when installed according to manufacturer's instructions.

1. Warranty Period for Sheathing Products: [30] years following date of Substantial Completion.
2. Warranty Conditions: Special warranties exclude deterioration or failure due to structural movement resulting in stresses on sheathing products exceeding manufacturer's written specifications, or due to air or moisture infiltration resulting from cladding failure or mechanical damage.

PRODUCTS

2.1 MANUFACTURERS

A. Basis-of-Design Product: Provide sheathing products manufactured by Huber Engineered Woods LLC, Charlotte NC; Phone: (800) 933-9220; Website: www.zipsystem.com.

2.2 PERFORMANCE REQUIREMENTS

A. Air-Barrier Assembly Air Leakage: Less than 0.04 cfm/sq. ft. at 1.57 lbf/sq. ft. (0.2 L/s x sq. m at 75 Pa), per ASTM E2375.

B. Water-Vapor Permeance, Facer: Minimum 12 perms (689 ng/Pa x s x sq. m), ASTM E96/E96M.

C. Weather Exposure: Manufacturer warranty applies for maximum allowable exposure period of 180 days.

2.3 MATERIALS

A. Oriented Strand Board: DOC PS 2, made with binder containing no added urea formaldehyde.

B. Rigid Foam Plastic Insulating Board: Rigid polyisocyanurate foam core complying with ASTM C1289 Type II, Class 2, and ICC-ES AC12, with coated glass fiber facers on both sides, with the following characteristics:

1. Nominal Density: 2.0 pcf (32 kg/cu. m).
2. Compressive Strength, ASTM D1621: Not less than 20 psi (150 kPa).
3. Vapor Permeance, ASTM E96/E96M: Less than 1.0 perm.
4. Edge Configuration: Square finished.

2.4 COMPOSITE INSULATING WALL SHEATHING

A. Composite Insulating Wall Sheathing: Oriented-strand-board Exposure 1 sheathing 7/16 inch (11.1 mm) thick, with factory-laminated water-resistive barrier exterior facer, and with rigid foam plastic insulating board laminated to interior face.

B. Basis-of-Design Product: Provide Huber Engineered Woods LLC; ZIP System R Sheathing.

C. Span Rating and Performance Category of Sheathing Layer: Not less than 24/16; 7/16 Performance Category.

D. Thickness: 1-1/2 inch (38 mm), or as schedules on the Drawings

E. Thermal Resistivity (R Value): 6.6 deg F x h x sq. ft./Btu x in. at 75 deg F

F. Edge Profile: Square edge.

G. Exterior Facer: Medium-density, phenolic-impregnated polymer-modified sheet material meeting requirements for ASTM D779 Grade D weather-resistive barrier in accordance with ICC AC38 and AC310, with fastener spacing symbols on exterior facer for 16-inch (406 mm) and 24-inch (610 mm) on center spacing, with the following characteristics

1. Water Resistance of Coatings, ASTM D2247: Pass 14 day exposure test.
2. Moisture Vapor Transmission, ASTM E96: Not less than 12 perms.
3. Water Penetration, ASTM E331: Pass at 2.86 lbf/sq. ft. (137 Pa).
4. Wind Driven Rain, TAS-100: Pass.
5. Accelerated Weathering, ASTM G154: Pass.

2.5 FASTENERS

A. Fasteners, General: Size and type complying with manufacturer's written instructions for Project conditions and requirements of authorities having jurisdiction.

1. Corrosion Resistance: Hot-dip zinc coating, ASTM A153/A 153M or Type 304 stainless steel.

B. Nails, Brads, and Staples: ICC AC116 and ICC AC201.

C. Power-Driven Fasteners: ICC-ES-1539 or NER-272.

D. Wood Screws: ASME B18.6.1.

2.6 SHEATHING JOINT-AND-PENETRATION TREATMENT MATERIAL

A. Self-Adhering Seam and Flashing Tape: Pressure-sensitive, self-adhering, cold-applied, seam tape consisting of polyolefin film with acrylic adhesive, meeting ICC AC148.

1. Basis-of-Design Product: Provide Huber Engineered Woods; ZIP System Tape.

2. Thickness: 0.012 inch (0.3 mm).

EXECUTION

3.1 EXAMINATION

A. Examine framing spacing and alignment to determine if work is ready to receive sheathing. Proceed with sheathing work once conditions meet requirements.

3.2 SHEATHING INSTALLATION

A. Install sheathing panels in accordance with manufacturer's written instructions, requirements of applicable Evaluation Reports, and requirements of authorities having jurisdiction.

B. Air and Moisture Barrier: Coordinate sheathing installation with flashing and joint sealant installation and with adjacent building air and moisture barrier components to provide complete, continuous air- and moisture- barrier.

C. Do not bridge expansion joints; allow joint spacing equal to spacing of structural supports.

D. Install panels with laminated facer to exterior. Stagger end joints of adjacent panel runs.

E. Attach sheathing panels securely to substrate with manufacturer-approved fasteners in compliance with the following:

1. ICC-ES ESR-1539 or ICC-NES NER-272 for power-driven fasteners.

2. California Building Code (CBC): Table 2304.10.1 Fastening Schedule.

3. Details and schedules on the Drawings.

F. Apply seam tape at all panel seams, penetrations, and facer defects or cracks to form continuous weathertight surface. Apply tape according to manufacturer's written instructions and requirements of ICC-ES applicable to tape application.

END OF SECTION 06 16 13

GENERAL

1.1 SUMMARY
Provide and install all finish carpentry as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:
This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provision of Section 013323 of these specifications.

B. Fabrication (shop) drawings shall meet the standards set forth by the Woodwork Institute. A sample of shop drawings meeting these requirements can be found here: http://woodworkinstitute.com/architectural-resources/shop-drawings/

1.4 INDOOR AIR POLLUTANT CONTROL REQUIREMENTS:

A. Hardwood plywood, particle board and medium density fiberboard composite wood products shall meet the requirements for formaldehyde as specified in ARB's Air Toxics Control Measure for Composite Wood (17 CCR 93120 et. seq.) by or before the dates specified in those sections.
1. Documentation: Verification of compliance shall be include one of the following:
a. Product certifications and specifications
b. Chain of custody certifications
c. Other methods acceptable to the local enforcement agency

B. Per Section 5.504.4.1 of the 2016 California Green Building Standards Code, adhesives, sealants and caulks used on the project shall meet the requirements of the following standards:
1. Adhesives, adhesive bonding primers adhesive primers, sealants, sealant primers and caulks shall comply with local or regional air pollution control or air quality management district rules where applicable, or SCAQMD Rule 1168 VOC limits, as shown in Tables 5.504.4.1 and 5.504.4.2 of the 2016 California Green Building Standards Code. Such products also shall comply with the Rule 1168 prohibition on the use of certain toxic compounds (chloroform, ethylene dichloride, methylene chloride, perchloroethylene and trichloroethylene)

1.5 QUALITY CONTROL
Install work in this section in accordance with the latest published edition of Architectural Woodwork Standards published by AWI/WI;

PRODUCTS

2.1 MATERIALS, GENERAL:

A. Lumber: DOC PS 20 and grading rules of inspection agencies certified by American

Lumber Standards Committee Board of Review.

B. Hardwood Plywood: HPVA HP-1. Comply with Indoor Air Pollutant Control Requirements Section 1.4 of these specifications

C. Medium Density Fiberboard (MDF): ANSI A208.2, Grade 130 made with binder containing no urea-formaldehyde resin.

D. Particleboard: ANSI A208.1, Grade M-2. Comply with Indoor Air Pollutant Control Requirements Section 1.4 of these specifications

2.2 EXTERIOR FINISH CARPENTRY:

A. Exterior Lumber Fascia and Trim: Saw-textured, Grade A, western red cedar - Maximum Moisture Content: 15 percent.

2.3 INTERIOR STANDING AND RUNNING TRIM:

A. Interior Wood Trim Work: Cherry, “A” grade, in profile shown on the Drawings.

B. Interior Wood Paneling: Cherry, “A” grade, quarter cut book match veneer on ¾” MDF with ¼” solid Cherry edge-band, all sides. Blueprint match within room.

2.4 MISCELLANEOUS MATERIALS:

A. Fasteners for Exterior Finish Carpentry: hot-dip galvanized steel.

B. Glue: Aliphatic-resin, polyurethane, or resorcinol wood glue recommended by manufacturer. Comply with Indoor Air Pollutant Control Requirements Section 1.4 of these specifications.

C. Use waterproof resorcinol glue for exterior applications.

EXECUTION

3.1 INSTALLATION:

A. Condition finish carpentry in installation areas for 24 hours before installing.

B. Prime and backprime lumber for painted finish exposed on the exterior.

C. Install finish carpentry level, plumb, true, and aligned with adjacent materials. Scribe and cut to fit adjoining work. Refinish and seal cuts.

D. Install standing and running trim with minimum number of joints practical, using full-length pieces from maximum lengths of lumber available. Stagger joints in adjacent and related trim. Cope at returns and miter at corners.

E. Wood Paneling:
1. Install wood paneling over gypsum board with panel adhesive, continuous bead around edges and beads at 6” o.c. (field). Use finish nails only as required to hold panels in alignment until adhesive sets.

2. Apply paneling in pattern and direction of grain as shown on the Drawings.
3. All paneling shall have edges routes with a 1/8” bevel.

F. Sand all smooth-finish wood surfaces thoroughly to produce a uniformly smooth surface.

G. Prepare wood surfaces to receive semi-transparent stain as specified in Section 09 91 00.

END OF SECTION 06 20 00

GENERAL

1.1 SUMMARY:
Provide and install cabinetry as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:
This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

B. Make submittals to the Architect in accordance with the provision of Section 013323 of these specifications. The Architect shall be the sole judge as to the acceptability of all products submitted in accordance with the provisions of Section 012500 of these specifications.

C. Fabrication (shop) drawings shall meet the standards set forth by the Woodwork Institute. A sample of shop drawings meeting these requirements can be found here: http://woodworkinstitute.com/architectural-resources/shop-drawings/

1.4 INDOOR AIR POLLUTANT CONTROL REQUIREMENTS:

A. Composite wood products used for finish carpentry shall contain no added urea formaldehyde resins. Laminating adhesives used to fabricate composite wood finish carpentry assemblies shall contain no added urea formaldehyde resins.
1. Documentation: Verification of compliance shall be include one of the following:
    a. Product certifications and specifications
    b. Chain of custody certifications
    c. Other methods acceptable to the local enforcement agency

B. Per Table 5.504.4.1 of the 2016 California Green Building Standards Code, adhesives, sealants and caulks used on the project shall meet the requirements of the following standards:
1. Adhesives, adhesive bonding primers adhesive primers, sealants, sealant primers and caulks shall comply with local or regional air pollution control or air quality management district rules where applicable, or SCAQMD Rule 1168 VOC limits, as shown in Tables 5.504.4.1 and 5.504.4.2 of the 2016 California Green Building Standards Code. Such products also shall comply with the Rule 1168 prohibition on the use of certain toxic compounds (chloroform, ethylene dichloride, methylene chloride, perchloroethylene and trichloroethylene).

1.5 ENVIRONMENTAL LIMITATIONS:
Do not deliver or install woodwork until building is enclosed, wet work is completed, and HVAC system is operating.

1.6 QUALITY CONTROL:
Install work in this section in accordance with the latest published edition of North American Architectural Woodwork Standards (NAAWS) published by WI and AWMAC.

PRODUCTS

2.1 MATERIALS:

A. Hardboard: AHA A135.4.

B. Medium-Density Fiberboard: ANSI A208.2, Grade 130, made with binder containing no urea formaldehyde.

C. Particleboard: ANSI A208.1, Grade M-2.

D. Softwood Plywood: DOC PS 1. Veneer core plywood shall be a non-telegraphing hardwood.

E. Hardwood Plywood and Face Veneers: HPVA HP-1, made with adhesive containing no urea formaldehyde.

F. Thermoset Decorative Panels: Comply with LMA SAT - 1.

G. High-Pressure Decorative Laminate: NEMA LD 3.
1. Manufacturers: Formica, Wilsonart, Nevamar, or equal.
2. Products:
    a. Standard laminate. Color as indicated on Drawings

H. Thermally Fused Laminate: NEMA LD 3 GP-28.
1. Manufacturers: American Laminates, or equal.
2. Products:
    b. Standard laminate. Color as indicated on Drawings

I. Solid-Surfacing Material: Homogeneous solid sheets of filled plastic resin complying with ISSFA-2.
1. Products: Corian or equal.

J. Thermofused Melamine: Wilsonart Contract or equal, white

K. Edge Band: veneer of same species and cut as exposed surfaces for wood veneer casework and HGS high pressure laminate for plastic laminate casework.

2.2 CABINET HARDWARE AND ACCESSORY MATERIALS:

A. Frameless Concealed Hinges (European Type): BHMA A156.9, B01602, 170 degrees of opening, Blum, Gras or equal.

B. Pulls:
1. Wire Pulls: Back mounted, solid metal, 4 inches (100 mm) long, 5/16 inch (8 mm) in diameter, Trimco #562-4 or equal. Oil Rubbed Bronze Finish

C. Catches: Ball friction catches, BHMA A156.9, B03013.

D. Adjustable Shelf Standards and Supports: KV 255ZC standards and KV 237ZC clips for glass shelves and KV 180A standards and KV 180A brackets for wood shelves.

E. Drawer Slides: BHMA A156.9, B05091, KV1300 series or equal.
1. Box Drawer Slides: Grade 1HD-100.
2. File Drawer Slides: Grade 1HD-100.
3. Pencil Drawer Slides: Grade 1.
4. Keyboard Slides: Grade 1.
5. Trash Bin Slides: Grade 1HD-100.

F. Cabinet Locks: Provide and install cabinet locks where shown on the Drawings.
1. Pin Tumbler Door and Drawer Deadbolt Locks
   a. Schlage CL721G/CL771G deadbolt locks with removable key cylinder; 'C' keyway and 6 pin solid brass cylinder. Provide barrel length, handing and accessories as required per conditions.
   b. Provide cylinders construction keyed. At substantial completion, provide the services of a professional locksmith who shall key the cabinet locks, in coordination with the door locksets, as directed by the Owner.
2. Pin Tumbler Cylinder Cam Locks
   a. Schlage CL720G Cam Lock with removable Schlage 'C' keyway.
   b. Provide cylinders construction keyed. At substantial completion, provide the services of a professional locksmith who shall key the cabinet locks, in coordination with the door locksets, as directed by the Owner.

G. Grommets for Cable Passage through Countertops: 2-inch (51-mm) OD, molded-plastic grommets and matching plastic caps with slot for wire passage.

H. Exposed Hardware Finishes: Comply with BHMA A156.18 for BHMA code number indicated.
1. Finish: Oil Rubbed Bronze: BHMA 613

I. Furring, Blocking, Shims, and Hanging Strips: Softwood or hardwood lumber, kiln dried to 15 percent moisture content.

2.3 INTERIOR WOODWORK:

A. Wood Cabinets for Transparent Finish: Premium grade.
1. AWI/WI Type of Cabinet Construction: Flush overlay.
2. WI Construction Style: Style A, Frameless.
3. WI Door and Drawer Front Style: Flush overlay stile and rail with raised panel 'Shaker' profile.
4. Wood Species and Cut for Exposed Exterior Surfaces: Cherry 'A' Grade, quarter cut, book match. Millwork veneer shall comply with Section 06 20 00 Finish Carpentry for visual compatibility of veneers.
5. Grain Direction: As indicated.
6. Matching of Veneer Leaves: Random match.
7. Retain one of three options in first subparagraph below for Premium-grade cabinets.
8. Veneer Matching within Panel Face: Center-balance match.
9. Exposed Interior Surfaces: Same species and cut indicated for exposed exterior surfaces.
10. Semi-Exposed Surfaces other than drawer boxes: Wood of compatible species to the exposed surfaces

11. Drawer Sides and Backs: Thermofused Melamine
12. Drawer Bottoms: Thermofused Melamine

B. Plastic-Laminate Cabinets: Premium grade.
1. AWI/WI Type of Cabinet Construction: Flush overlay
2. WI Construction Style: Style A, Frameless.
3. WI Door and Drawer Front Style: Flush overlay stile and rail with raised panel 'Shaker' profile style.
4. Laminate Cladding: Horizontal surfaces other than tops, HGS; postformed surfaces, HGP; vertical surfaces, HGS.
5. Drawer Sides and Backs: Thermofused Melamine
6. Drawer Bottoms: Thermofused Melamine
7. Edge Banding: HGS laminate to match adjacent surface

C. Plastic-Laminate Countertops: Premium grade.
1. Laminate Grade: HGS for flat countertops, HGP for post-formed countertops.
2. Edge Treatment: Same as laminate cladding on horizontal surfaces.

D. Solid-Surfacing Material Countertops: Premium grade.
1. Solid-Surfacing Material Thickness: 1/2 inch (13 mm) thick.
2. Fabricate tops in one piece with shop-applied backsplashes and edges.

E. Plastic-Laminate Paneling and Moulding: Premium Grade.
1. Laminate Grade: HGS for vertical surfaces, HGP for post-formed profiles
2. Substrate. Comply with standards above for plywood and particleboard
3. Profiles as indicated on Drawings, or eq
4. Colors as indicated on Drawings, or eq

2.4 SHOP FINISHING OF INTERIOR ARCHITECTURAL WOODWORK:

A. Finishes: Same grades as items to be finished.

B. Finish architectural woodwork at the fabrication shop; defer only final touch up until after installation.
1. Apply one coat of sealer or primer to concealed surfaces of woodwork. Provide Premium finish.
2. Apply a vinyl wash coat to woodwork made from closed-grain wood before staining and finishing.
3. After staining, if any, apply paste wood filler to open-grain woods and wipe off excess. Tint filler to match stained wood.

C. Transparent Finish: AWI/WI finish system catalyzed polyurethane in accordance with Section 5 of the NAAWS manual.

EXECUTION

3.1 EXAMINATION:

A. Verify the adequacy and proper location of any required backing or support framing.

B. All wood or metal frame construction shall be constructed with continuous in wall blocking

of either 3x6 flat Douglas Fir or 16 GA x 6" wide, 50 KSI sheet metal provided in accordance with the location requirements included on the fabricator / installer's shop drawings. Responsibility for blocking installation shall be that of the wall fabricator.

C. Verify that mechanical, electrical, plumbing and other building components effecting work in this section are in place and ready.

3.2 INSTALLATION:

A. Install all work in conformance with the North American Architectural Woodwork Standards, latest edition.
1. Installation shall conform to the NAAWS Grade of the items being installed.

B. All work shall be secured in place square, plumb and level.

C. All work abutting other building components shall be properly scribed.

D. Mechanical fasteners used at exposed and semi-exposed surfaces, excluding installation attachment screws and those securing cabinets end to end, shall be countersunk.

E. Equipment cutouts shown on plans shall be cut by the installer.

3.3 ADJUSTING AND TOUCHUP:

A. Before completion of the installation, the installer shall adjust all moving and operation parts to function smoothly and correctly.

B. All nicks, chips and scratches in the finish shall be filled and retouched. Damaged items which cannot be repaired shall be replaced.

3.4 CLEAN UP:
Upon completion of installation the installer shall clean all installed items of pencil and ink marks, and broom clean his area of operation, depositing debris in containers provided by the general contractor.

3.5 FINAL INSPECTION:

A. Prior to final inspection and acceptance by the Architect, completely check each installed item and adjust for proper operation.

B. The Owner reserves the right to request and pay for an inspection by a representative of the Woodwork Institute of California to determine that all work of this Section has been performed in accordance with the referenced standards.

C. In the event that such inspection determines that architectural woodwork, or any part of it does not comply with the referenced standards, immediately remove the non-complying items and immediately replace them with items complying with the referenced standards and these Specifications, all at no additional cost to the Owner.

END OF SECTION 06 41 00

GENERAL

1.1 SUMMARY:

A. Provide and install manufactured PVC mouldings, trim, and accessories as shown on drawings and specified herein.

1.2 REFERENCES

A. ASTM International (ASTM): ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials.

1.3 SUBMITTALS

A. Submit under provisions of Section 01 33 23 - Administrative Requirements.

B. Product Data: Manufacturer's data sheets on each product to be used, including:

1. Preparation instructions and recommendations.
2. Storage and handling requirements and recommendations.
3. Installation methods.

C. Verification Samples: For each finish product specified, two samples, minimum size 6 inches (150 mm) square representing actual product, color, and patterns.

1.4 QUALITY ASSURANCE

A. Regulatory Requirements: Comply with requirements of authorities having jurisdiction and applicable codes at the location of the project.

B. Manufacturer Qualifications: Minimum 5 years experience manufacturing similar products.

C. Installer Qualifications: Minimum 2 years experience installing similar products.

D. Mock-Ups: Provide a mock-up for evaluation of surface preparation techniques and application workmanship.

1. Construct area designated by Architect.
2. Do not proceed with remaining work until workmanship is accepted by Architect.
3. Remodel mock-up area as required to produce acceptable work.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store products in manufacturer's unopened packaging bearing the brand name and manufacturer's identification until ready for installation.

B. Comply with manufacturer's recommendations. Handle materials to avoid damage.

1.6 PROJECT CONDITIONS

A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's recommended limits.

1.7 WARRANTY

A. Provide manufacturer's standard 25 year limited warranty for products, stating that components will be free from defects in material that occur as a direct result of the manufacturing process, occur under normal use and service, occur during the warranty period and result in blistering, peeling, flaking, cracking, splitting, cupping, rotting or structural defects from termites or fungal decay.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: Azek Building Products, Inc., which is located at: 894 Prairie Ave.; Wilmington, OH 45177; Toll Free Tel: 877-ASK-AZEK; Email: request info (raymond.bielawski@cpgbp.com); Web: http://www.azek.com | http://timbertech.com

B. Requests for substitutions will be considered in accordance with provisions of Section 01 25 00 - Product Options and Substitutions.

2.2 TRIM

A. Fire Performance Characteristics: Provide products complying with the following:

1. Flame Spread Index: Less than 25, ASTM E 84.

B. PVC Trim: Material shall have the following characteristics:

1. Material: Solid Cellular PVC.
2. Style: Traditional.
3. Trim Size, 5/4 Thickness and as indicated on Drawings:

2.3 MOULDINGS

A. Detail Profiles: Material shall have the following characteristics:

1. Material: Solid Cellular PVC.
2. Detail Profile:
   a. Water Table: 2-3/4 inches x 2 inch x 18 feet, AZM-6935.
   b. Quarter Round: -3/4 inches x-3/4 inches x 16 feet, AZM-105.

2.4 ACCESSORIES

A. Fasteners: Stainless steel or hot-dip galvanized, with thin shank, blunt point, full round head as recommended by the manufacturer.

B. Adhesives: Azek Adhesive, a non-toxic, odorless, UV stable, water-based PVC cement.

C. Sealants: Urethane, polyurethane or acrylic based sealants without silicone.

EXECUTION

3.1 EXAMINATION

A. Verification of Conditions: Examine areas and conditions under which Work is to be performed and identify conditions that may be detrimental to proper or timely completion.

B. Do not proceed until unsatisfactory conditions have been corrected.

3.2 INSTALLATION - TRIM

A. Install materials in strict accordance with manufacturer's installation instructions. Install flashing around all wall openings.

B. Fasten through trim into structural framing or code complying sheathing. Fasteners must penetrate minimum 3/4 inch (19 mm) or full thickness of sheathing. Additional fasteners may be required to ensure adequate security.

C. Place fasteners no closer than 3/4 inch (19 mm) and no further than 2 inches (51 mm) from side edge of trim board and no closer than 1 inch (25 mm) from end. Fasten maximum 16 inches (406 mm) on center.

D. Maintain clearance between trim and adjacent finished grade.

E. Refer to the Drawings for inside and outside corner conditions.

F. Allow 1/8 inch gap between trim and siding.

G. Seal gap with high quality, paint-able caulk.

H. Shim frieze board as required to align with corner trim.

3.3 FINISHING

A. Finish factory primed siding in accordance with Section 09 91 00 within 180 days of installation. Follow paint manufacturer's written product recommendation and written application instructions.

3.4 PROTECTION

A. Protect installed products until completion of project.

B. Touch-up, repair or replace damaged products before Substantial Completion.

END OF SECTION 06 60 00

GENERAL

1.1 SUMMARY:
Provide and install building insulation as shown on the Drawings and specified herein including but not necessarily limited to batts in roof rafter spaces, wood stud spaces at exterior walls, noise reduction batts in interior walls, and rigid insulation over structural roof sheathing.

1.2 GENERAL REQUIREMENTS:
This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:
Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1.4 CODES AND STANDARDS
All building insulation materials shall conform to the certified requirements and shall be installed to meet flame and smoke spread density requirements of State of California Title 24.

PRODUCTS

2.1 BUILDING INSULATION:

A. All glass fiber building insulation except as noted herein shall be the product of Owens/Corning Fiberglas, CertainTeed or an equal approved in advance by the Architect. All glass fiber batts shall be formaldehyde-free type insulation.

B. Ceiling and Rafters: At all roofs and ceilings where noted furnish and install Flame Spread 25 faced glass fiber batts having a thermal resistance "R" value of R-30 for insulation only.

C. Exterior Walls: At all exterior walls, furnish and install unfaced glass fiber batts having a thermal resistance of R-19 for insulation only in each stud cavity.

D. Interior walls:
1. In all interior walls furnish and install unfaced sound attenuation batts by Owens Corning, CertainTeed, or approved equal; 3-1/2 inch thick batts in 2 x 4 walls and 5-1/2 inch thick batts in 2 x 6 walls in each of the stud cavities.

E. Rigid Composite Insulation, Sloped Roof:
1. Base Layer: composite polyisocyanurate foam board
2. Top Layer, Nailable Surface: composite polyisocyanurate foam bonded to 7/16" strand board, AC Foam Nail Base as manufactured by Atlas, or equal.
3. Stagger joints between layers and mechanically fasten rigid insulation boards to structural deck to resist code-prescribed wind uplift forces in patterns as recommended and approved by the manufacturer.
4. Thickness and R-value as specified on the Drawings.

2.2 OTHER MATERIALS:
All other materials such as fasteners and retainers, not specifically described but required for a

complete and proper installation of building insulation, shall be as recommended by the manufacturer; selected by the Contractor subject to the approval of the Architect.

EXECUTION

3.1 INSTALLATION:

A. Except as otherwise specifically directed by the Architect, install building insulation in accordance with the current edition of the Owens/Corning Fiberglas publication 3-BL-4992 "Fiberglas Building Insulation Application Instructions" where applicable.

B. Install insulation in areas and in thicknesses indicated or required to produce R-values indicated. Cut and fit tightly around obstructions and fill voids with insulation.

C. Install the rigid composite sloped roof insulation with the strand board facing up and in strict accordance with the manufacturer's directions.

3.2 INSPECTION:
Upon completion of the installation, visually inspect each insulated area and verify that all insulation is complete and properly installed.

END OF SECTION 07 21 00

GENERAL

1.1 SUMMARY:

A. Provide and install granule surfaced asphalt composition shingle roofing as shown on the Drawings and specified herein including, but not necessarily limited to, composition shingle roof, membrane underlayment, associated metal flashing, and fasteners.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

B. Product Data: Provide manufacturer's printed product information indicating material characteristics, performance criteria and product limitations.

C. Manufacturer's Installation Instructions: Provide published instructions that indicate preparation required and installation procedures.

D. Certificate of Compliance: Provide Certificate of Compliance from an independent laboratory indicating that the asphalt fiberglass shingles made in normal production meet or exceed the requirements of the following:

1. ASTM E 108/UL 790 Class A Fire Resistance
2. ASTM D 3161/UL 997 Wind Resistance.
3. ASTM D 3462

M. National Roofing Contractors Association (NRCA) Guidelines for Asphalt Shingle Roof Systems and Quality Control Guidelines for the Application of Asphalt Shingle Roof Systems

1.5 QUALITY ASSURANCE

A. Installer Minimum Qualifications: Installer shall be licensed or otherwise authorized by all federal, state and local authorities to install all products specified in this section. Installer shall perform work in accordance with NRCA Roofing and Waterproofing Manual.

B. Verify that manufacturer's label contains references to specified ASTM standards

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store Products in manufacturer's unopened packaging until ready for installation.

B. Store and dispose of solvent-based materials and materials used with solvent based materials, in accordance with requirements of local authorities having jurisdiction.

C. Deliver shingles to site in manufacturer's unopened labeled bundles. Promptly verify quantities and conditions. Immediately remove damaged products from site.

1.7 WARRANTY

A. Manufacturer's Warranty: Furnish shingle manufacturer's warranty for the product listed below:

1. 40-year commercial project warranty

B. Warranty Supplement: Provide manufacturer's supplemental non-prorated warranty to cover labor and materials in the event of a material defect for the following period after completion of application of shingles:

1. First Five Years

C. Provide Upgraded Wind Warranty from 110 to 130 mph for first 15 years by complying with all manufacturers' conditions and instructions.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: Provide products manufactured by the CertainTeed Corporation. Contact Sales Support Group P.O. Box 860 Valley Forge, PA 19482 Toll Free 800-233-8990

2.2 ASPHALT FIBERGLASS SHINGLES

A. Basis of Design: CertainTeed Presidential Shake TL: Conforming to ASTM D 3018 Type I – Self-Sealing; UL Certification of ASTM D 3462, ASTM D 3161 Class "F" (110-mph)/UL997 Wind Resistance and UL Class A Fire Resistance, glass fiber mat base; ceramically coated/UV resistant mineral surface granules across entire face of shingle; "Tri-laminate": three-layer laminated, four-tab shingle.

1. Weight: 480 pounds per square (100 square feet) (23.4 kg/sq m)

2. Color: refer to the Drawings

2.3 SHEET MATERIALS

A. Open Valley Protection: CertainTeed “WinterGuard”;ASTM D1970 sheet barrier of self-adhering rubberized asphalt membrane shingle underlayment having internal reinforcement and “split” back plastic release film; provide material warranty equal in duration to that of shingles being applied.

1. CertainTeed WinterGuard HT

B. Underlayment: CertainTeed Diamond Deck ASTM D 226 and ASTM D 4869 synthetic polymer-based scrim reinforced underlayment designed for use on roof decks as a water-resistant layer beneath asphalt shingles, wood shingles, and shakes, metal shingles or slate.

2.4 FLASHING MATERIALS

A. Sheet Flashing: 24 gauge hot-dipped galvanized steel with zinc coating 1¼ - 1½ ounces per square foot conforming with ASTM A653

1. Fabricate sheet metal flashing and trim to comply with recommendations in SMACNA's "Architectural Sheet Metal Manual."

2. Drip Edge: Formed sheet metal with at least a 2-inch (50-mm) roof deck flange and a 1-1/2-inch (38-mm) fascia flange with a 3/8-inch (9.6-mm) drip at lower edge.

3. Open-Valley Flashing: Fabricate with 1-inch- (25-mm-) high inverted-V profile at center of valley and equal flange widths of 12 inches (300 mm).

B. Bitumious Paint: Acid and alkali resistant type; black color.

C. Tinner’s Paint: Color as selected by Architect to coordinate with shingle color.

2.5 FLASHING FABRICATION

A. Form flashing to profiles indicated on Drawings and to protect roofing materials from physical damage and shed water.

B. Form sections square and accurate to profile, in maximum possible lengths, free from distortion or defects detrimental to appearance or performance.

2.6 ACCESSORIES

A. Nails: Standard round wire type roofing nails, corrosion resistant; hot dipped zinc coated steel, aluminum or chormated steel; minimum 3.8 inch (9.5mm) head diameter; minimum 11 or 12 gage (2.5mm) shank diameter; shank to be sufficient length to penetrate through the roof sheathing or ¾ inch (19mm) into solid wood, plywood or non-veneer wood decking.

B. Asphalt Roofing Cement: ASTM D 4586, Type I or II

EXECUTION

3.1 EXAMINATION

A. Verify existing site conditions under provisions.

1. Verify that roof penetrations and plumbing stacks are in place and flashed to deck surfaces.

2. Verify deck surfaces are dry and free of ridges, warps or voids.

3.2 ROOF DECK PREPARATION

A. Follow shingle manufacturer’s recommendations for acceptable roof deck material

B. Broom clean deck surfaces under eave protection and underlayment prior to their application.

3.3 INSTALLATION – PROTECTIVE UNDERLAYMENT

A. Diamond Deck Synthetic Roofing Underlayment: Follow manufacturer's printed instructions for site-specific application of this product. Do not use staples on this product.

B. Weather-lap and seal watertight with asphalt roofing cement items projecting through or mounted on roof. Avoid contact of solvent-based cements with WinterGuard and Diamond Deck.

3.4 INSTALLATION – VALLEY PROTECTION

A. For "open" valleys, first place one ply of WinterGuard, minimum 36 inches (910 mm) wide, centered over valleys. Lap joints minimum of 6 inches (152 mm) Follow instructions of shingle and waterproofing membrane manufacturer.

B. Install sheet metal flashing in accordance with SMACNA and NRCA standards and roofing manufacturer's instructions.

3.5 INSTALLATON – METAL FLASHING

A. Weather-lap joints minimum 2 inches (50 mm).

B. Seal work projecting through or mounted on roof with asphalt roofing cement and make weather tight.

3.6 INSTALLATION- ASPHALT SHINGLES

A. Install shingles in accordance with manufacturer's instructions for product type and application specified.

3.7 PROTECTION OF FINISHED WORK

A. Do not permit traffic over finished roof surface.

END OF SECTION 07 31 13

GENERAL

1.1 SUMMARY:

A. Provide and install manufactured fiber-cement siding, trim, and accessories as shown on drawings and specified herein.

1.2 RELATED SECTIONS

A. Section 06 16 13 – Insulating Sheathing

B. Section 09 22 13 – Metal Furring

C. Section 09 91 00 – Paints & Coatings

1.3 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.4 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. Refer to physical mock-up requirements in Quality Assurance section below.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Minimum of 2 years experience with installation of similar products.

B. Mock-Up: Provide a mock-up for evaluation of surface preparation techniques and application workmanship.

1. Finish areas designated by Architect.

2. Do not proceed with remaining work until workmanship, color, and sheen are approved by Architect.

3. Remodel mock-up area as required to produce acceptable work.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store products in manufacturer's unopened packaging until ready for installation.

B. Store siding on edge or lay flat on a smooth level surface. Protect edges and corners from chipping. Store sheets under cover and keep dry prior to installing.

C. Store and dispose of solvent-based materials, and materials used with solvent-based materials, in accordance with requirements of local authorities having jurisdiction.

1.7 PROJECT CONDITIONS

A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's absolute limits.

1.8 WARRANTY

A. Product Warranty: Limited, non-pro-rated product warranty.

1. Lap siding: 30 years

2. Trim boards: 15 years

B. Workmanship Warranty: Application limited warranty for 2 years.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: James Hardie Building Products, Inc., which is located at: 26300 La Alameda Suite 400 ; Mission Viejo, CA 92691; Toll Free Tel: 866-274-3464; Tel: 949-367-4980; Fax: 949-367-4981; Email: request info (info@jameshardie.com); Web: www.jameshardiepros.com.

2.2 SIDING AND TRIM

A. Fiber-cement siding materials:

1. Fiber-cement siding - complies with ASTM C 1186 Type A Grade II.
2. Fiber-cement siding - complies with ASTM E 136 as a noncombustible material.
3. Fiber-cement siding - complies with ASTM E 84 Flame Spread Index = 0, Smoke Developed Index = 5.
4. CAL-FIRE, Fire Engineering Division Building Materials Listing - Wildland Urban Interface (WUI) Listed Product.
5. ICC-ES evaluation reports ESR-2290, ESR-1844, and ESR-2273 (IBC, IRC, CBC, CRC)

B. Lap Siding, Basis of Design: HardiePlank HZ10 Lap as manufactured by James Hardie Building Products, Inc.

1. Type: Select Cedarmill 5-1/4 inches (133 mm) with 4 inches (102 mm) exposure.

C. Trim, Basis of Design: HardieTrim HZ10 boards as manufactured by James Hardie Building Products, Inc.

1. Texture: Wood Grained.
2. Length: 12 feet (3658 mm).
3. Thickness: 3/4 inch (19 mm).
4. Thickness: 1 inch (24 mm).

2.3 FASTENERS

A. Wood Framing Fasteners: corrosion resistant siding nails as recommended by manufacturer and as set forth in code compliance reports for the installation application.

B. Metal Framing/Furring Fasteners:

1. Self-drilling, corrosion resistant ribbed buglehead screws as recommended by manufacturer and as set forth in code compliance reports for the installation application.
2. Secure Architect’s approval for use of pneumatic fasteners.

2.4 FINISHES

A. Factory Primer: Provide factory applied universal primer.

1. Primer: Factory primed by James Hardie.

B. Topcoat: Refer to Section 09 91 00 and Exterior Finish Schedule.

EXECUTION

3.1 EXAMINATION

A. Do not begin installation until substrates have been properly prepared.

B. If framing, substrate, and weather barrier preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

C. Correct any surface conditions detrimental to proper application of siding system.

3.2 INSTALLATION - LAP SIDING

A. Install materials in strict accordance with manufacturer's installation instructions.

B. Starting: Install a minimum 1/4 inch (6 mm) thick lath starter strip at the bottom course of the wall. Apply planks horizontally with minimum 1-1/4 inches (32 mm) wide laps at the top. The bottom edge of the first plank overlaps the starter strip.

C. Allow minimum vertical clearance between the edge of siding and any other material in strict accordance with the manufacturer's installation instructions.

D. Install siding boards in longest lengths possible with as few joints as possible within any given wall plane.

E. Strictly follow manufacturer’s requirements with respect to board joint/splice locations relative to fastening supports and openings.

F. Maintain clearance between siding and adjacent finished grade.

G. Refer to code compliance reports and manufacturer’s technical resources for proper fastener selection and fastening schedules for various wind load requirements and framing conditions.

3.3 INSTALLATION - TRIM

A. Install materials in strict accordance with manufacturer's installation instructions. Install flashing around all wall openings.

B. Fasten through trim into structural framing or code complying sheathing. Fasteners must penetrate minimum 3/4 inch (19 mm) or full thickness of sheathing. Additional fasteners may be required to ensure adequate security.

C. Place fasteners no closer than 3/4 inch (19 mm) and no further than 2 inches (51 mm) from side edge of trim board and no closer than 1 inch (25 mm) from end. Fasten maximum 16 inches (406 mm) on center.

D. Maintain clearance between trim and adjacent finished grade.

E. Refer to the Drawings for inside and outside corner conditions.

F. Allow 1/8 inch gap between trim and siding.

G. Seal gap with high quality, paint-able caulk.

H. Shim frieze board as required to align with corner trim.

3.4 FINISHING

A. Finish factory primed siding in accordance with Section 09 91 00 within 180 days of installation. Follow paint manufacturer's written product recommendation and written application instructions.

3.5 PROTECTION

A. Protect installed products until completion of project.

B. Touch-up, repair or replace damaged products before Substantial Completion.

END OF SECTION 07 46 46

GENERAL

1.1 SUMMARY

A. Provide and install a fully adhered single-ply membrane roof system with PVC clad flashing and all other incidental and accessory items over the roof as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. The roofing contractor shall submit all required items in one comprehensive package. This package includes:

1. Copies of specification.
2. Samples of the major components (i.e., membrane, insulation and flashing) of the roofing system.
3. The JM PVC roofing systems printed product data.
4. Specimen copies of the JM Guarantee.
5. Dimensioned shop drawings of the roof including building height.
6. Evidence of roofing manufacturer’s JM approval status.

1.4 QUALITY ASSURANCE

A. Acceptable Manufacturers

1. The single ply membrane roofing system and materials listed herein is as manufactured by Johns Manville (JM).
2. The roofing contractor must be authorized by JM to install PVC roofing systems.
3. The roofing contractor must have been trained by a technical representative of JM and be familiar with the PVC roofing product.
4. The roofing contractor shall submit the completed Pre-Installation Notice (PIN) to the JM Technical Services Department for acceptance before ordering material.
5. No deviations shall be made from this specification or PVC roofing systems detail drawings without prior written authorization from the JM Technical Services Department.
6. Upon completion of the installation, and after written notification to JM that all work has been completed in strict accordance with the contract specifications and the JM requirements, a guarantee evaluation shall be made by a representative of JM for the purpose of determining whether the system installed meets the JM requirements to issue the Guarantee.

B. Requirements of Regulatory Agencies

C. The roofing system shall be in compliance with Factory Mutual Engineering Association Roof Assembly Classifications, FM Construction Bulletin I-29, Class I Construction, and shall have a Class 'A' UL Fire Rating Approval listing in the 1984 UL Referral Directory.

1.5 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Materials shall be delivered to the job site in original, unbroken packages bearing the manufacturer's label. All materials, other than membrane, shall be stored between 50^0F and 80^0F. Should they be exposed to a lower temperature, restore to room temperature prior to use. Place all materials on pallets and protect from moisture. Do not use materials damaged in handling or storage.

1.6 JOB CONDITIONS

A. PVC roofing systems materials may be installed under certain adverse weather conditions such as extremes of high and low temperatures, or high humidity conditions but only after consulting the JM Technical Services Department since special precautions may have to be applied. Installation costs, production rates and material performance may be affected by the foregoing conditions.

B. Only as much new roofing as can be made weathertight each day shall be installed each day. This includes all flashing work.

C. Any substrate to receive new insulation, membrane or flashing shall be thoroughly dry. Should surface moisture occur, the contractor shall provide adequate equipment to dry to substrate.

D. Prior to and during application, the contractor shall ensure that all dirt, debris and dust shall be removed from surfaces to be roofed for both new and reproofing substrates.

E. Precautions shall be taken to prevent wind blow-off or wind damage during the course of the roofing application. This may necessitate additional securement of temporary construction.

F. Temporary waterstops shall be installed at the end of each workday or if inclement weather conditions dictate. These temporary waterstops shall be removed at the start of the next workday and disposed of properly.

G. Do not install the PVC roofing membrane in direct contact with any product containing asphalt, coal tar pitch, creosote, or other harmful materials.

H. Do not allow waste products containing petroleum, grease, acid, solvents, vegetable or mineral oil, animal oil, animal fat, etc. or direct steam venting to come into direct contact with the PVC Roofing Membrane. Contact the JM Technical Services Department for recommendations if such conditions exist.

I. The contractor shall follow all safety regulation as recommended by OSHA.

J. All work shall be scheduled and executed without exposing interior building areas to the effects of inclement weather. The existing building and its contents shall be protected against all risks. Arrange work sequences to avoid use of newly constructed roofing for storage, walking surfaces and equipment movement. Contractor shall provide all necessary protection and barriers to segregate the work areas and prevent damage to adjacent areas. If excessive foot traffic over newly installed membrane is necessary, contractor shall provide plywood or polyester felt protection to prevent damage.

K. All existing roof materials to be removed for construction shall be immediately removed from the construction site to a dumping area authorized to receive such debris.

L. Any unusual or concealed conditions discovered during the course of the work is to be reported to the owner or their representative immediately in writing and work shall be halted until the owner or their representative has responded with a solution to the problem.

M. When a system is specified to meet an Underwriter's Laboratories, Inc. rating, all materials used in the system must be UL labeled and approved for use for that particular system.

N. All local building codes and requirements must be followed where applicable. It is the sole responsibility of the roofing contractor to determine any and all local building code requirements and to ensure that the roofing system selected complies with such requirements.

O. Certain project conditions may require some modifications to this specification. Contact the JM Technical Services Department if any of the following conditions exist:

1. Geographical location in wind exposure Zone 3, or higher, per the Factory Mutual current edition of Loss Prevention Data Sheet 1-28.
2. Geographical location in a 100 mph (161 km/hr) or greater wind zone, per the ANSI 100 year mean recurrence interval wind isotach.
3. Location with a "D" exposure as determined in ASCE 7.
4. Buildings with high internal humidity, such as swimming pools, textile mills, paper mills, etc.
5. Buildings which are highly pressurized or have the potential for high internal pressures.

P. If a roof contractor desires to solvent-weld certain details, it is their sole responsibility to ascertain local VOC requirements in force and verify that it is acceptable to use solvent for making seams at these detail areas.

1.7 GUARANTEE

A. The roofing contractor shall furnish to the Owner the manufacturer's fifteen (15) year, no dollar limit guarantee, covering both labor and materials.

1. Total Warranty Period: 15 years.
2. Fifteen-Year Guarantee shall be a 100 percent, full value guarantee and shall not limit the cost to the original installation cost. Guarantee shall cover the entire system with no exceptions.
3. This guarantee shall cover full replacement costs involved in the event of a problem, regardless of the dollar amount during those 15 years, and shall also cover all necessary repairs during the fifteen-year period.

B. Long-term performance of a roofing system depends on an adequate ongoing maintenance program. JM requires building owners to establish regularly scheduled annual inspections to ascertain the condition of the roofing system and to perform those maintenance items required to keep the roofing system performing properly. Records of all maintenance work performed must be retained for the entire warranty period. Please consult JM for specific recommendations.

PRODUCTS

2.1 ROOFING SYSTEM:

A. Single ply membrane roofing system shall be PVC Fully Adhered Roofing System as manufactured by Johns Manville. Color shall be white.

2.2 MATERIALS:

A. ROOFING MEMBRANE

1. SR-60 Fully Adhered Roofing Membrane 60 mils (1.5 mm) nominal thickness.

2. PVC Membrane shall equal or exceed the minimum physical properties published in the PVC Roofing Systems product data sheets.

B. Gypsum Roof Panels: Dens-Deck Gypsum Roof Board as manufactured by Georgia Pacific Corporation or equal.

C. Solvent: PVC Solvent Welding Solution shall be furnished with the label attached.

D. Seam or Lap Sealant: PVC Sealant shall be a liquid PVC sealing compound, and shall have a consistency equal to that of “honey” at room temperature.

E. Caulk: PVC Polyurethane Caulk is a single component, non-sag, elastomeric polyurethane sealant.

F. Adhesive: PVC Membrane Adhesive shall be used for bonding the PVC flashing membrane to vertical substrates of wood, metal and concrete,

G. Aluminum Tape: PVC roofing systems supplied Aluminum Tape shall be a 3 mil (0.08 mm) tape with acrylic adhesive used over PVC-Clad Metal joints prior to PVC roofing systems DM-80 strips being welded over the joints.

H. Slipsheets: 9 oz. Per sq. yd. (0.30kg/m^2) Polyester Mat Protection Material- needle-punched polyester fabric.

I. PVC Membrane Cleaner –PVC Membrane Cleaner is a clear liquid used for cleaning asphalt and dirt from membrane surface.

J. Flashing Membrane: SR-60.

K. Flashing Metal: PVC-Clad Metal is 24 gauge (0.61 mm) galvanized steel laminated to 40 mils (1.0 mm) of nonreinforced membrane in soft white color used for flashing and edge metal detailing.

L. Termination Bar: The Termination Bar shall be an extruded aluminum bar 3/32” (3 mm) thick used to terminate adhered, reinforced membrane base flashings in certain constructions.

M. Membrane Fasteners and Plates: PVC roofing systems offers a variety of membrane and insulation fasteners and plates to meet specific job conditions and substrates.

N. Prefabricated Details: PVC Inside/Outside Corners, PVC Vent Pipe Boots in sizes to fit pipes from ¾” – 11” (20 mm – 275 mm), and PVC Penetration Pans shall be used.

O. PVC-Clad Metal Joint Cover Strips: for use in waterproofing joints of PVC-Clad Metal.

P. PVC 7” (175 mm) Disc Caps: Are prefabricated round pieces of membrane for use in the PVC disc-cap method of installation to cover the steel plates and fasteners used to secure the membrane to the roof through the top of the sheet.

Q. Wood Nailers: Nailers shall be #2 or better lumber. Nailers shall be pressure treated for rot resistance (wolmanized or osmose treated). Creosote and asphaltic preservatives are not acceptable.

2.3 PRECAUTIONS

A. Do not use PVC roofing systems products near fire or flame.

B. Avoid breathing vapors of solvent, sealant and adhesives. Use adequate ventilation. Avoid prolonged contact of solvents, sealants and adhesives with skin.

C. Do not use open flames to expedite drying of surfaces, sealants or adhesives.

D. Consult Material Safety Data Sheets and container labels for specific safety instructions. MSDS sheets are available by calling the JM Product Information Center at 1-800-654-3103 or through the JM Fax Express at 1-888-329-3977.

E. Do not paint PVC-Clad Metal or membrane with oil-based paint. Consult the JM Technical Services Department for Recommendations.

F. Do not allow muriatic acid used to clean masonry to come in direct contact with the Roofing Membrane.

EXECUTION

3.1 INSPECTION:

A. Verify that work penetrating deck has been completed to extent that single ply membrane roofing can be applied.

B. Examine decks for inadequate anchorage, moisture and unevenness which would affect quality installation of roofing materials.

C. Do not proceed with installation of roofing until defects are corrected.

3.2 APPLICATION:

A. Gypsum Board: Adhere roof boards to plywood sheathing in strict accordance with manufacturer's instructions.

B. Roofing Membrane:

1. General: The JM PVC Roofing Membrane shall only by applied over compatible, clean, dry and smooth surfaces in accordance with the JM PVC Detail Drawings. The application shall begin at the highest elevation and continue to the lowest elevation of each individual roof. The seams shall be overlapped in the direction of the slope of the roof. Except where no other alternative exists, good roofing practice dictates that the sheets should be laid shingle fashion, against the slope, so that the seams avoid backwater laps.

C. Water Cutoffs: Water cutoffs shall be made by extending the membrane beyond the gypsum board and setting the end of the membrane in 6 inches of plastic roofing cement. All temporary water cutoffs shall be removed prior to proceeding with the next work period by cutting off that portion of the membrane that has been in contact with plastic roofing cement and disposing of it.

D. PVC Coated Metal Flashing: PVC coated metal flashing shall be installed at the intersections of roofs with sloped or vertical surfaces, roof interruptions and penetrations, in accordance with the currently published drawings, consistent with job conditions or drawings, and approved by the manufacturer.

1. Base flashing shall extend up vertical surfaces a minimum of 8 inches and onto the horizontal roof surfaces not less than 3 inches except as may be shown otherwise. Metal base flashings shall be installed at locations by nailing to wood nailers. All PVC laminated metal flashings shall be provided with 2 inches minimum overlap of the roofing membrane, solvent welded in the horizontal plane, with subsequent sealing by sealing compound.

E. Flashings for Roof Fixtures: All flashings for pipes, conduits, scuppers, equipment supports, pitch dams, pitch pockets, etc. shall be installed to conform to the requirements of the roofing membrane manufacturer's details and to the details shown on the Drawings.

3.3 CLEAN-UP

A. Upon completion of the work, remove all sealants and cements from surfaces other than those requiring single ply membrane roofing. Remove all surplus material, rubbish and debris resulting from work of this Section.

END OF SECTION 07 54 19

GENERAL

1.1 SUMMARY

A. Provide and install all flashing and sheet metal not specifically described in other Sections of these Specifications but required to prevent penetration of water through exterior shell of the buildings and all sheet metal flashing and caps as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 QUALITY ASSURANCE

A. All sheet metal work shall be fabricated and installed per the standard details and specifications as illustrated in Sheet Metal Manual by Sheet Metal and Air Conditioning National Association, Inc. (SMACNA).

PRODUCTS

2.1 GUTTERS

A. 24-gauge galvanized sheet metal. Provide profile as shown on the Drawings.

2.2 GUTTER LEAF GUARD

A. Provide stainless steel micro-mesh LeafBlasterPro leaf guards as manufactured by Gutterglove on all gutters in widths as required. Install to gutter bead with both positive screw attachments and continuous silicone sealant. Provide with 40-year Warranty.

