DEBT ENVIRONMENT & OUTLOOK

○ Debt Summary

- The Federal Reserve (Fed) is maintaining the overnight rate within its current target range of 3.5% to 3.75%. Financial markets had anticipated two additional interest rate cuts in calendar year 2026; however, this outlook has become increasingly uncertain as inflation remains persistent and disruptions in the oil supply chain have arisen due to the conflict in Iran. A decrease in interest rates would typically result in lower borrowing costs.
- The 2024-2028 Capital Improvement Plan (CIP) encompasses various capital projects, but there are no current plans to secure debt financing for their completion. Staff will explore all available sources to fund any potential gaps that may arise.

○ Obligations Summary

- The OPEB obligation decreased for the period ended June 30, 2025, due to earnings in the OPEB trust and ongoing contributions made to the trust through payroll deductions.
