GRANT AGREEMENT NUMBER 25-10638

The Department awards this Grant, and the Grantee accepts and agrees to use the Grant funds as follows:

AUTHORITY: The Department has authority to grant funds for the Project under Health and Safety Code, Section 131085(a).

PURPOSE: The Department shall award this Grant Agreement to and for the benefit of the Grantee; the purpose of the Disease Intervention Specialist (DIS) Workforce Development grant is to develop, expand, train, and sustain the disease investigation and intervention workforce and address jurisdictional prevention and response needs for human immunodeficiency virus (HIV), sexually transmitted infections (STIs), hepatitis C virus (HCV), and mpox. **The funding is intended to scale prevention, increase capacity to conduct disease investigation, ensure appropriate treatment, link people to care and ongoing case management, monitor disease trends and rapidly respond to changes in disease trends and outbreaks of STIs, HIV, HCV, and mpox.**

STI prevention is HIV prevention. People with STIs are at an increase risk for acquiring and transmitting HIV. [CDC states in the STI Treatment Guidelines](#) that “diagnosis of an STI is a biomarker for HIV acquisition, especially among persons with primary or secondary syphilis or, among MSM individuals with rectal gonorrhea or chlamydia.” Data shows men who have sex with men (MSM) diagnosed with rectal gonorrhea and early syphilis were at the greatest risk of being diagnosed with HIV infection post-STI diagnosis and that these individuals should be prioritized for more intensive prevention interventions, including PrEP ([Katz et al, 2016](#)). Hence, identifying, treating and preventing STIs has a clear link to preventing HIV infection.

Additionally, HIV, STIs, HCV, and mpox have shared populations at risk, including MSM due to similar transmission mechanisms including sexual activity. In California, STI and HIV rates are particularly high among vulnerable populations already at elevated risk for HIV, including gay, bisexual, and other MSM, transgender and non-binary individuals, BIPOC communities, people who use drugs, and people experiencing homelessness or incarceration. Recent data also indicates STI rates are significantly higher - up to 39% (Williams & Bryant, 2018) and the CDC reports an increased HIV burden among people experiencing homelessness. Additionally, a composite literature review of [STI prevalence in homeless adults](#) identified HCV as the highest reported prevalence, at 52% among older men experiencing homelessness (Williams & Bryant, 2018).

According to HHS Guidelines: Both HIV and HCV can be transmitted by percutaneous exposure to blood or blood products, sexual intercourse, and perinatal transmission; however, the relative efficiency of transmission by these routes varies substantially. HCV transmission via injection drug use remains the most common mode of acquisition in the United States. The prevalence of HCV infection among people with HIV is distributed in the following subgroups: people who inject drugs (82.4%), men who have sex with men (MSM, 6.4%). In the United States, it is estimated that 62% to 80% of people who inject drugs and have HIV also have HCV infection. Estimates of HCV/HIV coinfection in the United States have been cited as 21% but have ranged from 6% to 30% with high variability based on the distribution of HIV transmission risk factors.

The potential for rapid spread of HIV among this population of PWID was realized during a 2015 outbreak in rural Scott County, Indiana. In January 2015, disease intervention specialists reported 11 new cases of confirmed HIV infection epidemiologically linked through injection drug use; by comparison, only 5 HIV infections had been diagnosed in this county in the prior 10 years (2004–2013). By November 2015, 181 new cases of HIV had been diagnosed; 92% of infected persons were coinfecting with HCV. In this outbreak among PWID, HCV infection typically preceded HIV infection, representing an important opportunity for HIV prevention. HCV among PWID is often an indicator of syringe-sharing, which also increases HIV risk. Empirical evidence and program evaluation data in California has shown that offering HCV testing increases acceptability and utilization of HIV testing among PWID.

Finally, people who are living with or are at risk for HIV are disproportionately impacted by mpox. Mitigation of mpox severity and transmission through vaccination is a core priority in California since approximately 40% of mpox cases in California in 2023 were among people with HIV. People with HIV, particularly those with a low CD4 cell count or those not receiving antiretroviral therapy, are at higher risk for severe mpox and even death.

Evidence for increasing STI, HCV and mpox incidence and prevalence in HIV-negative men seen in HIV PrEP clinics has also led to current recommendations to monitor for STIs, HCV and mpox as part of PrEP care. For this reason, it is critical that HIV prevention funds also incorporate these preventive services.