2.3 DOWNSPOUTS AND BRACKET

A. 3”x4” 24-gauge galvanized iron smooth (non-ribbed) type. Provide pipe clip type brackets; SMACNA Figure 1-35A.

2.4 MATERIALS AND GAUGES

A. Where sheet metal is required and no material or gauge is indicated on the Drawings, furnish and install the highest quality and gauge commensurate with the referenced standards. All miscellaneous sheet metal shall be galvanized.

2.5 GALVANIZED IRON

A. Sheet metal or iron shall be standard brand of open-hearth copper-bearing steel, copper-molybdenum iron, or pure iron sheets.

B. Zinc coating

1. All galvanized sheets shall have a zinc coating applied by hot-dip process to all surfaces.

2. Zinc coating shall weigh not less than 1-1/4 ounces per square foot nor more than 1-1/2 ounces per square foot of surfaces covered and shall conform with ASTM A-93.

2.6 NAILS, RIVETS, AND FASTENERS

A. Use only soft iron rivets having rust-resistive coating, galvanized hot-dipped nails, and cadmium plated screws and washers in connection with galvanized iron and steel.

2.7 FLUX

A. All flux used for galvanized iron or steel shall be raw muriatic acid.

2.8 SOLDER

A. All solder used on galvanized sheet steel shall conform with the current ASTM B-32.

2.9 REGLETS

A. 24-gauge galvanized iron as shown on the Drawings. Design of reglets (counter flashing) is based on Architectural Sheet Metal Manual (SMACNA) Figure 4-4D or as shown on the Drawings. All reglets shall be those upon which the design was based, or equals approved by the Architect in accordance with the provisions of Section 01 33 23 of these Specifications.

2.10 OTHER MATERIALS

A. All other materials, not specifically described but required for a complete and proper installation of flashing and sheet metal, shall be new, first quality of their respective kinds and subject to the approval of the Architect.

EXECUTION

3.1 WORKMANSHIP

A. General

1. Form all sheet metal accurately to the dimensions and shapes required, finishing all molded and broken surfaces with true, sharp, and straight lines and angles and, where intercepting other members, coping to an accurate fit and soldering securely.
2. Unless otherwise specifically permitted by the Architect, turn all exposed edges back 1/2 inch.

B. Expansion: Form, fabricate, and install all sheet metal so as to adequately provide for expansion and contraction in the finished Work per SMACNA standards.

C. Weatherproofing

1. Finish watertight and weather tight where so required.
2. Make all lock seam work flat and true to line and sweated full of solder.
3. Make all lock seams and lap seams, when soldered, at least 1/2 inch wide.
4. Where lap seams are not soldered, lap according to pitch but in no case less than three inches.
5. Make all flat and lap seams in direction of flow.

D. Joints

1. Join parts with rivets or sheet metal screws where necessary for strength or stiffness.
2. Provide suitable watertight expansion joints for all runs of more than 40 feet except where closer spacing is indicated on the Drawings or required for proper installation.

E. Nailing

1. Whenever possible, secure metal by means of clips or cleats without nailing through the metal.
2. In general, space all nails, rivets, and screws not more than eight inches apart, and, where exposed to the weather, use lead washers.
3. For nailing into wood, use barbed roofing nails 1-1/4 inches long by eleven gauge.
4. For nailing into concrete, use drilled plugholes and plugs.

3.2 EMBEDMENT

A. Embed all metal in connection with roofs in a solid bed of caulking, using materials and methods described in Section 07 92 00 of these Specifications.

3.3 SOLDERING

A. General
1. Thoroughly clean and tin all joint materials prior to soldering.
2. Perform all soldering slowly with a well heated copper in order to heat the seams thoroughly and to completely fill them with solder.
3. Perform all soldering with a heavy soldering copper of blunt design, properly tinned for use.
4. Make all exposed soldering on finished surfaces neat, full, flowing, and smooth.

B. Cleaning
1. After soldering, thoroughly wash acid flux with a soda solution.

3.4 TESTS

A. At the completion of the job, demonstrate to the Architect by hose or standing water that all flashing and sheet metal is completely watertight.

END OF SECTION 07 62 00

GENERAL

1.1 SUMMARY:

A. Provide and install sheet metal roof specialties:

1. Factory-finished chimney shroud

B. Related Specification Section: 10 31 00 Manufactured Gas Fireplaces

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 QUALITY ASSURANCE:

A. Chimney shroud shall be UL listed and labeled for the project specific application.

PRODUCTS

2.1 BASIS OF DESIGN

A. Manufacturer: American Chimney Shroud: www.americanchimneyshroud.com

B. Design: S48

C. Material: 24 ga. hot-dipped galvanized sheet metal

D. Finish: Kynar 500 factory-applied color, selected from manufacturer's standards

E. Mounting style: flush, or as detailed on the Drawings

F. Size: as dimensioned on the Drawings

G. Termination: single flue, direct vent

1. Coordinate with vent pipe specified in Section 10 31 00

EXECUTION

3.1 COORDINATION WITH OTHER WORK

A. Provide shop drawings and mounting details coordinated with architectural drawings and chimney construction. Field-verify as-built chimney dimensions before fabrication of shroud.

3.2 INSTALLATION

A. Install chimney shroud in accordance with manufacturer's instructions to ensure watertight condition.

END OF SECTION 07 71 00

GENERAL

1.1 SUMMARY

A. Install firestopping at all penetrations through rated walls as indicated on the Drawings, or as may be required by penetrations.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 30 00 of these specifications.

1.4 SECTION REQUIREMENTS

A. Provide firestopping systems with fire-resistance ratings indicated by reference to UL designations as listed in its "Fire Resistance Directory," or to designations of another testing agency acceptable to authorities having jurisdiction.

B. Provide through-penetration firestopping systems with F-ratings indicated, as determined according to ASTM E 814, but not less than fire-resistance rating of construction penetrated.

1. Provide through-penetration firestopping systems with T-ratings as well as F-ratings, as determined according to ASTM E 814, where indicated.

C. For exposed firestopping, provide products with flame-spread indexes of less than 25 and smoke-developed indexes of less than 450, as determined according to ASTM E 84.

PRODUCTS

2.1 FIRESTOP SYSTEMS

A. Any through-penetration firestop system that is classified by UL for the application and with F-rating indicated may be used.

EXECUTION

3.1 INSTALLATION

A. Install firestopping systems to comply with requirements listed in testing agency's directory for indicated fire-resistance rating.

B. Identification: Identify through-penetration firestop systems with permanent labels attached to surfaces adjacent to firestop systems so that labels will be visible to anyone seeking to remove penetrating items or firestop systems. Include the following information on labels:

1. The words "Warning - Through-Penetration Firestop System - Do Not Disturb."
2. Classification/listing designation of applicable testing and inspecting agency.
3. Through-penetration firestop system manufacturer's name and product name.

END OF SECTION 07 84 13

GENERAL

1.1 SUMMARY

A. Provide a positive barrier against penetration of air and moisture at joints between items where sealing is essential to continued integrity of the barrier. Such sealing will normally be performed under the work of various Sections of these Specifications but shall be performed in strict accordance with the provisions of this Section. Install as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. Samples: Submit three 12” long samples of each color required (except black) for each type of sealant exposed to view.

1.4 AIR POLLUTANT CONTROL REQUIREMENTS

A. Per Section 5.504.4.1 of the 2013 California Green Building Standards Code, sealants and caulks used on the project shall meet the requirements of the following standards:

1. Sealants, sealant primers and caulks shall comply with local or regional air pollution control or air quality management district rules where applicable, or SCAQMD Rule 1168 VOC limits, as shown in Table 5.504.4.2 of the 2013 California Green Building Standards Code. Such products also shall comply with the Rule 1168 prohibition on the use of certain toxic compounds (chloroform, ethylene dichloride, methylene, chloride, perchloroethylene and trichloroethylene).

PRODUCTS

2.1 SEALANT MATERIALS

A. Vertical Surfaces, Hybrid Sealant

1. MasterSeal NP 150 low-modulus, non-sag premium-grade elastomeric hybrid sealant by Master Builders Solutions (BASF Corporation), or equal. Color selected by architect.

B. Horizontal Concrete Joints

1. MasterSeal SL2 two-component polyurethane sealant by Master Builders Solutions (BASF Corporation), or equal. Color selected by architect.

C. Backing Material

1. Cylindrical sealant backings: ASTM C1330, type as recommended in writing by sealant manufacturer for joint application indicated and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance.

2. Bond breaker tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer.

2.2 SEALANT EQUIPMENT

A. All equipment shall be only such equipment as is specifically recommended by the manufacturer of the sealant material being installed.

EXECUTION

3.1 CHOICE OF SEALANT MATERIAL

A. Use only that sealant material which is best suited to the installation and is so recommended by the sealant material manufacturer.

3.2 GENERAL

A. Comply with joint sealant manufacturer’s printed installation instructions applicable to products and applications indicated, except where more stringent requirements apply.

3.3 BACK-UP MATERIALS

A. General

1. All joints over 3/8" wide shall have back-up filler.
2. Verify the compatibility of filler material with sealant before installation.
3. Use back-up filler about 1/3 to 1/2 wider than width of joint so sufficient pressure is exerted by filler to provide substantial resistance to displacement.

B. Acceptable materials

1. All filler materials shall be non-oily, non-staining back-up filler such as polyethylene foam rod, expanded polyurethane, neoprene, or other filler completely compatible with the sealant material.

3.4 APPLICATION OF SEALANT

A. General: Do not seal under weather conditions or sun conditions potentially harmful to the set and curing of the sealant material.

B. Preparation: Clean joint surfaces immediately before installation of sealant. Remove dirt, insecure coatings, moisture and other substances which could interfere with bond of sealant. Etch concrete and masonry joint surfaces as recommended by sealant manufacturer. Roughen vitreous and glazed joint surfaces as recommended by sealant manufacturer.

C. Priming: Prime joint surfaces where recommended by sealant manufacturer. Do not allow primer to spill or migrate onto adjoining surfaces.

D. Installation: Install sealant in strict accordance with the manufacturer's recommendations, taking care to produce beads of proper width and depth, tool as recommended by the manufacturer, and immediately remove all surplus sealant.

1. Where an irregular surface or sensitive joint border exists apply masking tape at edges of joint to insure neatness and protection. Remove masking tape prior to sealant setting.
2. Spillage: Do not allow sealants or primers to overflow or spill onto adjoining surfaces, or migrate into voids of adjoining surfaces. Clean adjoining surfaces by whatever means may be necessary to eliminate evidence of spillage.

3.5 SEALANT SCHEDULE

A. Carefully study the Drawings and furnish and install the proper sealant at each point where called for on the Drawings plus at all other points where sealing is essential in maintaining the continued integrity of the water-tight barrier including but not limited to:

1. Exterior expansion and control joints.
2. Exterior sills, jambs and heads of window frames, door frames, louvers and similar openings, and where metal, wood or other materials abut or join masonry, concrete or other materials.
3. Exterior horizontal control and expansion joints in concrete slabs, masonry, precast paving units and tiles.
4. Interior expansion and control joints.
5. Interior horizontal control and expansion joints in concrete slabs and tile flooring.

END OF SECTION 07 92 00

GENERAL

1.1 SUMMARY

A. Provide and install hollow metal doors, frames, and frame components such as sidelites and borrowed lites as shown on the Drawings and specified herein.

B. Codes and References: Comply with the version year adopted by the Authority Having Jurisdiction.

1. ANSI/SDI A250.8 - Recommended Specifications for Standard Steel Doors and Frames.
2. ANSI/SDI A250.4 - Test Procedure and Acceptance Criteria for Physical Endurance for Steel Doors, Frames, Frames Anchors and Hardware Reinforcing.
3. ANSI/SDI A250.6 - Recommended Practice for Hardware Reinforcing on Standard Steel Doors and Frames.
4. ANSI/SDI A250.10 - Test Procedure and Acceptance Criteria for Prime Painted Steel Surfaces for Steel Doors and Frames.
5. ANSI/SDI A250.11 - Recommended Erection Instructions for Steel Frames.
6. ANSI/SDI A250.13 - Testing and Rating of Severe Windstorm Resistant Components for Swing Door Assemblies.
7. ASTM A1008 - Standard Specification for Steel Sheet, Cold-Rolled, Carbon, Structural, High-Strength Low-Alloy and High-Strength Low-Alloy with Improved Formability.
8. ASTM A653 - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process.
9. ASTM A924 - Standard Specification for General Requirements for Steel Sheet, Metallic-Coated by the Hot-Dip Process.
10. ASTM C 1363 - Standard Test Method for Thermal Performance of Building Assemblies by Means of a Hot Box Apparatus.
11. ASTM E90 - Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions and Elements.
12. ASTM E283 - Standard Test Method for Determining Rate of Air Leakage Through Exterior Doors Under Specified Pressure Differences Across the Specimens.
13. ASTM E330 - Standard Test Method for Structural Performance of Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure Difference.
14. ASTM E 413 - Classification for Rating Sound Insulation.
15. ASTM E1332 - Standard Classification for Determination of Outdoor-Indoor Transmission Class.
16. ASTM E1886 - Test Method for Performance of Exterior Windows, Curtin Walls, Doors and Shutters Impacted by Missiles and Exposed to Cyclic Pressure Differentials.
17. ASTM E1996 - Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Storm Shutters Impacted by Windborne Debris in Hurricanes.
18. ANSI/NAAMM/HMMA 867-06 - Guide Specifications for Commercial Laminated Core Hollow Metal Doors and Frames.
19. ANSI/BHMA A156.15 - Hardware Preparation in Steel Doors and Frames.

20. ANSI/SDI 122 - Installation and Troubleshooting Guide for Standard Steel Doors and Frames.
21. ANSI/NFPA 80 - Standard for Fire Doors and Fire Windows; National Fire Protection Association.
22. ANSI/NFPA 105: Standard for the Installation of Smoke Door Assemblies.
23. FEMA 361 2008 – Design and Construction Guidance for Community Safe Rooms.
24. ICC 500 - ICC/NSSA Standard for the Design and Construction of Storm Shelters.
25. NFPA 252 - Standard Methods of Fire Tests of Door Assemblies; National Fire Protection Association.
26. TAS-201-94 - Impact Test Procedures.
27. TAS-202-94 - Criteria for Testing Impact and Non-Impact Resistant Building Envelope Components using Uniform Static Air Pressure.
28. TAS-203-94 - Criteria for Testing Products Subject to Cyclic Wind Pressure Loading.
29. UFC 4-010-0 - Department of Defense Minimum Antiterrorism Standards for Building, October 2003, including Change 1, January 2007.
30. UL 10B - Fire Test of Door Assemblies.
31. UL 10C - Positive Pressure Fire Tests of Door Assemblies.
32. UL 1784 - Standard for Air Leakage Tests of Door Assemblies.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated. Include construction details, material descriptions, core descriptions, hardware reinforcements, profiles, anchors, fire-resistance rating, and finishes.

B. Shop Drawings: Include the following:

1. Elevations of each door design.
2. Details of doors, including vertical and horizontal edge details and metal thicknesses.
3. Frame details for each frame type, including dimensioned profiles and metal thicknesses.
4. Locations of reinforcement and preparations for hardware.
5. Details of anchorages, joints, field splices, and connections.
6. Details of accessories.
7. Details of moldings, removable stops, and glazing.
8. Details of conduit and preparations for power, signal, and control systems.

1.4 QUALITY ASSURANCE

A. Source Limitations: Obtain hollow metal doors and frames through one source from a single manufacturer wherever possible.

B. Quality Standard: In addition to requirements specified, comply with ANSI/SDI A250.8, latest edition, "Recommended Specifications for Standard Steel Doors and Frames".

C. Fire-Rated Door Assemblies: Assemblies complying with NFPA 80 that are listed and labeled by a qualified testing agency, for fire-protection ratings indicated, based on testing at positive pressure according to NFPA 252 (neutral pressure at 40" above sill) or UL 10C.

D. Fire-Rated, Borrowed-Light Frame Assemblies: Assemblies complying with NFPA 80 that are listed and labeled, by a testing and inspecting agency acceptable to authorities having jurisdiction, for fire-protection ratings indicated, based on testing according to NFPA 257. Provide labeled glazing material.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver hollow metal work palletized, wrapped, or crated to provide protection during transit and Project site storage. Do not use non-vented plastic.

B. Deliver welded frames with two removable spreader bars across bottom of frames, tack welded to jambs and mullions.

C. Store hollow metal work under cover at Project site. Place in stacks of five units maximum in a vertical position with heads up, spaced by blocking, on minimum 4-inch high wood blocking. Do not store in a manner that traps excess humidity.

1. Provide minimum 1/4-inch space between each stacked door to permit air circulation. Door and frames to be stacked in a vertical upright position.

1.6 PROJECT CONDITIONS

A. Field Measurements: Verify actual dimensions of openings by field measurements before fabrication.

1.7 COORDINATION

A. Coordinate installation of anchorages for hollow metal frames. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors. Deliver such items to Project site in time for installation.

1.8 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace doors that fail in materials or workmanship within specified warranty period.

B. Warranty includes installation and finishing that may be required due to repair or replacement of defective doors.

PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. CECO Door Products.
2. Curries Company.
3. Security Metal Products.

2.2 MATERIALS

A. Cold-Rolled Steel Sheet: ASTM A 1008/A 1008M, Commercial Steel (CS), Type B; suitable for exposed applications.

B. Metallic-Coated Steel Sheet: ASTM A 653/A 653M, Commercial Steel (CS), Type B; with minimum G60 (Z180) or A60 (ZF180) metallic coating.

C. Frame Anchors: ASTM A 653/A 653M, Commercial Steel (CS), Commercial Steel (CS), Type B; with minimum G60 (Z180) or A60 (ZF180) metallic coating.

2.3 STANDARD HOLLOW METAL DOORS

A. General: Provide 1-3/4-inch doors of design indicated, not less than thickness indicated; fabricated with smooth surfaces, without visible joints or seams on exposed faces unless otherwise indicated. Comply with ANSI/SDI A250.8.

B. Exterior Doors: Face sheets fabricated of 16-gauge commercial quality hot-dipped zinc coated steel that complies with ASTM A 653/A 653M, Coating Designation A60. Provide doors complying with requirements indicated below by referencing ANSI/SDI A250.8 for level and model and ANSI/SDI A250.4 for physical performance level:

1. Basis of Design: Flush panel; CECO Legion Services Full Flush Door.
2. Core Construction: Manufacturer's standard polystyrene. Where indicated, provide doors fabricated as thermal-rated assemblies with a minimum R-value of 2.8 or better.
3. Top and Bottom Edges: Reinforce tops and bottoms of doors with a continuous steel channel not less than 16 gauge, extending the full width of the door and welded to the face sheet. Doors with an inverted top channel to include a steel closure channel, screw attached, with the web of the channel flush with the face sheets of the door. Plastic or composite channel fillers are not acceptable.
4. Hinge Reinforcement: Minimum 7-gauge (3/16") plate 1-1/4" x 9" or minimum 14-gauge continuous channel with pierced holes, drilled and tapped.
5. Hardware Reinforcements: Fabricate according to ANSI/SDI A250.6 with reinforcing plates from same material as door face sheets.

C. Interior Doors: Face sheets fabricated of 18-gauge commercial quality cold rolled steel that complies with ASTM A 1008/A 1008M. Provide doors complying with requirements indicated below by referencing ANSI/SDI A250.8 for level and model and ANSI/SDI A250.4 for physical performance level:

1. Basis of Design: Flush panel; CECO Regent Services Full Flush Door.
2. Core Construction: Manufacturer's standard kraft-paper honeycomb, or one-piece polystyrene core, securely bonded to both faces.
    a. Fire Door Core: As required to provide fire-protection and temperature-rise ratings indicated.
3. Top and Bottom Edges: Reinforce tops and bottoms of doors with a continuous steel channel not less than 16 gauge, extending the full width of the door and welded to the face sheet.
4. Hinge Reinforcement: Minimum 7-gauge (3/16") plate 1-1/4" x 9" or minimum 14-gauge continuous channel with pierced holes, drilled and tapped.
5. Hardware Reinforcements: Fabricate according to ANSI/SDI A250.6 with reinforcing plates from same material as door face sheets.

2.4 STANDARD HOLLOW METAL FRAMES

A. General: Comply with ANSI/SDI A250.8 and with details indicated for type and profile.

B. Exterior Frames: Fabricated of 16 gauge hot-dipped zinc coated steel that complies with ASTM A 653/A 653M, Coating Designation A60.

1. Fabricate frames with mitered or coped corners.

2. Fabricate frames, with "closed and tight" miter seams continuously welded on face, finished smooth with no visible seam unless otherwise indicated.

3. Manufacturers Basis of Design:

a. CECO Door Products SQ/SU/SR Series.

b. Curries Company M/G Series.

C. Interior Frames: Fabricated from 16 gauge cold-rolled steel sheet that complies with ASTM A 1008/A 1008M.

1. Fabricate frames with mitered or coped corners.

2. Fabricate frames with "closed and tight" miter seams continuously welded on face, finished smooth with no visible seam unless otherwise indicated.

3. Frames for Borrowed Lights: Minimum 16 gauge (0.053-inch-1.3-mm-) thick steel sheet.

4. Manufacturers Basis of Design:

a. CECO Door Products BQ/BU Series (Drywall Profile, welded corners).

b. Curries Company CM Series (Drywall Profile, welded corners).

D. Fire rated frames: Fabricate frames in accordance with NFPA 80, listed and labeled by a qualified testing agency, for fire-protection ratings indicated.

E. Hardware Reinforcement: Fabricate according to ANSI/SDI A250.6 with reinforcement plates of minimum steel thickness set forth in ANSI/SDI A250-6 Table 1

2.5 FRAME ANCHORS

A. Jamb Anchors

1. Masonry Type: Adjustable strap-and-stirrup or T-shaped anchors to suit frame size, formed from A60 metallic coated material, not less than 0.042-inch-thick, with corrugated or perforated straps not less than 2 inches wide by 10 inches long; or wire anchors not less than 0.177 inch thick.

2. Stud Wall Type: Designed to engage stud and not less than 0.042 inch thick.

B. Floor Anchors: Floor anchors to be provided at each jamb, formed from A60 metallic coated material, not less than 0.042 inches thick.

C. Mortar Guards: Formed from same material as frames, not less than 0.016 inches thick.

2.6 HOLLOW METAL PANELS

A. Provide hollow metal panels of same materials, construction, and finish as specified for adjoining hollow metal work.

2.7 LOUVERS

A. Metal Louvers: Door manufacturer's standard metal louvers unless otherwise indicated.

1. Blade Type: Vision proof inverted V or inverted Y.

2. Metal and Finish: Galvanized steel, 0.040-inch-thick, factory primed for paint finish with baked enamel or powder coated finish. Match pre-finished door paint color where applicable.

2.8 LIGHT OPENINGS AND GLAZING

A. Stops and Moldings: Provide stops and moldings around glazed lites where indicated. Form corners of stops and moldings with butted or mitered hairline joints at fabricator's shop. Fixed and removable stops to allow multiple glazed lites each to be removed independently. Coordinate frame rabbet widths between fixed and removable stops with the type of glazing and installation indicated.

B. Moldings for Glazed Lites in Doors and Loose Stops for Glazed Lites in Frames: Minimum 20 gauge thick, fabricated from same material as door face sheet in which they are installed.

C. Fixed Frame Moldings: Formed integral with hollow metal frames, a minimum of 5/8 inch (16 mm) high unless otherwise indicated. Provide fixed frame moldings and stops on outside of exterior and on secure side of interior doors and frames.

D. Preformed Metal Frames for Light Openings: Manufacturer's standard frame formed of 0.048-inch-thick, cold rolled steel sheet; with baked enamel or powder coated finish; and approved for use in doors of fire protection rating indicated. Match pre-finished door paint color where applicable.

E. Glazing: Comply with requirements in Division 08 Section "Glazing" and with the hollow metal door manufacturer's written instructions.

1. Factory Glazing: Factory install glazing in doors as indicated. Doors with factory installed glass to include all of the required glazing material.

2.9 ACCESSORIES

A. Mullions and Transom Bars: Join to adjacent members by welding or rigid mechanical anchors.

B. Grout Guards: Formed from same material as frames, not less than 0.016 inches thick.

2.10 FABRICATION

A. Fabricate hollow metal work to be rigid and free of defects, warp, or buckle. Accurately form metal to required sizes and profiles, with minimum radius for thickness of metal. Where practical, fit and assemble units in manufacturer's plant. When shipping limitations so dictate, frames for large openings are to be fabricated in sections for splicing or splining in the field by others.

B. Tolerances: Fabricate hollow metal work to tolerances indicated in ANSI/SDI A250.8.

C. Hollow Metal Doors

1. Exterior Doors: Provide optional weep-hole openings in bottom of exterior doors to permit moisture to escape where specified.

2. Glazed Lites: Factory cut openings in doors with applied trim or kits to fit. Factory install glazing where indicated.

3. Astragals: Provide overlapping astragals as noted in door hardware sets in Division 08 Section "Door Hardware" on one leaf of pairs of doors where required by NFPA 80 for fire-performance rating or where indicated. Extend minimum 3/4 inch beyond edge of door on which astragal is mounted.

4. Continuous Hinge Reinforcement: Provide welded continuous 12-gauge strap for continuous hinges specified in hardware sets in Division 08 Section "Door Hardware".

D. Hollow Metal Frames

1. Shipping Limitations: Where frames are fabricated in sections due to shipping or handling limitations, provide alignment plates or angles at each joint, fabricated of same thickness metal as frames.
2. Welded Frames: Weld flush face joints continuously; grind, fill, dress, and make smooth, flush, and invisible.
    a. Welded frames are to be provided with two steel spreaders temporarily attached to the bottom of both jambs to serve as a brace during shipping and handling. Spreader bars are for bracing only and are not to be used to size the frame opening.
3. Sidelight and Transom Bar Frames: Provide closed tubular members with no visible face seams or joints, fabricated from same material as door frame. Fasten members at crossings and to jambs by butt welding.
4. High Frequency Hinge Reinforcement: Provide high frequency hinge reinforcements at door openings 48-inches and wider with mortise butt type hinges at top hinge location.
5. Welded frames are to be provided with two steel spreaders temporarily attached to the bottom of both jambs to serve as a brace during shipping and handling. Spreader bars are for bracing only and are not to be used to size the frame opening".
6. Provide countersunk, flat- or oval-head exposed screws and bolts for exposed fasteners unless otherwise indicated for removable stops, provide security screws at exterior locations.
7. Mortar Guards: Provide guard boxes at back of hardware mortises in frames at all hinges and strike preps regardless of grouting requirements.
8. Floor Anchors: Weld anchors to bottom of jambs and mullions with at least four spot welds per anchor.
9. Jamb Anchors: Provide number and spacing of anchors as follows:
    a. Masonry Type: Locate anchors not more than 18 inches from top and bottom of frame. Space anchors not more than 32 inches o.c. and as follows:
        (1) Two anchors per jamb up to 60 inches high.
        (2) Three anchors per jamb from 60 to 90 inches high.
        (3) Four anchors per jamb from 90 to 120 inches high.
        (4) Four anchors per jamb plus 1 additional anchor per jamb for each 24 inches or fraction thereof above 120 inches high.
    b. Stud Wall Type: Locate anchors not more than 18 inches from top and bottom of frame. Space anchors not more than 32 inches o.c. and as follows:
        (1) Three anchors per jamb up to 60 inches high.
        (2) Four anchors per jamb from 60 to 90 inches high.
        (3) Five anchors per jamb from 90 to 96 inches high.
        (4) Five anchors per jamb plus 1 additional anchor per jamb for each 24 inches or fraction thereof above 96 inches high.
        (5) Two anchors per head for frames above 42 inches wide and mounted in metal stud partitions.

10. Door Silencers: Except on weatherstripped or gasketed doors, drill stops to receive door silencers. Silencers to be supplied by frame manufacturer regardless if specified in Division 08 Section "Door Hardware".

E. Hardware Preparation: Factory prepare hollow metal work to receive template mortised hardware; include cutouts, reinforcement, mortising, drilling, and tapping according to the Door Hardware Schedule and templates furnished as specified in Division 08 Section "Door Hardware".

1. Locate hardware as indicated, or if not indicated, according to ANSI/SDI A250.8.
2. Reinforce doors and frames to receive non-template, mortised and surface mounted door hardware.
3. Comply with applicable requirements in ANSI/SDI A250.6 and ANSI/DHI A115 Series specifications for preparation of hollow metal work for hardware.
4. Coordinate locations of conduit and wiring boxes for electrical connections with Division 26 Sections.

2.11 STEEL FINISHES

A. Prime Finishes: Doors and frames to be cleaned, and chemically treated to insure maximum finish paint adhesion. Surfaces of the door and frame exposed to view to receive a factory applied coat of rust inhibiting shop primer.

1. Shop Primer: Manufacturer's standard, fast-curing, lead and chromate free primer complying with ANSI/SDI A250.10 acceptance criteria; recommended by primer manufacturer for substrate; and compatible with substrate and field-applied coatings.

EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. General Contractor to verify the accuracy of dimensions given to the steel door and frame manufacturer for existing openings or existing frames (strike height, hinge spacing, hinge back set, etc.).

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Remove welded in shipping spreaders installed at factory. Restore exposed finish by grinding, filling, and dressing, as required to make repaired area smooth, flush, and invisible on exposed faces.

B. Prior to installation, adjust and securely brace welded hollow metal frames for squareness, alignment, twist, and plumbness.

C. Tolerances shall comply with SDI-117 "Manufacturing Tolerances Standard Steel Doors and Frames".

D. Drill and tap doors and frames to receive non-template, mortised, and surface-mounted door hardware.

3.3 INSTALLATION

A. General: Install hollow metal work plumb, rigid, properly aligned, and securely fastened in place; comply with Drawings and manufacturer's written instructions.

B. Hollow Metal Frames: Install hollow metal frames of size and profile indicated. Comply with ANSI/SDI A250.11 and NFPA 80 at fire rated openings.

1. Set frames accurately in position, plumbed, aligned, and braced securely until permanent anchors are set. After wall construction is complete and frames properly set and secured, remove temporary braces, leaving surfaces smooth and undamaged. Shim as necessary to comply with installation tolerances.

2. Floor Anchors: Provide floor anchors for each jamb and mullion that extends to floor, and secure with post-installed expansion anchors.

3. Masonry Walls: Coordinate installation of frames to allow for solidly filling space between frames and masonry with mortar.

4. Grout Requirements: Do not grout head of frames unless reinforcing has been installed in head of frame. Do not grout vertical or horizontal closed mullion members.

C. Hollow Metal Doors: Fit hollow metal doors accurately in frames, within clearances specified below. Shim as necessary.

1. Non-Fire-Rated Standard Steel Doors.

a. Jambs and Head: 1/8 inch plus or minus 1/16 inch.

b. Between Edges of Pairs of Doors: 1/8 inch plus or minus 1/16 inch.

c. Between Bottom of Door and Top of Threshold: Maximum 3/8 inch.

d. Between Bottom of Door and Top of Finish Floor (No Threshold): Maximum 3/4 inch.

2. Fire-Rated Doors: Install doors with clearances according to NFPA 80.

D. Field Glazing: Comply with installation requirements in Division 08 Section "Glazing" and with hollow metal manufacturer's written instructions.

3.4 ADJUSTMENT AND CLEANING

A. Final Adjustments: Check and readjust operating hardware items immediately before final inspection. Leave work in complete and proper operating condition. Remove and replace defective work, including hollow metal work that is warped, bowed, or otherwise unacceptable.

B. Remove grout and other bonding material from hollow metal work immediately after installation.

C. Prime-Coat and Painted Finish Touchup: Immediately after erection, sand smooth rusted or damaged areas of prime coat, or painted finishes, and apply touchup of compatible air drying, rust-inhibitive primer, zinc rich primer (exterior and galvanized openings) or finish paint.

END OF SECTION 08 11 13

GENERAL

1.1 SUMMARY

A. Exterior and interior aluminum wood multi-slide doors as described on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 REFERENCES

A. AAMA 611.98 - Voluntary Specification for Anodized Architectural Aluminum.

B. AAMA 2603.02 - Voluntary Specifications, Performance Requirements and Test Procedures for Pigmented Organic Coatings on Aluminum Extrusions and Panels.

C. AAMA 2604 - Voluntary Specifications, Performance Requirements and Test Procedures for Pigmented for High Performance Organic Coatings on Aluminum Extrusions and Panels.

D. ANSI Z97.1 - Safety Performance Specifications and Methods of Test for Safety Glazing Material Used In Buildings.

E. ASTM E 283 - Test Method for Rate of Air Leakage through Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure Difference.

F. ASTM E 330 - Test Method for Structural Performance of Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure Difference.

G. ASTM E 547 - Test Method for Water Penetration of Exterior Windows, Curtain Walls, and Doors by Cyclic Static Air Pressure Differential.

H. CPSC 16CFR-1201 - Safety Standard for Architectural Glazing Materials.

1.4 SUBMITTALS

A. Submit under provisions of Section 01300.

B. Product Data: Manufacturer's data sheets on each product to be used, including:

1. Preparation instructions and recommendations.

2. Storage and handling requirements and recommendations.

3. Installation methods.

C. Shop Drawings: Include outside net frame dimensioning, direction of swing (outswing or inswing), number of panels, folding configuration of panels left or right, identify main entry swing panel, typical head, side jamb, sill and panel details and type of glazing material per vertical plan and elevations view drawings.

D. Selection Samples: For each finish product specified, two complete sets of color chips representing manufacturer's full range of available colors and patterns.

E. Verification Samples: For each finish product specified, two samples, minimum size 6 inches (150 mm) square, representing actual product, color, and patterns.

F. Manufacturer's Certificates: Certify products meet or exceed specified requirements.

G. Closeout Submittals: Provide manufacturer's maintenance instructions that include recommendations for periodic checking and adjustment of cable tension and periodic cleaning and maintenance of all railing and infill components.

1.5 QUALITY ASSURANCE

A. Manufacturer Qualifications: Provide complete, engineered and high quality sliding door system by a single source manufacturer with at least 7 years documented experience manufacturing folding door systems in the U.S.

B. Installer Qualifications: Installer with documented experienced in the installation of manufacturer's sliding door systems or similar and screen system to the products specified.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store products in manufacturer's unopened packaging until ready for installation.

B. Protect stored product from damage. Store products flat in dry, well ventilated area out of direct sunlight, under cover, protected from weather, moisture and excessive dryness and construction activities.

1.7 SEQUENCING

A. Ensure that locating templates and other information required for installation of products of this section are furnished to affected trades in time to prevent interruption of construction progress.

B. Ensure that products of this section are supplied to affected trades in time to prevent interruption of construction progress.

1.8 PROJECT CONDITIONS

A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's absolute limits.

1.9 WARRANTY

A. Manufacture's limited warranty including; 10 years for panel and frame aluminum components, product finishes, folding system hardware, and weather stripping; 5 years for locking hardware and screens; 10 years for insulated glass against failure of the air seal and that each unit will be free from material obstruction of vision as a result of fogging or film formation on the internal surfaces.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: LaCantina Doors, Inc., 1875 Ord Way, Oceanside, CA 92056. ASD. Telephone: (888) 221-0141. Fax: (760) 734-1591. Website: www.lacantinadoors.com. Email: info@lacantinadoors.com.

B. Requests for substitutions will be considered in accordance with provisions of Section 01 62 00.

2.2 SLIDING ALUMINUM-WOOD DOORS

A. Aluminum Wood Multi Slide Doors: Hybrid panel construction of 1-3/4 inch thick extruded aluminum and 1/2 inch thick solid wood on the interior.

1. Configuration:

a. Stacking Configurations: Complete sliding door system including head, side jambs, thresholds and aluminum sliding panels to the following sizes.

(1) 4 Panels XXXO as indicated on the Drawings. Maximum Frame Width 31 feet 6-3/4 inches by Maximum Frame Height 12 foot 3-1/16 inches.

2. Frame and Panels: Complete folding door system including head, side jambs, thresholds and aluminum panels to sizes indicated on the Drawings.

a. Panel: Thermally broken, extruded aluminum stile and rail panels with standard one lite.

(1) Stile and Rail 3-5/8 inches (92 mm).

b. Frame and Sill: Extruded aluminum.

c. Weatherstripping: At exterior doors, provided weather seal inserted in frame and sill to provide perimeter seal, as well as between door panels. Color is dark bronze.

d. Interior Wood Species: Provide with matching solid wood glazing stops.

(1) Vertical grain Douglas Fir.

e. Interior Wood Finish: Unfinished, ready for paint or stain.

3. Glass: All glass to comply with safety glazing requirements of ANSI Z97.1 and CPSC 16CFR 1201.

a. Type: Cardinal dual glazed low-E glass.

(1) Insulated glass with a 3/4 inch (19 mm) overall thickness.

b. Glass:

(1) Air Filled:

(a) LowE366-Air-Clear: Overall Thickness 3/4 inch, U-Factor 0.52, SHGC 0.23, VT 0.49

c. Glazing: Silicone bedding on exterior surfaces and glazing seal on the interior of the panel.

4. Locking Hardware and Handles: Manufacturer’s standard minimal one piece handle and exterior locking hardware.

a. Provide with optional three point lock system available for systems 8 feet or taller with locking hardware located on the primary sliding panel.

b. Handle Finish:

(1) Brushed Satin Bronze color.

c. Provide panel handle height centered at 36 inches (914 mm) from bottom of panel.

5. Rolling Hardware: Manufacturer’s standard rolling hardware integrated with engineered head track, side jambs and threshold frame system.

a. Rolling Hardware:

(1) Stainless steel wheels.

b. Threshold:

(1) Flush sill.

6. Interior Wood Species: Provide with matching solid wood glazing stops.
    a. Vertical grain Douglas Fir.
7. Interior Wood Finish: Unfinished, ready for paint or stain.
8. Aluminum Finish:
    a. Two coat 70 percent Kynar finish with color as selected from manufacturer range of finishes.
9. Threshold Finish:
    a. Bronze anodized.

2.3 FABRICATION

A. Sizes and Configurations: Fabricate to sizes and configurations indicated on the Drawings. Verify opening sizes by field measurement prior to completing fabrication.

B. Verify sliding direction for opening units.

C. Fabricate with manufacturer’s non-integral nail fin for use in conjunction with standard flashing, weather resistant barriers and compatible sealants.

EXECUTION

3.1 EXAMINATION

A. Do not begin installation until substrates have been properly prepared.

B. Verify that the maximum deflection of the header with the live load does not exceed the lesser of L/720 of the span and 1/4 inch. Structural support for lateral loads including both wind load and when the panels are stacked open) must be provided.

C. Verify that dimensions of rough opening will fit the net frame dimensions of door system; verify that rough openings are level, plumb, and square, with no unevenness in the floor.

D. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

3.2 PREPARATION

A. Clean surfaces thoroughly prior to installation.

B. Prepare surfaces using the methods recommended by the manufacturer for achieving the best result for the substrate under the project conditions.

3.3 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Properly flash and waterproof around the perimeter of the opening and frame. Adequate overhangs to prevent the effects of sheeting water from above are recommended.

C. Provide adequate anchorage devices. Securely fit frame in place, level, straight, plumb and square. Install frame in proper elevation, plane and location, and in proper alignment with other work. Head section of frame must be installed with a 1/8 inch upward crown at the center of the opening.

D. If necessary for tracks recessed into finish floors, drill weep holes in the floor track and provide drain connectors to ensure water can escape from the tracks.

E. Ensure doors are adjusted for proper operation.

F. For products requiring field finishing, field as specified in Section 09900; seal and finish promptly after installation and no more than seven days and prior to exposure to weather.

G. Install the screen system following the manufacturer's recommendations and installation instructions.

3.4 PROTECTION

A. Protect installed products until completion of project.

B. Protect installed product from construction activities, particularly thresholds and floor channels.

C. Touch-up, repair or replace damaged products before Substantial Completion.

END OF SECTION 08 13 73

GENERAL

1.1 SUMMARY

A. Provide and install stile and rail wood doors as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1. Product Data, including details of construction Submit (1) 12” X 12” construction sample as required by the architect showing door construction, panel and sticking details as specified.
2. For factory finished doors-Submit (3) 5” X 5” veneer samples as required by the architect illustrating finish color and sheen.
3. Safety Glass: Comply with testing requirements in 16 CFR 1201.
4. Forest Certification: Provide doors produced from wood obtained from forests certified by an FSC-accredited certification body to comply with FSC 1.2, "Principles and Criteria”.

PRODUCTS

2.1 MANUFACTURER

A. Masonite Architectural: 1.877.332.4484 and www.masonitearchitectural.com

1. Basis of Design Product: Subject to compliance with requirements, provide Aspiro™ Series Authentic Stile & Rail wood doors or Architect approved Equal.

2.2 DOOR CONSTRUCTION

A. Description: Interior Non-Rated Doors

1. Type: Aspiro™ Series. Raised Panel style and Full Glass style as indicated on Drawings
2. Door Thickness as indicated on Drawings
3. Construction Type:
   a. Cope & Stick; joinery using ½” X 4” dowels.
   b. Joints to have minimum 1 dowel.
4. Construction Materials:
   a. Stiles and rails shall be constructed of Structural Composite Lumber (SCL) with a minimum ¾” solid hardwood edge.
   b. Muntin bars shall have ¼” X 2-1/2” dowels at every joint.
   c. Pressure fit joints using a Type II Adhesive.

d. Raised panels shall be minimum thickness of 1-1/8” with raise of panel of solid lumber material matching face species, rim banded with mitered corners.

5. Veneer: Veneers to be 1/16” thickness, Grade A.
   a. Species: Cherry
   b. Quarter cut
   c. Center match
6. Door Panel Top Design:
   a. Square Top
7. Panel Types:
   a. Veneer Wrapped Raised Panel: 1-1/8”
8. Panel Construction
   a. Panels shall be manufactured with face veneer directly to core material
   b. Raised panels shall be minimum thickness of 1-1/8” with raise of panel of solid lumber material matching face species, rim banded with mitered corners.
9. Panel Material
   a. Veneer Wrapped Raised Panel: MDF
10. Sticking Types:
    a. Ovolo

B. Description: Interior Fire-Rated Doors

1. See Drawings for required door ratings.
2. Labeled doors shall confirm to one of the following applicable local codes.
   a. Positive Pressure—Tested to UL 10C
   b. Positive Pressure doors are to be of Category A construction. (Category A includes doors evaluated without an edge-sealing system on the door and frame and doors evaluated with a sealing system incorporated (concealed or visible) into the edge of the door.

2.3 DOOR FABRICATION

A. Fabricate doors in accordance with one of the following Quality Assurance Standards.
   1. WDMA I.S.6A-Premium Grade Construction

B. Veneer to be Grade A unless specified as other

C. Prefit and bevel doors 1/8” in 2”, ensuring proper gaps are maintained on fire doors to comply with NFPA 80 requirements.

D. All doors shall be machined for specified hardware that is not surface applied.

E. Doors shall be factory glazed with glass as specified unless otherwise indicated.
   1. ¼” clear tempered

2.4 FINISHING

A. All doors shall be factory finished with manufacturers’ standard Conversion Varnish and standard sheen. (Unless otherwise indicated).

B. Finish coating to be:

1. Match American Laminates Butternut

PART 3 EXECUTION

3.1 EXAMINATION

A. Examine doors and installed door frames, with Installer present, before hanging doors.

1. Verify that installed frames comply with indicated requirements for type, size, location, and swing characteristics and have been installed with level heads and plumb jambs. Any deficiencies must be corrected prior to door installation.

2. Reject doors with defects.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Hardware: See Section Door Hardware

B. Installation Instructions: Install doors to comply with manufacturer's written instructions and referenced quality standard, and as indicated.

1. Install fire-rated doors according to NFPA 80.

2. Install smoke- and draft-control doors according to NFPA 105.

C. Job-Fitted Doors: Align and fit doors in frames with uniform clearances and bevels as indicated below; do not trim stiles and rails in excess of limits set by manufacturer or permitted for fire-rated doors. Machine doors for hardware. Seal edges of doors, edges of cutouts, and mortises after fitting and machining.

1. Clearances: Provide 1/8 inch (3.2 mm) at heads, jambs, and between pairs of doors. Provide 1/8 inch (3.2 mm) from bottom of door to top of decorative floor finish or covering unless otherwise indicated. Where threshold is shown or scheduled, provide ¼ inch (6.4 mm) from bottom of door to top of threshold unless otherwise indicated.

a. Comply with NFPA 80 for fire-rated doors.

2. Bevel non-fire-rated doors 1/8 inch in 2 at lock and hinge edges.

3. Trim bottom rail only to extent permitted by labeling agency.

D. Factory-Fitted Doors: Align in frames for uniform clearance at each edge.

E. Factory-Finished Doors: Do not trim factory finished doors for width.

3.3 ADJUSTING

A. Operation: Correct any deficiency that prohibits the door from swinging or operating freely. Do not remove hinge screws after initial insertion. Shims used for alignment purposes must be inserted between hinge and frame. Do not insert shims between hinge and door.

B. To prevent stile failure, ensure that door closers are properly adjusted and do not limit the door opening swing. Limit door opening swing only with a properly located stop.

C. Finished Doors: Replace doors that are damaged or that do not comply with requirements. Doors may be repaired or refinished if work complies with requirements and shows no evidence of repair or refinishing.

END OF SECTION 08 14 33

GENERAL

1.1 SUMMARY

A. Provide and install interior aluminum-framed, top-hung sliding doors as described on the Drawings and specified herein.

1.2 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.3 REFERENCES

A. ANSI – American National Standards Institute

1. ANSI 156.18 Materials and Finishes
2. ANSI A117.1 Specifications for making buildings and facilities usable by physically handicapped people.

B. BHMA – Builders Hardware Manufacturers Association

C. DHI – Door and Hardware Institute

D. NFPA – National Fire Protection Association

1. NFPA 80 – Fire Doors and Windows
2. NFPA 101 – Life Safety code
3. NFPA 105 – Smoke and Draft Control Door Assemblies
4. NFPA 252 – Fire Tests of Doors Assemblies

E. AWS – Architectural Woodwork Standards

1.4 SUBMITTALS

A. Comply with Section 01 33 00 – Submittal Procedures

B. Product Data: Submit manufacturer’s product data, including installation instructions.

C. Shop Drawings: Submit manufacturer’s shop drawings, including plans, elevations, sections, and details, indicating dimensions, tolerances, materials, components, hardware, finish, options, and accessories. Shop Drawings to show required blocking by others.

D. Samples: Submit manufacturer’s samples of the following sliding door components:

1. Door veneer or laminate sample.
2. Aluminum Frame finish sample.

E. Manufacturer’s Certification: Submit manufacturer’s certification that materials comply with specified requirements and are suitable for intended application.

F. Warranty Documentation: Submit manufacturer’s standard warranty.

G. Test Reports: Submit acoustical reports or UL1784 as applicable.

1.5 QUALITY ASSURANCE

A. Product Options: Drawings indicate size, profiles, and dimensional requirements of interior aluminum frames and doors.

B. Source: Obtain sliding aluminum framed doors and hardware from single source.

C. Manufacturer's Qualifications: Manufacturer regularly engaged for past 5 years in manufacture of sliding doors similar to that specified.

1.6 PERFORMANCE

A. Aluminum perimeter frames with integral acoustic seals.

B. Soft self-closing mechanism integrated with top track.

C. Concealed door guide.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Delivery and Acceptance Requirements: Deliver materials to site in manufacturer’s original, unopened containers and packaging, with labels clearly identifying product name and manufacturer.

B. Notify manufacturer immediately of any shipping damage.

C. Storage and Handling Requirements:

1. Store and handle materials in accordance with manufacturer’s instructions.

2. Keep materials in manufacturer’s original, unopened containers and packaging until installation.

3. Store materials in clean, dry area indoors.

4. Protect materials and finish during storage, handling, and installation to prevent damage.

PRODUCTS

2.1 MANUFACTURERS

A. **AD SYSTEMS** 2201 100th St. SW, Everett, WA 98204 | Website: http://specADsystems.com | Phone: 425-374-1360 | Attn: Estimating: estimating@specADsystems.com

2.2 INTERIOR SLIDING ALUMINUM-FRAMED DOORS AND PARTITIONS

A. Manufacturer:

1. Scheduled Manufacturer: OfficeSlide™ High Performance Barn (Sliding) Door System by AD Systems. Or equal

B. Specified Wall Thickness 7-1/4”. Contractor to verify in field

C. Frame Profiles: Extruded aluminum frame “wrap” frame with integral vertical jamb (stile pocket).

D. Finish:

1. Standard: Painted Hardcoat (Kynar) Finish. Meets AAMA 2604 Standard Colors: Color as selected by architect

E. Door Leafs: all Doors to be factory machined for hardware including pilot and function holes.

1. 1-3/4" Flush Wood Door: Reference Spec Section 08 14 16 Wood Doors or other section as applicable.

a. Glazing: monolithic clear tempered with integral blinds where indicated on Drawings.

b. Standard stile widths are 6” with a 10” bottom rail.

F. Door Components:

1. Single Top Track: AD Systems extruded aluminum track by AD Systems
2. Valances: Extruded aluminum with integral end caps
   a. Valance painted to match frame
3. Top Rollers: tandem nylon roller sized to match door weight.
4. Concealed Floor Guide: Integral Jamb floor guide by AD Systems.
5. Soft-Closer: Soft and self-closing damper mechanism at both sides of door leaf
6. Pull Handles: 10” BTB wire pull. Refer to Door Hardware Section

G. Door Locks:

1. Not Required at (1) location as indicated on Drawings
2. Mortise Latch and Lock at (1) location as indicated on Drawings
   a. Privacy Thumb-turn with Indicator and ext. key

EXECUTION

3.1 EXAMINATION

A. Examine wall openings to receive sliding doors for plumb, level, and square. Note: Finish door operation will be affected by out of tolerance framing.

B. Verify dimensions of wall openings.

C. Examine surfaces to receive top and bottom guide.

D. Notify Architect of conditions that would adversely affect installation or subsequent use of sliding doors.

E. Do not begin installation until unacceptable conditions are corrected.

F. Base of door side shall not be in place at time of installation. Base shall butt frame. Decorative Paneling at Ext side shall be in place at time of installation.

3.2 INSTALLATION

A. Install sliding doors in accordance with manufacturer’s instructions at locations indicated on the Drawings.

B. Install sliding doors plumb, level, square, and in proper alignment.

C. Install sliding doors to close against walls without gaps.

D. Install sliding doors to open and close smoothly.

E. Anchor sliding doors securely in place to supports. 2 x 6 blocking required full length of track.

3.3 ADJUSTING

A. Adjust sliding doors for proper operation in accordance with manufacturer’s instructions.

B. Adjust sliding doors to operate smoothly without binding.

C. Repair minor damages to finish in accordance with manufacturer’s instructions and as approved by Architect.

3.4 CLEANING

A. Clean sliding doors promptly after installation in accordance with manufacturer's instructions.

B. Do not use harsh cleaning materials or methods that could damage materials or finish.

3.5 PROTECTION

A. Protect installed sliding doors from damage during construction.

END OF SECTION 08 34 00

GENERAL

1.1 SUMMARY

A. Provide and install aluminum clad wood windows as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 QUALITY ASSURANCE

A. The Owner will select a pre-qualified independent testing laboratory. Testing, when required, will be in accordance with all pertinent codes and regulations and with selected standards of the American Society for Testing and Materials.

