To Whom It May Concern,

I am just adding my voice to the concerns of all our neighbors here in the areas of County Rd 15B, 84A and 84B.

With the continued drilling of the large agricultural wells in our area, we have noticed a steady drop in the water levels. My parents bought out here in 1985. The water table has gone down over 30' during this time. As the large wells suck more water out, it seems like we will be having to dig wells deeper to try to keep up with the loss of water. wells in the area have gone dry.

Please consider this as well as the environmental impact this will have in our area.

Please place a longer moratorium on drilling here.

Thank you very much.
