Thank you. I've included the clerks of the board on this email.

My best,

Dotty

Subject: Public Comment Item #21: Concern About Boundary Bend Well

CAUTION: External Sender. Please do not click on links or open attachments from senders you do not trust.

Sorry, I didn't specify that I want this read as public comment:

Dear Supervisors and Staff,

I received an email with info on the Boundary Bend well that will be on your agenda, and I have major concerns about its impact on neighboring farms, including the beloved Good Humus Farm.

Capay Valley has been a beacon of hope in the movement for regenerative agriculture and community supported, organic agriculture, yet moneyed interests always have their eyes on more extraction, regardless of the consequence or playing by the same rules as others.

Please do make sure that Boundary Bend is being held to the same standards as other farmers, and that your actions are in line with your Declaration of Climate Emergency and commitment to supporting regenerative agriculture and our beloved farms who are trying to do right by the Earth and growing food with respect and dignity for the land.

Thank you,
David Abramson