The syndemic of HIV, STIs, HCV and mpox from sexual and/or bloodborne transmission highlights the need for a syndemic approach to risk reduction. Given this context, LHJ disease investigators, epidemiologists, clinicians, and other program and grant managers play a critical role in identifying and responding to cases of HIV, STIs, HCV, and mpox, as well as reaching their partners. This work is essential for identifying those at greatest risk for HIV for expanding prevention, conducting investigations, monitoring disease trends, ensuring treatment, linking individuals and their partners to care and prevention are vital strategies for controlling the spread of HIV, STIs, HCV and mpox in California.

Disease Intervention Specialist (DIS) Workforce Development Grant

The California Department of Public Health (CDPH), Sexually Transmitted Disease Control Branch (STDCB) will allocate approximately \$83,921,550 dollars in State local assistance funds through the Disease Intervention Specialist (DIS) Workforce Development Grant, funded by the AIDS Drug Assistance Program Rebate Fund. This Grant is to fund local disease intervention specialists supporting current or eligible services and programs as per Sections [120956](#) and [120972.2](#) of the Health and Safety Code. This Grant is set to begin on July 01, 2025, and end on June 30, 2030.

The Grantee will use this funding to develop, expand, train, and sustain the disease investigation and intervention workforce and address jurisdictional prevention and response needs for human immunodeficiency virus (HIV), sexually transmitted infections (STIs), hepatitis C virus (HCV), and mpox. **The funding is intended to scale prevention, increase capacity to conduct disease investigation, ensure appropriate treatment, link people to care and ongoing case management, monitor disease trends and rapidly respond to changes in disease trends and outbreaks of STIs, HIV, HCV, and mpox.**

Funding will be allocated to sixty-one (61) local health jurisdictions (LHJ).

CDPH/STDCB included the following factors in the allocation model:

- These funds will maintain the disease intervention specialist workforce across 61 LHJs and ensure the continuation of essential services to prevent and control HIV, STIs, HCV, and mpox.

Exhibit A
Funding Allocation Process
Disease Intervention Specialist (DIS) Workforce Development Grant

- The original 2021 cycle of grant funds were allocated to LHJs using the [United States Census Community Resilience Estimates](#) (details about what is included is available) or the Social Vulnerability Index. CDPH/STDCB used the Community Resilience Estimates since that is what CDC used to distribute the funds to states. There is an expectation that the most vulnerable communities will be supported, rather than focusing on morbidity.
- This information was presented, and approval was provided by the California Conference of Local Health Officers and County Health Executives Association of California.
- Local deliverables with these funds will include activities related to expanded access to HIV/STI/HCV/mpox screening, testing, prevention services and materials for at risk populations. Activities should include increasing awareness and access to HIV/STI/HCV/mpox services, monitoring and responding to disease trends, delivering clinical expertise, providing timely treatment and prevention, notifying and providing partner services, linking patient and partners to prevention and care services including in atypical settings such as emergency departments and correctional facilities, and responding to outbreaks.
- Hiring priority should be given to front-line public health workforce DIS, DIS supervisors, PH nursing or other clinical, epidemiological staff and other roles that support the success of front-line DIS prevention, disease response and outbreak efforts.
- According to the 2018 Infrastructure Survey of local STD programs, the average salary of DIS, including DIS Supervisors, ranges between \$38,048 to \$131,418.

The local health department has the authority for STD Prevention and Control as outlined in the Summary of Regulations Related to STD Prevention and Control Efforts in California. <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STD-ForLocalHealthJurisdictions.aspx>

2. Grantee's Responsibilities

The Grantee agrees to:

- A. Direct activities toward achieving the program objectives set forth by the CDPH.
- B. Use these funds in accordance with any additional guidance set forth by the CDPH regarding the granting, use and reimbursement of the local assistance funds. Additional consideration should be given to other guidance from the Centers for Disease Control and Prevention (CDC) intended to highlight successful HIV, STIs, HCV, and mpox prevention and control strategies or outline California specific initiatives, policies and procedures. Please find relevant programmatic guidance documents on the CDPH STD Control Branch (STDCB) website:
<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/STD.aspx>

with CDPH and other LHJs and community-based organizations (CBOs) in California. The intent of this is to allow duplication (where possible) and cross-jurisdictional reach of successful interventions and activities aimed at the priority populations, clinical providers, and community partners. Source documents should be submitted to CDPH upon completion and with the annual progress report, and upon request from CDPH, as relevant.