PRODUCTS

2.1 MANUFACTURER

A. Basis of Design: Marvin

2.2 FRAME

A. Interior: Non finger-jointed Vertical Grain Douglas Fir with non finger-jointed Vertical Grain Douglas Fir veneer.

1. Kiln-dried to moisture content no greater than twelve (12) percent at the time of fabrication
2. Water repellant preservative treated in accordance with WDMA I.S.4.

B. Frame exterior aluminum clad with 0.050 inch (1.3mm) thick extruded aluminum

C. Frame thickness: 1 3/16” (30mm)

D. Frame depths for full frame units have an overall 5 21/32” jamb (144mm). 4 9/16” (116mm) jamb depth from the nailing fin plane to the interior face of the frame for new construction

2.3 WINDOW TYPES

A. Marvin Signature Ultimate Casement Stationary

2.4 SASH

A. Non finger-jointed Vertical Grain Douglas Fir with non finger-jointed Vertical Grain Douglas Fir veneer.

1. Kiln-dried to moisture content no greater than twelve (12) percent at the time of fabrication
2. Water repellant preservative treated with accordance with WDMA I.S.4
3. Sash exterior aluminum clad with 0.050” (1.3mm) thick extruded aluminum

4. Sash thickness: 1 5/8” (41mm) and 1 7/8” (48mm) for full frame units.
5. Stiles and Rails: 2 1/16” (52mm)
6. Tall bottom rail (except on transoms/upper units): 3 9/16” (90mm)
7. Interior Sash Sticking: Ogee

2.5 JAMB EXTENSIONS

A. Jamb extensions for wall thicknesses as field verified by Contractor. These shall be factory applied.

2.6 EXTERIOR TRIM

A. Factory applied brick mould casing (1-1/4" x 2") and subsill (15/16 x 2-15/16")

2.7 GLAZING

A. All glass is of a select quality complying with Federal Specification DD-G-451D, ASTM, C 1036-85. Provide Insulated Glazing Unit as indicated on Drawings

2.8 GLAZING SEAL

A. Silicone bedding glazed at interior and exterior

2.9 WEATHERSTRIPPING

A. All units are weatherstripped. Frame is weatherstripped on all four sides with flexible gaskets. Sash is sealed around perimeter with leaf-type weatherstrip.

2.10 TRIM

A. Provide indicated trim, matching material and finish of frame members.

2.11 SIMULATED DIVIDED LITES

A. 7/8” (22mm) wide, with internal spacer bar

B. Exterior muntins: 0.055” (1.4mm) thick extruded aluminum

C. Interior muntins: Vertical Grain Douglas Fir

D. Muntins adhere to glass with closed-cell copolymer acrylic foam tape

E. Sticking: Ogee

F. Pattern: As indicated on Drawings

G. Finish – exterior matches exterior aluminum clad colors, interior matches’ interior wood species and color

2.12 EXTERIOR FINISH

A. Aluminum cladding, Fluoropolymer modified acrylic topcoat applied over primer. Color as indicated on Drawings

2.13 INTERIOR FINISH

A. Factory-applied water-borne urethane stain. Stain applied over a wood (stain) conditioner. A water-borne acrylic enamel clear coat applied in two separate coats, with light sanding between coats, applied over the stain. Meets WDMA TM-14 requirements.

EXECUTION

3.2 FABRICATION

A. Fabricate all products in this Section in complete accordance with the standards referenced in the published literature of the selected manufacturer.

3.3 INSTALLATION

A. Surface conditions

1. Prior to installation of the work of this Section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where this installation may properly commence.
2. Verify that wood windows may be installed in complete accordance with the original design and the manufacturer's recommendations.
3. In the event of discrepancy, immediately notify the Architect.
4. Do not proceed with installation in areas of discrepancy until all such discrepancies have been fully resolved.

B. Installation

1. Install all wood windows in strict accordance with the original design, all pertinent codes and regulations, and the manufacturer's recommendations, installing the locks specified in Section 08700 of these Specifications, and anchoring all components firmly into position for long life under hard use. Provide Owner with additional touch up paint.
2. Set units level, plumb, and true to line, without warp or rack of frames and panels. Provide proper support and anchor securely in place.
3. Set sill members in bed of sealant or with gaskets, as indicated, to provide weathertight construction.
4. Adjust operating panels, screens, and hardware to provide a tight fit at contact points and weather stripping for smooth operation and weathertight closure. Lubricate hardware and moving parts.
5. Clean glass and aluminum surfaces immediately after installing windows. Remove nonpermanent labels from glass surfaces.

END OF SECTION 08 52 13

GENERAL

1.1 SUMMARY

A. This Section includes commercial door hardware for the following:

1. Swinging doors.
2. Sliding Doors.
3. Other doors to the extent indicated.

B. "Hardware groups" have been assigned to the various doors required for this work. Provide and install all finish hardware described in the Hardware Schedule and all other finish hardware not described but required for a complete and operable facility.

C. Door hardware includes, but is not necessarily limited to, the following:

1. Mechanical door hardware.
2. Electromechanical door hardware, power supplies, back-ups and surge protection.
3. Automatic operators.
4. Cylinders specified for doors in other sections.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these Specifications.

B. Product Data: Manufacturer's product data sheets including installation details, material descriptions, dimensions of individual components and profiles, operational descriptions and finishes.

C. Door Hardware Schedule: Prepared by or under the supervision of supplier, detailing fabrication and assembly of door hardware, as well as procedures and diagrams. Coordinate the final Door Hardware Schedule with doors, frames, and related work to ensure proper size, thickness, hand, function, and finish of door hardware.

D. Shop Drawings: Details of electrified access control hardware indicating the following:

1. Wiring Diagrams: Upon receipt of approved schedules, submit detailed system wiring diagrams for power, signaling, monitoring, communication, and control of the access control system electrified hardware. Differentiate between manufacturer-installed and field-installed wiring. Include the following:
    a. Elevation diagram of each unique access-controlled opening showing location and interconnection of major system components with respect to their placement in the respective door openings.
    b. Complete (risers, point-to-point) access control system block wiring diagrams.
2. Electrical Coordination: Coordinate with related Division 26 Electrical Sections the voltages and wiring details required at electrically controlled and operated hardware openings.

E. Keying Schedule: Prepared under the supervision of the Owner, separate schedule detailing final keying instructions for locksets and cylinders in writing. Include keying system explanation, door numbers, key set symbols, hardware set numbers and special instructions. Owner to approve submitted keying schedule prior to the ordering of permanent cylinders.

1.4 QUALITY ASSURANCE

A. Codes and References: Comply with the version year adopted by the Authority Having Jurisdiction

1. ANSI A117.1 - Accessible and Usable Buildings and Facilities.
2. ASTM E330 - Standard Test Method for Structural Performance of Exterior Windows, Curtain Walls, and Doors by Uniform Static Air Pressure difference.
3. ICC/IBC - International Building Code.
4. NFPA 70 - National Electrical Code.
5. NFPA 80 - Fire Doors and Windows.
6. NFPA 101 - Life Safety Code.
7. NFPA 105 - Installation of Smoke Door Assemblies.
8. UL/ULC and CSA C22.2 – Standards for Automatic Door Operators Used on Fire and Smoke Barrier Doors and Systems of Doors.
9. TAS-201-94 - Impact Test Procedures.
10. TAS-202-94 - Criteria for Testing Impact and Non-Impact Resistant Building Envelope Components using Uniform Static Air Pressure.
11. TAS-203-94 - Criteria for Testing Products Subject to Cyclic Wind Pressure Loading.
12. California Building Code.

B. Standards: All hardware specified herein shall comply with the following industry standards:

1. ANSI/BHMA Certified Product Standards - A156 Series.
2. UL10C – Positive Pressure Fire Tests of Door Assemblies.

C. Fire-Rated Door Assemblies: Provide door hardware for assemblies complying with NFPA 80 that are listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction, for fire ratings indicated, based on testing according to NFPA 252 (neutral pressure at 40" above sill) or UL-10C.

1. Test Pressure: Positive pressure labeling.

D. Keying Conference: Conduct conference to comply with requirements in Division 01 Section "Project Meetings." Keying conference to incorporate the following criteria into the final keying schedule document:

1. Function of building, purpose of each area and degree of security required.
2. Plans for existing and future key system expansion.
3. Requirements for key control storage and software.
4. Installation of permanent keys, cylinder cores and software.
5. Address and requirements for delivery of keys.

1.5 COORDINATION

A. Templates: Obtain and distribute to the parties involved templates for doors, frames, and other work specified to be factory prepared for installing standard and electrified hardware. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing hardware to comply with indicated requirements.

B. Door Hardware and Electrical Connections: Coordinate the layout and installation of scheduled electrified door hardware and related access control equipment with required connections to source power junction boxes, low voltage power supplies, detection and monitoring hardware, and fire and detection alarm systems.

C. Door and Frame Preparation: Related Division 08 Sections (Steel, Aluminum and Wood) doors and corresponding frames are to be prepared, reinforced and pre-wired (if applicable) to receive the installation of the specified electrified, monitoring, signaling and access control system hardware without additional in-field modifications.

1.6 WARRANTY

A. Warranty Period: Written warranty, executed by manufacturer(s), agreeing to repair or replace components of standard and electrified door hardware that fails in materials or workmanship within specified warranty period after final acceptance by the Owner. Failures include, but are not limited to, the following:

1. Structural failures including excessive deflection, cracking, or breakage.
2. Faulty operation of the hardware.
3. Deterioration of metals, metal finishes, and other materials beyond normal weathering.
4. Electrical component defects and failures within the systems operation.

B. Standard Warranty Period: One year from date of Substantial Completion, unless otherwise indicated.

C. Special Warranty Periods

1. Ten years for mortise locks and latches.
2. Ten years for extra heavy duty cylindrical (bored) locks and latches.
3. Seven years for heavy duty cylindrical (bored) locks and latches.
4. Five years for standard duty cylindrical (bored) locks and latches.
5. Five years for exit hardware.
6. Twenty-five years for manual surface door closers.
7. Ten years for heavy duty floor closers.
8. Two years for shallow depth floor closers.
9. Two years for overhead concealed closers.
10. Two years for electromechanical door hardware.

1.7 MAINTENANCE SERVICE

A. Maintenance Tools and Instructions: Furnish a complete set of specialized tools and maintenance instructions as needed for Owner's continued adjustment, maintenance, and removal and replacement of door hardware.

B. Continuing Service: Beginning at Substantial Completion, and running concurrent with the specified warranty period, provide continuous (6) months full maintenance including repair and replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper door opening operation. Provide parts and supplies as used in the manufacture and installation of original products.

PRODUCTS

2.1 SCHEDULED DOOR HARDWARE

A. General: Provide door hardware for each door to comply with requirements in Door Hardware Sets and each referenced section that products are to be supplied under.

1. Designations: Requirements for quantity, item, size, finish or color, grade, function, and other distinctive qualities of each type of door hardware are indicated in the Door Hardware Sets at the end of Part 3. Products are identified by using door hardware designations, as follows:

a. Named Manufacturer's Products: Product designation and manufacturer are listed for each door hardware type required for the purpose of establishing requirements. Manufacturers' names are abbreviated in the Door Hardware Schedule.

2. Products furnished, but not installed, under this Section include the following. Coordinating, purchasing, delivering, and scheduling remain requirements of this Section.

a. Permanent cylinders, cores and keys to be installed by Owner.

B. Substitutions: Requests for substitution and product approval for inclusive mechanical and electromechanical door hardware in compliance with the specifications must be submitted in writing and in accordance with the procedures and time frames outlined in Division 01, Substitution Procedures. Approval of requests is at the discretion of the architect, owner, and their designated consultants.

2.2 HANGING DEVICES

A. Hinges: ANSI/BHMA A156.1 certified butt hinges with number of hinge knuckles as specified in the Door Hardware Sets.

1. Quantity: Provide the following hinge quantity, unless otherwise indicated:

a. Two Hinges: For doors with heights up to 60 inches.

b. Three Hinges: For doors with heights 61 to 90 inches.

c. Four Hinges: For doors with heights 91 to 120 inches.

d. For doors with heights more than 120 inches, provide 4 hinges, plus 1 hinge for every 30 inches of door height greater than 120 inches.

2. Hinge Size: Provide the following, unless otherwise indicated, with hinge widths sized for door thickness and clearances required.

a. Widths up to 3’0”: 4-1/2” standard or heavy weight as specified.

b. Sizes from 3’1” to 4’0”: 5” standard or heavy weight as specified.

3. Hinge Weight and Base Material: Unless otherwise indicated, provide the following:

a. Exterior Doors: Heavy weight, non-ferrous, ball bearing or oil impregnated bearing hinges unless Hardware Sets indicate standard weight.

b. Interior Doors: Standard weight, steel, ball bearing or oil impregnated bearing hinges unless Hardware Sets indicate heavy weight.

4. Hinge Options: Comply with the following where indicated in the Hardware Sets or on Drawings:

a. Non-removable Pins: Provide set screw in hinge barrel that, when tightened into a groove in hinge pin, prevents removal of pin while door is closed; for the following applications:

(1) Out-swinging exterior doors.

(2) Out-swinging access-controlled doors.

(3) Out-swinging lockable doors.

B. Continuous Geared Hinges: ANSI/BHMA A156.26 certified continuous geared hinge with minimum 0.120-inch thick extruded 6060 T6 aluminum alloy hinge leaves and a minimum overall width of 4 inches. Hinges are non-handed, reversible and fabricated to template screw locations. Provide concealed flush mount (with or without inset), full surface, or half surface, in standard and heavy-duty models, as specified in the Hardware Sets. Concealed continuous hinges to be U.L. listed for use on up to and including 90-minute rated door installations and U.L. listed for windstorm components where applicable. Factory cut hinges for door size and provide with removable service power transfer panel where indicated at electrified openings.

C. Floor Closers: ANSI/BHMA A156.4 certified floor closers provided either center hung or 3/4" offset hung type complete with top and intermediate pivots (offset closers only) in quantity according to manufacturer's recommendation. Floor closers available with options for labeled, lead lined and regular doors. Provide independent and adjustable valves for closing speed, latch speed, and backcheck with built-in dead stop and hold open features as specified. Provide finish cover plates or thresholds as indicated in door Hardware Sets.

D. Pivots: ANSI/BHMA A156.4, Grade 1, certified pivots provided either center hung or 3/4" offset type complete with top, bottom, and intermediate pivots (offset pivots only) in quantity according to manufacturer's recommendations. Space intermediate pivots equally not less than 25 inches on center apart or not more than 35 inches on center for doors over 121 inches high. Pivot hinges to have oil impregnated bronze bearing in the top pivot and a radial roller and thrust bearing in the bottom pivot with the bottom pivot designed to carry the full weight of the door. Pivots to be UL listed for windstorm where applicable.

E. Sliding Door Hardware: Sliding door hardware is to be of type and design as specified and should comply with ANSI/BHMA A156.14. Provide complete sets consisting of track, hangers, stops, bumpers, floor channel, guides, and accessories indicated.

2.3 POWER TRANSFER DEVICES

A. Electrified Quick Connect Transfer Hinges: Provide electrified transfer hinges with Molex™ standardized plug connectors and sufficient number of concealed wires (up to 12) to accommodate the electrified functions specified in the Door Hardware Sets. Connectors plug directly to through-door wiring harnesses for connection to electric locking devices and power supplies. Wire nut connections are not acceptable.

B. Concealed Quick Connect Electric Power Transfers: Provide concealed wiring pathway housing mortised into the door and frame for low voltage electrified door hardware. Furnish with Molex™ standardized plug connectors and sufficient number of concealed wires (up to 12) to accommodate the electrified functions specified in the Door Hardware Sets. Connectors plug directly to through-door wiring harnesses for connection to electric locking devices and power supplies. Wire nut connections are not acceptable.

C. Provide mortar guard enclosure on steel frames installed at masonry openings for each electrical hinge specified.

2.4 DOOR OPERATING TRIM

A. Flush Bolts and Surface Bolts: ANSI/BHMA A156.3 and A156.16, Grade 1, certified automatic, self-latching, and manual flush bolts and surface bolts. Manual flush bolts to be furnished with top rod of sufficient length to allow bolt location approximately six feet from the floor. Furnish dust proof strikes for bottom bolts. Surface bolts to be minimum 8” in length and U.L. listed for labeled fire doors and U.L. listed for windstorm components where applicable. Provide related accessories (mounting brackets, strikes, coordinators, etc.) as required for appropriate installation and operation.

B. Coordinators: ANSI/BHMA A156.3 certified door coordinators consisting of active-leaf, hold-open lever and inactive-leaf release trigger. Coordinators fabricated from steel with nylon-coated strike plates and built-in adjustable safety release.

C. Door Push Plates and Pulls: ANS/BHMA A156.6 certified door pushes and pulls of type and design specified below or in the Hardware Sets. Coordinate and provide proper width and height as required where conflicting hardware dictates.

1. Push/Pull Plates: Minimum .050-inch-thick, size as indicated in hardware sets, with square corners and beveled edges, secured with exposed screws unless otherwise indicated.

2. Door Pull and Push Bar Design: Size, shape, and material as indicated in the hardware sets. Minimum clearance of 2 1/2-inches from face of door unless otherwise indicated.

3. Offset Pull Design: Size, shape, and material as indicated in the hardware sets. Minimum clearance of 2 1/2-inches from face of door and offset of 90 degrees unless otherwise indicated.

4. Fasteners: Provide manufacturer's designated fastener type as indicated in Hardware Sets.

2.5 CYLINDERS AND KEYING

A. Cylinders: Original manufacturer cylinders complying with the following:

1. Mortise Type: Threaded cylinders with rings and straight- or clover-type cam.

2. Rim Type: Cylinders with back plate, flat-type vertical or horizontal tailpiece, and raised trim ring.

3. Bored-Lock Type: Cylinders with tailpieces to suit locks.

4. Mortise and rim cylinder collars to be solid and recessed to allow the cylinder face to be flush and be free spinning with matching finishes.

5. Keyway: Manufacturer’s Standard. Match Facility Standard. Match Facility Restricted Keyway.

B. Permanent Cores: Manufacturer's standard; finish face to match lockset; complying with the following:

1. Interchangeable Cores: Core insert, removable by use of a special key; usable with other manufacturers' cylinders.

C. Keying System: Each type of lock and cylinders to be factory keyed. Conduct specified "Keying Conference" to define and document keying system instructions and requirements. Furnish factory cut, nickel-silver large bow permanently inscribed with a visual key control number as directed by Owner. Incorporate decisions made in keying conference, and as follows:

1. Master Key System: Cylinders are operated by a change key and a master key.

2. Grand Master Key System: Cylinders are operated by a change key, a master key, and a grand master key.

3. Great-Grand Master Key System: Cylinders are operated by a change key, a master key, a grand master key, and a great-grand master key.
4. Existing System: Master key or grand master key locks to Owner's existing system.
5. Keyed Alike: Key all cylinders to same change key.

D. Key Quantity: Provide the following minimum number of keys:

1. Top Master Key: One (1).
2. Change Keys per Cylinder: Two (2).
3. Master Keys (per Master Key Group): Two (2).
4. Grand Master Keys (per Grand Master Key Group): Two (2).
5. Construction Keys (where required): Ten (10).
6. Construction Control Keys (where required): Two (2).
7. Permanent Control Keys (where required): Two (2).

E. Construction Keying: Provide construction master keyed cylinders or temporary keyed construction cores where specified. Provide construction master keys in quantity as required by project Contractor. Replace construction cores with permanent cores. Furnish permanent cores for installation as directed under specified "Keying Conference”.

2.6 MECHANICAL LOCKS AND LATCHING DEVICES

A. Mortise Locksets, Grade 1 (Heavy Duty): ANSI/BHMA A156.13, Series 1000, Operational Grade 1 certified mortise locksets furnished in the functions as specified in the Hardware Sets. Locksets to be manufactured with a corrosion resistant, stamped 12-gauge minimum formed steel case and be field-reversible for handing without disassembly of the lock body. Lockset trim (including knobs, levers, escutcheons, roses) to be the product of a single manufacturer. Furnish with standard 2 3/4" backset, 3/4" throw anti-friction stainless steel latchbolt, and a full 1" throw stainless steel bolt for deadbolt functions.

1. Mortise locks to be certified Security Grade 1 and include vandal resistant heavy gauge escutcheon or sectional type trim.

B. Cylindrical Locksets, Grade 1 (Heavy Duty): ANSI/BHMA A156.2, Series 4000, Grade 1 certified cylindrical (bored) locksets furnished in the functions as specified in the Hardware Sets. Lock chassis fabricated of heavy gauge steel, zinc dichromate plated, with through-bolted application. Furnish with solid cast levers, standard 2 3/4” backset, and 1/2" (3/4" at rated paired openings) throw brass or stainless steel latchbolt. Locks are to be non-handed and fully field reversible.

2.7 ELECTROMECHANICAL LOCKING DEVICES

A. Electromechanical Mortise Locksets, Grade 1 (Heavy Duty): Subject to same compliance standards and requirements as mechanical mortise locksets, electrified locksets to be of type and design as specified below.

1. Electrified Lock Options: Where indicated in the Hardware Sets, provide electrified options including outside door lock/unlock trim control, latchbolt and lock/unlock status monitoring, and request-to-exit signaling. Unless otherwise indicated, provide electrified locksets standard as fail secure.

2.8 AUXILARY LOCKS

A. Cylindrical Deadlocks: ANSI/BHMA A156.5, Grade 1, cylindrical type deadlocks to fit standard ANSI 161 preparation and 1 3/8" to 1 3/4" thickness doors. Provide tapered collars to resist vandalism and 1" throw solid steel bolt with hardened steel roller pins. Deadlocks to be products of the same source manufacturer and keyway as other locksets.

2.9 LOCK AND LATCH STRIKES

A. Strikes: Provide manufacturer's standard strike with strike box for each latch or lock bolt, with curved lip extended to protect frame, finished to match door hardware set, unless otherwise indicated, and as follows.

1. Flat-Lip Strikes: For locks with three-piece antifriction latchbolts, as recommended by manufacturer.

2. Extra-Long-Lip Strikes: For locks used on frames with applied wood casing trim.

3. Aluminum-Frame Strike Box: Provide manufacturer's special strike box fabricated for aluminum framing.

B. Standards: Comply with the following:

1. Strikes for Mortise Locks and Latches: BHMA A156.13.

2. Strikes for Bored Locks and Latches: BHMA A156.2.

3. Strikes for Auxiliary Deadlocks: BHMA A156.5.

4. Dustproof Strikes: BHMA A156.16.

2.10 CONVENTIONAL EXIT DEVICES

A. General Requirements: All exit devices specified herein shall meet or exceed the following criteria:

1. At doors not requiring a fire rating, provide devices complying with NFPA 101 and listed and labeled for "Panic Hardware" according to UL305. Provide proper fasteners as required by manufacturer including sex nuts and bolts at openings specified in the Hardware Sets.

2. Where exit devices are required on fire rated doors, provide devices complying with NFPA 80 and with UL labeling indicating "Fire Exit Hardware". Provide devices with the proper fasteners for installation as tested and listed by UL. Consult manufacturer’s catalog and template book for specific requirements.

a. Fire Exit Removable Mullions: Provide keyed removable mullions for use with fire exit devices complying with NFPA 80 that are listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction, for fire and panic protection, based on testing according to UL 305 and NFPA 252. Mullions to be used only with exit devices for which they have been tested.

3. Except on fire rated doors, provide exit devices with hex key dogging device to hold the pushbar and latch in a retracted position. Provide optional keyed cylinder dogging on devices where specified in Hardware Sets.

4. Flush End Caps: Provide heavy weight impact resistant flush end caps made of architectural metal in the same finish as the devices as in the Hardware Sets. Plastic end caps will not be acceptable.

5. Lever Operating Trim: Where exit devices require lever trim, furnish manufacturer's heavy-duty trim with cold forged escutcheons, beveled edges, and four threaded studs for thru-bolts.

a. Lock Trim Design: As indicated in Hardware Sets, provide finishes and designs to match that of the specified locksets. Provided free-wheeling type trim where indicated.

b. Where function of exit device requires a cylinder, provide an interchangeable core type keyed cylinder (Rim or Mortise) as specified in Hardware Sets.

6. Vertical Rod Exit Devices: Provide and install interior surface and concealed vertical rod exit devices as Less Bottom Rod (LBR) unless otherwise indicated.
7. Narrow Stile Applications: At doors constructed with narrow stiles, or as specified in Hardware Sets, provide devices designed for maximum 2” wide stiles.
8. Dummy Push Bar: Nonfunctioning push bar matching functional push bar.
9. Rail Sizing: Provide exit device rails factory sized for proper door width application.
10. Through Bolt Installation: For exit devices and trim as indicated in Door Hardware.

B. Conventional Push Rail Exit Devices (Heavy Duty): ANSI/BHMA A156.3, Grade 1 certified panic and fire exit hardware devices furnished in the functions specified in the Hardware Sets.

C. Tube Steel Removable Mullions: ANSI/BHMA A156.3 removable steel mullions with malleable-iron top and bottom retainers and a primed paint finish. Provide keyed removable feature, stabilizers, and mounting brackets as specified in the Hardware Sets. At openings designed for severe wind load conditions due to hurricanes or tornadoes, provide manufacturers approved mullion and accessories to meet applicable state and local windstorm codes.

2.11 ELECTROMECHANICAL CONVENTIONAL EXIT DEVICES

A. Electrified Conventional Push Rail Devices (Heavy Duty): Subject to same compliance standards and requirements as mechanical exit devices, electrified devices to be of type and design as specified herein.

B. Electrified Options: As indicated in hardware sets, provide electrified exit device options including: electric latch retraction (must be motorized type that fully retracts the touchpad/push bar), electric dogging, outside door trim control, exit alarm, delayed egress, latchbolt monitoring, lock/unlock status monitoring, touchbar monitoring and request-to-exit signaling. Unless otherwise indicated, provide electrified exit devices standard as fail secure.

2.12 DOOR CLOSERS

A. All door closers specified herein shall meet or exceed the following criteria:

1. General: Door closers to be from one manufacturer, matching in design and style, with the same type door preparations and templates regardless of application or spring size. Closers to be non-handed with full sized covers including installation and adjusting information on inside of cover.
2. Standards: Closers to comply with UL-10C and UBC 7-2 for Positive Pressure Fire Test and be U.L. listed for use of fire rated doors.
3. Cycle Testing: Provide closers which have surpassed 10 million cycles in a test witnessed and verified by UL.
4. Size of Units: Comply with manufacturer's written recommendations for sizing of door closers depending on size of door, exposure to weather, and anticipated frequency of use. Where closers are indicated for doors required to be accessible to the physically handicapped, provide units complying with ANSI ICC/A117.1.
5. Closer Arms: Provide heavy duty, forged steel closer arms unless otherwise indicated in Hardware Sets.
    a. Where closers are indicated to have mechanical dead-stop, provide heavy duty arms and brackets with an integral positive stop.

b. Where closers are indicated to have mechanical hold open, provide heavy duty units with an additional built-in mechanical holder assembly designed to hold open against normal wind and traffic conditions. Holder to be manually selectable to on-off position.

c. Where closers are indicated to have a cushion-type stop, provide heavy duty arms and brackets with spring stop mechanism to cushion door when opened to maximum degree.

d. Closers shall not be installed on exterior or corridor side of doors; where possible install closers on door for optimum aesthetics. Provide drop plates or other accessories as required for proper mounting.

6. Closer Accessories: Provide door closer accessories including custom templates, special mounting brackets, spacers and drop plates, and through-bolt or security type fasteners as specified in the door Hardware Sets.

B. Door Closers, Surface Mounted (Commercial Duty): ANSI/BHMA 156.4, Grade 1 certified surface mounted, institutional grade door closers with complete spring power adjustment, sizes 1 thru 6; and fully operational adjustable according to door size, frequency of use, and opening force. Closers to be rack and pinion type, one-piece cast iron or aluminum alloy body construction, with adjustable backcheck, closing sweep, and latch speed control valves. Provide non-handed units standard.

2.13 AUTOMATIC DOOR OPERATORS

A. General: Provide operators of size recommended by manufacturer for door size, weight, and movement; for condition of exposure; and for compliance with UL 325. Coordinate operator mechanisms with door operation, hinges, and activation devices.

1. Fire-Rated Doors: Provide door operators for fire-rated door assemblies that comply with NFPA 80 for fire-rated door components and are listed and labeled by a qualified testing agency.

B. Electromechanical Door Operators: Self-contained units powered by permanent magnet DC motor, with closing speed controlled mechanically by gear train, connections for power, activation and safety device wiring, and manual operation including spring closing when power is off.

C. Brackets and Reinforcements: Manufacturer's standard, fabricated from aluminum with nonferrous shims for aligning system components.

D. Standard: Certified ANSI/BHMA A156.19.

1. Performance Requirements

a. Opening Force if Power Fails: Not more than 15 lbf required to release a latch if provided, not more than 30 lbf required to manually set door in motion, and not more than 15 lbf required to fully open door.

b. Entrapment Protection: Not more than 15 lbf required to prevent stopped door from closing or opening.

E. Configuration: Surface mounted. Door operators to control single swinging and pair of swinging doors.

F. Operation: Power opening and spring closing operation capable of meeting ANSI A117.1 accessibility guideline. Provide time delay for door to remain open before initiating closing cycle as required by ANSI/BHMA A156.19. When not in automatic mode, door operator to function as manual door closer with fully adjustable opening and closing forces, with or without electrical power.

1. On-off switch to control power to be key switch operated.

G. Features: Operator units to have full feature adjustments for door opening and closing force and speed, backcheck, motor assist acceleration from 0 to 30 seconds, time delay, vestibule interface delay, obstruction recycle, and hold open time from 0 up to 30 seconds.

H. Provide outputs and relays on board the operator to allow for coordination of exit device latch retraction, electric strikes, magnetic locks, card readers, safety and motion sensors and specified auxiliary contacts.

I. Activation Devices: Provide activation devices in accordance with ANSI/BHMA A156.19 standard, for condition of exposure indicated and for long term, maintenance free operation under normal traffic load operation. Coordinate activation control with electrified hardware and access control interfaces. Activation switches are standard SPST, with optional DPDT availability.

J. Signage: As required by cited ANSI/BHMA A156.19 standard for the type of operator.

2.14 SURFACE MOUNTED CLOSER HOLDERS

A. Electromagnetic Door Holders: Certified ANSI A156.15 electromagnetic door holder/releases with a minimum 20 to 40 pounds holding power and single coil construction able to accommodate 12VDC, 24VAC, 24VDC and 120VAC. Coils to be independently wound, employing an integral fuse and armatures to include a positive release button.

2.15 ARCHITECTURAL TRIM

A. Door Protective Trim

1. General: Door protective trim units to be of type and design as specified below or in the Hardware Sets.

2. Size: Fabricate protection plates (kick, armor, or mop) not more than 2" less than door width (LDW) on stop side of single doors and 1” LDW on stop side of pairs of doors, and not more than 1" less than door width on pull side. Coordinate and provide proper width and height as required where conflicting hardware dictates. Height to be as specified in the Hardware Sets.

a. Metal Protection Plates: ANSI/BHMA A156.6 certified metal protection plates (kick, armor, or mop), beveled on four edges (B4E), fabricated from the following.

b. Stainless Steel: 050-inch thick, with countersunk screw holes (CSK).

c. Brass or Bronze: 050-inch thick, with countersunk screw holes (CSK).

d. Laminate Plastic or Acrylic: 1/8-inch thick, with countersunk screw holes (CSK).

3. Fasteners: Provide manufacturer's designated fastener type as specified in the Hardware Sets.

4. Metal Door Edging: Door protection edging fabricated from a minimum .050-inch thick metal sheet, formed into an angle or "U" cap shapes, surface or mortised mounted onto edge of door. Provide appropriate leg overlap to account for protection plates as required. Height to be as specified in the Hardware Sets.

2.16 DOOR STOPS AND HOLDERS

A. General: Door stops and holders to be of type and design as specified below or in the Hardware Sets.

B. Door Stops and Bumpers: ANSI/BHMA A156.16, Grade 1 certified door stops and wall bumpers. Provide wall bumpers, either convex or concave types with anchorage as indicated, unless floor or other types of door stops are specified in Hardware Sets. Do not mount floor stops where they will impede traffic. Where floor or wall bumpers are not appropriate, provide overhead type stops and holders.

C. Overhead Door Stops and Holders: ANSI/BHMA A156.6, Grade 1 certified overhead stops and holders to be surface or concealed types as indicated in Hardware Sets. Track, slide, arm and jamb bracket to be constructed of extruded bronze and shock absorber spring of heavy tempered steel. Provide non-handed design with mounting brackets as required for proper operation and function.

2.17 ARCHITECTURAL SEALS

A. General: Thresholds, weatherstripping, and gasket seals to be of type and design as specified below or in the Hardware Sets. Provide continuous weatherstrip gasketing on exterior doors and provide smoke, light, or sound gasketing on interior doors where indicated. At exterior applications provide non-corrosive fasteners and elsewhere where indicated.

B. Smoke Labeled Gasketing: Assemblies complying with NFPA 105 that are listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction, for smoke control ratings indicated, based on testing according to UL 1784

C. Fire Labeled Gasketing: Assemblies complying with NFPA 80 that are listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction, for fire ratings indicated, based on testing according to UL-10C.

1. Provide intumescent seals as indicated to meet UL10C Standard for Positive Pressure Fire Tests of Door Assemblies, and UBC 7-2, Fire Tests of Door Assemblies.

D. Sound-Rated Gasketing: Assemblies that are listed and labeled by a testing and inspecting agency, for sound ratings indicated, based on testing according to ASTM E 1408.

E. Replaceable Seal Strips: Provide only those units where resilient or flexible seal strips are easily replaceable and readily available from stocks maintained by manufacturer.

2.18 FABRICATION

A. Fasteners: Provide door hardware manufactured to comply with published templates generally prepared for machine, wood, and sheet metal screws. Provide screws according to manufacturers recognized installation standards for application intended.

2.19 FINISHES

A. Standard designations used in the Hardware Sets and elsewhere indicate hardware finishes complying with ANSI/BHMA A156.18, including coordination with traditional U.S. finishes indicated by certain manufacturers for their products.

B. Provide quality of finish, including thickness of plating or coating (if any), composition, hardness, and other qualities complying with manufacturer's standards, but in no case less than specified by referenced standards for the applicable units of hardware.

C. Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

2.20 ACCEPTABLE MANUFACTURERS AND PRODUCTS

Astragal	Manufacturer/Product:	Pemko 355_PK
	Finish:	Dark Bronze Anodized Aluminum
Closer, Surface	Manufacturer/Product:	LCN 4000 Series
	Options:	Adj. Delayed Action Closing
	Cover:	Architectural metal
	Finish:	Dark Bronze
Closer, Surface, HO	Manufacturer/Product:	LCN 4000 Series
	Options:	Adj. Delayed Action Closing; Hold Open
	Cover:	Architectural metal
	Finish:	Dark Bronze

Cylinder	Manufacturer/Product:	by Lockset Manufacturer
	Options:	Interchangeable core
Cylinder, Dogging	Manufacturer/Product:	Mortise, by Lockset Manufacturer
	Options:	Interchangeable core
Door Bolt (Deadlock)	Manufacturer/Series:	Schlage, B-series
	Grade:	1
	Finish:	BHMA 613
Door Shoe	Manufacturer/Product:	Pemko 210_PK
	Finish:	Dark Bronze Anodized Aluminum
Electrical Power Transfer	Manufacturer/Product:	Von Duprin EPT
Exit Device, Interior	Manufacturer/Series:	Von Duprin 98-series
	Type:	Rim
	Dogging:	Cylinder
	Trim/Function:	996L
	Lever Style:	Rhodes
	Finish:	BHMA 643e
Exit Device, Interior Entry	Manufacturer/Series:	Von Duprin 98-series
	Type:	Rim
	Dogging:	Cylinder
	Trim/Function:	990NL
	Finish:	BHMA 643e
Exit Device, Exterior Entry	Manufacturer/Series:	Von Duprin 98-series
	Type:	Mortise
	Dogging:	Cylinder
	Trim/Function:	990NL
	Finish:	BHMA 643e
Exit Device, Exterior Secondary	Manufacturer/Series:	Von Duprin 98-series
	Type:	Mortise
	Trim/Function:	996L
	Lever Style:	Rhodes
	Finish:	BHMA 643e
Flush Bolt, Metal Door	Manufacturer/Product:	Ives Manual Flush Bolt FB457, pair (top and bottom) with dust-proof strike
	Finish:	US10B
Flush Bolt, Wood Door	Manufacturer/Product:	Ives Manual Flush Bolt FB358 top bolt
	Finish:	US10B
Hinges, Exterior Doors	Manufacturer/Product:	Ives Five Knuckle BB Full Mortise NRP
	Material:	Brass
	Grade:	1
	Height:	4.5
	Finish:	US10B
Hinges, Interior Doors	Manufacturer/Product:	Ives Five Knuckle BB Full Mortise
	Material:	Steel
	Grade:	2
	Height:	4.5
	Finish:	US10B
Kickplate	Manufacturer/Product:	Ives 8400-series 10” high
	Finish:	US10B
Lever/ Dummy Trim	Manufacturer/Product:	Schlage ND170
	Lever Style:	Rhodes
	Finish:	BHMA 613
Low Energy Door Operator	Manufacturer/Product:	refer to Specification Section 08 71 13

Locksets, Cylindrical	Manufacturer/Series:	Schlage ND-series
	Grade:	1
	Lever Style:	Rhodes
	Finish:	BHMA 613
	Function:	per Hardware Group
Locksets, Mortise	Manufacturer/Series:	Schlage L-series
	Grade:	1
	Lever Style:	06
	Escutcheon:	Full Face
	Thumbturn:	ADA turn only where scheduled
	Options:	Wired Electrified Lockset where scheduled
Mop Plate	Manufacturer/Product:	Ives 8400-series 6” high
	Finish:	US10B
Pull	Manufacturer/Product:	Ives 8305, 4”x 16” w/ 10” pull
	Finish:	US10B
Push Plate	Manufacturer/Product:	Ives 8200, 4”x 16”
	Finish:	US10B
Smokestripping	Manufacturer/Product:	Pemko S88
	Finish:	Dark Brown
Stop/ Holder, Overhead, Exterior	Manufacturer/Product:	Glynn-Johnson 90 Series
	Finish:	US10B
Stop/ Holder, Overhead, Interior	Manufacturer/Product:	Glynn-Johnson 410 Series
	Finish:	US10B
Stop, Floor	Manufacturer/Product:	Ives FS444
	Finish:	US10B
Stop, Wall	Manufacturer/Product:	Ives WS401
	Finish:	US10B
Threshold	Manufacturer/Product:	Pemko 272
	Finish:	Dark Bronze Anodized
Threshold, Thermally Broken	Manufacturer/Product:	Pemko 253x4_FG
	Finish:	Dark Bronze Anodized
Weatherstripping	Manufacturer/Product:	Pemko 29310_PK
	Finish:	Dark Bronze Anodized

EXECUTION

3.1 EXAMINATION

A. Examine scheduled openings, with Installer present, for compliance with requirements for installation tolerances, labeled fire door assembly construction, wall and floor construction, and other conditions affecting performance.

B. Notify architect of any discrepancies or conflicts between the door schedule, door types, drawings and scheduled hardware. Proceed only after such discrepancies or conflicts have been resolved in writing.

3.2 PREPARATION

A. Hollow Metal Doors and Frames: Comply with ANSI/DHI A115.series.

B. Wood Doors: Comply with ANSI/DHI A115-W series.

3.3 INSTALLATION

A. Install each item of mechanical and electromechanical hardware and access control equipment to comply with manufacturer's written instructions and according to specifications.

1. Installers are to be trained and certified by the manufacturer on the proper installation and adjustment of fire, life safety, and security products including hanging devices; locking devices; closing devices; and seals.

B. Mounting Heights: Mount door hardware units at heights indicated in following applicable publications, unless specifically indicated or required to comply with governing regulations:

1. Standard Steel Doors and Frames: DHI's "Recommended Locations for Architectural Hardware for Standard Steel Doors and Frames”.

2. Wood Doors: DHI WDHS.3, "Recommended Locations for Architectural Hardware for Wood Flush Doors”.

3. Where indicated to comply with accessibility requirements, comply with ANSI A117.1 "Accessibility Guidelines for Buildings and Facilities”.

4. Provide blocking in drywall partitions where wall stops or other wall mounted hardware is located.

C. Power Operator products and accessories are required to be installed through current members of the manufacturer's "Power Operator Preferred Installer" program.

D. Retrofitting: Install door hardware to comply with manufacturer's published templates and written instructions. Where cutting and fitting are required to install door hardware onto or into surfaces that are later to be painted or finished in another way, coordinate removal, storage, and reinstallation of surface protective trim units with finishing work specified in Division 9 Sections. Do not install surface-mounted items until finishes have been completed on substrates involved.

E. Thresholds: Set thresholds for exterior and acoustical doors in full bed of sealant complying with requirements specified in Division 7 Section "Joint Sealants”.

F. Storage: Provide a secure lock up for hardware delivered to the project but not yet installed. Control the handling and installation of hardware items so that the completion of the work will not be delayed by hardware losses before and after installation.

3.4 FIELD QUALITY CONTROL

A. Field Inspection: Supplier will perform a final inspection of installed door hardware and state in report whether work complies with or deviates from requirements, including whether door hardware is properly installed, operating and adjusted.

3.5 ADJUSTING

A. Initial Adjustment: Adjust and check each operating item of door hardware and each door to ensure proper operation or function of every unit. Replace units that cannot be adjusted to operate as intended. Adjust door control devices to compensate for final operation of heating and ventilating equipment and to comply with referenced accessibility requirements.

3.6 CLEANIGN AND PROTECTION

A. Protect all hardware stored on construction site in a covered and dry place. Protect exposed hardware installed on doors during the construction phase. Install any and all hardware at the latest possible time frame.

B. Clean adjacent surfaces soiled by door hardware installation.

C. Clean operating items as necessary to restore proper finish. and provide final protection and maintain conditions that ensure door hardware is without damage or deterioration at time of owner occupancy.

3.7 DEMONSTRATION

A. Instruct Owner's maintenance personnel to adjust, operate, and maintain mechanical and electromechanical door hardware.

3.8 DOOR HARDWARE SCHEDULE

A. The hardware sets represent the design intent and direction of the owner and architect. They are a guideline only and should not be considered a detailed hardware schedule. Discrepancies, conflicting hardware and missing items should be brought to the attention of the architect with corrections made prior to the bidding process. Omitted items not included in a hardware set should be scheduled with the appropriate additional hardware required for proper application and functionality.

B. Hardware Groups

Group:	001
Doors:	100.1
Scheduled Hardware:

Lockset, Cylinder	Function: Classroom
Stop	Overhead

Group:	G1
Doors:	G1 (trash enclosure gate)
Scheduled Hardware:	
Cylinder	
Door Bolt	One-way deadbolt
all other hardware by gate fabricator	

Group:	G3
Doors:	G3 (storage enclosure door)
Scheduled Hardware:	
Cylinder	
Door Bolt	Single Cylinder w/ thumbturn
Hinges	Exterior
Lever/ Dummy Trim	

END OF SECTION 08 71 00

PART 1 – GENERAL

1.1 SUMMARY

A. Provide and install low-energy power door operators in compliance with the California Building Code where indicated on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1. Product Data: Submit manufacturer's complete product and installation data.
2. Shop Drawings: Submit drawings showing layout, profiles, product components including anchorage, accessories, finish and glazing details (where required).
3. Closeout Submittals: Submit the following:
    a. Owner’s Manual.
    b. Warranty document as specified herein.
    c. AAADM inspection compliance form completed and signed by certified AAADM inspector prior to doors being placed in operation as proof of compliance with ANSI A156.19.

1.4 REFERENCES

A. AMERICAN ARCHITECTURAL MANUFACTURERS ASSOCIATION (AAMA) 101: Appendix Dissimilar Materials.

B. AMERICAN ASSOCIATION OF AUTOMATIC DOOR MANUFACTURERS (AAADM).

C. AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI):

1. ANSI A156.19: For Power Assist and Low Energy Power Operated Doors
2. ANSI.117.1: Accessible and Usable Buildings and Facilities

D. AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM) B221: Aluminum-Alloy Extruded Bars, Rods, Shapes and Tubes.

E. AMERICANS WITH DISABILITIES ACT (ADA) 1990

F. CALIFORNIA BUILDING CODE (CBC)

G. BUILDING OFFICIALS AND CODE ADMINISTRATORS INTERNATIONAL (BOCA)

H. INTERNATIONAL CONFERENCE OF BUILDING OFFICIALS / UNIFORM BUILDING CODE (ICBO/UBC)

I. INTERNATIONAL CODE COUNCIL / INTERNATIONAL BUILDING CODE (ICC/IBC)

J. NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) 101:

1. NFPA 101: Code for Safety to Life from Fire in Buildings & Structures.
2. NFPA 70: National Electrical Code (NEC).

K. THE ALUMINUM ASSOCIATION (AA) Aluminum Finishes Manual.

L. UNDERWRITERS LABORATORY, INC. (USA & CANADA) UL 325: Electrical Door, Drapery, Gate, Louver, and Window Operators and Systems.

1.5 QUALITY ASSURANCE

A. Installer's Qualifications: Installer shall be factory trained, certified by AAADM, and experienced to perform work of this section.

B. Manufacturer's Qualifications: Manufacturer to have minimum (5) five years successful experience in the fabrication of automatic doors of the type required for this project. Manufacturer capable of providing field service representation during installation, approving acceptable installer and approving application method.

C. Certifications: Automatic sliding door systems and options shall be factory certified to meet performance design criteria in accordance with the following standards:

1. ADA 1990: Americans With Disabilities Act
2. ANSI A156.19: For Power Assist and Low Energy Power Operated Doors
3. ANSI.117.1: Accessible and Usable Buildings and Facilities
4. NFPA 101: Code for Safety to Life from Fire in Buildings & Structures.
5. UL 325: Electrical Door, Drapery, Gate, Louver, and Window Operators and Systems.
6. BOCA: Means of Egress, Power Operated Doors
7. ICBO/UBC: Egress Through Lobbies
8. ICC/IBC: Egress Section

D. Source Limitations: Obtain automatic door operators through one source from a single manufacturer.

E. Power Operated Door Standard: ANSI/BHMA A156.19.

F. Operation: Automatic and Manual

1. Automatic: Push Plate switch actuates door open; door closes after time delay expires. Opening and closing force, measured 1" (25.4 mm) out from the lock stile of the door, not to exceed 15 pounds (67 N) of force to stop the door when operating in either direction. Operator to include the following variable adjustments so as to comply with ANSI Standard A156.19: Opening speed – 4 1/2 to 6 seconds; Closing speed – 4 1/2 to 6 seconds.

G. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

H. Operating Range: -30° F to 130° F (-34° C to 54° C)

I. Opening Force Requirements for Egress Doors: In the event power failure to the operator, swinging automatic entrance doors shall open with a manual force, not to exceed 30 lbf (133 N) applied at 1" (25 mm) form the latch edge of the door.

J. Door Energy: The kinetic energy of a door in motion shall not exceed 1.25 lbd-ft (1.69 Nm).

K. Closing Time:

1. Doors shall be field adjusted to close from 90 degrees to 12 degrees in 5 seconds or longer.
2. Doors shall be field adjusted to close from 12 degrees to fully closed in not less than 1.5 seconds.

PART 2 – PRODUCTS

2.1 MANUFACTURER

A. Basis of Design: Horton Automatics, a division of Overhead Door Corporation, shall manufacture automatic swing door(s) of type(s) and size(s) specified on plans and door schedule.

2.2 SYSTEM

A. Basis of Design: EASYACCESS ® Series 7100: Surface Applied Operator with connecting arms and linkage shall provide positive control of door through entire swing; units shall permit use of butt hung and center pivot doors.

1. Mounting: The operator header shall be surface mounted, and the operator housing must span the full width of the opening.
2. Door Arms: Connecting hardware shall be a double arm arrangement that can either push the door or pull the door open to suit the job condition. When the operator mounting is on the pull side and adjacent wall is within 4" (102 mm) of the door frame, specify a parallel arm.
3. Fasteners and Accessories: Manufacturer's standard corrosion-resistant, non-staining, non-bleeding fasteners and accessories compatible with adjacent materials.
4. Header Case: Shall be a side access extruded aluminum case. Standard header size shall be 4" x 6" (102 mm x 152 mm) with optional 6" x 6" (152 mm x 152 mm).
5. All wiring for the door operator and activating devices (actuators) shall be concealed in the walls system or framing. Exposed wire mold or conduit is not acceptable.

B. Operator: The Electric Operating Mechanism shall be Series 7000: Operator shall be mounted and concealed in an extruded aluminum case for smooth and quiet operation. Maximum current draw shall not exceed 3.15 amps.

1. Opening Action: Shall be accomplished by a 1/15 HP D.C. permanent magnet motor working through reduction gears to the output shaft.
2. Field Adjustable Spring Closing Action: shall be accomplished by a field replaceable spring. When the door is in the closing mode or fully closed, motor voltage shall not be required and will be off. The door can be manually operated with power on or off without damage to the operator.
3. Independent Adjustable Closing and Latching Speed Control: The operator shall employ a rheostat module to allow for independent field adjustment of closing and latching speeds using the motor as a dynamic brake.
4. Field Adjustable Open Stop: The operator shall provide a field adjustable open stop to accommodate opening angles from 80 to 135 degrees without the need for additional components.
5. Consistent Cycle: The operator shall deliver an even, consistent open force across the entire transition from door fully closed to door open check. Additionally, the range of the force shall be field adjustable to accommodate a wide range of on-site conditions.
6. Manual Use: The operator shall function as a manual door closer in the direction of swing with or without electrical power. The operator shall deliver an even, consistent open force across the entire transition from door fully closed to door fully open.
7. Controller Protection: The controller shall incorporate the following features to ensure trouble free operation:
    a. Automatic Reset upon power up.

b. Main fuse protection.

c. Electronic surge protection.

d. Internal power supply protection.

e. Resettable sensor supply fuse protection.

8. Push Button Interface: The controller shall have push button switches with to allow for selection or change of the following parameters: carpet or timer logic, single or dual door, activation options, normal back check or large back check, push-to-open assist on/off.

9. Soft Start/Stop: A “soft-start” “soft-stop” motor driving circuit shall be provided for smooth normal opening and recycling.

10. Control Switch: Automatic door operators shall be equipped with a three position function switch to control the operation of the door. Control switch shall provide three modes of operation, Automatic, Off, and Hold-Open.

11. Master Control: Shall incorporate the following features:

a. Adjustable time delay of 2 to 30 seconds (ANSI A156.19 requirement is 5 second minimum time delay).

b. Infinite adjustment to opening and open check speeds including adjusting the opening force without affecting the opening speed.

c. Immediate reversal of door motion without undue strain on the drive train. This will be accomplished by supplying stepped voltage to the motor. The door shall reverse when closing if an object stops the door.

d. Motor Protection Circuit: A locked door motor protection circuit will be supplied that will shut off current to the motor when the door is inadvertently locked or otherwise prevented from opening.

2.3 RELATED EQUIPMENT

A. Activating Device shall be located on each side of the opening as per ANSI Safety Standard A117and shall be hardwired to door operator controls.

1. Vertical bar actuators: Wikk Ingress’r S-I36-3

a. Clear Anodized (628) Aluminum Type 6063 T-5

b. Graphics: International Symbol for Accessibility and “Push To Open”; color: blue

B. Refer to Door Hardware Specification 08 71 00 for Barrier Free Restroom Control Kit for door operator control/activating system at interior restroom. Coordinate door operator options with control kit requirements.

