RE: ZF#2024 -006 – Muller Tentative Parcel Map

Dear Tracy,

Farm Bureau directors reviewed the request to split the above 126.402 acre parcel into two parcels. Since the property is planted in almonds, a permanent crop, the resulting new parcels are both well forty (40) acres and meet the minimum size required by the County.

- *Minimum lot size for newly created parcels (1) in the A-N Zone is forty (40) acres for irrigated parcels primarily planted in permanent crops, such as orchards or vineyards; eighty (80) acres for irrigated parcels that are cultivated; one hundred sixty (160) acres for parcels that are generally uncultivated and/or not irrigated.*

We support this request for a parcel split. We urge the request be approved with a negative declaration.

Sincerely,

Robert H. Falconer
President