- E. Submit information and reports as requested by CDPH.
- F. Ensure the use of a competitive bid process in the selection of all subgrantees. If the subgrantee is one where the LHJ has a current agreement with, indicate the date the agreement was effective.

3. Reporting Requirements

A. Case Report, Laboratory, and Interview Record

All Grantees shall comply with morbidity reporting requirements for reportable STDs identified in Title 17, California Code of Regulations (CCR) §2500, §2593, §2641.5-2643.20, and §2800 – 20182 Reportable Diseases and Conditions.

<https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/ReportableDiseases.pdf>

All Grantees, excluding Los Angeles and San Francisco, must enter HIV, STIs, HCV, and mpox provider reports and laboratory results for their jurisdiction directly into the California Reportable Disease Information Exchange (CalREDIE) system, the CDPH web-based reporting software for notifiable diseases. Interview and investigation data must be entered into either CalREDIE or the California Confidential Network for Contact Tracing (CalCONNECT). Data must be entered into the appropriate tabs and forms in either CalREDIE or CalCONNECT. Submission of hard copy forms for data entry into CalREDIE by CDPH or scanning of case reports, laboratory results, or interview records into the electronic filing cabinet (EFC), sans data entry, will not be accepted. Specific case investigation and report requirements are as follows:

1. Syphilis laboratory tests and confidential morbidity reports should be processed and assigned for investigation according to the California Syphilis Reactor Alert System (SRAS). Some health jurisdictions may have a more nuanced local system for prioritizing reported reactive syphilis tests.

- <https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/SyphilisReactorSRASChartAlgorithm.pdf>
2. Syphilis cases and Congenital Syphilis (CS) case investigations are to be reported according to updated CDPH protocols on the appropriate case report forms (Syphilis Interview Record or California Congenital Syphilis-CS Case Investigation and Report) found in CalREDIE or CalCONNECT; samples of these forms can be viewed at <https://www.cdph.ca.gov/Programs/PSB/Pages/CommunicableDiseaseControl.aspx>. Grantees will complete and close investigations in CalREDIE or CalCONNECT within 45 days of initial report to local health department.
 3. Grantees will participate in syphilis and CS-specific CalREDIE or CalCONNECT trainings and conduct quality control procedures, including review of cases to ensure appropriate surveillance case definition and reconciliation of case counts.

For additional STD-related CalREDIE help, please email STDCalREDIE@cdph.ca.gov.

Los Angeles and San Francisco Grantees must report the data outlined above to CDPH via a secure file transfer protocol (FTP) on a weekly basis. Data will be transmitted using the following formats:

- Case report data to be submitted using the National Electronic Telecommunications System for Surveillance (NETSS) or Message Mapping Guides (MMG) standards.
- Interview record data to be submitted in a format that conforms to the corresponding CalREDIE or CalCONNECT data elements.

Workforce Member(s) Training and Confidentiality.** Before being allowed access to CDPH PCI, all Contractor's Workforce Member(s) who will be granted access to CDPH PCI must be trained in their security and privacy roles and responsibilities at Contractor's expense and must sign a confidentiality Use statement indicating they will not improperly Use or Disclose the CDPH PCI to which they have access. Training must be on an annual basis. Acknowledgments of completed training and confidentiality statements, which have been signed and dated by Workforce Member(s) must be retained by the Contractor for a period of three (3) years following contract termination. Contractor shall provide the acknowledgements within five (5) business days to CDPH if so requested.
- B. Workforce Member(s) Discipline.** Appropriate sanctions, including termination of employment where appropriate, must be applied against Workforce Member(s) who fail to comply with privacy policies and procedures, acceptable Use agreements, or any other provisions of these requirements.
- C. Workforce Member(s) Assessment.** Before being permitted access to CDPH PCI, Contractor must assure there is no indication its Workforce Member(s) may present a risk to the security or integrity of CDPH PCI. Contractor shall retain the Workforce Member(s)' assessment documentation for a period of three (3) years following contract termination.