2.4 RELATED WORK REQUIREMENTS

A. Electrical: To be provided under Division 16: 120 or 220 VAC, 60 cycle, 1 phase, 10 amps for doors with operators in pairs, 5 amps for single doors. Non-North American voltages can be 240 VAC (operator must have 240 volt power supply)

2.5 MATERIALS, FINISHES AND FABRICATION

A. Extruded Aluminum: ASTM B221, 6063-T5 alloy and temper, anodized: Structural Header Sections: Minimum 1/8" (3 mm) thickness.

B. Finishes (for all exposed aluminum surfaces) shall be 204-R1 Clear: Arch. Class 2 Clear Anodized Coating, AA-MI2C22A31.

C. Operator Construction: Electromechanical.

PART 3 – EXECUTION

3.1 EXAMINATION

A. Installer must verify that base conditions previously installed under other sections are acceptable for product installation according to with manufacturer's instructions. Notify the Contractor in writing of conditions detrimental to the proper and timely completion of work. Do not start work until all negative conditions are corrected in a manner acceptable to the installer and manufacturer.

3.2 INSTALLATION

A. General: Installer shall be factory trained, certified by AAADM, and experienced to perform work of this section. Install door units plumb, level and true to line, without warp or rack of frames or sash with manufacturer's prescribed tolerances. Provide support and anchor in place.

B. Dissimilar Materials: Comply with AAMA 101, Appendix Dissimilar Materials by separating aluminum materials and other corrodible surfaces from sources of corrosion or electrolytic action contact points.

C. Weather-tight Construction: Install header and framing members in a bed of sealant or with joint filler or gaskets. Coordinate installation with wall flashings and other components of construction.

D. Electrical: General or electrical contractor to install all wiring to operator on a separate circuit breaker routed into header.

3.3 OPERATION

A. All door operators installed at openings with card access (access control) shall be interfaced with the access system so that when door is unlocked (i.e. card reader is ‘green’), outside actuator opens the automated leaf. When door is locked (i.e. card reader is ‘red’), outside actuator is deactivated. Inside actuator must always temporarily unlock and open the door.

3.4 CLEANING, ADJUSTMENT AND PROTECTION

A. Cleaning: After installation, installer to take following steps:

1. Remove temporary coverings and protection of adjacent work areas.
2. Remove construction debris from construction site and legally dispose of debris.
3. Repair or replace damaged installed products.
4. Clean product surfaces and lubricate operating equipment for optimum condition and safety.

B. Adjustment: AAADM certified technician shall inspect and adjust installation to assure compliance with ANSI A156.19.

C. Advise Contractor of precautions required through the remainder of the construction period, to ensure that doors will be without damage or deterioration (other than normal weathering) at the time of acceptance.

D. Field Quality Control: Testing Services: Factory Trained Installer shall test and inspect each swinging automatic entrance door to determine compliance of installed systems with applicable ANSI standards.

END OF SECTION 08 71 13

GENERAL

1.1 SUMMARY

A. Provide and install insulating glass units (IGU) and monolithic float glass as indicated on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. Product Data: For each glass product and glazing material indicated.

C. Verification Samples: For the following products, in the form of 12 inch (305 mm) square samples for insulating glass units.

D. Glazing Schedule: Use same designations indicated on Drawings for glazed openings in preparing a schedule listing glass types and thicknesses for each size opening and location.

E. Product Certificates: Signed by manufacturers of glass and glazing products certifying that products furnished comply with requirements.

1. For solar-control low-e-coated glass, provide documentation demonstrating that manufacturer of coated glass is certified by coating manufacturer.

F. Qualification Data: For installers.

G. Product Test Reports: For each of the following types of glazing products.

1. Tinted float glass.

2. Coated float glass.

3. Insulating glass.

H. Warranties: Special warranties specified in this Section.

1.4 REFERENCES

C. ASTM International (ASTM):

1. ASTM C 162 - Standard Terminology of Glass and Glass Products.

2. ASTM C 1036 - Standard Specification for Flat Glass.

3. ASTM C 1048 - Standard Specification for Heat-Treated Flat Glass -- Kind HS, Kind FT Coated and Uncoated Glass.

4. ASTM C 1172 - Standard Specification for Laminated Architectural Flat Glass.

5. ASTM C 1376 - Standard Specification for Pyrolitic and Vacuum Deposition Coatings on Flat Glass.

6. ASTM E 2188 - Standard Test Method for Insulating Glass Unit Performance.
7. ASTM E 2189 - Standard Test Method for Testing Resistance to Fogging in Insulating Glass Units.
8. ASTM E 2190 - Standard Specification for Insulating Glass Unit Performance and Evaluation.

1.5 PERFORMANCE REQUIREMENTS

A. General: Provide glass capable of withstanding thermal movement and wind and impact loads (where applicable) as specified in paragraph B following.

B. Glass Design: Glass thickness designations indicated are minimums and are for detailing only. Confirm glass thicknesses by analyzing Project loads and in-service conditions. Provide glass lites in the thickness designations indicated for various size openings, but not less than thicknesses and in strengths (annealed or heat treated) required to meet or exceed the following criteria:

1. Glass Thicknesses: Select minimum glass thicknesses to comply with ASTM E 1300, according to the following requirements:

a. Design Wind Loads: Determine design wind loads applicable to the Project according to ASCE 7, "Minimum Design Loads for Buildings and Other Structures": Section 6.5, "Method 2-Analytical Procedure," based on mean roof heights above grade indicated on Drawings.

(1) Refer to Structural Drawings

C. Thermal Movements: Provide glazing that allows for thermal movements resulting from ambient and surface temperatures changes acting on glass framing members and glazing components.

D. Thermal and Optical Performance Properties: Provide glass with performance properties specified based on manufacturer's published test data, as determined according to procedures indicated below:

1. For monolithic-glass lites, properties are based on units with lites 1/4 inch (6.0 mm) thick.
2. For insulating-glass units, properties are based on units of thickness indicated for overall unit and for each lite.
3. Center-of-Glass Values: Based on using LBL-44789 WINDOW 5.0 computer program for the following methodologies:

a. U-Factors: NFRC 100 expressed as Btu/ sq. ft. per h per degree F.

b. Solar Heat Gain Coefficient: NFRC 200.

c. Solar Optical Properties: NFRC 300.

1.6 QUALITY ASSURANCE

A. Sustainable Design Certification: Glass shall be Cradle to Cradle Certified, minimum Level, Cradle to Cradle Innovation Institute.

B. Fabricator Qualifications: as acceptable to the manufacturer.

C. Installer Qualifications: An experienced installer who has completed glazing similar in material, design, and extent to that indicated for this Project; whose work has resulted in glass installations with a record of successful in-service performance; and who employs

glass installers for this Project who are certified under the National Glass Association Glazier Certification Program as Level-2 (Senior Glaziers) or Level-3 (Master Glaziers).

D. Source Limitations for Glass: Obtain the following through one source from a single manufacturer for each glass type: Clear float glass, coated float glass and insulating glass.

E. Glass Product Testing: Obtain glass test results for product test reports in "Submittals" Article from a qualified independent testing agency accredited according to the NFRC CAP 1 Certification Agency Program.

F. Glazing Publications: Comply with published recommendations of glass product manufacturers and industry organizations, including but not limited to those below, unless more stringent requirements are indicated. Refer to these publications for glazing terms not otherwise defined in this Section or in referenced standards.

1. IGMA Publication for Insulating Glass: SIGMA TM-3000, "Glazing Guidelines for Sealed Insulating Glass Units."
2. GANA Publications: “Laminated Glazing Reference Manual”; “Glazing Manual.”
3. AAMA: “Sloped Glazing Guidelines.”
4. IGMA: “Guidelines for Sloped Glazing.”

G. Insulating-Glass Certification Program: Permanently marked either on spacers or on at least one component lite of units with appropriate certification label of the following testing and inspecting agency:

1. Insulating Glass Certification Council.
2. Associated Laboratories, Inc.
3. Insulating Glass Manufacturers Alliance.

H. Safety Glazing Products: Comply with testing requirements in 16 CFR 1201 and, Insulating Glass Manufacturers Alliance ANSI Z97.1.

1. Subject to compliance with requirements, obtain safety glazing products permanently marked with certification label of the Safety Glazing Certification Council or another certification agency acceptable to authorities having jurisdiction.
2. Lites more than 9 sq ft (0.84 sq m) in area are required to be Category II materials.
3. Where glazing units, including Kind FT glass and laminated glass, are specified in Part 2 articles for glazing lites more than 9 sf (0.84 sq m) in area, provide glazing products that comply with Category II materials, and for lites 9 sf (0.84 sq m) or less in area, provide glazing products that comply with Category I or II materials.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Protect glazing materials according to manufacturer's written instructions and as needed to prevent damage to glass and glazing materials from condensation, temperature changes, direct exposure to sun, or other causes.

B. For insulating-glass units that will be exposed to substantial altitude changes, comply with insulating-glass manufacturer's written recommendations for venting and sealing to avoid hermetic seal ruptures.

1.8 WARRANTY

A. Manufacturer's Warranty on Insulating Glass: Manufacturer's standard form in which the insulating glass unit manufacturer agrees to replace insulating-glass units that deteriorate during normal use within the specified warranty period. Deterioration of insulating glass

units is defined as an obstruction of vision by dust, moisture, or a film on the interior surfaces of the glass caused by a failure of the hermetic seal that is not attributed to glass breakage, improper installation, or cleaning and maintenance that is contrary to the manufacturer's written instructions.

1. Warranty Period: 10 years from date of Substantial Completion.

PRODUCTS

2.1 MANUFACTURER

A. Basis of Design: Vitro Architectural Glass; Glass Technology Center, 400 Guys Run Rd., Pittsburgh, PA 15024. ASD. Toll Free Tel: (800) 887-6457. Fax: (800) 367-2986. Web: http://www.vitroglazings.com.

2.2 GLASS PRODUCTS

A. Annealed Float Glass: ASTM C 1036, Type I (transparent flat glass), Quality-Q3; of class indicated.

B. Heat-Treated Float Glass: ASTM C 1048; Type I (transparent flat glass); Quality-Q3; of class, kind, and condition indicated.

1. Fabrication Process: By horizontal (roller-hearth) process with roll-wave distortion parallel to bottom edge of glass as installed, unless otherwise indicated.

2. Provide Kind HS (heat-strengthened) float glass in place of annealed float glass where needed to resist thermal stresses induced by differential shading of individual glass lites and to comply with glass design requirements specified in Part 1 "Performance Requirements" Article.

3. For uncoated glass, comply with requirements for Condition A.

4. For coated vision glass, comply with requirements for Condition C (other uncoated glass).

5. Provide Kind FT (fully tempered) float glass in place of annealed or Kind HS (heat-strengthened) float glass where safety glass is indicated or required.

C. Insulating-Glass Units, General: Factory-assembled units consisting of sealed lites of glass separated by a dehydrated interspace, and complying with ASTM E 774 for Class CBA units and with requirements specified in this Article and in Part 2 "Insulating-Glass Units" Article.

1. Provide Kind HS (heat-strengthened) float glass in place of annealed glass where needed to resist thermal stresses induced by differential shading of individual glass lites and to comply with glass design requirements specified in Part 1 "Performance Requirements" Article.

2. Provide Kind FT (fully tempered) glass lites where safety glass is indicated or required.

3. Overall Unit Thickness and Thickness of Each Lite: Dimensions indicated for insulating-glass units are nominal and the overall thicknesses of units are measured perpendicularly from outer surfaces of glass lites at unit's edge.

4. Sealing System: Comply with requirements in Section 07 90 00 - Joint Sealants. Dual seal, with primary and secondary sealants of polyisobutylene and silicone.

5. Spacer Specifications: Manufacturer's standard spacer material and construction complying with the following requirements:

a. Spacer Material: Aluminum with mill or clear anodic finish.

b. Desiccant: Molecular sieve or silica gel, or blend of both.

c. Corner Construction: Manufacturer's standard corner construction.

2.3 FABRICATION OF GLAZING UNITS

A. Fabricate glazing units in sizes required to glaze openings indicated for Project, with edge and face clearances, edge and surface conditions, and bite complying with written instructions of product manufacturer and referenced glazing publications, to comply with system performance requirements.

2.4 GLASS/ GLAZING SCHEDULE

A. Refer to the Glazing Schedule on the Drawings.

EXECUTION

3.1 GLAZING

A. Set all glass in a true plane, tight and straight, with proper and adequate clearance, firmly anchored to prevent rattling and looseness, with all edges cleanly cut; do not nip or seam the edges.

B. Perform glazing in compliance with manufacturer’s published requirements and recommendations and industry publications listed in Part 1.6 above.

3.2 CLEANING UP

1. Upon completion of glazing, thoroughly clean all glass surfaces, correct all imperfections, replace all damaged glass, and leave all labels on the glass until they have been inspected and approved by the Architect and/or Building Official but remove all labels immediately thereafter.

END OF SECTION 08 80 00

GENERAL

1.1 SUMMARY

A. Provide and Install gypsum board where shown on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 32 33 of these specifications.

B. Mock-up: With location approval of the Architect, develop a sample room demonstrating the final specified finish appearance, subjected to the same lighting conditions when occupied, of walls, ceilings and soffits to receive finish.

1.4 FIRE-RESISTANCERATED ASSEMBLIES

A. Provide materials and construction identical to those tested in assemblies per ASTM E 119 by an independent testing and inspecting agency acceptable to authorities having jurisdiction.

1.5 STC-RATED ASSEMBLIES

A. Provide materials and construction identical to those tested in assemblies per ASTM E 90 and classified per ASTM E 413 by a qualified independent testing and inspecting agency.

1.6 INDOOR AIR POLLUTION CONTROL

A. VOC content in Gypsum Board Adhesives shall be limited to 50 grams per liter (less water and less exempt compounds).

PRODUCTS

2.1 PANEL PRODUCTS

A. Provide in maximum lengths available to minimize end-to-end butt joints.

B. Interior Gypsum Board: ASTM C 1396/C 1396M, in thickness indicated, with manufacturer's standard edges. Regular type unless otherwise indicated; Type X where indicated.

C. Moisture-Resistant Gypsum Backing Board: (For use behind all tile in “wet” areas including all toilet room walls, janitor room walls, kitchen, etc.) ASTM C 1396/C 1396M, in thickness indicated. [Regular type unless otherwise indicated] [Type X where required for fire-resistance-rated assemblies and where indicated]

1. Product: CertainTeed Pro Roc Moisture Resistant Gypsum Board, or equal.

2.2 ACCESSORIES

A. Metal Trim Accessories: ASTM C 1047, formed from galvanized or aluminum-coated steel sheet, rolled zinc, plastic, or paper-faced galvanized-steel sheet. For exterior trim, use accessories formed from hot-dip galvanized-steel sheet, plastic, or rolled zinc.

1. Provide cornerbead at outside corners unless otherwise indicated.

2. Provide LC-bead (J-bead) at exposed panel edges.
3. Provide control joints where indicated.

B. Joint-Treatment Materials: ASTM C 475/C 475M.

1. Joint Tape: Paper unless otherwise recommended by panel manufacturer.
2. Joint Compounds: Setting-type taping compound and drying-type, ready-mixed, compounds for topping.
3. Skim Coat: For final coat of Level 5 finish, use setting-type, sandable topping compound.

C. Fasteners: Screws complying with ASTM C954 or C1002.

D. Adhesives: Liquid Nails Construction Adhesive by Macco Adhesives or equal, type as required for the material applied to.

E. Other Materials: All other materials, not specifically described but required for a complete and proper installation of gypsum drywall, shall be as selected by the Contractor subject to approval of the Architect.

EXECUTION

3.1 INSTALLATION

A. Install gypsum board panels in accordance with GA-216 and ASTM C840.

B. Install all panels plumb, level, and with all vertical joints on bearing. Panels/patches smaller than 144 square inches may not be used without prior approval of Architect.

C. Cutting

1. When cutting gypsum drywall is required, cut by scoring and breaking or by sawing, working from the face side.
2. When cutting by scoring, cut through the face paper and then snap the panel back away from the cut face; then break the back paper by snapping the gypsum board in the reverse direction or by cutting the back paper.
3. Smooth all cut ends and edges of panels as necessary to obtain a smooth joint.
4. For cut-outs in panels for pipes, fixtures, and other small openings, make holes and cut-outs by sawing or by such other method as will not fracture the core or tear the covering and with such accuracy that plates, escutcheons, or trim will cover the edges.
5. The use of "score-and-knockout" method will not be permitted.

D. Fastening

1. Properly space all fasteners in careful accordance with the manufacturer's recommendations and code requirements, with heads driven slightly below the surface for proper cementing but without breaking the paper cover.
2. Loosely butt all joints to be taped; firmly butt all joints to be left untreated.
3. Stagger all end joints and the joints between panels to achieve a maximum of bridging and a minimum of continued joints.

E. Ceiling

1. At those areas where gypsum drywall ceiling is indicated on the Drawings, and where it is possible to do so, install the ceiling prior to installing walls.

2. Where possible, and where permitted by code, float the interior ceiling angles.

3.2 CONTROL JOINTS

A. Where not shown on the Drawings, provide control joints at wall and ceiling areas which exceed maximum areas or lengths.

B. Install control joints at ceiling areas.

1. Which exceed 2,500 square feet.

2. Where continuous panel surface exceeds 50 feet in either direction.

3. Where ceiling furring changes direction.

C. Install control joints in wall and wall furring panels which exceed 30 feet in length.

D. Verify placement of control joints with Architect prior to installation.

3.3 INSTALLING METAL TRIM

A. The drawings do not purport to show all metal trim required; verify with the Architect the precise locations and types of trim to be used.

B. Carefully inspect the Drawings and verify location of all metal trim required. Install all trim in strict accordance with the manufacturers' recommendations, paying particular attention to make all trim installation plumb, level, and true to line, with firm attachment to supporting members.

3.4 TAPING AND FINISHING LEVEL 5 FINISH

A. Control heating and ventilating during finishing operations to ensure the maintenance of 55° F. minimum temperature.

B. Provide surface finish to the level shown on the Drawings, and as described below:

1. First coat - Level 2 Finish

a. Spread compound evenly over all joints, using suitable tools designed for that purpose.

b. Fill all joint recesses and metal trim.

c. Center the reinforcing tape on the joint and press into the fresh compound, wiping down with sufficient pressure to remove excess compound but leaving sufficient compound under the tape for proper bond.

d. Feather all edges and leave the surface free from blisters and tape wrinkles.

e. Apply compound to all fastener heads, leaving flush with the adjacent surfaces.

f. Fold reinforcing tape along its centerline and apply to all interior angles, following the same procedure as for joints.

2. Second coat – Level 3 Finish

a. Lightly sand the dry compound with fine sandpaper to remove all irregularities.

b. Apply a second coat of compound to all joints, feathering approximately three inches beyond edges of tape.

c. Apply a second coat of compound to all fastener heads.

3. Third coat – Level 4 Finish

a. Lightly sand the dry compound with fine sandpaper to remove all irregularities.

b. Apply final skim coat, feathering out approximately two inches beyond second coat.

c. Third coat all fastener heads and metal trim and all interior angles; allow to dry.

4. Fourth coat – Level 5 Finish: (Smooth Finish)

a. Lightly sand the dry compound with fine 220 grit sandpaper to remove all irregularities.

b. Apply final skim coat over entire wall, ceiling or soffit surfaces. Do not roll or spray apply. Wipe down immediately leaving a uniform tight smooth surface of joint compound.

3.5 CLEANING UP

A. Do not allow the accumulation of scraps and debris arising from the work of this Section but maintain the premises in a neat and orderly condition at all times; in the event of spilling or splashing compound onto other surfaces, immediately remove the spilled or splashed material and all trace of the residue to the approval of the Architect.

END OF SECTION 09 29 00

GENERAL

1.1 SUMMARY

A. Provide ceramic tile where shown on the Drawings, as specified herein, and as needed for a complete and proper installation.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

PRODUCTS

2.1 CERAMIC TILE

A. Provide ceramic tile and accessories complying with Tile Council of America Specification 137.1, in colors and patterns as noted on the drawings from standard colors and patterns of the approved manufacturers.

B. Floor Tile

1. Provide coefficient of friction not less than 0.50 when tested in accordance with ASTM F489, ASTM F609, and the National Bureau of Standards Technical Note 895.

C. Provide standard accessory shapes as required including wall inside and outside corners, wainscot top surface cove, and base cove.

2.2 LIQUID APPLIED CRACK ISOLATION MEMBRANE FOR FLOORS

A. Under all floor tile installations install anti-fracture membrane, ANSI 118.12: Laticrete Blue 92 or Custom-Building Products Red Gard.

2.3 TILE ACCESSORIES

A. Schluter System tile accessories (edge trim, transition trim, control joints). Refer to Drawings for details and model numbers.

2.4 SETTING MATERIALS

A. Comply with pertinent recommendations contained in the Tile Council of America "Handbook for Ceramic Tile Installation".

B. Latex – Portland cement complying with ANSI A118.4 by Laticrete or equal.

C. Special tile setting mortars will be considered by the Architect when complete technical data is submitted in advance.

2.5 GROUT

A. Comply with pertinent recommendations contained in the Tile Council of America "Handbook for Ceramic Tile Installation" in colors selected by the Architect from standard colors available from the approved manufacturers.

1. Provide a commercially prepared single-component premium grout with high flexibility and stain resistance: Fusion Pro Single Component Grout/Custom Building Products 800-272-8786 or equal.

B. Grout Color

1. As selected by Architect from manufacturer's standards.

2.6 CAULK

A. Provide caulk in color to match grout. Custom Building Products Commercial Silicone Caulk or Ceramic Tile Caulk, or equal.

2.7 OTHER MATERIALS

A. Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Architect.

EXECUTION

3.1 EXAMINATION

A. Verify that wall surfaces are free of substances which would impair bonding of setting materials, smooth and flat within tolerances specified in ANSI A137.1 and are ready to receive tile.

B. Verify that sub-floor surfaces are dust-free, and free of substances which would impair bonding of setting materials to sub-floor surfaces and are smooth and flat within tolerances specified in ANSI A137.1.

C. Verify that concrete sub-floor surfaces are ready for tile installation by testing for moisture emission rate and alkalinity; obtain instructions if test results are not within limits recommended by tile manufacturer and setting materials manufacturer.

D. Verify that required floor-mounted utilities are in correct location.

3.2 PREPARATION

A. Protect surrounding work from damage.

B. Remove any curing compounds or other contaminates.

C. Vacuum clean surfaces and damp clean.

D. Seal substrate surface cracks with filler. Level existing substrate surfaces to acceptable flatness tolerances.

E. Prepare substrate surfaces for adhesive installation in accordance with adhesive manufacturer's instructions.

3.3 INSTALLATION

A. General

1. Comply with ANSI A108.1, ANSI A108.2, and the latest published edition of "Handbook for Ceramic Tile Installation" of the Tile Council of America, except as otherwise directed by the Architect or specified herein:

a. Interior concrete floor, thin set with crack-isolation membrane, F113.

b. Interior frame wall, gypsum board, W243.

B. Lay tile to pattern indicated. Arrange pattern so that a full tile or joint is centered on each wall and that no tiles less than ½ width is used. Do not interrupt tile pattern through openings.

C. Cut and fit tile to penetrations through tile, leaving sealant joint space. Form corners and bases neatly. Align floor joints.

D. Place tile joints uniform in width, subject to variance in tolerance allowed in tile size. Make joints watertight, without voids, cracks, excess mortar, or excess grout.

E. Form internal angles square and external angles bullnosed.

F. Install ceramic accessories rigidly in prepared openings.

G. Install non-ceramic trim in accordance with manufacturer's instructions.

H. Sound tile after setting. Replace hollow sounding units.

I. Keep expansion joints free of adhesive or grout. Apply tile caulking to joints.

J. Allow tile to set for a minimum of 48 hours prior to grouting.

K. Grout tile joints. Use standard grout unless otherwise indicated.

L. Apply tile caulking to junction of tile and dissimilar materials and junction of dissimilar planes.

3.4 INSTALLATION – FLOORS – THIN SET METHODS

A. Over interior concrete substrates, install in accordance with TCA Handbook Method F113, dry-set or latex-Portland cement bond coat compatible with crack-isolation membrane, with standard grout, unless otherwise indicated.

3.5 INSTALALTION – WALL TILES

A. Over gypsum wallboard on wood or metal studs install in accordance with TCA Handbook Method W243, thin-set with dry-set or latex-Portland cement bond coat, unless otherwise indicated.

3.6 CLEANING

A. Clean tile and grout surfaces.

3.7 PROTECTION OF FINISHED WORK

A. Do not permit traffic over finished floor surface for 72 hours after installation.

B. Cover floors with Kraft paper and protect from dirt and residue from other trades.

C. Where floor will be exposed for prolonged periods cover with plywood or other similar type walkways.

END OF SECTION 09 30 00

GENERAL

1.1 SUMMARY

A. Provide and install suspended acoustical ceilings as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1.4 STANDARDS

A. Suspended acoustical ceiling systems shall be installed in accordance with the provisions of ASTM C635 and ASTM C636 as modified by ASCE 7 Section 13.5.6.2.2 for Seismic Design Categories D, E, and F.

1.5 ADDITIONAL STOCK

A. Provide (3) cartons of new, unopened ceiling tiles of each type to the Owner.

PRODUCTS

2.1 SUSPENDED GRID SYSTEM

A. Manufacturers

1. All suspended grid systems shall be in the pattern indicated on the Drawings and shall be one of the following or an equal approved in advance by the Architect. All grids shall be factory finished white, 15/16” face width. Main beam shall be Heavy Duty Class rated.

a. USG / Donn Products, Inc.

b. Armstrong Corporation.

c. Certainteed EZ Stab Classic

B. Perimeter support

1. Provide nominal 1” (min. 7/8”) perimeter support closure angle with seismic clip attaching runners to perimeter angle. Seismic clip shall be the product of the grid manufacturer and shall be installed in accordance with the applicable ICC-ES report:

a. USG / Donn ASM7 Clip; ICC-ES ESR 1222.

b. Armstrong BERC-2 Clip; ICC-ES ESR 1308.

c. Certainteed: ICC-ES ESR 3336.

C. General

1. The system shall be complete with all support members, anchors, wall cornices, and adapters for light fixtures and ceiling grilles, plus all accessories of every nature required for a complete installation.

2.2 ACOUSTICAL CEILING BOARDS

A. Manufacturers: All acoustical ceiling boards shall be as specified on the Finish Schedule or an equal approved in advance by the Architect

B. All ceiling boards shall be the product of one manufacturer, nominally sized lay-in panels and shall be fire rated where indicated on the Drawings.

2.3 OTHER MATERIALS

A. All other materials not specifically described but required for a complete and proper installation of suspended acoustical ceiling shall be as selected by the Contractor subject to the approval of the Architect.

EXECUTION

3.1 INSTALLATION OF “T” GRID

A. General

1. Erect metal "T" members in the pattern shown on the Drawings, spacing members symmetrically about the centerline of areas in both directions and/or as shown on the Drawings.
2. Space hanger wires a maximum of four feet on centers along main runners.
3. Accurately level all main runners; space main runners a maximum of four feet on centers.
4. Space cross "T" members as shown on the Drawings and secure to main runners and wall angles in accordance with the approved Shop Drawings.
5. Securely anchor all wall angle members in place.
6. Provide and install suspension wires for electrical fixtures.

B. Make all grid level within a tolerance of one in 500 and straight within a tolerance of one in 1000.

3.2 LATERAL AND COMPRESSION BRACING

A. Furnish and install lateral bracing consisting of at least twelve gage wire, splayed at 45 degrees, in the following locations.

1. At the midpoint of all unsupported partitions exceeding twelve linear feet.
2. At twelve feet on center each way in all large ceiling areas not restrained by partitions.

B. Secure all lateral bracing to structural members; secure at right angles to the direction of the partition and four way in large ceiling areas.

C. Furnish and install vertical compression bracing as required by the U.B.C., latest edition Use the system as detailed on the drawings or factory-built components to comply with the code requirements.

3.3 SEISMIC SEPARATION

A. For ceiling areas exceeding 2500 square feet, a seismic separation joint shall be installed to break the ceiling up into areas not exceeding 2500 square feet. Install seismic separation joint where indicated on the Drawings or as directed by the Architect.

3.4 INSTALLATION OF ACOUSTICAL CEILING BOARDS

A. Install all acoustical ceiling boards in the exposed "T" grid system so that linearity of facing is in one direction only, and to the approval of the Architect.

3.5 FIELD CUTTING

A. All field cutting as required for tegular type lay-in ceiling tiles shall be required at the wall angles and linear HVAC diffusers, and shall be performed in a craftsman-like manner equal to the factory edge cut. Touch up the cut edge with white paint as provided by the manufacturer to match the tile facing.

3.6 CLEANING UP

A. Completely remove all fingerprints and traces of soil from the surfaces of grid and acoustical ceiling boards, using only those cleaning materials specifically recommended for the purpose by the manufacturers of the materials cleaned.

END OF SECTION 09 51 13

GENERAL

1.1 SUMMARY

A. Provide and install wood veneer acoustical ceiling planks as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 32 33 of these specifications.

B. Product Data: Submit manufacturer's technical data for each type of wall or ceiling panel required.

C. Samples: Where finishes involve normal color and texture variations, include sample sets showing the range of variations expected. One 12" x 12" samples of each panel type, pattern, and color.

D. Certifications: Certified test reports showing compliance with performance requirements specified.

E. Shop Drawings: Submit shop drawings showing how panels are to be laid out on the walls and ceilings, details of trim members and width of panels. Width of panels and location of seams are critical.

F. Single Source: All custom acoustical wall and ceiling panels shall be purchased from a single supplier.

1.4 QUALITY ASSURANCE

A. Manufacturer & Installer: Firm manufacturing the specified product shall have adequate capacity required for projects listed and have successfully completed similar projects for a period of not less than two years. The manufacturer shall have the right to approve the selection of the fabricator and to verify that said fabricator has sufficient experience and expertise to complete the project in a satisfactory manner.

B. Reference Standards: Conform to all governing laws, building codes, and the following performance criteria

1. Fire Performance Characteristics: Provide panels with fire ratings in accordance with ASTM E84 test procedures. ASTM E-84 testing must be performed by an independent testing organization acceptable to authorities having jurisdiction.

2. Acoustical Performance Characteristics: Provide wall and ceiling panels with acoustical absorption characteristics as indicated in Part 2, which have been determined by testing fully assembled production material in accordance with ASTM C-423 (Type E400 for ceiling and F6 for wall mounting method as defined by ASTME-795) by a testing organization acceptable to authorities having jurisdiction. Approved testing organization must be independent of the manufacturer.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver panels to project site in original, unopened packages and store them in a fully enclosed space where they will be protected against damage from moisture, direct sunlight, surface contamination, and other causes.

B. Panels should not be stored in spaces where the temperature or humidity conditions vary greatly from the temperatures and conditions that will be normal in the occupied space. The temperature should be between 50 degrees F and 86 degrees F and relative humidity should not fall below 35 percent or exceed 55 percent.

C. Before installing panels, permit them to reach room temperature and a stabilized moisture content.

D. Handle wall panels carefully to avoid chipping edges or damaged units in any way.

1.6 PROJECT CONDITIONS

A. Space Enclosure:

1. Panels should be permitted to reach room temperature and have a stabilized moisture content for a minimum of 72 hours before installation.

2. Panels should not be stored or installed in spaces where the temperature or humidity conditions vary greatly from the temperatures and conditions that will be normal in the occupied space.

3. As interior finish products, the panels are designed for installation in temperature conditions between 50 degrees F and 86 degrees F, in spaces where the building is enclosed and HVAC systems are functioning and will be in continuous operation. Relative humidity should not fall below 35 percent or exceed 55 percent.

1.7 WARRANTY

A. Submit to Owner or Owner's Representative a written and dated warranty issued by the acoustic panel manufacturer warranting the panels against defects in materials or manufacturing for a period of 10 years from the date of delivery. Warranty is limited to materials installed in their original location.

B. Components used in the system but not provided by the manufacturer are excluded from the manufacturer's warranty. Damage caused by exposure to moisture or rapid or extreme changes to temperature or humidity are excluded from the manufacturer's warranty. Damage caused by improper storage, handling, acclimatization, or installation is excluded from the warranty. Appearances and colorings of wood products, stains and finishes can vary over time and as site conditions change and are therefore excluded from the warranty.

1.8 MAINTENANCE

A. Extra Materials

1. Deliver no less than *5 percent* of each type, color and pattern of material.

2. Extra materials shall be from the same production run as the original materials.

3. Extra materials shall remain in the manufacturer's original unopened packaging and given to the building owner upon substantial completion of the work.

PRODUCTS

2.1 MANUFACTURER

A. Navy Island Inc. 275 Marie Ave. E., St. Paul, Mn 55118 PH 651-451-4454 Email, Sales@navyisland.com.

B. Contact Navy Island for a list of qualified fabricators to fabricate panels into finished walls/ceilings/fixtures

2.2 CEILING SYSTEM

A. Soundply Lino Acoustic Ceiling Planks, LR Series

1. Microperforated surface
2. Plank widths per Drawings
3. Wood veneer per Drawings
4. Class A fire rating
5. Finish: Clear or Tinted Uni-Matte Flat Varnish, as selected by Architect
6. Provide manufacturer's clips and fasteners for installation indicated on the Drawings

EXECUTION

3.1 EXAMINATION

A. Inspect installation area and conditions under which work is to be performed for compliance with all manufacturers' environmental requirements. All wet work in the installation area must be complete, cured and dry prior to installation. Work above shall be complete, inspected and accepted before ceiling installation work begins. Do not proceed until all unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Ceilings

1. Comply with manufacturer's instruction and recommendations and industry standards for installation of ceiling planks.
2. Coordinate the exact size, location and sequencing of penetrations of ceiling planks by all building components.
3. Lay out ceiling pattern per approved shop drawings.
4. Where ceilings of different heights abut, install acoustical material matching ceiling at vertical surface of ceiling break.

3.3 ADJUSTING AND CLEANING

A. Clean soiled surfaces of ceiling and wall panels per manufacturer's instructions.

B. Remove and replace damaged or discolored material and material that cannot be properly cleaned.

C. Adjust panels after installation so that surfaces are aligned, flush and level with gaps between units consistent in width and straight.

END OF SECTION 09 54 26

GENERAL

1.1 SUMMARY

A. Provide and install resilient tile flooring and accessories where indicated on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

B. Submit shop drawings, seaming plan, coving details, and manufacturer's technical data, installation and maintenance instructions for flooring and accessories.

C. Submit the manufacturer's standard samples showing the required colors for flooring and applicable accessories.

D. If required, submit the manufacturer's certification that the flooring has been tested by an independent laboratory and complies with the required fire tests.

1.4 QUALITY ASSURANCE AND REGULATORY REQUIREMENTS

A. Select an installer who is competent in the installation of solid vinyl flooring with acrylic adhesive or two part epoxy.

B. If required, provide resilient flooring and accessories supplied by one manufacturer, including leveling and patching compounds, and adhesives.

C. If required, provide flooring material to meet the following fire test performance criteria as tested by a recognized independent testing laboratory:

1. ASTM E 648 Critical Radiant Flux of 0.45 watts per sq. cm. or greater, Class I.

2. ASTM E 662 (Smoke Generation) Maximum Specific Optical Density of 450 or less.

1.5 ENVIRONMENTAL CONDITIONS

A. Deliver materials in good condition to the jobsite in the manufacturer's original unopened containers that bear the name and brand of the manufacturer, project identification, and shipping and handling instructions.

B. Store materials in a clean, dry, enclosed space off the ground, and protected from the weather and from extremes of heat and cold. Protect adhesives from freezing. Store flooring, adhesives and accessories in the spaces where they will be installed for at least 48 hours before beginning installation.

C. Maintain a minimum temperature in the spaces to receive the flooring and accessories of 65ºF (18ºC) and a maximum temperature of 85ºF (29ºC) for at least 48 hours before, during, and for not less than 48 hours after installation. Thereafter, maintain a minimum temperature of 55ºF (13ºC) and a maximum temperature of 85ºF (29ºC) in areas where work is completed. Protect all materials from the direct flow of heat from hot-air registers, radiators, or other heating appliances.

D. Install flooring and accessories after the other finishing operations, including painting, have been completed. Close spaces to traffic during the installation of the flooring. Do not install flooring over concrete slabs until they are sufficiently dry to achieve a bond with the adhesive, in accordance with the manufacturer's recommended bond and moisture tests.

1.6 INDOOR AIR POLLUTANT CONTROL REQUIREMENTS

A. All Resilient Tile Flooring shall be certified under the Resilient Floor Covering Institute’s FloorScore Program or shall comply with the VOC emission limits defined in 2009 Collaborative for High Performance Schools (CHPS) criteria and listed on its Low-emitting Materials List.

B. VOC content in Resilient Tile Flooring Adhesives shall be limited to 50 grams per liter (less water and less exempt compounds).

1.7 WARRANTY

A. Manufacturer’s standard 20 year limited commercial warranty and 20 year finish coat warranty commencing on the Date of Substantial Completion.

PRODUCTS

2.1 RESILIENT FLOORING MATERIALS

A. Refer to Drawings for Manufacturer, Product, and Color

B. Specifications

1. Construction - Luxury Vinyl Tile & Plank, Non-orthophthalate
2. Overall Thickness – 5mm
3. Wearlayer Thickness – 20 mil (1.0 mm)
4. Finish Layer – ExoGuard
5. Edge Profile: Squared Edge
6. Specification (ASTM F-1700) - Class III, B

C. Testing

1. HUD/FHA - Passes
2. Flexibility (ASTM F137) - Passes - 1” Mandrel - No Crack/Break
3. Dimensional Stability (ASTM F2199) - Passes - Max 0.020 in/lin ft
4. Squareness (ASTM F540) - Passes - Max 0.010”
5. Static Load (ASTM F970 mod.) - Passes – 1200 PSI
6. Residual Indentation (ASTM F1914) - Passes - < 8% Avg / 10% Single Value
7. Flooring Radiant Panel (ASTM E648) - Passes - Class 1; ≥ 0.45 watts/cm2
8. Smoke Density (ASTM E662) - Passes - ≤ 450
9. Coefficient of Friction (ASTM D2047, Slip Resistance) - ≥ 0.5
10. Resistance to Light (ASTM F1515) - Passes
11. Chemical Resistance (ASTM F925) - Passes
12. Resistance to Heat (ASTM F1514) - Passes

D. Environmental

1. Indoor Air Quality - FloorScore Certified; CDPH v1.1-2010
2. Product Declarations – EPD, HPD

2.2 ADHESIVES

A. VOC-compliant, high moisture enhanced adhesive as recommended by flooring manufacturer.

2.3 ACCESSORIES

A. For patching, smoothing, and leveling monolithic subfloors (concrete, terrazzo, quarry tile, ceramic tile, and certain metals), provide Portland Cement-Based Underlayment.

B. For sealing joints between the top of wall base or integral cove cap and irregular wall surfaces such as masonry, provide plastic filler applied according to the manufacturer's recommendations.

C. LVT must have the ability to be chemically welded to adjoining broadloom carpet materials.

D. Provide transition/reducing strips tapered to meet abutting materials.

E. Provide threshold of thickness and width as shown on the drawings.

F. Provide resilient edge strips of width shown on the drawings, of equal gauge to the flooring, homogeneous vinyl or rubber composition, tapered or bullnose edge, with color to match or contrast with the flooring, or as selected by the Architect from standard colors available.

G. Provide metal edge strips of width shown on the drawings and of required thickness to protect exposed edges of the flooring. Provide units of maximum available length to minimize the number of joints. Use butt-type metal edge strips for concealed anchorage, or overlap-type metal edge strips for exposed anchorage. Unless otherwise shown, provide strips made of extruded aluminum with a mill finish.

EXECUTION

3.1 INSPECTION

A. Examine subfloors prior to installation to determine that surfaces are smooth and free from cracks, holes, ridges, and other defects that might prevent adhesive bond or impair durability or appearance of the flooring material.

B. Inspect subfloors prior to installation to determine that surfaces are free from curing, sealing, parting and hardening compounds; residual adhesives; adhesive removers; and other foreign materials that might prevent adhesive bond. Visually inspect for evidence of moisture, alkaline salts, carbonation, dusting, mold, or mildew.

C. Report conditions contrary to contract requirements that would prevent a proper installation. Do not proceed with the installation until unsatisfactory conditions have been corrected.

D. Failure to call attention to defects or imperfections will be construed as acceptance and approval of the subfloor. Installation indicates acceptance of substrates with regard to conditions existing at the time of installation.

3.2 PREPARATION

A. Smooth concrete surfaces, removing rough areas, projections, ridges, and bumps, and filling low spots, control or construction joints, and other defects with Portland Cement-Based Underlayment as recommended by the flooring manufacturer.

B. Remove paint, varnish, oils, release agents, sealers, and waxes. Remove residual adhesives as recommended by the flooring manufacturer. Remove curing and hardening compounds. Avoid organic solvents.

C. Perform subfloor Relative Humidity and/or Calcium Chloride Tests, pH Tests, and Bond Tests as described in manufacturer's installation guide to determine if surfaces are dry, free of curing and hardening compounds, old adhesive, and other coatings; and ready to receive flooring. Maximum levels to be determined based on adhesive choice and manufacturer's published installation instructions.

D. Vacuum or broom-clean surfaces to be covered immediately before the application of flooring. Make subfloor free from dust, dirt, grease, and all foreign materials.

3.3 INSTALLATION OF FLOORING

A. Install flooring in strict accordance with manufacturer's installation guide and any other product specific published installation instructions.

B. Install flooring wall to wall before the installation of floor-set cabinets, casework, furniture, equipment, movable partitions, etc. Extend flooring into toe spaces, door recesses, closets, and similar openings as shown on the drawings.

C. If required, install flooring on pan-type floor access covers. Maintain continuity of color and pattern within pieces of flooring installed on these covers. Adhere flooring to the subfloor around covers and to covers.

D. Scribe, cut, and fit to permanent fixtures, columns, walls, partitions, pipes, outlets, and built-in furniture and cabinets.

E. Install flooring with adhesives, tools, and procedures in strict accordance with the manufacturer's instructions. Observe the recommended adhesive trowel notching, open times, and working times.

3.4 INSTALLATION OF ACCESSORIES

A. Apply top set wall base to walls, columns, casework, and other permanent fixtures in areas where top-set base is required. Install base in lengths as long as practical, with inside corners fabricated from base materials that are mitered or coped. Tightly bond base to vertical substrate with continuous contact at horizontal and vertical surfaces.

B. Fill voids with plastic filler along the top edge of the resilient wall base or integral cove cap on masonry surfaces or other similar irregular substrates.

C. Place resilient edge strips tightly butted to flooring, and secure with adhesive recommended by the edge strip manufacturer. Install edge strips at edges of flooring that would otherwise be exposed.

3.5 CLEANING AND PROTECTION

A. Perform initial maintenance according to the latest edition of the manufacturer's maintenance and warranty literature. Protect installed flooring as recommended by the flooring manufacturer against damage from rolling loads, other trades, or the placement of fixtures and furnishings.

B. Do not wax, polish, seal or apply other finishes to the installed flooring unless specifically directed by end user.

END OF SECTION 09 65 19

GENERAL

1.1 SUMMARY

A. Provide and install tile carpeting required for this work as shown on the Finish Schedule of the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 INDOOR AIR POLLUTANT CONTROL REQUIREMENTS

A. All Carpet shall meet the testing and product requirements of one of the following:

1. Carpet and Rug Institute's Green Label Plus Program.
2. California Department of Public Health Standard Practice for the testing of VOCs (Specification 01350).
3. NSF/ANSI 140 at the Gold Level.
4. Scientific Certification Systems Sustainable Choice.

B. All Carpet cushion installed in the building interior shall meet the requirements of the carpet and Rug Institute Green Label Program.

C. Per Section 5.504.4.1 of the 2013 California Green Building Standards Code, all carpet adhesives used on the project shall meet the requirements of the following standards:

1. Adhesives, adhesive bonding primers adhesive primers, sealants, sealant primers and caulks shall comply with local or regional air pollution control or air quality management district rules where applicable, or SCAQMD Rule 1168 VOC limits, as shown in Tables 5.504.4.1 and 5.504.4.2 of the 2013 California Green Building Standards Code. Such products also shall comply with the Rule 1168 prohibition on the use of certain toxic compounds (chloroform, ethylene dichloride, methylene chloride, perchloroethylene and trichloroethylene)

1.5 ADDITIONAL STOCK

A. Deliver to Owner carpet tiles equal to 5 percent of each type and color carpet tile installed, packaged with protective covering for storage.

PRODUCTS

2.1 CARPET TILE

A. Products

1. Refer to the Drawings

EXECUTION

3.1 INSTALLATION

A. Comply with CRI 104.

B. Installation Method: As recommended by manufacturer

C. Place units in strict compliance with the manufacturer's recommendations as approved by the Architect.

1. Butt units tightly to vertical surfaces, nosings, edgings and thresholds.
2. Scribe as necessary around obstructions and to produce neat joints.
3. Place tiles tightly laid, even, and in straight parallel lines.
4. Extend tiles into toe spaces, door reveals, and in closets and other similar adjoining spaces.

D. Lay units from center marks established with principal walls, discounting minor offsets, so that units at opposite sides of the room are of equal width.

1. Adjust as necessary to avoid use of cut widths less than 3" wide at room perimeters.
2. Lay units square to the axis of the room or space unless otherwise shown on the Drawings

E. Match units for color and pattern by using materials from cartons in the same sequence as manufactured and packaged.

F. Lay in pattern shown on the Drawings.

G. Place edge strips tightly butted to units and secured with adhesive; provide at all unprotected edges unless otherwise shown on Drawings.

END OF SECTION 09 68 13

GENERAL

1.1 SUMMARY

A. Provide and install fiberglass reinforced panels (FRP) where shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

B. Accompanying the product data, submit 8” x 10” or larger samples of the full range of colors and patterns available in the plastic-coated wall panels, plus 12” or longer samples of colors and patterns available in the moldings.

PRODUCTS

2.1 FIBERGLASS REINFORCED PANELS

A. Provide fiberglass reinforced panels, Marlite Artizan FRP with Sani-coat. Panolam RFP, or equal.

1. Color as selected from manufacturer’s standard or as specified on the Drawings.
2. Texture: Pebble Smooth.
3. Fire Rating: Class A.
4. Size: 4’x8’, 4’x9’, 4’x10’ or as required for design applications.

2.2 MOLDINGS

A. Extruded PVC trim; color to match panels.

B. Outside Corner Guard: PVC color to match panel.

2.3 ACCESSORIES

A. Fasteners: Non-staining nylon drive rivets to match panel color.

B. Adhesive: By manufacturer.

C. Sealant: Color matching by manufacturer.

2.4 OTHER MATERIALS

A. Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Architect.

EXECUTION

3.1 PREPARATION

A. Examine backup surfaces to determine that corners are plumb and straight, surfaces are smooth, uniform, clean and free from foreign matter, nails countersunk, joints and cracks filled flush and smooth with the adjoining surface.

1. Verify that stud spacing does not exceed 24 inch on-center.

B. Repair defects prior to installation.

1. Level wall surfaces to panel manufacturer's requirements. Remove protrusions and fill indentations.

3.2 INSTALLATION

A. Comply with manufacturer's recommended procedures and installation sequence.

B. Cut sheets to meet supports allowing 1/8" (3mm) clearance for every 8 foot (2.43m) of panel.

1. Cut and drill with carbide tipped saw blades or drill bits or cut with shears.

2. Pre-drill fastener holes 1/8" (3.175 mm) oversize with high speed drill bit.

a. Space at 8" (20.32 cm) maximum on-center at perimeter, approximately 1" from panel edge.

b. Space at in field in rows 16 inches (40.64 cm) on-center, with fasteners spaced at 12" (30.48 cm) maximum on-center.

C. Apply panels to board substrate, above base vertically oriented with seams plumb and pattern aligned with adjoining panels.

1. Install panels with manufacturer's recommended gap for panel field and corner joints.

a. Adhesive trowel and application method to conform to adhesive manufacturer's recommendations.

b. Drive fasteners for snug fit. Do not over-tighten.

D. Apply panel moldings to all panel edges using silicone sealant providing for required clearances.

1. All moldings must provide for a minimum 1/8" (3.18 cm) of panel expansion at joints and edges, to insure proper installation.

2. Apply sealant to all moldings, channels and joints between the system and different materials to assure watertight installation.

3.3 CLEANING

A. Remove excess sealant from panels and moldings. Wipe panel down using a damp cloth and mild soap solution or cleaner.

B. Refer to manufacturer's specific cleaning recommendations. Do not use abrasive cleaners.

END OF SECTION 09 77 20

GENERAL

1.1 SUMMARY

A. Provide painting as shown on the Finish Schedule in the Drawings and specified herein. The type of material to be used and the number of coats to be applied are listed in the "Painting Schedule" under Execution in this Section of these Specifications. The term "paint", as used herein, included enamels, epoxies, paints, sealers, fillers, emulsions, and other coatings, whether used as prime, intermediate, or finish coats.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 INDOOR AIR POLLUTANT CONTROL REQUIREMENTS

A. VOC Limits

1. Architectural paints and coatings shall comply with VOC limits in Table 1 of the ARB Architectural Coatings Suggested Control Measure, as shown in Table 5.504.4.3 of the 2016 California Green Building Standards Code, unless more stringent local limits apply.

2. The VOC content limit for coatings that do not meet the definitions for the specialty coatings categories listed in Table 5.504.4.3 shall be determined by classifying the coating as a Flat, Nonflat or Nonflat-High Gloss coating, based on its gloss, as defined in Subsections 4.21, 4.36 and 4.37 of the 2007 California Air Resources Board, Suggested Control Measure, and the corresponding Flat, Nonflat or Nonflat-High Gloss VOC limit in Table 5.504.4.3 shall apply.

B. Aerosol Paints and Coatings

1. Aerosol paints and coatings shall meet the PWMIR Limits for ROC in Section 94522(a)(3) and other requirements, including prohibitions on use of certain toxic compounds and ozone depleting substances, in Sections 94522(c)(2) and (d)(2) of *California Code of Regulations*, Title 17, commencing with Section 94520; and in areas under the jurisdiction of the Bay Area Air Quality Management District additionally comply with the percent VOC by weight of product limits of Regulation 8 Rule 49.

1.5 MOCK-UPS

A. Mockups: Full-coat finish Sample of each type of coating, color, and substrate, applied where directed.

1.6 PROJECT CONDITIONS

A. The General Contractor is responsible to ensure all materials used in this Section meet current California V.O.C. (volatile organic compounds/chemicals) Regulations. The Architect shall be immediately notified of all V.O.C. conflicts. Work shall not proceed until conflicts are resolved.

1.7 EXTRA STOCK

A. Upon completion of this portion of the Work, deliver to the Owner an extra stock of one gallon of each color and gloss used in each coating material used, with all such extra stock tightly sealed in clearly labeled containers.

PRODUCTS

2.1 PAINT MATERIALS

A. Manufacturer

1. All paint materials selected for coating systems for each type of surface shall be the product of a single manufacturer.

2. Paint materials listed herein, unless otherwise designated in the "Painting Schedule", are the product of Benjamin Moore and require no further approval as to manufacturer or catalog number.

3. Equivalent products of other major paint manufacturers may be used subject to approval by the Architect of the materials list and manufacturers' recommendations required to be submitted under Article 1.3 above. Equivalent product manufacturers must provide a manufacturers product reference guide demonstrating the equivalence of the product substituted to the one specified.

