Subject: Oct 7 BOS meeting - 45 day moratorium extension

CAUTION: External Sender. Please do not click on links or open attachments from senders you do not trust.

To the Honorable Supervisors of Yolo County,

I want to thank you for your attention to this very important matter, we are at the forefront of what I am sure will be a long process in managing the effects of climate change and working to secure our future here in Yolo County.

My family lives and runs an agricultural business inside the focus area, and from what I am seeing happen around us, I would like to request you to **Please vote to extend the moratorium.** Allowing time for further understanding of the impacts of the current pumping demands in the focus area. A focus area that covers roughly 1/3 of Yolo county.

How can we possibly achieve sustainability if the demand on the aquifer is increasing every season. Please stop the mining long enough for us to understand the boundaries of our resources.

Thank you for listening and considering our future.
