Subject: Extend the moratorium on new ag wells in the focus areas

CAUTION: External Sender. Please do not click on links or open attachments from senders you do not trust.

Dear Members of the Yolo County Board of Supervisors,

As a resident of Yolo County, I am writing to urge you to extend the moratorium on new agricultural wells in the Focus Areas.

I believe this pause is a responsible step toward protecting groundwater resources. The Focus Areas have been identified as having uncertain conditions and limited data, which makes it critical to proceed with caution.

Groundwater sustainability is essential for the future of agriculture, the environment, and all residents of Yolo County. I encourage you to continue prioritizing this issue and extend the moratorium to allow time for proper review and updated policies.

Kind Regards,

Rekha Vaitla