B. Compatibility

1. All paint materials and equipment shall be compatible in use; finish coats shall be compatible with prime coats; prime coats shall be compatible with the surface to be coated; all tools and equipment shall be compatible with the coating to be applied.

2. Thinners, when used, shall be only those thinners recommended for that purpose by the manufacturer of the material to be thinned.

C. Colors and glosses

1. All colors and glosses shall be indicated on the Painting Schedule and Finishes Schedule.

EXECUTION

3.1 PREPARATION OF SURFACES, GENERAL

A. Prior to all surface preparation and painting operations, completely mask, remove or otherwise adequately protect all hardware, accessories, machined surfaces, plates, lighting fixtures, and similar items in contact with painted surfaces but not scheduled to receive paint.

B. Spot prime all exposed nails and other metals which are to be painted with emulsion paints, using a primer recommended by the manufacturer of the coating system.

C. Before applying paint or other surface treatment, thoroughly clean all surfaces involved. Schedule all cleaning and painting so that dust and other contaminants from the cleaning process will not fall on wet, newly painted surfaces.

3.2 PREPARATION OF WOOD SURFACES

A. Clean all wood surfaces until they are free from dirt, and all other foreign substance.

B. Unless specifically noted to be left rough, smooth all finished wood surfaces exposed to view, using the proper sandpaper. Where so required, use varying degrees of coarseness in sandpaper to produce uniformly smooth and unmarred wood surfaces.

C. Knots

1. On small, dry, seasoned knots, thoroughly scrape and clean the surface and apply one coat of good quality knot-sealer before application of the priming coat.
2. On large, open, unseasoned knots, scrape off all pitch and thoroughly clean the area, followed by an application of one coat of good quality knot-sealer.
3. Remove and treat all pitch surfaces as required for large knots.

D. Dryness

1. Unless specifically approved by the Architect, do not proceed with the painting of wood surfaces until the moisture content of the wood is 12% or less as measured by a moisture-meter approved by the Architect.

3.3 PREPARATION OF METAL SURFACES

A. Galvanized metal

1. Clean all surfaces thoroughly with solvent until they are completely free from dirt, soil, and grease.
2. Thoroughly treat the cleaned surface with phosphoric acid etch.
3. Remove all excess etching solution and allow to dry completely before application of paint.

B. Other metals

1. Thoroughly clean all surfaces until they are completely free from dirt, oil, grease and old paint.
2. Allow to dry thoroughly before application of paint.

3.4 PAINT APPLICATION

A. General

1. Paint all surfaces, except glass, flat concrete, and similar items, not prefinished and not called out as unfinished.
2. Paint all grilles and other prefinished items where the factory prefinish is not in accordance with the Painting Schedule and color selection or where a prefinished item is not the same color as the adjacent surface. Paint to match adjacent surface.

B. Drying

1. Allow sufficient drying time between coats.
2. Modify the period as recommended by the material manufacturer to suit adverse weather conditions.

C. Environmental conditions

1. Comply with the manufacturer's recommendations as to environmental conditions under which the coating systems may be applied.
2. Do not apply paint in areas where dust is being generated.

D. Defects

1. Sand and dust between coats to remove all defects visible to the unaided eye from a distance of five feet.

E. Color of undercoats

1. Slightly vary the color of succeeding coats.

3.5 INSPECTION

A. Do not apply additional coats until completed coat has been inspected and approved by the Architect.

B. Only inspected and approved coats of paint will be considered in determining the number of coats applied.

3.6 RE-INSTALLATION OF REMOVED ITEMS

A. Following completion of painting in each space, promptly reinstall all items removed for painting, using only workmen skilled in the particular trade.

3.7 CLEANING UP

A. During progress of the Work, do not allow the accumulation of empty containers or other excess items except in areas specifically set aside for that purpose. Prevent accidental spilling of paint materials and, in event of such spill, immediately remove all spilled material and the waste or other equipment used to clean up the spill, and wash the surfaces to their original undamaged condition, all at no additional cost to the Owner.

B. Upon completion of this portion of the Work visually inspect all surfaces and remove all paint and traces of paint from surfaces not scheduled to be painted.

3.8 PAINTING SCHEDULE

Apply the following finishes to the areas designated:

Exterior Wood, Satin

First Coat:	Benjamin Moore	166 SuperSpec Busan Primer
Second Coat:	Benjamin Moore	634 Aura Exterior Low Lustre
Third Coat:	Benjamin Moore	634 Aura Exterior Low Lustre

Exterior Metal (Galvanized), Semi-Gloss

First Coat:	Benjamin Moore	P04 Acrylic Metal Primer
Second Coat:	Benjamin Moore	632 Aura Exterior Semi-Gloss
Third Coat:	Benjamin Moore	632 Aura Exterior Semi-Gloss

Interior Metal (Ferrous), Semi-Gloss

First Coat:	Benjamin Moore	P04 Acrylic Metal Primer Or P06 Alkyd Metal Primer
Second Coat:	Benjamin Moore	528 Aura Interior Semi-Gloss
Third Coat:	Benjamin Moore	528 Aura Interior Semi-Gloss

Interior Drywall, Satin

First Coat:	Benjamin Moore	253 SuperSpec Latex Primer Sealer
Second Coat:	Benjamin Moore	524 Aura Interior Eggshell
Third Coat:	Benjamin Moore	524 Aura Interior Eggshell

Interior Drywall, Semi-Gloss

First Coat:	Benjamin Moore	253 SuperSpec Latex Primer Sealer
Second Coat:	Benjamin Moore	528 Aura Interior Semi-Gloss
Third Coat:	Benjamin Moore	528 Aura Interior Semi-Gloss

Exterior Brick

First Coat: ProSoCo Stand Off SLX100 Oil and Water Repellent
Or Benjamin Moore P27 Clear Acrylic Sealer

Exterior CMU, Satin

First Coat:	Benjamin Moore	206 Super Spec Masonry Hi-Build Block Filler
Second Coat:	Benjamin Moore	634 Aura Exterior Low Lustre
Third Coat:	Benjamin Moore	634 Aura Exterior Low Lustre

Interior Wood Stain

First Coat:	Benjamin Moore	236 Benwood Wood Conditioner/ 238 Wood Grain Filler
Second Coat:	Benjamin Moore	205 Benwood Waterborne Stain
Third Coat:	Benjamin Moore	423 Stays Clear Acrylic Urethane Low Lustre
*Fourth Coat:	Benjamin Moore	423 Stays Clear Acrylic Urethane Low Lustre

END OF SECTION 09 91 00

GENERAL

1.1 SUMMARY

A. Provide and install linoleum bulletin board where shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

PRODUCTS

2.1 LINOLEUM BULLETIN BOARD

A. Linoleum bulletin boards are shown on the Drawings. Provide linoleum resilient homogeneous surface material with natural jute backing, applied to wall with manufacturer's adhesive.

B. Acceptable Products

1. Linoleum Bulletin Board by Forbo Industries, 1/4" gauge, 72" width. Fax 570/450-0258.

2.2 OTHER MATERIALS

A. Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Architect.

B. Aluminum Trim: A604-4 Panel Trim in satin aluminum finish by Hoskin & Muir, Inc. www.prohmi.com.

C. Adhesives to substrate shall be per manufacturer's recommendations.

1. Per Table 5.504.4.1 of the 2019 California Green Building Standards Code, adhesives, sealants and caulks used on the project shall meet the requirements of the following standards:

a. Adhesives, adhesive bonding primers adhesive primers, sealants, sealant primers and caulks shall comply with local or regional air pollution control or air quality management district rules where applicable, or SCAQMD Rule 1168 VOC limits, as shown in Tables 5.504.4.1 and 5.504.4.2 of the 2010 California Green Building Standards Code. Such products also shall comply with the Rule 1168 prohibition on the use of certain toxic compounds (chloroform, ethylene dichloride, methylene chloride, perchloroethylene and trichloroethylene).

EXECUTION

3.1 SURFACE CONDITIONS

A. Examine the areas and conditions under which work of this Section will be performed. Correct conditions detrimental to timely and proper completion of the Work. Do not proceed until unsatisfactory conditions are corrected.

3.2 INSTALLATION

A. Securely install the approved adhesive products in accordance with the manufacturer's recommendations as approved by the Architect, setting panels straight, plumb, level, and true to the lines and levels shown on the Drawings, attached to the walls with the specified adhesive.

END OF SECTION 10 11 46

GENERAL

1.1 SUMMARY

A. Provide and install all signage as shown on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1. Product Data: Manufacturer's printed product data for each signage system indicated in this section.
2. Comprehensive Signage Plan indicating all signs and signage systems to be installed on the Project cross-referenced to Fabrication Drawings.
3. Fabrication Drawings for all signs and signage components.
4. Samples: Verification samples of signage systems minimum of 6 inches square of each type and color indicated.
5. Installation Drawings and Details

1.4 REGULATORY REQUIREMENTS:

A. Comply with applicable provisions in the U.S. Architectural & Transportation Barriers Compliance Board's ADA-ABA Accessibility Guidelines, ANSI A117.1, and State of California Building Code (CBC), latest editions.

B. VOC Limitations: adhesives shall comply with South Coast Air Quality Management District (SCAQMD) Rule #1168.

1.5 CAMPUS STANDARDS

A. All signage shall comply with UC DAVIS BUILDING SIGN PROGRAM document dated July 2014.

1.6 WARRANTY

A. Manufacturer's standard lifetime warranty against material and manufacturing defects

PART 2 – PRODUCTS

2.1 INTERIOR PANEL SIGNS

A. Basis of Design:

InPro SignScape, InPro Corporation

PO Box 406, Muskego, WI 53150 USA

Telephone 800-222-5556, Fax: 888-715-8407

E-mail: service@inprocorp.com

B. Provide all signage systems from a single manufacturer.

C. Materials and Production Style

1. Tactile (Raised Letter)
    a. Provide rigid vinyl sign material consisting of .040” sheet bonded with .060” sheet backed with 6mm white or black foam pvc panel. Top layer is cut and assembled to create signage.
2. Partial Inlay (Tamper Resistant Tactile Signage)
    a. Provide rigid vinyl sign material consisting of .060” sheet bonded to 6mm white or black foam pvc panel that is engraved to receive .060” material. Top layer of .060” sheet is cut and assembled to create signage.
3. Printed Sign Panels
    a. Provide sign panels that are digitally printed with exterior grade UV curable inks. Panels may be first or second surface printed.
    b. Panel materials and thicknesses:
        (1) 1/16” Clear PETG, adhered to 10mm white foamed PVC backing
        (2) Maximum panel size 4’ x 8’.
4. Grade 2 Braille
    a. Provide Grade 2 Braille produced with the RasterTM Method, patented process for placing Braille on signage. RasterTM Braille is computer engineered using a carbide-engraving bit, press-fit tool with vacuum pump and UV stable acrylic rasters.

D. Sign Shapes and Sizes
1. Provide restroom signs with the following characteristics:
    a. Women: 12” diameter circle.
    b. Men: Equilateral triangle with 12” long edges and vertex pointing upward.
    c. Unisex: Equilateral triangle superimposed within a 12” diameter circle.
2. Other signs as detailed on the Drawings

2.2 DIMENSIONAL CHARACTERS

A. Flat-cut ½” thick aluminum characters, factory painted in color selected by Architect, spacer stud mounted, height and font per Drawings, Gemini Sign Products, or equal.

PART 3 – EXECUTION

3.1 INSTALLATION

A. Examine areas and conditions in which the signage system will be installed.
1. Complete all finishing operations, including painting, before beginning installation of signage systems.
2. Wall surface shall be dry and free from dirt, grease and loose paint.

3.2 PREPARATION

A. General: Prior to installation, clean substrate to remove dust, debris and loose particles.

3.3 INSTALLATION

A. General: Locate the signage system as indicated on the approved detail drawing for the appropriate substrate and in compliance with manufacturer’s installation instructions. Install signage systems level and plumb at the height indicated on the drawings.

3.4 CLEANING

A. At completion of the installation, clean surfaces in accordance with manufacturer's clean up and maintenance instructions.

END OF SECTION 10 14 00

GENERAL

1.1 SUMMARY

A. Provide and install Solid Color Reinforced Composite (SCRC) Substrate toilet compartments as shown on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1.4 QUALITY ASSURANCE

A. Manufacturer Qualifications: Minimum 10-year experience manufacturing similar products.

B. Installer Qualifications: Minimum 2-year experience installing similar products.

C. Single Source Requirements: To the greatest extent possible provide products from a single manufacturer.

D. Accessibility Requirements: Comply with requirements applicable in the jurisdiction of the project, including but not limited to ADA and ICC/ANSI A117.1 requirements as applicable.

E. Mock-Up: Provide a mock-up for evaluation of surface preparation techniques and application workmanship.

1. Finish areas designated by Architect.
2. Do not proceed with remaining work until workmanship is approved by Architect.
3. Refinish mock-up area as required to produce acceptable work.

1.5 PRE-INSTALLATION MEETINGS

A. Convene minimum two weeks prior to starting work of this section.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store products in manufacturer's unopened packaging bearing the brand name and manufacturer's identification until ready for installation.

B. Handling: Handle materials to avoid damage.

1.7 PROJECT CONDITIONS

A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's recommended limits.

1.8 SEQUENCING

A. Ensure that products of this section are supplied to affected trades in time to prevent interruption of construction progress.

1.9 WARRANTY

A. Manufacturer's Warranty: Manufacturer's standard 25-year limited warranty for panels, doors, and stiles against breakage, corrosion, delamination, and defects in factory workmanship. Manufacturer's standard 1-year guarantee against defects in material and workmanship for stainless steel door hardware and mounting brackets.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: Bobrick Washroom Equipment, Inc., which is located at: 6901 Tujunga Ave.; North Hollywood, CA 91605-6213; Tel: 818-764-1000; Fax: 818-765-2700; Email:info@bobrick.com; Web:www.bobrick.com

B. Basis of Design Products: Based on the quality and performance requirements of the project, specifications are based solely on the products of Bobrick Washroom Equipment, Inc. www.bobrick.com. Location of manufacturing shall be the United States.

C. Substitutions: The Architect will consider products of comparable manufacturers as a substitution, pending the Contractor's submission of adequate documentation of the substitution in accordance with procedures in Division 1 of the Project Manual. Documentation shall include a list of five similar projects of equivalent size where products have been installed for a minimum of two years, and manufacturer's certification that products are fabricated in the United States.

D. Requests for substitutions will be considered in accordance with provisions of Section 01 60 00 - Product Requirements.

2.2 SOLID COLOR REINFORCED COMPOSITE (SCRC) SUBSTRATE

A. Solid Color Reinforced Composite (SCRC) Toilet Partitions

1. Design Type

a. Standard Height

(1) Door/Panel Height: 58 inches (147 cm).

(2) Floor Clearance: 12 inches (30 cm).

b. Maximum Height

(1) Door/Panel Height: 72 inches (183 cm).

(2) Floor Clearance: 4 inches (10 cm).

2. Privacy Style Partitions: No sightlines with gap-free interlocking doors and stiles routed 0.300 inches (7.6 mm) from the edge to allow for 0.175 inch (4.4 mm) overlap to prevent line-of-sight into the toilet compartment. Privacy strips fastened or adhered onto the partition material are not acceptable.

3. Mounting

a. Floor-mounted, overhead-braced with satin finish, extruded anodized aluminum headrails, 0.065 inch (1.65 mm) thick with anti-grip profile.

(1) Stile Maximum Height: 83 inches (211 cm).

B. Materials: Solid color reinforced composite (SCRC) material for stiles, panels, doors, and screens with Bobrick Graffiti Off coating, thermoset and integrally fused into homogenous piece; high density polyethylene (HDPE), high density polypropylene not acceptable.

1. Composition: Dyes, organic fibrous material, and polycarbonate/phenolic resins.

2. Surface Treatment: Non-ghosting, graffiti resistant surface integrally bonded to core through a manufacturing steps requiring thermal and mechanical pressure.
3. Edges: Same color as the surface.
4. Color: As selected by Architect from manufacturer's standard range

C. Performance Requirements
1. Graffiti Resistance (ASTM D 6578): Passed cleanability test; 5 staining agents.
2. Scratch Resistance (ASTM D 2197): Maximum load value exceeds 10 kilograms.
3. Impact Resistance (ASTM D 2794): Maximum impact force exceeds 30 inch-pounds.
4. Smoke Developed Index (ASTM E 84): Less than 450.
5. Flame Spread Index (ASTM E 84): Less than 75.
6. National Fire Protection Association/International Building Code Interior Wall and Ceiling Finish: Class B.
7. Uniform Building Code: Class II.

D. Finished Thickness
1. Stiles and Doors: 3/4 inch (19 mm).
2. Panels and Screens: 1/2 inch (13 mm).

E. Stiles: Floor-anchored stiles furnished with expansion shields and threaded rods
1. Leveling Devices: 7-gauge, 3/16 inches (5 mm) thick, corrosion-resistant, chromate-treated, double zinc-plated steel angle leveling bar bolted to stile; furnished with 3/8 inch (10 mm) diameter threaded rods, hex nuts, lock washers, flat washers, spacer sleeves, expansion anchors, and shoe retainers.
2. Stile Shoes: One-piece, 22-gauge (0.8 mm), 18-8, Type 304 stainless steel, 4-inch (102 mm) height; tops with 90 degree return to stile. One-piece shoe capable of adapting to 3/4-inch (19 mm) or 1-inch (25 mm) stile thickness and capable of being fastened (by clip) to stiles starting at wall line.

F. Wall Posts: Pre-drilled for door hardware, 18-8, Type 304, 16-gauge (1.6 mm) stainless steel with satin finish; 1-inch (25 mm) x 1-1/2 inches (38 mm) x 58 inches high (1473 mm)

G. Anchors: Expansion shields and threaded rods at floor connections as applicable. Threaded rods secured to supports above ceiling as applicable. Supports above ceiling furnished and installed as Work of Section 05 50 00 - Metal Fabrications.

H. Hardware: Chrome-plated "Zamak", aluminum, extruded plastic hardware not acceptable.
1. Compliance: Operating force of less than 5 lb. (2.25 kg).
2. Emergency Access: Hinges, door latch allow door to be lifted over keeper from outside compartment on inswing doors.
3. Materials: 18-8, Type 304, heavy-gauge stainless steel with satin finish.
4. Doorstops: Prevents in swinging doors from swinging out beyond stile; on outswing doors, doorstop prevents door from swinging in beyond stile.
5. Fastening: Hardware secured to door and stile by through-bolted, theft-resistant, pin-in-head Torx stainless steel machine screws into factory-installed, threaded brass inserts. Fasteners secured directly into core not acceptable.

a. Threaded Brass Inserts: Factory-installed; withstand direct pull force exceeding 1500 lb. (680 kg) per insert.

6. Clothes Hooks: Projecting no more than 1-1/8 inch (29 mm) from face of door.
7. Door Latch: Track of door latch prevents inswing doors from swinging out beyond stile; on outswing doors, door keeper prevents door from swinging in beyond stile; 16-gauge (1.6 mm) sliding door latch, 14-gauge (2 mm) keeper.
8. Locking: Door locked from inside by sliding door latch into keeper.
9. Hinge Type
   a. Standard
      (1) Balanced, with field-adjustable cam to permit door to be fully closed or partially open when compartment is unoccupied.
   b. Full-Height Institutional Hinge
      (1) Hinges: 16 gauge (1.6 mm) stainless steel, self-closing, 3 section hinges.
10. Mounting Brackets
    a. Standard Concealed
       (1) Mounting Brackets: Mounted inside compartment; exposed brackets on exterior of compartment not acceptable with the exception of outswing doors.
    b. Full-Height
       (1) Mounting Brackets: 18 gauge (1.2 mm) stainless steel and extend full height of panel.
       (2) U-Channels: Secure panels to stiles.
       (3) Angle Brackets: Secure stiles-to-walls and panels to walls.

EXECUTION

3.1 PREPARATION

A. Prepare substrates including but not limited to blocking and supports in walls and ceilings at points of attachment using methods recommended by the manufacturer for achieving the best result for the substrates under the project conditions.
   1. Inspect areas scheduled to receive compartments for correct dimensions, plumbness of walls, and soundness of surfaces that would affect installation of mounting brackets.
   2. Verify spacing of plumbing fixtures to assure compatibility with installation of compartments.

B. If preparation is the responsibility of another installer, notify Architect in writing of deviations from manufacturer's recommended installation tolerances and conditions.

C. Do not proceed with installation until substrates have been properly prepared with blocking and supports in walls and ceilings at points of attachment and deviations from manufacturer's recommended tolerances are corrected. Commencement of installation constitutes acceptance of conditions.

3.2 INSTALLATION

A. Install products in strict compliance with manufacturer's written instructions and recommendations, including the following:

1. Verify blocking and supports in walls and ceilings has been installed properly at points of attachment.
2. Verify location does not interfere with door swings or use of fixtures.
3. Use fasteners and anchors suitable for substrate and project conditions.
4. Install units rigid, straight, plumb, and level.
5. Conceal evidence of drilling, cutting, and fitting to room finish.
6. Test for proper operation.

3.3 ADJUSTING, CLEANING, AND PROTECTION

A. Adjust hardware for proper operation after installation. Set hinge cam on in-swinging doors to hold doors open when unlatched. Set hinge cam on out-swinging doors to hold unlatched doors in closed position.

B. Touch-up, repair or replace damaged products.

C. Clean exposed surfaces of compartments, hardware, and fittings.

END OF SECTION 10 21 13 .19

GENERAL

1.1 SUMMARY

A. Provide and Install toilet accessories as shown on the Toilet Accessories Schedule on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

PRODUCTS

2.1 MATERIALS

A. Stainless Steel: ASTM A 666, Type 304, No. 4 finish (satin), 0.0312-inch (0.8-mm) minimum nominal thickness unless otherwise indicated.

B. Brass: ASTM B 19, ASTM B 16 (ASTM B 16M), or ASTM B 30.

C. Aluminum: ASTM B 221 (ASTM B 221M), Alloy 6063-T6 or 6463-T6.

D. Sheet Steel: ASTM A 1008/A 1008M, 0.0359-inch (0.9-mm) minimum nominal thickness.

E. Galvanized-Steel Sheet: ASTM A 653/A 653M, G60 (Z180).

F. Chromium Plating: ASTM B 456, Service Condition Number SC 2 (moderate service).

G. Baked-Enamel Finish: Factory-applied, gloss-white, baked-acrylic-enamel coating.

H. Tempered Glass: ASTM C 1048, Kind FT (fully tempered).

I. Mirrors: ASTM C 1503, Mirror Glazing Quality, clear-glass mirrors, nominal 6.0 mm thick.

J. Galvanized-Steel Mounting Devices: ASTM A 153/A 153M, hot-dip galvanized after fabrication.

K. Fasteners: Screws, bolts, and other devices of same material as accessory unit, tamper and theft resistant when exposed, and of galvanized steel when concealed.

L. Keys: Provide universal keys for internal access to accessories for servicing and resupplying. Provide minimum of six keys to Architect.

2.2 TOILET ACCESSORIES

A. Basis of design shall be Bobrick. All toilet accessories shall be as scheduled on the Drawings.

2.3 FASTENINGS

A. All toilet accessories shall be complete with all required fastenings for installation on the wall surface and structure to be mounted to, and all fastenings shall harmonize with the item being fastened.

EXECUTION

3.1 INSTALLATION

A. Install all toilet accessories where indicated on the Drawings and in full accordance with the manufacturer's recommendations, anchoring all components fully in place for long life under hard use.

B. Install accessories using fasteners appropriate to substrate indicated and recommended by unit manufacturer. Install units level, plumb, and firmly anchored in locations and at heights indicated.

C. Install grab bars to withstand a downward load of at least 250 lbf (1112 N), when tested according to method in ASTM F 446.

D. Adjust accessories for unencumbered, smooth operation and verify that mechanisms function properly. Replace damaged or defective items. Remove temporary labels and protective coatings.

END OF SECTION 10 28 00

GENERAL

1.1 SUMMARY:

A. Provide and install manufactured direct vent gas fireplace as detailed on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS:

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 REFERENCES

A. ANSI Z233/ NFPA 54 – National Fuel Gas Code.

B. ANSI/NFPA 70 - National Electric Code.

C. California Mechanical Code, latest adopted edition.

D. California Electric Code, latest adopted edition.

1.5 DESIGN / PERFORMANCE REQUIREMENTS

A. Appliances are CSA marked as Certified to US Standard CLASS 2901 04 - DOMESTIC HEATERS (GAS) Vented Fireplace

B. Direct Vent appliances shall be electrically grounded in accordance with the local codes or, in the absence of local codes, with National Electric code, ANSI/NFPA 70.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store products in accordance with the manufacturer's instructions. Store indoors in manufacturer's unopened packaging until ready for installation.

1.7 WARRANTY

A. Provide the manufacturer's product body and firebox 10 Year Limited Warranty and the ceramic glass 5 Year limited warranty against thermal breakage.

PRODUCTS

2.1 MANUFACTURERS

A. Basis of Design: ORTAL USA, Inc., which is located at: 8421 Canoga Ave.; Canoga Park, CA 91304; Tel: 818-238-7000; Fax: 818-678-0541; Email: request info (info@ortalheat.com); Web: www.ortalheat.com

B. Requests for substitutions will be considered in accordance with provisions of Section 01 25 00 – Product Options & Substitutions.

2.2 MANUFACTURED DIRECT VENT GAS FIREPLACES

A. Model: Corner 75 LS

1. Glass Viewing Area

a. Front: 30-15/16" wide x 18-7/8" high

b. Left Side: 16-3/16" wide x 18-7/8" high

2. Heat Barrier:

a. Double Glass: Double pane glass with fan assistance (ceramic inner, tempered outer). Requires air intake below the firebox.

3. Maximum Heat Output (BTU) NG: 29,100

4. Efficiency NG: 77.8 percent

5. Heat Release: Required, 124 square inches of net free air space

6. Air Intake: 124 square inches of net free air space

7. Vent Pipe

a. UL listed 4x6 co-axial direct vent pipe (4” interior, 6-5/8” exterior)

(1) Olympia (“Ventis” line) or equal, with rain cap

(2) Coordinate vent pipe termination with chimney shroud specified in Section

8. Decorative Media:

a. Aspen Log Set

b. Large Gray Stones

9. Interior:

a. Standard matte black interior finish (no interior panels).

10. Controls: With on/off, temperature, flame height operation.

a. Wall Switch.

EXECUTION

3.1 EXAMINATION

A. Do not begin installation until substrates have been properly prepared.

B. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

3.2 PREPARATION

A. Clean surfaces thoroughly prior to installation.

B. Framing and openings must be completed before starting installation. Consult manufacturer Installation Manual for clearance, framing, and installation details.

C. Electrical wiring and gas supply line must be completed before installation of the firebox. Consult manufacturer Installation Manual for electrical and gas requirements.

D. Prepare openings using the recommendations of the manufacturer for achieving the best result for the under the project conditions.

3.3 INSTALLATION

A. Install in accordance with manufacturer's instructions, ANSI Z223.1/NFPA 54, California Mechanical Code, California Electric Code, and the requirements of authorities having jurisdiction.

B. Use manufacturer's guidelines for minimum clearances to combustibles, walls, and finishes.

C. Upon completion of installation, visually inspect all exposed surfaces. Touch up scratches and abrasions with touch up paint recommended by the manufacturer.

3.4 DEMONSTRATION

A. Demonstrate the operation and control of the installed unit to the Owner after completion of the Work.

3.5 PROTECTION

A. Protect installed products until completion of project.

B. Touch-up, repair or replace damaged products before Substantial Completion.

END OF SECTION 10 31 00

GENERAL

1.1 SUMMARY

A. Provide and install hand portable fire extinguishers and metal cabinets as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

B. Provide literature and/or drawings of fire extinguisher cabinets including lettering, colors and finish.

PRODUCTS

2.1 FIRE EXTINGUISHERS

A. All fire extinguishers shall have a minimum UL rating of 2A:10BC and shall be Potter-Roemer Inc., Model #3005, or an equal approved in advance by the Architect.

2.2 CABINETS

A. Type and style

1. All fire extinguisher cabinets shall be metal, semi-recessed sized to fit within the partition or wall depth.

B. Finish

1. All fire extinguisher cabinets shall be Oxidized Brass finish.

C. Manufacturers

1. Design is based on Potter Roemer Inc.

a. Model 7072 Semi-Recessed

b. 3903 Wall Mounted Bracket

2. All fire extinguisher cabinets shall be the products of the same manufacturer and shall be the ones upon which design was based, or an equal approved in advance by the Architect.

3. All fire extinguisher cabinets must be approved for use by local fire department.

2.3 MOUNTING BRACKETS

A. Manufacturer’s steel, designed to secure fire extinguishers to wall or structure, of sizes required for fire extinguishers indicated, with plated or baked enamel finish.

EXECUTION

3.1 SURFACE CONDITIONS

A. Coordinate with all other trades as required to ensure proper and adequate provision in framing and wall covering for the installation of the recessed cabinets in the locations required.

B. Prior to installation, inspect all cabinet recesses and verify that all necessary provisions have been made. In the event of discrepancy, immediately notify the Architect. Do not proceed with installation in areas of discrepancy until all such discrepancies have been fully resolved.

3.2 INSTALLATION

A. Install the firefighting devices where indicated on the Drawings and in full accordance with all pertinent regulations and the manufacturer's recommendations, setting the top of the cabinet as shown on the Drawings, anchoring all components firmly in place for long life under hard use.

3.3 SERVICE

A. Determine the approximate completion date of the Work and then inspect, charge, and tag the fire extinguishers at a date not more than ten days before actual completion date of the work.

END OF SECTION 10 44 13

GENERAL

1.1 DESCRIPTION

A. Provide and install kitchen appliances as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

1.4 REGULATORY REQUIREMENTS

A. Comply with provisions of the following product certifications:

1. NFPA: Provide electrical appliances listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

2. UL and NEMA: Provide electrical components required as part of residential appliances that are listed and labeled by UL and that comply with applicable NEMA standards.

3. ANSI: Provide gas-burning appliances that comply with ANSI Z21 Series standards.

4. NAECA: Provide residential appliances that comply with NAECA standards.

1.5 ACCESSIBILITY

A. Where residential appliances are indicated to comply with accessibility requirements, comply with ANSI A117.1 and the latest edition of the California Building Code (CBC).

1.6 ENERGY RATINGS

A. Provide appliances that qualify for the EPA/DOE ENERGY STAR product labeling program.

PRODUCTS

2.1 DISHWASHER

A. ASKO Model DBI663IS 30 series stainless steel, or equal.

EXECUTION

3.1 COORDINATION

A. Coordinate all interface requirements for electrical and mechanical connections in a timely manner to permit orderly progress of the Work.

3.2 INSTALLATION

A. General: Install the kitchen equipment in strict accordance with the manufacturer's recommendations, the approved Shop Drawings, the original design, and all pertinent codes and regulations, anchoring all components securely, level and plumb.

B. Inspection: Upon completion of the installation, put all operable components through at least two complete operating cycles and verify that all components are properly adjusted and working in accordance with their design intent.

C. Verify that accessories required have been furnished and installed.

D. Touch-up: Touch up all scratches and abrasions to be completely invisible to the unaided eye from a distance of five feet.

END OF SECTION 11 31 00

GENERAL

1.1 SUMMARY

A. Provide and install interior book return as shown on the Drawings and specified herein.

1.2 GENERAL REQUIREMENTS:

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 01 33 23 of these specifications.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store products in manufacturer's unopened packaging bearing the brand name and manufacturer's identification until ready for installation.

B. Handling: Handle materials to avoid damage.

1.5 PROJECT CONDITIONS

A. Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not install products under environmental conditions outside manufacturer's recommended limits.

PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturers: American Book Returns, part of the American Security Cabinets Family, or equal

2.2 PRODUCTS

A. Book Depositories: American Book Returns Model HCU Thru Wall

1. Construction: Steel, powder coated.
2. M810 Book Truck

EXECUTION

3.1 EXAMINATION

A. Do not begin installation until substrates have been properly prepared.

B. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

3.2 PREPARATION

A. Clean surfaces thoroughly prior to installation.

B. Prepare surfaces using the methods recommended by the manufacturer for achieving the best result for the substrate under the project conditions.

3.3 INSTALLATION

A. Install in accordance with manufacturer's instructions and in proper relationship with adjacent construction. Test for proper operation and adjust until satisfactory results are obtained.

3.4 PROTECTION

A. Protect installed products until completion of project.

END OF SECTION 11 51 00

GENERAL

1.1 SUMMARY

A. Provide and install manual roller window shades and accessories as shown on the Drawings and as specified herein.

1.2 GENERAL REQUIREMENTS

A. This Section shall be performed in accordance with the General Conditions, Supplementary Conditions and all Sections in Division 1 of these Specifications. These documents must be read with the other Contract Documents and Sections as a whole to complete the intent of the contract.

1.3 SUBMITTALS

A. Make submittals to the Architect in accordance with the provisions of Section 013323 of these specifications.

B. Product Data: Manufacturer's catalog data, product descriptions, installation instructions, detail sheets, and specifications for each type system specified.

C. Samples for Selection: Manufacturer's color chart or sample set.

D. Shop Drawings: Prepared specifically for this project; show dimensions and interface with other products.

1. Room schedule including field-verified dimensions of each opening to receive window shade systems.

2. Indicate System Series, fabric selection, and mounting type.

1.4 QUALITY ASSURANCE

A. Installer: Approved by manufacturer.

B. Provide manufacturer’s standard ten-year warranty.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver products to project site in manufacturer's original cartons.

B. Individually package and mark shades with room number and opening number.

C. Inspect the materials upon delivery to assure that specified products have been received.

D. Store and handle shades to prevent damage to fabrics prior to installation.

PRODUCTS

2.1 MANUFACTURERS

A. MechoShade Systems, Inc.; 42-03 35th, Long Island, NY 11101. Tel: (718) 729-2020, Fax: (718) 729-2941.

B. FlexShade System by Draper, Inc. 411 South Pearl Street, Spiceland IN 47385; phone (765) 987-7999, fax (765) 987-7142.

C. Substitutions: See Section 012500 - Product Requirements.

D. Provide all window shade systems from a single manufacturer.

2.2 MANUFACTURED UNITS

A. Single sunscreen shade cloth manually operated by bead chain. Install in SlimLine or Wide Bracket, as appropriate for application. Where multiple adjacent shadebands occur, provide SnapLoc Fascia to create the appearance of a continuous assembly. Where brackets are exposed, provide SnapLoc Fascia to conceal shade assembly. See Finish Schedule on the Drawings for fabric selection.

EXECUTION

3.1 INSTALLATION

A. Install window shade systems in accordance with manufacturer's instructions and these specifications.

B. Assume responsibility for all field dimensions and mounting surfaces.

C. Adjust window shade systems for proper operation.

END OF SECTION 12 24 13

PART 1 - GENERAL

1.01 CONDITIONS

A. The general provisions of the Contract, including General and Supplementary Conditions and General Requirements apply to the work specified in this Section.

1.02 DESCRIPTION

A. Work includes but is not limited to the following:

1. Furnish all labor, materials, tools, equipment, operation or methods listed, mentioned or scheduled on the Contract Documents and/or herein specified in this Section.

2. Although such Work is not specifically indicated, furnish and install all supplementary or miscellaneous items, appurtenances and devices incidental to or necessary for a sound, secure and complete installation.

3. Completely coordinate with work of all other trades.

1.03 QUALITY ASSURANCE

A. All products or items described herein shall be new, unless otherwise specified, and shall be from the specified manufacturer or approved equal. Products shall be complete in all respects, properly installed, and in perfect working order.

1.04 QUALIFICATION OF INSTALLER

A. Installer shall be thoroughly trained and experienced in the skills required and shall be completely familiar with the products and their installation as specified on the Contract Documents and in this Section. Installer shall be present at all times during progress of Work of this Section and shall direct all work performed.

1.05 COORDINATION

A. Contractor shall be charged with the responsibility of making arrangements for the coordination of his construction operations with those of all others on the job, and he shall permit other forces so engaged to accomplish their portion of the Work without undue interference or delay.

B. Contractor shall place order for all site furnishings and equipment immediately after award of bid to ensure adequate time for manufacturing, shipping and installation. If any materials or equipment are not ordered in time, additional costs made by equipment manufacturers to their equipment in time to meet construction schedule together with any special handling costs, shall be borne by the Contractor. **NO** project extension shall be granted due to improper lead time in ordering.

1.06 SUBMITTALS

A. Submit one (1) digital copy of manufacturer's catalog cuts off all products for Owner's Representative approval. Catalog cuts shall clearly identify product, finishes, color, schedule and installation.

B. All approvals must be granted prior to ordering product.

PART 2 - PRODUCTS

2.01 BENCHES

A. Provide bench, model: BH1880T, 6’-0” long Beacon Hill Thermory bench with back and arm rests. Color shall be Textured Pewter / Thermory.

Or approved equal.

Manufactured by:
Anova Furnishings
Contact: Bob Evans | (314)495-8357

2.02 PICNIC TABLE

A. Provide 42” square picnic table, model: BH1840T, Beacon Hill Thermory picnic table with four (4) seats with backs. Color shall be Textured Pewter / Thermory.

B. Provide 42” square picnic table, model: BH1830T, Beacon Hill Thermory picnic table with three (3) seats with backs. Color shall be Textured Pewter / Thermory.

Or approved equal.

Manufactured by:
Anova Furnishings
Contact: Bob Evans | (314)495-8357

2.03 TRASH RECEPTACLE

A. Provide 70-gallon dual receptacle/recycler, model: BH1870T, Beacon Hill Thermory with two 35-gallon plastic liners and rubber leveling feet. Color shall be Textured Pewter / Thermory.

B. Decals for each opening shall be:
   a. “Bottles/Cans” with recycling logo. Color: White
   b. “Trash”. Color: White

Or approved equal.

Manufactured by:
Anova Furnishings
Contact: Bob Evans | (314)495-8357

2.04 BIKE RACK

A. Provide circular bike rack, model: CIRBLEBR, circle shaped powder coated steel rack, surface mount. Color shall be black.

Or approved equal.

Manufactured by:
Anova Furnishings
Contact: Bob Evans | (314)495-8357

PART 3 - EXECUTION

3.01 INSTALLATION OF BENCHES

A. Locate benches as indicated on Contract Documents for Owner's Representative approval prior to installation.

B. Install items level and plumb.

C. Directly embed supports into concrete footing as detailed on the Contract Documents and in conformance with manufacturer's specifications.

3.02 INSTALLATION OF PICNIC TABLES

A. Locate benches as indicated on Contract Documents for Owner's Representative approval prior to installation.

B. Install items level and plumb on Decomposed Surface

C. Chain picnic tables as detailed on the Contract Documents and in conformance.

3.03 INSTALLATION OF TRASH RECEPTACLE

A. Locate picnic tables and benches as indicated on Contract Documents for Owner's Representative approval prior to installation.

B. Install items level and plumb.

C. Surface mount to concrete paving as detailed on the Contract Documents and in conformance with manufacturer's specifications. Contractor shall supply all hardware required for surface mounting.

3.04 PROTECTION

A. Adequately protect all work form damage by subsequent construction operations. Damaged work shall be replaced by Contractor and at Contractor's expense.

END OF SECTION 12 92 00

SECTION 22 05 00

BASIC MECHANICAL MATERIALS AND METHODS

PART 1 GENERAL

1.1 RELATED DOCUMENTS

A. The requirements of the GENERAL CONDITIONS, SUPPLEMENTAL CONDITIONS, and DIVISION 1, GENERAL REQUIREMENTS, apply to the work of this SECTION.

1.2 SUMMARY

A. This Section includes the following basic mechanical materials and methods to complement other DIVISION 22 & 23 sections.

1. Piping materials and installation instructions common to most piping systems.
2. Equipment nameplate data requirements.
3. Non-shrink grout for equipment installations.
4. Installation requirements common to equipment specification Sections.
5. Mechanical demolition.

B. Pipe and pipe fitting materials are specified in piping system Sections.

1.3 DEFINITIONS

A. Pipe, pipe fittings, and piping include tube, tube fittings and tubing.

B. Finished Spaces: Spaces other than mechanical and electrical equipment rooms, furred spaces, pipe and duct shafts, unheated spaces immediately below the roof, spaces above ceiling, un-excavated spaces, crawl spaces, and tunnels

C. Exposed Interior Installations: Exposed to view indoors. Examples include finished occupied spaces and mechanical equipment rooms.

D. Exposed Exterior Installations: Exposed to view outdoors, or subject to outdoor ambient temperatures and weather conditions. Examples include rooftop locations.

E. Concealed Interior Installations: Concealed from view and protected from physical contact by building occupants. Examples include above ceilings and in duct shafts.

F. Concealed Exterior Installations: Concealed from view and protected from weather conditions and physical contact by building occupants, but subject to outdoor ambient temperatures. Examples include installations within unheated shelters.

1.4 SUBMITTALS

A. Product Data: Submit PDF copies of the manufacturer’s technical product data and installation instructions for each type of material listed in this SECTION. Receive written approval prior to ordering.

B. Maintenance Data: Submit PDF copies of maintenance data and replacement material lists for each type of material listed in this section. Include this data and product data in maintenance manual.

1.5 QUALITY ASSURANCE

A. Quality welding processes and operators for structural steel according to AWS D1.1 “Structural Welding Code – Steel.”

B. Qualify welding processes and operators for piping according to ASME “Boiler and Pressure Vessel Code,” Section IX, “Welding and Brazing Qualifications.”

1. Comply with provisions of ASME B31 Series “Code for Pressure Piping.”
2. Certify that each welder has passed AWS qualification tests for the welding processes involved and that certification is current.

C. ASME A13.1 for lettering size, length of color field, colors, and viewing angles of identification devices.

1.6 DELIVERY, STORAGE AND HANDLING

A. Deliver pipes and tubes with factory-applied end-caps. Maintain end-caps through shipping, storage, and handling to prevent pipe-end damage and prevent entrance of dirt, debris, and moisture.

B. Protect stored pipes and tubes from moisture and dirt. Elevate above grade. When stored inside, do not exceed structural capacity of the floor.

C. Protect flanges, fittings, and piping specialties from moisture and dirt.

1.7 SEQUENCING AND SCHEDULING

A. Coordinate mechanical equipment installation with other building components.

B. Arrange for chases, slots, and openings in building structure during progress of construction to allow for mechanical installations.

C. Sequence, coordinate, and integrate installations of mechanical materials and equipment for efficient flow of the Work. Coordinate installation of large equipment requiring positioning prior to closing in the building.

D. Coordinate connection of electrical services.

E. Coordinate requirements for access panels and doors where mechanical items requiring access are concealed behind finished surfaces.

F. Coordinate installation of identifying devices after completing covering and painting where devices are applied to surfaces.

PART 2 PRODUCTS

2.1 PIPE AND PIPE FITTINGS

A. Refer to individual piping system specification Sections in Division 22 and 23 for special joining materials not listing below.

B. Pipe Threads: ASME B1.20.1 for factory threaded pipe and pipe fittings.

2.2 JOINING MATERIALS

A. Refer to individual piping system specification Sections in Division 22 and 23 for special joining materials not listed below.

B. Pipe Flange Gasket Materials: Suitable for the chemical and thermal conditions of the piping system contents.

C. Flange Bolts and Nuts: ASME B18.2.1, carbon steel, except where other material is indicated.

D. Solder Filler Metal: ASTM B32

1. Alloy Sn95 or Alloy Sn94: Tin (approximately 95%) and silver (approximately 5%) having 0.10% maximum lead content.
2. Alloy E: Tin (approximately 95%) and copper (approximately 5%), having 0.10% maximum lead content.
3. Alloy HA: Tin-antimony-silver-copper-zinc, having 0.10% maximum lead content.
4. Alloy HB: Tin-antimony-silver-copper-nickel, having 0.10% maximum lead content.
5. Alloy Sb5: Tin (95%) and antimony (5%), having 0.20% maximum lead content.

E. Brazing Filler Metals: AWS A5.8.

1. BCuP Series: Copper-phosphorus alloys.
2. BAg1 Series: Silver alloy.

F. Welding Filler Metals: Comply with AWS D10.12 for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

G. Flanged, Ductile-Iron Pipe Gasket, Bolts, and Nuts: AWWA C110, rubber gasket, carbon steel bolts and nuts.

H. Couplings: Iron body sleeve assembly, fabricated to match outside diameters of plain-end pressure pipes.

1. Sleeve: ASTM A 126, Class B, gray iron.
2. Followers: ASTM A 47 (ASTM A 47M), Grade 32510 or ASTM A 536 ductile iron.
3. Gaskets: Rubber.
4. Bolts and Nuts: AWWA C111.
5. Finish Enamel paint.

2.3 PIPING SPECIALTIES

A. Escutcheons: Manufactured wall, ceiling, and floor plates; deep-pattern type where required to conceal protruding fittings and sleeves.

B. Dielectric Fittings: Assembly or fitting having insulating material isolating joined dissimilar metals to prevent galvanic action.

1. Description: Combination of copper alloy and ferrous; threaded, solder, plain, and weld neck end types and matching piping system materials.

C. Sleeves: The following materials are for wall, floor, slab, and roof penetrations:

1. Steel Sheet-Metal: 24-gage (0.70mm) or heavier galvanized sheet metal, round tube closed with welded longitudinal joint

2. Steel Pipe: ASTM A 53, Type E, Grade A, Schedule 40, galvanized, plain ends.

2.4 GROUT

A. Non-shrink, Nonmetallic Grout: ASTM C 1107, Grade B.
   1. Characteristics: Post-hardening, volume-adjusting, dry, hydraulic-cement grout, non-staining, non-corrosive, nongaseous, and recommended for interior and exterior applications.
   2. Design Mix: 5000-psi (34.50mpa), 28-day compressive strength.
   3. Packaging: Premixed and factory-packaged.

PART 3 EXECUTION

3.1 PIPING SYSTEMS --COMMON REQUIREMENTS

A. General: Install piping as described below, except where system Sections specify otherwise. Individual piping system specification Sections in Division 22 specify piping installation requirements unique to the piping system.

B. General Locations and Arrangements: Drawings (plans, schematics, and diagrams) indicate general location and arrangement of piping systems. Indicated locations and arrangements were used to size pipe and calculate friction loss, and other design considerations. Install piping as indicated, except where deviations to layout are approved on coordination drawings.

C. Install components having pressure ratings equal to or greater than system operating pressure.

D. Install piping free of sags and bends.

E. Install exposed interior and exterior piping at right angles or parallel to building walls. Diagonal runs are prohibited, except where indicated.

F. Install piping tight to slabs, beams, joists, columns, walls, and other building elements. Allow sufficient space above removable ceiling panels to allow for ceiling panel removal.

G. Install piping to allow application of insulation plus 1-inch (25mm) clearance around insulation.

H. Locate groups of pipes parallel to each other, spaced to permit valve servicing.

I. Install fittings for changes in direction and branch connections.

J. Install couplings according to manufacturer’s printed instructions.

K. Install sleeves for pipes passing through concrete and masonry walls, concrete floor and roof slabs, and where indicated.

L. Install sleeves for pipes passing through concrete and masonry walls, gypsum-board partitions, concrete floor and roof slabs, and where indicated.

M. Fire Barrier Penetrations: Maintain indicated fire rating of walls, partitions, ceilings, and floors at pipe penetrations. Seal pipe penetrations with firestopping sealant material using methods approved by the Fire Marshall.

N. Verify final equipment locations for roughing in.

O. Refer to equipment specifications in other Sections for rough-in requirements.

P. Piping Joint Construction: Join pipe and fittings as follows and as specifically required in individual piping system Sections.

1. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.
2. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.
3. Soldered Joints: Construct joints according to AWS “Soldering Manual,” Chapter 22 “The Soldering of Pipe and Tube.”
4. Brazed Joints: Construct joints according to AWS “Brazing Manual” in the “Pipe and Tube” chapter.
5. Threaded Joints: Thread pipe with tapered pipe threads according to ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full inside diameter. Join pipe fittings and valves as follows:
    a. Note the internal length of threads in fittings or valve ends, and proximity of internal seat or wall, to determine how far pipe should be threaded into joint.
    b. Apply appropriate tape or thread compound to external pipe threads (except where dry seal threading is specified).
    c. Align threads at point of assembly.
    d. Tighten joint with wrench. Apply wrench to valve end into which pipe is being threaded.
    e. Damaged Threads: Do not use pipe or pipe fittings having threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.
6. Welded Joints: Construct joints according to AWS D10.12 “Recommended Practices and Procedures for Welding Low Carbon Steel Pipe” using qualified processes and welding operators according to the “Quality Assurance” Article.
7. Flanged Joints: Align flange surfaces parallel. Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Assemble joints by sequencing bolt tightening to make initial contact of flanges and gaskets as flat and parallel as possible. Use suitable lubricants on bolt threads. Tighten bolts gradually and uniformly using torque wrench.

Q. Piping Connections: Except as otherwise indicated, make piping connections as specified below.

1. Install unions in piping 2 inches and smaller adjacent to each valve and at final connection to each piece of equipment having a 2-inch or smaller threaded pipe connection.
2. Install flanges in piping 2-1/2 inches and larger adjacent to flanged valves and at final connection to each piece of equipment having flanged pipe connection.
3. Dry Piping Systems (Gas, Compressed Air, and Vacuum): Install dielectric unions and flanges to connect piping materials of dissimilar metals.
4. Wet Piping Systems (Water and Steam): Install dielectric coupling and nipple fittings to connect piping materials of dissimilar metals.

3.2 EQUIPMENT INSTALLATION -- COMMON REQUIREMENTS

A. Install equipment to provide the maximum possible headroom where mounting heights are not indicated.

B. Install equipment according to approved submittal data. Portions of the Work are shown only in diagrammatic form. Refer conflicts to the Architect.

C. Install mechanical equipment to facilitate servicing, maintenance, and repair or replacement of equipment components. Connect equipment for ease of disconnecting, with minimum of interference with other installations. Extend grease fittings to an accessible location.

D. Install equipment giving right-of-way to piping systems installed at a required slope.

3.3 PAINTING AND FINISHING

A. Refer to Division 9 Section “Painting” for field painting requirements.

B. Damage and Touch Up: Repair marred and damaged factory-painted finishes with materials and procedures to match original factory finish.

3.4 CUTTING AND PATCHING

A. Install nonmetallic nonshrink grout for mechanical equipment base bearing surfaces, pump and other equipment base plates, and anchors. Mix grout according to manufacturer’s printed instructions.

B. Clean surfaces that will come into contact with grout.

C. Provide forms for placement of grout, as required.

D. Avoid air entrapment when placing grout.

E. Place grout to completely fill equipment bases.

F. Place grout on concrete bases to provide a smooth bearing surface for equipment.

G. Place grout around anchors.

H. Cure placed grout according to manufacturer’s printed instructions.

END OF SECTION

SECTION 22 05 29

HANGERS AND SUPPORTS FOR PLUMBING PIPING AND EQUIPMENT

PART 1 GENERAL

1.1 SUMMARY

A. Section Includes:
1. Metal pipe hangers and supports.
2. Trapeze pipe hangers.
3. Thermal-hanger shield inserts.
4. Fastener systems.

1.2 PERFORMANCE REQUIREMENTS

A. Structural Performance: Hangers and supports for plumbing piping shall withstand the effects of gravity loads and stresses within limits and under conditions indicated according to ASCE/SEI 7.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Welding certificates.

1.4 QUALITY ASSURANCE

A. Structural Steel Welding Qualifications: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural Welding Code - Steel."