II. Technical Security Controls

A. Encryption.

- All desktop computers and mobile computing devices must be encrypted, in accordance with CDPH Cryptographic Standards or using the latest FIPS 140 validated cryptographic modules.
 - All electronic files that contain CDPH PCI must be encrypted when stored on any removable media type device (such as USB thumb drives, CD/DVD, tape backup, etc.), in accordance with CDPH Cryptographic Standards or using the latest FIPS 140 validated cryptographic modules.
 - CDPH PCI must be encrypted during data in-transit and at-rest on all public telecommunications and network systems, and at all points not in the direct ownership and control of the Department, in accordance with CDPH Cryptographic Standards or using the latest FIPS 140 validated cryptographic modules.
- B. Server Security.** Servers containing unencrypted CDPH PCI must have sufficient local and network perimeter administrative, physical, and technical controls in place to protect the CDPH information asset, based upon a current risk assessment/system security review.
- C. Minimum Necessary.** Only the minimum amount of CDPH PCI required to complete an authorized task or workflow may be copied, downloaded, or exported to any individual device.

Exhibit F
Information Privacy and Security Requirements

- D. Antivirus software.** Contractor shall employ automatically updated malicious code protection mechanisms (anti-malware programs or other physical or software-based solutions) at its network perimeter and at workstations, servers, or mobile computing devices to continuously monitor and take action against system or device attacks, anomalies, and suspicious or inappropriate activities.
- E. Patch Management.** All devices that process or store CDPH PCI must have a documented patch management process. Vulnerability patching for Common Vulnerability Scoring System (CVSS) “Critical” severity ratings (CVSS 9.0 – 10.0) shall be completed within forty-eight (48) hours of publication or availability of vendor supplied patch; “High” severity rated (CVSS 7.0- 8.9) shall be completed within seven (7) calendar days of publication or availability of vendor supplied patch; all other vulnerability ratings (CVSS 0.1 – 6.9) shall be completed within thirty (30) days of publication or availability of vendor supplied patch, unless prior ISO and PO variance approval is granted.
- F. User Identification and Access Control.** All Contractor Workforce Member(s) must have a unique local and/or network user identification (ID) to access CDPH PCI. To access systems/applications that store, process, or transmit CDPH PCI, it must comply with SIMM 5360-C Multi-factor Authentication (MFA) Standard and NIST SP800-63B Digital Identity Guidelines. The SIMM 5350-C provides steps for determining the Authenticator Assurance Level (AAL), and a set of permitted authenticator types for each AAL (0-3). Note: MFA requirement does not apply to AAL 0.

All Contractor Workforce Member(s) are required to leverage FIDO authentication. The FIDO authentication is AAL 3 compliance. FIDO certified devices such as YubiKeys and Windows Hello for Business (WHfB) are the mechanism for user authentication in the Department.

Should a Workforce Member(s) no longer be authorized to access CDPH PCI, or an ID has been compromised, that ID shall be promptly disabled or deleted. User ID’s must integrate with user role-based access controls to ensure that individual access to CDPH PCI is commensurate with job-related responsibilities.

- G. CDPH PCI Destruction.** When no longer required for business needs or legal retention periods, all electronic and physical media holding CDPH PCI must be purged from Contractor’s systems and facilities using the appropriate guidelines for each media type as described in the prevailing “National Institute of Standards and Technology – Special Publication 800-88” – “Media Sanitization Decision Matrix.”
- H. Reauthentication.** Contractor’s computing devices holding, or processing CDPH PCI must comply the Reauthentication requirement, in which a session must be terminated (e.g., logged out) when the specified time is reached. Note: Reauthentication requirement does not apply to Authenticator Assurance Level (AAL) 0.

In addition, reauthentication of individuals is required in the following situations:

- When authenticators change
- When roles change
- When the execution of privileged function occurs (e.g., performing a critical transaction)

- I. Warning Banners.** During a user log-on process, all systems providing access to CDPH PCI, must display a warning banner stating that the CDPH PCI is confidential, system and user activities are logged, and system and CDPH PCI Use is for authorized business purposes only. User must be directed to log-off the system if they do not agree with these conditions.
- J. System Logging.** Contractor shall ensure its information systems and devices that hold or process CDPH PCI are capable of being audited and the events necessary to reconstruct transactions and support after-the-fact investigations are maintained. This includes the auditing necessary to cover related events, such as the various steps in distributed, transaction-based processes and actions in service-oriented architectures.
