Board of Supervisors
Re: Extension of Williamson Act

Please be advised that the T3 Ranch, County Road 57 at Guinda, Calif. wish that you continue to renew the 9-yr. contract of the Williamson Act, SB 863 adopted in 2010 and later implemented AB 1265 in 2011.

The Williamson ^{Act} is extremely important to continue to keeping the ranch a cattle grazing ranch which is main income as unable to produce crops of any kind due to lack of quality water of heavy contents of boron, calcium, other minerals as mercury, heavy with salt.

This side of Cache Creek are very shallow wells, our house well 39 feet deep which is undrinkable nor able to cook with. We have proven we go any deeper below blue clay we get such a high concentrate of salt not even a pig will drink the water. This ranch main use is for cattle grazing only as also high numbers of predators. When I hear coyotes I turn on house lights and blow a high pitch whistle to scare them at 2:00AM or 5:00AM.

Please continue the Williamson Act contract as I'm charged presently on tapes of close to \$10,000 or less than 4,000 acres and ground water charges are being considered to be charged this year on our tapes which many or most farmers/ranchers an unfair tap. My ranch provides a lot of groundwater as well as a lot of Creek water directly from rain.

Thank you.

Sincerely,
Mrs. Merrie L. Tompkins
T3 Ranch