B. Pipe Welding Qualifications: Qualify procedures and operators according to ASME Boiler and Pressure Vessel Code.

PART 2 PRODUCTS

2.1 METAL PIPE HANGERS AND SUPPORTS

A. Carbon-Steel Pipe Hangers and Supports:
1. Description: MSS SP-58, Types 1 through 58, factory-fabricated components.
2. Galvanized Metallic Coatings: Pre-galvanized or hot dipped.
3. Nonmetallic Coatings: Plastic coating, jacket, or liner.
4. Padded Hangers: Hanger with fiberglass or other pipe insulation pad or cushion to support bearing surface of piping.
5. Hanger Rods: Continuous-thread rod, nuts, and washer made of carbon steel.

2.2 TRAPEZE PIPE HANGERS

A. Description: MSS SP-69, Type 59, shop- or field-fabricated pipe-support assembly made from structural carbon-steel shapes with MSS SP-58 carbon-steel hanger rods, nuts, saddles, and U-bolts.

2.3 THERMAL-HANGER SHIELD INSERTS

A. Insulation-Insert Material for Cold Piping: ASTM C 552, Type II cellular glass with 100-psig minimum compressive strength and vapor barrier.

B. For Trapeze or Clamped Systems: Insert and shield shall cover entire circumference of pipe.

C. For Clevis or Band Hangers: Insert and shield shall cover lower 180 degrees of pipe.

D. Insert Length: Extend 2 inches beyond sheet metal shield for piping operating below ambient air temperature.

2.4 FASTENER SYSTEMS

A. Mechanical-Expansion Anchors: Insert-wedge-type, stainless- steel anchors, for use in hardened portland cement concrete; with pull-out, tension, and shear capacities appropriate for supported loads and building materials where used.

2.5 MISCELLANEOUS MATERIALS

A. Structural Steel: ASTM A 36/A 36M, carbon-steel plates, shapes, and bars; black and galvanized.

B. Grout: ASTM C 1107, factory-mixed and -packaged, dry, hydraulic-cement, nonshrink and nonmetallic grout; suitable for interior and exterior applications.

1. Properties: Nonstaining, noncorrosive, and nongaseous.
2. Design Mix: 5000-psi, 28-day compressive strength.

PART 3 EXECUTION

3.1 HANGER AND SUPPORT INSTALLATION

A. Metal Pipe-Hanger Installation: Comply with MSS SP-69 and MSS SP-89. Install hangers, supports, clamps, and attachments as required to properly support piping from the building structure.

B. Metal Trapeze Pipe-Hanger Installation: Comply with MSS SP-69 and MSS SP-89. Arrange for grouping of parallel runs of horizontal piping, and support together on field-fabricated trapeze pipe hangers.

1. Pipes of Various Sizes: Support together and space trapezes for smallest pipe size or install intermediate supports for smaller diameter pipes as specified for individual pipe hangers.
2. Field fabricate from ASTM A 36/A 36M, carbon-steel shapes selected for loads being supported. Weld steel according to AWS D1.1/D1.1M.

C. Thermal-Hanger Shield Installation: Install in pipe hanger or shield for insulated piping.

D. Fastener System Installation:
   1. Install mechanical-expansion anchors in concrete after concrete is placed and completely cured. Install fasteners according to manufacturer's written instructions.

E. Install hangers and supports complete with necessary attachments, inserts, bolts, rods, nuts, washers, and other accessories.

F. Install hangers and supports to allow controlled thermal and seismic movement of piping systems, to permit freedom of movement between pipe anchors, and to facilitate action of expansion joints, expansion loops, expansion bends, and similar units.

G. Install lateral bracing with pipe hangers and supports to prevent swaying.

H. Install building attachments within concrete slabs or attach to structural steel. Install additional attachments at concentrated loads, including valves, flanges, and strainers, NPS 2-1/2 and larger and at changes in direction of piping. Install concrete inserts before concrete is placed; fasten inserts to forms and install reinforcing bars through openings at top of inserts.

I. Load Distribution: Install hangers and supports so that piping live and dead loads and stresses from movement will not be transmitted to connected equipment.

J. Pipe Slopes: Install hangers and supports to provide indicated pipe slopes and to not exceed maximum pipe deflections allowed by ASME B31.9 for building services piping.

K. Insulated Piping:
   1. Attach clamps and spacers to piping.
      a. Piping Operating above Ambient Air Temperature: Clamp may project through insulation.
      b. Piping Operating below Ambient Air Temperature: Use thermal-hanger shield insert with clamp sized to match OD of insert.
      c. Do not exceed pipe stress limits allowed by ASME B31.9 for building services piping.
   2. Install MSS SP-58, Type 39, protection saddles if insulation without vapor barrier is indicated. Fill interior voids with insulation that matches adjoining insulation.
      a. Option: Thermal-hanger shield inserts may be used. Include steel weight-distribution plate for pipe NPS 4 and larger if pipe is installed on rollers.
   3. Install MSS SP-58, Type 40, protective shields on cold piping with vapor barrier. Shields shall span an arc of 180 degrees.
      a. Option: Thermal-hanger shield inserts may be used. Include steel weight-distribution plate for pipe NPS 4 and larger if pipe is installed on rollers.
   4. Shield Dimensions for Pipe: Not less than the following:
      a. NPS 1/4 to NPS 3-1/2: 12 inches long and 0.048 inch thick.
      b. NPS 4: 12 inches long and 0.06 inch thick.
   5. Thermal-Hanger Shields: Install with insulation same thickness as piping insulation.

3.2 METAL FABRICATIONS

A. Cut, drill, and fit miscellaneous metal fabrications for trapeze pipe hangers.

B. Fit exposed connections together to form hairline joints. Field weld connections that cannot be shop welded because of shipping size limitations.

C. Field Welding: Comply with AWS D1.1/D1.1M procedures for shielded, metal arc welding; appearance and quality of welds; and methods used in correcting welding work; and with the following:

1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals.
2. Obtain fusion without undercut or overlap.
3. Remove welding flux immediately.
4. Finish welds at exposed connections so no roughness shows after finishing and so contours of welded surfaces match adjacent contours.

3.3 ADJUSTING

A. Hanger Adjustments: Adjust hangers to distribute loads equally on attachments and to achieve indicated slope of pipe.

B. Trim excess length of continuous-thread hanger and support rods to 1-1/2 inches.

3.4 PAINTING

A. Touchup: Clean field welds and abraded areas of shop paint. Paint exposed areas immediately after erecting hangers and supports. Use same materials as used for shop painting. Comply with SSPC-PA 1 requirements for touching up field-painted surfaces.

1. Apply paint by brush or spray to provide a minimum dry film thickness of 2.0 mils.

B. Touchup: Cleaning and touchup painting of field welds, bolted connections, and abraded areas of shop paint on miscellaneous metal are specified in Division 09 painting Sections.

C. Galvanized Surfaces: Clean welds, bolted connections, and abraded areas and apply galvanizing-repair paint to comply with ASTM A 780.

END OF SECTION

SECTION 22 07 19

PLUMBING PIPING INSULATION

PART 1 GENERAL

1.1 SUMMARY

A. Section includes insulating the following plumbing piping services:
   1. Domestic Hot Water piping.
   2. Heating Hot Water piping.
   3. Roof drains and rainwater leaders.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

1.3 QUALITY ASSURANCE

A. Surface-Burning Characteristics: For insulation and related materials, as determined by testing identical products according to ASTM E 84 by a testing agency acceptable to authorities having jurisdiction. Factory label insulation and jacket materials and adhesive, mastic, tapes, and cement material containers, with appropriate markings of applicable testing agency.
   1. Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.

PART 2 PRODUCTS

2.1 INSULATION MATERIALS

A. Comply with insulation requirements in Plumbing Material Specification on plans.

B. Products shall not contain formaldehyde, asbestos, lead, mercury, or mercury compounds.

C. Products that come in contact with stainless steel shall have a leachable chloride content of less than 50 ppm when tested according to ASTM C 871.

D. Insulation materials for use on austenitic stainless steel shall be qualified as acceptable according to ASTM C 795.

E. Foam insulation materials shall not use CFC or HCFC blowing agents in the manufacturing process.

F. Cellular Glass: Inorganic, incombustible, foamed or cellulated glass with annealed, rigid, hermetically sealed cells. Factory-applied jacket requirements are specified in "Factory-Applied Jackets" Article.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. Pittsburgh Corning Corporation; Foamglas.
   2. Special-Shaped Insulation: ASTM C 552, Type III.

3. Preformed Pipe Insulation with Factory-Applied ASJ: Comply with ASTM C 552, Type II, Class 2.
4. Factory fabricate shapes according to ASTM C 450 and ASTM C 585.

G. Flexible Elastomeric Insulation: Closed-cell, sponge- or expanded-rubber materials. Comply with ASTM C 534, Type I for tubular materials.
1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
a. Aeroflex USA, Inc.; Aerocel.
b. Armacell LLC; AP Armaflex.
c. K-Flex USA; Insul-Lock, Insul-Tube, and K-FLEX LS.

2.2 ADHESIVES

A. Materials shall be compatible with insulation materials, jackets, and substrates and for bonding insulation to itself and to surfaces to be insulated, unless otherwise indicated.

B. Cellular-Glass Adhesive: Two-component, thermosetting urethane adhesive containing no flammable solvents, with a service temperature range of minus 100 to plus 200 deg F.
1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
a. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 81-84.
2. For indoor applications, use adhesive that has a VOC content of 50 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).

C. Flexible Elastomeric and Polyolefin Adhesive: Comply with MIL-A-24179A, Type II, Class I.
1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
a. Aeroflex USA, Inc.; Aeroseal.
b. Armacell LLC; Armaflex 520 Adhesive.
c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 85-75.
d. K-Flex USA; R-373 Contact Adhesive.

D. ASJ Adhesive, and FSK Jacket Adhesive: Comply with MIL-A-3316C, Class 2, Grade A for bonding insulation jacket lap seams and joints.
1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-82.
b. Eagle Bridges - Marathon Industries; 225.
c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 85-20.
d. Mon-Eco Industries, Inc.; 22-25.

2.3 SEALANTS

A. Joint Sealants:

1. Joint Sealants for Cellular-Glass Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-76.
   b. Eagle Bridges - Marathon Industries; 405.
2. Materials shall be compatible with insulation materials, jackets, and substrates.
3. Permanently flexible, elastomeric sealant.
4. Service Temperature Range: Minus 100 to plus 300 deg F.
5. Color: White or gray.

B. ASJ Flashing Sealants, and Vinyl, PVDC, and PVC Jacket Flashing Sealants:

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-76.
2. Materials shall be compatible with insulation materials, jackets, and substrates.
3. Fire- and water-resistant, flexible, elastomeric sealant.
4. Service Temperature Range: Minus 40 to plus 250 deg F.
5. Color: White.

2.4 FACTORY-APPLIED JACKETS

A. Insulation system schedules indicate factory-applied jackets on various applications. When factory-applied jackets are indicated, comply with the following:

1. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C 1136, Type I.

PART 3 EXECUTION

3.1 PREPARATION

A. Surface Preparation: Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

3.2 GENERAL INSTALLATION REQUIREMENTS

A. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of piping including fittings, valves, and specialties.

B. Install insulation materials, forms, vapor barriers or retarders, jackets, and thicknesses required for each item of pipe system as specified in plan schedules.

C. Install accessories compatible with insulation materials and suitable for the service. Install accessories that do not corrode, soften, or otherwise attack insulation or jacket in either wet or dry state.

D. Install insulation with longitudinal seams at top and bottom of horizontal runs.

E. Install multiple layers of insulation with longitudinal and end seams staggered.

F. Do not weld brackets, clips, or other attachment devices to piping, fittings, and specialties.

G. Keep insulation materials dry during application and finishing.

H. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

I. Install insulation with least number of joints practical.

J. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.
   1. Install insulation continuously through hangers and around anchor attachments.
   2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends at attachment to structure with vapor-barrier mastic.
   3. Install insert materials and install insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.
   4. Cover inserts with jacket material matching adjacent pipe insulation. Install shields over jacket, arranged to protect jacket from tear or puncture by hanger, support, and shield.

K. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry film thicknesses.

L. Install insulation with factory-applied jackets as follows:
   1. Draw jacket tight and smooth.
   2. Cover circumferential joints with 3-inch- wide strips, of same material as insulation jacket. Secure strips with adhesive and outward clinching staples along both edges of strip, spaced 4 inches o.c.
   3. Overlap jacket longitudinal seams at least 1-1/2 inches. Install insulation with longitudinal seams at bottom of pipe. Clean and dry surface to receive self-sealing lap. Staple laps with outward clinching staples along edge at 2 inches o.c.
      a. For below-ambient services, apply vapor-barrier mastic over staples.
   4. Cover joints and seams with tape, according to insulation material manufacturer's written instructions, to maintain vapor seal.

M. Cut insulation in a manner to avoid compressing insulation more than 75 percent of its nominal thickness.

N. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

O. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least 4 inches beyond damaged areas. Adhere, staple, and seal patches similar to butt joints.

3.3 PENETRATIONS

A. Insulation Installation at Roof Penetrations: Install insulation continuously through roof penetrations.
   1. Seal penetrations with flashing sealant.
   2. For applications requiring only indoor insulation, terminate insulation above roof surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
   3. Extend jacket of outdoor insulation outside roof flashing at least 2 inches below top of roof flashing.
   4. Seal jacket to roof flashing with flashing sealant.

B. Insulation Installation at Interior Wall and Partition Penetrations (That Are Not Fire Rated): Install insulation continuously through walls and partitions.

C. Insulation Installation at Fire-Rated Wall and Partition Penetrations: Install insulation continuously through penetrations of fire-rated walls and partitions.
   1. Comply with requirements in Division 07 Section "Penetration Firestopping" for firestopping and fire-resistive joint sealers.

D. Insulation Installation at Floor Penetrations:
   1. Pipe: Install insulation continuously through floor penetrations.
   2. Seal penetrations through fire-rated assemblies. Comply with requirements in Division 07 Section "Penetration Firestopping."

3.4 GENERAL PIPE INSULATION INSTALLATION

A. Requirements in this article generally apply to all insulation materials except where more specific requirements are specified in various pipe insulation material installation articles.

B. Insulation Installation on Fittings, Valves, Strainers, Flanges, and Unions:
   1. Install insulation over fittings, valves, strainers, flanges, unions, and other specialties with continuous thermal and vapor-retarder integrity unless otherwise indicated.
   2. Insulate pipe elbows using preformed fitting insulation or mitered fittings made from same material and density as adjacent pipe insulation. Each piece shall be butted tightly against adjoining piece and bonded with adhesive. Fill joints, seams, voids, and irregular surfaces with insulating cement finished to a smooth, hard, and uniform contour that is uniform with adjoining pipe insulation.
   3. Insulate tee fittings with preformed fitting insulation or sectional pipe insulation of same material and thickness as used for adjacent pipe. Cut sectional pipe insulation to fit. Butt each section closely to the next and hold in place with tie wire. Bond pieces with adhesive.
   4. Insulate valves using preformed fitting insulation or sectional pipe insulation of same material, density, and thickness as used for adjacent pipe. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. For valves, insulate up to and including the bonnets, valve stuffing-box studs, bolts, and nuts. Fill joints, seams, and irregular surfaces with insulating cement.
   5. Insulate strainers using preformed fitting insulation or sectional pipe insulation of same material, density, and thickness as used for adjacent pipe. Overlap adjoining pipe

insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. Fill joints, seams, and irregular surfaces with insulating cement. Insulate strainers so strainer basket flange or plug can be easily removed and replaced without damaging the insulation and jacket. Provide a removable reusable insulation cover. For below-ambient services, provide a design that maintains vapor barrier.

6. Insulate flanges and unions using a section of oversized preformed pipe insulation. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker.
7. Cover segmented insulated surfaces with a layer of finishing cement and coat with a mastic. Install vapor-barrier mastic for below-ambient services and a breather mastic for above-ambient services. Reinforce the mastic with fabric-reinforcing mesh. Trowel the mastic to a smooth and well-shaped contour.
8. Stencil or label the outside insulation jacket of each union with the word "union." Match size and color of pipe labels.

C. Insulate instrument connections for thermometers, pressure gages, pressure temperature taps, test connections, flow meters, sensors, switches, and transmitters on insulated pipes. Shape insulation at these connections by tapering it to and around the connection with insulating cement and finish with finishing cement, mastic, and flashing sealant.

3.5 INSTALLATION OF CELLULAR-GLASS INSULATION

A. Insulation Installation on Straight Pipes and Tubes:

1. Secure each layer of insulation to pipe with wire or bands and tighten bands without deforming insulation materials.
2. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and joint sealant.
3. For insulation with factory-applied jackets on above-ambient services, secure laps with outward clinched staples at 6 inches o.c.
4. For insulation with factory-applied jackets on below-ambient services, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive as recommended by insulation material manufacturer and seal with vapor-barrier mastic and flashing sealant.

B. Insulation Installation on Pipe Flanges:

1. Install preformed pipe insulation to outer diameter of pipe flange.
2. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
3. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of cellular-glass block insulation of same thickness as pipe insulation.
4. Install jacket material with manufacturer's recommended adhesive, overlap seams at least 1 inch, and seal joints with flashing sealant.

C. Insulation Installation on Pipe Fittings and Elbows:

1. Install preformed sections of same material as straight segments of pipe insulation when available. Secure according to manufacturer's written instructions.
2. When preformed sections of insulation are not available, install mitered sections of

cellular-glass insulation. Secure insulation materials with wire or bands.

D. Insulation Installation on Valves and Pipe Specialties:
   1. Install preformed sections of cellular-glass insulation to valve body.
   2. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   3. Install insulation to flanges as specified for flange insulation application.

3.6 INSTALLATION OF FLEXIBLE ELASTOMERIC INSULATION

A. Seal longitudinal seams and end joints with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

B. Insulation Installation on Pipe Flanges:
   1. Install pipe insulation to outer diameter of pipe flange.
   2. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
   3. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of sheet insulation of same thickness as pipe insulation.
   4. Secure insulation to flanges and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

C. Insulation Installation on Pipe Fittings and Elbows:
   1. Install mitered sections of pipe insulation.
   2. Secure insulation materials and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

D. Insulation Installation on Valves and Pipe Specialties:
   1. Install preformed valve covers manufactured of same material as pipe insulation when available.
   2. When preformed valve covers are not available, install cut sections of pipe and sheet insulation to valve body. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   3. Install insulation to flanges as specified for flange insulation application.
   4. Secure insulation to valves and specialties and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3.7 PIPING INSULATION SCHEDULE, GENERAL

A. Acceptable preformed pipe and tubular insulation materials and thicknesses are identified for each piping system and pipe size range. If more than one material is listed for a piping system, selection from materials listed is Contractor's option.

B. Items Not Insulated: Unless otherwise indicated, do not install insulation on the following:
   1. Drainage piping located in crawl spaces.

2. Underground piping.
3. Chrome-plated pipes and fittings unless there is a potential for personnel injury.

3.8 INDOOR PIPING INSULATION SCHEDULE

A. Stormwater and Overflow: Insulation shall be the following:
   1. Flexible Elastomeric: 1 inch thick.

B. Roof Drain and Overflow Drain Bodies: Insulation shall be the following:
   1. Flexible Elastomeric: 1 inch thick.

END OF SECTION

SECTION 22 11 16

DOMESTIC WATER PIPING

PART 1 GENERAL

1.1 SUMMARY

A. Section Includes:

1. Under-building slab and aboveground domestic water pipes, tubes, fittings, and specialties inside the building.
2. Specialty valves.
3. Flexible connectors.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

1.3 QUALITY ASSURANCE

A. Piping materials shall bear label, stamp, or other markings of specified testing agency.

B. Comply with NSF 61 for potable domestic water piping and components.

PART 2 PRODUCTS

2.1 PIPING MATERIALS

A. Comply with requirements in "Piping Schedule" Article for applications of pipe, tube, fitting materials, and joining methods for specific services, service locations, and pipe sizes.

2.2 COPPER TUBE AND FITTINGS

A. Hard Copper Tube: ASTM B 88, Type L water tube, drawn temper.

1. Cast-Copper Solder-Joint Fittings: ASME B16.18, pressure fittings.
2. Wrought-Copper Solder-Joint Fittings: ASME B16.22, wrought-copper pressure fittings.
3. Bronze Flanges: ASME B16.24, Class 150, with solder-joint ends.
4. Copper Unions: MSS SP-123, cast-copper-alloy, hexagonal-stock body, with ball-and-socket, metal-to-metal seating surfaces, and solder-joint or threaded ends.

2.3 PIPING JOINING MATERIALS

A. Pipe-Flange Gasket Materials: AWWA C110, rubber, flat face, 1/8 inch thick or ASME B16.21, nonmetallic and asbestos free, unless otherwise indicated; full-face or ring type unless otherwise indicated.

B. Metal, Pipe-Flange Bolts and Nuts: ASME B18.2.1, carbon steel unless otherwise indicated.

C. Solder Filler Metals: ASTM B 32, lead-free alloys. Include water-flushable flux according to ASTM B 813.

D. Brazing Filler Metals: AWS A5.8/A5.8M, BCuP Series, copper-phosphorus alloys for

general-duty brazing unless otherwise indicated.

2.4 DIELECTRIC FITTINGS

A. General Requirements: Assembly of copper alloy and ferrous materials or ferrous material body with separating nonconductive insulating material suitable for system fluid, pressure, and temperature.

B. Dielectric Unions:
   1. Description:
      a. Pressure Rating: 150 psig at 180 deg F.
      b. End Connections: Solder-joint copper alloy and threaded ferrous.

C. Dielectric Flanges:
   1. Description:
      a. Factory-fabricated, bolted, companion-flange assembly.
      b. Pressure Rating: 150 psig.
      c. End Connections: Solder-joint copper alloy and threaded ferrous; threaded solder-joint copper alloy and threaded ferrous.

2.5 FLEXIBLE CONNECTORS

A. Stainless-Steel-Hose Flexible Connectors: Corrugated-stainless-steel tubing with stainless-steel wire-braid covering and ends welded to inner tubing.
   1. Working-Pressure Rating: Minimum 200 psig.
   2. End Connections NPS 2 and Smaller: Threaded steel-pipe nipple.
   3. End Connections NPS 2-1/2 and Larger: Flanged steel nipple.

PART 3 EXECUTION

3.1 EARTHWORK

A. Comply with requirements in Division 31 Section "Earth Moving" for excavating, trenching, and backfilling.

3.2 PIPING INSTALLATION

A. Drawing plans, schematics, and diagrams indicate general location and arrangement of domestic water piping. Indicated locations and arrangements are used to size pipe and calculate friction loss, expansion, and other design considerations. Install piping as indicated unless deviations to layout are approved on Coordination Drawings.

B. Install copper tubing under building slab according to CDA's "Copper Tube Handbook."

C. Install shutoff valve, hose-end drain valve, strainer, pressure gage, and test tee with valve, inside the building at each domestic water service entrance.

D. Install shutoff valve immediately upstream of each dielectric fitting.

E. Install domestic water piping level and plumb.

F. Install piping concealed from view and protected from physical contact by building occupants unless otherwise indicated and except in equipment rooms and service areas.

G. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

H. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal, and coordinate with other services occupying that space.

I. Install piping adjacent to equipment and specialties to allow service and maintenance.

J. Install piping to permit valve servicing.

K. Install nipples, unions, special fittings, and valves with pressure ratings the same as or higher than system pressure rating used in applications below unless otherwise indicated.

L. Install piping free of sags and bends.

M. Install fittings for changes in direction and branch connections.

N. Install unions in copper tubing at final connection to each piece of equipment, machine, and specialty.

O. Install pressure gages on suction and discharge piping from each plumbing pump and packaged booster pump.

P. Install sleeves for piping penetrations of walls, ceilings, and floors.

Q. Install sleeve seals for piping penetrations of concrete walls and slabs.

3.3 JOINT CONSTRUCTION

A. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.

B. Remove scale, slag, dirt, and debris from inside and outside of pipes, tubes, and fittings before assembly.

C. Brazed Joints: Join copper tube and fittings according to CDA's "Copper Tube Handbook," "Brazed Joints" Chapter.

D. Soldered Joints: Apply ASTM B 813, water-flushable flux to end of tube. Join copper tube and fittings according to ASTM B 828 or CDA's "Copper Tube Handbook."

3.4 VALVE INSTALLATION

A. General-Duty Valves: Comply with requirements in Division 22 Section "General-Duty Valves for Plumbing Piping" for valve installations.

B. Install shutoff valve close to water main on each branch and riser serving plumbing fixtures or equipment, on each water supply to equipment, and on each water supply to plumbing fixtures that do not have supply stops. Use ball or gate valves for piping NPS 2 and smaller. Use butterfly or gate valves for piping NPS 2-1/2 and larger.

C. Install drain valves for equipment at base of each water riser, at low points in horizontal piping, and where required to drain water piping.

1. Hose-End Drain Valves: At low points in water mains, risers, and branches.

D. Install balancing valve in each hot-water circulation return branch and discharge side of each pump and circulator. Set balancing valves partly open to restrict but not stop flow. Use ball valves for piping NPS 2 and smaller and butterfly valves for piping NPS 2-1/2 and larger.

3.5 FLEXIBLE CONNECTOR INSTALLATION

A. Install flexible connectors in suction and discharge manifold connections to each domestic water booster pump.

B. Install bronze-hose flexible connectors in copper domestic water tubing.

3.6 HANGER AND SUPPORT INSTALLATION

A. Comply with requirements in Division 22 Section "Hangers and Supports for Plumbing Piping and Equipment" for pipe hanger and support products and installation.
   1. Vertical Piping: MSS Type 8 or 42, clamps.
   2. Individual, Straight, Horizontal Piping Runs:
      a. 100 Feet and Less: MSS Type 1, adjustable, steel clevis hangers.
      b. Longer Than 100 Feet: MSS Type 43, adjustable roller hangers.
   3. Base of Vertical Piping: MSS Type 52, spring hangers.

B. Support vertical piping and tubing at base and at each floor.

C. Rod diameter may be reduced one size for double-rod hangers, to a minimum of 3/8 inch.

D. Install hangers for copper tubing with the following maximum horizontal spacing and minimum rod diameters:
   1. NPS 3/4 and Smaller: 60 inches with 3/8-inch rod.
   2. NPS 1 and NPS 1-1/4: 72 inches with 3/8-inch rod.
   3. NPS 1-1/2 and NPS 2: 96 inches with 3/8-inch rod.
   4. NPS 2-1/2: 108 inches with 1/2-inch rod.
   5. NPS 3 to NPS 5: 10 feet with 1/2-inch rod.

E. Install supports for vertical copper tubing every 10 feet.

F. Refer to plans for hanger details. Comply with this section or the plans, whichever is more stringent.

3.7 CONNECTIONS

A. Drawings indicate general arrangement of piping, fittings, and specialties.

B. Install piping adjacent to equipment and machines to allow service and maintenance.

C. Connect domestic water piping to exterior water-service piping. Use transition fitting to join dissimilar piping materials.

D. Connect domestic water piping to water-service piping with shutoff valve; extend and connect to the following:

1. Domestic Water Booster Pumps: Cold-water suction and discharge piping.

3.8 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Piping Inspections:

1. Do not enclose, cover, or put piping into operation until it has been inspected and approved by authorities having jurisdiction.
2. During installation, notify authorities having jurisdiction at least one day before inspection must be made. Perform tests specified below in presence of authorities having jurisdiction:
   a. Roughing-in Inspection: Arrange for inspection of piping before concealing or closing-in after roughing-in and before setting fixtures.
   b. Final Inspection: Arrange final inspection for authorities having jurisdiction to observe tests specified below and to ensure compliance with requirements.
3. Reinspection: If authorities having jurisdiction find that piping will not pass tests or inspections, make required corrections and arrange for reinspection.
4. Reports: Prepare inspection reports and have them signed by authorities having jurisdiction.

C. Piping Tests:

1. Fill domestic water piping. Check components to determine that they are not air bound and that piping is full of water.
2. Test for leaks and defects in new piping and parts of existing piping that have been altered, extended, or repaired. If testing is performed in segments, submit a separate report for each test, complete with diagram of portion of piping tested.
3. Leave new, altered, extended, or replaced domestic water piping uncovered and unconcealed until it has been tested and approved. Expose work that was covered or concealed before it was tested.
4. Cap and subject piping to static water pressure of 50 psig above operating pressure, without exceeding pressure rating of piping system materials. Isolate test source and allow to stand for four hours. Leaks and loss in test pressure constitute defects that must be repaired.
5. Repair leaks and defects with new materials and retest piping or portion thereof until satisfactory results are obtained.
6. Prepare reports for tests and for corrective action required.

D. Domestic water piping will be considered defective if it does not pass tests and inspections.

E. Prepare test and inspection reports.

3.9 CLEANING

A. Clean and disinfect potable domestic water piping as follows:

1. Purge new piping and parts of existing piping that have been altered, extended, or repaired before using.
2. Use purging and disinfecting procedures prescribed by authorities having jurisdiction; if

methods are not prescribed, use procedures described in either AWWA C651 or AWWA C652 or follow procedures described below:

a. Flush piping system with clean, potable water until dirty water does not appear at outlets.

b. Fill and isolate system according to either of the following:

   1) Fill system or part thereof with water/chlorine solution with at least 50 ppm of chlorine. Isolate with valves and allow to stand for 24 hours.

   2) Fill system or part thereof with water/chlorine solution with at least 200 ppm of chlorine. Isolate and allow to stand for three hours.

c. Flush system with clean, potable water until no chlorine is in water coming from system after the standing time.

d. Submit water samples in sterile bottles to authorities having jurisdiction. Repeat procedures if biological examination shows contamination.

B. Prepare and submit reports of purging and disinfecting activities.

C. Clean interior of domestic water piping system. Remove dirt and debris as work progresses.

END OF SECTION

SECTION 23 13 16

SANITARY WASTE AND VENT PIPING

PART 1 GENERAL

1.1 SUMMARY

A. Section Includes:
1. Pipe, tube, and fittings.
2. Specialty pipe fittings.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

1.3 QUALITY ASSURANCE

A. Piping materials shall bear label, stamp, or other markings of specified testing agency.

PART 2 PRODUCTS

2.1 PIPING MATERIALS

A. Comply with requirements in "Pipe Material Schedule" on the plans.

2.2 SPECIALTY PIPE FITTINGS

A. Transition Couplings:
1. General Requirements: Fitting or device for joining piping with small differences in OD's or of different materials. Include end connections same size as and compatible with pipes to be joined.
2. Fitting-Type Transition Couplings: Manufactured piping coupling or specified piping system fitting.
3. Unshielded, Nonpressure Transition Couplings:
a. Standard: ASTM C 1173.
b. Description: Elastomeric, sleeve-type, reducing or transition pattern. Include shear ring and corrosion-resistant-metal tension band and tightening mechanism on each end.
c. Sleeve Materials:
1) For Cast-Iron Soil Pipes: ASTM C 564, rubber.
2) For Dissimilar Pipes: ASTM D 5926, PVC or other material compatible with pipe materials being joined.

PART 3 EXECUTION

3.1 EARTH MOVING

A. Comply with requirements for excavating, trenching, and backfilling specified in Division 31.

3.2 PIPING INSTALLATION

A. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, pump sizing, and other design considerations. Install piping as indicated unless deviations to layout are approved on coordination drawings.

B. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.

C. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

D. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

E. Install piping at indicated slopes.

F. Install piping free of sags and bends.

G. Install fittings for changes in direction and branch connections.

H. Make changes in direction for soil and waste drainage and vent piping using appropriate branches, bends, and long-sweep bends. Sanitary tees and short-sweep 1/4 bends may be used on vertical stacks if change in direction of flow is from horizontal to vertical. Use long-turn, double Y-branch and 1/8-bend fittings if two fixtures are installed back to back or side by side with common drain pipe. Straight tees, elbows, and crosses may be used on vent lines. Do not change direction of flow more than 90 degrees. Use proper size of standard increasers and reducers if pipes of different sizes are connected. Reducing size of drainage piping in direction of flow is prohibited.

I. Lay buried building drainage piping beginning at low point of each system. Install true to grades and alignment indicated, with unbroken continuity of invert. Place hub ends of piping upstream. Install required gaskets according to manufacturer's written instructions for use of lubricants, cements, and other installation requirements. Maintain swab in piping and pull past each joint as completed.

J. Install soil and waste drainage and vent piping at the following minimum slopes unless otherwise indicated:

1. Building Sanitary Drain: 2 percent downward in direction of flow for piping NPS 3 and smaller; 1 percent downward in direction of flow for piping NPS 4 and larger.
2. Horizontal Sanitary Drainage Piping: 2 percent downward in direction of flow.
3. Vent Piping: 1 percent down toward vertical fixture vent or toward vent stack.

K. Install cast-iron soil piping according to CISPI's "Cast Iron Soil Pipe and Fittings Handbook," Chapter IV, "Installation of Cast Iron Soil Pipe and Fittings."

L. Plumbing Specialties:

1. Install cleanouts at grade and extend to where building sanitary drains connect to building sanitary sewers in sanitary drainage gravity-flow piping. Comply with requirements for cleanouts specified in Division 22 Section "Sanitary Waste Piping Specialties."
2. Install drains in sanitary drainage gravity-flow piping. Comply with requirements for

drains specified in Division 22 Section "Sanitary Waste Piping Specialties."

M. Do not enclose, cover, or put piping into operation until it is inspected and approved by authorities having jurisdiction.

3.3 JOINT CONSTRUCTION

A. Join hubless, cast-iron soil piping according to CISPI 310 and CISPI's "Cast Iron Soil Pipe and Fittings Handbook" for hubless-piping coupling joints.

3.4 HANGER AND SUPPORT INSTALLATION

A. Comply with requirements for pipe hanger and support devices and installation specified in Division 22 Section "Hangers and Supports for Plumbing Piping and Equipment."
   1. Install carbon-steel pipe hangers for horizontal and vertical piping
   2. Vertical Piping: MSS Type 8 or Type 42, clamps.
   3. Install individual, straight, horizontal piping runs:
      a. 100 Feet and Less: MSS Type 1, adjustable, steel clevis hangers.
      b. Longer Than 100 Feet: MSS Type 43, adjustable roller hangers.
   4. Multiple, Straight, Horizontal Piping Runs 100 Feet or Longer: MSS Type 44, pipe rolls. Support pipe rolls on trapeze.
   5. Base of Vertical Piping: MSS Type 52, spring hangers.

B. Support horizontal piping and tubing within 12 inches of each fitting and coupling.

C. Support vertical piping and tubing at base and at each floor.

D. Rod diameter may be reduced one size for double-rod hangers, with 3/8-inch minimum rods.

E. Install hangers for cast-iron soil piping with the following maximum horizontal spacing and minimum rod diameters:
   1. NPS 1-1/2 and NPS 2: 60 inches with 3/8-inch rod.
   2. NPS 3: 60 inches with 1/2-inch rod.
   3. NPS 4 and NPS 5: 60 inches with 5/8-inch rod.
   4. NPS 6 and NPS 8: 60 inches with 3/4-inch rod.
   5. Spacing for 10-foot lengths may be increased to 10 feet. Spacing for fittings is limited to 60 inches.

F. Install supports for vertical cast-iron soil piping every 15 feet.

G. Refer to plans for hanger details. Comply with this section or the plans, whichever is more stringent.

3.5 CONNECTIONS

A. Drawings indicate general arrangement of piping, fittings, and specialties.

B. Connect soil and waste piping to exterior sanitary sewerage piping. Use transition fitting to join dissimilar piping materials.

C. Connect drainage and vent piping to the following:

1. Plumbing Fixtures: Connect drainage piping in sizes indicated, but not smaller than required by plumbing code.
2. Plumbing Fixtures and Equipment: Connect atmospheric vent piping in sizes indicated, but not smaller than required by authorities having jurisdiction.
3. Plumbing Specialties: Connect drainage and vent piping in sizes indicated, but not smaller than required by plumbing code.
4. Install test tees (wall cleanouts) in conductors near floor and floor cleanouts with cover flush with floor.

3.6 FIELD QUALITY CONTROL

A. During installation, notify authorities having jurisdiction at least 24 hours before inspection must be made. Perform tests specified below in presence of authorities having jurisdiction.
   1. Roughing-in Inspection: Arrange for inspection of piping before concealing or closing-in after roughing-in and before setting fixtures.
   2. Final Inspection: Arrange for final inspection by authorities having jurisdiction to observe tests specified below and to ensure compliance with requirements.

B. Reinspection: If authorities having jurisdiction find that piping will not pass test or inspection, make required corrections and arrange for reinspection.

C. Reports: Prepare inspection reports and have them signed by authorities having jurisdiction.

D. Test sanitary drainage and vent piping according to procedures of authorities having jurisdiction or, in absence of published procedures, as follows:
   1. Test for leaks and defects in new piping and parts of existing piping that have been altered, extended, or repaired. If testing is performed in segments, submit separate report for each test, complete with diagram of portion of piping tested.
   2. Leave uncovered and unconcealed new, altered, extended, or replaced drainage and vent piping until it has been tested and approved. Expose work that was covered or concealed before it was tested.
   3. Roughing-in Plumbing Test Procedure: Test drainage and vent piping except outside leaders on completion of roughing-in. Close openings in piping system and fill with water to point of overflow, but not less than 10-foot head of water. From 15 minutes before inspection starts to completion of inspection, water level must not drop. Inspect joints for leaks.
   4. Finished Plumbing Test Procedure: After plumbing fixtures have been set and traps filled with water, test connections and prove they are gastight and watertight. Plug vent-stack openings on roof and building drains where they leave building. Introduce air into piping system equal to pressure of 1-inch wg. Use U-tube or manometer inserted in trap of water closet to measure this pressure. Air pressure must remain constant without introducing additional air throughout period of inspection. Inspect plumbing fixture connections for gas and water leaks.
   5. Repair leaks and defects with new materials and retest piping, or portion thereof, until satisfactory results are obtained.
   6. Prepare reports for tests and required corrective action.

3.7 CLEANING AND PROTECTION

A. Clean interior of piping. Remove dirt and debris as work progresses.

B. Protect drains during remainder of construction period to avoid clogging with dirt and debris and to prevent damage from traffic and construction work.

C. Place plugs in ends of uncompleted piping at end of day and when work stops.

END OF SECTION

SECTION 22 13 19

SANITARY WASTE PIPING SPECIALTIES

PART 1 GENERAL

1.1 SUMMARY

A. This Section includes the following sanitary drainage piping specialties:
   1. Cleanouts.
   2. Floor drains.
   3. Roof flashing assemblies.
   4. Miscellaneous sanitary drainage piping specialties.
   5. Flashing materials.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated. Include rated capacities, operating characteristics, and accessories for grease interceptors.

1.3 QUALITY ASSURANCE

A. Drainage piping specialties shall bear label, stamp, or other markings of specified testing agency.

PART 2 PRODUCTS

2.1 CLEANOUTS

A. Cast-Iron Floor Cleanouts:
   1. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
      a. Smith, Jay R. Mfg. Co.; Division of Smith Industries, Inc.
      b. Watts Drainage Products Inc.
      c. Zurn Plumbing Products Group; Specification Drainage Operation.
   2. Standard: ASME A112.36.2M for threaded, adjustable housing cleanout.
   3. Size: Same as connected branch.
   4. Type: Threaded, adjustable housing.
   5. Body or Ferrule: Cast iron.
   6. Outlet Connection: Threaded.
   7. Closure: Brass plug with straight threads and gasket.
   8. Adjustable Housing Material: Cast iron with.
   9. Frame and Cover Material and Finish: Nickel-bronze, copper alloy.
   10. Frame and Cover Shape: Round.

11. Top Loading Classification: Medium Duty.
12. Riser: ASTM A 74, Service class, cast-iron drainage pipe fitting and riser to cleanout.

B. Cast-Iron Wall Cleanouts:
   1. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
      a. Smith, Jay R. Mfg. Co.; Division of Smith Industries, Inc.
      b. Watts Drainage Products Inc.
      c. Zurn Plumbing Products Group; Specification Drainage Operation.
   2. Standard: ASME A112.36.2M. Include wall access.
   3. Size: Same as connected drainage piping.
   4. Body: Hubless, cast-iron soil pipe test tee as required to match connected piping.
   5. Closure: Drilled-and-threaded plug.
   6. Closure Plug Size: Same as or not more than one size smaller than cleanout size.
   7. Wall Access: Round, flat, chrome-plated brass or stainless-steel cover plate with screw.

2.2 FLOOR DRAINS

A. Cast-Iron Floor Drains:
   1. Available Manufacturers: Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
      a. Smith, Jay R. Mfg. Co.; Division of Smith Industries, Inc.
      b. Watts Drainage Products Inc.
      c. Zurn Plumbing Products Group; Specification Drainage Operation.
   2. Standard: ASME A112.6.3.
   3. Pattern: Floor drain.
   4. Body Material: Gray iron.
   5. Outlet: Bottom.
   6. Coating on Interior and Exposed Exterior Surfaces: Acid-resistant enamel.
   7. Top Material: Nickel bronze.
   8. Top Shape: Round.
   9. Top Loading Classification: Light Duty.
   10. Trap Material: Cast iron.
   11. Trap Pattern: Standard P-trap.

2.3 FLASHING MATERIALS

A. Lead Sheet: ASTM B 749, Type L51121, copper bearing, with the following minimum weights and thicknesses, unless otherwise indicated:
   1. General Use: 4.0-lb/sq. ft., 0.0625-inch thickness.
   2. Vent Pipe Flashing: 3.0-lb/sq. ft., 0.0469-inch thickness.
   3. Burning: 6-lb/sq. ft., 0.0938-inch thickness.

B. Fasteners: Metal compatible with material and substrate being fastened.

C. Metal Accessories: Sheet metal strips, clamps, anchoring devices, and similar accessory units required for installation; matching or compatible with material being installed.

D. Solder: ASTM B 32, lead-free alloy.

E. Bituminous Coating: SSPC-Paint 12, solvent-type, bituminous mastic.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install cleanouts in aboveground piping and building drain piping according to the following, unless otherwise indicated:
   1. Size same as drainage piping up to NPS 4. Use NPS 4 for larger drainage piping unless larger cleanout is indicated.
   2. Locate at each change in direction of piping greater than 45 degrees.
   3. Locate at minimum intervals of 50 feet for piping NPS 4 and smaller and 100 feet for larger piping.
   4. Locate at base of each vertical soil and waste stack.

B. For floor cleanouts for piping below floors, install cleanout deck plates with top flush with finished floor.

C. For cleanouts located in concealed piping, install cleanout wall access covers, of types indicated, with frame and cover flush with finished wall.

D. Install floor drains at low points of surface areas to be drained. Set grates of drains flush with finished floor, unless otherwise indicated.
   1. Position floor drains for easy access and maintenance.
   2. Set floor drains below elevation of surrounding finished floor to allow floor drainage. Set with grates depressed according to the following drainage area radii:
      a. Radius, 30 Inches or Less: Equivalent to 1 percent slope, but not less than 1/4-inch total depression.
      b. Radius, 30 to 60 Inches: Equivalent to 1 percent slope.
      c. Radius, 60 Inches or Larger: Equivalent to 1 percent slope, but not greater than 1-inch total depression.
   3. Install floor-drain flashing collar or flange so no leakage occurs between drain and adjoining flooring. Maintain integrity of waterproof membranes where penetrated.
   4. Install individual traps for floor drains connected to sanitary building drain, unless

otherwise indicated.

E. Install air-gap fittings on draining-type backflow preventers and on indirect-waste piping discharge into sanitary drainage system.

3.2 CONNECTIONS

A. Piping installation requirements are specified in other Division 22 Sections. Drawings indicate general arrangement of piping, fittings, and specialties.

B. Install piping adjacent to equipment to allow service and maintenance.

3.3 FLASHING INSTALLATION

A. Fabricate flashing from single piece unless large pans, sumps, or other drainage shapes are required. Join flashing according to the following if required:

1. Lead Sheets: Burn joints of lead sheets 6.0-lb/sq. ft., 0.0938-inch thickness or thicker. Solder joints of lead sheets 4.0-lb/sq. ft., 0.0625-inch thickness or thinner.

B. Install sheet flashing on pipes, sleeves, and specialties passing through or embedded in floors and roofs with waterproof membrane.

1. Pipe Flashing: Sleeve type, matching pipe size, with minimum length of 10 inches, and skirt or flange extending at least 8 inches around pipe.
2. Sleeve Flashing: Flat sheet, with skirt or flange extending at least 8 inches around sleeve.
3. Embedded Specialty Flashing: Flat sheet, with skirt or flange extending at least 8 inches around specialty.

C. Set flashing on floors and roofs in solid coating of bituminous cement.

D. Secure flashing into sleeve and specialty clamping ring or device.

E. Install flashing for piping passing through roofs with counterflashing or commercially made flashing fittings, according to Division 07 Section "Sheet Metal Flashing and Trim."

F. Extend flashing up vent pipe passing through roofs and turn down into pipe, or secure flashing into cast-iron sleeve having calking recess.

3.4 PROTECTION

A. Protect drains during remainder of construction period to avoid clogging with dirt or debris and to prevent damage from traffic or construction work.

B. Place plugs in ends of uncompleted piping at end of each day or when work stops.

END OF SECTION

SECTION 22 40 00

PLUMBING

PART 1 GENERAL

1.1 RELATED DOCUMENTS

A. The requirements of the GENERAL CONDITIONS, SUPPLEMENTAL CONDITIONS, and DIVISION 1, GENERAL REQUIREMENTS, apply to the work of this SECTION.

1.2 SUMMARY

A. Provide plumbing where shown on the Drawings, as specified herein, and as needed for a complete and proper installation including, but not necessarily limited to:

1. Domestic hot and cold water piping systems
2. Drain, waste, and vent systems
3. Drain piping systems

1.3 SUBMITTALS

A. Comply with pertinent provisions of Section 220500.

B. Record Drawings: At project closeout, submit Record Drawings of installed ductwork, duct accessories, and outlets and inlets in accordance with the requirements of Division 1.

C. Sterilization certificate:

1. Upon completion of water line sterilization, deliver to the Architect two copies of an acceptable “Certificate of Performance” for that activity.

1.4 QUALITY ASSURANCE

A. Use adequate numbers of skilled workmen who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and the methods needed for proper performance of the work of this Section.

B. Codes and regulations:

1. In addition to complying with the specified requirements, comply with pertinent regulations of governmental agencies having jurisdiction.
2. In the event of conflict between or among specified requirements and pertinent regulations, the more stringent requirement will govern when so directed by the Architect.

PART 2 PART 2 – PRODUCTS

2.1 PIPE SCHEDULE

A. Comply with requirements in "Plumbing Material Schedule" on plans for applications of pipe, tube, fitting materials, and joining methods for specific services, service locations, and pipe sizes.

2.2 MATERIALS

A. Galvanized or black steel pipe:
   1. Provide standard weight complying with ASTM A12.

B. Fittings:
   1. For copper lines, provide wrought copper fittings.
   2. For cast iron lines, provide service weight cast iron type fittings.
   3. For steel lines, provide malleable iron fittings

C. Unions:
   1. For copper lines, provide copper fittings.
   2. For connections in iron pipe lines 2-1/2” and smaller, provide ground joint brass-to-iron fittings.

D. Victaulic fittings may be used where permitted by code.

E. Strainers: Provide Y-pattern, 200# WOG, 20 mesh monel screen:
   1. 3” and smaller: Provide Crane #988-1/2 or equal, screwed.

F. Pressure regulators: Provide Mueller H-9000, or Wilkins series 500, all bronze.

G. Balancing cocks: Provide Bell & Gossett or equal.

2.3 FLASHING

A. Where pipes of this Section pass through the roof, flash with 24 gauge galvanized sheet metal, counter-flashing to be 24 gauge sheet metal.

2.4 PIPE HANGERS – SEE SECTION 220529 PIPE HANGERS AND SUPPORTS

2.5 CLEANOUTS

A. Exterior:
   1. Provide Smith #4253, Josam #8860 or equal with XH cast iron top in concrete areas.

B. Floors:
   1. Provide Smith #4023, Josam #8330 or equal with round nickel-bronze top in finished room floors.
   2. Provide Smith #4223, Josam #8090-CAL or equal with round cast iron top in unfinished room floors.
   3. Provide “flush-with-floor” type cleanouts, with adjustable watertight covers and integral anchorage flange with clamping collar where waterproofing membrane is used.

C. Finished walls:
   1. Provide Smith #4532, Josam #8790-4 or equal with round chrome plated or stainless steel access plate and screw.

D. Provide cleanout plugs of extra heavy bronze.

2.6 ACCESS BOXES

A. Walls:

1. Provide Smith #4730 or Josam #8650 with polished chrome plate face in tile walls.
2. Provide Smith #4760-AKL OR #4765-AKL, Josam #SLA or #SLB or equal paint-grade steel face and with Allen lock in walls of other finished rooms.

B. Ceilings:

1. Provide Acorn #8211-3-AKL, Josam #SLA or equal paint-grade steel face with Allen lock.

C. Floors:

1. Provide Smith #4910, Josam #8630-5 or equal with XH plain aluminum or nickel-bronze non-skid top.
2. Provide Smith #4920 or equal for floors covered with vinyl reinforced or pure vinyl tile.

D. Yard boxes:

1. Provide Brooks 36 HF, Frazer #2 or equal cast concrete boxes with cast iron rim and hinged self-closing cast iron lid marked GAS SHUTOFF or WATER, size 12” x 18” x 12”.

2.7 PRESSURE GAGES AND THERMOMETERS

A. Provide Marsh Quality Gages with 4-1/2” dial, gage cock, in type required. For pump suction, provide compound type.

B. Provide Trerice 9” BX series thermometers, straight, angle, or oblique as required, equipped with separable sockets and well. Provide extension necks as required on insulated line.

C. Arrange thermometers for easy reading from the floor.

2.8 TRAPS

A. For lavatories and sinks, except service sinks, provide Los Angeles pattern cast brass traps with brass nuts.

2.9 HANDICAPPED INSULATION

A. Where shown on the Drawings or required by governmental agencies having jurisdiction, at lavatories for handicapped persons, provide insulation on hot water supply, tailpiece, and trap.

2.10 FIXTURES AND EQUIPMENT

A. Provide plumbing fixture, trim, and equipment as shown on the Plumbing Fixture and Plumbing Equipment schedules on plans.

2.11 PIPE WRAPPING

A. Steel piping in concrete or underground:

1. Wrap with 20 mil tape
2. Fittings and other joints: Wrap in the field with 20 mil tape and primer.
3. Provide 50% overlap on tape weld rubber coating.

B. Testing:

1. Secure inspection and testing by an independent agency approved in advance by the Architect.

2.12 PIPE INSULATION

A. Provide thickness per plan schedules, 3 ½ pound per cubic foot fiberglass with all-service jacket (aluminum jacket with stainless steel bands outdoors) for the following services:

1. Domestic hot water supply and return
2. Medium pressure steam
3. Gravity and pumped condensate return

2.13 SLEEVES

A. Where pipes pass through concrete, masonry, or stud walls, or pass through ceilings, provide sleeve of the size required.

2.14 OTHER MATERIALS

A. Provide other materials, not specifically described but required for a complete and proper installation, as selected by the Contractor subject to the approval of the Architect.

PART 3 PART 3 – EXECUTION

3.1 SURFACE CONDITIONS

A. Examine the areas and conditions under which work of this Section will be performed. Correct conditions detrimental to timely and proper completion of the Work. Do not proceed until unsatisfactory conditions are corrected.

3.2 PLUMBING SYSTEM LAYOUT

A. Lay out the plumbing system in careful coordination with the Drawings, determining proper elevations for all components of the system and using only the minimum number of bends to produce a satisfactorily functioning system.

B. Follow the general layout shown on the Drawings in all cases except where other work may interfere.

C. Lay out pipes to fall within partition, wall, or roof cavities, and to not require furring other than as shown on the Drawings.

3.3 TRENCHING AND BACKFILLING

A. Perform trenching and backfilling associated with the work of this Section

B. Cut bottom of trenches to grade. Make trenches 12” wider than the greatest dimension of the pipe.

C. Bedding and backfilling:

1. Install piping promptly after trenching. Keep trenches open as short a time as practicable.

2. Under the building, install pipes on a 6” bed of damp sand. Backfill to bottom of slab with damp sand.
3. Outside the building, install underground piping on a 6” bed of damp sand. Backfill to within 12” of finish grade with damp sand. Backfill remainder with native soil.
4. Do not backfill until installation has been approved and until Project Record Documents have been properly annotated.

3.4 INSTALLATION OF PIPING AND EQUIPMENT, GENERAL

A. General:
1. Proceed as rapidly as the building construction will permit.
2. Thoroughly clean items before installation. Cap pipe openings to exclude dirt until fixtures are installed and final connections have been made.
3. Cut pipe accurately, and work into place without springing or forcing, properly clearing windows, doors, and other openings. Excessive cutting or other weakening of the building will not be permitted.
4. Show no tool marks or threads on exposed plated, polished, or enameled connections from fixtures. Tape all finished surfaces to prevent damage during construction.
5. Make changes in directions with fittings; make changes in main sizes with eccentric reducing fittings. Unless otherwise noted, install water supply and return piping with straight side of eccentric fittings at top of the pipe.
6. Run horizontal sanitary and storm drainage piping at a uniform grade of 1/4” per foot, unless otherwise noted. Run horizontal water piping with an adequate pitch upwards in direction of flow to allow complete drainage.
7. Provide sufficient swing joining, ball joining, expansion loops, and devices necessary for a flexible piping system, whether or not shown on the Drawings.
8. Support piping independently at pumps, coils, tanks, and similar locations, so that the equipment will not support weight of pipe.
9. Pipe the drains from pump glands, drip pans, relief valves, air vents, and similar locations, to spill over an open sight drain, floor drain, or other acceptable discharge point, and terminate with a plain end un-threaded pipe 6” above the drain.
10. Securely bolt all equipment, isolators, hangers, and similar items in place.
11. Support each item independently from other pipes. Do not use wire for hanging or strapping pipes.
12. Provide complete dielectric isolation between ferrous and non-ferrous metals.

B. Provide union and shut off valves suitably located to facilitate maintenance and removal of equipment and apparatus.

C. Equipment access:
1. Install piping, equipment, and accessories to permit access for maintenance. Relocate items as necessary to provide such access, and without additional cost to the Owner.
2. Provide access doors where valves, motors or equipment requiring access for maintenance are located in walls or chases or above ceilings. Coordinate location of access doors with other trades as required.

3.5 PIPE JOINTS

A. Copper tubing:
   1. Cut square, remove burrs, and clean inside of female fitting to a bright finish.
      a. Apply solder flux with brush to tubing.
      b. Remove internal parts of solder-end valves prior to soldering.
   2. Provide dielectric unions at points of connection of copper tubing to ferrous piping and equipment.
   3. For joining copper tubing, use:
      a. Water piping 3” and smaller: “lead free solder”;
      b. Water piping larger than 3”: “Sil-fos” brazing;
      c. Underground: “sil-fos” brazing.

B. Screwed piping:
   1. Deburr cuts.
      a. Do not ream exceeding internal diameter of the pipe.
      b. Thread to requirements of ANSI B2.1.
   2. Use Teflon tape on male thread prior to joining other services.

C. Leaky joints:
   1. Remake with new material.
   2. Remove leaking section and/or fitting as directed.
   3. Do not use thread cement or sealant to tighten joint.

3.6 PIPE SUPPORTS

A. For Installation Guidelines, see Section 220529 PIPE HANGERS AND SUPPORTS

B. Provide seismic bracing as required per B-Line’s OSHPD-approved Seismic Restraint Design Booklet.

C. Provide hard insulation inserts at hangers and rollers. Protect insulation inserts with galvanized steel shields.

3.7 SLEEVES AND OPENINGS

A. Provide sleeves for each pipe passing through walls, partitions, floors, roofs, and ceilings.
   1. Set pipe sleeves in place before concrete is placed.
   2. For un-insulated pipe, provide sleeves two pipe sizes larger than the pipe passing through, or provide a minimum of 1/2” clearance between inside and outside of the pipe.
   3. For insulated pipe, provide sleeves of adequate size to accommodate the full thickness of pipe covering, with clearance for packing and caulking.

B. Caulk the space between sleeve and pipe or pipe covering, using a noncombustible, permanently plastic, waterproof, non-staining compound which leaves a smooth finished appearance, or pack with noncombustible asbestos cotton, rope, or fiberglass to within 1/2” of both wall faces, and provide the waterproof compound described above.

C. Finish and escutcheons:

1. Smooth up rough edges around sleeves with plaster or spackling compound.
2. Provide 1” wide chrome or nickel plated escutcheons on all pipes exposed to view where passing through walls, floors, partitions, ceilings, and similar locations.
   a. Size the escutcheons to fit pipe and covering.
   b. Hold escutcheons in place with setscrew.

3.8 CLEANOUTS

A. Secure the Architect’s approval of locations for cleanouts in finished areas prior to installation.

B. Provide cleanouts of same nominal size as the pipes they serve; except where cleanouts are required in pipes 4” and larger provide 4” cleanouts.

C. Make cleanouts accessible. After pressure tests are made and approved, thoroughly graphite the cleanout threads.

3.9 VALVES

A. Provide valves in water, air, and gas systems. Locate and arrange so as to give complete regulation of apparatus, equipment, and fixtures.

B. Provide valves in at least the following locations:
   1. In branches and/or headers of water piping serving a group of fixtures.
   2. On both sides of apparatus and equipment.
   3. For shutoff of risers and branch mains.
   4. For flushing and sterilizing the system.
   5. Where shown on the Drawings.

C. Locate valves for easy accessibility and maintenance.

3.10 WATER HAMMER ARRESTORS

A. Provide water hammer arrestors on hot water lines and cold water lines.
   1. Install in upright position at all quick closing valves, solenoids, isolated plumbing fixtures, and supply headers at plumbing fixture groups.
   2. Locate and size as specified or as shown on the Drawings.
   3. Install water hammer arrestors behind access panels.

3.11 BLACKFLOW PREVENTION

A. Protect plumbing fixtures, faucets with hose connections, and other equipment having plumbing connection, against possible back-siphonage.

B. Arrange for testing of backflow devices as required by the governmental agencies having jurisdiction.

3.12 DISINFECTION OF WATER SYSTEMS

A. Disinfect hot and cold water systems.

1. Notify the Architect at least 48 hours prior to start of the disinfection process.
2. Upon completion of disinfecting, secure and submit the Certificate of Performance required under Article 1.3 of this Section, stating system capacity, disinfectant used, time and rate of disinfectant applied, and resultant residuals in ppm at completion.
3. Use disinfectant method noted in the California Plumbing Code.

B. When disinfection operation is completed, and after final flushing, secure an analysis by a laboratory approved by the Architect, based on water samples from the system, showing test negative for coli-aerogene organisms. Provide a total plate count of less than 100 bacteria per cc, or equal to the control sample.

C. If analysis results are not satisfactory, repeat the disinfection procedures and retest until specified standards are achieved.

3.13 OTHER TESTING AND ADJUSTING

A. Provide personnel and equipment, and arrange for all required tests and inspections required by governmental agencies having jurisdiction.

B. Where tests show materials or workmanship to be deficient, replace or repair as necessary, and repeat the tests until the specified standards are achieved.

C. Adjust the system to optimum standards of operation.

END OF SECTION

SECTION 23 07 13

DUCT INSULATION

PART 1 GENERAL

1.1 SUMMARY

A. Internal duct lining is not allowed.

B. Section includes insulating the following duct services:

1. Indoor, concealed supply and outdoor air.
2. Indoor, exposed supply and outdoor air.
3. Indoor, concealed return located in unconditioned space.
4. Indoor, exposed return located in unconditioned space.
5. Indoor, concealed, Type I, commercial, kitchen hood exhaust.
6. Indoor, exposed, Type I, commercial, kitchen hood exhaust.
7. Indoor, concealed oven and warewash exhaust.
8. Indoor, exposed oven and warewash exhaust.
9. Indoor, concealed exhaust between isolation damper and penetration of building exterior.
10. Indoor, exposed exhaust between isolation damper and penetration of building exterior.
11. Outdoor, concealed supply and return.
12. Outdoor, exposed supply and return.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

1. Detail application of protective shields, saddles, and inserts at hangers for each type of insulation and hanger.
2. Detail insulation application at elbows, fittings, dampers, specialties and flanges for each type of insulation.
3. Detail application of field-applied jackets.
4. Detail application at linkages of control devices.

1.3 INFORMATIONAL SUBMITTALS

A. Field quality-control reports.

1.4 QUALITY ASSURANCE

A. Surface-Burning Characteristics: For insulation and related materials, as determined by testing identical products according to ASTM E 84, by a testing agency acceptable to authorities having jurisdiction. Factory label insulation and jacket materials and adhesive, mastic, tapes, and cement material containers, with appropriate markings of applicable testing agency.

1. Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
2. Insulation Installed Outdoors: Flame-spread index of 75 or less, and smoke-developed index of 150 or less.

PART 2 PRODUCTS

2.1 INSULATION MATERIALS

A. Products shall not contain formaldehyde, asbestos, lead, mercury, or mercury compounds.

B. Products that come in contact with stainless steel shall have a leachable chloride content of less than 50 ppm when tested according to ASTM C 871.

C. Insulation materials for use on austenitic stainless steel shall be qualified as acceptable according to ASTM C 795.

D. Foam insulation materials shall not use CFC or HCFC blowing agents in the manufacturing process.

E. Mineral-Fiber Blanket Insulation: Mineral or glass fibers bonded with a thermosetting resin.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. CertainTeed Corp.; SoftTouch Duct Wrap.
      b. Johns Manville; Microlite.
      c. Knauf Insulation; Friendly Feel Duct Wrap.
      d. Manson Insulation Inc.; Alley Wrap.
      e. Owens Corning; SOFTR All-Service Duct Wrap.
      f. Or Approved Equal.

F. Mineral-Fiber Board Insulation: Mineral or glass fibers bonded with a thermosetting resin. Comply with ASTM C 612, Type IA or Type IB. For duct and plenum applications, provide insulation without factory-applied jacket.
   1. P P Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. CertainTeed Corp.; Commercial Board.
      b. Fibrex Insulations Inc.; FBX.
      c. Johns Manville; 800 Series Spin-Glas.
      d. Knauf Insulation; Insulation Board.
      e. Manson Insulation Inc.; AK Board.
      f. Owens Corning; Fiberglas 700 Series.
      g. Or Approved Equal.

2.2 FIRE-RATED INSULATION SYSTEMS

A. Fire-Rated Blanket: High-temperature, flexible, blanket insulation with FSK jacket that is tested and certified to provide a 1-hour fire rating by an NRTL acceptable to authorities

having jurisdiction.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. CertainTeed Corp.; FlameChek.
   b. Johns Manville; Firetemp Wrap.
   c. Nelson Fire Stop Products; Nelson FSB Flameshield Blanket.
   d. Thermal Ceramics; FireMaster Duct Wrap.
   e. 3M; Fire Barrier Wrap Products.
   f. Unifrax Corporation; FyreWrap.
   g. Or approved equal.

2.3 ADHESIVES

A. Materials shall be compatible with insulation materials, jackets, and substrates and for bonding insulation to itself and to surfaces to be insulated unless otherwise indicated.

B. Mineral-Fiber Adhesive: Comply with MIL-A-3316C, Class 2, Grade A.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-127.
      b. Eagle Bridges - Marathon Industries; 225.
      c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 85-60/85-70.
      d. Mon-Eco Industries, Inc.; 22-25.
      e. Or approved equal.
   2. For indoor applications, adhesive shall have a VOC content of 80 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
   3. Adhesive shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

C. ASJ Adhesive, and FSK Jacket Adhesive: Comply with MIL-A-3316C, Class 2, Grade A for bonding insulation jacket lap seams and joints.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-82.
      b. Eagle Bridges - Marathon Industries; 225.
      c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 85-50.
      d. Mon-Eco Industries, Inc.; 22-25.
      e. Or approved equal.
   2. For indoor applications, adhesive shall have a VOC content of 50 g/L or less when

calculated according to 40 CFR 59, Subpart D (EPA Method 24).

3. Adhesive shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

D. PVC Jacket Adhesive: Compatible with PVC jacket.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. Dow Corning Corporation; 739, Dow Silicone.
   b. Johns Manville; Zeston Perma-Weld, CEEL-TITE Solvent Welding Adhesive.
   c. P.I.C. Plastics, Inc.; Welding Adhesive.
   d. Speedline Corporation; Polyco VP Adhesive.
   e. Or approved equal.
2. For indoor applications, adhesive shall have a VOC content of 50 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
3. Adhesive shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

2.4 MASTICS

A. Materials shall be compatible with insulation materials, jackets, and substrates; comply with MIL-PRF-19565C, Type II.

1. For indoor applications, use mastics that have a VOC content of 50 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).

B. Vapor-Barrier Mastic: Water based; suitable for indoor use on below ambient services.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 30-80/30-90.
   b. Vimasco Corporation; 749.
   c. Or approved equal.
2. Water-Vapor Permeance: ASTM E 96/E 96M, Procedure B, 0.013 perm at 43-mil dry film thickness.
3. Service Temperature Range: Minus 20 to plus 180 deg F.
4. Solids Content: ASTM D 1644, 58 percent by volume and 70 percent by weight.
5. Color: White.

C. Breather Mastic: Water based; suitable for indoor and outdoor use on above ambient services.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-10.

b. Eagle Bridges - Marathon Industries; 550.

c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 46-50.

d. Mon-Eco Industries, Inc.; 55-50.

e. Vimasco Corporation; WC-1/WC-5.

f. Or approved equal.

2. Water-Vapor Permeance: ASTM F 1249, 1.8 perms at 0.0625-inch dry film thickness.
3. Service Temperature Range: Minus 20 to plus 180 deg F.
4. Solids Content: 60 percent by volume and 66 percent by weight.
5. Color: White.

2.5 SEALANTS

A. FSK and Metal Jacket Flashing Sealants:

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-76.

b. Eagle Bridges - Marathon Industries; 405.

c. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; 95-44.

d. Mon-Eco Industries, Inc.; 44-05.

e. Or approved equal.

2. Materials shall be compatible with insulation materials, jackets, and substrates.
3. Fire- and water-resistant, flexible, elastomeric sealant.
4. Service Temperature Range: Minus 40 to plus 250 deg F.
5. Color: Aluminum.
6. For indoor applications, use sealants that have a VOC content of 420 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
7. Sealants shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

B. ASJ Flashing Sealants, and Vinyl and PVC Jacket Flashing Sealants:

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; CP-76.

b. Or approved equal.

2. Materials shall be compatible with insulation materials, jackets, and substrates.
3. Fire- and water-resistant, flexible, elastomeric sealant.
4. Service Temperature Range: Minus 40 to plus 250 deg F.

5. Color: White.
6. For indoor applications, sealants shall have a VOC content of 420 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
7. Sealants shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

2.6 FACTORY-APPLIED JACKETS

A. Insulation system schedules indicate factory-applied jackets on various applications. When factory-applied jackets are indicated, comply with the following:
   1. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C 1136, Type I.
   2. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C 1136, Type I.
   3. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C 1136, Type II.
   4. FSP Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C 1136, Type II.
   5. Vinyl Jacket: White vinyl with a permeance of 1.3 perms when tested according to ASTM E 96/E 96M, Procedure A, and complying with NFPA 90A and NFPA 90B.

2.7 FIELD-APPLIED FABRIC-REINFORCING MESH

A. Woven Polyester Fabric: Approximately 1 oz./sq. yd. with a thread count of 10 strands by 10 strands/sq. in., in a Leno weave, for ducts.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. Foster Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; Mast-A-Fab.
      b. Vimasco Corporation; Elastafab 894.
      c. Or approved equal.

2.8 FIELD-APPLIED JACKETS

A. Field-applied jackets shall comply with ASTM C 921, Type I, unless otherwise indicated.

B. FSK Jacket: Aluminum-foil-face, fiberglass-reinforced scrim with kraft-paper backing.

C. PVC Jacket: High-impact-resistant, UV-resistant PVC complying with ASTM D 1784, Class 16354-C; thickness as scheduled; roll stock ready for shop or field cutting and forming. Thickness is indicated in field-applied jacket schedules.
   1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      a. Johns Manville; Zeston.
      b. P.I.C. Plastics, Inc.; FG Series.
      c. Proto Corporation; LoSmoke.
      d. Speedline Corporation; SmokeSafe.

e. Or approved equal.

2. Adhesive: As recommended by jacket material manufacturer.

3. Color: White.

A. Aluminum Jacket: Comply with ASTM B 209, Alloy 3003, 3005, 3105, or 5005, Temper H-14.

4. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. Childers Brand, Specialty Construction Brands, Inc., a business of H. B. Fuller Company; Metal Jacketing Systems.

b. ITW Insulation Systems; Aluminum and Stainless Steel Jacketing.

c. RPR Products, Inc.; Insul-Mate.

d. Or approved equal.

5. Finish and thickness are indicated in field-applied jacket schedules.

6. Moisture Barrier

7. Self-Adhesive Outdoor Jacket: 60-mil- thick, laminated vapor barrier and waterproofing membrane for installation over insulation located aboveground outdoors; consisting of a rubberized bituminous resin on a crosslaminated polyethylene film covered with white aluminum-foil facing.

8. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. Polyguard Products, Inc.; Alumaguard 60.

b. Or approved equal.

2.9 TAPES

A. ASJ Tape: White vapor-retarder tape matching factory-applied jacket with acrylic adhesive, complying with ASTM C 1136.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:

a. ABI, Ideal Tape Division; 428 AWF ASJ.

b. Avery Dennison Corporation, Specialty Tapes Division; Fasson 0836.

c. Compac Corporation; 104 and 105.

d. Venture Tape; 1540 CW Plus, 1542 CW Plus, and 1542 CW Plus/SQ.

e. Or approved equal.

2. Width: 3 inches.

3. Thickness: 11.5 mils.

4. Adhesion: 90 ounces force/inch in width.

5. Elongation: 2 percent.

6. Tensile Strength: 40 lbf/inch in width.

7. ASJ Tape Disks and Squares: Precut disks or squares of ASJ tape.

B. FSK Tape: Foil-face, vapor-retarder tape matching factory-applied jacket with acrylic adhesive; complying with ASTM C 1136.

1. Products: Subject to compliance with requirements, available products that may be

incorporated into the Work include, but are not limited to, the following:

a. ABI, Ideal Tape Division; 491 AWF FSK.
b. Avery Dennison Corporation, Specialty Tapes Division; Fasson 0827.
c. Compac Corporation; 110 and 111.
d. Venture Tape; 1525 CW NT, 1528 CW, and 1528 CW/SQ.
e. Or approved equal.

2. Width: 3 inches.
3. Thickness: 6.5 mils.
4. Adhesion: 90 ounces force/inch in width.
5. Elongation: 2 percent.
6. Tensile Strength: 40 lbf/inch in width.
7. FSK Tape Disks and Squares: Precut disks or squares of FSK tape.

C. PVC Tape: White vapor-retarder tape matching field-applied PVC jacket with acrylic adhesive; suitable for indoor and outdoor applications.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. ABI, Ideal Tape Division; 370 White PVC tape.
   b. Compac Corporation; 130.
   c. Venture Tape; 1506 CW NS.
   d. Or approved equal.
2. Width: 2 inches.
3. Thickness: 6 mils.
4. Adhesion: 64 ounces force/inch in width.
5. Elongation: 500 percent.
6. Tensile Strength: 18 lbf/inch in width.

D. Aluminum-Foil Tape: Vapor-retarder tape with acrylic adhesive.

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. ABI, Ideal Tape Division; 488 AWF.
   b. Avery Dennison Corporation, Specialty Tapes Division; Fasson 0800.
   c. Compac Corporation; 120.
   d. Venture Tape; 3520 CW.
   e. Or approved equal.
2. Width: 2 inches.
3. Thickness: 3.7 mils.
4. Adhesion: 100 ounces force/inch in width.
5. Elongation: 5 percent.
6. Tensile Strength: 34 lbf/inch in width.

2.10 SECUREMENTS

A. Aluminum Bands: ASTM B 209, Alloy 3003, 3005, 3105, or 5005; Temper H-14, 0.020 inch thick

1. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   a. ITW Insulation Systems; Gerrard Strapping and Seals.
   b. RPR Products, Inc.; Insul-Mate Strapping, Seals, and Springs.
   c. Or approved equal.

B. Insulation Pins and Hangers:

1. Metal, Adhesively Attached, Perforated-Base Insulation Hangers: Baseplate welded to projecting spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place. Comply with the following requirements:
   a. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      1) AGM Industries, Inc.; Tactoo Perforated Base Insul-Hangers.
      2) GEMCO; Perforated Base.
      3) Midwest Fasteners, Inc.; Spindle.
      4) Or approved equal.
   b. Baseplate: Perforated, galvanized carbon-steel sheet, 0.030 inch thick by 2 inches square.
   c. Spindle: Copper- or zinc-coated, low-carbon steel, fully annealed, 0.106-inch-diameter shank, length to suit depth of insulation indicated.
   d. Adhesive: Recommended by hanger manufacturer. Product with demonstrated capability to bond insulation hanger securely to substrates indicated without damaging insulation, hangers, and substrates.
2. Nonmetal, Adhesively Attached, Perforated-Base Insulation Hangers: Baseplate fastened to projecting spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place. Comply with the following requirements:
   a. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      1) GEMCO; Nylon Hangers.
      2) Midwest Fasteners, Inc.; Nylon Insulation Hangers.
      3) Or approved equal.
   b. Baseplate: Perforated, nylon sheet, 0.030 inch thick by 1-1/2 inches in diameter.
   c. Spindle: Nylon, 0.106-inch- diameter shank, length to suit depth of insulation indicated, up to 2-1/2 inches.
   d. Adhesive: Recommended by hanger manufacturer. Product with demonstrated capability to bond insulation hanger securely to substrates indicated without damaging insulation, hangers, and substrates.
3. Self-Sticking-Base Insulation Hangers: Baseplate welded to projecting spindle that is

capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place. Comply with the following requirements:

a. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
   1) AGM Industries, Inc.; Tactoo Self-Adhering Insul-Hangers.
   2) GEMCO; Peel & Press.
   3) Midwest Fasteners, Inc.; Self Stick.
   4) Or approved equal.
b. Baseplate: Galvanized carbon-steel sheet, 0.030 inch thick by 2 inches square.
c. Spindle: Copper- or zinc-coated, low-carbon steel, fully annealed, 0.106-inch-diameter shank, length to suit depth of insulation indicated.
d. Adhesive-backed base with a peel-off protective cover.

4. Insulation-Retaining Washers: Self-locking washers formed from 0.016-inch- thick, galvanized-steel sheet, with beveled edge sized as required to hold insulation securely in place but not less than 1-1/2 inches in diameter.
   a. Products: Subject to compliance with requirements, available products that may be incorporated into the Work include, but are not limited to, the following:
      1) AGM Industries, Inc.; RC-150.
      2) GEMCO; R-150.
      3) Midwest Fasteners, Inc.; WA-150.
      4) Nelson Stud Welding; Speed Clips.
      5) Or approved equal.
   b. Protect ends with capped self-locking washers incorporating a spring steel insert to ensure permanent retention of cap in exposed locations.
5. Nonmetal Insulation-Retaining Washers: Self-locking washers formed from 0.016-inch-thick nylon sheet, with beveled edge sized as required to hold insulation securely in place but not less than 1-1/2 inches in diameter.
   a. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
      1) GEMCO.
      2) Midwest Fasteners, Inc.
      3) Or approved equal.

C. Staples: Outward-clinching insulation staples, nominal 3/4-inch- wide, stainless steel or Monel.

PART 3 EXECUTION

3.1 PREPARATION

A. Surface Preparation: Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

3.2 GENERAL INSTALLATION REQUIREMENTS

A. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of ducts and fittings.

B. Install insulation materials, vapor barriers or retarders, jackets, and thicknesses required for each item of duct system as specified in insulation system schedules.

C. Install accessories compatible with insulation materials and suitable for the service. Install accessories that do not corrode, soften, or otherwise attack insulation or jacket in either wet or dry state.

D. Install insulation with longitudinal seams at top and bottom of horizontal runs.

E. Install multiple layers of insulation with longitudinal and end seams staggered.

F. Keep insulation materials dry during application and finishing.

G. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

H. Install insulation with least number of joints practical.

I. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.
   1. Install insulation continuously through hangers and around anchor attachments.
   2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends at attachment to structure with vapor-barrier mastic.
   3. Install insert materials and install insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.

J. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry film thicknesses.

K. Install insulation with factory-applied jackets as follows:
   1. Draw jacket tight and smooth.
   2. Cover circumferential joints with 3-inch- wide strips, of same material as insulation jacket. Secure strips with adhesive and outward clinching staples along both edges of strip, spaced 4 inches o.c.
   3. Overlap jacket longitudinal seams at least 1-1/2 inches. Clean and dry surface to receive self-sealing lap. Staple laps with outward clinching staples along edge at 4 inches o.c.
      a. For below ambient services, apply vapor-barrier mastic over staples.
   4. Cover joints and seams with tape, according to insulation material manufacturer's written instructions, to maintain vapor seal.

5. Where vapor barriers are indicated, apply vapor-barrier mastic on seams and joints and at ends adjacent to duct flanges and fittings.

L. Cut insulation in a manner to avoid compressing insulation more than 75 percent of its nominal thickness.

M. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

B. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least 4 inches beyond damaged areas. Adhere, staple, and seal patches similar to butt joints.

3.3 PENETRATIONS

A. Insulation Installation at Roof Penetrations: Install insulation continuously through roof penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation above roof surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside roof flashing at least 2 inches below top of roof flashing.
4. Seal jacket to roof flashing with flashing sealant.

B. Insulation Installation at Aboveground Exterior Wall Penetrations: Install insulation continuously through wall penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation inside wall surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside wall flashing and overlap wall flashing at least 2 inches.
4. Seal jacket to wall flashing with flashing sealant.

C. Insulation Installation at Interior Wall and Partition Penetrations (That Are Not Fire Rated): Install insulation continuously through walls and partitions.

D. Insulation Installation at Fire-Rated Wall and Partition Penetrations: Terminate insulation at fire damper sleeves for fire-rated wall and partition penetrations. Externally insulate damper sleeves to match adjacent insulation and overlap duct insulation at least 2 inches.

1. Comply with requirements in Section 078413 "Penetration Firestopping" for firestopping and fire-resistive joint sealers.

E. Insulation Installation at Floor Penetrations:

1. Duct: For penetrations through fire-rated assemblies, terminate insulation at fire damper sleeves and externally insulate damper sleeve beyond floor to match adjacent duct insulation. Overlap damper sleeve and duct insulation at least 2 inches.

2. Seal penetrations through fire-rated assemblies. Comply with requirements in Section 078413 "Penetration Firestopping."

3.4 INSTALLATION OF MINERAL-FIBER INSULATION

A. Blanket Insulation Installation on Ducts and Plenums: Secure with adhesive and insulation pins.

1. Apply adhesives according to manufacturer's recommended coverage rates per unit area.
2. Apply adhesive to entire circumference of ducts and to all surfaces of fittings and transitions.
3. Install either capacitor-discharge-weld pins and speed washers or cupped-head, capacitor-discharge-weld pins on sides and bottom of horizontal ducts and sides of vertical ducts as follows:
    a. On duct sides with dimensions 18 inches and smaller, place pins along longitudinal centerline of duct. Space 3 inches maximum from insulation end joints, and 16 inches o.c.
    b. On duct sides with dimensions larger than 18 inches, place pins 16 inches o.c. each way, and 3 inches maximum from insulation joints. Install additional pins to hold insulation tightly against surface at cross bracing.
    c. Pins may be omitted from top surface of horizontal, rectangular ducts and plenums.
    d. Do not overcompress insulation during installation.
    e. Impale insulation over pins and attach speed washers.
    f. Cut excess portion of pins extending beyond speed washers or bend parallel with insulation surface. Cover exposed pins and washers with tape matching insulation facing.
4. For ducts and plenums with surface temperatures below ambient, install a continuous unbroken vapor barrier. Create a facing lap for longitudinal seams and end joints with insulation by removing 2 inches from one edge and one end of insulation segment. Secure laps to adjacent insulation section with 1/2-inch outward-clinching staples, 1 inch o.c. Install vapor barrier consisting of factory- or field-applied jacket, adhesive, vapor-barrier mastic, and sealant at joints, seams, and protrusions.
    a. Repair punctures, tears, and penetrations with tape or mastic to maintain vapor-barrier seal.
    b. Install vapor stops for ductwork and plenums operating below 50 deg F at 18-foot intervals. Vapor stops shall consist of vapor-barrier mastic applied in a Z-shaped pattern over insulation face, along butt end of insulation, and over the surface. Cover insulation face and surface to be insulated a width equal to two times the insulation thickness, but not less than 3 inches.
5. Overlap unfaced blankets a minimum of 2 inches on longitudinal seams and end joints. At end joints, secure with steel bands spaced a maximum of 18 inches o.c.
6. Install insulation on rectangular duct elbows and transitions with a full insulation section for each surface. Install insulation on round and flat-oval duct elbows with individually mitered gores cut to fit the elbow.
7. Insulate duct stiffeners, hangers, and flanges that protrude beyond insulation surface with 6-inch- wide strips of same material used to insulate duct. Secure on alternating sides of stiffener, hanger, and flange with pins spaced 6 inches o.c.

B. Board Insulation Installation on Ducts and Plenums: Secure with adhesive and insulation pins.

1. Apply adhesives according to manufacturer's recommended coverage rates per unit area.
2. Apply adhesive to entire circumference of ducts and to all surfaces of fittings and transitions.
3. Install either capacitor-discharge-weld pins and speed washers or cupped-head, capacitor-discharge-weld pins on sides and bottom of horizontal ducts and sides of vertical ducts as follows:
    a. On duct sides with dimensions 18 inches and smaller, place pins along longitudinal centerline of duct. Space 3 inches maximum from insulation end joints, and 16 inches o.c.
    b. On duct sides with dimensions larger than 18 inches, space pins 16 inches o.c. each way, and 3 inches maximum from insulation joints. Install additional pins to hold insulation tightly against surface at cross bracing.
    c. Pins may be omitted from top surface of horizontal, rectangular ducts and plenums.
    d. Do not overcompress insulation during installation.
    e. Cut excess portion of pins extending beyond speed washers or bend parallel with insulation surface. Cover exposed pins and washers with tape matching insulation facing.
4. For ducts and plenums with surface temperatures below ambient, install a continuous unbroken vapor barrier. Create a facing lap for longitudinal seams and end joints with insulation by removing 2 inches from one edge and one end of insulation segment. Secure laps to adjacent insulation section with 1/2-inch outward-clinching staples, 1 inch o.c. Install vapor barrier consisting of factory- or field-applied jacket, adhesive, vapor-barrier mastic, and sealant at joints, seams, and protrusions.
    a. Repair punctures, tears, and penetrations with tape or mastic to maintain vapor-barrier seal.
    b. Install vapor stops for ductwork and plenums operating below 50 deg F at 18-foot intervals. Vapor stops shall consist of vapor-barrier mastic applied in a Z-shaped pattern over insulation face, along butt end of insulation, and over the surface. Cover insulation face and surface to be insulated a width equal to two times the insulation thickness, but not less than 3 inches.
5. Install insulation on rectangular duct elbows and transitions with a full insulation section for each surface. Groove and score insulation to fit as closely as possible to outside and inside radius of elbows. Install insulation on round and flat-oval duct elbows with individually mitered gores cut to fit the elbow.
6. Insulate duct stiffeners, hangers, and flanges that protrude beyond insulation surface with 6-inch- wide strips of same material used to insulate duct. Secure on alternating sides of stiffener, hanger, and flange with pins spaced 6 inches o.c.

3.5 FIELD-APPLIED JACKET INSTALLATION

A. Where FSK jackets are indicated, install as follows:

1. Draw jacket material smooth and tight.
2. Install lap or joint strips with same material as jacket.

3. Secure jacket to insulation with manufacturer's recommended adhesive.
4. Install jacket with 1-1/2-inch laps at longitudinal seams and 3-inch- wide joint strips at end joints.
5. Seal openings, punctures, and breaks in vapor-retarder jackets and exposed insulation with vapor-barrier mastic.

B. Where PVC jackets are indicated, install with 1-inch overlap at longitudinal seams and end joints; for horizontal applications, install with longitudinal seams along top and bottom of tanks and vessels. Seal with manufacturer's recommended adhesive.
1. Apply two continuous beads of adhesive to seams and joints, one bead under lap and the finish bead along seam and joint edge.

C. Where metal jackets are indicated, install with 2-inch overlap at longitudinal seams and end joints. Overlap longitudinal seams arranged to shed water. Seal end joints with weatherproof sealant recommended by insulation manufacturer. Secure jacket with stainless-steel bands 12 inches o.c. and at end joints.

3.6 FIRE-RATED INSULATION SYSTEM INSTALLATION

A. Where fire-rated insulation system is indicated, secure system to ducts and duct hangers and supports to maintain a continuous fire rating.

B. Insulate duct access panels and doors to achieve same fire rating as duct.

C. Install firestopping at penetrations through fire-rated assemblies. Fire-stop systems are specified in Section 078413 "Penetration Firestopping."

3.7 FINISHES

A. Insulation with ASJ or Other Paintable Jacket Material: Paint jacket with paint system identified below and as specified in Section 099113 "Exterior Painting" and Section 099123 "Interior Painting."
1. Flat Acrylic Finish: Two finish coats over a primer that is compatible with jacket material and finish coat paint. Add fungicidal agent to render fabric mildew proof.
a. Finish Coat Material: Interior, flat, latex-emulsion size.

B. Color: Final color as selected by Architect. Vary first and second coats to allow visual inspection of the completed Work.

C. Do not field paint aluminum or stainless-steel jackets.

3.8 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Tests and Inspections:
1. Inspect ductwork, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation. Extent of inspection shall be limited to one location(s) for each duct system defined in the "Duct Insulation Schedule, General" Article.

C. All insulation applications will be considered defective Work if sample inspection reveals noncompliance with requirements.

3.9 DUCT INSULATION SCHEDULE, GENERAL

A. Plenums and Ducts Requiring Insulation:
   1. Indoor, concealed supply and outdoor air.
   2. Indoor, exposed supply and outdoor air.
   3. Indoor, concealed return located in unconditioned space.
   4. Indoor, exposed return located in unconditioned space.
   5. Indoor, concealed, Type I, commercial, kitchen hood exhaust.
   6. Indoor, exposed, Type I, commercial, kitchen hood exhaust.
   7. Indoor, concealed oven and warewash exhaust.
   8. Indoor, exposed oven and warewash exhaust.
   9. Indoor, concealed exhaust between isolation damper and penetration of building exterior.
   10. Indoor, exposed exhaust between isolation damper and penetration of building exterior.
   11. Outdoor, concealed supply and return.
   12. Outdoor, exposed supply and return.

B. Items Not Insulated:
   1. Fibrous-glass ducts.
   2. Metal ducts with duct liner of sufficient thickness to comply with energy code and ASHRAE/IESNA 90.1.
   3. Factory-insulated flexible ducts.
   4. Factory-insulated plenums and casings.
   5. Flexible connectors.
   6. Vibration-control devices.
   7. Factory-insulated access panels and doors.

3.10 INDOOR DUCT AND PLENUM INSULATION SCHEDULE

A. Concealed, Supply-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

B. Concealed, Return-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements density.

C. Concealed, Outdoor-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

D. Concealed, Exhaust-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

E. Concealed, Type I, Commercial, Kitchen Hood Exhaust Duct and Plenum Insulation: Fire-rated blanket; thickness as required to achieve 2-hour fire rating.

F. Exposed, Supply-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

G. Exposed, Return-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

H. Exposed, Outdoor-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

I. Exposed, Exhaust-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

J. Exposed, Type I, Commercial, Kitchen Hood Exhaust Duct and Plenum Insulation: Fire-rated blanket; thickness as required to achieve 2-hour fire rating.

3.11 ABOVEGROUND, OUTDOOR DUCT AND PLENUM INSULATION SCHEDULE

A. Insulation materials and thicknesses are identified below. If more than one material is listed for a duct system, selection from materials listed is Contractor's option.

B. Concealed, Supply-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

C. Concealed, Return-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

D. Concealed, Outdoor-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

E. Exposed, Supply-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

F. Exposed, Return-Air Duct and Plenum Insulation: Mineral-fiber blanket per CMC 605.0 & Title 24 requirements.

3.12 INDOOR, FIELD-APPLIED JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Ducts and Plenums, Concealed:

1. None.

D. Ducts and Plenums, Exposed (in semi- or non-conditioned spaces):

1. None.
2. PVC: 20 mils thick.

3.13 OUTDOOR, FIELD-APPLIED JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Ducts and Plenums, Concealed:

1. None.

2. PVC: 20 mils thick.
3. Aluminum, Smooth: 0.016 inch thick.

D. Ducts and Plenums, Exposed, up to 48 Inches in Diameter or with Flat Surfaces up to 72 Inches:
   1. Aluminum, Smooth: 0.016 inch thick.

E. Ducts and Plenums, Exposed, Larger Than 48 Inches in Diameter or with Flat Surfaces Larger Than 72 Inches:
   1. Painted Aluminum, Smooth with 4-by-1-Inch Box Ribs: 0.040 inch thick.

END OF SECTION

SECTION 23 08 00

HVAC

PART 1 GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions apply to work of this section.

B. The requirements of the General Conditions and Division 1 apply to all work hereunder, also applicable provisions of SECTION 220500, Basic Mechanical Materials & Methods.

1.2 DESCRIPTION OF WORK

A. Work of this section includes, but is not necessarily limited to heating, Ventilating and Air Conditioning work indicated on the drawings and described herein; also any incidental work not shown or specified that is necessary to provide the complete system.

1.3 COORDINATED LAYOUTS

A. Coordinated layouts are required to amplify, expand and coordinate the information contained in the Contract Documents.

B. Provide minimum ¼" equals one foot scaled coordination drawings showing plan and pertinent section or elevation views of all piping, ductwork and electrical systems. Drawings shall be reproducible and/or electronic format, and the work represented shall be fully coordinated with the structure, other disciplines, and with all finishes. Drawings shall all be presented on a single size sheet. Contractor may use either size Arch D (24"x36") or Arch E1 (30"x42"). Drawing graphics shall fully comply with AIA Graphic Standards and ANSI Y14. Drawings may be hand-drawn or computer generated using AutoCAD. All drawings shall have title block, key plan, north arrow and sufficient grid lines to provide cross-reference to the design drawings.

1. Provide a stamp or title block on each drawing with locations for signatures from all contractors involved, including but not limited to the General, HVAC, Plumbing, Fire Protection, and Electrical contractors. Include statement for signature that the contractor has reviewed the coordination drawings in detail and has coordinated the work of his trade.

2. Show on drawings the intended elevation of all ductwork in accordance with the following example:

   B.O.D. = 9'-0"
   OFFSET UP 6"
   B.O.D. = 9'-6"

3. Highlight, encircle or otherwise indicate deviations from the Contract Documents on the coordinated layouts. Architect will not be responsible for "finding" changes or deviations to the original Contract Documents.

C. Since scale of contract drawings is small and all offsets and fittings are not shown, contractor shall make allowances in bid for additional coordination time, detailing, fittings, offsets, hangers and the like to achieve a fully coordinated installation. If changes in duct size are required, equivalent area shall be maintained and the aspect ratio shall not be in

excess of 2 to 1 unless approved by the engineer. Drawings shall be submitted for review prior to fabrication and installation. Drawings may be submitted in packages representing at least ¼ of the building ductwork.

D. Check routing on all ductwork before fabricating. Report any discrepancies to Architect. No extra cost will be allowed for failure to conform to above.

E. It shall be the responsibility of the General Contractor to insure that the Heating, Ventilating and Air Conditioning Contractor coordinates all of his work with all other trades, including mechanical and electrical trades, so that the complete job is neat and in conformity with plans and specifications.

1.5 SUBMITTALS

A. Product Data: Submit manufacturer's technical product data, including rated capacities of selected model clearly indicated, dimensions, weights, furnished specialties and accessories; and installation and start-up instructions

B. Engineering Data: Submit fan curves and sound power level data for each fan unit. Data shall be at the scheduled capacity. Data shall include the name of the rating agency or independent laboratory.

C. Maintenance Data: Submit maintenance data and parts list for each piece of equipment, control, and accessory; including "trouble-shooting" maintenance guide.

1. Include this data in maintenance manuals

D. Record Drawings: At project closeout, submit Record Drawings of installed ductwork, duct accessories, and outlets and inlets in accordance with the requirements of Division 1.

1.6 QUALITY ASSURANCE

A. Design Criteria:

1. All equipment and accessories to be the product of a manufacturer regularly engaged in its manufacture. All gas fired equipment shall be AGA listed
2. Supply all equipment and accessories in accordance with requirements of all applicable national, state and local codes.
3. All items of a given type shall be the products of the same manufacturer.
4. Scheduled equipment performance is minimum capacity required.
5. Scheduled electrical capacity shall be considered as maximum available.
6. Scheduled gas BTU input shall be considered as the maximum available.

1.7 PLUMBING

A. All plumbing work required in the course of this contract shall be performed in strict accordance with all codes and regulations. Plumbing work done under this contract shall not adversely affect the operation of the existing plumbing systems. All materials shall be new and shall match existing.

PART 2 PRODUCTS

2.1 HVAC EQUIPMENT

A. Provide equipment, trim and accessories as specified in the schedules on the drawings.

2.2 DUCTWORK

A. Design and installation standards. Comply with all applicable portions of the following codes for all work in this section:

1. SMACNA
2. ASHRAE recommendations, latest edition
3. NFPA 90A, Standard for the Installation of Air Conditioning and Ventilating Systems, latest edition.
4. NFPA 90B, Standard for the Installation Warm Air Heating and Air Conditioning Systems, latest edition.

5. CMC, 2016
6. ADC Test Code FD 72-RI, Flexible Air Duct Test Code

B. Fabricate all ductwork with sheet metal. Fiberglass ductwork will not be accepted for use on this project.

C. Duct sizes indicated are internal sizes.

D. Galvanized Sheet Steel: Lock-forming quality, ASTM A-525 and ASTM A-527, Coating Designation G 90. Provide mill phospatized finish for exposed surfaces of ducts exposed to view.

E. Seal airtight all standing seams and all joints of all supply, return and exhaust ducts except those exposed in the conditioned space covered with Hardcast DT tape 4" wide and Hardcast FTA-20 adhesive.
   1. Pressure-sensitive tapes or single part sealant not acceptable.

F. Seal airtight and watertight all joints of all ductwork exposed to the weather with 6 ounce canvas bonded with MEI Eco-Tack adhesive; cover the canvas with a heavy coat Foster's 56-10, or equal, no dilution.
   1. Pressure-sensitive tapes or single part sealant not acceptable.
   2. Where seams are exposed to weather, paint seams with aluminum paint over sealant and tape. Provide cross-braced ductwork, and insure that the ductwork will shed water.

G. Provide sheet metal angle frame at all duct penetrations to wall, floor, roof, or ceiling.

H. Ductwork Support Materials: Except as otherwise indicated, provide hot-dipped galvanized steel fasteners, anchors, rods, straps, trim, and angles for support of ductwork.

I. Rectangular Duct Fabrication
   1. Shop fabricate ductwork of gauges and reinforcement complying with the more stringent of the following standards, except as noted herein:
   2. SMACNA HVAC Duct Construction Standards, 2016 CMC
   3. Fabricate ducts with minimum duct gauges as follows;

Duct dimension	Min Ga	Joint Reinforcement
Up through 12"	26	Not Required
13" – 18"	24	Not Required
19" – 30"	24	C/4
31" – 42"	22	E/4
43" – 54"	22	F/2
55" – 60"	20	G/4
61" – 84"	20	I/2
85" – 96"	20	J/2
Over 96"	18	K/2

   4. Fabricate duct fittings to match adjoining ducts and comply with duct requirements as applicable to fittings. Except as otherwise indicated, fabricate elbows with centerline radius equal to 1.5 times associated duct width. Fabricate to include single-thickness turning-vanes with trailing edge in elbows where space does not permit the above radius or where square elbows are shown. Limit angular tapers to 30 degrees for contracting

tapers and 20 degrees for expanding tapers.

5. Fabricate round supply connections at rectangular, plenum type fittings using spin-in type fittings, complete with extractor and volume control dampers. Refer to Division –15 Section “Duct Accessories” for damper requirements.
6. Provide drive slip or equivalent flat seams for ducts exposed in the conditioned space or where necessary due to space limitations. On ducts with flat seams, provide standard reinforcing on inside of duct. Duct connection to outlet on exposed duct shall be full size of outer perimeter of outlet flange.
7. Provide 20 Ga. minimum for ductwork exposed within occupied spaces.

J. Miscellaneous Ductwork Materials

1. Fittings: Unless otherwise shown on the Drawings, following fittings shall be used: Two-piece, die-stamped, 45-degree to 90-degree elbows for sizes up to 12”; five-piece, 90-degree elbows for sizes 12” and above; conical tees; and conical laterals. All reducers shall be placed after a tap has been made on the duct main. Reducers shall be long-taper style.
2. Duct Sealant: Non-hardening, non-migrating mastic or liquid elastic sealant as compounded and recommended by manufacturer specifically for sealing joints and seams in ductwork.
3. Duct joints: Joint and seal prefabricated, factory-built ducts, fittings and couplings in strict accordance with duct manufacturer’s instructions. Install duct-sealers, pop rivets or sheet metal screws and glass fabric and mastic on each joint. Duct sealer shall be fire retardant. Sheet metal screw for joints shall be minimum #10 size galvanized.
4. Duct Access: Provide hinged access door in prefabricated, factory-build ducts for access to fire dampers, control equipment, etc. as specified in Duct Accessories Section. Access door size shall be duct diameter wide by duct diameter high for all ducts under 24”. Ducts over 24” in diameter shall have 24” by 18” access doors. Minimum size access doors shall be 6” by 6”.
5. Provide hinged style access dors for round ductwork, National Controlled Air, Inc. AD-RD-87, Pottorff Series 60, or equal. Access doors shall be 16 Ga. galvanized steel with continuous piano hinge. Locks shall be plated steel strike and catch. Provide 1”x3/8” Polyethylene “Perma Stik” gasket all around door.

K. Flexible Ducts

1. Flexible ducts shall consist of an exterior reinforced laminated vapor barrier, 1-1/2” thick fiberglass insulation (K=.25 @ 75 degrees F), encapsulated spring steel wire Helix and impervious, smooth, non-perforated interior vinyl liner. Individual lengths of flexible ducts shall contain factory fabricated steel connection collars.
2. Factory made air ducts shall be approved for the use intended or shall conform to requirements of UMC Standard 6 and 6-5. Each portion of a factory-made air duct system shall be identified by the manufacturer with a label or other suitable identification indicating compliance with UMC Standard 6-1 and its class designation. These ducts shall be UL listed Class 1, 25/50 smoke and flame spread and shall be installed in accordance with the terms of their listing. Omit external insulation.
    a. Flexible ductwork shall be maximum of 5 feet long, and shall be extended to the fullest possible length, in order to minimize pressure drop in the duct.
    b. Ducts shall be UL approved and tested to meet Class requirements of NFPA 90A and comply with UMC Standard 6-1. Make bends to maintain R/D=1.5.

3. Make connections to rigid duct and units with Panduit style draw band at inner liner material, then at outer vapor barrier material; and then provide duct tape over outside of sheath.
4. Subject to compliance with requirements, manufacturers offering Flexible Ducts which may be incorporated in the work include the following:
    a. Thermaflex M-KC
    b. Flexmaster USA, Inc.

L. Provide Ventlon flexible connections on inlet and outlet of AC unit, air handler and exhaust fans. Provide galvanized weather hood over flexible connections exposed to the weather.

PART 3 EXECUTION

3.1 EQUIPMENT START-UP

A. Initial start-up of supply, exhaust and return fan systems and pumps shall be under the direct supervision of the Testing and Balancing Contractor.

B. Equipment start-up shall not be performed until the piping systems have been flushed and treated in the initial water flow balance has been completed.

C. It shall be the responsibility of the Contractor to assemble and supervise a start-up team consisting of Controls, Equipment Manufacturer start-up technician, and Test and Balance contractor; all to work in concert to assure that all systems are started, balanced and operate in accordance with the design.

D. After start-up is complete, instruct the Owner’s personnel in the operation and maintenance of the systems. Obtain from the Owner’s representative a signed memo certifying that the instructions have been received.

3.2 EXPANSION JOINTS

A. Furnish and install expansion loops or joints in the steam or water lines as required with anchors and guides as required for the proper operation of the expansion loops or joints.

3.3 ANTI-VIBRATION BASES AND HANGERS

A. Isolate all ventilating and air conditioning equipment connections including conduit, piping, drains, etc., so that equipment will operate under continuous demand without objectionable vibration.

B. Equipment shall be supported on anti-vibration bases, pads, or hangers, as shown on the drawings or specified with the equipment. Individual fans shall have integral, spring-type fan and motor bases unless otherwise noted.

C. Selection of the bases or supporting units shall be in accordance with the vibration eliminator manufacturer’s recommendations. Minimum static deflection shall be 1-1/2” or as marked on the Drawings.

D. The equipment manufacturer shall furnish the weight of equipment at each point of support.

3.4 INSTALLATION OF DUCTWORK

A. Assemble and install ductwork in accordance with recognized industry practices which will achieve air tight and noiseless (no objectionable noise) systems capable of performing each indicated service. Install each run with minimum of joints. Align ductwork accurately at connections within 1/8" misalignment tolerance and with internal surfaces smooth. Support ducts rigidly with suitable ties, braces, hangers, and anchors of type that will hold ducts true to shape and to prevent buckling. Where possible, install ductwork to clear construction by ¼" minimum, except at air inlets and outlets. Where ductwork will not clear construction, secure duct firmly to eliminate noise in the system.

B. Applicable Leakage Classes:

Pressure Class	Leakage Class Round Duct	Leakage Class Rectangular Duct
2" WG or less	12	12
4" WG or greater	3	6

C. Install concrete inserts for support of ductwork in coordination with formwork as required to avoid delays in work.

D. Where ducts pass through interior partitions and exterior walls, conceal space between construction opening and duct or duct plus insulation with sheet metal flanges of same gauge as duct. Overlap opening on four sides by at least 1½".

E. Support ductwork in manner complying with SMACNA "HVAC Duct Construction Standards", latest edition, hangers and supports sections. Where special hanging of ductwork is detailed or shown on Drawings, Drawings shall be followed. Angles shall be attached to overhead construction in a manner so as to allow a minimum of 2" of movement in all directions with no bending or sagging of the angle.

1. Except where modified in individual paragraphs of this Section, provide hanger support in accordance with the following:

RECTANGULAR DUCT HANGER SUPPORT REQUIREMENTS

SEMI-PERIMETER	PAIR @ 8 FT.	PAIR @ 5 FT.
To 30"	1"x22 Ga.	1"x22 Ga.
31" to 72"	1"x20 Ga.	1"x22 Ga.
73" to 96"	1"x18 Ga.	1"x22 Ga.

2. Install duct supports to rectangular ducts with sheet metal screws. Provide one screw at top of duct and one screw at bottom of duct.

F. Installation of Flexible Ductwork:

1. Provide flexible ducts with supports at 30" centers with 2" wide, 26 Ga. steel hanger collar attached to the structure with an approved duct hanger. Installation shall minimize sharp radius turns or offsets.
   a. Supports shall be in accordance with UMC Standard 6-5
2. Make connection to duct with spin-in fittings, with air scoop and balance damper.

G. Paint inside of ducts, visible through grille, flat black.

H. Where ductwork is installed in finished areas of buildings that do not have ceilings, paint ductwork, support hangers, and air inlets and outlets to match adjacent architectural surfaces.

3.5 CLEANING AND PROTECTION

A. Clean ductwork internally, unit by unit as it is installed, of dust and debris. Clean external surfaces of foreign substances that may cause corrosive deterioration of metal or where ductwork is to be painted.

B. Strip protective paper from stainless ductwork surfaces, and repair finish wherever it has been damaged.

C. Temporary Closure: At ends of ducts that are not connected to equipment or air distribution devices at time of ductwork installation, provide temporary closure of polyethylene film or other covering that will prevent entrance of dust and debris until connections are to be completed.

3.6 DAMPERS

A. All dampers automatically controlled by dampers motors are specified under “Temperature Control System” except those specified with items of equipment.

B. Provide opposed blade manual air dampers at each branch duct connection and at locations indicated on the Drawings and where necessary to control airflow for balancing system. Provide an opposed-blade balancing-damper in each zone supply duct. Provide an access panel or Ventlok flush-type damper regulator on ceiling or wall for each concealed damper.

C. Install fusible link fire dampers full size of duct at points where shown or required.

D. Provide 18”x12” minimum hinged access doors in ductwork and furring for easy access to each fire damper; insulated access doors in insulated ducts. Label access doors with ½” high red letters.

1. Provide Ventlok access doors with Series 100 hardware for convenient access to all automatic dampers and other components of the system, insulated type in insulated ducts. Provide Ventlok #202 for light duty up to 2” thick doors. Provide #260 hinges on all hinged and personnel access doors and include gasketing.

3.7 AIR INLETS AND OUTLETS

A. Provide all air inlets and outlets with gaskets and install so that there will be no streaking of the walls or ceilings due to leakage. Duct connection to outlet on exposed duct shall be full size of outer perimeter of outlet flange.

B. Ceiling mounted air terminals or services installed in T-bar type ceiling systems shall be positively attached to the ceiling suspension main runners or to cross runners with the same carrying capacity as the main runners.

1. Terminals or services weighing not more than 56 pounds shall have two #12 Ga. hangers connected from the terminal or service to the structure above. These wires may be slack.

2. Terminals or services weighing more than 56 pounds shall be supported directly from the structure above by approved hangers. Provide 4 taut 12 Ga. wires each, attached to the fixture and to the structure above. The 4 taut 12 Ga. wires, including their attachment

to the structure above must be capable of supporting 4 times the weight of the unit.

3. Secure air inlets and outlets to main runners of ceiling suspension system with 2 sheet metal screws.

C. Furnish all air inlets and outlets with baked prime coat unless otherwise noted. Provide off-white baked enamel finish on ceiling-mounted air inlets and outlets. Exposed mounting screws shall be painted to match the material being secured.

D. Air inlets and outlets shall match all qualities of these specified including appearance, throw, noise level, adjustability, etc.

3.8 FANS

A. Provide access doors for fans or motors mounted in ductwork.

B. Mount all fans so that they are completely isolated from building.

C. Fan motors mounted in air-stream to be totally enclosed.

D. Completely line supply, return or exhaust fan cabinets with 1” thick, ¾ pound density acoustic insulation securely cemented in place.

E. Roof fans shall be mounted level.

3.9 EQUIPMENT CHECK, TEST AND START

A. A specialized company, acting as a subcontractor to the air conditioning contractor shall perform the check, test and start of each air-handling unit. The company selected shall have had experience on similar projects and shall have demonstrated by past performance that the personnel are qualified to do such work. The firm selected shall have approval of the Architect prior to start of work.

B. Provide all personnel, test instruments, and equipment to properly perform the check, test and start.

C. The check, test and start of each item of equipment shall be in accordance with manufacturer’s printed instructions. Three copies of the completed check, test and start report of each item of equipment shall be bound with the operating and maintenance instructions. Include a full test of all economizer operations as part of the equipment check. Confirm that wiring and motor operation is correct.

D. Upon completion of work, provide a schedule of planned maintenance indicating frequency of service for all equipment components. Post schedule where directed under plastic.

3.10 TESTING AND BALANCING

A. Contractor shall provide for adjustments and/or additions or modifications to fan and motor sheaves, belts, damper linkages and the like to achieve proper air balance at no additional cost.

B. Testing and balancing shall be performed in complete accordance with AABC National Standards for Field Measurements and Instrumentation, Volume Four. Testing and balancing shall be performed on air distribution systems, chilled water system, heating water system, and domestic water system.

C. Balance air quantities of supply, return, outside air, and exhaust to achieve those given on Drawings with accuracy within minus 5 percent and plus 10 percent. Ensure that dampers remain full open during economizer cycle, and full closed at all other times. Test each system for building operating pressure, under all operating conditions, including all phases of the economy cycle. Maximum building pressure shall not exceed +0.04 “ WC.

D. Instruments used for testing and balancing of systems shall have been calibrated within a period of six months and shall be checked for accuracy prior to start of work.

E. Adjust single or double deflection registers and variable pattern diffusers to evenly distribute air within the conditioned space. The terminal air velocity at 5 foot above the floor shall not exceed 50 FPM in normal air-conditioned spaces.

3.11 EQUIPMENT MOUNTING

A. Mounting and anchorage of equipment shall be in strict compliance with drawing details. Alternate anchorage methods will not be considered for roof mounted equipment.

3.12 OPERATOR TRAINING

A. On-site training services shall be made available to the facility maintenance and operation staff. The contractor’s designated personnel shall present all O&M manuals for newly installed equipment and controls components, and demonstration shall be provided for, but not be limited to, the following:

1. Control system login, set point manipulation, monitoring & trend data observation.
2. Access & provision for common equipment services and/or warranty requirements, such as fan belt replacement, filter changeout, lubrication, etc.

END OF SECTION

SECTION 23 31 13

METAL DUCTS

PART 1 GENERAL

1.1 SUMMARY

A. Section Includes:
1. Rectangular ducts and fittings.
2. Round ducts and fittings.
3. Sheet metal materials.
4. Sealants and gaskets.
5. Hangers and supports.
6. Seismic-restraint devices.

1.2 PERFORMANCE REQUIREMENTS

A. Delegated Duct Design: Duct construction, including sheet metal thicknesses, seam and joint construction, reinforcements, and hangers and supports, shall comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" and performance requirements and design criteria indicated in "Duct Schedule" Article.

B. Structural Performance: Duct hangers and supports and seismic restraints shall withstand the effects of gravity and seismic loads and stresses within limits and under conditions described in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" and ASCE/SEI 7.
1. Seismic Hazard Level A: Seismic force to weight ratio, 0.48.
2. Seismic Hazard Level B: Seismic force to weight ratio, 0.30.
3. Seismic Hazard Level C: Seismic force to weight ratio, 0.15.

C. Airstream Surfaces: Surfaces in contact with the airstream shall comply with requirements in ASHRAE 62.1.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Shop Drawings:
1. Fabrication, assembly, and installation, including plans, elevations, sections, components, and attachments to other work.
2. Factory- and shop-fabricated ducts and fittings.
3. Duct layout indicating sizes, configuration, and static-pressure classes.
4. Elevation of top of ducts.
5. Dimensions of main duct runs from building grid lines.
6. Fittings.
7. Reinforcement and spacing.

8. Seam and joint construction.
9. Penetrations through fire-rated and other partitions.
10. Equipment installation based on equipment being used on Project.
11. Locations for duct accessories, including dampers, turning vanes, and access doors and panels.
12. Hangers and supports, including methods for duct and building attachment, seismic restraints, and vibration isolation.

C. Delegated-Design Submittal:
1. Sheet metal thicknesses.
2. Joint and seam construction and sealing.
3. Reinforcement details and spacing.
4. Materials, fabrication, assembly, and spacing of hangers and supports.
5. Design Calculations: Calculations for selecting hangers and supports and seismic restraints.

D. Coordination Drawings: Plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:
1. Duct installation in congested spaces, indicating coordination with general construction, building components, and other building services. Indicate proposed changes to duct layout.
2. Suspended ceiling components.
3. Structural members to which duct will be attached.
4. Size and location of initial access modules for acoustical tile.
5. Penetrations of smoke barriers and fire-rated construction.
6. Items penetrating finished ceiling including the following:
a. Lighting fixtures.
b. Air outlets and inlets.
c. Speakers.
d. Sprinklers.
e. Access panels.
f. Perimeter moldings.

E. Welding certificates.

1.4 QUALITY ASSURANCE

A. Welding Qualifications: Qualify procedures and personnel according to AWS D9.1M/D9.1, "Sheet Metal Welding Code," for duct joint and seam welding.

B. Welding Qualifications: Qualify procedures and personnel according to the following:
1. AWS D1.1/D1.1M, "Structural Welding Code - Steel," for hangers and supports.
2. AWS D1.2/D1.2M, "Structural Welding Code - Aluminum," for aluminum supports.
3. AWS D9.1M/D9.1, "Sheet Metal Welding Code," for duct joint and seam welding.

C. ASHRAE Compliance: Applicable requirements in ASHRAE 62.1, Section 5 - "Systems and Equipment" and Section 7 - "Construction and System Start-Up."

D. ASHRAE/IESNA Compliance: Applicable requirements in ASHRAE/IESNA 90.1, Section 6.4.4 - "HVAC System Construction and Insulation."

PART 2 PRODUCTS

2.1 RECTANGULAR DUCTS AND FITTINGS

A. General Fabrication Requirements: Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" based on indicated static-pressure class unless otherwise indicated.

B. Transverse Joints: Select joint types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Figure 2-1, "Rectangular Duct/Transverse Joints," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."

C. Longitudinal Seams: Select seam types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Figure 2-2, "Rectangular Duct/Longitudinal Seams," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."

D. Elbows, Transitions, Offsets, Branch Connections, and Other Duct Construction: Select types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Chapter 4, "Fittings and Other Construction," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."

2.2 ROUND DUCTS AND FITTINGS

A. General Fabrication Requirements: Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Chapter 3, "Round, Oval, and Flexible Duct," based on indicated static-pressure class unless otherwise indicated.

1. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:
    a. Lindab Inc.
    b. McGill AirFlow LLC.
    c. SEMCO Incorporated.
    d. Sheet Metal Connectors, Inc.
    e. Spiral Manufacturing Co., Inc.
    f. Or approved equal.

B. Transverse Joints: Select joint types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Figure 3-1, "Round Duct Transverse Joints," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal

and Flexible."

1. Transverse Joints in Ducts Larger Than 60 Inches in Diameter: Flanged.

C. Longitudinal Seams: Select seam types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Figure 3-2, "Round Duct Longitudinal Seams," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."

1. Fabricate round ducts larger Than 90 inches in diameter with butt-welded longitudinal seams.

D. Tees and Laterals: Select types and fabricate according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Figure 3-5, "90 Degree Tees and Laterals," and Figure 3-6, "Conical Tees," for static-pressure class, applicable sealing requirements, materials involved, duct-support intervals, and other provisions in SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."

2.3 SHEET METAL MATERIALS

A. General Material Requirements: Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" for acceptable materials, material thicknesses, and duct construction methods unless otherwise indicated. Sheet metal materials shall be free of pitting, seam marks, roller marks, stains, discolorations, and other imperfections.

B. Galvanized Sheet Steel: Comply with ASTM A 653/A 653M.

1. Galvanized Coating Designation: G60.
2. Finishes for Surfaces Exposed to View: Mill phosphatized.

C. Carbon-Steel Sheets: Comply with ASTM A 1008/A 1008M, with oiled, matte finish for exposed ducts.

D. Stainless-Steel Sheets: Comply with ASTM A 480/A 480M, Type 304 or 316, as indicated in the "Duct Schedule" Article; cold rolled, annealed, sheet. Exposed surface finish shall be No. 2B, No. 2D, No. 3, or No. 4 as indicated in the "Duct Schedule" Article.

E. Aluminum Sheets: Comply with ASTM B 209 Alloy 3003, H14 temper; with mill finish for concealed ducts, and standard, one-side bright finish for duct surfaces exposed to view.

F. Reinforcement Shapes and Plates: ASTM A 36/A 36M, steel plates, shapes, and bars; black and galvanized.

1. Where black- and galvanized-steel shapes and plates are used to reinforce aluminum ducts, isolate the different metals with butyl rubber, neoprene, or EPDM gasket materials.

G. Tie Rods: Galvanized steel, 1/4-inch minimum diameter for lengths 36 inches or less; 3/8-inch minimum diameter for lengths longer than 36 inches.

2.4 SEALANT AND GASKETS

A. General Sealant and Gasket Requirements: Surface-burning characteristics for sealants and gaskets shall be a maximum flame-spread index of 25 and a maximum smoke-developed index of 50 when tested according to UL 723; certified by an NRTL.

B. Two-Part Tape Sealing System:
   1. Tape: Woven cotton fiber impregnated with mineral gypsum and modified acrylic/silicone activator to react exothermically with tape to form hard, durable, airtight seal.
   2. Tape Width:3 inches.
   3. Sealant: Modified styrene acrylic.
   4. Water resistant.
   5. Mold and mildew resistant.
   6. Maximum Static-Pressure Class: 10-inch wg, positive and negative.
   7. Service: Indoor and outdoor.
   8. Service Temperature: Minus 40 to plus 200 deg F.
   9. Substrate: Compatible with galvanized sheet steel (both PVC coated and bare), stainless steel, or aluminum.
   10. For indoor applications, use sealant that has a VOC content of 250 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
   11. Sealant shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

C. Water-Based Joint and Seam Sealant:
   1. Application Method: Brush on.
   2. Solids Content: Minimum 65 percent.
   3. Shore A Hardness: Minimum 20.
   4. Water resistant.
   5. Mold and mildew resistant.
   6. VOC: Maximum 75 g/L (less water).
   7. Maximum Static-Pressure Class: 10-inch wg, positive and negative.
   8. Service: Indoor or outdoor.
   9. Substrate: Compatible with galvanized sheet steel (both PVC coated and bare), stainless steel, or aluminum sheets.

D. Flanged Joint Sealant: Comply with ASTM C 920.
   1. General: Single-component, acid-curing, silicone, elastomeric.
   2. Type: S.
   3. Grade: NS.
   4. Class: 25.
   5. Use: O.
   6. For indoor applications, use sealant that has a VOC content of 250 g/L or less when calculated according to 40 CFR 59, Subpart D (EPA Method 24).
   7. Sealant shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

E. Flange Gaskets: Butyl rubber, neoprene, or EPDM polymer with polyisobutylene plasticizer.

F. Round Duct Joint O-Ring Seals:

1. Seal shall provide maximum leakage class of 3 cfm/100 sq. ft. at 1-inch wg and shall be rated for 10-inch wg static-pressure class, positive or negative.
2. EPDM O-ring to seal in concave bead in coupling or fitting spigot.
3. Double-lipped, EPDM O-ring seal, mechanically fastened to factory-fabricated couplings and fitting spigots.

2.5 HANGERS AND SUPPORTS

A. Hanger Rods for Noncorrosive Environments: Cadmium-plated steel rods and nuts.

B. Hanger Rods for Corrosive Environments: Electrogalvanized, all-thread rods or galvanized rods with threads painted with zinc-chromate primer after installation.

C. Strap and Rod Sizes: Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Table 5-1, "Rectangular Duct Hangers Minimum Size," and Table 5-2, "Minimum Hanger Sizes for Round Duct."

D. Steel Cables for Galvanized-Steel Ducts: Galvanized steel complying with ASTM A 603.

E. Steel Cables for Stainless-Steel Ducts: Stainless steel complying with ASTM A 492.

F. Steel Cable End Connections: Cadmium-plated steel assemblies with brackets, swivel, and bolts designed for duct hanger service; with an automatic-locking and clamping device.

G. Duct Attachments: Sheet metal screws, blind rivets, or self-tapping metal screws; compatible with duct materials.

H. Trapeze and Riser Supports:

1. Supports for Galvanized-Steel Ducts: Galvanized-steel shapes and plates.
2. Supports for Stainless-Steel Ducts: Stainless-steel shapes and plates.
3. Supports for Aluminum Ducts: Aluminum or galvanized steel coated with zinc chromate.

2.6 SEISMIC-RESTRAINT DEVICES

A. Manufacturers: Subject to compliance with requirements, available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following:

1. Cooper B-Line, Inc.; a division of Cooper Industries.
2. Ductmate Industries, Inc.
3. Hilti Corp.
4. Kinetics Noise Control.
5. Loos & Co.; Cableware Division.
6. Mason Industries.
7. TOLCO; a brand of NIBCO INC.
8. Unistrut Corporation; Tyco International, Ltd.
9. Or approved equal.

B. General Requirements for Restraint Components: Rated strengths, features, and applications shall be as defined in reports by an agency acceptable to authorities having jurisdiction.

1. Structural Safety Factor: Allowable strength in tension, shear, and pullout force of components shall be at least four times the maximum seismic forces to which they will be subjected.

C. Channel Support System: Shop- or field-fabricated support assembly made of slotted steel channels rated in tension, compression, and torsion forces and with accessories for attachment to braced component at one end and to building structure at the other end. Include matching components and corrosion-resistant coating.

D. Restraint Cables: ASTM A 603, galvanized-steel cables with end connections made of cadmium-plated steel assemblies with brackets, swivel, and bolts designed for restraining cable service; and with an automatic-locking and clamping device or double-cable clips.

E. Hanger Rod Stiffener: Reinforcing steel angle clamped to hanger rod.

F. Mechanical Anchor Bolts: Drilled-in and stud-wedge or female-wedge type. Select anchor bolts with strength required for anchor and as tested according to ASTM E 488.

PART 3 EXECUTION

3.1 DUCT INSTALLATION

A. Drawing plans, schematics, and diagrams indicate general location and arrangement of duct system. Indicated duct locations, configurations, and arrangements were used to size ducts and calculate friction loss for air-handling equipment sizing and for other design considerations. Install duct systems as indicated unless deviations to layout are approved on Shop Drawings and Coordination Drawings.

B. Install ducts according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" unless otherwise indicated.

C. Install round ducts in maximum practical lengths.

D. Install ducts with fewest possible joints.

E. Install factory- or shop-fabricated fittings for changes in direction, size, and shape and for branch connections.

F. Unless otherwise indicated, install ducts vertically and horizontally, and parallel and perpendicular to building lines.

G. Install ducts close to walls, overhead construction, columns, and other structural and permanent enclosure elements of building.

H. Install ducts with a clearance of 1 inch, plus allowance for insulation thickness.

I. Route ducts to avoid passing through transformer vaults and electrical equipment rooms and enclosures.

J. Where ducts pass through non-fire-rated interior partitions and exterior walls and are exposed to view, cover the opening between the partition and duct or duct insulation with

sheet metal flanges of same metal thickness as the duct. Overlap openings on four sides by at least 1-1/2 inches.

K. Where ducts pass through fire-rated interior partitions and exterior walls, install fire dampers.

L. Protect duct interiors from moisture, construction debris and dust, and other foreign materials. Comply with SMACNA's "IAQ Guidelines for Occupied Buildings Under Construction," Appendix G, "Duct Cleanliness for New Construction Guidelines."

3.2 INSTALLATION OF EXPOSED DUCTWORK

A. Protect ducts exposed in finished spaces from being dented, scratched, or damaged.

B. Trim duct sealants flush with metal. Create a smooth and uniform exposed bead. Do not use two-part tape sealing system.

C. Grind welds to provide smooth surface free of burrs, sharp edges, and weld splatter. When welding stainless steel with a No. 3 or 4 finish, grind the welds flush, polish the exposed welds, and treat the welds to remove discoloration caused by welding.

D. Maintain consistency, symmetry, and uniformity in the arrangement and fabrication of fittings, hangers and supports, duct accessories, and air outlets.

E. Repair or replace damaged sections and finished work that does not comply with these requirements.

3.3 DUCT SEALING

A. Seal ducts for duct static-pressure, seal classes, and leakage classes specified in "Duct Schedule" Article according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible." In no case should leakage exceed 10% of total system capacity.

B. Seal ducts to the following seal classes according to SMACNA's "HVAC Duct Construction Standards - Metal and Flexible":

1. Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible."
2. Outdoor, Supply-Air Ducts: Seal Class A.
3. Outdoor, Exhaust Ducts: Seal Class C.
4. Outdoor, Return-Air Ducts: Seal Class C.
5. Unconditioned Space, Supply-Air Ducts in Pressure Classes 2-Inch wg and Lower: Seal Class B.
6. Unconditioned Space, Supply-Air Ducts in Pressure Classes Higher Than 2-Inch wg: Seal Class A.
7. Unconditioned Space, Exhaust Ducts: Seal Class C.
8. Unconditioned Space, Return-Air Ducts: Seal Class B.
9. Conditioned Space, Supply-Air Ducts in Pressure Classes 2-Inch wg and Lower: Seal Class C.
10. Conditioned Space, Supply-Air Ducts in Pressure Classes Higher Than 2-Inch wg: Seal Class B.
11. Conditioned Space, Exhaust Ducts: Seal Class B.
12. Conditioned Space, Return-Air Ducts: Seal Class C.

3.4 HANGER AND SUPPORT INSTALLATION

A. Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Chapter 5, "Hangers and Supports."

B. Building Attachments: Concrete inserts, powder-actuated fasteners, or structural-steel fasteners appropriate for construction materials to which hangers are being attached.

1. Where practical, install concrete inserts before placing concrete.
2. Install powder-actuated concrete fasteners after concrete is placed and completely cured.
3. Use powder-actuated concrete fasteners for standard-weight aggregate concretes or for slabs more than 4 inches thick.
4. Do not use powder-actuated concrete fasteners for lightweight-aggregate concretes or for slabs less than 4 inches thick.
5. Do not use powder-actuated concrete fasteners for seismic restraints.

C. Hanger Spacing: Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible," Table 5-1, "Rectangular Duct Hangers Minimum Size," and Table 5-2, "Minimum Hanger Sizes for Round Duct," for maximum hanger spacing; install hangers and supports within 24 inches of each elbow and within 48 inches of each branch intersection.

D. Hangers Exposed to View: Threaded rod and angle or channel supports.

E. Support vertical ducts with steel angles or channel secured to the sides of the duct with welds, bolts, sheet metal screws, or blind rivets; support at each floor and at a maximum intervals of 16 feet.

F. Install upper attachments to structures. Select and size upper attachments with pull-out, tension, and shear capacities appropriate for supported loads and building materials where used.

G. Refer to plans for hanger details. Comply with this section or the plans, whichever is more stringent.

3.5 SEISMIC-RESTRAINT-DEVICE INSTALLATION

A. Install ducts with hangers and braces designed to support the duct and to restrain against seismic forces required by applicable building codes. Comply with ASCE/SEI 7.

1. Space lateral supports a maximum of 40 feet o.c., and longitudinal supports a maximum of 80 feet o.c.
2. Brace a change of direction longer than 12 feet.

B. Select seismic-restraint devices with capacities adequate to carry present and future static and seismic loads.

C. Install cables so they do not bend across edges of adjacent equipment or building structure.

D. Install cable restraints on ducts that are suspended with vibration isolators.

E. Install seismic-restraint devices using methods approved by an agency acceptable to authorities having jurisdiction.

F. Attachment to Structure: If specific attachment is not indicated, anchor bracing and restraints to structure, to flanges of beams, to upper truss chords of bar joists, or to concrete members.

G. Drilling for and Setting Anchors:

1. Identify position of reinforcing steel and other embedded items prior to drilling holes for anchors. Do not damage existing reinforcement or embedded items during drilling. Notify the Architect if reinforcing steel or other embedded items are encountered during drilling. Locate and avoid prestressed tendons, electrical and telecommunications conduit, and gas lines.
2. Do not drill holes in concrete or masonry until concrete, mortar, or grout has achieved full design strength.
3. Wedge Anchors: Protect threads from damage during anchor installation. Heavy-duty sleeve anchors shall be installed with sleeve fully engaged in the structural element to which anchor is to be fastened.
4. Set anchors to manufacturer's recommended torque, using a torque wrench.
5. Install zinc-coated steel anchors for interior applications and stainless-steel anchors for applications exposed to weather.

3.6 CONNECTIONS

A. Make connections to equipment with flexible connectors.

B. Comply with SMACNA's "HVAC Duct Construction Standards - Metal and Flexible" for branch, outlet and inlet, and terminal unit connections.

3.7 DUCT CLEANING

A. Clean new duct system(s) before testing, adjusting, and balancing.

B. Use service openings for entry and inspection.

1. Create new openings and install access panels appropriate for duct static-pressure class if required for cleaning access. Provide insulated panels for insulated or lined duct. Patch insulation and liner as recommended by duct liner manufacturer.
2. Disconnect and reconnect flexible ducts as needed for cleaning and inspection.
3. Remove and reinstall ceiling to gain access during the cleaning process.

C. Particulate Collection and Odor Control:

1. When venting vacuuming system inside the building, use HEPA filtration with 99.97 percent collection efficiency for 0.3-micron-size (or larger) particles.
2. When venting vacuuming system to outdoors, use filter to collect debris removed from HVAC system, and locate exhaust downwind and away from air intakes and other points of entry into building.

D. Clean the following components by removing surface contaminants and deposits:

1. Air outlets and inlets (registers, grilles, and diffusers).
2. Supply, return, and exhaust fans including fan housings, plenums (except ceiling supply and return plenums), scrolls, blades or vanes, shafts, baffles, dampers, and drive assemblies.

3. Air-handling unit internal surfaces and components including mixing box, coil section, air wash systems, spray eliminators, condensate drain pans, humidifiers and dehumidifiers, filters and filter sections, and condensate collectors and drains.
4. Coils and related components.
5. Return-air ducts, dampers, actuators, and turning vanes except in ceiling plenums and mechanical equipment rooms.
6. Supply-air ducts, dampers, actuators, and turning vanes.
7. Dedicated exhaust and ventilation components and makeup air systems.

E. Mechanical Cleaning Methodology:

1. Clean metal duct systems using mechanical cleaning methods that extract contaminants from within duct systems and remove contaminants from building.
2. Use vacuum-collection devices that are operated continuously during cleaning. Connect vacuum device to downstream end of duct sections so areas being cleaned are under negative pressure.
3. Use mechanical agitation to dislodge debris adhered to interior duct surfaces without damaging integrity of metal ducts, duct liner, or duct accessories.
4. Clean fibrous-glass duct liner with HEPA vacuuming equipment; do not permit duct liner to get wet. Replace fibrous-glass duct liner that is damaged, deteriorated, or delaminated or that has friable material, mold, or fungus growth.
5. Clean coils and coil drain pans according to NADCA 1992. Keep drain pan operational. Rinse coils with clean water to remove latent residues and cleaning materials; comb and straighten fins.
6. Provide drainage and cleanup for wash-down procedures.
7. Antimicrobial Agents and Coatings: Apply EPA-registered antimicrobial agents if fungus is present. Apply antimicrobial agents according to manufacturer's written instructions after removal of surface deposits and debris.

END OF SECTION

SECTION 26 05 00 - COMMON WORK RESULTS FOR ELECTRICAL

PART 1 GENERAL

1.1 SECTION INCLUDES

A. All basic instructions of the project including scope and project electrical requirements.

1.2 RELATED SECTIONS

A. All of the Division 26 Sections relate.

1.3 QUALIFICATIONS

A. Electrical Contractor shall be established with a minimum of 5 years in the area with a working knowledge of the California Electrical Code.

B. All electrical equipment shall be of a manufacturer as specified or approved equal.

1.4 REFERENCES

A. California Electrical Code 2016 Edition

B. California Building Code 2016 Edition

C. California Mechanical Code 2016 Edition

D. California Fire Code 2013 Edition.

PART 2 SCOPE AND PROJECT ELECTRICAL REQUIREMENTS

2.1 PROVISIONS

A. The General Conditions, Supplemental Conditions and Division 01, General Requirements, are a part of this section and the Contract for this work and apply to this Section as fully as if repeated herein.

2.2 SCOPE

A. Provide all labor, materials, tools, plant equipment, transportation and perform all operations necessary for and completion of all electrical work whether specifically mentioned or not; all as indicated, specified herein, and/or implied thereby to carry out the apparent intent thereof. Some of the items of work specified herein are as follows.

1. Study work and related drawings and specifications of all other crafts whose work abuts, adjoins, or in any manner is affected by work of this Section. Consult with other trades and with them expedite and coordinate material and labor to avoid omissions and delays.
2. Complete system of 208/120 volt, three phase, four wire, wiring distributions including all branch circuits and outlets for the lighting and convenience outlets, as shown on the drawings.
3. Electrical Service.

4. Any electrical item that needs to be relocated temporarily in order to carry out the contract works shall be included in the bid.
5. All lighting fixtures furnished and installed complete with lamps.
6. Exit and Emergency Lighting.
7. Provide data and telephone system conduits and boxes, as shown on the plans and specified herein. All outlets, cover plates, cables and terminations for data system by owners vendor.
8. Framing and other associated work required for the installation of the electrical system.
9. Submission of shop drawings and submittals.
10. Excavation, backfill, framing and other associated work required for the installation of the electrical systems.
11. “As-Built” drawings.
12. Acceptance testing for all the different systems installed. Provide itemized list of tests carried out and recorded test results.
13. Prepare day-by-day record of "as built" changes as specified hereinafter.
14. Furnish, install and connect all line voltage conduit and wiring to mechanical equipment and other Owner furnished electrical equipment unless otherwise noted. Conduit and wiring for low voltage control wiring of the HVAC systems is under another section unless otherwise noted.
15. Furnish and install disconnect switches, as required for the mechanical equipment and controls as shown on electrical and mechanical drawings. Install all motor starters furnished loose by Mechanical Contractor.

2.3 WORK NOT INCLUDED:

The following work as outlined is not included in the Electrical Contract; however, this Contractor shall cooperate with the other contractors involved and shall be responsible to give complete directions on sizes of openings, locations, etc., and to insure that the completed electrical installation shall be of good workmanship and in accordance with drawings and specifications.

A. Telephone and Data processing system head end equipment and rack.

2.4 QUALITY ASSURANCE:

A. QUALIFICATIONS OF INSTALLERS: For the actual fabrication, installation and testing of the electrical work, use only personnel who are thoroughly trained and experienced in the skills required and who are completely familiar with the manufacturers recommend methods of installation, the equipment to be utilized, and the requirements of this work.

B. PERMITS AND ORDINANCES: Comply with all codes, ordinances, and authorities having jurisdiction, including all local ordinances, the State of California Title 24, the California Electrical Code, and the California Building Code. Electrical Contractor shall procure and pay for all permits, licenses, etc. required to carry on and complete the work. Additionally:

1. Comply with pertinent requirements of Underwriters' Laboratories, incorporated for all items installed for which UL standards have been established.

2.5 REVIEW SUBMITTALS:

A. For ease of maintenance and parts replacement, to the maximum extent possible use equipment of a single manufacturer. The Architect reserves the right to reject any Materials List which contains equipment from various manufacturers if suitable materials can be secured from fewer manufacturers and to require that the source of materials be unified to the maximum extent possible.

B. When specific names are used in connection with materials, they are used as standards only, but this implies no right upon the part of the Contractor to use other materials or methods unless approved as equal in quality and utility by the Architect in writing and in accordance with provisions for substitutions previously stipulated in these specifications.

C. Shop drawings and all supporting data shall be submitted as instruments of the Contractor. Contractor shall place his stamp on the cover sheet of submittal documents, thereby stating that the equipment meets all requirements of the conditions. At least one set of submittals shall have check marks at each item indicating that the Contractor has verified compliance with the above requirements.

D. Should the original submittal of a proposed substitution be rejected, the specified item shall be furnished.

E. Within twenty-one (21) days after award of contract, submit (7) bound copies of brochures containing complete information and catalog cuts on all equipment including, that which is to be furnished as specified. Include wiring diagrams where so required. The brochures shall be bound separately according to classifications of equipment such as power, lighting, emergency generator, signal systems and miscellaneous systems. Proposed substitutions shall be accompanied by catalog cuts, ratings, sizes, performance curves, shop drawings and other data complete to prove full equality to the specified item. At least one copy of the submittals for each system shall be made up of original printed manufacturer's cut sheets. Additional copies by may be made up of Xerox copies. FAX submittals and electronically transmitted submittals are not acceptable and will be returned unreviewed.

F. Approval of a substitution does not authorize any deviation from the utility, size or function of the specified item unless specifically pointed out and approval requested in the letter of submittals. Responsibility for conflicts due to space limitations are not relieved by approval of a substitution. If revision of wiring, piping or arrangement of other equipment is necessary, after approval, furnish the Architect with (7) copies for file and future reference.

G. Panelboard submittals shall be arranged to show bussing circuit numbers with respective branch circuit devices similar to schedules on drawings. Switchboard and motor control center submittals shall show elevations indicating layout of devices, metering, etc. Device ratings, circuit numbers and nameplates shall be in table form. Terminal cabinet submittals shall include elevations with terminal strip mounting arrangement.

H. Unless otherwise shown or specified, material shall be new, full weight, standard, the best quality of its' kind and satisfactory to the Architect. Materials shall be stored and protected as necessary and/or required by the Architect, and the Contractor shall be entirely

responsible for damage or loss from any cause. Unless otherwise shown or specified, major equipment shall be the product of a manufacturer who has for a period of not less than five (5) years, been in successful manufacture of the equipment and who has nationally distributed catalog covering ratings and specifications of said equipment.

I. Electrical materials and equipment shall bear the label of, or be listed by, the Underwriters' Laboratories unless of a type for which label or listing service is not provided.

J. Materials and components shall conform to industrial standards including:

N.E.M.A. - National Electrical Manufacturers' Association

A.S.A. - American Standards Association

A.S.T.M. - American Society of Testing Materials

I.P.C.E.A. - Insulated Power Cable Engineers' Association

C.B.M. - Certified Ballast Manufacturers

K. Samples of fixtures, materials and equipment shall be submitted for approval of Architect if requested.

L. As a minimum, submittals shall be provided for the following items/systems:

1. Basic Electrical Materials.
2. Light fixtures and controls.
3. Panelboards.
4. Main service switchboard.

2.6 PRODUCT HANDLING:

A. Delivery and Storage: Deliver material in time to insure uninterrupted progress of the work. Materials shall be stored in a manner to preclude damage and permit ready access for inspection and identification of each shipment. Materials shall be kept free from dirt, grease and other foreign matter, and shall be protected from corrosion. Materials showing evidence of damage will be rejected and shall be immediately removed from the work.

B. Protection: Use all means necessary to protect the electrical work and fixtures before, during, and after installation and to protect the installed work and materials of all other trades.

C. Replacements: In the event of damage to either the work or materials hereunder or the work and/or materials of other trades, immediately make all repairs and replacements necessary to the approval of the Architect and at no additional expense to the Owner.

2.7 JOB CONDITIONS:

A. Examination of Site: Contractor shall be held to have visited the site and satisfied himself as to the conditions under which the work is to be performed. Contractor shall check all existing conditions which may affect the work under this Section. No allowances will subsequently be made on behalf of the Contractor for any extra expense to which

Contractor may be put due to any failure or neglect relative to the discovery of conditions affecting the work under this Section.

B. Specification and Contract Drawings: Accuracy of data given herein and on the drawings are as exact as could be secured, but their extreme accuracy is not guaranteed. The drawings and specifications are for the assistance and guidance of the Contractor and exact locations, distances, levels, etc., will be governed by the building and the Contractor shall accept same with this understanding.

1. Drawings and specifications may be superseded by later detail specifications and detail drawings prepared by the Architect, and the Contract shall conform to them and to such reasonable changes in the Contract Drawings as may be called for by those revised drawings without extra cost to the Owner. Where work called for exceeds code requirements, drawings and specifications shall take precedence.
2. Layouts of equipment, accessories and wiring systems are diagrammatic (not pictorial), but shall be followed as closely as possible. Architectural, structural and other mechanical drawings shall be examined, noting all conditions that may affect this work. Report conflicting conditions to the Architect for adjustment before proceeding with work.
3. Should Contractor proceed with work without so reporting matter, he does so on his own responsibility, and shall alter work if directed by the Architect, at his own expense. Right is reserved to make minor changes in locations of equipment and wiring systems shown, providing change is ordered before conduit runs and/or work directly connected to same is installed and no extra materials are required.

C. Relocation by Owner: The Owner reserves the right to make minor changes in locations of equipment, lighting, outlets, switches, telephone outlets, and any other component of the electrical work under this Section, providing such change is ordered before conduit runs and/or work directly connected to same is installed and no extra materials are required, all at no extra cost to the Owner.

D. Working Space: Adequate working space shall be provided around electrical equipment in strict compliance with the Electrical Safety Orders. In general provide six and one half feet (6' - 6") of headroom and thirty-six inches (36") minimum clear work space in front of panelboards and controls for 120 volts and forty-two inches (42") 480 volts. Particular attention shall be paid to CEC Article 110-26 and 408.

E. Equipment Identification: Nameplates shall be installed on electrical equipment. Equipment to be so labeled shall include the following:

1. Individual enclosures such as disconnect switches, time switches, push buttons, contactors, relays, motor starters, etc.
2. Group mounted equipment such as panelboards and switchboard.
3. Individual circuit breakers on switchboards.
4. Wall switches for lighting or other use where the control function is not self-evident.
5. Each panel shall be labeled to provide the following information minimum:

   (a) Panel name.

   (b) Size of feeder feeding the panel.

(c) Rated voltage, amps and phases.

6. Each distribution panel shall be labeled to provide the following information minimum:

(a) Rated voltage, amps and phases.

(b) Main switch rating.

(c) Feeder circuit breaker rating with name of panel or equipment fed and size of feeder to this equipment.

7. Nameplates shall adequately describe the item and its' function or use of the particular equipment involved.

Nameplate material shall be laminated phenolic plastic. Black front and back with white core for normal power circuits, panels, etc. Engraving shall be through the outer layer. Embossed plastic pressure sensitive labels are not acceptable. In lieu of plastic plates, device plates shall be engraved directly with lettering filled with black enamel.

(a) Install engraved nameplates for each new panelboard, cabinet, disconnect, etc. Nameplates shall be securely fastened to the equipment with #4 phillips round head cadmium plated self-tapping screws, brass bolt.

(b) Label all switches and power receptacles as to the circuit number and panelboard that feeds them, normal and emergency. Such label shall be self adhesive white tape with black (normal power) or red (emergency power) letters made on a label maker.

F. Electrical Work for Motors and Appliances Furnished by Others:

1. Work is shown on drawings according to best information available at time drawings was prepared; but this Contractor shall obtain accurate information on equipment power requirements and connection points from Contractors furnishing the actual equipment and shall install electrical work to suit at no extra cost to Owner. Should Contractor proceed with work without first verifying accuracy of the plans, he does so on his own risk and shall alter work if required at his own expense.

2. Mechanical, Plumbing, and Fire Sprinkler Contractors shall furnish written or printed specifications, dimension sheets and wiring diagrams for the electrical work applying to the actual equipment being installed. Electrical Contractor shall be responsible for obtaining these and shall assist other Contractors in testing of their systems, but his responsibility is restricted to having correctly installed and connected electrical work in accordance with diagrams and specifications furnished him by the other Contractors.

G. OPERATIONS AND MAINTENANCE MANUALS: Provide “As-Built” drawings for each system as part of the O & M Manuel. Provide O & M Manuel for panels, light fixtures and lighting controls. Each binder shall be a 3 ring binder and have project name, contractor’s name, address, telephone and system description. Provide one binder for power/lighting systems. Do not combine these binders with any other disciplines on this project.

PART 3 EXECUTION

3.1 PREPARATION

A. REVIEW OF DEVELOPED CONDITIONS: Prior to the installation of any electrical system, under this Section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where the work hereunder can properly commence.

Verify that all electrical work can be performed in accordance with all pertinent codes and regulations, the original design, and the referenced standards.

B. DISCREPANCIES: In the event of discrepancies, immediately notify the Architect. Do not proceed with the installation of work hereunder in areas of discrepancy until all such discrepancies have been fully resolved.

3.2 EXECUTION

A. NAMEPLATES: Install engraved nameplates for each electrical device, disconnect control station, etc. Designation shall be as directed by the Engineer. Nameplates shall be securely fastened to the equipment with #4 Phillips round head cadmium plated self-tapping screws.

B. WEATHERPROOF CONSTRUCTION:

1. All wiring or equipment installed exterior to buildings or in wet or damp locations shall be weatherproof construction to suit the service conditions.
2. Outlet boxes shall be gasketed; electrical metallic tubing shall have compression type fittings; lighting fixtures shall be designed for exterior installation.
3. All exterior mounted equipment shall be corrosion resistant and constructed in accordance with NEMA standards for the service conditions encountered.

C. STRUCTURAL REQUIREMENTS: Installation under this Section shall comply with the Uniform Building Code and Title 24.

D. MANUFACTURER'S DIRECTIONS: Follow manufacturer's directions where these directions cover points not included in the drawings or in the specifications.

E. WORKMANSHIP: Workmanship shall be of the best quality and shall be performed by craftsmen to insure long and trouble-free service. The requirements of the Codes and Safety Orders are minimum standards.

F. CUTTING AND PATCHING: This Contractor shall be responsible for all cutting and patching required for the installation of the electrical work under this Section. The actual cutting and patching work shall be executed by the appropriate trade involved under the supervision of the General Contractor, but the cost of such cutting and patching shall be borne by this Contractor.

1. Neither holes or notches shall be made in any structural member without the written approval of the Structural Engineer for each specific location.
2. This Contractor shall arrange for, and bear all costs for, all necessary sleeves or openings in masonry, concrete, or other structural elements where such are permitted by the Structural Engineer.

G. CLEANING: Keep the premises in a neat, safe and orderly condition at all times during the execution of the electrical work. Areas adjacent to the electrical work, both interior and exterior shall be free from accumulations of debris and/or shipping containers and packing. All refuse shall be removed to the area of the job site set aside for its storage.

H. FLASHING AND SEALING: Flash and counter flash roof and wall penetrations in manner described under other applicable sections of this specification and as approved by the Architect. Conduits, ducts, etc. passing through finished walls shall be fitted with steel escutcheon plates, chrome or paint finish as directed. Conduits which penetrate floor slabs and concrete or masonry walls shall be grouted and sealed watertight at penetration in addition to escutcheon plate trim.

I. Cooperation and Coordination: Cooperate and coordinate with other crafts in putting the installation in place at a time when the space required by this installation is accessible. Works done with disregard to other crafts shall be moved at the Contractor's expense.

J. TESTING: The entire electrical installation shall be free from short circuits and improper grounds. Test all ground fault protection equipment where so provided. Test all wiring and connections for continuity and grounds before any fixtures or equipment are connected and where such test indicate faulty insulation or other defects, they shall be located, repaired and retested at the contractor’s expense. Electrical load shall be balanced at the panelboards. Rotation of all motors shall be checked and corrected, if necessary, after final connections are made.

1. Merger test insulation of all new feeder cables for a length of 30 seconds proior to connection between phases, between phase and neutral and between phase and ground. Use a 1000 Volt Megger. Provide a copy of test results for review by Engineer. Cables shall test at 2.5 Megohm or better..

2. System test shall be performed only by an individual who has attend a manufacturer’s training school for installation and testing the system as described herein. Testing of the system shall be performed with the test instruments as required by manufacturer; provide all instruments to make such test. Testing by means other than the manufacturer’s procedures will not be acceptable unless agreed to by the Owner, specifying Engineer and the Manufacturer.

3. For each test, the test report shall provide the following information.

    a. System Tested.

    b. Date Tested.

    c. Persons present during the test.

    d. Schedule of actual tests carried.

    e. Conclusion.

f. Signature by person responsible for the test.

g. Date of the report.

4. Demonstrate to the Owner and the Architect, that the entire installation is complete, in proper operating condition and that the Contract has been has been property and fully executed.

K. ACCEPTANCE BY GOVERNING AUTHORITIES: Upon the completion of the electrical work, and as a condition of its acceptance, this Contractor shall obtain final inspections and acceptance from local building inspection agencies, utility companies, and/or other governing authorities. Deliver to the Owner and the Architect verification of such acceptance.

3.3 COMPLETION:

A. Upon completion of work covered by this Contract, furnish Architect with Mylar transparencies, as required by the General Conditions, upon which shall be shown all changes of feeders, panels, circuits, light fixtures, etc., within building and installed under this contract, which are not in accord with these drawings for the work. Diazo sepia transparencies will not be acceptable.

B. In addition, furnish one tracing showing all outside utility lines, transformer pad, pullboxes, etc., installed under this Contract. Locate and dimension all work with reference to permanent landmarks.

C. All symbols and designations used in preparing "Record" drawings shall match those used in contract drawings. All record drawings shall be produced by CAD using same size of plan and symbols as the project plans. Each Sheet shall have “As-Built Plan” and date printed on it with complete address of the Contractor providing the As-Built plans.

D. Properly identify all stubs for future connections, as to locations and use, by setting of concrete marker at finished grade in the manner suitable to the Architect.

E. Guarantee: Acceptance of the Contract for this work includes this guarantee: The Contractor guarantees that he has performed the work in accordance with the Contract Documents. Contractor agrees to replace or repair, as new, any defective work, materials, or part which may appear within one years of final acceptance, if in the opinion of the Architect or the Owner the defect is due to workmanship or material.

Warranties, guarantees, certificates, etc. that are furnished and available for equipment and materials furnished and installed under this Section shall be properly filled out as of the date of the acceptance of the completed work by the Owner and shall be delivered to the Architect.

END OF SECTION

SECTION 26 05 19 – LOW VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Conductors

B. Lubricants

C. Splices

D. Pull Wires

E. Cable Identification

1.2 RELATED SECTIONS

A. Section 26 05 33: Raceways and Fittings

B. Section 26 27 26: Wiring Devices

C. Section 26 50 00: Lighting

1.3 REFERENCES

A. California Electrical Code 2016 Edition

PART 2 PRODUCTS

2.1 CABLES

A. Cables shall be 600V, insulated copper cables, CEC standard Types THW, THWN, THHN, or AVA, as manufactured by Essex, Houston Wire & Cable, American Insulated Wire Corp. or Rome Cable Company, subject to the following:

1. Branch circuit cables shall be copper cables, Type THWN, unless otherwise noted.
2. Cables for feeders and branch circuits installed on the roof, when permitted, shall be copper cables, Type THWN/THHN, unless otherwise noted.
3. Minimum size of all cables shall be #12 AWG unless otherwise indicated on the drawings.
4. Cables shall be delivered to the site in unbroken packages, plainly marked with the manufacturer's name, date of manufacture (not more than six months old), voltage size and classification number.
5. All wiring in continuous rows of fluorescent fixtures shall be Type MTW/AWM.
6. MC Cable and AC Cables are not approved on this project.

2.2 LUBRICANT

A. Lubricant for cable installation shall be powdered soapstone, Y-er EAS, Minerallac "Pull In" compound or other U.L. approved lubricant. Flax soap is not approved and not permitted on the job.

2.3 SPLICES

A. Splices of #10 and smaller, including fixture tape, shall be made with "Scotchlok" connectors, T&B "Piggys" or equal.

B. Splices of #8 through #4 shall be split bolt service connectors “Kerneys”, T&B “Lock Tites” or equal, insulated with Scotch #88 or Okeweld four-purpose tape.

C. Splices #2 and larger shall be OZ “ST” Series insulated with “Scotchfill” and Scotch #88 or Okeweld.

D. Splices in underground pull boxes shall be Scotchcast cast resin splices.

E. Wire splicing devices shall be sized according to manufacturer’s recommendations.

2.4 CABLE IDENTIFICATION

A. Non-ferrous identifying tags or pressure sensitive labels shall be securely fastened to all cables, feeders and power circuits in pull boxes and manholes. Tags or labels shall be stamped or printed to correspond with markings on drawings or marked so that feeder or cable may be readily identified.

2.5 PULL WIRES

A. Install a #12 THWN pull cable in all empty conduits 1" size or under and a 3/16" polypropolene rope in all conduits 1-1/4" and larger in trade size.

PART 3 EXECUTION

3.1 INSTALLATION OF CONDUCTORS

A. See Section 26 05 33, Part 3, “Execution”.

END OF SECTION

SECTION 26 05 26 – GROUNDING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Grounding System

1.2 RELATED SECTIONS

A. Section 26 05 33: Raceways and Fittings

B. Section 26 05 19: Low Voltage Cables

1.3 REFERENCES

A. California Electrical Code 2016 Edition

PART 2 PRODUCTS

2.1 MATERIALS

A. See Section 26 05 19 for Cables.

PART 3 EXECUTION

3.1 GROUNDING AND BONDING

A. Grounding and bonding shall be installed as required by the applicable codes, rules, regulations, and safety orders. Attention is directed to Article 250 of the California Electrical Code.

B. All raceway systems, supports, cabinets, switchboard, motor control equipment, motor frames, lighting fixtures and utilization apparatus shall be permanently and effectively grounded.

C. Where the raceway is used as equipment bond, good contact shall be made between conduit or tubing and panels, cabinets, outlet boxes and equipment, lighting fixtures, etc. to maintain continuity of equipment bond. Where it is not possible to obtain good contact, additional bonding shall be provided. Supplemental bonding shall be provided between raceway and enclosures at concentric knockouts and at reducing washers.

D. All non-metallic raceways exclusive of telephone and signal shall contain a code size copper conductor, green insulated, properly bonded to equipment at either end and to metallic portions of the same raceway.

E. All grounding type receptacles shall be bonded to outlet box, using code size copper conductor, green insulated, attached to receptacle grounding terminal and to lug or screw terminal in box.

F. Provide insulated green ground wire, run with the branch circuit conductors in the same raceway, for all power and lighting circuits.

G. Provide bonding conductor around flexible metallic conduit (Greenfield). Bonding conductor shall be inside flex.

H Raceway size shall be increased if necessary to accommodate bonding conductors and shall be based on raceway fill tables.

I. Where cabinets are furnished with grounding bus, all required bonding conductors should connect thereto, each with separate lug.

END OF SECTION

SECTION 26 05 33 – RACEWAYS AND BOXES FOR ELECTRICAL SYSTEMS

PART 1- GENERAL

1.1 SECTION INCLUDES

A. Raceways

B. Conduit Fittings

1.2 RELATED SECTIONS

A. Section 26 05 19: Low Voltage Cables

B. Section 26 27 26: Wiring Devices

A. California Electrical Code 2016Edition

PART 2- PRODUCTS

2.1 CONDUITS AND FITTINGS:

A. All low voltage wiring shall be in raceways. Raceways shall be run underfloor, in walls, above ceilings or exposed as indicated on drawings. Acceptable raceway systems and their limitations of use are as follows:

1. Rigid Steel Conduit may be used in all areas.
